| | 3.17.3 ICT Sector | |
| | 3.17.2 Informal Sector | |
| | 3.17.1 SMMEs Data | |
| | 3.17 Emerging Drivers | |
| | 3.16.7 Logistics Hub | |
| | 3.16.6 Medical Sector | |
| | 3.16.5 Educational Sector | |
| | 3.16.4 Finance Sector | |
| | 3.16.3 Retail Sector | |
| | 3.16.2 Services Sector | |
| | 3.16.1 Public Service Sector | |
| | 3.16. Traditional Drivers | |
| | 3.15 Opportunity Analysis | |
| | 3.14 Economic Maturity Analysis | |
| | 3.13 Sectorial Contribution to Jobs | |
| | 3.12.2 Analysis by source of Tourist Origin | |
| | 3.12.1 Number of Trips by Purpose of Trip | |
| | 3.12 Tourism | |
| | 3.11.4 Community Services | |
| | 3.11.3 Finance Sector | |
| | 3.11.2 Transport Sector | |
| | 3.11.1 Trade Sector | |
| | 3.11 Tertiary Sectors | 158 |
| | 3.10.3 Construction Sector | |
| | 3.10.2 Utilities Sector | |
| | 3.10.1 Manufacturing Sector | |

| 3.17.7 Agriculture | |
|--|--------|
| 3.17.8 Sports Tourism | |
| 3.18 Future Economic Drivers | |
| 3.18.1 Special Economic Zones (SEZ) | |
| 3.18.2 Science Park Project | |
| 3.18.3 Industrial Parks Concept | |
| CHAPTER Four: Basic Services and Infrastructure Development | |
| 4.1. POWERS AND FUNCTIONS OF POLOKWANE MUNICIPALITY | |
| 4.2. WATER SERVICES | |
| 4.2.1 Principles of Water Service Provision | |
| 4.2.2 Polokwane Municipality 15 Regional Water Schemes (RWS) | |
| 4.2.3 Water Sources | |
| 4.2.4 Free Basic Water | |
| 4.2.5 Water Quality | |
| 4.2.6 Water Challenges | |
| 4.2.7 Water Supply to Schools | |
| 4.3. SANITATION | |
| 4.3.1. Free Basic Sanitation | |
| 4.3.2. Waste Water Treatment Plants | |
| 4.3.3 Sanitation Challenges | |
| 4.3.4 Sanitation in Schools | |
| 4.4. BACKLOG OF BASIC SERVICES | |
| 4.5. Prepaid Water Smart Metering | |
| 4.6. AC Pipes Replacement | |
| 4.6.1 Objectives of AC Pipes Replacement: | |
| 4.6.2 Phase 1 – AC Pipes Replacement | |
| 4.6.3 Challenges of AC Pipes Replacement | |
| 4.6.4 Phase 2 – AC Pipes Replacement | |
| 4.6.5 Remaining Extent of AC Pipes per Cluster | |
| VISION 2030=SMART CITY | Page 8 |

| 4.6.6. AC Pipes Replacement Process in the CBD | |
|---|--------|
| 4.7. Flora Park /Serala View Mini Water Reservoir | |
| 4.8. ENERGY SERVICES | |
| 4.8.1 Energy Master Plan | |
| 4.8.2 Free Basic Electricity | |
| 4.8.3 Free Basic Alternative Energy | |
| 4.8.4 Electricity Losses | |
| 4.8.5 Energy Services Major Challenges | |
| 4.9. Pre-Paid Electricity Meters | |
| 4.10 Polokwane/Seshego Urban Complex Technical Assessment | |
| 4.11. Rural Areas Electrification | |
| CHAPTER Five: Environmental and Social Analysis | |
| 5.1. ENVIRONMENTAL ANALYSIS | |
| 5.1.1 Climate Description | |
| 5.1.2 Pollution Levels - Air Quality | |
| 5.1.3 Topography | |
| 5.1.4 Geology | |
| 5.1.5 Hydrology | |
| 5.1.6 Vegetation | |
| 5.1.7 Soils | |
| 5.1.8 Heritage Resources | |
| 5.1.9 Polokwane Game Reserve (Conservation) | |
| 5.1.10 Euphorbia Clivicola | |
| 5.1.11 Euphorbia groenewaldii | |
| 5.1.12 Giant Bullfrog - Pyxicephalus adspersus | |
| 5.2. Climate Change and Global Warming | |
| 5.2.1 City of Polokwane Plans on Climate Change | |
| 5.2.2 Solar Energy | |
| 5.2.3 Environmental Challenges | |
| VISION 2030=SMART CITY | Page 9 |

| 5.2.4 Major Environmental Achievements | |
|---|---------|
| 5.2.5 Department of Environmental Affairs: (EPIP) Funding | |
| 5.2.6 Provincial Intervention for Environmental Management – LEDET | |
| 5.2.7 Planting of Trees Programme | |
| 5.2.8 Polokwane Environmental Forum | |
| 5.2.9 Capricorn District Environmental Forum | |
| 5.3. WASTE MANAGEMENT | 207 |
| 5.3.1 Integrated Waste Management Plan (IWMP) | |
| 5.3.2 Promote Recycling and Recovery of Waste | |
| 5.3.3 Refuse Removal Trends | |
| 5.3.4 Municipal Landfill Sites | |
| 5.3.5 Waste Management Challenges | |
| 5.3.6 Waste Management Status Quo | |
| 5.3.7 Waste Collection in Rural Areas | 214 |
| 5.3.8 Rural Transfer Station Projects | |
| 5.4 By-Law Enforcement & Security | 215 |
| 5.4.1 Challenges and Intervention for By-Law Enforcement & Security | |
| 5.5 DISASTER MANAGEMENT AND FIRE SERVICES | 217 |
| 5.5.1 Fire Services Analysis | |
| 5.5.2 Accredited Fire-Fighting Course | 218 |
| 5.5.3 Fire Services Challenges | |
| 5.5.4 Disaster Management Analysis | |
| 5.6. Traffic and Licenses Analysis | 220 |
| 5.6.1 Traffic Management | 220 |
| 5.6.2 Traffic Revenue Enhancement Streams | |
| 5.6.3 Licensing Services | |
| 5.6.4 Computerised Learners Testing | |
| 5.6.5 Licensing Transactions over 12 Months Period | |
| 5.6.6 Accidents Statistics Per Financial Years | |
| VISION 2030=SMART CITY | Page 10 |

| 5.6.7 Challenges for Traffic and Licensing | |
|---|---------|
| 5.6.8 Measures to address Challenges: | |
| 5.7. ENVIRONMENTAL HEALTH | |
| 5.8 SPORTS AND RECREATION ANALYSIS | |
| 5.8.1 Municipal Swimming Pools | |
| 5.8.2 New Peter Mokaba Stadium | |
| 5.9 CULTURAL SERVICES AND LIBRARIES | 229 |
| 5.9.1 Cultural Services Analysis | |
| 5.9.2 Libraries Analysis | |
| 5.9.2 Available Services at Municipal Libraries | |
| 5.9.3 Library Challenges | 231 |
| 5.9.4 Museums Analysis | |
| 5.9.5 Bakone Malapa Open-air Museum | 234 |
| 5.9.6 Heritage Sites Analysis | |
| 5.9 .7 Cultural Desk | |
| CHAPTER Six-Financial Analysis | 238 |
| 6.1. FINANCIAL MANAGEMENT AND VIABILITY | 238 |
| 6.1.1 Revenue Management | |
| 6.1.2 Status on Revenue Management | |
| 6.1.3Key Challenges Revenue Management | |
| 6.1.4 Interventions Revenue Management | |
| 6.2 Billing System | 240 |
| 6.2.1 Munsoft New Financial System | |
| 6.2.2 Smart Meter Programme | |
| 6.2.3 Objectives Smart Meter Programme | |
| 6.2.4 Access to Properties Challenges | |
| 6.2.5 Surcharge on Water Consumption. | |
| 6.2.6 Account Overcharged | 242 |
| 6.2.7 Statements/ Monthly Invoices | 242 |
| VISION 2030=SMART CITY | Page 11 |

| 6.2.8 Payment of Accounts Facilities | |
|---|---------|
| 6.2.9 Unallocated Deposits / Payment | |
| 6.3. Budget Related Policies | 243 |
| 6.4 Expenditure Management | 244 |
| 6.4.1 Expenditure Management Status Quo | |
| 6.4.2 Arears Affected by Cost Containment Regulations | 244 |
| 6.4.3 Challenges Expenditure Management | |
| 6.4.4 Intervention Expenditure Management | |
| 6.5 Investments Measures | 245 |
| 6.6 Asset Management | 245 |
| 6.6.1 Asset Management Plans | |
| 6.7. DEBTORS MANAGEMENT | 246 |
| 6.8. CASH FLOW | 247 |
| 6.9. AUDIT OUTCOMES | 247 |
| 6.10 FINANCIAL SUSTAINABILITY | 248 |
| 6.11 SUPPLY CHAIN MANAGEMENT POLICY (SCM) | 248 |
| 6.11.1 Supply Chain Committees | |
| 6.11.2 Unauthorised, Irregular and Fruitless Expenditure | |
| 6.12 PUBLIC PRIVATE PARTNERSHIP (PPP) | 250 |
| 6.12.1 Alternative Funding Model for Key Projects (PPP) | 251 |
| 6.13. VALUATION ROLL | 252 |
| 6.14 BUDGET REPORTING | 252 |
| 6.14.1. Municipal Regulations on a Standard of Charts of Accounts (MSCOA) | |
| CHAPTER Seven - Good Governance and Public Participation | 254 |
| 7.1. Performance Management System (PMS) | 254 |
| 7.1.1. Audit of Performance Management Information | 254 |
| 7.2 Integrated Development Plan (IDP) | 255 |
| 7.2.1 Integrated Development Planning | |
| 7.2.2 IDP/ Budget Process Plan | |
| VISION 2030=SMART CITY | Page 12 |

| 7.2.3. The IDP/Budget Committees | |
|--|---------|
| 7.2.4 IDP Technical Committee | |
| 7.2.5 IDP Steering Committee | |
| 7.2.6 IDP Representative Forum | |
| 7.3 Public Participation and Stakeholder Engagements | |
| 7.4 MEC IDP Assessments | |
| 7.5 Strategic Planning Sessions (Bosberaad) | |
| 7.6. MUNICIPAL CLUSTER OFFICES | 258 |
| 7.6.1 City Cluster Office | |
| 7.6.2 Molepo-Chuene-Maja Cluster Office | |
| 7.6.3 Mankweng Cluster Office | |
| 7.6.4 Sebayeng-Dikgale Cluster Office | |
| 7.6.5 Seshego Cluster Offices | |
| 7.6.6 Moletjie Cluster Office | |
| 7.6.7. Aganang Cluster Office | |
| 7.7. Clusters and their Wards | |
| 7.7.1. Clusters Challenges | |
| 7.7.2 Proposed Clusters Intervention | |
| 7.8. PROJECT MANAGEMENT UNIT (PMU) | |
| 7.8.1 Grants Allocation and Expenditure for 2018/19 FY | |
| 7.8.2 MIG Trends Over Five Years (2014/15 to 2018/19) | |
| 7.8.3 Grant Allocation for 2019/20 FY | |
| 7.8.4 Neighborhood Development Programme | |
| 7.8.5 Other Grants Financial Overview (2017/18-2019/20) | |
| 7.8.6 Summary Status of the 2019/20 Grants Funded Projects | |
| 7.9 CASH REPLACEMENT RESERVE (CRR) | |
| 7.9.1 Summary Status of the 2019/20 CRR Projects | |
| 7.10 OTHER GRANTS SUPPORT | |
| 7.10.1 Expanded Public Works Programme | |
| ISION 2030=SMART CITY | Page 13 |

| 7.10.2 The Objective of EPWP Phase IV | 273 |
|---|---------|
| 7.10.3 Community Work Programme | |
| 7.10.4 EPWP Vuk'uphile Learnership Programme | |
| 7.10.5 EPWP Jobs | |
| 7.10.6 PMU Challenges | |
| 7.10.7 Proposed Intervention for PMU | |
| 7.11 INTERNAL AUDIT | 277 |
| 7.11.1 Definition and Mandate of Internal Audit | |
| 7.11.2 Internal Audit Strategic Coverage Plan | |
| 7.11.3Audit Committee and Performance Audit Committee | |
| 7.11.4Operation Clean Audit (OPCA) | |
| 7.11.5 Resources Availability | |
| 7.12 RISK MANAGEMENT | |
| 7.12.1 Risk Management Committee | |
| 7.12.2 Top 10 Strategic Risks Identified | |
| 7.12.3 Fraud and Corruption Strategy | |
| 7.13 PUBLIC PARTICIPATION AND COUNCIL SUPPORT | |
| 7.13.1 Key Municipal Stakeholders | |
| 7.13.2 Relationship with Traditional Leaders | |
| 7.13.3 Additional Tribal Offices | |
| 7.13.4 The Building Blocks of Good Governance | |
| 7.13.5 Ward Committee and CDW's | |
| 7.14 SECRETARIAT | |
| 7.14.1The Objectives for Secretariat Unit | |
| The main objectives for Secretariat unit are | |
| 7.14.2 Challenges of Secretariat Unit | |
| 7.15 COUNCIL COMMITTEES | |
| 7.15.1 Political Representation | |
| 7.15.2 Council Meeting | |
| VISION 2030=SMART CITY | Page 14 |

| 7.16 Portfolio Committees | |
|--|------------------------|
| 7.17 Municipal Public Account Committee - MPAC | |
| 7.18 COMMUNICATION AND MARKETING | |
| 7.18.1 Complaints Management System | |
| 7.19 SPECIAL FOCUS PROGRAMMES | 290 |
| 7.20 HEALTH AND SOCIAL DEVELOPMENT | 291 |
| 7.20.1 Health Facilities Analysis | |
| 7.20.2 Regional Hospitals and Clinics | |
| 7.20.3 HIV /AIDS Prevalence in Polokwane | |
| 7.20.4 National HIV Prevalence | |
| 7.20.5 Awards Received by Special Focus | |
| CHAPTER Eight - Municipal Transformation and Organisational Develo | <mark>pment</mark> 294 |
| 8.1. ORGANIZATIONAL STRUCTURE | |
| 8.1.1 Legislative Authority | |
| 8.2 The New Organizational Structure | |
| 8.2.1 Total Number of Positions in the new Structure per Directorate | |
| 8.2.2 Total Number of New Positions | |
| 8.3 Skills Development and Training | |
| 8.4 Employment Equity | |
| 8.4.1 Employment Equity Statistics | |
| 8.4.2 Gender Summary | |
| 8.4.3 Summary of People with Disabilities | |
| 8.5 Job Grade Analysis | |
| 8.6 Vacancy Rate and Turnover | |
| 8.7 OCCUPATIONAL HEALTH & SAFETY (OHS) | |
| 8.7.1 Challenges for OHS unit | |
| 8.7.2 Injury On Duty per SBU | |
| 8.8 EMPLOYEE RELATIONS | |
| 8.8.1 Employee Assistance Programme (EAP) | |
| VISION 2030=SMART CITY | Page 15 |

| 8.9. RECRUITMENT | |
|--|---------|
| 8.10 FLEET MANAGEMENT SERVICES | |
| 8.10.1 Total Fleet for Polokwane Municipality | |
| 8.10.2 Challenges of fleet SBU | |
| 8.10.3 Categories of Vehicles to be Disposed /Auction | |
| 8.10.4 High Maintenance Expenditure | |
| 8.10.5 Interventions by the Fleet Unit | |
| 8.11 INFORMATION COMMUNICATION AND TECHNOLOGY (ICT) | |
| 8.11.1 ICT – Smart City Concept | |
| 8.11.2 ICT Governance | |
| 8.11.3 Alignment of Municipal Objectives and ICT objectives. | |
| 8.11.4 ICT Challenges | |
| 8.11.5Enterprise Resource Planning Project | |
| 8.11.6 New ICT Hardware | |
| 8.11.7 Network Connectivity and VOIP Telephone System Implementation | |
| 8.11.8 Network Connectivity for Aganang and Chuene/Maja Cluster | |
| 8.12 RECORDS MANAGEMENT | |
| 8.12.1 The Objectives of Records Unit | |
| 8.12.2 Challenges for Records Unit | |
| 8.13 LEGAL SERVICES | |
| 8.13.1 Core Responsibilities for Legal Services | |
| 8.13.2 Four Specialized Areas at Legal Services: | |
| 8.13.3 Challenges for Legal Services | |
| 8.13.4 Interventions for Legal Services | |
| 8.14 FACILITIES MANAGEMENT | |
| 8.14.1 Procedures for Maintenance Services | |
| 8.14.2 Priority of Work and Response Times | |
| 8.14.3 Maintenance of Municipal Facilities | |
| 8.14.4 Trades Conducted Under Routine Maintenance | |
| VISION 2030=SMART CITY | Page 16 |

| 8.15 CODES AND STANDARDS FOR MAINTENANCE | 327 |
|--|---------|
| CHAPTER Nine: Roads and Transportation Services | |
| 9.1. Leeto la Polokwane | |
| 9.1.1. The Benefits of Leeto la Polokwane | |
| 9.1.2 Road Network Map for Leeto | |
| 9.1.3 Commuter Transport Corridors and Facilities | |
| 9.1.4 Mode of Public Transport Facilities | |
| 9.1.5 Polokwane International Airport | |
| 9.1.6 Polokwane Municipality Airport | |
| 9.1.7 Comprehensive Integrated Transport Plan (CITP) | |
| 9.1.8 Rail | |
| 9.2 FREIGHT TRANSPORT | |
| 9.2.1 Road Freight | |
| 9.2.2 Air Freight | |
| 9.2.3 Rail Freight | |
| 9.2.4 Polokwane Integrated Rapid Public Transport System (IRPTS) | |
| 9.2.5 Transport Implications of the SDF | |
| 9.2.6 Intermodal/ Long Distance Transport Hub | |
| 9.3 TRUNK ROUTES CONSTRUCTION | |
| 9.4. ROADS & STORM WATER | |
| 9.4.1 Roads and Storm Water Analysis | |
| 9.4.2 Classification of Roads | |
| 9.4.3 Roads Challenges | |
| 9.4.4 ROADS BACKLOG | |
| 9.5.3 Seshego Precinct Plan | |
| 9.6. Leeto First Bus Arrival in Polokwane | |
| CHAPTER Ten: Strategies Phase | |
| 10.1 Polokwane Municipality Strategies Chapter | |
| 10.2 SWOT Analysis | |
| VISION 2030=SMART CITY | Page 17 |

| 10.3 Strategic Intent of Polokwane Municipality | |
|--|------------------|
| 10.4 Polokwane Municipality Service Delivery Priorities for the 2016 – 2021 term | n of council 342 |
| 10.5 Polokwane Municipality's IDP Strategic Objectives | |
| 10.6 Smart Pillar Impacts and Outcomes | |
| 10.7 Outcomes Based Management and Logic Model | |
| 10.8 Strategic Alignment | |
| 10.9 Directorates Scorecards | 351 |
| 10.9.1 Water and Sanitation Services Directorate Scorecard | |
| 10.9.2 Energy Services Directorate Scorecard | |
| 10.9.3 Community Services Directorate Scorecard | |
| 10.9.4 Roads and Transportation Directorate Scorecard | |
| 10.9.5 Planning and Economic Development Directorate Scorecard | |
| 10.9.6 Corporate and Shared Services Directorate Scorecard | |

(ii) Foreword of the Executive Mayor

As we are moving closer to the end of this current term of Council, our quest to rev up service delivery continues with the same vigour. This planning and implementation of service delivery relies on the founding principle of continuous mobilization of resources and consultation with all stakeholders to empower communities.

The Municipality is geared towards holding open and honest consultations with all stakeholders. We appreciate participation by all stakeholders during various planning stages to ensure that this IDP's vision and objectives are realised and that Polokwane continues to be the backbone of the Limpopo Province.

As we embark on the consultation we need to bear in mind that the backlog in infrastructure development exceeds the resources or budget that is available to deal with all at once. We therefore must take tough and difficult choices in line with the demands by the communities. However, we must reach common ground to set priorities that would tackle the most of fundamental needs within the communities.

Our planning is now guided by the baseline study that Polokwane has started to move closer to the league of bigger cities. We are no longer getting Municipal Infrastructure Grant and are now receiving the Integrated Urban Development Grant that recognises Polokwane as a growing city with unique urban challenges that are not common in other local municipalities and that Polokwane aspires for greatness. This is a critical

VISION 2030=SMART CITY

boost towards delivering our mandate to implement new projects and maintain strategic infrastructure that is critical for service delivery and ensure that business continues to thrive.

Local municipalities are battling with paying their huge debts to water boards and Eskom and are often threatened with being cut off due to the culture of none payment of services by households, business and government departments. This is a serious threat and we must therefore continue to implement measures to protect and maximize revenue collection and call upon all to continue paying for services.

We continue to perform our oversight responsibility as Council to provide direction into the budget and IDP process and their priorities as mandated by the communities. The Re aga Polokwane project which embodies transformation and the reconstruction and development of new infrastructure in key areas of service delivery continues to drive our course to work together will all stakeholders and create partnerships to ensure the municipality's long term infrastructure development strategies geared towards reliable and sustainable services to all.

Our goal on provision of sustainable water supply, sanitation, replacing gravel roads with tarred roads, installation and maintenance of street lights to ensure a safer environment, housing and installation of new infrastructure to ensure sustainable electricity remain in focus.

Plans to realise a metro status in the near future are continuing without doubt and are embedded in this IDP in line with the Vision 2030. This will ensure that the municipality is enabled to provide high quality services for the future of this area.

One of the biggest challenge is delaying of projects implementation due to stoppages during the community protests. Some of the newly build infrastructure were also vandalised. Among some of our challenges we count some of our communities and failing contractors. Our message and plea to the communities is that today one of our biggest risk in implementing projects is you our communities going to stop projects. I plead! This practice must come to an end.

I call upon all the people of Polokwane to join hands with us as we continue in our journey to build a better and smatter Polokwane. We have started and we are focused on the goal. We are building Polokwane. Re aga Polokwane!

This IDP is a continuation of what this Council has been striving for since the beginning of its term; to improve the living conditions of Polokwane's residents and to create an

environment that allows economic activities to thrive through the development of new and modern infrastructure.

Cllr T.P Nkadimeng Executive Mayor Polokwane Municipality

VISION 2030=SMART CITY

(iii) Foreword of the Municipal Manager

The Constitution of the Republic of South Africa (1996) Chapter 7, section 152 (1) set out the objects of Local Government as follows;

- (a) To provide democratic and accountable government for local communities;
- (b) To ensure the provision of services to communities in a sustainable manner;
- (c) To promote social and economic development;
- (d) To promote a safe and healthy environment, and
- (e) To encourage the involvement of communities and community organizations in matters of local government.

To achieve the above local government objects, the local sphere of government or municipalities use the Integrated Development Plan (IDP) as the principal strategic planning instrument which guides and informs all planning, budgeting, management and decision – making processes in a municipality.

In terms of Municipal System Act, 32 of 2000, Section 28 (1), each municipal council must adopt a process set out in writing to guide the planning, drafting, adoption and review of its Integrated Development Plan. Polokwane Municipality like any other municipality develops an IDP / Budget /PMS process plan on an annual basis. It is with great pleasure to present to the communities of Polokwane Municipality a reviewed Integrated Development Plan (IDP), particularly during this last year of the term of Council which commenced in 2016.

The IDP/Budget/PMS process plan outlines activities and processes that will unfold culminating with the final approval and adoption of the IDP by Council. In simple terms it means it explains in detail what has to happen, when, by whom, with whom, and where. The process plan is also integrated within the municipality's corporate calendar. The process plan is always aligned to the corporate calendar, and the following key schedule areas; Risk, Audit, PMS,

VISION 2030=SMART CITY

Budget and the District Process Plan. The main purpose for the alignment for Polokwane Municipality was to achieve the Smart Governance as specified on our Smart City Pillars. Polokwane Municipality prides itself for adhering to the set schedule of activities as reflected in the process plan.

To ensure that we develop an Integrated Development Plan (IDP) document that is people focused. We have followed legislations that requires municipalities to establish appropriate mechanism, processes and procedures and organs of state, including traditional authorities and other role players to be identified and consulted on the drafting of the Integrated Development Plan. For the purpose of achieving this legislative prescript, Polokwane Municipality has established the IDP/Budget/PMS technical and steering committee. Every financial year, Polokwane Municipality appoints Directors and Managers and this committee is chaired by the Municipal Manager. The IDP/Budget/PMS technical Committee serve as the working committee for the development or review of the IDP, Budget and Institutional performance.

The Members of the Mayoral Committee (MMC's) are also appointed to serve in the Steering Committee which is chaired by the Executive Mayor. The Municipal Manager, Directors and selected Managers serve a supporting role whereas the Councillors play an oversight role in the development and review of the IDP, Budget and Performance of the Municipality. The political leadership is also charged with the responsibility to lead the public and stakeholder engagements in the development and review of the IDP, Budget/PMS Representative Forum as a further mechanism/platform for further engagements mainly with organized formations and government departments. This forum is fully functional and its meetings are held every phase of the IDP for feedback purposes and further engagements with stakeholders.

Polokwane Municipality has dedicated the month of April every year to consult with communities within all the clusters in the development and review of the Integrated Development Plan, Budgeting and Performance of the Institution. Furthermore, Polokwane Municipality has requested other stakeholders to enlist their membership in order to broaden the scope of engagements. The following are some of the stakeholders with which Polokwane Municipality engages with from time to time;

- Community
- Business Sector
- Government Departments
- Education Sector
- Non-Government Organizations
- Labour Unions
- Organized Groups
- Traditional Authorities

VISION 2030=SMART CITY

- Finance Institutions
- Mines
- Civic Organizations

The City of Polokwane has launched an exciting programme called "Re aga Polokwane" that is geared towards ensuring that the City and its citizens are working together to build the City of Polokwane.

Currently there are a number of major projects being earmarked in the City of Polokwane. The nature and magnitude of these projects are such that they will have a permanent impact in the City – impacting quality of life for the average resident, stimulating growth, enabling the municipality to improve its efficiency in service delivery and revenue collection.

Amongst other benefits, some of these projects include the replacement of 177km of AC (asbestos cement) pipes in the municipality's jurisdiction, a project to replace conventional water and electricity meters with smart meters in a number of areas in the City. The introduction of a rapid bus service (Leeto la Polokwane), a waste management project as well as a major student accommodation drive to support the growing number of students in the City.

In order for these projects to be successful, there is a need for broad support from all key stakeholders. This includes the leadership within the municipality, the workers at all levels of the municipality, the business community as well as the residents in general. The rolling out of these projects generally comes with short term inconveniences and challenges to the residents, such as the disruption of traffic and resultant congestions, as well as temporary and unscheduled disruption of water and electricity.

Under Polokwane Housing Association (PHA), land parcels have been identified for development as follows;

- ✓ Ga Rena Phase 2 to deliver 492 social housing units (Construction has started)
- ✓ Polokwane Ext 106 to deliver 546 student bed housing units
- ✓ Polokwane Ext 107 to deliver 754 Gap market rental housing units
- ✓ Polokwane Ext 76 to deliver 240 social housing units
- ✓ Polokwane Ext 79 to deliver 100 social housing units

The above construction / development will result in the total number of 2446 housing units. The number will add to PHA's currently management of 508 units in the City, Ladanna with an estimated 1.524 residents and Seshego CRU with an estimated 567 residents on the project known as Ga-Rena Housing Village and Seshego CRU. More of these projects and other catalyst projects are well captured in this IDP document for your ease of reference.

VISION 2030=SMART CITY

Lastly, although the City of Polokwane and the Country as a whole has witnessed a sizeable amount of rainfall recently, it is important to note that our reservoirs are still below the required percentages, meaning that we are still a water scarce country. Therefore, let us use water sparingly. My sincere appreciation to Council, the administration, and all external stakeholders for your continued contribution in all our municipal IDP review including this 2020/2021 IDP review.

Mr. D.H Makobe Municipal Manager Polokwane Municipality

VISION 2030=SMART CITY

(iv) Vision, Mission & Values

The Municipality undertook an interactive process as part of ensuring that the current Vision, Mission and Values for the City of Polokwane are reviewed and refined in line with the Key Themes of becoming as Smart City.

The Vision, Mission and Values for the City of Polokwane are as follows:

VISION 2030=SMART CITY

(v) Meaning of colour of Stars

RED (Dynamic)

Red implies the energetic and dynamic mindset of both Polokwane people and the city towards Mutual goal achievement.

Black (stability)

Black implies confidence, stability and structure that the city rests and relies upon.

Green (Growth)

Green signifies the commitment the city displays towards its environment and preserving such also, the natural magnificence it has to offer.

The star

The star represents Polokwane as a city of realizing dreams under its perfect and pure, uninhibited clear African sky rarely found in other capital cities. Its people are focused, clear minded, fresh and innovative. All as one are reaching for the stars and looking ahead and all are looking to build their futures and those of their city.

(vi) 15- meter Bronze Sculpture

Meaning of words on the sculpture erected at the Nelson Mandela Traffic Circle at N1 entrance:

- Progress Polokwane is a Municipality which is developing and growing
- **Unity** The community and the municipality are united.
- Equity...... There is balance and people's rights are respected
- **Prosperity**...... We are prospering as a province and also as a municipality

VISION 2030=SMART CITY

Sculpture erected at the Nelson Mandela Traffic Circle at N1 entrance

(vii) Vision 2030 – Smart City

The City of Polokwane has developed its long term strategy for the next term and beyond through VISION 2030. This strategy is pegged against a long-term growth path to transform the municipality into a bustling and sustainable entity that distinguishes the Municipality as a City of stars leading in innovation through the **SMART CITY** concept.

Embedded in this strategic positioning is the need to continue on the foundation that best fits the municipal ability to deliver on its strategy and mandate. The process of planning towards 2030 has already been started from 2013/14 Financial year. Council has adopted Polokwane 20 Year Economic Growth and Development Plan (EGDP).

The main objective of the EGDP is to assist the City of Polokwane to achieve real and sustainable economic growth and development, as well as transforming and aligning the City to become a Smart City within the next 20 years. It is therefore vital that this plan set out very specific goals and implementable projects to attain the City's vision. **Smart City'** concept is a forward looking plan into, **Economy, People, Governance, Mobility, Environment and Space.**

VISION 2030=SMART CITY

The plan has identified **4 Main clusters** that will guide the Municipality in realizing the vision:

- 1. Economic Cluster
- 2. Physical Cluster
- 3. Social Cluster
- 4. Institutional Cluster

The four clusters influence one another and failure to promote growth and development in one, would lead to failure in another. Integrative interventions would furthermore ensure that holistic planning takes place.

The EDGP has identified the **pillars** which should guide the Municipality to work towards achieving the realization of the Vision. All the planning within the Municipality should be guided by what the pillars want to achieve i.e.

- Smart Economy;
- Smart Environment;
- Smart Governance;
- Smart Living;
- Smart Mobility; and
- Smart People.

Figure: Below is a diagram representing the above mentioned Pillars

Source: Polokwane EGDP

VISION 2030=SMART CITY

The description of each pillar is as follows:

"Smart Economy" refers to an economy that, through the use and integration of various Technological systems and devises, performs well in the market comparative to similar cities, is forward thinking by embracing new technologies and systems of operation and is sustainable in the long run by continually growing and adapting to the circumstances surrounding it.

"Smart Environment" refers to the effective and efficient use of the surroundings of the city, in both an Urban and "green/environmental" context, such as the landscape and unique geological aspects of the city as well as operating the city in an environmentally friendly manner by using resources as efficiently as possible and providing green spaces and Control of air Pollution by industries.

"Smart Governance/Administration" refers to the relationship between government and the citizens of city, being interactive through technological systems implemented by government and private enterprises along with the innovative means of governments to communicating with the citizens through systems such as e-governance/e-democracy, keeping them informed and involved with processes, decisions and systems available to them.

"Smart Living" refers to the quality of life for city inhabitants through the provision of essential services along with additional systems that make the city more livable. This also affects a city's desirability and creates an environment that is conducive to attracting the citizens and investment that the city needs in order to prosper.

"Smart Mobility" refers to technologically advanced systems integrated with existing or new transport systems in and around the city affecting the transport and logistics. These systems could typically keep citizens informed about transport related issues and in so doing keep the city system functioning as smooth as possible.

"Smart People" refers to a citizenship of a city being well educated, both academically and also to the systems and processes of the Smart City and how to make optimal use of them. The involvement of citizens in the city and the way in which it functions forms another key aspect of this element of the Smart City and can determine the level of success of the smart city.

(viii) Reaga Polokwane Programme

The City of Polokwane has launched an exciting programme called "Re aga Polokwane", that is geared towards ensuring that the City and its citizens are working together to build the city of Polokwane.

VISION 2030=SMART CITY

The "Re aga Polokwane" programme will see greater communication and cooperation between the City and its various constituencies, including households, businesses and other stakeholders, to ensure that everyone associated with the City is working towards a common vision; building a smart city by 2030.

Polokwane, being the Capital city of the Limpopo Province has over the years seen a steady migration from other parts of the province to the City. This has been driven mainly by people coming to seek employment and business opportunities. According to Stats SA, the population of Polokwane was approximately 62 000 in 2001, and rose to over 130 000 in the census conducted in 2011; the **population more than doubling** in a period of ten years. There has been further population growth in the years since the last census.

This rapid increase in the population size has come with a number of challenges for the Municipality, particularly the development of the infrastructure required to support this increase in population. Recently, the municipality was required to place a moratorium on new property developments in order to allow the Municipality to focus on developing certain infrastructure required to support the rate of property development.

The Projects

Currently, there are a number of major projects being embarked on in the City of Polokwane. The nature and magnitude of these projects are such that they will have a permanent impact on the City – impacting quality of life for the average resident; stimulating growth; enabling the Municipality to improve its efficiency in service delivery and revenue collection, amongst other benefits. Some of these projects include the replacement of 177km of AC (asbestos cement) pipes in the municipality's jurisdiction; a project to replace conventional water and electricity meters with smart meters in a number of areas in the City; the introduction of a rapid bus service; a waste management project; as well as a major student accommodation drive to support the growing number of students in the city.

In order for these projects to be successful; there is a need for broad support from all key stakeholders. This includes the leadership within the municipality, the workers at all levels of the municipality, the business community, as well as residents in general. The rolling out of these projects generally comes with short term inconveniences and challenges to the residents; such as the disruption of traffic and resultant congestion, as well as temporary and unscheduled disruption of water and electricity. This can typically lead to disquiet amongst the residents, and subsequently resistance to the projects. The City therefore considers it a priority to **actively engage** and **'on board'** all these stakeholders.

By creating the "Re aga Polokwane" programme, the City seeks to ensure that this **communication is enhanced** and **given a context** that will make the inconveniences more tolerable for the residents.

VISION 2030=SMART CITY

Through the Reaga Polokwane Programme the City will have a platform through which to communicate with its citizens on all projects it is running and will be able to run various campaigns that encourage residents to be part of the efforts to build Polokwane. Furthermore, residents and businesses will better understand the various inconveniences they are suffering, and tolerate them better, knowing that there are long term gains for all associated with the city.

Reaga Polokwane also provides a **partnership platform** for the City and citizens to work together to ensure the long term development of the city. Individuals and businesses will be encouraged to approach the City and through the Reaga Polokwane programme work with the City on initiatives and campaigns that have long term benefits for the City of Polokwane and its residents.

The "Re aga Polokwane" platform will be used to ensure the City's citizens have a better understanding of the various projects that the city is embarking on and why the city has embarked on these projects.

The "Re aga Polokwane" brand provides residents and businesses with a platform and opportunity to use their own initiative to come up with programmes that will benefit and improve the city in various ways.

Communication will be designed to speak to the multi-cultural composition of the City's residents. This is a brand for the Municipality, businesses, residents and visitors. We are creating a unified identity that will be easier and more cost effective to manage. By speaking with one voice, under one brand, we will present a united front with all our individual programmes contributing to the City of Polokwane's reputation for leadership, innovation and community service.

Chapter One: The Planning Framework

1.1 Introduction

Integrated Development Planning (IDP) is a **process** through which municipalities prepare a strategic development plan which extends over a five-year period. The Integrated Development Plan (IDP) is a **product** of the IDP process. The IDP is the principal strategic planning instrument which guides and informs all planning, budgeting, management and decision-making processes in a municipality.

Through Integrated development planning, which necessitates the involvement of all relevant Stakeholders, a municipality can:

- Identify its key development priorities;
- Formulate a clear vision, mission and values;
- Formulate appropriate strategies;
- Develop the appropriate organizational structure and systems to realize the vision and mission; and
- Align resources with the development priorities.

1.2 Legislative Background and Policy Imperatives

1.2.1 The Objects of Local Government as set out in Section 152 of the Constitution

The Constitution of the Republic of South Africa, 1996 stipulates that the local sphere of government consists of municipalities which were established for the whole of the territory of South Africa – the so-called wall-to-wall municipalities. **The objects of local government are set out in Section 152** of the **Constitution**. Accordingly, the objects are –

a) To provide democratic and accountable government for local communities;

- b) To ensure the provision of services to communities in a sustainable manner;
- c) To promote social and economic development;
- d) To promote a safe and healthy environment; and

e) To encourage the involvement of communities and community organizations in the matters of local government.

VISION 2030=SMART CITY

The Constitution commits government to take reasonable measures, within its available resources, to ensure that all South Africans have access to adequate housing, health care, education, food, water and social security.

The development of the Integrated Development Plan (IDP) in municipalities is in different legislations that govern local government. The legislative framework that the IDP is vastly discussed includes the Municipal Systems Act of 2001 and the Municipal Structures Act of 1997. Another piece of legislation which has a tremendous impact on the IDP is the Municipal Finance Management Act 56 of 2003 (MFMA) as it outlines the alignment of the budget and IDP.

Other legislation and policy documentation which contain reference to integrated development planning are:

- The Constitution of the Republic of South Africa 200 of 1993
- Tourism Act 72 of 1993
- Development Facilitation Act, Act 67 of 1995
- The Municipal Finance Management Act 56 of 2003
- Housing Act 107 of 1997
- White Paper on Local Government of 1998
- Local Government: Municipal Structures Act 117 of 1998
- National Land Transportation Transition Act 22 of 2000
- Disaster Management Act 52 of 2002

The following Environmental legislations have been taken into consideration:

- National Environmental Management Act, Act 107 of 1998(NEMA)
- Environmental Conservation Act, Act 73 of 1989
- National Environmental Management Act: Air Quality Act (Act 39 of 2004
- Heritage Resources Act (Act 25 of 1995)
- Atmospheric Pollution Prevention Act, Act 45 of 1965(APPA)
- National Environmental Management: Biodiversity Act 10 of 2004(NEMBA)
- National Environmental Management: Protected Area Act, Act 57 of 2003(NEMPAA)
- NEMA: Waste Management Bill (Notice 1832 of 2007)
- NEMA: Environmental Impact Assessment Regulations (Notice R385 of 2006)
- Limpopo Environmental Management Act, (Act 7 of 2003)
- National Water Act, Act 36 of 1998
- Water Service Act, Act 108 OF 1997

1.2.2 National Spatial Development Perspective (NSDP)

The National Spatial Development Perspective (NSDP) (Presidency, 2006) is the primary spatial lens through which policymakers view socio-economic development in the country

VISION 2030=SMART CITY

as a whole. It presents wide variety of socio-economic trends emerging in South Africa, and then draws inferences about how that emerging space economy should affect public investment (expenditure) in the immediate future.

National Spatial Development Plan and Principles

Those interpretations and conclusions are, however, guided by a number of normative principles that ultimately steer national infrastructure investment and development decisions. NSDP principles are that:

• Future settlement and economic development opportunities should be channelled into activity corridors and nodes that are adjacent to/linked to the main growth centres in the country. Infrastructure investment should primarily support localities that will become major growth nodes in South Africa.

1.2.3 MTSF

The Medium Term Strategic Framework (MTSF) for the period 2009 to 2014 was approved by Cabinet on 1 July 2009. The MTSF, under the theme, 'Together doing more and better', is informed by the 2009 national electoral mandate and outlines the government's medium-term strategy to meet this mandate. It serves as the foremost frame of reference outlining the government's policy posture and Programme to improve the conditions of life of South Africans over the next five years. The MTSF identifies the development challenges facing South Africa and defines the priorities over the next five years.

The strategic priorities of government for the mandate period

- Ensuring more inclusive economic growth, decent work and sustainable livelihoods
- Economic and social infrastructure
- Rural development, food security and land reform
- Access to quality education
- Improved health care
- Fighting crime and corruption
- •

1.2.4 Government Programme of Action

The Programme of Action (PoA) is an annual statement of government's priorities for the year. It aims to outline government's major plans for the year ahead. The PoA is informed by the MTSF, the deliberations of the January Cabinet lekgotla and the President's State of the Nation Address. Government has identified 10 priority areas, from now up to 2014. These are to:

VISION 2030=SMART CITY

- Speed up economic growth and transform the economy to create decent work and sustainable livelihoods;
- Introduce a massive Programme to build economic and social infrastructure;
- Develop and implement a comprehensive rural development strategy linked to land and agrarian reform and food security;

1.2.5 The New Growth Path

This National Policy framework deals specifically with issues such as creating decent work, reducing inequality and defeating poverty through "a restructuring of the South African economy to improve its performance in terms of labor absorption as well as the composition and rate of growth". Of practical consequence to local government, are the specific job drivers that have been identified:

1. Substantial public investment in infrastructure both to create employment directly, in construction, operation and maintenance as well as the production of inputs, and indirectly by improving efficiency across the economy.

2. Targeting more labor absorbing activities across the main economic sectors – the agricultural and mining value chains, manufacturing and services.

1.2.6 National Development Plan (NDP)

The National Development Plan (**NDP**) aims to eliminate poverty and reduce inequality by 2030. South Africa can realize these goals by drawing on the energies of its people, growing an inclusive economy, building capabilities, enhancing the capacity of the state, and promoting leadership and partnerships throughout society. South Africa has made remarkable progress in the transition from apartheid to democracy.

1.2.7 Outcome 9

As part of government performance monitoring and evaluation system, the Medium Term Strategic Framework and government Programme of Action and 12 National outcomes give effect to the policy direction adopted by cabinet. Each outcome has a limited number of measurable outputs with targets.

The 12 outcomes have delivery agreement which in most cases involve all spheres of government and a range of partners outside government. Outcome 9 commits municipalities to deliver services in a responsive, accountable, effective and efficient manner to enhance the livelihoods of communities in a sustainable manner.

- 1. Improved quality of basic education;
- 2. A long and healthy life for all South Africans;
- 3. All people in South Africa are and feel free;

VISION 2030=SMART CITY

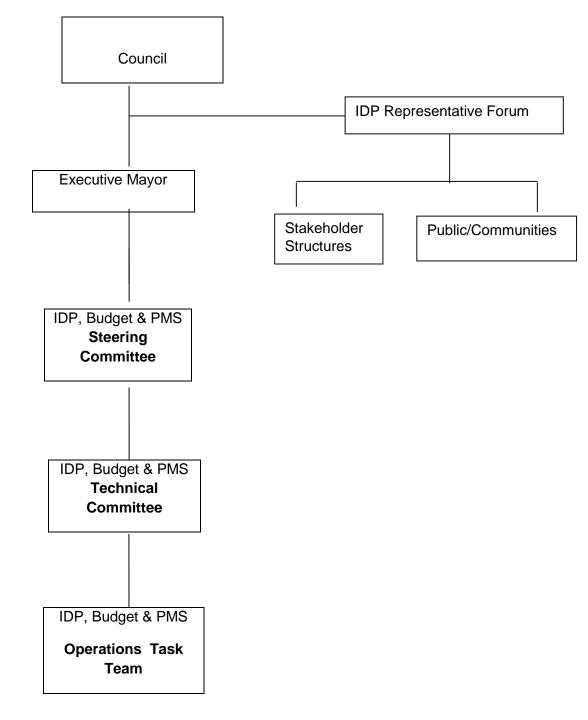

- 4. Decent employment through inclusive economic growth;
- 5. A skilled and capable workforce to support an inclusive growth path;
- 6. An efficient, competitive and responsive economic infrastructure network;
- 7. Vibrant, equitable and sustainable rural communities with food security for all;
- 8. Sustainable human settlements and improved quality of household life
- 9. A responsive, accountable, effective and efficient local government system

1.2.8 Limpopo Development Plan (LDP)

- The LDP strives for economic development and transformation to enable the province to address triple challenges: poverty, inequality and unemployment
- The main economic agenda of the LDP is to intensify job-creation and enhance the skills base of the province towards supporting socio-economic growth and development in the province.
- The province aims to **diversify** the economy through placing emphasis in manufacturing thus creating value along commodities with competitive advantage within the prioritized economic sectors, in pursuit of addressing losses in employment and promoting sustained job opportunities. (Cluster Value-Chain development).

1.3 Institutional Arrangement to Drive IDP Process

The following diagram is a schematic representation of the organization structure that drives the IDP Process:

VISION 2030=SMART CITY

| Structure that manage/drive the IDP/BUDGET/PMS Process | | | | |
|--|--|---|--|--|
| Structure | Composition | Role | | |
| Council | Members of Council (Chair: Speaker) | Make final decisions. Consider and adopt Framework/ process plan. Consider, adopt and approve the IDP/Budget before the start of the financial year. | | |
| Executive Mayor | Executive Mayor | Manage the drafting of the IDP review. Assign responsibilities in this regard to the Municipal Manager. Submit the process plan to Council for adoption. Submit the draft and final reviewed IDP to the Council for adoption and approval. The responsibility for managing the draft of the IDP is assigned to the office of the Municipal Manager. | | |
| Municipal Manager | The Municipal Manager | Municipal Manager has the following responsibilities: Preparation of the Process Plan. Day to day management and coordination of the IDP Process in terms of the timeframes, resources and people. Ensuring involvement of all relevant role-players, especially management officials, to ensure that timeframes are being adhered to. That the planning process is horizontally and vertically aligned | | |

1.4 Process Overview: Steps and Events (Process Plan)

Chapter 4 of the Municipal Systems Act, 2000 section 17(2) stipulates that a municipality must establish appropriate mechanisms, processes and procedures to enable the local community to participate in the affairs of the municipality.

Four major functions can be aligned with the public participation process namely:

- Needs identification;
- Identification of appropriateness of proposed solutions;
- Community ownership and buy-in; and
- Empowerment.

1.4.1 Mechanism and Procedures for Public Participation

The following mechanisms for participation will be utilized by the City of Polokwane:

• Media

National and Local newspapers, local radio stations and the Municipal newsletter will be used to inform the community of the progress of the IDP.

• Website

The Municipal website will also be utilized to communicate and inform the community. Copies of the IDP and Budget will be placed on the website for people and service providers to download.

VISION 2030=SMART CITY

Municipal Facebook, Twitter and WhatsApp line

• Municipal Facebook; Twitter **and WhatsApp line** accounts will be used to inform the public once the draft IDP/Budget has been tabled at Council.

• Traditional Authorities and Municipal Cluster Offices

Copies of the IDP will be distributed to traditional authorities' offices, municipal cluster service center offices, municipal resource Centre and all municipal libraries.

1.4.2 Procedures for participation

The following procedures for participation will be utilized:

• IDP Representative Forum (IDP Rep Forum)

The forum consists of members representing all stakeholders in the municipality. Efforts will be made to bring additional organizations into the IDP Rep Forum and ensure their continued participation throughout the process.

Community Consultation Meetings

- For the entire review/development of the IDP/Budget/PMS, communities will be consulted during the months of **April** each financial year directly on soliciting the needs and presenting the draft IDP/Budget of the municipality.
- This will deepen the participation of the community in the entire process of the IDP/Budget/PMS cycle.
- Inputs raised and discussed in the Draft IDP/Budget public participation Consultation will be noted by the IDP office and Public Participation SBU, Community inputs and comments will be taken into consideration when compiling the Final IDP/Budget of the Municipality.

VISION 2030=SMART CITY

1.5. Activity Flow

- The Executive Mayor through the office of the Municipal Manager will be responsible for the development/review of the IDP/Budget.
- The Municipal Manager has delegated the responsibility of secretariat of the IDP to the Manager: IDP.
- The IDP and Budget offices shall draft the IDP/Budget process plan with the IDP Steering Committee and submit to Council for approval.
- The Executive Mayor shall establish and consult with the IDP/Budget Steering Committee and IDP/Budget Rep Forum in all the Phases of the IDP.
- The Executive Mayor shall submit the Framework and Process Plan to Council.
- The Municipal Manager shall facilitate the technical /steering committee in the drafting of the IDP in all the phases.
- The IDP Manager, Budget Manager and the Municipal Manager shall monitor the planning in all phases, ensuring involvement of communities and adherence to timeframes throughout.
- The IDP Steering Committee shall determine the strategic objectives and priorities for service delivery in the municipality in consultation with stakeholders.
- The IDP/Budget Technical Committee shall develop and compile the status quo report, analysis phase, identify strategies, draft programme and projects aligned to the sector plans.
- The draft IDP/Budget shall be submitted to Admin and Governance Portfolio Committee for oversight.
- The Executive Mayor shall submit the draft and Final IDP/Budget to Council.

VISION 2030=SMART CITY

1.7 Monitoring of the Process

- The IDP, Budget and PMS offices shall coordinate the development of the IDP and Budget according to the process plan and report accordingly to the Municipal Manager.
- The District Mayor's IGR Forum shall monitor and ensure compliance to the District IDP Framework.
- The IDP/Budget/PMS Steering committee will monitor and ensure compliance in the implementation of process plans.
- Department of Cooperative Governance, Human Settlement and Traditional Affairs (CoGHSTA) and Office of the Premier will ensure support on the co-ordination and alignment of Provincial and National Departments and role players.

CHAPTER Two: Spatial Analysis and Human Settlements

2. Spatial Rationale

2.1 Spatial Setting of Polokwane Municipality Jurisdiction

Polokwane meaning "Place of Safety" in Sotho, is a City and also the Capital City of the Limpopo Province.

The municipality comprises of a total area of +/- **539 982.5 Ha** and is located in the central part of the Limpopo Province. It is located within the Capricorn District in the Limpopo Province and accounts for 3% of the Province's total surface area of ±124 000 km². In terms of its physical composition Polokwane Municipality is **23%** urban and **71%** still rural. The remaining area **(6%)** comprises small holdings and institutional, industrial and recreational land.

It is the economic hub of Limpopo Province and is strategically located to be the administrative and economic capital of the Province. It is situated at the cross roads of important national and provincial roads which radiate out into the hinterland providing good access to other towns. There is a definite opportunity for Polokwane to become a logistics hub and freight interchange within the region, also given its proximity to the neighbouring countries of Botswana, Zimbabwe, Mozambique and Swaziland. Three of the four Spatial Development Initiatives pass through Polokwane, which repeat the City's strategic location and its importance as far as the economy of the Province is concerned.

The municipal spatial pattern reflects that of the historic apartheid city model characterised by segregated settlements. At the centre of the area is the Polokwane economic hub, which comprises the CBD, industrial area and range of social services and well established formal urban areas servicing the more affluent residents of Polokwane.

Situated on the outskirts in several clusters are less formal settlement areas which are experiencing enormous influx from rural to urban migration trends. These areas are in dire need of upgraded services and infrastructure, both social and engineering, and are struggling to cope with the informal influx of more people who want access to an improved quality and standard of living. Polokwane municipality is made up of Forty-Five (**45**) wards,

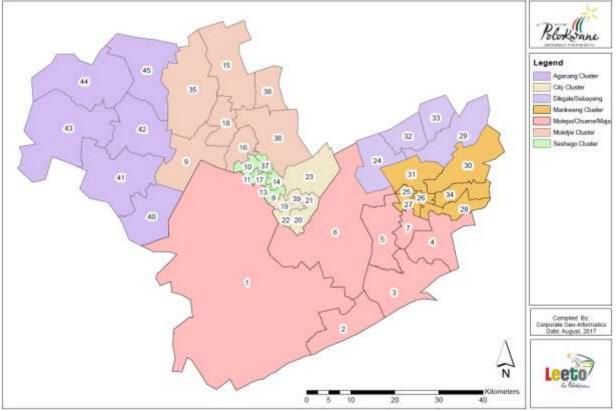

The main 7 Clusters of settlements are:

- 1) City
- 2) Seshego
- 3) Mankweng
- 4) Sebayeng/Dikgale

VISION 2030=SMART CITY

- 5) Molepo/ Chuene/ Maja
- 6) Moletjie
- 7) Aganang

Map: Polokwane Cluster Map

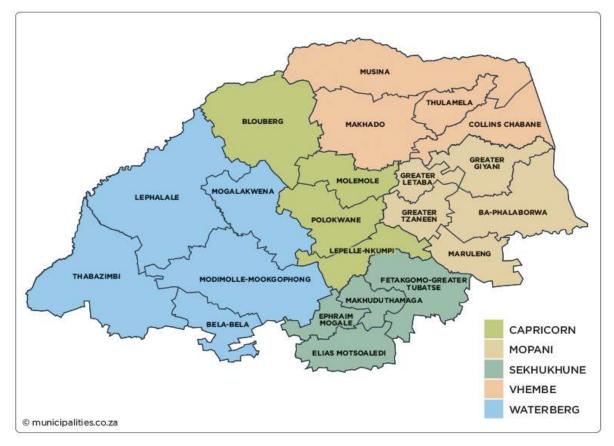

Source: Coorporate Geo-Informatics (Polokwane G.I.S) 2017

- **Seshego:** located west of the CBD. It is nearest to the economic core of all settlement areas and thus has the best access to the formal economy of Polokwane;
- Mankweng: located 30km to the east of the city. It constitutes a large area and is mixed formal and informal. It accommodates the University of Limpopo and is a long established settlement area.
- **Sebayeng**: located 30 km to the north-east of the city centre and is less formal and newer than Mankweng. The area is experiencing influx and is growing at a rapid rate.

VISION 2030=SMART CITY

- Maja: is located 20km to the south and comprises of an informal settlement area, with very limited services and infrastructure. The settlement area sits on the fringe of the rural hinterland and is surrounded by a vast clustering of rural / semi-rural areas.
- Moletjie: It is about 32 km northeast of City of Polokwane and comprises an informal settlement area, with very limited services and infrastructure. The settlement area sits on the fringe of the rural hinterland and is surrounded by a vast clustering of rural / semi-rural areas.
- Aganang: is situated 45 km west of Polokwane. It is a rural Cluster and has four (4) Traditional Authorities namely Moletši, Matlala, Maraba and Mashashane. The area was incorporated into Polokwane Local Municipality and serve as the seventh cluster area for Polokwane. The area is purely rural and has no township; it has a potential in Agriculture and Tourism.

2.2 Regional Content

Polokwane City inter-connects and interrelates horizontally with the adjacent municipal areas. Municipalities that are adjacent to Polokwane Municipality include the following:

Table: Regional Context

| | Municipalities that are adjacent to Polokwane |
|--------------------|--|
| Mogalakwena | The N1 National Road forms the main carriage way from the south to the north. The main connection between Polokwane Municipality and Mogalakwena Municipality is the Makapan's World Heritage site in the north eastern part of the Mogalakwena Municipal Area. |
| Molemole | Agriculture forms the main economic base of Molemole Municipal area. Agricultural produce is transported to Polokwane City. Road P94/1 and the N1- North form the main links between Molemole Municipality and Polokwane Municipality. |
| Greater Tzaneen | Road P17/1 (R71 east)) forms an important link between Polokwane Municipality and Greater Tzaneen Municipality. Various tourism attractions exist in the western part of the Greater Tzaneen Municipal Area, e.g. Magoebaskloof, the Wolkberg Conservancy Area and various overnight accommodation facilities. Apart from tourism, the R71 is used as a transport corridor for agriculture and mining. |
| Lepelle Nkumpi | Lebowakgomo, which is the capital of Lepelle Nkumpi Municipality, is located approximately 40km South of Polokwane City. The legislature and other government related functions are located in Lebowakgomo. Road P33/1 forms the main link between Lebowakgomo and Polokwane City. Lepelle Nkumpi Municipality has a strong mining base. Mining- related goods and services are transported along Road P33/1 |

VISION 2030=SMART CITY

2.3 Hierarchy of Settlement

The hierarchy of settlements according to the SDF is indicated in the below table.

2.4 Spatial Planning and Land Use Management Tools/LUMS

The Spatial Planning and Land Use Management Act, 16 of 2013 requires that, the Municipality must develop a system of planning that guide the spatial and land use planning within the Municipality. The Municipality is administered by the series of planning legislations that govern the administration of land use planning namely:

2.4.1 Town planning and Township Ordinance, Ordinance 15 of 1986.

The application of the Ordinance is within the area that is within the proclaimed Polokwane/Perskebult Town planning Scheme, 2016. The area provides types of ownership such as deed of transfer (secured ownership). The said act is applicable in area proclaimed by the said legislation. Seshego falls within such boundaries, but the administration thereof was not transferred to Municipality fully in order to integrate within the said legislation. Therefore, mixed tenure rights are found within the Municipality. In this regards, there is a need for upgrading of the R293 tenure system from the deed of grant to Deed of transfer. Those entire townships have to be upgraded in terms of the provision of SPLUMA, Act 16 of 2013. The Municipality have witness the issue of revenue collection and valuation of the properties contradicting with the provision of proclamation R293 of 1962 since it has its own application that differs with the rates act and property valuation. There is a great need to deal with the current situation and upgrade the status quo of the township through the engagement with the Limpopo provincial department of Coorporate Government, Human Settlement and Traditional Affairs.

2.4.2 Proclamation R293 of 1962

Polokwane Municipality has a Township known as Mankweng, Sebayeng and Seshego as developed by the provision of the said legislation. Several issues need to be dealt with in terms of upgrading the status of the Land and the rates collection. Polokwane has witness the issues of boycott on the payment of rates by the community of Mankweng for example. The issues cut across the planning part base on the following:

VISION 2030=SMART CITY

- a. The zoning in terms of the provision of the proclamation R293 of 1962 is govern by the condition attached to the Deed of Grantⁱthat does not provides different classification of zoning unlike in terms of the provision of ordinance.
- b. There is no Town Planning Scheme or Land Use Scheme to deal with the issue even though the Municipality is finalizing the Draft Land Use Scheme in terms of the SPLUMA. Section 2(2) of the SPLUMA may be used but the upgrading of the Tenure System has to be deal with since the act may not automatically change the tenure system.
- c. The provision of the scheme as control tool need to be accompanied by upgrading of all the Townships within those areas under R293 of 1962 as briefed on (b) above.
 The final approval is still with the provincial governance for other processes since the amendment on the condition still within the ambit of the provincial department.

2.4.3. Proclamation R188 of 1969

Polokwane was assigned power of dealing with processing of the Land Use Rights in areas under the control of the Traditional Local Authorities. The ownership is Permission to Occupy (P.T.O). In this form, there is no real right registered against the property since the majority of the settlement are not proclaimed and registered with the deeds registry. The provision of the SPLUMA requires that all citizen should have access to secure tenure. In this regards, it is the duties of all the spheres of government to properly plan the development in rural areas for better transfer of ownership to occupants. The introduction of the Rural settlement development strategy is used as a key towards addressing the issues of tenure and better management of the land use rights and associated uses.

2.4.4 Local Government Municipal Systems Act, Act 32 of 2000.

The focus on the act is based on section 26 of the said legislation that demand that the Municipality in areas of operation must develop the Spatial Development Framework that will provide the guidelines for the Implementation of the Land use management System (Land Use Scheme or Town Planning Scheme). The Spatial Development Framework provides the current and future development plans of the Municipality looking at ensuring the integration with other components of the IDP. This includes financial spending, environmental management plans etc.

2.4.5 Spatial Planning and Land Use Management Act, Act 16 of 2013

The Municipality has started with the key components as identified for the implementation of the SPLUMA which includes the following:

VISION 2030=SMART CITY

- Established MPT and Authorized official (Gazette as per Council Resolution
- Municipal Appeal Tribunal
- Delegation of Powers
- Tariff
- By-law
- Land Use scheme (wall to wall)
- Municipal Spatial Development Framework (MSDF)

The above act provides new form of planning that demand new planning approaches such as development of the New Spatial Development Framework that complies with the contents as highlighted in section 20 of the said legislation. All above activities should be in line with the provision of or incompliance with section 6 of the SPLUMA, Act 16 of 2013. The principles below provide the guides for the application of the Act:

(a) The principle of spatial justice, whereby-

- (i). past spatial and other development imbalances must be redressed through improved access to and use of land;
- (ii). spatial development frameworks and policies at all spheres of government must address the inclusion of persons and areas that were previously excluded, with an emphasis on informal settlements, former homeland areas and areas characterised by widespread poverty and deprivation;
- (iii). spatial planning mechanisms, including land use schemes, must incorporate provisions that enable redress in access to land by disadvantaged communities and persons;
- (iv). land use management systems must include all areas of a municipality and specifically include provisions that are flexible and appropriate for the management of disadvantaged areas, informal settlements and former homeland areas;
- (v). land development procedures must include provisions that accommodate access to secure tenure and the incremental upgrading of informal areas; and
- (vi). a Municipal Planning Tribunal considering an application before it, may not be impeded or restricted in the exercise of its discretion solely on the ground that the value of land or property is affected by the outcome of the application;

Submission

The principle provides guides in addressing the spatial segregation by putting measures in place for proper planning for both areas disadvantages and informal settlement. This is done through providing access to the use of land through the policy such as SDF that provides spatial information useful for economic development at large (Mining, Agriculture etc.). It is through planned settlement that most of the Informal Settlement has to be eradicated and

VISION 2030=SMART CITY

provides secure tenure. These aspects of secure tenure need to be addressed at large by looking at the rural areas as well.

Municipal plans and policies should visualise the long terms view of at least 20 years and beyond in an integrated manner. This is through the SDF, Density policies, URS, RSS, HSP, Infrastructure Master Plans, City development Policies, financial planning etc. Both urban and rural should be guarded for managed growthⁱⁱ.

"today, 54 per cent of the world's population lives in urban areas, a proportion that is expected to increase to 66 per cent by 2050. Projections show that urbanization combined with the overall growth of the world's population could add another 2.5 billion people to urban populations by 2050, with close to 90 percent of the increase concentrated in Asia and Africa, according to a new United Nations report launched today".

- (b) the principle of <u>spatial sustainability</u>, whereby spatial planning and land use management systems must—
 - (i). promote land development that is within the fiscal, institutional and administrative means of the Republic;
 - (ii). ensure that special consideration is given to the protection of prime and unique agricultural land;
 - (iii). uphold consistency of land use measures in accordance with environmental management instruments;
 - (iv). promote and stimulate the effective and equitable functioning of land markets;
 - (v). consider all current and future costs to all parties for the provision of infrastructure and social services in land developments;
 - (vi). promote land development in locations that are sustainable and limit urban sprawl; and result in communities that are viable;

Polokwane Municipality has developed the Economic Growth and Development Plan, a vision 2030 which was adopted by Council in line with the national and provincial Development Plan. The vision 2030 of the Municipality has identified six (6) pillars that are aimed at addressing the challenges by year 2030 or prior. Each pillar signals the action needed within each directorate in driving the city into a "Smart City". Polokwane for example, experiences a shortage of water, and that is a basic need. The concept aimed at putting measures in place to deal with the management and sustainable uses of limited resources in a sustainable means.

The programs as identified should be cleared, be assessed and measured as per the targeted date. Until to date, there is still a great need for the alignment of the projects with the segments of each pillar and be measured or reviewed. This demands the revisiting of the Implementation Plan of the EGDP targeted time.

VISION 2030=SMART CITY

(c) the principle of efficiency, whereby-

- (i). land development optimises the use of existing resources and infrastructure;
- (ii). decision-making procedures are designed to minimise negative financial, social, economic or environmental impacts; and
- (iii). development application procedures are efficient and streamlined and timeframes are adhered to by all parties;

This principle tries to strengthen the physical cluster of the Implementation [plan of the EGDP with the aim of speed-up services delivery without Red-tapes. Process plans and procedures should be clear and provided in various forms. The introduction of the SPLUMA requires that, the systems and procedures must be transparent and fair.

 (d) the principle of <u>spatial resilience</u>, whereby flexibility in spatial plans, policies and land use management systems are accommodated to ensure sustainable livelihoods in communities that are most likely to suffer the impacts of economic and environmental shocks;

The 2030 vision is a long plan that should be guided by the proper plans of the municipality. However, it is important that the plans should not be rigid or static but encourage flexibility when new development is introduced. This enables the developers to be accommodated based on sufficient evidence that; such demand may yield good results at the end. Municipal plans must be accommodative to new initiatives and be aligned with the municipal plans.

- (e) the principle of good administration, whereby-
 - (i). all spheres of government ensure an integrated approach to land use and land development that is guided by the spatial planning and land use management systems as embodied in this Act;
 - (ii). all government departments must provide their sector inputs and comply with any other prescribed requirements during the preparation or amendment of spatial development frameworks;
 - (iii). the requirements of any law relating to land development and land use are met timeously;
 - (iv). the preparation and amendment of spatial plans, policies, land use schemes as well as procedures for development applications, include transparent processes of public participation that afford all parties the opportunity to provide inputs on matters affecting them; and
 - (v). policies, legislation and procedures must be clearly set in order to inform and empower members of the public.

VISION 2030=SMART CITY

The IDP is an **Integrated** Plan that has to include all plans of the Municipality together with the national and provincial mandate on development. This is concluded base on the intergovernmental relations within the spheres of Government. Public participation becomes key towards transparent governance. Therefore, the principle strengthens the use of all mechanisms in collecting the data, communicating the data collected and interpretation of the data collected to the community. By so doing this, it will enable the Municipality to deliver its basic services with success.

2.5. The Purpose of SPLUMA

It replaces the Town Planning and Township's ordinance, 15 of 1986 and all other pieces of town planning legislation. In addition to all the land use applications which were processed thought the ordinance, the following are included in the SPLUMA:

- Act No. 84 of 1967 Removal of Restrictions Act (The whole)
- Act No. 88 of 1967 Physical Planning Act (The whole)
- Act No. 113 of 1991 Less Formal Township Establishment Act (The whole)
- Act No. 125 of 1991 Physical Planning Act (The whole)
- Act No. 67 of 1995 Development Facilitation Act (The whole)

All of the above applications were administered through the Provincial Government, because of the SPLUMA; they will all be administered and processed by the local authority.

2.5.1 SPLUMA Implementation Progress

The municipality has already developed and is implementing the Municipal Planning By-law, 2017 as from the 2018/19 financial year. All components of the act were adhered to and the Municipal Planning Tribunal is in operation. The Polokwane Land Use Scheme for area under R293 and R188, 2017 (that covers the area which was not included in the existing) is being developed and in the final stage of proclamation.

2.6 Integrated Land Use Scheme

An integrated Land Use Management Scheme that will cover the wall to wall is under the process of being developed or to be compiled to address some of the main short comings of the existing Polokwane/Perskebult Town planning scheme, 2016 and current LUS, 2017. The existing Town Planning Scheme was limited to the urban area of Polokwane City/ Seshego as well as the adjacent small holdings / farm portions (Urban Fringe Area). The commercial farming area, rural villages and Tribal areas were excluded from the current land use scheme, however with the enactment of the SPLUMA, the Municipality has approved Polokwane Land Use Scheme, 2017 for Mankweng, Sebayeng, Aganang and rural area which will cover the rest of the municipal boundary excluding the area under the current Polokwane/Perskebult Town planning Scheme, 2016.

VISION 2030=SMART CITY

Land use management system of the municipality consists of various mechanisms of which the Spatial Development Framework (SDF), Municipal Planning Tribunal, Municipal Appeal Tribunal and Land Use Management Scheme (LUMS) form the main or core components of a land use management system.

Capacity building on land use planning and management are amongst the core strategic mandates of the Provincial Department. In terms of the Intergovernmental Relations Act 13:2005 the department is mandated to build the system's capacity in the province – especially Traditional Authorities for land use planning management and control. Mankweng and Sebayeng is now covered and the Department of Cooperative Government, Human Settlements and Traditional Affairs is assisting the municipality with the Pilot project.

Tribal Authority have mixed challenges relating to land use planning, control, management and integrity systems: linking to planning, legal rights, ownership, control records, conflict and environmental management failure.

2.7. Municipal Planning By- Law 2017

The Municipality was required to develop a Municipal Planning By-Law for its entire area in terms of section 32 of the Spatial Planning and Land Use Management Act, Act 16 of 2013. The reason for such demand was to have uniform procedures within the Municipality for Spatial Planning and Land Use Management and address the challenges caused by the old order legislations. The Polokwane Municipal Planning By-law has positively included most issues that the ordinance fails to address the operation of the By-law commenced on the 2 July 2018 with all the supporting components in place.

2.8. Polokwane Urban Renewal and CBD Development Plan

The said plan has highlighted the key issues to be addressed in order to keep business within the City and unpacking the development needs as per the provision of the EGDP 2030 vision. Key principles identified for URS and CBD Development plan 2016.

| PRINCIPLE 1: URBAN MANAGEMENT AND MAINTENANCE | |
|--|---------------------|
| Action 1: Establishment of Polokwane CBD Manager's Office | |
| Action 2: Establishment of Communication/ Complaints System in C | BD Manager's Office |
| Action 3: Joint Service Agreements for External Stakeholders | |
| Action 4: Minimum Basic Service Levels Commitment | |
| Action 5: Special Precinct: Mini IDP/ Joint Maintenance Scheduling | Programme/ Budget |
| Action 6: Dedicated Response Crews | |
| Action 7: Public Property Management – Neglected Buildings | |
| Action 8: Private Property Management – Neglected Buildings | |
| Action 9: Monitoring and Review | |

VISION 2030=SMART CITY

| PRINCIPLE 2: S | SAFETY, SECURITY AND BY-LAW ENFORCEMENT |
|--------------------|---|
| Action 1: Visible | Policing and Support Services |
| Action 2: CCTV a | and Other Crime Prevention Mechanisms |
| Action 3: Design | -out Crime and Provision of Street Lighting |
| | v Enforcement Campaign/ Capacity Building |
| | nent By-Law Enforcement Programme |
| | ing Up Of Municipal Prosecution Processes |
| | ANDMARKS, PUBLIC SPACES, ARTS, CULTURE AND HERITAGE |
| | cement of Gateways and Access Routes |
| Action 2: Establis | sh Public Arts and Culture Initiatives in Civic Park and Mark Street Park |
| | lization of the Sterkloop Spruit Public Open Space |
| | ping of the Water land Iconic Public Space |
| | thening of the Provincial Sports and Recreation Precinct |
| | ce Priority NMT Movement Network |
| | Management of the Visual City Scape |
| | OCAL ECONOMIC DEVELOPMENT |
| | al Trading / Micro-retailing Formalization |
| | ization of the African Market Square |
| | Management and Recycling |
| | sion of Urban Development Zone |
| Action 5: Incentiv | |
| | SOCIAL DEVELOPMENT |
| | Capacity Building and Training Strategy |
| | on of Community Facilities |
| Action 3. Provide | a Access to Broadband Tolocommunication at Iconic Public Spaces |

Action 3: Provide Access to Broadband Telecommunication at Iconic Public Spaces

The above principle will enable the city to restructure and consider key elements that will address the current challenges faced by the Municipality. If proper plans are integrated, the municipality will further attract investors to the city that will address city decay. Managing the city need a dedicated team of both the external and internal stakeholders to deal with the challenges holistically. Safety, open space management, LED and social development are important. Key strategic projects in response to the above principles are detailed on the page 89-98 of the said document.

2.9. Growth Point Analysis

Polokwane Municipality has the provincial growth point which functions as a first order settlement. However, the geographical area of Polokwane Municipality is predominantly rural including considerable land under traditional authorities. Polokwane has a large portion of the population living in rural or peri-urban areas, which most part it is unplanned and poorly serviced. All spatial planning must take cognizance of the population and contribute to the improvement of their living conditions.

VISION 2030=SMART CITY

The Limpopo Spatial Rationale identified a hierarchy of settlements from provincial growth point scattered settlements. Development interventions are proposed in terms of infrastructure provision and government services in such a manner that the natural economic potential of growth points is further stimulated. Interventions at scattered settlements are such that basic services are provided to ensure that the quality of life objective in the Growth and Development Strategy is achieved, but that prevents over investment in places that are depopulating.

- 1. Provincial Growth Point: City and Seshego
- 2. District Growth Point: Mankweng
- 3. Municipal Growth Point: Sebayeng and Aganang (to be incorporated)

However, the following Development Corridors (DC's) and Functional Development Areas have been identified according to the SDF analysis, namely:

- Development Corridor (DC) 1: The Pretoria/Gauteng Polokwane Mankweng Tzaneen
- Development Corridor (N1- south road/ R71 road)
- Development Corridor (DC) 2: The Burgersfort/ Chuenespoort Polokwane Makhado Development Corridor (R33- N1 north road)

Public Transport Integration Corridor F1; Due to the proposed re-alignment of N1 toll road bypass, it is necessary to revise a study conducted in 1999, namely the *Development Plan for the Public Transport Integration Corridor alongside* **Nelson Mandela Drive**.

Southern Gateway Development Corridor (F2); This corridor (N1 South, along the western entrance to Polokwane City) is an excellent example of positive spin-offs from this kind of forward planning of a development corridor, in view of the recent development. The continued consideration of appropriate land-uses is essential for the long-term sustainability of this corridor and also with a view to not jeopardize the other initiative in the SDF plan.

Eastern Gateway Development Corridor (F3; The functional development area was previously called the Eastern Corridor or Private Transport Corridor, and involved the Thabo Mbeki and Grobler Streets one-way pair, stretching from Biccard Street to the Savannah Centre. The study conducted in July 1999, titled *Eastern Corridor Development Plan and investigation to formulate policy on the Biccard Street Transitional Area,* is being reviewed).

Northern Gateway Development Corridor F4; The corridor starts at Landros Maré Street extension on the northern border of the CBD and traverses the industrial area (Extensions 3 and 12), running pass the International Airport, and also includes part of Annandale.

VISION 2030=SMART CITY

Outer Eastern Link (F5); This is a completely new development area and was proposed because of the amalgamation of the different TLC areas. It is part of the Tshwane / Gauteng – Polokwane – Mankweng – Tzaneen Development Corridor (DC1) which would play a major role in integrating the Polokwane and Mankweng clusters with one another. This integration should be regarded as a long-term vision. The development area starts where the Eastern Gateway Development Corridor (F4) ends. From this point it runs to the area in the vicinity of the Boyne and Ga-Mokwane villages, on the eastern border of the Polokwane Municipality Area.

2.10. Municipal Land Analysis

The Municipality is currently intending to develop the Land Audit report in order to account on the opportunities that the land may impact looking beyond 2030 vision. There is more land that the Municipality has not investigated or yet transferred to the Municipality that needs to be researched. Commissioning the Land Audit may pave the way for proper land management and the need to address urban challenges.

The current land parcels of the municipality are not enough in terms of the projected 2060 urbanisation rate in Urban areas. It is vital that the Municipality advance its strategy in land acquisition with the 2060 urbanisation rate In this case, having a backlog of housing demand of almost 60000, what will the situation be if the strategic land is not used efficiently through planning approaches such as densification and compact settlement and do away with urban sprawl.

2.11. Land Claims Analysis

A number of land claims have been lodged with Government within the Polokwane Municipal area of jurisdiction. However, the majority of these claims are not yet concluded or finalized. It is currently not possible to determine their potential impact on spatial development. There is concern from some quarters that more unsustainable rural settlements might be established as a result of restitution of land rights.

From a spatial development point of view, land claims do not necessarily impact on the type of land use. It, however, does have an impact in delaying development processes. Prospective developers are obliged to seek consent of the respective Land Claims Commissioner prior to undertaking any form of development, that is, either for township establishments or change in land use. Although consultations do not hinder development, they do derail the speed at which development moves.

The claimants that receives their land through restoration process becomes a challenge that impact negatively the Municipality especially in areas that are within the Municipal proclaimed scheme. It also plays a negative role and foster illegal invasion. Such occupants tend to

VISION 2030=SMART CITY

demand services on the area not well surveyed and declared suitable from environmental point of view.

2.12. Land Availability Analysis

The municipality owns a sizable number of land parcels within the urban area. This includes erven within proclaimed townships, farm portions, agricultural holdings and proclaimed townships for mixed housing developments primarily to cater for the housing gap which is outlined in detail in the Housing Chapter.

| # | NAME | LOCALITY | NUMBER OF UNITS |
|---|----------------|--|--|
| 1 | Polokwane X72 | Doornkraal | 800 Residential 1 |
| 2 | Polokwane X79 | Doornkraal | 500 Residential 1 |
| | | | 2863x "Residential 1"; 5x |
| | | | "Residential 2"; 7x "Residential |
| | | | 3"; 2x "Business 3"; 1x "Special"; 5x "Institutional" (Church) 7x |
| | | | "Educational" 4x "Municipal"; 13x |
| 3 | Polokwane X78 | Doornkraal | "Public Open Spaces" 1x "RSA" |
| | | Portion 188 (a ptn of ptn 8) of | |
| 4 | Polokwane X108 | Doornkraal680 LS | 200 Industrial 2 Sites |
| 5 | Polokwane X126 | Engelschedoornboom 668LS | 500 Residential 1 Erven |
| | | | 19 erven zoned "Special": |
| | | Portion 12 of the remainder of | "Business 2: 1 Erf ±6 650m ² . |
| 6 | Polokwane X124 | Krugersburg 933 LS | "Municipal": 1 Erf ±917m ² |
| 7 | Polokwane X127 | Engelschedoornboom 668LS | 500 Residential 1 Erven |
| 8 | Southern | N1 southbound (Pretoria road) | The "Special" zoned Erf for a |
| | Gateway X1 | and Lawton Road, in the | Convention Center: |

| | | Portiona 407 408 400 440 | Second Floor |
| | | Portions 407, 408, 409, 410, 411 and 412 of the farm | The "Special" zoned Erf for a |
| | | Sterkloop 688 LS | Hotel |

Table: The below table represents vacant municipal owned townships

VISION 2030=SMART CITY

| # | NAME | LOCALITY | NUMBER OF UNITS |
|----|----------------|--|---|
| | | | The "Public Open Space" zoned Erf will be used as a Green Belt Buffer |
| 9 | Polokwane X106 | Portion 171 Doornkraal 680 LS | 190 Residential Erven |
| 10 | Polokwane X107 | Portion 191 Doornkraal 680LS | 142 Residential Erven |
| 11 | Polokwane X133 | Klipfontein 670 LS Stoefontein 678 LS | 3000 sites 208, 422 Ha 138,1129 ha |
| 12 | Polokwane X134 | | |

Township establishment processes for Mixed Housing Development (BNG) are currently underway for the below farm portions:

Table: Land with Township Establishment in progress.

| PROPERTY DESCRIPTION | SIZE |
|---|-------------|
| Portion 74 and 75 of Ivy Dale Agricultural Holdings | 8. 92224 Ha |
| Farm Volgestruisfontein 667 LS | 178.4699 Ha |
| Farm Klipfontein 670 LS | 208.4228 Ha |

Although the Municipality does not own land in the Tribal Authority's area of jurisdiction, the provisions of the development objectives and development planning in general still vests within the Municipality's guidelines and control. These processes are illustrated in detail in the Spatial Planning and Land Use Management Act 16 of 2013 (SPLUMA) By-Laws as well as Proclamation R188 of 1969 regulations.

2.13. Land Invasions

VISION 2030=SMART CITY

As land invasions were starting to be a problem in the City of Polokwane, Council has obtained court orders which protect the following land parcels.

- 1. Polokwane Extension 40
- 2. Polokwane Extension 108
- 3. Polokwane Extension 78
- 4. Polokwane Extension 106 and 107
- 5. Erf 6045 Pietersburg, Mikes Kitchen
- 6. Portion 1-16 of the farm Pelgrimshoop 630 LS
- 7. Erf 60 and 374 Seshego 9G
- 8. Erf 36 Seshego 9F
- 9. Erf 2406 Seshego E (Church)
- 10. Erf 5289 Pietersburg Extension 11
- 11. Erf 8518 Seshego Zone 1 extension

Farms:

- 1. Farm Engelshedoornboom 688LS
- 2. Farm Volgestruisfontein 667 LS
- 3. Farm Klipfontein 670 LS
- 4. Holding 74 and 75 of Ivy Dale Agricultural Holdings
- 5. Farm Doorndrai 606/ LS
- 6. Farm Sterkloop 688 LS

Court Orders are fully implemented in dealing with land invasion to assist the City with proper Land Management and Planning. But the challenging issue is the cost lost due to unplanned invasion since it is unknown. A comprehensive strategy to deal with the Land invasion is crucial for the municipality in order to safe guard its properties.

2.14. Spatial Challenges and Interventions

Planning control and Outdoor advertising

Challenges

- Inadequate control over illegal land use practices within the city.
- Lack of human capital to deal with illegal land uses (shortage of staff).
- Inadequate control over illegal outdoor advertising.
- Management of contracts for outdoor advertising projects.

Interventions

VISION 2030=SMART CITY

- Reviewed the operational manual contained in the illegal land use strategy 2012- to enable the imposing of fines for illegal land uses.
- Council has budgeted for 2 positions of Planning Control Officers positions and will be advertised.
- 3 contractors appointed to deal with the removal of illegal advertisement of council land.
- Currently reviewing the outdoor advertising bylaw to deal with inadequacies of the current by-law.

Land Use Management

Challenges

- Installation of services on approved municipal townships.
- Installation of Services on new approved municipal townships.
- Lack of Truck Inn Facilities.
- Townships without Street names

Interventions

- The process of servicing municipal township has started. Engineering Services SBU had appointed the engineer to start with the designs for (Polokwane Extension 108,26 and 126) and thereafter contractors will be appointed to install services.
- Engineering Services SBU to budget for and appoint engineers and contractors.
- Application for Truck Inn Facility lodged on Polokwane Extension 136 (Municipal Township). Municipal Planning Tribunal to decide on the application.
- Polokwane Local Geographic Names Policy has been adopted to deal with naming of streets within townships.

Spatial Planning

Challenges

- Spatial Inequalities/Injustices.
- Inadequate ownership of land in rural areas.
- Underutilised airport infrastructure.
- Lack of alignment in municipal plans.
- Lack of areas earmarked for Student Accommodation and policy to address the need.
- Confusion in Multiple legislation not repealed by SPLUMA.

VISION 2030=SMART CITY

• Municipal By-Law Implementation.

Interventions

- Neighbourhood Development Partnership Grant (NDPG) is a grant that unlocks investments, by funding neighbourhood development projects to improve the life of residents in targeted areas, generally townships. The partnership of the municipality and National Treasury with this program, enable the municipality to implement projects identified in municipal plans in order to curb spatial inequalities.
- The Department of Rural Development and Land Reform has approached the municipality on some portions which are owned by the state. The intention is to release land owned by the state to the municipality in order to unlock development and promote ownership. For example, Portions affected by invasions (Mamahule Area) will be the initial intervention areas.
- Enhancing the status of the municipal airport has been prioritised. Mixed land uses are to be promoted around portions surrounding the airport. Terms of reference to conduct feasibility studies have been drafted in order to get a consultant to carry out the relevant studies.
- The Integrated Urban Development Framework (IUDF) is one of the fundamental government policies that seek to action the National Development Plan for the future needs. The purpose of the Integrated Urban Development Framework (IUDF) is to fundamentally provide a micro plan for a specific area with proper development guides. A Capital Expenditure Framework (CEF) is a long term infrastructure plan that flows from a Spatial Development Framework. The CEF was developed in order to incorporate those Strategic Development Areas that details the future priority development areas. As such there will be alignment between planning, infrastructure and financial plans.
- Through the Urban Renewal Strategy and CBB Plan, 2016, areas where student accommodation is to be promoted has been identified. Plans to acquire the subject land is one of the priorities for affordable student housing and social housing.
- Polokwane Municipal Bylaw, 2017 has been approved by Council and currently in operation and covers the whole municipal area. Polokwane Land Use Scheme, 2017, has been adopted and will cover areas of Aganang, Sebayeng and Mankweng and other rural areas that are not covered by Perskebult/Polokwane Town Scheme, 2016 in order to regulate land uses in the whole municipal area.

VISION 2030=SMART CITY

| Spatial Challenges | Intervention |
|--|--|
| Inadequate ownership of land in rural areas. Illegal land uses. Lack of human resource to fast-track updating of spatial data regularly. Property Management (Leasing and valuation roll). Human Capital Limited Funding (Development of the strategies and feasibility studies). Land claims. Illegal townships. Poor integrated human settlement with institutional facilities. Limited power on the administration of R293 proclamation. Illegally occupied RDP housing units. Underutilised airport infrastructure. Fresh produce market for regional trade. Lack of commitment on the establishment of Cargo HUB or Agro-processing HUB Townships without Street names. Management of Contracts for Outdoor Advertising Projects. Installation of Services on approved municipal townships. Lack of Truck Inn Facilities. Spatial Inequalities/Injustices Lack of Alignment in Municipal Plans. Lack of areas earmarked for Student Accommodation and policy to address the need. Confusion in Multiple legislation not repealed by SPLUMA. Integrated Human Settlements. | Reviewed the operational manual contained in the illegal land use strategy 2012- to enable the imposing of fines for illegal land uses. Council has budgeted for 2 positions of Planning Control Officers positions and will be advertised. 3 contractors appointed to deal with the removal of illegal advertisement of council land. Currently reviewing the outdoor advertising bylaw to deal with inadequacies of the current by-law. To benchmark with Municipality of our size to learn how Management of Contracts for Outdoor Advertising Projects are done. The Municipal Council has already resolved that benchmarking should be conducted. The process of servicing municipal township has started. Engineering Services SBU had appointed engineer to start with the designs for (Polokwane Extension 108,26 and 126) and thereafter contractors will be appointed to install services. List of Municipal Townships that require services to be installed. Engineering Services SBU to budget for and appoint engineers and contractors. Application for Truck Inn Facility lodged on Polokwane Extension 136 (Municipal Township). Municipal Planning Tribunal to decide on the application. Polokwane Local Geographic Names Policy has been adopted to deal with naming of streets within townships. Neighbourhood Development Partnership Grant (NDPG) is a grant that unlocks investments, by funding neighbourhood development projects to improve the life of residents in targeted areas, generally townships. The partnership of the municipality and National Treasury with this program, enable the municipal inequalities. |

2.15. Spatial Interpretation of Polokwane Municipality

2.15.1 Key Guiding Policies and Municipal By-laws

- a) SDF
- b) EGDP
- c) URS/CBD Development Plan
- d) Density policies
- e) Rural Settlement Strategy
- f) Telecommunication mast policy
- g) Spaza and Tavern Policy
- h) IUDF

2.15.2 Economic Opportunities and Growth

- 1) Polokwane Municipality is a gate way to Africa
- 2) SEZ/Industrial Park Development
- 3) Cargo Hub/Agro-processing HUB
- 4) Truck-Inn/Logistic HUB
- 5) Development of Science Park
- 6) Eco-estate around the Bakoni Malapa
- 7) Arts and Cultural Hub
- 8) Urban Renewal projects (development of the High rise office and residential accommodation)

2.16. Rural Development

In terms of the Rural settlement development challenges, the Municipality must comply with section 3-8 of the SPLUMA.

VISION 2030=SMART CITY

Approximately 70% of the area in Polokwane Municipality is Rural and need to be carefully considered. Through public participation on the Draft Rural Settlement Strategy, it was discovered that, rural areas have a potential in Nodal development and those areas that are close to the Sub-urban areas. This tends to have major development along the main roads and attract people to seek residential properties, business etc. in the assessment, it was found that there are:

- Informal settlement within road reserve and flood lines
- Uncoordinated spatial settlement
- Poor streets and roads in informal settlement
- Un-planned desired land use types
- Unclear determination of the properties sizes
- Poor Cemetery planning and maintenance
- Land allocation disputes
- Poor monitoring and evaluation on the registered servitudes, flood lines, road reserves.

This goes beyond to old settlement as they extend. In this regards, Spatial Planning has developed the Rural Settlement Strategy with the aim of addressing this spatial pattern. Once the document has presented, the Traditional Local Authority has seen the potential and realize to partner with the Municipality through development of those area. Letters of request was received and need urgent attention.

The Land Use Scheme survey conducted in 2012 has data that portray zoning of that area and captures in the system. The following challenges have to be addressed:

- a. Development of the proper integrated human settlement that will be sustainable: this are the benefit
 - Building Plans approval fees
 - Rezoning
 - Managing land use (wall to wall scheme)
 - Proper planning for other services such as Roads, Water and sanitation etc.
- b. Land survey for all settlements in Polokwane municipal Jurisdiction:
 - Proper stand numbers and streets
 - Land dispute resolution
 - Proper stats
 - Proper maintenance etc.
- c. Land Use Survey for the whole Municipality
 - Proper zoning and
 - conflict resolution
 - Business Registration and management

VISION 2030=SMART CITY

- Adhere to SPLUMA

2.17. Urban Development

2.17.1 Integrated Urban Development Framework Plan

The Municipality tends to develop policies that demand integration of all resources and different directorate to interact with one another. Government policies are being development with a long terms vision, but it is left with the planners to properly re-shape the city toward the future needs. Advance skills and commitment of the planners is required. The Integrated Urban Development Framework (IUDF) is one of the fundamental policies of the Government that seek to action the National Development Plan.

The purpose of the Integrated Urban Development Framework (IUDF) is to fundamentally provide a micro plan for a specific area with proper development guides. In this case, the CBD and parts of the Industrial area and some neighbourhoods were left without being guided by any of those SDA's. In terms of the current Spatial Development Framework, 2010, it was noted that the IUDF must be developed. Therefore, the proposed development strategy seeks to incorporate those SDA's into an Integrated Urban Framework Plan that details the Future and Integrated plan for the Provincial growth point.

The Integrated Urban Development Framework (IUDF) is a response to urbanisation trends and the directive by the National Development Plan (NDP) to develop an urban development policy that will cater for the increasing numbers by ensuring proper planning and necessary infrastructure to support this growth. Polokwane Municipality has to develop its own Integrated Urban Framework Plan that will have detail plan on the City Development Strategy focusing on a sustainable urbanisation model at the following key policy levers:

- Integrated urban planning and management
- Integrated transport and mobility
- Integrated sustainable human settlements
- Integrated urban infrastructure
- Efficient land governance and management
- Inclusive economic development
- Empowered active communities.
- Effective urban governance.
- Sustainable finances

Polokwane Municipality has developed a series of policies to deal with the development of the city but in a narrow view. Part of the strategy is to have a comprehensive *City Development*

VISION 2030=SMART CITY

Strategy that will underpin the key policy levers looking at promoting the City through long terms development goals and models. This will enable to address the following:

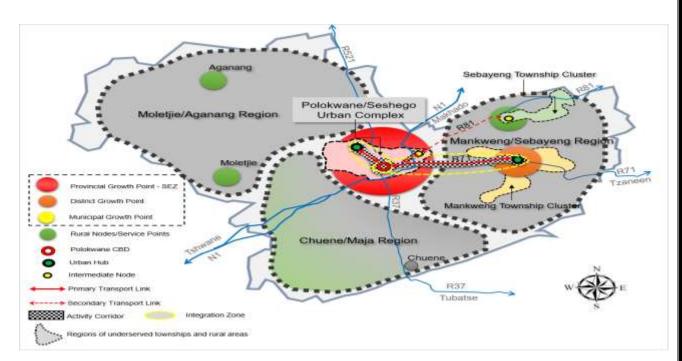

- A CDS is a potential trend breaker: motivating key decision-makers to think and operate differently so as to break the negative trends faced by a city;
- Guiding short-term implementation within a long term logic: A CDS informs the 5- year integrated development planning (IDP) process and shape term-of-office delivery objectives;
- Pulling in the same direction: It allows multiple government agencies, communities and business to rally, act and invest along a similar logic; creating a common focus;
- Identifying interventions with the highest leverage potential: A CDS serve to prioritise and direct resources effectively into those identified interventions that holds the best potential;
- Anticipating future shocks and contextual changes: Through a CDS anticipated long term future changes can be identified and anticipated;
- **Assist in guiding growth:** A CDS can influence how a city approaches infrastructure creation and physical growth; and
- (Re)Positioning: -A CDS serve to reposition the city in terms of national policies and public funding, place-marketing and also the confidence with which ordinary people view the potential of their city.

2.17.2 Functional Areas

The current spatial planning strategies and policies, the Polokwane Municipal area has been divided into the following four (4) Functional Areas as shown in the conceptual map below, namely:

- 1. Polokwane/Seshego Urban Complex
- 2. Mankweng/Sebayeng Region
- 3. Moletjie/Aganang Region
- 4. Chuene/Maja Region

VISION 2030=SMART CITY

Map of Functional Areas

2.18 Economic Spin Off Developments

2.18.1 Motor City Baobab Boulevard

Motor City township is surrounded by existing township developments on three sides. On the north eastern side is Bendor X87 (i.e. Thornhill shopping centre, an area approved for an office development with the rest being a residential development consisting of both single and sectional title residential development). Next to the Munnik road on the northern side are townships such as Bendor X32 and 44 (i.e. mostly residential development consisting of both single and sectional title residential development and a filling station). Adjacent to De Wet Drive to the south west of the application site is a township for up market single residential development known as Polokwane extension 11 (Sterpark). The area to the south is vacant and part of the Remaining Extent the Farm Krugersburg 993 LS. The site occupies an important location in relation to other significant features of the City. The site is close to the newly completed N1 ring road and therefore has excellent and direct connections to the south and north-east.

The application for township establishment (being Polokwane Extension 124) was approved by Polokwane Local Municipality on 14th June 2013, and the township was proclaimed in the Limpopo Gazette as a township on the 4th December 2015. The construction of all the municipal services was completed at the end of 2015, with final finishing early in 2016. The construction of motor dealerships for the MGM Group and big box related businesses for Ital tile /CTM have already commenced.

VISION 2030=SMART CITY

The location advantages are as follows (among others)

- i. The eastern area has a large concentration of middle to higher income housing at Polokwane extension 138 that will include the **botanical gardens**.
- ii. The huge volume of existing "older" motor industry/motor dealership rights in Polokwane city, and similar rights approved in recent years elsewhere outside the CBD such as along the N1 (now R101) south impact negatively on the development of Polokwane X124 for motor and motor related businesses. Most of the motor dealerships are "established" in their current locations and the remaining motor dealerships are currently being established in new locations such as MGM Group at Polokwane X124 (Baobab Boulevard) and others at the southern N1/R101 entrance such as Jeep/Mercedes/Mitshibishi/Dodge (pre-owned on Erf 141 lvypark) and Audi (on Erven 2 and 3 lvypark). Westvaal dealership (Chevrolet/Opel/Isuzu) will relocate to Erf 2506 lvypark X52.
- iii. Mall of the north is a secondary activity node with Munnik road an activity spine/corridor and mixed use development is allowed in this development area. The area is close to the Mall of the North regional shopping centre and also close to the N1 ring road. Baobab Boulevard has excellent and direct connections to the south and north-east.
- iv. Baobab Boulevard is part of the Mall of the North secondary activity node/Munnik road corridor and far enough from Polokwane CBD to functionally service a huge surrounding residential community. In conjunction with Thornhill shopping centre which is opposite the road on the most north eastern side of Baobab Boulevard the "combined Mall of the North node" is even more functional, without compromising the operations of the CBD.
- v. The north-eastern part of the city has been rapidly expanding in recent years, and the quality and nature of Baobab Boulevard once fully developed will be a huge attribute to the area and also to Polokwane City.
- vi. Secondary nodes and activity corridors are part of the urban structure, particularly in a rapidly growing city. The CBD is the central, economic heart of the city with a role to serve the high order retail and general business needs of the community. Activity nodes and corridors that lead into the city provide complementary economic opportunities and speciality functions, such as Mall of the North and Baobab Boulevard. Multi-nodal cities such as Polokwane are function-oriented and these uses need not to be located in the CBD because they have specific space needs and operational requirements.

VISION 2030=SMART CITY

2.18.2 Eskom Regional Offices

Eskom has recently completed a process of aligning their 7 regions into 9 provinces. They have identified a need to put their Provincial Headquarters in Polokwane as the Capital City of Limpopo Province. This initiative is aimed at accommodating Eskom Northern Region employees amounting to 2000 employees and at the same time merging the Eskom Distribution, Transmission and Generation. The proposed development will require approximately **40 Hectares** of land for the purposes of Constructing 8 Ha regional Head Office (Main Building)

Establishment of 10 Ha Training Academy to accommodate:

- Electrical Training Simulator
- Substation Yard (1 Ha)
- Line Yard (4 Ha)
- Dead-condition Construction Yard (4 Ha)
- Technical Training and Non-Technical Training requirements (0.3 Ha)

Establishment of the 4 Ha Engineering Block to accommodate:

- TSG,
- EDFS,
- MEW,
- Live Work And
- Technical Support

Further to that, Eskom has the intention to establish a high quality commercial office building with a minimum 4-Star Green Star Rating certified with the *Green Building Council of South Africa. This initiative is in line with the principles of sustainable development,* and land use planning. The land is located on the remainder of the farm Krugersburg 993 LS. The land is zoned agricultural and vacant at this point. The total size as requested by Eskom is approximately 40 hectares

Benefits of the proposed development

The proposed development will act as landmark in Polokwane; it will enhance development within Polokwane and bring about job creation for local communities. Apart from the benefits directly linked to Eskom, this kind of development is important for the landscaping of the city. The development will furthermore stimulate economic growth for the city and promote investment in Polokwane. Below are the summarized benefits as motivated by Eskom.

- Adequate office accommodation for current and future Eskom employees
- Adequate parking space
- Improved Security
- Monetary savings
- Enhanced Eskom identity and public image

VISION 2030=SMART CITY

- Enriched worker morale
- Educational and training opportunities

Eskom is currently experiencing some challenges with their current offices scattered throughout the City. The shortage of parking for their employees' together with other reasons already mentioned has motivated for the need to establish Provincial Headquarters.

Although there is a policy guiding the development of offices in Polokwane area, "CBD Development Plan" which encourages office development within the CBD, Eskom offices are not located within the CBD in other provinces. Given the non-availability of land to cater for such magnitude of office space within the CBD, it is argued that the proposed development has special merits therefore requires a special consideration in line with other development principles and regulations. The area falls within the Strategic Development Area 3 of Polokwane municipality and it is within the Urban Edge according to the Spatial Development Framework.

Eskom appointed a consulting team to investigate the feasibility of the site in 2013 and it was established that the site had severe shortcomings for Eskom's intended use. The impact of the restrictions imposed by Civil Aviation on the adjoining municipal landing strip and the provision of power to the site render the site inadequate to meet the initial objectives of Eskom. The height restrictions for the overhead power lines to the substation of the proposed Simulator and Training centre cannot be accommodated on Krugersburg 995 LS. Therefore, an alternative land was identified, which is a portion of Remainder of Farm Weltevreden 746 LS, this request is currently being processed.

2.18.3 Polokwane International Convention Centre (PICC)

The Polokwane International Convention Centre will be located at Southern Gateway Extension 1 Township on Portions 407, 408, 409, 410, 411 and 412 of the farm Sterkloop 688 LS Limpopo Province. The property is situated on the corner of the N1 southbound (Pretoria road) and Lawton Road, in the south-western corner of Polokwane City adjacent to the Nirvana suburb and Ivydale Agricultural Holdings. Southern Gateway Extension 1 is a Municipal township located on portion 83, 84, 85, 86, 87 and 77 of the holding Ivydale, as part of the township establishment process, an EIA scoping was conducted, a Geo-technical report was prepared, a flood line certificate prepared and a Traffic Impact Assessment conducted.

The following uses were approved as part of the conditions of establishment of the township. The "Special" zoned Erf for a Convention Centre consisting of the following components:

- Tunnel Level
- Basement Level,

VISION 2030=SMART CITY

- Ground Floor
- First Floor
- Second Floor

The "Special" zoned Erf for a Hotel

The "Public Open Space" zoned Erf will be used as a Green Belt Buffer.

There is a need for such a facility in Polokwane, the Township is proclaimed and registered with the registrar of deeds, proclamation notice and approved general plan. The proposed PICC will be subject to the funding availability since the feasibility studies are concluded.

2.18.4 SANRAL Expanding the N1 Road Network

The South African National Roads Agency Ltd (SANRAL) is expanding the N1 road network from south of Shell Ultra City west of Polokwane CBD up to R71 Tzaneen Road. The improvements to be made are as follows:

- A fly-over bridge at the hairpin bend Tzaneen by-pass south of Shell Ultra City The hairpin bend will be permanently removed.
- There will be a two lane bridge connecting Protea Hotel to R101 replacing single lane bridge.
- The current road network will be expanded to dual carriage-way either direction.
- A Fly over bridge over the R37 Mashishing road and interchange into Polokwane Smooth flow of traffic on the N1

A Fly over bridge over the Silicon road and interchange into Polokwane - Smooth flow of traffic on the N1

2.18.5 Urban Renewal Projects

Polokwane Municipality has adopted the Urban Renewal Strategy and CBD Development Plan 2016. This policy has set the key principles that support the current Program of "*Re a ga*" Polokwane.

VISION 2030=SMART CITY

The City of Polokwane has launched a programme called "Re aga Polokwane", that is geared towards ensuring that the City and its citizens are working together to build the city of Polokwane. The "*Re aga* Polokwane" programme – strengthening the partnership in **building a smart city by 2030 and beyond**. Polokwane is the Capital city of the Limpopo Province has opportunity for economic growth and experience rural urban migration. Polokwane is likely to face urbanisation challenges as the signs have already surfaced such as engineering capacity and high demand of housing typologies. Major projects being embarked by the City of Polokwane are as follows:

- the <u>replacement of 177km of AC (asbestos cement) pipes</u> in the municipality's jurisdiction;
- ✓ to replace conventional water and electricity meters with smart meters in a number of areas in the City;
- ✓ the introduction of a <u>rapid bus service</u>;
- ✓ a waste management project;
- major <u>student accommodation</u> drive to support the growing number of students in the city.
- Other Public Private Partnership on Mixed use development through a Long term development
- ✓ Water Master Plans
- ✓ Urban Renewal projects
- ✓ etc.

Key strategic/Catalytic development projects on the Long Terms Development leases and other Municipal initiatives include:

- Development of the Polokwane Towers (office accommodation and other SOE)
- Development of the Eco-estate on the part of the Game reserve or theme park
- Proposed Sasol Depot at the proposed Polokwane Extension 136
- Support initiatives for SEZ:

i. Cargo and Logistic Hub

During the State of Province Address 2019, the Premier of Limpopo Province highlighted the progress made with regard to the proposed SEZ;

Polokwane was identified in terms of the <u>regional logistics hub</u> and <u>business travel centre</u> that will see the construction of an International Convention Centre to attract the events,

VISION 2030=SMART CITY

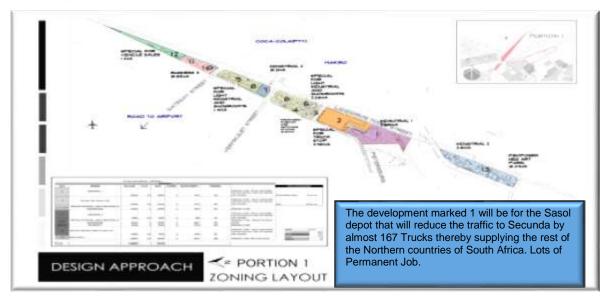

conference and exhibition industry. Defining the spatial location becomes the key spatial issue for consideration by looking at the main economic centre such as the CBD, Industrial areas and the transportation linkages within and around the area. Polokwane position itself well since it intends to use its land parcels through a long term development leases to address the need of the Municipality.

ii. Truck-inn and Cargo HUB (Polokwane extension 136)

An industrial Township with the following uses:

- Industrial zone properties for Sasol depot, Tankers park-inn, cargo truck-inn, Vehicle sales lot.
- Public Garage
- Special for other uses.

The Figure below illustrates the proposed Township with the uses as highlighted. The Long term development leases were awarded in line with the development of the Cargo and Logistic Hub concept.

VISION 2030=SMART CITY

iii. Agro-Processing.

Agro-processing industry is a subset of manufacturing that processes raw materials and intermediate products derived from the agricultural sector. Agro-processing means transforming products that originate from agriculture, forestry and fisheries. The Standard Industrial Classification also categorises the following eleven divisions under the agro-processing industry: food, beverages, paper and paper products, wood and wood products, textiles, wearing apparel, furniture, tobacco, rubber products, footwear and leather and leather products. Polokwane has a strong Logistic support from different parts of the region.

Part of the development of the Agro-Processing, the Industrial development becomes key, since three modes of transport (Air, Rail and Road) are integrated within the identified area. The agro-processing industry is among the sectors identified by the Industrial Policy Action Plan (IPAP), the New Growth Path and the National Development Plan for its potential to spur growth and create jobs because of its strong backward linkage with the primary agricultural sector. The Department of Agriculture, Forestry and Fisheries (DAFF) has established a Directorate: Agro-processing Support to complement the interventions undertaken by several governmental departments, notably, the Department of Trade and Industry, by focusing on supporting the establishment and growth of Small and Medium Enterprises (SMEs) for agro-processing. Polokwane by far, has already earmarked the need for the Agro processing Hub to support the economic growth and development with the support of the sector Departments.

iv. Industrial Development

Polokwane Municipal Economic growth is being hampered by less production in terms of the Manufacturing sector. The Municipality has dedicated land on the Old N1 Road (North) now known as the Landros Mare Street as part of the Commercial and Industrial Development. In order to improve the Airport Precinct, all the encore developments that complement the Agroprocessing and Logistic Hub must be prioritised within the area. The main issue for the success of the industrial development is centrered around the following key factors for the success of the industries:

VISION 2030=SMART CITY

- Power supply.
- Communications including transport, telecommunications.
- Labour supply including workers with the right skills.
- Access to market where the goods are sold.
- Grants and financial incentives usually from governments.
- Raw materials.

The DTI has collaborated with a range of institutions and stakeholders in developing strategies and policies to achieve rapid industrialisation of the country's manufacturing sectors. The institutions and stakeholders include other government departments, particularly in the Economic Sector and Employment Cluster, the National Economic Development and Labour Council, and organised business formations, such as Business Unity South Africa (BUSA) and Industry Associations.

The **DTI** has identified institutions and partners that support the implementation of it's industrial development mandate which include:

- National Regulator for Compulsory Specifications (NRCS)
- National Metrology Institute of South Africa (NMISA)
- South African Bureau of Standards (SABS)
- Industrial Development Corporation (IDC)
- The South African National Accreditation System (SANAS)

In order for Polokwane to successfully have an area that support the Industrial development, the SBU on economic Development and Trade must be engaged in order to access funding and attract investors through the support of the DTI for betterment of the Limpopo Economy and nationally.

VISION 2030=SMART CITY

2.18.6 City Development Initiatives

The Municipality has developed the Urban Renewal Strategy and the CBD Development Plan, 2016. The idea was to rejuvenate the City to be a functional business zone with Mixed Land Use Development that will complement the cities vision of being the SMART CITY. The Urban Development Framework developed by the National Department of COGTA laid several levers that are now incorporated in the CEF approved by CoGTA. The municipality strive to align the said Policy with the URS and CBD Plan for its identified projects. This includes re-investing in engineering for more compactable city through high density development and office and Business development. The first approach was to look at the development of the Municipal Towers with the current Municipal offices with major development such as the Hotel, restaurant, Cinema, Theatre (to mention the few).

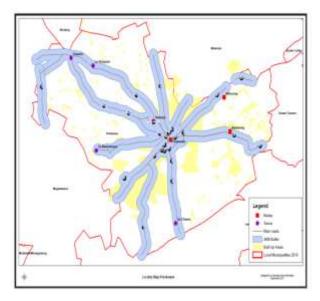

2.18.7 Commercialisation of Municipal Facilities/Properties

The municipality has a number of community facilities and other amenities that need urgent attention. These include Peter Mokaba stadium, the game reserve, Jack Botes hall Airport, Library Garden and Showground that may have positive impact to the community if well managed. Some of these activities need expertise from the people who are specialising in such fields. Learning from other cities that own such facilities, the majority are outsourced through the services of the private companies to generate more revenue and lessen the burden of expenditure by the Municipality. For example, the Game reserve may be turned into an Eco-estate that promote contact with the nature.

2.18.8 Metropolitan Municipal Requirements

It is the prerogative of the Municipality to become a metropolitan Municipality within the next 3-4 years. The basics should be laid in order to have a proper road map in achieving the Metropolitan status. The Municipal Structures Act, Section 2 provides that – Category A Municipality if that area can reasonably be regarded as-

(a) a conurbation (continuous network of urban communities) [metropolitan] featuring-

(i) areas of high population density;

(ii) an intense movement of people, goods, and services;

(iii) extensive development; and

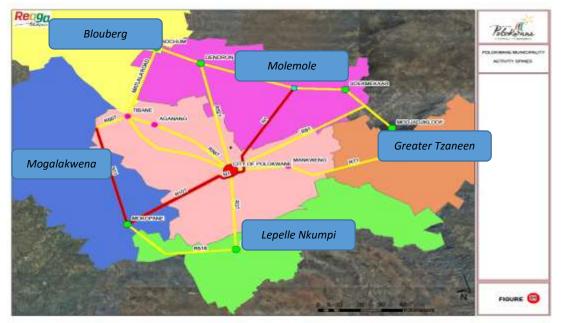

(iv) multiple business districts and industrial areas;

(b) a centre of economic activity with a complex and diverse economy;

(c) a single area for which integrated development planning is desirable; and

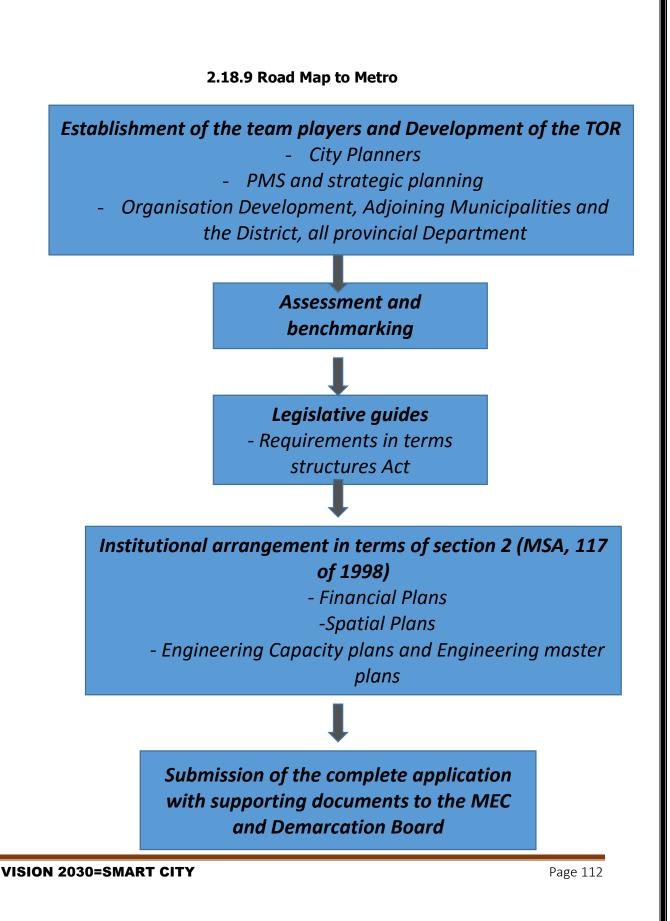

(d) having strong interdependent social and economic linkages between its constituent units. Should apply to the relevant authority for consideration and such application should

be assessed looking at the above criteria and other requirement: that the demarcation board may require.

Alignment with adjacent Municipalities and road networks

The above structure will be updated and used for the purpose of identifying the key role players in preparing the Municipality in to be Category A Municipality.

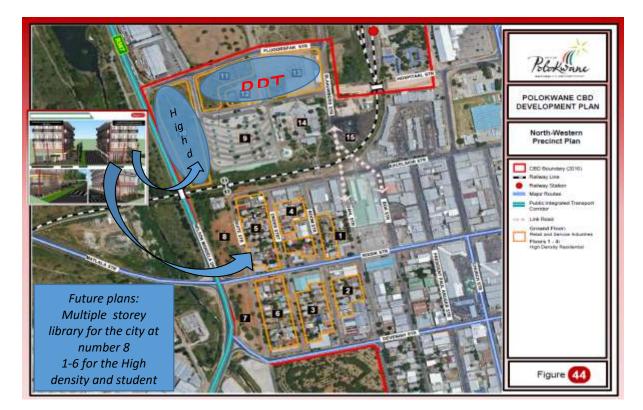

2.19. Identification of Land for Student Accommodation

Erf 20802 – 20815 and 20818 – 20821 Polokwane Extension 106 zoned Residential 3 has already been advertised for student accomodation. Some other erven in Polokwane Extension 79: also advertised for hign density residentail developments. Additionally Council has adopded the CBD Urban Renewal Strategy of which one of its objectives was to identify a strategy to curb illegal accommodation and devise means for student accommodation. The area in downtown CBD is in such a decay state, and vulnerable students are residing in such an appalling state.

The list of five institutions namely the University of Limpopo, UNISA Polokwane Campus, TUT Polokwane Campus, Capricorn FET College, Boston City Campus and Business College which developers and the Municipality could partner with in order to meet the demand for student accommodation within the CBD. Only three of these institutions currently have accommodation available - University of Limpopo located in Mankweng, TUT Polokwane Campus and Capricorn FET College are both located in Polokwane Town.

The majority of illegal land uses are located within the north-western part of the CBD as depicted (Buite, Boom, Bok, Dahl, Devenish, Excelsior and Onder Street). The majority of illegal land uses relate to student boarding accommodation and rental units, (approximately 33 properties). Some of the most serious problems associated with illegal land uses are illegal water/ electricity connections and temporary partitions within building structures. Amongst others, large numbers of people (up to 20 and more) use existing houses for informal accommodation purposes. Plans to aquire the subject land is one of the priorities for affordable student housing and or social housing. Block 1 to 6.The **Map Below** indicate the location of block 1-6.

VISION 2030=SMART CITY

Number 7 to 8 can be open for the mixed use for the city's main library, open market on the 2-4th floor while the ground floor can be used as City parking or taxi holding as currently being used.

2.21. Human settlement Analysis

The next Housing Analysis will therefore be guided by the following legislative and policy frameworks:

- i. Constitution of RSA
- ii. Housing Act (107 of 1997)
- iii. Breaking New Ground, 2005
- iv. National Housing Code, 2009
- v. National Development Plan (NDP)
- vi. Rental Housing Act (50 of 1999)
- vii. Limpopo Housing Act (2 of 2006)
- viii. The Social Housing Act (16 of 2008)

The right to adequate housing is enshrined in the Constitution (Act 108 of 1996) and it states that everyone has the right to have access to adequate housing and that the state must take

VISION 2030=SMART CITY

reasonable legislative and other measures within its available resources to achieve the progressive realisation of this right. Polokwane Municipality, as the economic hub of Limpopo Province is experiencing population growth which results in the influx of people from the rural areas into the urban parts of the municipality. This influx has necessitated an increase in the demand for housing and other basic services that promote Integrated Sustainable Human Settlement.

The Municipal housing environment comprise of formal and informal dwellings. A number of households are in poor housing conditions including informal settlements, backyard rental shacks, overcrowded in formal urban houses, and rural areas without proper access to basic services. In addition to this, urbanization rate continues to increase hence put much pressure on the Municipality for delivery of housing.

Polokwane Municipality has obtained Level 2 housing accreditation (the subject will be elaborated in detail below). In collaboration with the department (COGHSTA), the Municipality to facilitate the development of integrated human settlement in accordance with the City's vision.

The Municipality normally receive annual allocation of housing units from the Department of Cooperative Governance, Human Settlements and Traditional Affairs (COGHSTA). For 2018/19 Financial Year, 1 425 housing units were allocated to upgrade the informal settlement in Ext 78 (previously known as Disteneng). Over 63% of the construction work is complete.

The Municipality adopted an incremental approach to human settlement development. The rationale behind this approach is to curtail the problem of untraceable beneficiaries, unoccupied houses, illegal use of State funded houses. The case in point, includes Polokwane Extension 133, 126, 127, and 134. The mixed income Township of Extension 133 is proclaimed, sites allocated and currently engineering services (water and sanitation) are installed. Overtime, top structures will be built. Extension 126 & 127, are planned for relocation of the last SDA 1 informal settlements (Freedom Park and Extension 106), while the mixed income Township of Extension 134 establishment process is at an advanced stage.

The delivery of subsidised houses has expanded access to secure shelter for many poor households, and there has been growth in property markets in townships and broadening of home ownership. But progress up the property ladder for many is hindered by steep price cliffs for residential properties and construction on the other hand.

There are formidable challenges confronting sustainable human settlement development.

- Settlement patterns are dysfunctional,
- well-located land is expensive; and

- urban planning and approval processes are slow and frustrating.
- Insufficient bulk infrastructure
- Limited middle-income housing stock and credit constraints contribute to the so-called "gap market" – households with incomes that are above the thresholds for subsidized housing but insufficient to be able to access commercial bank home loans.
- Establishment of settlements by Traditional Authorities without following proper Township establishment processes and engagement with the Municipality (uncoordinated land release by Traditional Authorities)

2.21.1 Housing Backlogs

The municipal housing backlog is distributed between households in informal settlements, rural housing, rental, blocked housing, and Greenfield housing.

| | TYPE OF NEED AND BACKLOG | | | | | |
|--------------------------|--------------------------|------------|--------|-------|---------|--|
| Housing Category/Area | Informal Settlement | Greenfield | Rental | Rural | Blocked | |
| Urban Data Base | | ±55 000 | | | | |
| | Relocated 1690 | | | | | |
| Polokwane Ext 78 | | | | | | |
| Seshego | | | | | ±100 | |
| Freedom Park | 300 | | | | | |
| Polokwane Ext 40 | | | | | 107 | |
| Mankweng Unit F | | | | | 100 | |

Table: Categorical analysis of the Municipal housing need

2.21.2. Status of Rental Housing

The Municipality established an entity called Thabatshweu Housing Company Pty, t/a Polokwane Housing Association (PHA), with a mandate of developing and managing rental housing within its jurisdictional area. The company is accredited by the Social Housing Regulatory Authority (SHRA) as required by the Social Housing Ac (16 of 2008).

The Municipality, in support of the rental housing initiatives avail land to PHA and has designated Restructuring Zones to enable PHA to access the Restructuring Capital Grant (RCG) administered by SHRA for social housing development.

The most common type of rental accommodation that is available for new and particularly low income urban lodgers is backyard rooms. Polokwane Housing Association is currently managing 697 rental units of which 508 are social housing and 189 are Community Residential Units (CRU).

Additional Social Housing projects have been initiated by Polokwane Housing Association for example, Ext 76 to yield 240 units. Site is expected to be handed over to the developer in October/November 2019. Another social project called Annadale Extension 2 planned to yield 494 units is under construction, started in May 2019 for a period of 18 months.

Negotiations are in progress between the entity and COGHSTA regarding the release of land earmarked for Social Housing to PHA in Bendor Ext 100 township. On the other hand, two Student Accommodation projects; one in Ext 108 and the other one in Ext 106 have been initiated. The two projects are projected to yield over 5000 student beds. Procurement for these projects is concluded.

2.21.3 Urban Housing Developments

The Municipality encourages the Brownfield development and discourages Greenfield developments. These initiative of brownfield development encourage densifying the existing land available for various use. Through spatial planning policies analyses, the development of the land will help alleviate the increase demand for housing, including the gap market and student accommodation around the City.

There are other land portions which have been identified. The Department of Cooperative Governance, Human Settlements and Traditional Affairs, together with the Municipality, and the Housing Development Agency are working together to establish more Townships for human settlement. Some of the developments are close to completions while other recently commenced. The Table below provides a summary developments and their status

Table: summary of developments

| PROPERTY | PROGRAMMES | TARGET | STATUS |
|----------------------|---|--------------------------|--|
| DESCRIPTION | | | |
| Polokwane Ext 72 | GAP housing FLISP | 800 | •Township complete •Services installed RISIMA which is an entity of Economic Development is appointed to spearhead the marketing and sale of properties including building packages. |
| Polokwane Ext 78 | Integrated Residential Development Programme (IRDP) | 2 906 (all land uses) | Township complete, services installed, housing construction underway and sites allocated Only sites earmarked for middle income are yet to be sold. |
| Polokwane Ext 79 | GAP housing Finance Link Subsidy Programme (FLISP) | 500 | Township complete Services installed RISIMA which is an entity of Economic Development is appointed to spearhead the marketing and sale of properties including building packages. |
| Ext 133 | Integrated Residential Development Programme (IRDP) | 2 969 Res 1 | Proclaimed, sites allocated and currently engineering services (water and sanitation) are installed. |

| Annadale Ext 2 | Social Housing | 494 | Contractor on site, started with the construction. |
| Polokwane Ext 108 and 106 | Student beds | +5000 | Procurement processes at an advanced stage. |
| Ext 134 | Integrated Residential Development Programme (IRDP) | ±3 000 | Township establishment at an advanced stage. |

2.21.4 Land Availability and Acquisition Strategies

The City's Five Year Human Settlement Plan 2016/2017 – 2020/2021 recorded the following pieces of land as the ones that are suitable for Human Settlement development. The Municipality has adopted Land Acquisition and Disposal Policy.

| Property Description | Extent | Ownership | Proclamation | Proposed |
|----------------------|----------|--------------|--------------|---------------|
| | | | Status | Development |
| Ptn 158 of Sterkloop | 21, 4133 | Municipality | Farm Land | Mixed Housing |

|----------------------|----------|--------------|------------------------|-------------------------|
| Ptn 74 and 75 of | 9, 92224 | Municipality | Farm Land | Rental Housing |
| Ivydale Agricultural | Ha | | | |
| Holdings | | | | |

2.21.5 Informal Settlements Profile

This section provides a summary of informal settlements within the jurisdiction of the municipality. By far, the Seshego/City Cluster has the highest number of structures; Informal settlement upgrading is a priority programme for the Municipality. Since 2005 the Municipality has successfully upgraded 06 informal settlements, eradicated and prevented the formation of new informal settlements. The Municipality has adopted a simple approach to the Management of Informal settlement by:

- a) Identify and recognise the settlement
- b) Profile the settlement
- c) Mark each shack and develop a database for the settlement
- d) Develop a buffer to protect expansion of shack
- e) Conduct regular monitoring of the settlement

The City has five (5) informal Settlements which are as follows:

- Disteneng (Now Polokwane Extension 78)
- Freedom Park
- Mankweng unit F
- Mankweng unit G Ext
- **Ext 106** (recently relocated from Mohlakaneng and Disteneng)

<u>Juju Valley</u>

In 2015 - 2017 Polokwane Municipality was alerted of the land invasion on the private property known as **Juju Valley** within the established townships known as **Polokwane Extension 118 and 119**. The property is a well-established township, engagement with the municipality was never materialised. The action thereafter, tends the activity being illegal land use. It should be acknowledged that the invasion may results in informal settlement unless the property owner finalise and install all services and settle the community accordingly. Various options may be

VISION 2030=SMART CITY

explored of which the owner may engage with the Municipality. The Municipality may not spend the Public funds to the private development unless the be transferred to the Municipality.

Polokwane Extension 78

The current Polokwane extension 78 has already accommodated almost approximately 1690 Low income beneficiaries as planed and the additional will soon be accommodated in the new approach of walk-ups RDP that will be built through densification of some of the High density properties. The proposal will enable the Municipality to deal extensively with the housing backlog and RDP provision close to the Public transport in order to support the BRT. For example: typical low income residence (RDP)

Polokwane Extension 78 previously known as Disteneng informal settlement is the biggest Informal settlement of them all. A new Township layout is approved and 1690 households are settled and 29 households still to be resettled in Ext 78 from ext 106 whereby they were settled temporarily. The Progress of Relocating and Resettling beneficiaries to their rightful stands, is recorded as 98%.

| 5 | Polokwane X107 | Social housing |

VISION 2030=SMART CITY

| NO. | PROJECT AREA | PROGRAMME |
|-----|----------------|--------------------|
| 6 | Ivydale X35 | Social housing |
| 7 | Bendor X100 | Social housing CRU |
| 8 | Polokwane X86 | Social housing CRU |
| 9 | Polokwane X121 | Social housing CRU |

In line with regulations of the Social Housing Regulatory Authority, the entity is provisionally accredited as a Social Housing Institution. A full accreditation will enable the entity to access additional funding for the development of social housing units within designated restructuring zones of the Municipality.

2.21.6 Tenure Upgrading

Secure tenure is a central part of the housing development process. The municipality in collaboration with CoGHSTA is running a programme of Township upgrading, Title Deed restoration and registration. Incomplete Township in the areas of Seshego and Mankweng are currently finalised and proclaimed. Over 6 000 subsidized housing units in the areas of Polokwane Ext; 40, 44, 71, 73, 75, 76, Seshego; E, F, 9F, 9G, 9L, 9H, Seshego A Ext 1, and Sebayeng B are registered and transferred into the names of the beneficiaries.

2.21.7 Housing Accreditation

Housing Accreditation is a progressive process of building Government capacity thereby transferring housing functions from the Provincial to the Local Government sphere. The aim is to provide an opportunity for Polokwane Municipality to plan, execute and expedite housing service delivery. The process unfolds in three stages, where each stage is linked to institutional capacity of the municipality to undertake specified housing functions. Thus, municipalities should demonstrate capacity to undertake housing functions attached to the level of accreditation.

Polokwane is accredited to perform level 2 housing functions which are amongst others:

- ✓ Project evaluation and approval,
- \checkmark contract administration,
- ✓ subsidy registration,

VISION 2030=SMART CITY

- ✓ programme management including cash flow projection and management
- ✓ and technical (construction) quality assurance.

The Municipal Council approved a new Human Settlement Directorate in support of the additional delegated functions for level 2. An Implementation Protocol (IP) to be signed by the MEC for CoGHSTA and the Executive Mayor has been finalised.

2.21.8 Priority Housing Development Areas (PHDA's)

Polokwane is one of the Municipalities identified by the National Department of Human Settlements as a growth municipality to identity PHDAs. In accordance with the National call for spatial transformation and consolidation in human settlement development, the Municipality in conjunction with the National Department of Human Settlements has identified and is currently in the process of adopting two Priority Housing Development Areas (PHDAs), namely:

- ✓ Polokwane R71 corridor (starting from Ramahlodi Park to Boyne)
- ✓ South-western Gateway corridor (starting RBA taking Matlala road up to Sengatane, including Bloodriver)

The identified PHDA's were designated using the following national criteria:

- a) High demand for housing and related services e.g. basic engineering services;
- b) Large enough to accommodate economic, social infrastructure and housing needs;
- c) Support sustainable environmental management and the integration of land uses and amenities;
- d) Would grant reasonable access or progressive realization of such access to bulk infrastructure, social amenities, economic activities and transport;

The purpose and objectives of Priority Housing Development Areas are:

 To target and prioritize areas for integrated housing and human settlements development to ensure the delivery of housing for a broad range of income groups within an integrated mixed use development. To this end, the following is considered as circumstances of priority:

VISION 2030=SMART CITY

- Areas of urgent housing need where there is an established high demand and low supply of housing opportunities;
- Areas requiring upgrading and/or redevelopment for purposes of delivering housing choices including subsidized housing; and
- Areas requiring improved access to infrastructure, amenities and services
- Areas that supports the integration of different housing typologies, land uses and economic development;
- 2) To **transform entrenched spatial patterns** which have historically exacerbated social inequality and economic inefficiency:
 - Achieve a balance between spatial equity, economic competitiveness and environmental sustainability
 - Implement spatially targeted projects to achieve spatial transformation Develop new post-apartheid cities and city patterns that ensure urban access.

The identified PHDAs are not in conflict with any of the City's development plans. It should however be emphasized, given the spatial context of the City, that the PHDAs should not mean that housing delivery would be limited to the identified PHDAs, but only specific housing programmes will be implemented in the areas. The National department indicated that the programme will be funded by the department.

2.21.8 Building Inspection

The challenging factor within the directorate is deeply on the records management of the Building plans approved hence, the Municipal records management SBU does not have control over the building Plans that are approved. Several cases were observed where the majority of the Building Plans were found to be missing. A proper plan should be considered to locate the building plan within the records management.

Key challenges:

- Record management of the Building Plans.
- Electronic Filling and submission of the Building Plans.
- Staffing for key positions such as plan examiner and Building inspectors.
- Incompetency for the Building inspectors due to limited training on the following:

- ✓ Sewerage inspection.
- ✓ Structural and Concrete engineering.
- \checkmark Plumbing (including trading).

Required intervention:

- Records management to deal with the recoding of building plans.
- Purchase of the relevant equipment's for the electronic filling.
- Re-structuring of the Building inspection and creation of the Building inspection SBU
- Filling of the vacancies.

Legislation and Policy Perspective

The following legislative requirements are used by the SBU on a daily basis in the application and enforcement of the Act on National Building Regulations and Building Standards (Act 103 of 1977) as well as in the evaluation and approval of building plans, hoarding, demolition and other applications in terms of the following:

- The National Building Regulations Act (Act 103 of 1977).
- Act on architects (Act 35 of 1970).
- The Polokwane/Perskebult Town Planning Scheme, 2016.
- i. Services provided by Council's building Inspections sub-unit include the following:
 - Building plan evaluation and approval.
 - Minor works permit approval (for work such as swimming pools, small 'Wendy' houses.
 - Extension of the validity of an approved building plan.
 - Temporary structures permits.
 - Hoarding permits.
 - Demolitions permits.
 - Copies of approved building plans.
- ii. In additions, other responsibilities are:
 - Building Inspection during the construction period.
 - Issuing of Occupation Certificates.
 - General enforcement of building Regulations.
 - Investigation and resolving building complaints, contraventions and illegal building work.
 - Maintaining statistics on building construction activities.

2.21.9 Polokwane Ext 78 (Previously known as Disteneng)

The transformation of Disteneng or Ext 78 from an inhabitable area where our community suffered under inhabitable conditions to what is now the community there can call home, is one of our good stories to tell. 1040 RDP houses have been allocated for 2019\20. This is now a fully-fledged residential area. This was an informal settlement which the Municipality took a decision to upgrade and subsequently a township with almost three thousand (3000) residential sites was re-established, registered and proclaimed. The president of the Republic, President Cyril Ramaphosa has committed to build a school for this community.

Approximately one thousand seven hundred (1700) beneficiaries were re-settled on formally demarcated sites. The remaining sites, which will be sold, are reserved for middle and high income earners. The remaining households were relocated to a holding area in Ext 106, thereafter, they will be relocated to Ext 126 later this financial year. Basic engineering services like water and sanitation are being installed.

| Number of RDP allocated to ext 78 | Progress on Construction foundation ,etc) | (how many complete /on |
|---|--|---|
| The total number of RDP allocation was 1719 for Low income and the rest be middle to high income as follows: Low income earners = 1719 Middle / gap = 1044 High income = 93 Medium-high density = 14 | The Township was installer infrastructure services (W Electricity and road grading concluded for Top structure: Over 600 housing units we which can be summarized as Allocation Foundations Wall Plates Wall Plates in progress Roof and Finishes Roof and finish in progress Untouched units | ater and sanitation and g). To date, the following ere at the completion stage s follows: =1450 = 140 = 400 = 87 = 90 |

VISION 2030=SMART CITY

2.21.10 Progress on RDP Construction at Ward 08

RDP Construction at ward 08

2.21.11 Polokwane Ext 133

Polokwane Ext 133 is another newly approved project with almost three thousand (3000) sites which was approved for the benefit of the people of wards 11, 12, 13, 14, 17 and 37 in Seshego for residential and other land use purposes. Basic engineering services like water and sanitation are being installed. 450 housing units have been allocated for this area and the contractor will resume with construction as soon as services are fully installed.

VISION 2030=SMART CITY

2.21.12 Polokwane Ext 72 and 79

The housing Gap Market is one critical area that require government's intervention and the municipality has responded by making pockets of land available for development of townships Ext 72 and Ext 79.

2.22 Corporate Geo – Informatics

Corporate Geo-informatics has been established under the planning and Economic Directorate. Geographic information system **(GIS)** is a critical tool that supports a number of municipal legislative requirements contained in the Municipal System Act (No. 32 of 200), the Municipal Structures Act (No. 117 of 1998), and the Spatial Data Infrastructure Act (No. 54 of 2003), the Promotion of Access to Information Act (No. 2 of 2000) and the Property Rates Act (No. 6 of 2004).

Most importantly, GIS is a vital tool to support the Municipal Integrated Plans (IDPs), undertaken in accordance with the Polokwane Spatial Development Framework and with projects have a recorded spatial location.

GIS is the only technology that will allow Polokwane local municipality to manage its assets spatially in an interactive environment and thereby ensure that all municipal assets are managed electronically. The SBU: Corporate Geo-Informatics is expected to make a significant contribution to the planning process in the municipality. Currently, the SBU is working on ensuring that Revenue SBU receives clean and accurate Property data which will enable accurate billing of properties. A spatial land audit that is GIS based will be conducted to support the Spatial Development Framework and Land Use Management System in the municipality. GIS will play a pivotal role in the maintenance and monitoring of these plans as they change overtime. For example; Municipal boundary demarcation adjustment, land subdivision and ownership transfer, amendment schemes and urbanization.

Professional Land Surveyors are not limited to preparing plot plans, and placing boundary markers. In addition to being experienced in all types of land surveying and Geomatics services, they consult and incorporate the use of technological innovations and data

VISION 2030=SMART CITY

management techniques as it relates to communities and infrastructure. Utilizing products like online Geographic Information Systems (GIS) that help municipalities manage their assets, save time and efficiently deploy resources; quickly provide the accurate spatial data, boundary definitions and geo-referenced information clients need to move their land development or infrastructure projects toward successful completion.

Surveyors always play a key role in urban planning, responsible for data collection and for the management of different design and engineering plans such as transportation, water system, and power system plans using proper metric standards (e.g., coordinate system, accuracy, drafting specifications, etc.).

2.22.1. Integrated GIS system

With the Integrated GIS system, Polokwane Municipality will have an integrated system where the majority of systems that were running independent of each other will be running from a federated platform underpinned by geographic information system (GIS) or spatial data. The municipality will for the first time empower all of its employees and its customers with relevant information that they'd need when carrying out their responsibilities.

Polokwane Municipality being the largest business hub in the Limpopo Province and being the most strategically located city in the heart of the Limpopo, it attracts all major economic opportunities and play a significant role in the socio-economic space by providing the best services to its residents. The municipality also has a population concentration centre where people from all walks of life migrate to the city in search for a better life. In order for the city to plan better and efficiently, the use of spatial data become paramount to the city's planning and development. The municipality has since 2016/17 financial year embarked on a journey to become one of the role players in the data driven institutions in the country.

The Integrated Geographic Information system has been developed to streamline and improve the institutional business process flow and to restore customer confidence in the institution by providing efficient and reliable services.

VISION 2030=SMART CITY

The introduction of the integrated GIS system in the municipality is aimed at transforming the organization to a point where every person or official/s that make use of the spatial data to make well informed decisions, have access to spatial data and its attributes at all times. The system integration in the municipality is designed to empower the council decision makers such as managers, directors and municipal manager to explore data independently even if one is working with data from various sources.

The new technology (Integrated GIS System) has made it possible now than ever to capture, store and manipulate large quantities of data in a more cost effective manner. The integrated GIS system gives decision makers a competitive edge in the sense that it does not only proved them with reports on what had happened but rather report on what is happening, e.g. Town planning application management module (TPAMS) provide town planners and management a real time feed on that applications that are being processed by the municipality. Similar protocol is being followed with Building plans application management system (BPAMS) and Cemetery management system (CMS).

The integrated GIS system function as a tool through which the various databases or systems that where running independent of each other will now be accessed and managed from a single central point with map enabled functionalities. The advantages of using such a system is that end users need not be academically trained to navigate through the various platforms. The following application modules form part of the integrated GIS System:

- Land Information Management System (LIMS)
- Town Planning Application Management System (TPAMS)
- Building Plans Application Management System (BPAMS)
- Cemetery Management System (CMS)
- Billing Information Management
- Document Management System
- Infrastructure Asset Management
- Valuation Roll

For quick access to any of the above listed module please click the link below and you will be taken to the Polokwane Integrated GIS System landing page. <u>http://gis.polokwane.gov.za/polokwanewebpage/</u>

| | Challenges | Intervention | | | |

2.22.2 Challenges and Intervention of GIS

2.22.3 Successes of Corporate Geo-Informatics

Despite all the challenges mentioned above the SBU: corporate Geo-Informatics had brought in the following successes within the Directorate: Planning and Economic development.

- Successfully implemented seven of the eight modules.
- Through the full implementation of the integrated GIS system, the municipal authority will be able to track all land development applications right from the moment the application is lodged with the municipality to the decision stage.
- Revenue SB will receive accurate property information for accurate billing.
- The GIS system will ensure that
- The system will make it easy for authorities and municipal officials to draw statistical reports from the system which will pass the audit master's test.
- Continues with the support for site identification across the municipality.
- The SBU plays an important role in revenue data, IDP project spatial presentation and correct presentation of the valuation roll.
- Assisted service providers who are carrying out municipal duties by rendering its technical services such as land surveying and spatial data dissemination to minimise errors and save council its resources.
- Play a role in assisting finance and billing section to correct of duplicated accounts.
- Continuously engaging with other sister departments such as Engineering Services to encourage them to support with the routine updating of GIS databases.

2.22.4 Role of GIS in the Municipality

Polokwane municipality has been using GIS technology for over 10 years, and this technology has proven to be a catalytic tool when it comes to decision making relating to land development and other related activities. Therefore, various SBUs either directly or indirectly make use GIS in carrying out their functions. But even though the tool has been in the municipality for many years some spatially challenging decisions were taken. This is a clear indication that decisions where still taken in silos even though GIS was in one way or the other been used by various SBUs.

VISION 2030=SMART CITY

The Introduction of Integrated GIS System means that the use of spatial data ought to be placed right in the hands of the people who are taking decisions on land development matters. The consolidation of various systems into GIS platform is one way of allowing for automatic updating of information that can be seen by everyone at the same time and this will eliminate the duplication of work by different SBUs and will ultimately lead to efficient productivity and save municipal resources. This merely shows that the Corporate Geo informatics SBU has a major role to play in realising the municipality's Smart City 2030 vision

2.23 Polokwane Housing Association – PHA

The City of Polokwane is a leader within the province as it has an established housing entity (Thabatshweu Housing Company PTY LTD) – trading as Polokwane Housing Association - PHA), but the responsibilities that come with the fully and effective functioning of the PHA need to be addressed during the next five-year period to ensure that a sound base is established for building sustainable integrated human settlements. The focus should be on identification of mechanisms to fast track delivery of social housing and therefore the level 2 accreditation of the PHA becomes critical and essential. This will also result that the Service Delivery Agreement (SDA) should be reviewed to incorporate these aspects. This will improve the property portfolio of the PHA and assist towards the establishment thereof as a viable municipal entity.

Critical for the operational requirements of the PHA will be the adherence and compliance of all integrated settlement establishment (spatial plans) with the Spatial Development Framework of the City of Polokwane. The PHA must also develop mechanisms to effectively deal with the conclusion and finalisation of the Garena housing project and to review and update the housing chapter. The development of a communication plan will assist the PHA to create awareness and obtain buy-in from the private sector with regards to planned developments. Human settlement demand database and other forms of pieces of information required need to be updated regularly and communicated to all various stakeholders as means

to obtain buy-in. The PHA is also responsible for effective co-ordinated and regulated building and development within the municipal area.

PHA is currently managing 508 units located in the City of Polokwane, Ladanna with an estimated 1,524 residents and Seshego CRU with an estimated 567 residents. The projects are known as the Ga-rena Hosing Village and Seshego CRU and both projects and consists of a mixture of one, two and three bedroom units and shops, shops, Live and work units for the CRU project. Both are within a radius of 5km from the CBD provides housing with easy access to transport and social amenities / places of interest. The land parcels earmarked for development are development are the following i.e

- Ga-Rena Phase 2 to deliver 492 social housing units. Construction has started
- ✓ Polokwane Ext 106 to deliver 546 student bed housing units. Planned construction start date is January 2010
- ✓ Polokwane Ext 107 to deliver 754 GAP market rental housing units.
 Planned construction start date is January 2010.
- ✓ Polokwane Ext 76 to deliver 240 social housing units. Panned construction start date is November 2019.
- ✓ Polokwane Ext 79 to deliver 100 social housing units
 Total number of housing units =2 446 housing units

All these land parcels are situated within the development zone of Polokwane Municipality with vibrant development activities around them. Townships have been established on these land parcels and there are no bulk requirements

1. Proposed Development Options:

The following five will be the development options that PHA will consider:

a. Delivering housing on a development lease approach

The developer takes the risks of developing and managing housing units over an agreed period of time. At the end of the period the facility is transferred to PHA

b. Acquiring CRU housing stock to provide property management services

VISION 2030=SMART CITY

PHA acquires these projects from CoGHSTA in an effort to grow its property portfolio

c. Providing student accommodation.

The entity has Investigated the possibility of providing student accommodation Each stream makes clear the following:

- Type of development, unit numbers, facilities/amenities etc.
- Status of land town planning processes
- Funding options and envisaged budget
- Target market
- Project development agreement i.e. PHA as developer vs developmental lease and all that which goes with either option.

The development lease seems to be the preferred model to follow as PHA will not have any risk at all. At the end of the lease, the properties will be transferred to PHA. This approach is similar to the one the municipality has with developers on the Motor City development. The developer approach model will expose PHA to all kinds of risks that PHA is not ready to deal with.

PHA manages social housing stock in close cooperation with the residents through tenant committees and tenant meetings. It wants to provide quality accommodation in affordable ways, also working against slum conditions and promoting civic pride. PHA management product aims at being participatory and integrative of physical, social and human aspects.

a. Housing development

Polokwane Housing Association continues to identify possibilities for new housing development in the inner city, through Greenfield development, refurbishment or conversion of buildings and offices for residential uses. It wants to develop housing in response to unnecessary dislocation of people that are sometimes caused by so-called urban renewal processes.

b. Housing Information

A housing information desk provides information and advice on how to access various affordable housing options and housing subsidies, as well as information on housing policy, rights and responsibilities. This all happens at our offices located in 35 Landros Maré Street, Polokwane, and Limpopo.

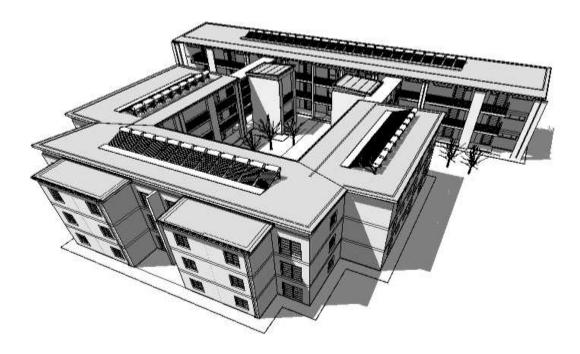

c. Community Empowerment

PHA wants to support its tenant community through linkages to other social support services and empowerment programmes. It also wants to ensure that low income housing, social and non-social housing in the inner city is on the agenda of relevant role players—local and provincial government, financial institutional, etc.—through an active advocacy programme. In conjunction with its partners it advocates inner city residential opportunities for those previously excluded and without access. This is done through local community forums, participation in discussions on urban renewal, and so forth.In order to rapidly address the Social and non-social Housing shortages in the City of Polokwane, the PHA proposes the following development options;

2.4Ga-Rena Phase 2 / Annadale Ext 2 Social Housing Project

Annadale Ext 2 Social Housing Project which is phase 2 of Ga Rena Rental Village and is expected to yield about 494 rental housing units. The contractor is on site and have started with the construction. The project is expected to be concluded in 18 months' period.

2.24.1 Designs of Ga-Rena Phase 2

2.5 Social Housing

The Municipality has availed land parcels to the Polokwane Housing Association (PHA) for the purposes of delivering Social, GAP and Rental housing projects. The PHA will embark on **three** projects namely the:

- 1) Annadale Ext 2 Social Housing Project
- 2) Ext 76 Social Housing Project
- 3) Student Accommodation

Ext 76 Social Housing Project which will be implemented in Matlala Road, in Ext 76. The project is intended to yield 240 rental units. It is developed in a township dominated by income housing, it will bring different typology in the area and revitalize the environment. Planned start date is around October 2019.

Student Accommodation is the project to be implemented under PHA at Ext 106 and Ext 108 next to Sasol Madiba Park. A contractor has also been appointed and is expected to start with construction anytime.

VISION 2030=SMART CITY

2.6 Gap Housing

A contractor has been appointed to develop gap housing in Polokwane Ext 107 for the delivery of **754 housing** units hosting different housing typologies that will be built off plan and be sold for outright ownership. It is anticipated that construction on this project will start in **January 2020.**

VISION 2030=SMART CITY

CHAPTER Three – Economic Analysis

3.1 Investment Analysis

This chapter focuses on PLM's investment climate. The global, national and local factors that shapes the municipality's local development context are discussed.

3.1.1 Globalization Context

SA is a member of the United Nations (UN), G20, BRICS, World Trade Organization (WTO), African Union, SADC, COMESA and Southern Africa Customs Union (SACU). The country's voice on global issues is growing in both influence and significance. Recently, the country won a seat into the powerful 15-member United Nation Security Council. This is a milestone considering that SA's democracy is still at its formative years. SA's economy is closely linked to that of the global economy thereby exposing the local economy to globally-induced vulnerabilities. The local economy is yet to fully recover from the 2007/8 global economic crisis.

3.1.2 World Economic Outlook

World economic data released in 2017 by International Monetary Fund (IMF) shows that the global growth for 2017 was 3.6%, 2018 (3.7%) and 2019 (3.7%). In 2017, Advanced Economies (AEs) recorded economic growth of nearly (2.2%) and this figure marginally declined to 2.0 percent in 2018. The world economic growth is boosted by the performance of Emerging Markets (EM) and Developing Economies (DE). EMs experienced a growth of (4.6%) in 2017 which is 2.5% points above advanced economies. Sub-Saharan economies experienced a perennial decline in economic growth from a 7.0% in 2010 to 2.6% in 2017.

However, growth in the region is anticipated to reach 3.4 percent in 2018. In 2017, the contribution of new investment deals to the GDP was as follows: EMs (32%) AEs (21.1%) and DEs (18.7%). Outstanding risks that continue to derail the global economic recovery plan include among others; (1) Terrorism and geo-political tensions especially in the Middle East and Africa (2) A new wave of right wing nationalism in AEs (3) Protectionism which reverses past gains made in the global trade front and (4) Unhealthy trade tensions between the two giant economies (USA and China).

3.1.3 South African Economic Outlook

The South African economy has been growing at a relatively lower rate since the 2007/8 global financial crisis. The NDP has a growth target of 5.4% per annum, which is much higher than

VISION 2030=SMART CITY

the actual growth rate that is being experienced. During 2016, the growth rate was only 0.3 percent; this was followed by a growth rate of 1% in 2017 and 1.1% in 2018. Growth estimates for 2019 is fixed at (1.5%) whilst that for 2020 and 2021 is pegged at (1.7%) and 2.1% respectively. The low growth rate is attributed to the recent decline in the level of total factor productivity growth. There is a need to ring-fence the economy against contentious risks such as (1) Lack of national consensus on the land expropriation without compensation bill, (2) Policy uncertainty, (3) the impact of industry 4.0 on job security, (4) perceptions of tender corruption within the SOE sector and (5) lack of a combative strategy to leverage the performance of a crisis-ridden Eskom. All these risks need to be tackled in order to put the South African economy on the path of a rebound. The 10-point stimulus plan recently announced by President Ramaphosa will underpin multiple efforts by the government to reboot or reset the ailing economy.

3.1.4 Limpopo Province Economic Outlook

Figures released by StatsSA show that the province's growth rate declined to a negative 1.6 % in 2016 after the positive growth rate of 1.9 percent in 2015. The growth performance of the provincial economy can, to a large extent, be explained by the volatile growth performance in the mining industry and its relative contribution, as a specific sector, to the provincial economy. The mining sector declined by 5.9 percent in 2016 and contributed 1.7 percent to the decline of the economy in 2016, due to the base effects. The provincial economy is expected to grow by 9% in the year 2019. This growth is underpinned by the injection of R150 billion into the Musina-Makhado Special Economic Zone (SEZ) and R25 billion into the Tubatse SEZ. A total of 26,000 and 8000 jobs will be generated in Musina Makhado SEZ and Tubatse SEZ respectively. The SEZ initiative is expected to give Limpopo's economy a new lifeline.

3.1.5 Outlook of Polokwane Municipality Economy

If current prices are taken into account, data collected from Regional Explorer (2019) shows that PLM's combined GVA figures for 2016, 2017 and 2018 was R188, 234,433.00. The data also shows that the year 2018 recorded the highest GVA figure (R66 220 952.00, followed by year 2017 (R63, 391,738.00). The lowest GVA figure was recorded in 2016 (R58, 621, 743.00). When 2010 prices are used, the municipality's economy grow by 1.4% in 2016 and 2017 respectively. In 2018, the GVA grew at a relatively lower rate of 0.5%. In GVA terms, between 2016 and 2018, the primary sector contributed R13 573,616 to the municipal economy whilst the secondary sector contributed R19, 552,158. During the same period, the tertiary sector was the largest contributor (R155, 108,659). As alluded earlier, the tertiary sector is the most visible and dominant contributor to PLM's GVA.

VISION 2030=SMART CITY

3.1.6 Partnership and Networking

In furtherance of its networking objectives, the City of Polokwane signed twinning agreements with prominent cities of the world. Chief among them include inter-alia, Zimbabwe's Bulawayo, USA's California State, Country of Carmaland of Sweden, China's Henan Province and China's Holguin Province. Whilst great strides have been made in deepening cultural and economic cooperation with some of the world's prominent cities, the missing-link is that no formal measures have been taken to evaluate the developmental value of these twinning agreements.

3.2 Key Economic Indicators

Key risks arising from the current economic context are as follows:

Table: Key economic Indicators

| Indicators | 2018 | 2019 | 2020 | 2021 |
|------------------------------|--------|--------|--------|--------|
| | | | | |
| Real GDP growth | 0.3% | 1.5% | 1.7% | 2.1% |
| Prime lending Interest rates | 10.25% | 10.25% | 10.25% | 10.25% |
| Exchange rate | R14.90 | R14.20 | R14.60 | R14.0% |
| Debt to GDP ratio | 58.80% | 70% | - | - |
| Inflation rate | 4.7% | 5.2% | 5.4% | 5.4% |
| Exports | 2.0% | 2.3 | 2.7 | 2.8 |
| Imports | 3.8% | 1.7% | 3.2% | 3.3% |

Source: National Treasury, 2018

3.2.1 Gross Domestic Product

SA's DGP grew by 0.8% in 2018 compared to 2017. The 2018 GDP figure is US\$349,433 million. SA's GDP per capita in 2018 was US\$6,182, at least US\$855 higher than in 2017 (US\$5, 327.00). Projections for 2019 is (1.5%), 2020 (1.7%) and 2021 (2.1%).

Rising government debt - South Africa's budget deficit of between 4.5% and 5% debt to the GDP mean that the debt-to GDP ratio will likely rise above 70% (including Eskom guarantees) over the next 3 years. The ballooning government debt is likely to weaken the country's credit profile in the sight of restive capital markets (National Treasury, 2018).

Municipal debt – It is estimated that the City of Polokwane is currently owed a whooping R1 billion by rate payers. The deepening crisis of uncollected revenues continue to weaken the municipality's ability to fully upgrade and renovate its ageing economic infrastructure. The need to scale-up the City of Polokwane's revenue collection effort cannot therefore be over-

VISION 2030=SMART CITY

emphasized. The rising municipal debt is a strong sign that its revenue collection environment need to be reformed to improve its efficiency and effectiveness.

Fuel prices- Judging by events witnessed in the past 5years, local companies are encouraged to effectively hedge themselves against the inescapable realities of skyrocketing fuel prices. Unstable fuel prices remain a major driver of cost-push inflation and hence a permanent item on local companies' business risk agenda.

Interest rates - The average cost of capital of between 10% and 13% poses a real threat to the viability of local companies. In contrasts, companies in Europe, USA and Asia have a comparative advantage over local companies in that they access loans at a far lower cost of capital of between 2% and 5%.

Exchange rate - The strength of the Rand against the USA dollar (US\$ -R14.70) is relatively low. Whilst a strong Rand means a high import bill for traditional importers, a weak Rand is good for exporters in that it makes their goods relatively competitive on the export market.

Inflation rate -South Africa's Consumer Price Index (CPI) currently stands at (4.4%) in April 2019 for South Africa and Limpopo Province, wherein Polokwane Municipality is located. Costpush inflation is problematic in that it erodes consumers' purchasing power which leads to low demand for local goods and services.

Under-performing SOEs - PLM's new LED trajectory is built on the bedrock of a modern economic infrastructure. However, there are genuine fears that crisis-prone SOEs may fail to deliver critical economic infrastructure like roads, electricity, water and airports due to perennial capacity challenges.

3.2.2 Downgrades of Economy

The South African economy is yet to recover from the shocks generated by the decision of three rating agencies to downgrade the economy to junk status between 2017 and 2018. The low credit rating score will make it complex and costly for local companies to secure loans from international capital markets.

3.2.4 Employment Patterns

Unemployment is one of the social drivers of crime, HIV and STIs and substance abuse among youths. Compared to other BRICS countries, (Brazil-(13.1%) Russia – (4.7%); India (3.5%) and China – (4%), SA's unemployment burden of (27.6%), Limpopo (16.5% and PLM (14.9%) is turning to be a real unmitigated national disaster (StatsSA, 2019).

VISION 2030=SMART CITY

Table: Unemployment patterns

| | Unemployment in numbers | | | Rate of unemployment | | | |
|----------|-------------------------|--------|--------|----------------------|-------|-------|--|
| | 2016 | 2017 | 2018 | 2016 | 2017 | 2018 | |
| African | 43 863 | 46 373 | 45 858 | 15,9% | 16,2% | 15,7% | |
| White | 463 | 459 | 474 | 2,8% | 2,7% | 2,8% | |
| Coloured | 408 | 418 | 399 | 14,2% | 14,0% | 13,1% | |
| Asian | 120 | 127 | 121 | 5,8% | 5,8% | 5,3% | |
| Total | 44 855 | 47 377 | 46 852 | 15,1% | 15,4% | 14,9% | |

Source, Regional Explorer, 2019.

According to Regional Explorer (2019) between 2016 and 2018, PLM's unemployment rate slightly declined by 0.2% from 15.1% in 2016 to 14.9% in 2018. The highest unemployment figure of (15.4%) was recorded in 2017. The municipality's unemployment rate of 14.9% is (2.4%) lower than that of the province and a further 13.1% lower than that of the country (27.6%). The harshest realities of unemployment are felt by Black Africans (15.7%); followed by Coloureds (13.1%), Asians (5.3%) and Whites (2.8%). Despite all the gains made in this front, youth unemployment remains a worrisome crisis that needs to be urgently contained.

3.2.5 Income Distribution

Table: Income distribution

| Income bracket | 2016 | 2017 | 2018 | Total |
|-----------------|--------|--------|--------|--------|
| 0-2400 | 33 | 29 | 19 | 81 |
| 2400-6000 | 565 | 512 | 342 | 1 419 |
| 6000-12000 | 5 210 | 4 943 | 4 286 | 14 439 |
| 12000-18000 | 10 335 | 9 730 | 8 856 | 28 921 |
| 18000-30000 | 28 363 | 28 060 | 27 295 | 83 718 |
| 30000-42000 | 28 786 | 28 492 | 28 660 | 85 939 |
| 42000-54000 | 24 649 | 24 560 | 24 398 | 73 607 |
| 54000-72000 | 25 806 | 26 425 | 27 151 | 79 382 |
| 72000-96000 | 22 775 | 23 569 | 24 179 | 70 524 |
| 96000-132000 | 19 620 | 20 881 | 22 173 | 62 674 |
| 132000-192000 | 17 996 | 19 178 | 20 167 | 57 341 |
| 192000-360000 | 22 515 | 23 659 | 25 065 | 71 239 |
| 360000-600000 | 13 251 | 14 022 | 15 026 | 42 300 |
| 600000-1200000 | 8 531 | 9 006 | 9 678 | 27 214 |
| 1200000-2400000 | 1 883 | 2 241 | 2 518 | 6 641 |
| 2400000+ | 211 | 264 | 287 | 762 |

VISION 2030=SMART CITY

| Income bracket | 2016 | 2017 | 2018 | Total |
|----------------|---------|---------|---------|---------|
| Total | 230 531 | 235 570 | 240 100 | 706 201 |

Source, Regional Explorer, 2019.

Data extracted from Regional Explorer (2019) between 2016 and 2018 show a marked decrease of 42.4% in households earning between (R0-R2400). PLM must be lauded for putting at least 14 households out of the poverty trap. The highest concentration of incomes is in the (R30, 000 and R42, 000) loop, followed by the R18, 000 and R30, 000) loop. The third and fourth highest concentration of incomes are in the (R54, 000 –R72, 000) and the (R42, 000 – R54, 000) respectively. In contrast, the least concentration of incomes is in the (<R2, 400,000) loop, (211 households in 2016; 264 households in 2017 and 287 households in 2018). The figures also show that PLM is increasingly becoming a middle-class municipality. Despite reporting an upward shift in incomes in almost all income categories, it is important to note that the municipality is still miles away in its war against the g challenge of income inequality.

3.2.6 Gini Co-efficient

The Gini-Co-efficient measures income inequality on an index where 1 reflects perfect inequality and 0 reflects perfect equality. PLM reported a Gini-Coefficient of 0.66 in 2007, 0.65 in 2011 and between 2016 and 2018, the Gini-Co-efficient was constant at 0.61. The gap between low-incomers and high incomers within PLM continue to widen despite efforts by the government to bridge such income disparities.

3.2.7 Poverty Headcount

Table: Poverty headcount

| | 2016 | 2017 | 2018 |
|----------|---------|---------|---------|
| African | 220 018 | 228 057 | 230 845 |
| White | 78 | 86 | 95 |
| Coloured | 879 | 855 | 792 |
| Asian | 74 | 97 | 112 |
| Total | 221 048 | 229 095 | 231 844 |

Source: Regional Explorer, 2019

VISION 2030=SMART CITY

A study by Stats SA on multiple deprivation at ward level in Limpopo make it possible to spatially identify the most acute pockets of poverty in the province. Poverty is measured in four dimensions namely; household income, unemployment, level of education and access to household services such as water. The study found that 23 (17%) wards in Limpopo were deprived in all four dimensions of poverty. Sekhukhune District has 11 wards (48%) of the 23 wards with four dimensions of poverty and Mopani district has 7 wards. 25% of Limpopo's 543 wards are deprived in at least one dimension of poverty Polokwane's poverty head count increased by 1.2% from 20.1% to 21.3% whilst that of Capricorn increased by 1.3% (from 7.2% in 2007 to 8.5%). The poverty head count at Provincial level declined from 11.5% in 2007 to 10.1% in 2011. The above poverty figures paint a gloomy picture in that compared to both Capricorn and Provincial contexts, Polokwane has the highest number of people still living below the PDL.

3.3 Social Indicators

Notable risks that may arise from PLM's current social context include inter-alia;

3.3.1 HIV and AIDS

Table: HIV and AIDS

| | 2016 | 2017 | 2018 |
|----------------|--------|--------|--------|
| HIV infections | 59,664 | 69 539 | 71 007 |
| AIDS deaths | 1 376 | 1 234 | 1 241 |

Source: Regional Explorer, 2019

The burden of HIV and AIDS continue to pose a developmental hurdle because it put PLM's human assets at risk of morbidity and mortality. Data extracted from Regional Explorer (2019) showed that 59,664 people were infected with HIV in 2016; 69,539 in 2017 and 71,007 in 2018. During the same period, 1376 AIDS related deaths were reported in 2016; 1234 deaths in 2017 and 1241 deaths in 2018. Owing to an effective ARV treatment strategy adopted in 2009, AIDS related deaths reduced significantly by 9.8% between 2016 and 2018. The City of Polokwane is arguably one of the top HIV hotspot in Limpopo Province.

3.3.2 Business Crime Data

Table: Business crime data

| | 2015/16 | 2016/17 | 2017/18 | Total |
|---|---------|---------|---------|--------|
| | | | | |
| Burglary at business premises | 1 065 | 1 128 | 1 052 | 3 245 |
| Theft of motor vehicle and motorcycle | 188 | 174 | 162 | 525 |
| Theft out of or from motor vehicle | 1 755 | 1 733 | 1 501 | 4 989 |
| Stock-theft | 278 | 346 | 315 | 938 |
| Commercial crime | 885 | 866 | 860 | 2 611 |
| Shoplifting | 859 | 888 | 825 | 2 573 |
| Aggravated robbery - Robbery | 204 | 215 | 241 | 660 |
| at business premises | | | | |
| Aggravated robbery – Carjacking | 58 | 56 | 72 | 186 |
| Aggravated robbery - Truck hijacking | 0 | 1 | 1 | 2 |
| Aggravated robbery - Robbery of cash in transit | 0 | 1 | 3 | 4 |
| Aggravated robbery - Bank robbery | 0 | 0 | 0 | 0 |
| Total | 5 292 | 5 408 | 5 033 | 15 733 |

Source: Regional Explorer, 2019.

The most frequently recorded crimes within PLM between 2016 and 2018 in terms of their frequency of occurrence are: (1) theft out of or from motor vehicle; (4 989 cases); (2) burglary at business premises (3 245 cases); (3) Commercial crimes (2 611 cases); (4) shop lifting (2 573 cases); (5) stock theft (938 cases); (6) Aggravated robbery at premises (660 cases); (7) Theft of motor vehicle and motor cycles (525 cases); (8) Aggravated robbery-carjacking (186 cases; (9)Aggravated robbery of cash in-transit (4 cases) and (10) Aggravated truck hijacking (2 cases). During the same period, no bank robberies were recorded within the municipality.

3.3.3 Crime Hotspots

The figures below include all forms of crimes (both business related and non-business related

Table: Crime hotspots

| | 2018 | Rank |
|---------------|--------------|------|
| Seshego | 12 415 cases | 1 |
| Polokwane CBD | 12 142 cases | 2 |
| Mankweng | 11 249 cases | 3 |
| Westernburg | 5 632 cases | 4 |

Source, SAPS: 2018

VISION 2030=SMART CITY

During the 2018 crime reporting season, Seshego cluster (12 415 cases), recorded the highest number of criminal cases in Limpopo province, Polokwane cluster (12 142) is the second highest crime hotspot in the province; Mankweng (11 259 cases) cluster came third. Westernburg (5632 cases) another settlement within PLM is number 8 on the Province's worst affected crime hotspots. From an investment promotion perspective, the most worrying concern is that the top three crime hotspots in Limpopo Province are found within PLM. This makes PLM difficult to sell especially to risk-averse investors.

3.4 Technological Indicators

3.4.1 Integration of Industry 4.0 in service delivery Model

In this age of Artificial Intelligence (AI) and Internet of Things (IoTs), the winners in tomorrow's world will be cities that build and run thriving digital economies. The City of Polokwane is yet to fully integrate the notion of the Industry 4.0 into its overall service delivery model. There is a need for the City of Polokwane to create and nurture a new breed of techno-serve entrepreneurs as part of its many efforts to marshal its economy into the digital age.

3.4.2 Digital literacy

At the core of PLM's efforts to leverage residents' digital readiness remains the intensification of digital literacy education especially in rural areas. The popularization of online payment of bills by residents is one such critical step the City of Polokwane can take to strengthen its digital environment.

3.4.3 Farm Mechanization

Smallholder farmers based mainly in rural areas do not have access to appropriate farm machinery and equipment. A farm mechanization scheme targeting smallholder farmers remain the best way to strengthen the farm automation environment of emerging farmers within the municipality. This can be achieved through greater collaboration with the Department of Agriculture and other key stakeholders.

3.5 Environmental Indicators

The decline in water quality due to urban and industrial effluent discharge into river systems, poorly maintained wastewater treatment works, salinity from irrigation return flows, acid mine drainage and inadequate facilities as well as ageing infrastructure continue to pose another water challenge for PLM. Specific risks include inter-alia:

- 1. Pronounced erosion around un-rehabilitated brick fields, industrial sites and mines;
- 2. Dumping of poisonous ash and slag around Silicon area.

VISION 2030=SMART CITY

- 3. Ground water contamination from chemicals that leach into soils at bulk water storage facilities.
- 4. Groundwater pollution via seepage from gravesites, pit latrines and ventilated improved pit (VIP) latrines in the rural areas.
- 5. Asbestos cement ceilings are also still in use. In rural areas (the southwestern corner of the Molepo-Chuene-Maja cluster) sinkholes pose a threat to development and livestock.
- 6. Odours from burst sewer pipes in townships like Green side and Seshego and raw sewage around the Emdo Park.

3.5.1 Waste Management

Systematic and efficient collection of refuse is more pronounced in clusters such as Seshego, Polokwane, Mankweng and Sebayeng. However, a different model is being used in rural clusters like Molepo-Maja-Chuene, Moletjie and Aganang. In these areas, waste collection is done by community-based waste collectors who work under the auspices of Expanded Public Works Programme (EPWP). As part of a broader plot to improve its waste management environment, PLM needs to devise safer and innovative methods for disposing medical and hazardous waste.

3.5.2 Green Economy Agenda

As a signatory of several UN backed agreements on climate change, the City of Polokwane need to put the green economy concept on top of its business agenda. The idea of turning the City of Polokwane into a fully-fledged green economy is an idea that dovetails with its smart vision. The target is to create hundreds of successful green economy entrepreneurs by 2030. One way the City can fundamentally fulfil its green-economy vision is to stimulate private sector investment in the less explored renewable energy sector. Opportunities exist for private sector participation in the solar farming sector. The solar farming concept is advantageous in that it has a game changing effect on the local energy sector.

3.5.3 Greenhouse Farming Technologies

The diffusion of greenhouse farming technologies (itself a critical enabler of the green economy vison) within PLM is not as fast as one would expect. The high cost of setting up a greenhouse farming facility remain the major entry barrier that hinder emerging farmers from participating in the green economy.

VISION 2030=SMART CITY

3.5.4 Reduction in Carbon Emissions

Since the City of Polokwane is known for its low manufacturing activity, the risk of high carbon emissions in the city is not as pronounced as in cities like Johannesburg, Pretoria and Cape Town. However, in order to maintain its air quality leverage, the city needs to collaborate with local manufacturing and mining houses with the aim to strengthen its environmental education environment.

3.6 Legal Indicators

Risks arising from the legal context include inter-alia:

3.6.1 Harmonization of Investment Policies

The City of Polokwane is currently in the process of crafting its Investment Incentive Scheme. The strategy seeks to sell the City's unique investment opportunities to the outside world. Two entry barriers frequently raised by the business sector include: (1) business licensing which is riddled with many structural imperfections (2) unreasonable turnaround times especially in processing of development project applications. One way the City of Polokwane can improve its ease-of-doing business is to set up a Business One-Stop Shop (BOSS), as a broader plot to shorten the turnaround time of developmental applications.

3.6.2 Unlicensed Business Activity

One of the issues that constantly pose a policy headache to the City of Polokwane's planners is the influx of unregulated and unlicensed business activities especially around busy hawking sites like the Seshego Taxi rank and the infamous Indian Centre. There are genuine fears that the city's streets are slowly being hijacked by unregistered traders who are not remitting any form of revenue to the city. The severity of the challenge presents an opportunity for the City of Polokwane to rethink or reform its compliance enforcement strategy.

3.7 Demographic Indicators

Unlike other BRICS countries that have a relatively ageing population, South Africa possesses a demographic advantage in that its population is relatively young population and economically active.

VISION 2030=SMART CITY

3.7.1 Population Size

Table: Population size

| Year | 2011 | 2016 | 2011-201 | 6 | 2017 | 2016-201 | 7 | 2018 | 2017-2018 | |
|------------|---------|---------|----------|------|---------|----------|------|---------|-----------|------|
| Population | 728 633 | 799 679 | +71 046 | 9.8% | 812 102 | +12 423 | 1.6% | 824 165 | +12 063 | 1.5% |

Source, Regional Explorer, 2019.

Data extracted from the Regional Explorer (2019) shows that PLM's population increased by 71 046 (9.8%) between 2011 and 2016. From a year-on-year basis, between 2016 and 2017, the population increased by 12 423 (1.6%) and a further 12 063 (1.5%) between 2017 and 2018. StatsSA estimates that at least (11.46%) of the province's population lives in PLM. A development gap often arises when an increase in population size is not always matched with a corresponding growth in basic socio-economic infrastructure.

3.7.2 Number of Households

Table: Number of households

| | 2007 | | 20 | 2011 | | 2016 | |
|-----------|--------------------|------------------------------|--------------------|------------------------------|--------------------|------------------------------|--|
| | Total household | Average household size | Total household | Average household size | Total household | Average household size | |
| Limpopo | 1,215,935 | 4.3 | 1,418,102 | 3.8 | 1 601,083 | 3.6 | |
| Capricorn | 285,565 | 4.4 | 342,838 | 3.7 | 378,272 | 3.5 | |
| Polokwane | 130,361 | 4.3 | 178,001 | 3.5 | 214,451 | 3.3 | |

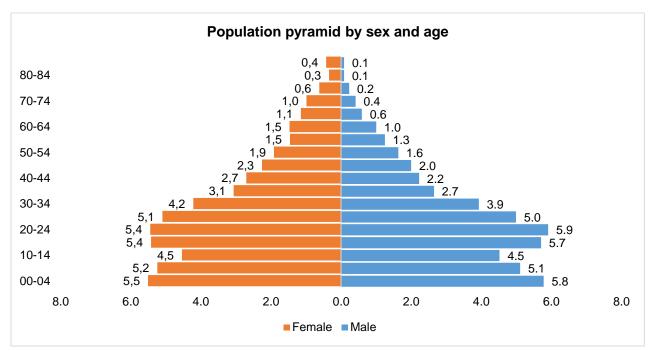

Source: Global Insight, 2016

The number of households in PLM increased from 178,001 (average 3.5 people per household) in 2011 to 214,451 (average of 3.3 people per household) in 2016. The figures above show a slight reduction in the average household's dependence burden.

VISION 2030=SMART CITY

3.7.3 Age Analysis

Figure: Age analysis

Source, StatsSA,

Data from StatsSA shows that the under 15 years' age-group decreased by (0.4%) from 31.1% in 2011 to 30.7% in 2016 whilst the 15-64-year age-group increased by (1.2%) from 63.2% in 2011 to 64.4% in 2016. The over 65 years' age-group decreased from 5.7% in 2011 to 4.9% in 2016 (Community Survey Report). Since the youths make up the majority of PLM's population, there is a need for the City of Polokwane to design business development schemes that economically empower young people.

3.7.4 Racial Profile

Data extracted from Regional Explorer (2019) indicates that the majority of PLM's population are Black Africans (760 285) (95.4%). Whites remain the second highest represented race (24 608) (3.1%) whilst Coloureds are the third highest represented race (7 193) (0.9%) and finally Indians are the least and fourth represented race (5 041) (0.6%). From an equity perspective, PLM needs to ensure an equitable distribution of LED resources and opportunities among the difference races that constitutes it.

VISION 2030=SMART CITY

3.7.5 Educational Status

Table: Educational status

| Level of Education | 2016 | 2017 | 2018 |
|--------------------------------------|---------|---------|---------|
| No schooling | 35 548 | 35 076 | 34 721 |
| Grade 0-2 | 7 359 | 7 207 | 7 101 |
| Grade 3-6 | 34 801 | 35 214 | 36 140 |
| Grade 7-9 | 75 956 | 77 150 | 76 916 |
| Grade 10-11 | 109 751 | 111 206 | 112 212 |
| Certificate / diploma without matric | 5 341 | 6 708 | 6 312 |
| Matric only | 135 940 | 139 342 | 145 307 |
| Matric & certificate / diploma | 42 902 | 45 096 | 47 402 |
| Matric & Bachelor's degree | 24 470 | 24 769 | 25 939 |
| Matric & Postgrad degree | 10 069 | 9 900 | 9 140 |

Source, Regional Explorer, 2019.

Data extracted from Regional Explorer (2019) shows that the population with no schooling background in PLM decreased from 35 548 in 2016 to 34 721 in 2018 whilst those with matric certificates increased from 135 940 in 2016 to 145 307 in 2018. During the same period, certificate/diploma holders increased from 42 902 in 2016 to 47,402 in 2018. Bachelor's degree holders increased from 24 470 in 2016 to 25 939 in 2018. However, PLM reported a sharp drop (1.8%) in Postgraduate degree holders (from 10 069 in 2016 to 9 140 in 2018. The sharp increase in diploma and bachelor degree holders paints a picture of a municipality that is gradually making inroads in the tertiary education sector. The presence of several universities and private colleges especially around the City of Polokwane, Seshego and Mankweng could also help to explain this phenomenon.

3.7.6 Human Development Index

Table: Human Development Index

| | 2016 | 2017 | 2018 |
|----------|------|------|------|
| African | 0,62 | 0,62 | 0,63 |
| White | 0,89 | 0,89 | 0,89 |
| Coloured | 0,72 | 0,73 | 0,73 |
| Asian | 0,79 | 0,79 | 0,79 |
| Asian | | 0,79 | |

Source, Regional Explorer, 2019.

VISION 2030=SMART CITY

Data collected from Regional Explorer (2019) shows that between 2016 and 2018, PLM's average HDI remained constant at 0.64. When different races are taken into account, the data shows that whites have a relatively high HDI (0.89), followed by Asians (0.79), and Coloured's (0, 73). HDI among Africans lags far behind at 0.63. The key policy challenge is for PLM to adopt a human capital development strategy that effectively address longstanding HDI disparities within PLM.

3.7.7 Educational Facilities (Skill Development)

The City of Polokwane is host to some of the country's popular universities and private colleges (University of Limpopo, Tshwane University of Technology, University of South Africa and MANCOSA, Capricorn TVET, Boston, Rostec, Sandton, Jeppe etc.). The local economy needs digitally-literate accountants, doctors, town planners, economists, and water scientists etc. in order for it to remain globally competitive. As part of its broader plot to strengthen its Industry 4.0 environment, PLM needs to partner with local universities in order to bridge inherent skill gaps in the local economy.

3.7.8 Migration Trends

A study by Feinstein International Centre in conjunction with WITS University in 2012 revealed that 95% of people migrating to Polokwane are South Africans. The rest (5%) are foreign nationals especially from Zimbabwean, Mozambique, Botswana, Swaziland and Malawi). The influx of migrants into PLM has the potential to fuel xenophobic activity as foreign nationals and local compete for scarce social care and job opportunities.

3.8 Sector Analysis

This outlines the strategic contribution of different sub-sectors to PLM's Gross Value Added (GVA). An analysis of traditional, emerging and future economic drivers of the municipality also forms part of the discussion.

3.8.1 Sub-Sector Performance Overview

The strategic importance of PLM's economy to Limpopo province is well documented. In 1996, Polokwane's economy accounted for 14.4% of Limpopo's GVA. Fifteen (15) years later, its economy accounted for 15.4% of the province's GVA. This represents an exponential increase of 1%. During that period PLM's economy grew at an average of (3.7%), whilst that Limpopo' grew at an average of (3.3%). Significant growth rates have been recorded in agriculture (5.2%) (Albeit from a low base) and in transport (7.9%). PLM's economy is less diversified (over-reliance on tertiary sectors). Whilst the tertiary sectors continue to record phenomenal

VISION 2030=SMART CITY

growth in GVA terms, secondary and the primary sectors are still at introductory phase. In other words, PLM's economy is less dependent on natural resources.

The following table represents a detailed analysis on how different sub-sectors performed during the 2016, 2017 and 2018 period.

| Sector | 2016 | 2017 | 2018 |
|--------------------|--------|--------|--------|
| | | | |
| Agriculture | 1,5% | 1,6% | 1,5% |
| Mining | 5,8% | 5,6% | 5,6% |
| Manufacturing | 4,2% | 4,4% | 4,3% |
| Electricity | 2,4% | 2,4% | 2,3% |
| Construction | 4,0% | 3,6% | 3,6% |
| Trade | 22,2% | 22,6% | 22,4% |
| Transport | 7,0% | 7,0% | 6,9% |
| Finance | 20,3% | 20,5% | 21,0% |
| Community services | 32,6% | 32,2% | 32,4% |
| Total Industries | 100,0% | 100,0% | 100,0% |

Table: Sub-sector performance overview

Source, Regional Explorer, 2019

For years, the municipality's economy has been dominated by service sectors. The top three performers in GVA terms are (1) Community services (32.6% in 2016; 32.2% in 2017 and 32.4% in 2018) (2) Trade (22.2% in 2016; 22.6% in 2017 and 22.4% in 2018); (3) Finance (20.3% in 2016, 20.5% in 2017 and 21.0% in 2018). At (7%) the transport sector is ranked the fourth. The manufacturing sector, mining, and construction are tied at (4%). The electricity sector contributes 3% of PLM's total GVA. The agriculture sits at the bottom at (1%).

3.9 Primary Sector

In 2016, the primary sector reported an output of (R1, 401,831,000), approximately 6.9% of PLM's total GVA; the figure slightly decreased to 6.3% (R2, 118,975,000) in 2017. Its contribution further declined to 4.8% (R2, 084,287,000) in 2018. The figures show that the primary's sector's total contribution to PLM's GVA was on downward spiral since 2016. This could be attributed to the slump in commodity prices and climate-change induced droughts especially between year 2016 and 2018.

3.9.1 Agricultural Sector

The agricultural sector reported a negative growth of (-0.1%) between 2016 and 2018; and slight increase of (0.1%) between 2016 and 2017. However, between (2017 and 2018) the sector reported zero growth rate. These figures portray a sector that whose growth is fluctuating. Persistent droughts experienced during the review period could be the reason why

VISION 2030=SMART CITY

the sector slumped. PLM's agro-processing environment is still emerging and there is need to reinvigorate that sub-sector. The municipality has the potential to increase agricultural output only if it can reform and recapitalize its agro-processing sector. Agro-processing is where real jobs and real money lie.

3.9.2 Mining Sector

The mining sector registered a negative growth of (-0.2%) between 2016 and 2018 and a zero growth between 2017 and 2018. In terms of its contribution to the municipal economy, the sector was at its peak in 2016 (5.8%) and at its lowest in both 2017 (5.6%) and 2018 (5.6%). The decrease in mining earnings between 2016 and 2018 could be attributed to a slump in commodity prices experienced during the period in question.

3.10 Secondary Sectors

3.10.1 Manufacturing Sector

The manufacturing sector contributed (4.2%) in 2016; (4.4%) in 2017 and 4.3% in 2018 to the municipal economy. In growth terms, between 2016 and 2017, the sector grew by 0.2% but later slipped into negative territory between 2017 and 2018. However, between 2016 and 2018 the sector registered a slight increase of 0.1%. The proportional decline of the sector since 2016 was largely expected. For the greater part of the review period, the entire South African economy reportedly slid into a technical recession and the manufacturing sector was the worst affected.

3.10.2 Utilities Sector

The utilities sector (also referred to as the electricity sector) accounted for 2.4% of the municipal's total GVA in 2016; 2.4% in 2017 and 2.3% in 2018. From a growth perspective, the sector reported constant growth between 2016 and 2017, only to dip by 0.1% in 2018.

3.10.3 Construction Sector

From a peak of 4.0% in 2016, the sector's contribution to PLM's GVA declined by (0.4%) in 2017 (3.6%) and maintained the similar rate the following year (2018). The figures above portray of a sector that is in a constant decline. The decline could be partly because of the moratorium on new developments imposed by the City of Polokwane since 2012. The moratorium was imposed as a precautionary measure to ring-fence the city from an impending water crisis.

VISION 2030=SMART CITY

3.11 Tertiary Sectors

Over the past 9 years, the sector maintained its dominance over other sub-sectors. For instance, in 2007, the sector contributed R17, 218,983,000, which is approximately (84.6%) of PLM's total GVA. Four (4) years later, the sector reported a combined GVA of R28, 243,817,000 which translated to 84.4% of PLM's GVA. In 2016, the sector recorded a GVA output of R36, 480,892,000 (84.7%). Growth calculations shows that the city recorded a 0.2% slump in GVA between year 2007 and 2011. This slump is attributed to the contagion effect arising from the global financial crisis. During that period, consumer demand fell to record levels due to relatively lower buying power.

3.11.1 Trade Sector

The trade sector (also referred to as the wholesale/retail sector) is the second most contributor to PLM's GVA. In 2016, it accounted 22.2% of PLM's GVA, 22.6% in 2017 and 22.4% in 2018. During the review period, the sector experienced a steady growth in realized GVA; (0.4%) increase between 2016 and 2017; only to slide into negative territory by 0.2% margin in 2018. The trade sector's growth was buoyed by the City of Polokwane's string mall culture and the influx of thousands of Zimbabwean shoppers into the city.

3.11.2 Transport Sector

In 2016, the sector accounted for (7.0%) of PLM's total GVA. This figure was maintained in 2017 (7.0%). However, in 2018, the sector slipped to 6.9%. The growth of the transport over the review period is attributed to the following factors; (1) PLM's collaborative attitude that saw the municipality joining hands with the Provincial Department to revamp the City of Polokwane's road and transport infrastructure; (2) the adoption of the bus rapid transit public transport model. During that period, new bus and taxi ranks and other related facilities were commissioned and (3) the City of Polokwane's unparalleled geographical centrality also inspired the growth of the sector.

3.11.3 Finance Sector

Although at a small pace, the City of Polokwane is slowly but certainly following the footsteps of many great cities of the world that were built on the bedrock of a world-class financial sector. The City of London, which is ranked as the world's top financial hub is one of such cities. The contribution of the sector to the city's GVA during the review period is as follows: 20.3% in 2016; 20.5% in 2017; 21.0% in 2018. These figures reaffirm the sector's rising economic significance and influence. The sector is second most contributor to PLM's GVA.

VISION 2030=SMART CITY

3.11.4 Community Services

GVA data released by regional Explorer (2019) reaffirm the sector's dominance over all subsector in the municipality. For instance, the sector accounted for (32.6%) of the city's GVA in 2016 32.2% in 2017 and 32.4% in 2018. The sector is anchored in the growth of the public service. The City of Polokwane is preferred administrative centre of all provincial and national departments (including government agencies and parastatals).

3.12 Tourism

Tourist figures extracted between 2007 and 2016 show that 687, 200 visitors visited their PLMbased with their friends and relatives. Tourists who visited the city for business purposes rose 37 897 in 2007 to 91 784 in 2016. During the same period, the number of religious pilgrims who visited the city grew from 100,277 in 2011 to 137,868 in 2016. Lastly, the city welcomed a total of 193, 749 holiday makers between 2007 and 2016.

3.12.1 Number of Trips by Purpose of Trip Table: No of trips by purpose of trip

| | Limpopo | Capricorn | Polokwane |
|---------------------------------|-----------|-----------|-----------|
| Leisure / Holiday | 743 840 | 117 888 | 101 024 |
| Business | 498 028 | 196 768 | 171 916 |
| Visits to friends and relatives | 4 759 217 | 1 227 349 | 872 772 |
| Other (Medical, Religious, | 776 096 | 519 108 | 393 861 |
| Total | 6 777 182 | 2 061 113 | 1 539 572 |

Source: Polokwane Municipality, 2019

Between 2007 and 2016, the sector picked significant gains (86%) in terms of growth rate. During the same period, tourist arrivals into the city almost doubled from 350150 to 627 351. Between 2007 and 2011, the growth rate slumped to 48% (481 126 arrivals). The number of arrivals recorded between 2011 and 2016 further slipped by 146255 visitors.

3.12.2 Analysis by source of Tourist Origin Table: Analysis by source of tourist origin

| Limpopo | Growth Rate | Capricorn | Growth Rate | Polokwane | Growth Rate |

Table: Sectoral contribution to jobs

Source: Global Insight,

As anticipated, most of the jobs were witnessed in the tertiary sector. The community services sector emerged as the biggest jobs contributor within PLM. Between 2007 and 2011, the sector recorded a job growth of 20.8%, whilst between 2011 and 2016, the job growth in the sector dropped by 3.2% to 16.0%. However, during the 15-year review period (2007 and 2011) the sector's job growth rate was at its peak (40%). The transport sector also witnessed a phenomenon growth in jobs created. Between 2007 and 2011, the sector recorded a 22.6% increase in job growth whilst between 2011 and 2016, the sector registered a 14.8% decrease in jobs created. However, the transport sector saw a significant increase in jobs created between 2007 and 2016 (39.4%).

The construction sector is another sector that reported a significant job growth rate (14.6% between 2007 and 2011; 20.1% between 2011 and 2016; and 37.7% between 2007 and 2016). Jobs growth in the utilities sector remained in the positive territory for the greater part of the 15-year period (19.6% between 2007 and 2011; 24.0% between 2011 and 2016) and 48.4% between 2007 and 2016). Jobs growth in the finance sector remained solid. Between 2007 and 2011, the sector reported 6.9% increase in job growth whilst between 2011 and 2016, the job growth rate jumped to 17.2%. The highest job absorption rate in the agricultural sector was between 2011 and 2016 (25.6%), whilst the sector reported a negative job absorption rate of (-19.0%).

This sharp decline was attributed to devastating droughts and a sharp decline in prices. The mining sector is another sector that contributed a sizeable number of jobs within the municipality especially between 2007 and 2011 where a (20.6%) growth rate was reported.

VISION 2030=SMART CITY

However, between 2011 and 2016 the rate fell to (9.1%) and only to pick up gains (32.6%) during 2007-2016 review period. A negative job growth was reported in the manufacturing sector between 2007 and 2011 (-2.6%). However, the sector reported a slight increase in jobs created between 2011 and 2016. When the 15-year review period (2007-2016) is taken into account, a negative job growth of (-0.8%) was recorded. This review is being done at a time when unemployment is hovering at 27.6% (nationally); and (16.5%) at provincial level. PLM's daunting task is to unburden the youths from the burden of high unemployment. Youth unemployment currently stands at 70%. This is a record high.

3.14 Economic Maturity Analysis

Rostow's 5 stage economic maturity model is widely used to gauge a given economy's degree of maturity. The 5 stages are (1) Traditional society, (2), Pre-conditions for a take-off, (3) Take off, (4) Drive to maturity (5) Age of high consumption. In this case, Rostow's economic maturity model was applied within PLM' economic context.

- The results of the analysis show that PLM's economy is at different stages of growth depending on the cluster under consideration. Within the City of Polokwane and to some extent Seshego and Mankweng, the economy is evidently skewed towards secondary and tertiary sectors, whilst the primary sector headlined by small-scale agriculture dominates in rural clusters (Maja-Chuene-Molepo, Moletjie, and Aganang).
- PLM's economy is doubled-layered in that whilst the rural-side of its economy is still at the traditional society level (i.e. characterized by subsistence farming, limited access to farm mechanization and increased reliance on indigenous farming methods), on the other hand, we have the urban-side of the economy which is gradually sliding into maturity given its strong inclination towards secondary and tertiary sectors.
- For years, the manufacturing sector has been eclipsed by service sectors and the status quo is expected to remain unchanged unless certain fundamentals are addressed. It seems the current regime of stimulus incentives meant to prop-up the sector are not adequate enough to prepare the sector for a meaningful take-off. The current economic conditions are not conducive enough to spark a manufacturing boom in the City of Polokwane.
- PLM is not a mineral rich-municipality and therefore lack comparative advantages in that front. However, vast opportunities exist to set-up viable mineral beneficiation plants and food processing industries in the city. The city can take full advantage of its strong brand equity (logistical hub status, strategic centre of commerce and industry and its geographical centrality) to lure investors with strategic interests in mineral

VISION 2030=SMART CITY

beneficiation and agro-processing sectors into the city. The City of Polokwane does not need to be a mining powerhouse to turn itself into a nerve-centre of mineral beneficiation excellence. This argument mirrors that of the diamond industry, where Israel, Belgium and India are globally known for their prowess in diamond beneficiation even if they do not have diamond deposits within their boundaries.

The City of Polokwane's economy is nowhere near the "Age of mass consumption level" because its financial sector is not as sophisticated as that of its counterparts (Pretoria, Johannesburg and Cape Town). For an economy to slide in that bracket, it must satisfy a number of pre-requisites, (i.e. a strong digital culture, a sophisticated financial system that is anchored in mass production, vibrant e-commerce culture which is obviously backed by a strong digital skill base).

3.15 Opportunity Analysis

The tertiary sector headlined by sub-sectors such as the public sector, trade and finance, transport and tourism remain PLM's key economic drivers.

3.16. Traditional Drivers

The following are widely regarded as the City of Polokwane's traditional economic drivers:

3.16.1 Public Service Sector

Unlike other municipalities in the province, PLM is fortunate in that all national and provincial government departments have a strong presence in the municipality. In addition, all government agencies (national and provincial), quasi-government agencies including stateowned enterprises are strongly represented in the city. The public sector employs a significant proportion of people. The future prospects of the sector may be cast in doubt if current calls for the new administration to adopt a lean executive are heeded.

The reconfiguration of the central government which is currently underway has already seen certain departments being merged or others being done away with. For example, (the Department of Higher Education and Training has been merged with Science and Technology, Department of Rural Development and Land Reform has been merged with the Department of Agriculture). Such a re-organization, is likely going to negatively affect the growth prospects of the sector as they are possibilities that some employees may be affected. Public sector led-growth is naturally risky; it has never worked elsewhere.

VISION 2030=SMART CITY

3.16.2 Services Sector

Local companies with interest in the service sector have a marked presence in the City of Polokwane. Worth noting is the significant number of emerging firms with interest in this sector. In contrast, international companies have little interest in the sector. Polokwane is emerging as the export processing centre of fresh horticultural produce (like potatoes, tomatoes, citrus fruits and avocados) from local farms. Netherlands is the top destination of most avocados produced and packaged from Polokwane. In addition, major mobile network companies (MTN, Vodacom, Telkom, and Cell C) command a strong presence in the city. International ICT companies like Microsoft, Apple and Samsung also have satellite branches in the city. In order to test its stature as Limpopo's most sought-out service centre, the daunting task beforehand is to lure "big name" international firms to relocate their head offices in the City of Polokwane.

3.16.3 Retail Sector

Polokwane is known for its vibrant mall culture. Polokwane has five (5) notable malls (that is Mall of the North, Paledi Mall, Seshego Circle Mall and Savanna Mall and Limpopo Mall). Whilst shopping malls are increasing in significance and popularity, traditional shopping centres are gradually fading away. The mall concept has been partly blamed for contributing to the downfall of once vibrant township and rural economies. Malls provide a modern shopper with a rare shopping experience which traditional retailers are failing to match. Most yesteryear black-owned retailers within PM have either closed shop or leased their shops to foreign nationals. The retailing sector is buoyed by the influx of Zimbabwean shoppers who buy basic commodities in bulky. The collapse of the Zimbabwean economy is a blessing in disguise to the city's retailing sector. The future challenge is to reform the local retailer sector with the view to increase the participation of more black entrepreneurs. The reforms should also ensure that where possible, a significant percentage of goods sold in the city's retail shops are locally manufactured or produced. The other challenge is to ring-fence township and rural economies against risks posed by the city's vibrant mall culture.

3.16.4 Finance Sector

All major financial services have their provincial head-offices in Polokwane City. The financial services are sub-divided into four major categories: (established banks represented by the likes of (ABSA, FNB, Capitec, Standard bank, Nedbank); insurance services (Old Mutual, Sanlam, Liberty, etc.) Development Financial Services (Leda, IDC, Sefa, and NEF) and lastly private loaning firms and group-based saving clubs (Stokvels). Despite hosting major financial institutions, emerging local companies in the city still suffer from a lack of financial inclusion.

VISION 2030=SMART CITY

Local SMMEs and cooperatives are the hardest hit due to their high risk status. Unbankable business plans, the demand for collateral security and a low repayment appetite are the main drivers of the sectors' financial exclusion.

3.16.5 Educational Sector

In the future, the City of Polokwane will remain the preferred and leading destination of local and international students who flock in their numbers to the city in search of better degree and diploma offering educational institutions. The influx of both international and local students in the city will continue to trigger a boom in student accommodation within the city. Local companies and private entrepreneurs with interest in student rental accommodation will continue to exploit such opportunities. The steady increase in the province's matric pass rate, high demand for university places and the high foreign interest in local universities provide a strong business case to establish a new university in the city. The new university's business domain will be to alleviate the widening digital skill-gap bedevilling the local economy.

3.16.6 Medical Sector

Besides, two major public hospitals (Pietersburg Hospital and Mankweng Academic Hospital), two well-known private hospitals (Medi-clinic and Netcare Hospital have their footprints in the City of Polokwane. The City is also a host to many private health care Centres and several publicly-owned polyclinics. These hospitals are renowned for servicing both local and international patients. Opportunities exist for the private sector to establish a world class medical park in the city. Such a park will significantly improve the City's stature in the medical tourism sector.

3.16.7 Logistics Hub

Owing to a well-developed road infrastructure, Polokwane has a thriving transport network system. The City possesses all the characteristics features of a regional logistics hub. Polokwane is the gateway to Africa in that the N1 which connects South Africa with key markets in the SADC, COMESA and ECOWAS bloc passes through the city of Polokwane. Thousands of long haulage trucks, long distance buses and hundreds of courier firms from the SADC and COMESA blocs also passes through the city. Exporters of horticultural products also use the Polokwane International Airport to ferry their produce to overseas markets. A railway line that links Gauteng Province and Zimbabwe also passes through the city. Polokwane is also credited with modern warehouse facilities. Inbound and outbound local buses and taxis from villages, towns and cities also ferry thousands of shoppers and workers into the CBD, making Polokwane a hive of activity.

VISION 2030=SMART CITY

3.17 Emerging Drivers

The following sectors are regarded as PLM's emerging sectors:

3.17.1 SMMEs Data

The following table represents the degree of SMME activity within the City of Polokwane based on the 2016, 2017 and 2018 data collected from Small Enterprise Development Agency (SEDA).

Table: Seda SMME data

| | 2016 | 2017 | 2018 |
|------------------------|------------|------------|------------|
| Walk-ins | 3952 | 3326 | 3556 |
| Registered clients | 346 | 307 | 311 |
| Interventions | 78 | 79 | 124 |
| Seda spend | R1,098,207 | R1,007,449 | R1,518,181 |
| Agriculture | 6 | 6 | 5 |
| Construction | 2 | 2 | 2 |
| Mining | 0 | 0 | 0 |
| Manufacturing | 16 | 17 | 54 |
| Services | 41 | 41 | 44 |
| Wholesale/Retail | 1 | 0 | 5 |
| ICT | 0 | 0 | 1 |
| Tourism | 0 | 1 | 2 |
| Training interventions | 12 | 12 | 11 |

Source: Seda Capricorn District Office, 2019

Seda (Capricorn District Office) provides a wide range of non-financial support services to SMMEs. Data provided by Seda (2019) show that during the review period, the number of enquiries intercepted from walk-ins were; 3952 in 2016; 3326 in 2017 and 3 556 in 2018. During the same period, 346 SMMEs were registered as Seda clients in 2016; 307 clients in 2017 and 311 clients in 2019. In terms of interventions rendered, 78 SMMEs benefited in 2016, 79 in 2017 and 124 in 2018. This number excludes the training interventions (12 training interventions in 2016, another 12 in 2017 and 11 in 2018. A total budget of R1 098 207 was spent in 2016, R1007 449 in 2017 and R1 518 181 in 2018.

The top three sectors that benefited from these interventions were (1) Services (126 clients), (2) Manufacturing (87 clients) and (3) Agriculture (17 clients). Local SMEs face a myriad of challenges; burdensome regulations (40%), lack of skills (38%), local economic conditions (37%) and the cost of labour (32%) (World Bank Report (2018). Other challenges include but

VISION 2030=SMART CITY

not limited; (1) high mortality rate (78%) and (2) the low survival rate (22%) especially within the first two years of formation (Seda, 2019).

3.17.2 Informal Sector

The table below provides a summary of the hawking activity within the City of Polokwane.

Table: Municipal hawker sector data

| Sector | Number of permits | |
|--------------------------|-------------------|--|
| | | |
| Accessories | 161 | |
| Bunny chow | 102 | |
| Fruit & vegetables | 381 | |
| Public phones and snacks | 165 | |
| Herbal products | 1 | |
| Home utensils | 10 | |
| Shoe repair | 25 | |
| Meat& porridge | 51 | |
| Photographer | 11 | |
| Mobile trader | 1 | |
| Total for all sectors | 908 | |

Source, Polokwane Municipality, 2019.

Street vending has a strong presence in the City of Polokwane's streets. Street vending is a reflection of the spirit of self-reliance inherent in the local populace. The local hawker sector population of 908 is further sub-divided as follows; Fruit and vegetables (381), Public phones and snacks (165); Accessories (161); Bunny chow (102); Meat and porridge (51); Shoe repairs (25); Photographer (11); Home utensils (10); Herbal products (1) and Mobile trader (1). (Polokwane Municipality, 2019).

3.17.3 ICT Sector

In this current digital age, advancement in ICT technology is a pre-condition for building a smart city. Although, diffusing at a relatively lower pace, the recent broadband roll-out initiative championed by Limpopo Connexion ion in partnership with the City of Polokwane is a step in the right direction. The policy challenge is to accelerate the diffusion of broadband coverage to rural areas and townships. The city's on-line shopping environment is also still emerging. However, the use of social networks like Facebook, Instagram and Twitter is relatively high among the youths and the middle-class. Broadening access to free Wi-Fi in strategic places like schools, libraries and shopping malls is hampered by costly data tariffs.

VISION 2030=SMART CITY

3.17.4 Township and Rural Economies

Prior to 1994, the vibrant township economy formed a central part of PLM's economy. The fact that since 1994, the municipality's township economy has been on a downward trend is a sad reality. Over the years, a significant number of yesteryear retailers either closed shop or downsized their operations. Most of these shops are being leased to foreign nationals. What is puzzling is that the new operators are doing relatively well in areas where black retailers evidently failed. The success of foreign nationals in the rural retail sector has proven to be a source of conflict between foreign national and locals in the past. The sad reality confronting the local township economy presents an opportunity to develop a grand intervention plan (anchored on multi-sectoral response) that will steer the sector on the path of a rebound.

3.17.5 Rural Development

The comprehensive rural development strategy (championed by the Department of Agriculture and Land Reform) remains the central vehicle that underpins the City of Polokwane's s rural development vision. The only way the city of Polokwane will stem the tide of rural-urban immigration is to transform rural areas into strategic Centres of entrepreneurial development excellence. The construction of modern shopping Centres, well-resourced schools and hospitals, multipurpose Centres and recreational facilities are some of the projects need to form the integral part of the municipality's rural development agenda.

3.17.6 Mining Operations

PLM is home to only two significant mining operations (**that is Anglo Platinum Smelter and the Silicon Mine**). Low-level quarry and sand mining in rural areas like Moletjie and Matlala etc is buoyed by recent spikes in road and housing construction activity in the City of Polokwane. The challenge of illegal sand mining (which is on rise) presents a serious threat to the sector's sustainability.

3.17.7 Agriculture

Polokwane is also home to hundreds of small holder farmers who grow crops such as maize and groundnuts on a subsistence basis. Smallholder farmers have interest in small livestock (goats, sheep, and chickens). They also grow indigenous breeds of cattle, albeit on a small scale basis. Apart from intense small holder farming activity, large scale commercial farming activity is also rife in the municipality. ZZ2, a top net exporter of beef and a variety of horticultural products to Europe, Asia and USA is also based in Polokwane.

VISION 2030=SMART CITY

3.17.8 Sports Tourism

From a sports tourism perspective, the most challenging task is for the City of Polokwane to sustain the momentum created by the 2010 FIFA World Cup. Polokwane is fortunate in that two emerging Premier League teams (Polokwane City FC and Baroka FC) use Peter Mokaba stadium for their home matches. This presents an opportunity for the city of Polokwane to boosts its sports tourism status.

3.18 Future Economic Drivers

The following are future drivers of the municipality's economy:

3.18.1 Special Economic Zones (SEZ)

The recently commissioned Musina-Makhado (SEZ) and Tubatse SEZ are expected to change the face of PLM's economy in remarkable way. As the province's strategy centre for commerce and industry, the City of Polokwane's business tourism sector is expected to be biggest beneficiary of the SEZ initiative. The news that the provincial government secured R150 billion worth of investment deals from offshore capital markets has been welcomed by local markets with great optimism and hope. In partnership with local tourist operators, the city needs to proactively upgrade and rebrand its tourism assets in order to improve the sector's readiness index.

3.18.2 Science Park Project

In collaboration with LEDET, the City of Polokwane has been tasked by the Provincial Government to pilot the inaugural science park project. Already R1 million has been committed to the project towards funding its feasibility study commitments. The project is expected to turn Polokwane into a provincial centre for scientific research, innovation and technology. This project is set to give the city's smart vision and digital economy a new impetus. As expected, the Science Park Project will act as a sustainable breeding ground for young techno serve entrepreneurs.

3.18.3 Industrial Parks Concept

The industrial parks concept is a multi-sectoral response to numerous calls for the City of Polokwane to diversify its predominately service-oriented economy. As part of a broader plot to strengthen the city's emerging manufacturing environment, the city partnered with LEDET to revive the Seshego Industrial Park Project. A study on the impact of the current revitalization programme on the city's manufacturing performance need to be institute

VISION 2030=SMART CITY

CHAPTER Four: Basic Services and Infrastructure Development

4.1. POWERS AND FUNCTIONS OF POLOKWANE MUNICIPALITY

In terms of the Constitution, Municipal Structures Act and other policy frameworks Polokwane Municipality is responsible for the following functions:

| Water and Sanitation (Both | Cemeteries | | | | |
|--|--|--|--|--|--|
| portable and bulk supply system | Cleansing | | | | |
| and domestic waste water and | Control of public nuisances | | | | |
| sewage disposal system) | Local sport facilities | | | | |
| Air Pollution | Municipal parks and recreation | | | | |
| Building regulations | Roads | | | | |
| Child care facilities | Noise pollution | | | | |
| Electricity and Alternative energy | Pounds | | | | |
| Firefighting services | Public places | | | | |
| Municipal planning | Waste Management (refuse | | | | |
| Municipal public works | removal, refuse dumps and solid | | | | |
| Storm water management | waste disposal) | | | | |
| Trading regulations | Street trading | | | | |
| Billboards and the display of | Street lighting | | | | |
| advertisements in public places | Traffic and parking | | | | |
| • | | | | | |

4.2. WATER SERVICES

Polokwane Municipality is a **Water Service Authority(WSA)** and also a **Water Service Provider (WSP).** Every Water Service Authority has a duty to all customers or potential customers in its area of jurisdiction to progressively ensure efficient, affordable, economical and sustainable access to Water Services [Water Services Act of 1997 Section 11]. Thus, a Water Service Authority has the duty to provide water services with the focus on: Ensure, Efficient, Affordable, Economical and Sustainable deliverables.

4.2.1 Principles of Water Service Provision

- To ensure: effectiveness, efficiency, viability, sustainability.
 Requires: proactive approach, pre-thinking, deliberation, understanding, thus coordinated planning.
- Therefore: Every Water Services Authority must prepare a Water Services Development Plan for its area of jurisdiction [Water Service Act of 1997 Section 12].

VISION 2030=SMART CITY

Water is life – it is the most important resource to encourage both social and economic development within communities. There has been tremendous improvement in the provision of the basic service in the municipal area at and above RDP standard.

4.2.2 Polokwane Municipality 15 Regional Water Schemes (RWS)

Municipal water provision is divided into Regional Water Schemes. **Polokwane Municipality** has been sub-divided into <u>15 RWS</u> and each scheme is allocated **budget** for water reticulation:

- 1) Mothapo RWS,
- 2) Moletjie East RWS
- 3) Moletjie North RWS,
- 4) Moletjie South RWS,
- 5) Houtriver RWS,
- 6) Chuene/Maja RWS,
- 7) Molepo RWS,
- 8) Laastehoop RWS,
- 9) Mankweng RWS,
- 10) Boyne RWS,
- 11) Segwasi RWS,
- 12) Badimong RWS, 13) Sobayong/ Dikaglo BW/S
- 13) Sebayeng/ Dikgale RWS, 14) Olifantspoort Sand RWS.
- 15) Aganang RWS

The municipal Regional Water Schemes depends on the following water sources:

4.2.3 Water Sources

| Water source | RWS supplied | Average Daily Supply | Source Capacity |
|--------------|--|-------------------------|-----------------|
| Ebenezer | Mankweng RWS Rural (Mothapo RWS, Molepo RWS, Segwasi RWS, Boyne RWS, Badimong RWS, Sebayeng | 10 MI/Day 9 MI/Day | 19 Ml/day |
| | Dikgale RWS) | | |

VISION 2030=SMART CITY

| Water source | RWS supplied | Average Daily Supply | Source Capacity |
|------------------|--|-------------------------|-----------------|
| Olifants Sand | Chuene/Maja RWS, Olifants Sand RWS (Seshego, some portion of City and Mmotong wa Perikisi) | 26,29 Ml/day | 27 MI/d |
| Dap Naude Dam | Olifants Sand RWS (Polokwane City) | 12 MI/Day | 18 MI/d |
| Seshego Dam | Olifants Sand RWS (Seshego) | 1,6 Ml/day | 3,9 MI/d |
| Seshego Borehole | Olifants Sand RWS (Seshego) | 1,2 Ml/day | 2.0MI/d |
| Ebenezer | City | 19 MI/Day | 19 MI/Day |
| Boreholes | Augment water from dams | 5,5 MI/Day | 25,33 MI/d |
| Rural dams | | | |
| Houtriver Dam | Houtriver RWS | 2,0 MI/day | 3,9 MI/d |
| Chuene/Maja Dam | Chuene Maja RWS | 2.7 Ml/day | 2,7 MI/d |
| Molepo Dam | Molepo RWS | 1.1 Ml/day | 6 MI/d |
| Mashashane Dam | Aganang RWS | 1.0 Ml/day | |
| Total | | 99.29 MI/day | 124.83MI/d |
| Peak flow demand | | 163 MI/day | |

Source: PLK Water and Sanitation SBU, 2019

It is the responsibility of local government to make sure that adequate and appropriate investments are made to ensure the progressive realization of the right of all people in its area of jurisdiction to receive at least a basic level of services.

Polokwane Municipality is the water scarce City with more than 60% of its water sourced outside the boundary of the Municipality. To ensure the sustainability of water sources the municipality undertakes water conservation awareness campaign.

On annual basis funds are made available to improve the water accessibility to all 15 various Regional Water Schemes. The first priority is to develop the sustainable bulk water sources and then develop or extend the internal infrastructure. The biggest problem to keep water sources sustainable is theft and vandalism on boreholes and reliable surface water.

VISION 2030=SMART CITY

As part of water provision the municipality provides free basic water to communities. Free Basic Water is offered to all rural Regional Water Schemes, for the Urban Regional Water Scheme the free basic water is only given to the registered indigent people. According to the FBW policy, implemented by Local Government, households are entitled up to 6000 litres (6kl) of potable water every month at no cost. Households that use more than 6kl of free basic water must be responsible for the payments of further consumption.

Most of municipal Regional Water Schemes are 100% reticulated with metered yard connections. The rural households with yard connections do not pay for the service. The municipality has intentions to recover costs in Regional Water Schemes or villages that are fully reticulated with metered yard connections

4.2.4 Free Basic Water

The provision of free basic water in Polokwane Municipality is determined by the indigent policy and register updated annually for those who stays in areas where cost recovery is ongoing and all the rural villages are receiving free basic water.

| Basic service | The limited | Free | basic | Rural/Urban | Number |
|---------------|---------------|--------------|----------|-------------|-------------------|
| | amount | services | | | Customers |
| | | provided | | | |
| | | • | | | |
| Free basic | 6kl per month | 50 | villages | Rural | All households in |
| water. | | received | free | rtarar | rural areas |
| water. | | | | | Turar areas |
| | | Water mont | niy | | |
| | | | | | |
| | | 68 villages | receive | | |
| | | free | Water | | |
| | | supplied | by | | |
| | | Lepelle | Water | | |
| | | Board. | | | |
| | | | | | |
| | | 153 | villages | | |
| | | receive free | • | | |
| | | supplied | by | | |
| | | boreholes. | - | | |

Source: PLK Water and Sanitation SBU, 2019

A statistical summary of the status quo assessment for water and sanitation services is provided per cluster in **Table** below:

VISION 2030=SMART CITY

Table: Water Service Levels

| Service | Cluster | Service Level | | |
|---------|------------------------|------------------------|--|--|
| Water | Mankweng/Sebayeng | 67.9 % above RDP level | | |
| | Moletjie | 60.7 % above RDP | | |
| | Maja/Chuene/Molepo | 44,3 % above RDP | | |
| | Aganang | | | |
| | Municipal wide | 82.04% access to water | | |
| | Municipal wide backlog | 17.96% | | |

Source: PLK Water and Sanitation SBU, 2019

There is still a considerable backlog that must be addressed especially in the Maja, Chuene, Molepo, followed by Moletjie and Mankweng clusters.

The elimination of backlog is challenged by limited and /or unsustainable source of water found in the rural areas and continuous increase of new settlements in some clusters in the municipal area. Funding limitations also affect the eradication of backlog on the expected rate.

4.2.5 Water Quality

According to the Constitution of the Republic of South Africa everyone has the right to an environment that is not detrimental to their health or wellbeing.

To ensure that water quality does not pose any health hazards to people, the Department of Water and Sanitation as the regulator has introduced the monitoring tool for water quality. According to DWS there is certain standard which both potable and waste water must meet.

Polokwane municipality obtained Blue drop for 2011 in the Mankweng and City water systems. The outlined ratings are from 2008 until 2015 assessment.

VISION 2030=SMART CITY

| WATER SUPPLY SYSTEM | BLUE DROP CERTIFICAT ION | 2008/2009 | 2009/2010 | 2010/2011 | 2011/2012 | 2014/2015 |
|-------------------------|--------------------------------|-----------|-----------|-----------|-----------|-----------|
| Polokwane City | 95% | 70.5% | 95.70% | 95.05% | 92.03% | 95.08 |
| Mankweng | 95% | 70.5% | n/a | 95.155 | 80.89% | 86.07 |
| Seshego | 95% | 42.5% | 66.38% | 89.65% | 87.12% | 86.81 |
| Molepo | 95% | 70.5% | 66.38% | 79.89% | 82.02% | 85.38 |
| Moletjie (Houtriver) | 95% | 70.5% | 53.63% | 76.57% | 73.79% | 85.26 |
| Chuene/Maja | 95% | 70.5% | 55.10% | 81.44% | 87.29% | 88.09 |

Source: PLK Water and Sanitation SBU, 2019

Table: Polokwane Local Municipality: Access to Safe Drinking water

| Provision of Water | Yes | No | Unknown | Total |
|--------------------|---------|--------|---------|---------|
| Households | 196 371 | 40 341 | 2404 | 239 116 |
| Percentage | 82.12% | 16.87% | 1.01 | 100% |

Source: PLK Water and Sanitation SBU, 2019

Table: Main Water Provision

| Water provision (level of service) | 2019 |
|---|---------|
| Piped (tap) water inside the dwelling/house | 62 851 |
| Piped water inside yard | 118 780 |
| Piped water on community stand | 16 567 |
| Borehole in the yard | 9 671 |
| Rain water Tank in Yard | 1 022 |
| Neighbour's tap | 10 040 |

VISION 2030=SMART CITY

| Water provision (level of service) | 2019 |
|------------------------------------|---------|
| Public / Communal tap | 10 326 |
| Water Carrier / tanker | 3 746 |
| Boreholes outside the yard | 2 866 |
| Flowing water or River / Stream | 510 |
| Well | 78 |
| Spring | 63 |
| Other | 2597 |
| TOTAL | 239 116 |

Source: PLK Water and Sanitation SBU, 2019

From the analysis, it is evident that population has increased from 178001 to 239 116 households and the number of households with piped water inside their house have increased this figure includes 62 815 HH with water in the dwelling and 118 780 with water in the yard while 16 567 are receiving piped water on communal tap.

The municipality is having 42 745 households with no access to piped water. The elimination of backlog is challenged by limited and /or unsustainable source of water found in the rural areas and continuous increase of new settlements in some clusters in the municipal area. Funding limitations also affect the eradication of backlog on the expected rate.

4.2.6 Water Challenges

- Lack of sustainable water sources for current and future demand, the municipality is currently receiving between 80 to 99MI/d and unable to meet the peak flow demand of 163MI/day. The municipality should invest in upgrading existing Dap Naude Dap water scheme to utilise its current yield to maximum capacity including possible increase of dam wall.
- Shortage of water will have a serious impact on projects that the municipality and other sector department are planning. E.g. Polokwane extension 78 Police station, Polokwane extension 71, 108, 72, 79,106 and 107, Bendor extension 100, Ivy park extension 35. Upon completion, all these developments will have a major impact on our currently insufficient water sources.

VISION 2030=SMART CITY

- Over reliance on boreholes in rural areas with risk of contaminating ground water by pit latrines.
- Lack of cost recovery in rural areas.
- Aging water infrastructure in the CBD, Council in partnership with Department of Water and Sanitation has started with a programme to eradicate this challenge by investing more than R420Million to remove all Asbestos pipes in the CBD and surrounding townships).
- More than R380 million is also required to increase the capacity of water infrastructure to be able to cater for current and new developments.
- Uncoordinated allocation of new settlements in rural areas by traditional authorities has a major impact on municipal planning and budgeting.
- Lack of maintenance plans and AS Built drawing to indicate the existing valves for water infrastructure. Some of the valves are buried under ground by residents while paving their drive ways which makes it difficult to locate them when doing maintenance or replacing burst pipes and as a results contributing to huge water losses.
- Limited operation and maintenance of infrastructure due to shortage of funds.
- Theft and vandalism of the existing insufficient infrastructure remains a challenge. Theft of iron manhole and valves covers is increasing and there is a need to change them to plastic and it a huge safety risk within the city.
- Illegal extension of houses (back yard rooms) has an impact on water demand.
- Lack of smart metering systems that can control water demand and supply, monitor losses (+R180Million required).
- Unapproved technical reports for some regional water schemes (Badimong, Mothapo, Moletji North, Moletji South, and Segwasi) due to insufficient water sources

4.2.7 Water Supply to Schools

| Description | Polokwane Municipality |
|--|------------------------|
| Total number of schools | 310 |
| Number of schools supplied with water | 254 |
| Number of school remain to be serviced Currently they have boreholes in the schools | 56 |

Source: Polokwane Municipality Water and Sanitation Strategic Business Unit, 2019

VISION 2030=SMART CITY

4.3. SANITATION

Sanitation is about dignity. The availability of sanitation facilities not only improves the dignity of people, but also promotes their health. Areas without proper sanitation systems give rise to water borne diseases like cholera, diarrhoea, typhoid, etc. It is therefore important that the Municipality prioritise the service, particularly taking into account the backlog (rural sanitation) and the national target.

Table: Toilet Facilities (Households)

| Type of toilet facility | 2019 |
|---|--------|
| Flush toilet connected to a public sewerage system | 96 619 |
| Flush toilet connected to a septic tank or Conservancy tank | 5660 |
| Chemical toilet | 1579 |
| Pit latrine / toilet with ventilation | 38840 |
| Pit latrine / toilet without ventilation | 86132 |
| Ecological toilet (Urine diversion, enviroloo etc.) | 282 |
| Other | 5756 |
| None | 4248 |

Source: PLK Water and Sanitation SBU, 2019

Major progress has been made in the provision of sanitation services in Polokwane since 2001, there major improvement in the provision of this service. However, with the improvement the municipality will not meet the Millennium Development Goal that every household must have access to healthy and dignified sanitation facility.

The municipality is currently having a huge backlog of sanitation facilities (VIP) and an amount of more than R500 million is required to eradicate it. The backlog figure includes 86 132 pit latrines that are not constructed according to the approved standards and as such it poses a risk of water borne diseases.

VISION 2030=SMART CITY

4.3.1. Free Basic Sanitation

For improved provision of basic and environmental services in a sustainable way to our communities, each financial year Polokwane Municipality construct the Ventilated Improved Pit latrine **(VIP)** in rural Villages according to the priority list of the ward.

4.3.2. Waste Water Treatment Plants

The municipality has three waste water treatment plants in Polokwane, Seshego and Mankweng. Polokwane waste water treatment plant is the biggest with 28MI/day capacity and the current load standing at 34 MI/day. Plans are in place with limited budget to construct the 100ML/day Regional Waste Water Treatment Plant that will carry all Polokwane Municipal sewage load and cater for new developments. A memorandum of agreement to refurbish and upgrade the over loaded Polokwane waste treatment plant has been signed by the municipality and Anglo American and the project is on construction. Upon completion, the upgrade will provide additional capacity of 6 MI/day.

The municipality is also busy finalizing design for the construction of new Waste Water Treatment Plant. The project will be implemented in phases and phase 1 will be the construction of outfall sewer lines. Funding of this project will be from the department of water and Sanitation (RBIG) Regional Bulk Infrastructure Grant and as well as from PPP

4.3.3 Sanitation Challenges

- The risk of contaminating ground water in rural areas due to huge backlog of pit latrine that is not according to the approved standards.
- Lack of funding to eradicate rural backlog (more than R500 million is required).
- Lack of funding for construction of regional waste water treatment plant. According to master plan 1st phase was supposed to be at implementation by now, more than
 - R1, 2 billion required). DWS has completed the feasibility study for new regional wastewater works and is co funding the project through RBIG.
- Aging sanitation infrastructure (some of old sewer lines in Seshego are running under houses or very close to the houses and should be moved).
- Uncoordinated allocation of new settlements in rural areas by traditional authorities has a major impact on municipal planning and budgeting (VIP).
- Lack of maintenance plans for sewer infrastructure.
- Limited operation and maintenance of infrastructure due to the shortage of funds.
- Theft and vandalism of the existing insufficient infrastructure remains a challenge.
- Illegal extension of houses (back yard rooms) has an impact on sewer treatment plant.

VISION 2030=SMART CITY

Boyne is the home of two biggest churches and proper sanitation structure is needed to avoid future water contamination.

| Description | Polokwane Municipality | |
|--|------------------------|--|
| Total number of schools | 310 | |
| Number of schools supplied with water and sanitation | 296 | |
| Number of schools remaining to be serviced | 14 | |

4.3.4 Sanitation in Schools

4.4. BACKLOG OF BASIC SERVICES

Below is the current status of existing backlog, which without annual maintenance will escalate.

| Service | H/H | Access | Backlog |
|-----------------|---------|------------------------|------------------|
| Water | | 198531 (83,2%) | 40585 |
| Sanitation | | 145774 (60,96%) | 92 815 |
| Electricity | | 227809 (95,27%) | 11307 |
| Housing | 239 116 | 160 980 (90.4%) | 65 000 |
| Waste | | 92 000 (52%) | 84 281 |
| | | (Urban) | (Rural Villages) |
| Roads (7 495km) | | 1364km (18%) | 6 131.5km |
| | | | |

Source: PLK Water and Sanitation SBU, 2019

4.5. Prepaid Water Smart Metering

City of Polokwane have launched the **Smart Metering project** to members of the media and the community of Polokwane. The main aim was to connect with our stakeholders who are

our customers so that they get to know that the project has resumed and not get surprised when people come to their homes for installation.

Prepaid smart meters are to be installed for all users - both large power and small power users - making this roll-out probably the largest project to be undertaken by the City of Polokwane. The objectives of the project are to help the City overcome problems of inaccurate billing and encourage conservation of resources like water and electricity.

Furthermore, Smart Metering project will secure **revenue losses** for the municipality and bolster the financial position going forward. This will enable the municipality to free up resources that can be used to improve service delivery in other areas.

Most importantly, Smart Metering project aims to give power to the consumers because of its multiple benefits. Some of the benefits are as follows:

- Consumers having control over their usage or consumption, ease of access to purchases,
- Avoidance of unanticipated black-outs and disruptions.
- Customer service will be greatly improved through elimination of queries related to electricity billing, which account for the majority of customer queries.
- Earlier recognition of faults will become easier through increased data access.
- Illegal connections can also be identified quickly, reducing technical losses.
- There are also job creation and small business opportunities arising from system installation and operation of vending systems.

The new Smart Metering system also allows for remote and local reading of the meter as well as detection of any tampering with the system. The official installation of the smart meters to households has begun as a pilot project. The installation commenced at **Nirvana Area** and the project has already moved to other areas in the City, Seshego, Ladanna and Mankweng.

The smart meters will be rolled out in both prepaid and post-paid mode. The meters are replaced at **no cost** to the consumers. At the same time the City is embarking on a project to convert all household conventional electricity meters to prepaid. All the government Departments and other large consumers will be on smart conventional and those who are serial defaulters will be put on prepaid immediately. Also this will be done at no cost to the consumers. This project is a strategic focus project to ensure that the City is gearing towards the attainment of a Smart City and a Metro in the near future. The future is prepaid.

All Polokwane residents will soon get smart electricity and water meters installed as part of the City's Smart Meter Project which aims to improve service, monitor power consumption and

VISION 2030=SMART CITY

reduce our residents' costs related to consumption of water and electricity. This project is a significant milestone towards the City objective to upgrade and improve the efficiency of services to our Communities.

Prepaid Water Smart Metering

4.6. AC Pipes Replacement

4.6.1 Objectives of AC Pipes Replacement:

- Renewing infrastructure assets that has reached the end of its useful life.
- Reducing water losses through burst pipes.
- Saving scarce resources water and money.
- Improving reliability of the network and standard of service.
- Reducing maintenance costs.
- To improve revenue collection.
- Upgrading the network while replacing to address growth.

VISION 2030=SMART CITY

4.6.2 Phase 1 – AC Pipes Replacement

The first phase of the project consisted replacements in:

- > Annadale: has been completed (18km), as well as the initial Seshego project (68.7).
- > Additional extent was added for Seshego: +- 12 km in Zone 4.
- CBD: Progress is at 78% 56.2 km of water pipes replaced to date, project to be completed by the end of current FY.
- Total cost for Phase 1 is R 616 million, funded from RBIG and Loan funding at a ratio of approximately 70/30.

4.6.3 Challenges of AC Pipes Replacement

Some challenges experienced:

- The replacement of pipes in a 'live' network in built up areas with many hidden services is in many ways a very difficult task.
- Increasing the size of pipes in areas constrained by existing storm water pipes, electricity, fibre etc. is extremely difficult.
- Higher extent of rock/ hard material encountered than expected.
- Scarce water sources added to challenges, impacting negatively on the execution of work, testing pipes and connecting users.

4.6.4 Phase 2 – AC Pipes Replacement

Further replacement of AC Pipes:

- Planning for the next phase of pipe replacement has started.
- Council must consider all service and infrastructure needs and priorities because funding is limited.
- There is an urgent need for augmenting the currently inadequate water sources this is the most critical current need.
- Council has decided to re-schedule the AC replacement program for the next two years to add funding for water source development.
- The remaining extent of AC Pipes amounts to approximately 370 km

 Limited funds prevent replacement of all pipes, focus will be on pipes that are in very poor condition, and pipes critical for the network.

4.6.5 Remaining Extent of AC Pipes per Cluster

The estimated remaining extent per cluster is as Reflected on the table Below:

| Cluster | Total Scope (km) |
|----------------------------|------------------|
| City Cluster | 131.0 |
| Mankweng Cluster | 103.0 |
| Molepo/Chuene/Maja Cluster | 49.0 |
| Moletjie Cluster | 1.1 |
| Sebayeng/Dikgale Cluster | 10.0 |
| Seshego Cluster | 76.0 |
| Total | 370.1 km |

Source: PLK Water and Sanitation SBU, 2019

4.6.6. AC Pipes Replacement Process in the CBD

Source: PLK Water and Sanitation SBU, 2019

4.7. Flora Park /Serala View Mini Water Reservoir

Flora Park and Serala View experienced challenges of the water supply to the residents, particularly those in the high lying part had to endure water shortage over a period of time. Part of our intervention emanating from the **Water Master Plan** was to put up a mini reservoir with a high pressure pump and non-return valves there to isolate the higher areas to ensure **VISION 2030=SMART CITY** Page 184

that if there was no water from the LNW sources the community can continue to receive water. In the same spirit we are dealing with the challenges experienced by the community of lvydale.

Mini reservoir at Flora Park / Serala View

4.8. ENERGY SERVICES

The Municipality distributes electricity in the City/Seshego cluster while Eskom is the service provider in the rest of the Municipal area. 99% of dwellings in the City/Seshego cluster are supplied with electricity. Street lights and High Mast lights are installed annually to streets and communities respectively.

The number of households with access to electricity increased from 228 594 in 2018 to 230 177 in 2019. Households for Polokwane municipality increased from 178 001 in 2011 to 239 116 in 2016 (Stats SA 2016), making the current access to electrification to 99.26%. Although the backlog percentage seems less, the growth rate of the city makes the municipality to fail in making sure access to electricity by all. The municipal area increased in 2016, incorporating major parts of former Aganang municipality (76.93%) into Polokwane and thus adding backlog numbers.

VISION 2030=SMART CITY

4.8.1 Energy Master Plan

The **Energy Master Plan** has been renewed in 2018/19 and waiting council adoption. The draft master plan is prepared on the basis of 5 years' growth Projection. The analysis of the energy master plan forms the basis of a recommendation regarding the anticipated demographic and economic growth factor that should be provided for in terms of additional electricity demand during the next five years.

| Main source of energy | No of Households |
|---|---------------------|
| Electricity from mains | 225 628 |
| Other sources of electricity (e.g. generator, etc.) | 302 |
| Gas | 419 |
| Paraffin | 2038 |
| Candles | 8383 |
| Solar | 962 |
| Other | 394 |
| None | 554 |
| Unspecified | 435 |
| Total | 239 116 |

Table: Distribution of households using Main source of energy for lighting

Source: Polokwane Municipality Energy Strategic Business Unit, 2019

In comparison with the 2011 Census there is tremendous improvement of the number of households with access to electricity in 2019. The census shows that 225 628 households out of 239 116 have access to electricity. The current backlog is 8 939. The current Priority list indicates a backlog of 18 000 households. Polokwane municipality electrified 1335 households during 2018/19 financial year.

VISION 2030=SMART CITY

4.8.2 Free Basic Electricity

Free basic electricity is the amount of electricity which is deemed sufficient to provide basic electricity services to a poor household. The municipality is offering free **100KWh** for 8400 indigent customers within Polokwane license area and 50KWh for 21 516 in Eskom license area. In Aganang cluster, 3 995 are benefiting from 50KWh free basic Electricity.

| Basic service | The limited amount | Free basic services provided | Number Customers | The level and standard |
|---------------------------|---------------------------|------------------------------|---------------------|---|
| Electricity | | | | |
| Eskom Area | R103.57 per month | 19 000 collected | 21 516 | 50kWh at RDP standard (20 amp connections) |
| Municipal License Area | R90.00 per customer | 8 400 collected | 8 400 | 100 kWh (20 amp connections)- |
| Aganang Cluster | R103.5700 per customer | 3650 collected | 3995 | Above RDP standard |

Table: Free Basic Electricity provision

Source: Polokwane Municipality Energy Strategic Business Unit, 2019

4.8.3 Free Basic Alternative Energy

Free Basic Alternative Energy is alternative energy provided to those who cannot be connected to the grid. 594 households are receiving Solar Energy for areas remote from the grid within Polokwane municipal area and at Aganang cluster, 337 are receiving gels.

For access to basic services, Priority list is used to provide electricity to rural Polokwane households and reduce the provision of alternative sources. In Aganang cluster, gel stoves and solar lights are being issued monthly as alternative source of electricity at a cost of R105.00 per household per month.

The municipality received a grant from Department of Mineral Resources and Energy to install 10 000 Solar Water Units to reduce high electricity usage by the municipality. Registered indigent in the City/Seshego will be considered as the first phase of the roll-out.

VISION 2030=SMART CITY

4.8.4 Electricity Losses

The municipality has managed to keep electricity losses just under 10%. Constant monitoring of top 100 consumers and ad hoc operations to identify illegal connections has played a major role on reducing energy losses.

4.8.5 Energy Services Major Challenges

- Capacity Shortfall the municipality will not be able to sustain future developments unless new programs are implemented. Few projects were identified to strengthen the supply which includes construction of Bakone substation, construction of Bakone to IOTA line as well as construction of a 90MW solar farm through PPP which is currently at planning stage.
- Delay in the implementation of strategic projects identified in the master plan due to shortage of funding will result in lack of capacity in future or load shedding.
- Illegal connection and bridging of electricity is contributing to electricity losses.
- Ageing infrastructure
- Theft and vandalism of cables has been reduced in substations but thieves are now targeting household's connections.
- The reduction was as a result of the appointed service provider who is monitoring substations on 24 hours, 7 days a week.
- Theft of transformers which supplies residents and borehole pumps is very high in rural areas and is causing disruption of service delivery.
- ESKOM has upgraded Boyne and Nobel substations and now busy upgrading University substation and new Rampheri substation is also under construction. Network strengthening is also taking place in strategic areas within the municipality.
- A company was appointed to do smart prepaid for Domestic customers and Smart metering solutions for business and bulk supplied customers within the city/Seshego area.
- Meter auditing of the current prepaid meters is ongoing as part of programmes of reducing energy losses.
- Service provider was appointed for the installation of check meters to verify the bill from Eskom.

4.9. Pre-Paid Electricity Meters

The objectives of the project are to help the City **overcome problems** of inaccurate billing and encourage conservation of resources.

VISION 2030=SMART CITY

Polokwane residents will get conventional meters converted to smart meters as part of the City's Smart Meter Project which aims to improve service, monitor power consumption and reduce our residents' costs related to consumption of electricity.

Pre-Paid Electricity Meters

4.10 Polokwane/Seshego Urban Complex Technical Assessment

Electricity Services

| Level of Service | Grid Electricity Service - connected and metered (conventional or pre-paid). | | | | |
|----------------------|---|--|--|--|--|
| Overview | The Municipality distributes electricity in the Polokwane City/Seshego Functional Area while Eskom is the service provider in the rest of the Municipal area. | | | | |
| Capacity and Backlog | The electricity backlog in the Polokwane Electricity Supply Area is minimal, if any. Only new township development in the Seshego area that have not been completed or are in process may require electrification. | | | | |
| | ESKOM currently supplies Polokwane Municipality from two substations and a 66kV metering point namely the Pietersburg Substation and the Silica Substation and Seshego 66kV metering point. Indications are that the demand on the Pietersburg Substation exceeds the secure capacity of the supply lines | | | | |

VISION 2030=SMART CITY

| by 45% but does not exceed the secure capacity of the 132kV / 66kV transformers. The demand at the Silica Substation does not exceed the secure capacity of the incoming lines or the secure capacity of the 132kV /66kV transformers. ESKOM has the following upgrading/strengthening strategies: |
|---|
| Pietersburg Substation: |
| ESKOM is currently busy with the planning for the construction of a new 132kV supply line from the ESKOM Witkop Main Transmission Substation to the ESKOM Pietersburg Substation. This line will have a capacity of 195MVA (KINGBIRD conductor) and is expected to be completed in 2023. At the completion of this line the secure capacity of the supply lines to Pietersburg Substation will be 172MVA which will be sufficient until 2028. |
| After completion of the above line one of the existing lines will be upgraded to KINGBIRD conductor as well with a capacity of 195MVA. The date of completion of the upgrading of this line is currently unknown. Completion of the upgrading of this line will bring the secure capacity of the supply lines to, Pietersburg Substation to 281MVA. This upgrade falls outside the 10-year planning window. |
| Silica Substation: No upgrading for the substation is planned. |
| Seshego Metering Point - Sigma Substation: No upgrading for this metering point is planned. |
| Pietersburg Substation: area: The completion of the Bakone - lota 66kV line and the Bakone intake substation is scheduled for completion in year three (3) after which the 66kV lines feeding into the old Pietersburg area will have a firm capacity of 4 x 80MVA = 320MVA. This is sufficient for the foreseeable future demand. |
| Seshego area: Supplied from Eskom Pietersburg substation to the Seshego metering point by a single non-firm 66kV line with a capacity of 42MVA which is concerning for the following reasons: It is mostly a wood-pole line with poles dating from 1976/1977. This indicates that the line is 41 years old and has reached the end of its lifespan. |
| The supply is not firm, and a breakdown of the line could result in a lengthy period of electricity for the whole Seshego. It is recommended that this line must be replaced due to the age of the existing line. |
| It is further necessary to establish a firm supply to the Seshego area to limit the risk to the supply of the area. This must be done with the possible new development areas taken into consideration. |

VISION 2030=SMART CITY

| Bakone Intake Substation: The Bakone substation is scheduled for completion in year 3 and no problem is envisaged in the study period with this substation. |
|---|
| Alpha Intake Substation: The 66kV supply line to Sigma substation is currently supplied from the Eskom Pietersburg substation and is under control of Eskom. This situation is unacceptable, especially when the 66kV system will be modified to become a firm supply when control of the system must be by the Municipality. To correct the situation, alterations to Alpha intake substation is required. The existing transformer substation has sufficient capacity for the 10-year study period. In the long term new transformer substations are required with the proposed establishment of Tweefontein, Dendron and Matlala to unlock the development of the areas. |

The largest contributor to service charges is **electricity services** with a contribution of **68%** followed by water services accounting for approximately 18% of the total service charges levied.

4.11. Rural Areas Electrification

Each year the City of Polokwane set aside Budget to Electrify Rural Areas that still don't have Electricity. Council has approved **electricity Priority list** that guide the Process. there is so much progress in this Programme

CHAPTER Five: Environmental and Social Analysis

5.1. ENVIRONMENTAL ANALYSIS

Every citizen has the right to an environment which is not harmful to their health or well-being and to have the environment protected for the benefit of present and future generations through reasonable legislative and other measures that prevent pollution and ecological degradation, promote conservation and secure ecologically sustainable development and use of natural resources while promoting justifiable economic and social development.

People depend on healthy ecosystems and sufficient natural resources to support their livelihoods. Ecosystem services provide physical resources such as clean air, water, food, medicinal plants, wood as well as the aesthetic value. The viability of these ecosystem services is a key factor in the economy, essential to poverty eradication and our national goals of shared and accelerated growth. Polokwane Municipality has a role to play in the management of biodiversity assets and ecological infrastructure. The municipality of Polokwane carries key responsibilities of implementing the important environmental legislations as well as several national strategies and policies relating to biodiversity and sustainable development.

5.1.1 Climate Description

Polokwane Municipality lies in the summer rainfall region and has a warm climate. Frost is rare. The highest temperatures occur during December and January. The daily average high temperature is 28.1 degrees Celsius in January and the highest recorded temperature is 36.8 degrees Celsius. The average minimum winter temperature is 4.4 degrees Celsius in July with a record low of -3.5 degrees Celsius in 1964. The mean annual daily variation is 15 degrees Celsius.

The mean annual precipitation for the region is 478mm. Most precipitation falls between October and March with the peak period being December/January. Rainfall between the months of May and September is generally low with the average precipitation rate for the period June to August being 4,6mm.

Large-scale surface airflow over the region is dominated throughout the year by easterly and north-easterly winds. October and November are typically windy with wind speeds up to 13.8m/s. The frequency of southerly winds increases during June and July.

Source: Polokwane Municipality SDF,

5.1.2 Pollution Levels - Air Quality

The purchase of an air pollution monitor was approved during the 2015/2016 budget. The monitor will be used in different areas every quarter

- Polokwane Smelter (SOx, solid particulates, NOx).
- Municipal Landfill (odours, carbon monoxide, methane, particulates).

VISION 2030=SMART CITY

- Industrial Activities (coal burning and related processes).
- Ready-mix Materials quarry (dust).
- Motocross track (dust, noise, carbon monoxide).

Source: Polokwane Municipality SDF

5.1.3 Topography

The Municipal area is divided into two rough topographical units, namely 'Moderately Undulating Plains' (mainly the eastern half of the municipal area) and 'Strongly Undulating Plains' in the west. The Polokwane Municipal area is situated on the so-called 'Pietersburg Plateau', which is bordered in the south by the Strydpoort Mountains, in the west and north by the Waterberg Mountains and in the east by the Great Escarpment. The highest part of the Plateau lies in the south near the Strydpoort Mountains which forms the watershed between the Olifants and Sand River systems.

There are a number of ridges which causes constraints on development due to their visual exposure, potential as recreation or educational sites, former importance as sacred sites (likelihood of heritage sites) and likelihood of supporting sensitive plant communities.

Source: Polokwane Municipality SDF

5.1.4 Geology

The underlying geology consists of medium-grained, yellowish, laminated sandstone of the Makgabeng Formation of the Waterberg Group. It is also characterized by granite, biotite granite-gneiss, pegmatite, lava and pyroclasts.

Source: Polokwane Municipality SDF

5.1.5 Hydrology

There are 19 Catchment Areas represented in the municipal area. This includes 9 small portions of larger catchments outside the Municipal boundaries and the remaining 10 catchment areas are within the municipal boundary.

The Sand River catchment is drained by the Sand and Blood river. These are indicated as perennial streams but are often dry in the winter. The Blood river has its origin in the west of the Municipal Area and flows eastward between Blood river and Seshego. It is impounded in the Seshego Dam, and also joins the Sand River to the north of Polokwane City. The City of Polokwane has a number of storm water retention dams and storm water channels that eventually discharge into the Sand River via the Sterkloop Spruit and open storm water channels. There are a number of important wetland areas in the catchment. These areas support rare or endangered frog species and plant species.

The utilisation of water in the catchment is mainly underground water abstraction via boreholes. There are a multitude of boreholes pumping into a number of reservoirs and

VISION 2030=SMART CITY

tanks of various sizes in the municipal area. This aquifer is under threat from two major pollution sources, namely, the Polokwane Cemetery and the Seshego Sewerage Works.

Source: Polokwane Municipality SDF

5.1.6 Vegetation

There are 6 Vegetation Types that occur in the Polokwane Municipal Area. The largest Veld-Types are as follows: Pietersburg Plateau False Grassveld, Sourish Mixed Bushveld, Sour Bushveld, Mixed Bushveld, North-Eastern Mountain Sourveld and a relatively small area of Lowveld Sour Bushveld.

The veld is currently badly degraded and overgrazed and requires intervention from the municipality. North Eastern Mountain Grassveld occurs in the southern parts of Molepo-Maja-Chuene cluster and in the eastern part of the Mankweng cluster, along the Strydpoort Mountains, including 280 bird species, 22 butterfly species, 4 frog species, 12 mammal species, 6 reptile species and 5 scarab species.

Source: Polokwane Municipality SDF

5.1.7 Soils

The Pietersburg Plateau contains mainly grey iron-containing lateritic soil types that have been formed over the granite. These are sandy or gravel in texture and usually contain a hard iron containing bottom layer of hard-pan. The area also contains, in certain areas, nonleached, black clay soil while to the West, light brown sandy soil of the Waterberg Sandstone and Lime deposits occur. The escarpments are also characterized by the round granite mounds that were formed by the intrusion of younger granites.

Source: Polokwane Municipality SDF

5.1.8 Heritage Resources

The fact that the municipality has not yet undertaken a comprehensive heritage survey of the entire municipal area, the heritage information on record is very limited. There are heritage sites that are currently recorded, namely, the **Bakone Malapa site** on the Chuenespoort Road which has been developed as a Museum and Mankweng **Rock Art Site** located in Mankweng which is linked to the Turf Loop Dam and provides other recreation activities such as hiking, picnicking and water sports. Other sites that provide good research material are the **Irish House Museum, Hugh Exton Museum and the Art Museum**.

VISION 2030=SMART CITY

The Zion Christian Church (ZCC)

The Zion Christian Church (ZCC) forms a unique heritage in Limpopo Province. Every year, mainly during the Easter holidays and in September, millions of ZCC congregation members flock to this area for worship. At present, the municipality has not capitalised on this unique advantage besides the fact that there is a by-pass directing these people to travel along the periphery of the City. Businesses in Polokwane should take advantage of this unique opportunity and gear it to provide a service to these people e.g. Open until late at night. There is a need for the municipality to develop a heritage database that will be looking at the Indigenous Knowledge System (IKS).

Source: Polokwane Municipality SDF

5.1.9 Polokwane Game Reserve (Conservation)

Polokwane Game Reserve is just a 10 minutes' drive from the City Centre Covering **3200** hectares, this scenic reserve is one of the largest municipal reserves in South Africa.

The Game Reserve still has its unspoilt bush veld and meandering drives and it is also a home to 52 game species. Amongst the favourites are the sable antelope and giraffe. The centre of the city has a large bronze statue of necking giraffe so the animal's association with the City is a special one. The park is also the nesting place of approximately 200 bird species. It is a shining example of preservation of the threatened Pietersburg Plateau False Grassland and plant 0enthusiasts will discover 110 different grasses, approximately 280 flowering plants and 68 tree species. It is eco-tourism at its best. It is important to note that, the following sensitive areas within Polokwane municipality must remain protected from development (i.e. no development within 150m).

Polokwane Botanical Reserve (one of only two habitats worldwide for endemic endangered *Euphorbia Clivicola*, a large *Aloe marlothii* 'forest', high geological and microclimate diversity, over 20 tree species) which is the highest and therefore the most visible point in Polokwane.

Flora park wetland (a seasonal wetland harbouring the only known community of endemic *Haemanthus montanus* bulbs and a rare form of *Serapegia*);

VISION 2030=SMART CITY

Polokwane Frog Reserve (breeding grounds for 12 Frog species including endangered Giant Bullfrog);

Buffer Zone along the Sand River of 100m on either side of the channel. The profusion of Syringa and other invasive weeds must be addressed as part of a planned rehabilitation strategy;

The Suid Street drainage channel (a dense stand of Acacia tortilis and Acacia rehmanniana), which provides an ideal linear open space

Unprotected Sensitive plant communities – The endemic plant communities (e.g. Euphorbia clivicola and Euphorbia groenewaldii) and other sensitive communities of high biodiversity around wetlands and ridges in the Polokwane area are not protected in any way and are therefore under threat from development, removal, habitat destruction, etc.

Source: Polokwane Municipality SDF

5.1.10 Euphorbia Clivicola

The Clivicola is located on the farm Krugersburg in Pietersburg Extension 11. The plant is a critically endangered species and has been listed as a CITES Schedule II species. It is only found in Polokwane and Percy Five in the whole wide world. The plant needs to be protected for the sake of future generations. Less than 300 plants are left in the habitat.

5.1.11 Euphorbia groenewaldii

Another endangered species that needs to be protected is the groenewaldii. The species forms part of the biodiversity of the Pietersburg false plateau. Plans are in place to fence off the area where this plans are located through creation of botanical garden.

| 5.1.12 Giant Builfog - <i>Pyxicephalus adspersus</i> | | | |
|--|------------------------|------------------------------|--|
| Common name | Scientific name | Status in Polokwane | |
| Giant Bullfrog | Pyxicephalus adspersus | Restricted to a few seasonal | |
| | | wetlands scattered | |
| | | throughout the Polokwane | |
| | | Municipal Area | |

Siant Bullfrog - *Puvicenhalus adenersus*

The Giant bullfrog (Pyxicephalus adspersus) is a species of frog in the Pyxicephalidae family. It is also known as the **pixie frog** due to its Latin name. Its natural habitats are dry savanna, moist savanna, subtropical or tropical dry shrubland, intermittent freshwater lakes, intermittent freshwater marshes, arable land, pastureland, and canals and ditches. This is a large frog,

VISION 2030=SMART CITY

with males weighing 1.4 kg (3.1 lb), though can easily exceed 2 kg (4.4 lb); females are half the size, making it unique among frogs, as in most amphibians females are usually larger than males. Males can reach 23 cm (9 inches) while females are much smaller. The Giant Bullfrog is the largest amphibian found in southern Africa. Areas has been identified within the Polokwane Municipal areas which serve as habitat for this species. the species needs to be protected.

5.2. Climate Change and Global Warming

When talking about climate, allusion is made to the long term average weather patterns of a given region (i.e. temperature, pressure, precipitation). In this context, climate change then refers to perceived increases in the long term average temperature of the earth's climate system. This temperature increase alters typical processes of ice formation and melting, changes the hydrological cycles and modifies the air and ocean currents. As a consequence, social, biological and ecological systems are also affected; and there is a strong threat on food supply, health, availability of water resources, economic growth, etc.

The understanding of climate change has been growing and today scientist is 95% certain that the perceived increases in global temperature are mostly caused by the concentration of Greenhouse Gases (GHG) in the atmosphere and other human activities. Solar radiation penetrates into the earth warming its surface; however only a fraction of this radiation is returned back to the space as most of it is trapped by the accumulation of these GHG gasses. The trapped radiation goes back to heat up the earth's surface, increasing its temperature just as a greenhouse operates.

Most of the GHG are present naturally in the atmosphere in small proportions; however, since the industrial revolution their concentration has notably risen. This rise has primarily been linked to the combustion of fossil fuels driven by the demand for energy, goods and services, and to the conversion of natural ecosystems to intensive land use. Climate change is becoming increasingly apparent in Limpopo Province. The usual manifestations of climate change are evident by the long term changes in weather indicators such as rainfall or temperature.

The National Department of Environmental Affairs together with the Deutsche Gesellschaft fur Internationale Zusammenarbeit (GIZ) GmbH GIZ have appointed a service provider (One world) to carry out the work of assessing the state of preparedness in addressing climate

VISION 2030=SMART CITY

change and building climate change resilience. The assessment will cover eight (8) metros and seven (7) secondary cities. Polokwane Municipality is amongst these secondary cities.

Rainfall

Typical rainfall for the Limpopo province ranges from 200mm in the hot dry areas to 1500mm in the high rainfall areas, with most of it happening between October and April. Rainfall in the province varies significantly between years. There has been a perceptible decrease in the total rainfall on much of the eastern part of Southern Africa including most of the Limpopo River Basin This can have serious impacts on the water balance of the region, affecting the largely rural population dependent on agriculture.

Drivers and Pressures

Without a doubt, the main drivers of climate change are population and economic growth. As the population numbers increase, more people aspire to higher material standards - creating an even greater demand for goods and services as for the energy to provide these. Transportation, industry, commerce, and the residential sector are the greatest contributors to GHG emissions, due to their high demand of energy which is supplied from non-renewable sources. The energy sector is responsible for about 89% of the national emissions of CO2, mainly from energy industries (57%), transportation (9%) and manufacturing and construction (9%) Other sources of emissions are industrial processes and agriculture and land usage. **Source: Limpopo Environmental Outlook Report, 2017**

5.2.1 City of Polokwane Plans on Climate Change

It is for this reason that the City of Polokwane set budget aside for development of Framework for **Climate Change Adaptation Action Plan (CCAAP)**

| Project Name | Activity | Location | | |
|---|--|----------------|--|--|
| Development of a Climate Change Adaptation Action Plan (CCAAP) for the City of Polokwane | Development of a Climate Change Adaptation Action Plan (CCAAP) for the City of Polokwane | Municipal Wide | | |
| | | | | |

VISION 2030=SMART CITY

5.2.2 Solar Energy

As part of Free Basic Electricity, the municipality has provided households with solar **Panels**. Plans are in place to increase the provision of **solar Panels** to other parts of the municipality.

5.2.3 Environmental Challenges

The following is a generalized summary of the existing Environmental problems encountered within the municipal area:

- Waste Management
- Mine and Industrial site rehabilitation
- Sink-holes
- Depletion of Soil nutrients
- Soil erosion
- Reduction in scenic value
- Deforestation
- Overgrazing
- Invasive alien's plants
- Unprotected Sensitive plant communities
- Borrow pits
- Sand mining

General challenging issues

There is a need to develop and maintain rural cemeteries, burial sites and recreational facilities. There is no proper control and coordination of identification process of suitable land that should be utilised for burial purposes; burial site ends up being established on environmentally sensitive areas. However, the municipality has started process to engage our traditional authority in identifying ideal or suitable sites for the establishment of regional parks and cemeteries in rural areas.

5.2.4 Major Environmental Achievements

| Item | Progress |
|--------------------------|--|
| New parks development | Development of Extension 76, Seshego zone 4, Kgoroshi Tom Naude park. The beautification of Tzaneen road, Sebayeng and Mankweng entrance (island) |

VISION 2030=SMART CITY

| Item | Progress | | | |
|--|--|--|--|--|
| Dry garden concept and the progress thereof. | It is when we develop a garden or landscaping designs where the end product will utilize minimal or no water at all. Material used includes rocks, stones, dry fallen trees or logs and succulents to design and decorate the garden. Mamotintane park is an example. | | | |
| Botanical garden Concept | An implementation plan has been developed. The scope of work for the Surveyor/Architect has been compiled. We are likely going to change the concept to developing a protected area instead of a botanical garden due to costs involved. | | | |
| Protection of endangered plants | A Biodiversity or Conservation plan has been compiled. | | | |
| Future environmental plans | tal The State of the Environment Report, the Strategic Environmental Assessment report and the Environmental Strategic Framework report has been developed, finalizing the submission of an Environmental Management Plan and the compilation of Environmental policy. | | | |
| Cemetery Management system | A new system to be introduced for Cemetery Management in collaboration with the GIS section of the Planning SBU. | | | |
| Tree inventory | Already captured 4500 trees on GIS | | | |
| Maintenance of parks | Detailed activity-based operational/maintenance plans have been developed for all the parks within the Municipality | | | |

VISION 2030=SMART CITY

| Item | rogress | | | | |
|--------------|--|--|--|--|--|
| Achievements | Managed to create a ranch-fencing at the Bull-frog colony to protect the endangered bull-frogs. Cleaned and removed (to a certain extent) the rubble and illegal dumped waste at Sterpark "koppie". Created mounds of soil around the Sterpark's ecologically sensitive area to protect the endangered plants. Remain the unchallenged title-holders of the Best SBU excellence award in the municipality. Participating in the Arbor City Awards and GMC competition – GMC Position1 District, provincially and nationally and Arbor City Position 2 nationally. Hosted provincial Arbor day celebration at Sebayeng | | | | |

5.2.5 Department of Environmental Affairs: (EPIP) Funding

DEA: Environmental Protection & Infrastructure Programme (EPIP) Funding

Polokwane Municipality Has Receive confirmation for approval of funding by the **Department** of **Environmental Affairs** for projects under the EPIP New Funding Cycle. the project specific details regarding the planning and implementation of the projects was provided as the Table below

The approved EPIP funding projects from the National Department of Environmental Affairs for Polokwane Municipality.

| | Project Name | Project Description | Focus Area | Recommended Budget | Applicant | Category |
|---|----------------------------------|---|-------------------------|-----------------------|---------------------------------|--------------------|
| 1 | LP Seolo Game farm Fencing | An existing game breeding farm that requires assistance with game fencing ,water reticulation and Roads. | Biodiversity Economy | R10 000 000,00 | Seolo Game | Infrastruct ure |
| 2 | Moletjie Nature Reserve | Erection of perimeter fence and security | People and Parks | R20 000 000,00 | Moletjie Tribal Authority | Infrastruct ure |

| | Environmental knowledge Capacity building | Environmental capacity building workshops to wards committees and Traditional Leader | Capricorn | All locals | | | |

5.2.6 Provincial Intervention for Environmental Management – LEDET

VISION 2030=SMART CITY

5.2.7 Planting of Trees Programme

Trees Planting Programme

5.2.8 Polokwane Environmental Forum

Polokwane Environmental Forum was established on the **14 June 2019** by City of Polokwane with the aim of addressing the environmental challenges in a coordinated manner within Polokwane City. Environmental management SBU being the custodian of the forum. Environmental challenges such as illegal dumping and illegal sand mining just to mention the few. The Environmental SBU is finalizing the terms of reference. Meeting for the Forum are held once quarterly. The following are the key external stakeholders i.e LEDET, Capricorn District Municipality, DEA, SAB, Polokwane Anglo Smelters, Coca Cola and University of Limpopo. Internal SBU's that are part of stakeholders include Waste, Environmental Health, Water, Environmental Management, Planning, Energy and GIS.

5.2.9 Capricorn District Environmental Forum

This forum is coordinated at District level (**Capricorn District**) and of which Polokwane Municipality is an active member of the forum. Meeting are held once quarterly.

VISION 2030=SMART CITY

5.3. WASTE MANAGEMENT

Waste management is one of the critical services rendered by municipalities. The availability and/or unavailability of this service have a direct impact on the quality of life of citizens, their health as well as the degradation of physical environment.

Waste management embraces "prevention, generation, characterization, monitoring, treatment, handling, recycling and residual disposition of solid wastes. There are various types of solid waste that include municipal (residential, institutional, commercial), agricultural, and special (health care, household hazardous wastes, sewage sludge). Functions relating to waste management include:

- Awareness and education to change the attitude of the public
- Waste minimization (reduce, re use and recycle) The 3 Rs
- Waste generation and storage
- Waste collection, transfer and transportation
- Waste treatment
- Landfill disposal
- Environmental considerations
- Financial and marketing aspects
- Research, Policy and regulation
- Education and training
- Planning and implementation

Polokwane Municipality is able to handle this satisfactorily as there is a full-fledged unit established to focus on waste management. Waste collection is currently rendered in the City, Seshego, Mankweng, and Sebayeng Townships. Municipal trucks collect waste **once a week** at residential areas/suburbs/Townships and **daily** at businesses and industrial areas). A Plan is underway to roll out this service to rural areas as contained in the IWMP. At the moment ;27 rural villages receive weekly waste collection service. EPWP litter picking is being done in all wards but not all villages, the challenges being equipment and personnel. All collected wastes are transported to Weltevreden municipal Landfill site which has a license

Currently in the Aganang Clusters, Waste Removal Services is Rendered in the following areas i.e

- 1) knobel hospital
- 2) post office
- 3) Mashashane crossing
- 4) Maphepha centre
- 5) SASSA
- 6) Matlala police station
- 7) the local market and
- 8) Tibane shopping centre.

VISION 2030=SMART CITY

Furthermore, street cleaning is also rendered in in all wards through Expanded Public Works Programme (EPWP) and all the waste collected is still transported to Weltevreden landfill site until Aganang landfill site is completed.

5.3.1 Integrated Waste Management Plan (IWMP)

The City of Polokwane has developed and adopted an IWMP which embraces the concept of waste Management Hierarchy as follows:

- Waste Avoidance or prevention
- Waste Minimisation-reduce, reuse & recycle
- Waste treatment
- Waste disposal

Integrated Waste Management Planning (IWMP) is a basic requirement for all municipalities as stipulated in the **National Environmental Management: Waste Act, 2008 (Act No. 59 of 2008)** (NEMWA). The Waste Act requires that the IWMP must be adopted for a period of five years and reviewed annually. The primary objective of the IWMP is to integrate and optimise waste management planning in order to maximise efficiency and minimise the associated environmental impacts and financial costs and to improve the quality of life for all South Africans.

The National Waste Management Strategy provides a set of goals that municipalities must achieve in order to give effect to the Waste Act. It contains an action plan with various targets to be achieved by municipalities.

5.3.2 Promote Recycling and Recovery of Waste

Polokwane Municipality IWMP Goal is to promote recycling and the recovery of waste; in a tabular format and this would be represented as follows:

Table: Promote Recycling and Recovery of Waste

| Immediate goals | Short term goals | Medium term goals | Long term goals |
|--|--|--|---|
| Establish mechanisms for promoting separation at source (develop waste minimisation plan with clear programmes, project, | Roll out separation at source to 30 % of households. | Roll out separation at source to 70 % of households. | 100% households receiving separation at source. |

VISION 2030=SMART CITY

| Immediate goals | Short term goals | Medium term goals | Long term goals |
|---|--|---|---|
| budget and time lines for implementation. | | | |
| Conduct a feasibility study to determine whether there is a need to establish buy back centres. | Develop plans to establish buy back centres. | Buy back centres established. | Utilization of buy back centres. |
| Develop a composting strategy/plan to divert garden waste from landfill sites. | Establish a compost recycling plant. | Compost recycling plant fully operational and is operated in a sustainable manner. | Compost recycling plant fully operational and is operated in a sustainable manner. |

5.3.3 Refuse Removal Trends

Table: Refuse Removal

| Municipality | Removed by local authority/ Private company | | Communal refuse dumps | | No rubbish disposal | | | | |
|--------------|---|--------|-----------------------|--------|---------------------|--------|--------|--------|--------|
| Polokwane | 2017 | 2018 | 2019 | 2017 | 2018 | 2019 | 2017 | 2018 | 2019 |
| Households | 43.06% | 43.08% | 43.323% | 56.94% | 56.92% | 56.67% | 56.94% | 56.92% | 56.67% |

Source: Stats, S.A,

There is slight improvement in areas that had no service at all since 2017. As indicated earlier, the unavailability of such a service has a direct impact on the health of the citizen as well as the physical environment. A high number **56.67%** of households in rural areas still use communal dumps in comparison of households with access to refuse removed by local authority/private company **of 43.323%**

Currently, only City / Seshego and Mankweng / Sebayeng clusters have conventional waste management services in place. There are now two landfill sites licensed and three transfer stations in the CBD area. In the **Mankweng/Sebayeng** there is one transfer station. There are three rural transfer station at **Makgaga Moletjie**, **Vaalkop and Dikgale** that were completed

VISION 2030=SMART CITY

and Makgaga is the one that is operational. There is a need to budget for additional rural transfer stations **in Maja/Chuene, Aganang cluster and Westernburg** transfer station. Ladanna transfer station is without paving, proper retention walls and ramping. There is need to budget for it including Seshego transfer station which was abandoned due to objection by the adjacent property owner in 2008.

The rural areas normally do not have conventional waste management methods, illegal dumping characterised these areas without such services. A certain level of Rural Waste Collection service under the EPWP incentive Grant is undertaken in all **wards** municipal wide. The employees render litter picking service three days per week and the waste is collected by waste municipal trucks and disposed of at the Weltevreden landfill site.

Three more rural transfer stations are budgeted for on the MTREF namely Vaal kop, Makotopong, Ga- Dikgale and Molepo for 2019/20. It is therefore important for the municipality to develop and implement a municipal-wide waste management plan in rural areas with clear sustainable service levels (IWMP). In order to promote the notion of waste recycling, DEA constructed and donated the **Mankweng Buy back centre** to Polokwane Municipality and the municipality has appointed a service provider who operates the site and created work opportunities of 10 local people.

According to the IWMP there are additional Buy back centres that must be established in rural areas as well to support and promote waste minimisation in rural areas. Waste recycling should also be introduced in all rural transfer stations in order to intensity recycling and create basic job opportunities.

5.3.4 Municipal Landfill Sites

The City of Polokwane has **X 2 licensed landfill sites:** 1 is fully operational and 1 is still at construction level (New Aganang cluster). The municipality also has **6 transfer stations in total:**

- 6 x permitted
- 1 x ROD (Record of Decision) for Mankweng transfer station but not permitted, New plans required to license the transfer station.

5.3.5 Waste Management Challenges

| Challenges | Measures to address challenges |
|---|---|
| Lack of adequate trucks (Excluding urban compactor trucks) and long turn-around | Outsourced specialised 17 compactors for Seshego, Mankweng and the city and |

VISION 2030=SMART CITY

| Challenges | Measures to address challenges |
|--|---|
| time for repairs to render an effective service in rural areas, illegal dumping and industrial cleaning. Weltevreden landfill site is remaining with only two years' lifespan. Landfill site does not charge disposal fee. | 2 heavy industry sweepers started working w.o.f February 2019. The feasibility study of the landfill site was completed in June 2019 and the license, planning and construction to commence in 2019/20 with capital budget R 6 000 000. Report to be submitted to Council for approval to re-introduce disposal charges/tariffs using various options(account, coupons. |
| Land allocated for building rural transfer station is invaded and houses constructed on them (Sengatane and Dikgale were relocated as a result) Shortage of personnel for refuse removal. | To secure the sites with fencing if the budgeting is on multiyear beginning with planning in the first year. Continuous budgeting and filling of vacant positions is imperative especially labourers, supervisors and Awareness and education officers. |
| There is no refuse removal service in rural areas only 27 villages receive weekly service. There are no transfer stations in all the clusters.eg Maja/Chuene, Mashashane, Matlala areas. There is a need to Construct a transfer Station at Seshego. Ladanna transfer station upgrades includes walling around, water connection and guard house. The working area is not paved, ramp and retention are also dilapidated. There is no transfer station at Westernburg and Seshego. | Construction of rural transfer station is currently running. There is a need of budget on MTRF or additional transfer in other remaining clusters including, Seshego, Westernburg and paving of Ladanna transfer station. Vaal kop and Dikgale are completed, Makotopong and Ga Molepo are under construction. A plan to roll out waste management service in rural areas to be compiled indicating increase of villages over a three year period. |

VISION 2030=SMART CITY

| Challenges | Measures to address challenges |
|--|--|
| The municipal area is characterised by a lot of illegal dumping from building rubble due to inadequate awareness and education officers and inadequate law enforcement. Down town is untidy due illegal land use and occupation hawkers, illegal outdoor advertising on municipal properties and refuse containers including illegal mechanics. | A waste minimisation strategy /plan with clear programmes and projects with timelines to be compiled. Additional budget required to fill 4 vacant positions of awareness and education officers to intensify law enforcement and education. Waste minimisation policy be compiled on recycling methods and approaches for while paper. Outsourcing of litter picking in the City, Seshego, Mankweng and Sebayeng. A pilot usage of cooperatives to be undertaken first in the City. Working together with other SBUs to control all illegal activities and the sweeping of sand in the CBD. allocated four additional rural transfer station including Seshego, Westernburg and Ladanna transfer station. |
| Mankweng transfer station is having ROD but not licensed due to the absence of plans. Mankweng illegal dumping area is licensed for closure but without budget for rehabilitation. | Mankweng transfer station to be budgeted Development of building plans to complete process of licensing. Mankweng pit to be budgeted, closed and rehabilitated . |
| The perimeter fence around Ladanna waste and roads depot is broken and the motor main access is without a gate. | Construction of proper perimeter wall to be budgeted with new motor gates that will improve security measures and prevent theft of refuse containers, tyres and truck batteries. |

VISION 2030=SMART CITY

5.3.6 Waste Management Status Quo

| | ACTIVITY | PROGRESS |
|----|---|---|
| 1. | IWMP 350 000. | IWMP approved by Council and referred to LEDET for final ratification. Some projects such as transfer station are already being implemented. |
| | | A plan to be compiled immediately for the 2020 review of IWMP. |
| 2 | By-Law. | By-Law approved by Council and have been published during June 2019 for gazetting. This will assist with law enforcement in down town as well to improve compliance and cleanliness. |
| 3. | Waste collection in rural areas. | EPWP litter picking and collection is being done in all wards. 27 villages are currently receiving weekly waste collection service and there is a need to extend to other villages in other wards. A three year roll out plan to be compiled indicating envisaged increase in villages with access to weekly collection service. |
| 4 | Plan\program on waste collection in the City, Seshego, Mankweng and Sebayeng. | A schedule on waste collection is in place and it also guides the placement of personnel and allocation of trucks. |
| 5. | Weltevreden landfill site. | Cashier house is completed and the landfill site has been classified as a high risk area to collect cash at the site instead; rates and taxes accounts of end users will be debited, the sale of coupons and other smart options. Feasibility study to extend has been completed and busy with licensing. |
| | | Extension will have commenced with R 6 000 000 on 2019/20 financial year. |

VISION 2030=SMART CITY

| | ACTIVITY | PROGRESS |
|----|--|--|
| 6 | 6 and 9 M ³ skip containers for rural transfer stations R 1 301 000. | Three-year contractor was appointed in 2019/20 to supply and deliver skip containers for rural areas and rural transfer stations. These may not be adequate since only R 1 301 000 has been currently budgeted. |
| 7. | Construction of Aganang landfill site R6 000 000. | Construction of the phase 3 will be completed by June 2020 which include lining of cell and drainage system. An operational plan after completion to be compiled. |
| 8 | Upgrading of Ladanna transfer station. | Construction of ablution facilities, sewer and water connections have been completed and functional Outstanding matters of paving, retention wall and ramping to be budgeted for. |

5.3.7 Waste Collection in Rural Areas

EPWP waste collection will be done in all wards with a total budget of R4 000 000. Approval and implementation of rural waste strategy is part of IWMP. The municipality also has Projects for construction of 3 rural transfer stations,

5.3.8 Rural Transfer Station Projects

Table: Rural transfer station Projects

| Project Name | Funding | 2019/20 | 2020/21 | 2021/22 |
|---|---------|-----------|-----------|---------|
| Rural transfer station (Sengatane) | IUDG | - | 3,000,000 | - |
| Rural transfer station (Dikgale) (Construction, Guard house. Paving , dumping area and Fencing) | IUDG | 1,477,400 | - | - |

VISION 2030=SMART CITY

| Project Name | Funding | 2019/20 | 2020/21 | 2021/22 |
|--|---------|-----------|-----------|--------------|
| Rural transfer Station (Makotopong) (Construction, Guard house. Paving , dumping area and Fencing) | IUDG | 2,000,000 | - | - |
| Rural transfer Station (Molepo) | CRR | 2,500,000 | 3,185,000 | - |
| (Construction, Guard house. Paving , dumping area and Fencing) | | | | |
| Extension of Weltevreden Landfill site | CRR | 6 000 000 | 3 790 000 | 1 107 000 |
| Aganang landfill site | IUDG | 6 000 000 | - | - |
| 6 & 9 M skip con | CRR | 1 301 000 | - | - |
| No dumping Boards to control illegal dumping | CRR | 100 000 | 393 000 | - 442 800 |

Source: Polokwane Waste Management SBU,

5.4 By-Law Enforcement & Security

The SBU is made up of the **Municipal Control Centre, Asset Protection and By-Law Enforcement;** and the responsibilities are as follows:

- Enforcement of Municipal by Laws.
- Pre-Employment Screening and vetting of municipal employees and companies rendering services to Polokwane Municipality.
- Joint law enforcement operation with different Stakeholders/ Law Enforcement Agencies to promote safety.
- Conduct crime prevention campaigns (school search, security awareness to municipal employees and crime awareness campaigns).
- Provision of security at Municipal properties, municipal events, etc.
- VIP Protection.
- Access Control: technical control and support of automated access into all the main buildings such as motorized gates, metal detectors and biometric access control.

VISION 2030=SMART CITY

- CCTV Surveillance, monitoring as well as maintenance of the CCTV network and IP related equipment throughout the municipality in conjunction with the ICT SBU.
- Emergency call and complaint logging.
- Investigation of internal crime/incident cases.

5.4.1 Challenges and Intervention for By-Law Enforcement & Security

Below are the challenges and the interventions to address those identified challenges within the SBU:

| Challenges | Interventions to address these challenges | | |
|---|--|--|--|
| Shortage of resources (staff, equipment and funding). | Fill all budgeted vacant posts to cover all clusters, adequate budget for security equipment. | | |
| Lack of SBU capacity (Law Enforcement Officers appointed as 5 day workers; and in the event of illegal land invasions, community protests and other incidents that happen after hours require the same 5 day workers to respond; and this impacts negatively on overtime budget). | HR to advice in ensuring 24-hour service for Law Enforcement Officers. | | |
| Lack of capacity on CCTV & Access control devise repair and maintenance (only one technician). | To request for additional budget for extra 3 technicians. | | |
| Insufficient training/skill for security /Law enforcement officials/control room operators. | To arrange customer care, crime scene management, crowd management and access control training for security and Law enforcement officials. | | |
| Insufficient office space for Security Services SBU. | To secure dedicated office space for the entire SBU. | | |
| Unregulated hawkers, Job seekers and People sleeping in the streets. | To liaise with ED& to issue hawkers permits; and to implement the LIBRA Act. Continuous law enforcement operations with other stakeholders. | | |

VISION 2030=SMART CITY

| Challenges | Interventions to address these challenges |
|---|---|
| Abandoned municipal and private properties around the city which criminals use to hide stolen goods and themselves. | Liaise with Property management to take stock of all abandoned houses and take corrective measures (demolish). |
| Some SBU's indicating security needs after site handover while others after housebreaking. | All SBU's to provide security needs in advance to allow procurement process and proper allocation. |
| Many municipal sites without physical security . | Request all SBU's to provide a list of all sites that need security, and Planning and Development to provide a list of all municipal properties for easy security risk assessment to determine the type of security needed on site. |
| Many sites without proper access control devices. | Continue to request budget to install biometric, parcel scanners, turnstile equipment etc. at all municipal access gates. |
| Huge amount of money spent on security guarding services. | To look for alternative best practice module and technology to reduce the spending on physical security. |
| Lack of proper access gates/guard rooms and dilapidated perimeter fencing at various municipal sites. | Facility management and affected SBU's to provide corrective measures. |
| Lack of specialised vehicles (armoured/Nyala). | To request for the procurement of armoured/Nyala vehicles. |

5.5 DISASTER MANAGEMENT AND FIRE SERVICES

5.5.1 Fire Services Analysis

The Fire Services in Polokwane at present cover the Municipal area of jurisdiction with three Fire Stations that are manned 24 hours 7 days a week. There are many Major Hazardous Installations within the area of jurisdiction and specialised institutions. The municipality has grown to the disadvantage of the services in the Unit. The incorporation of former Aganang

VISION 2030=SMART CITY

areas has widen the scope of responses on the services. Fire Services have limited staff complement to attend incidents and ensure fire prevention across the municipality. This limit the capacity of the service to conduct law enforcement, Inspections, implement fire safety legislations, By-laws, Fire investigation reports, Building plans, New development plans, Flammable liquids and Hazardous substances.

There are **three** existing Fire Stations in the jurisdiction of the municipality, namely **Main Fire Station in Laboria**, **Polokwane**, **Satellite Fire Station at the Civil Airfield**, **Silicon Road and Mankweng Fire Station**. Other cluster like Moletji, Aganang, Matlala, Mashashane, Maja Chuene Molepo and Sebayeng areas do not have Fire Stations.

5.5.2 Accredited Fire-Fighting Course

Despite all the hiccups stated, Fire Services renders fully accredited fire-fighting course accredited through SAESI. These courses are offered to both internal and external people. Other firefighting courses have been applied for approval through LGSETA to enable the municipality to generate revenue. The staff component is relatively better but more might be required as the demand for the courses grow. Extension of training facility is very critical to achieve the growth of the training section. It is also important to enter into a Memorandum of Understanding with GAAL (Polokwane Airport) on the proposed "**Ike Maphoto Airport**" to comply with the existing aviation laws.

5.5.3 Fire Services Challenges

The demographic area to be serviced has increased dramatically over the last years, lately with Aganang and the growth within the service has not kept up. Serious lack of maintenance to existing infrastructure and facilities the appliance bays especially are resembling a state of dilapidation. Limited budgetary constraints negatively affect service delivery and capital projects.

Serious staff shortages in strategic positions specifically in the Fire Safety Section where the workload has more tripled and the staff component shrunk. Appointment of additional adequately qualified instructors at the Training Section.

VISION 2030=SMART CITY

The Fire Safety component is seriously lagging behind in the execution of its duties. There is a very serious need for adequately qualified staff. The workload is ever increasing and the present staff compliment just can't cope with it. Household inspections as well law enforcement (including newly promulgated by-laws) are just not done due to staff shortage and as such the risk and illegal activities continue unabated including the enforcement the Bush and Veldt Fire Act.

This will eventually boil over in fires occurring in illegal structures and can be responsible for fatalities as we have experienced already. It is certain to escalate in future. Water for firefighting activities, all over the Municipal area are increasing.

The issue of the fire hydrants is a burning issue and has been for several years now. Inadequate staff made it difficult to clean, clearly mark, and report on faulty hydrants. It is very common now to see fire hydrants and booster connections stuffed with paper and plastic etc., especially in dark nights this will damage pumps and hamper operations. The newly promulgated Fire Emergency By-law compels Fire Services to commit itself to Fire Safety and requires it to carry out specific duties that are putting the Municipality at serious risk. Unsafe or non-compliant buildings in town is major problem for the municipality.

5.5.4 Disaster Management Analysis

Disaster Management role in terms of the Disaster Management Act 57 of 2002 is to ensure that the appropriate prevention, mitigation and disaster response initiatives have been implemented. Disaster Management performs a response coordinating role, ensuring that multi-disciplinary coordination is in place and communication between responding agencies is efficient. The Municipality has conducted awareness campaigns to schools, clinics and to various Traditional Authorities.

In terms of emergency preparedness, the Municipality has developed evacuation plan that was approved by Council together with the Disaster Management Plan. It does municipal wide risk profile in relation to disasters. The risk also factored in the Disaster Management Plan. It plays a major role in safety and security in the municipality. It is permanent stakeholder in

Event Safety and Security Planning Committee and also in National Key Point as per respective legislations. It offers relief items to victims' disaster incidents supported by SASSA.

Like Fire Services, Disaster Management has limited capacity to respond and have few disaster capabilities to render its services effectively. There are insufficient personnel members and limited budget to cater for other activities. The Municipality holds Disaster Management Advisory Forum meetings on quarterly to solicit technical advice on matters related to disasters.

5.6. Traffic and Licenses Analysis

Traffic and licenses services are conducted at all clusters of Polokwane Municipality with the exception of licenses services which are only rendered at **City, Aganang and Mankweng Cluster.**

5.6.1 Traffic Management

The Municipality has ensured posting of the available minimal personnel on permanent basis at all clusters to perform the following traffic services:

- Traffic regulation and control.
- Traffic law enforcement.
- Road Traffic safety awareness.
- Accidents scene management, securing and recordings.
- Speed checks and collection of outstanding fines.
- Driver and vehicle fitness.
- Enforcement of municipal by-laws and parking offences.
- Management of parking.
- Offer internal training needs i.r.o law enforcement to internal and external stakeholders.

The following traffic services are conducted only within the city cluster as a result of infrastructural and legislative requirements:

VISION 2030=SMART CITY

- Vehicle Mass measuring.
- Pound and impounding of vehicles (of which the pound facility has to still meet specific required standards with phase1 thereof completed).
- Vehicle roadworthiness test (enforcement).
- Accident response, recording, and capturing after hours due to minimal staff compliment at cluster level.

5.6.2 Traffic Revenue Enhancement Streams

The following are the available revenue streams:

- Traffic fines (Dependent on Judiciary)
- Parking Management
 - On street parking (implementation thereof to commence on the 1st of October 2019).
 - Off street parking.
- By- law enforcement and vehicle impoundments.
- Licensing services.

5.6.3 Licensing Services

The following services are rendered on an agency basis on behalf of the Department of Transport (MOU entered in to with the said Department for a period of three years from **April 2018 to March 2021).**

- Registration and licensing of motor vehicles.
- Roadworthy tests on Vehicles.
- Applications and examining of learners and driving licenses.
- Authorizations to drive municipal motor vehicles.
- Applications for professional driving permits.
- Applications and testing of instructor certificates.
- Weighing of motor vehicles for tare determination and examine overloading on vehicles.

VISION 2030=SMART CITY

5.6.4 Computerised Learners Testing

The Municipality together with the Department of Transport implemented as a pilot project the use of Computerised Learners testing facility and it is currently yielding success in ensuring advanced technological direction in the fraternity.

5.6.5 Licensing Transactions over 12 Months Period

The tables below depict the licensing transactions over a period of 12 months in a particular specific financial year. The Information has been provided per Cluster; The codes are translated as Reflected Below:

TXN: Transaction code.

- 02: Vehicle Registration,
- **63**: Driving License Issue,
- 71: Learners License Issue;
- **42**: Roadworthy Certificate Issue.

5.6.6 Accidents Statistics Per Financial Years

The table below depicts yearly accident Statistics recorded within the City of Polokwane Municipality:

| Financial Year | Accidents Statistics |
|----------------|----------------------|
| 2011/12 | 2317 |
| 2012/13 | 1704 |

VISION 2030=SMART CITY

| Financial Year | Accidents Statistics |
|----------------|----------------------|
| 2013/14 | 1927 |
| 2014/15 | 1860 |
| 2015/16 | 1004 |
| 2016/17 | 1908 |
| 2017/18 | 1862 |
| 2018/19 | 1942 |

Source: Polokwane Traffic and Licensing SBU,2019

The above figure highlight only accidents with minor or no injuries and including minor damages on the affected vehicles. All accidents with fatalities are recorded and captured by The South African Police Services and including investigations thereof.

5.6.7 Challenges for Traffic and Licensing

- Current offices need structural refurbishments.
- The City Licenses facility experiences an influx of community members in dire' need for services of which the facility is inadequate to accommodate.
- Computer network is at major times off-line thus hampering services.
- The facility is situated in the periphery of the City thus too costly for community members to reach.
- Both Traffic and Licenses are congested within one building of which community members are at times under risks during traffic officer's operations.
- Inadequate parking facilities for both customers and employees.
- The SBU is under staffed thus services hampered and overtime budget strained.
- Inadequate specialized vehicles thus enabling easy access at congested areas and including enforcing of parking offences.
- Licenses Services Especially Vehicle tests stations, Vehicle pound yards etc. are centralized thus not accessible by communities from majority of rural villages.

VISION 2030=SMART CITY

5.6.8 Measures to address Challenges:

- Refurbishment of the current facility and including structural expansion.
- Decentralization of services including satellite stations at strategic areas (Rates hall, clusters and other service points thus accommodating "one stop shop" idea.
- New technological innovations including wireless, etc. thus relieving the current load on the conventional IT system.
- Satellite stations to cater for shorter travelling costs and time.
- Decentralization of Traffic services with licenses thus accommodating law enforcement operations.
- Whilst gearing towards being a Metro Municipality, gradually fund the newly approved positions on the recently approved Organogram thus avoiding pressure of reaching the targeted personnel number required for All services within Metro-Municipality.
- Procure specialized Vehicles such as Law Enforcement Motor-Bikes, adapted/specially made tow trucks for easy maneuvering during law enforcement operations.
- Decentralization of infrastructural facilities namely Vehicle Test yards, Vehicle pounds and other related at all clusters.

5.7. ENVIRONMENTAL HEALTH

Polokwane Municipality provides environmental health services only for the "City area". The Services in the other areas are done by the Capricorn District Municipality (CDM). There is no service level agreement entered into between the Polokwane Municipality and Capricorn District Municipality as it is a district function. The devolution process is not completed. The relocation of Environmental Health Services to the District Municipality will have a negative impact on Polokwane because of the different work activities and co-operation with other SBUs.

Services rendered are inter alia control and monitor of food premises, food control, food sampling, inspection of schools and pre-schools, inspection of accommodation establishments and air pollution control. The National Health Act 61/2003 sec 34 determine

VISION 2030=SMART CITY

that "until a service level agreement contemplated in sec 32(3) is concluded, municipalities must continue to provide, within the resources available to them, the health services that they were providing in the year before this act took effect ".

Although the above mentioned functions are executed, the authorization of Polokwane Municipality has been withdrawn according to Government Notice 37297 of 4 February 2014:

- Section 10(3)(b)-Authorization of Environmental Health Practitioners in writing
- Section 11-Powers, duties and functions of inspectors
- Section 24-Right to prosecute per provision of environmental health services in the municipal area is limited as the available practitioners do not meet set standards. The standards determine that there must be 1 x EHP per 15 000 populations. Currently there is a shortfall of 12 of employees compared to the standards to cover the whole population.

5.8 SPORTS AND RECREATION ANALYSIS

Sports and Recreation has the potential to serve as a tool for development as well as catalyst for social and personal change. It is also worth noting that sport and recreation builds stronger, healthier, happier and safer communities, a vehicle for positive social change. The priority of the municipality is to enhance participation in Sport and Recreation activities which include hosting of municipal, district, provincial, international Sports and Recreation events. The municipality also provides financial assistance to sport structures with the aim of attracting major events that will market the City as sporting hub and that have an impact on the local economy. The focus continues to be provision of sport equipment and grading of rural sport facilities, conducting sport and recreation programmes and maintenance of existing infrastructure.

Sports is used in promotion and marketing Polokwane through presenting major events in order to establish Polokwane as the sport hub of the Limpopo Province. The municipality continues to provide a marketing platform for the City through the hosting of the national sporting activities such as the premier league matches. The national event attracts TV coverage beyond the borders of the country, giving a glimpse into the sporting facilities that exist within our city.

The municipality has hosted other events that have directly benefitted the communities within the municipality like the Indigenous and Golden Games, the Mayoral Cluster Races, and the

VISION 2030=SMART CITY

Mayoral Road Race. Polokwane Mayoral Marathon has been classified as Comrade Marathon qualifier; we also hosted the Mayoral Cycle Race.

The Municipality coordinates programmes that are aimed at raising funds for charity and providing bursaries for needy community members by hosting the Mayoral Charity Golf day and the Annual Road Race. Through partnership with the sponsors, the municipality continue to raise monies which are funding bursaries for needy students from Polokwane. There is hope to continue amassing sponsorship that would make it possible to spread beneficiation to a far greater audience than what is being reached at the moment.

The municipality continuously promotes sport by hosting municipal cluster marathons, indigenous and golden games. These are hosted at ward to cluster level and finally municipal level. Holiday programmes are presented to the community during the school holidays to ensure that children who are on holiday spend quality time.

Polokwane Municipality has launched a programme that is Polokwane Mayoral Football and Netball tournament which is running from ward, cluster and lastly at the municipal level. The main aim is to enhance talent identification while promoting Sport in the municipality. Polokwane Municipality will continue to strive to be a winning team in promoting Social Cohesion. The municipality continues to fulfil the constitutional mandate of social cohesion by actively maintaining facilities and bringing major events to such through the Directorate Community Services.

These events not only give access to the multitude of participants, but they generally contribute to economic growth of the City. Events and facilities are deliberately used to empower disadvantaged communities and individuals, providing them access to schooling, recreational activities as well. The notion of Sport and Tourism should be looked at quite seriously and deliberate programmes to be packaged in conjunction with other relevant stakeholders in the Economic cluster. The hosting of national and international games should provide an impetus to investors and role players in the hospitality and tourism sector to want to partner more and more as such programme would be proving to be catalysts for the business growths. Polokwane Municipality also conduct skills development and capacity building workshops through federations for various sporting codes.

5.8.1 Municipal Swimming Pools

Municipality has several Swimming Pools within its area.ie City **CBD** Swimming Pool, **Seshego** Swimming Pool, **Westernburg** Swimming Pool.

5.8.2 New Peter Mokaba Stadium

The new Peter **Mokaba Stadium** is one of the five stadiums that was constructed to host the 2010 FIFA World Cup in South Africa. It was built next to the old Peter Mokaba Stadium and is currently being used for all types of events over and above Soccer, Rugby and meetings. Already the venue is popular for school tours, hosting of lifestyle activities and offices.

Peter Mokaba Stadium holds much historical significance in South Africa. It was named after one of the renowned sons of the struggle and emancipation of South Africa against the apartheid regime. **Peter Mokaba** was born and bred in Polokwane and was renowned for his fighting spirit and for his inspirational leadership

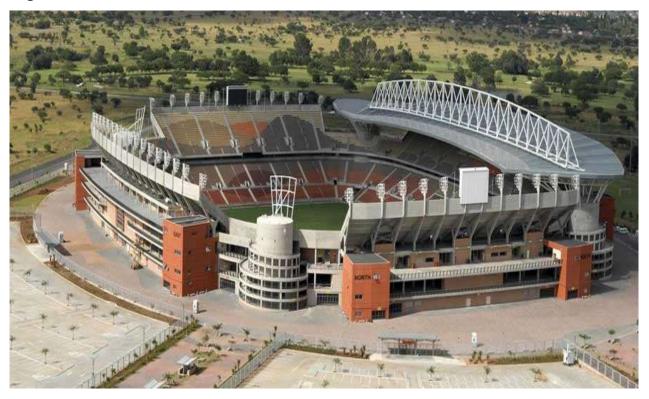

Although the Peter Mokaba Stadium was built with a capacity for **45 000** spectators, this was reduced to **41 700** for the World Cup. Interestingly, the stadium's design was inspired by the **baobab tree**, which is often said to look like it is upside down, with its roots emerging out of the ground and reaching for the sky. The stadium's steel structure gathers together at each corner of the stadium and is supported by structures that resemble massive tree trunks.

There is a VIP area that accommodates up to **500 VIPs**, a VIP reception area and lounge, as well as offices and storage areas. The stadium is less than five kilometres from the City centre of Polokwane. This area boasts a number of other sights and activities; including the Polokwane Museum, Polokwane Bird and Reptile Park.

The new and old Peter Mokaba Stadium host two Premier Soccer League teams in the Limpopo Province, namely **Baroka FC** and **Polokwane City FC**. A number of major events have been hosted at the two venues, including Rugby matches, weddings, conferences, political rallies, IEC centre during elections, religious gatherings and meetings.

VISION 2030=SMART CITY

Figure: New Peter Mokaba Stadium

5.9 CULTURAL SERVICES AND LIBRARIES

5.9.1 Cultural Services Analysis

The provision of cultural services is an important function of Polokwane Municipality in supporting social cohesion and promoting Local Economic Development through thriving cultural industries. The Municipality is responsible for libraries, museums, heritage and cultural programs – Promotion of Reading (Libraries); Promotion, Management and Conservation of Heritage Resources (Museums) and Presentation of Cultural Programs (Cultural Desk).

5.9.2 Libraries Analysis

The Municipality renders a flagship library service in the CBD (City Library) and operate branch libraries in Mankweng, Matlala, Moletjie, Nirvana, Seshego and Westernburg. The Municipality provide library materials on Ioan to Polokwane Place of Safety's resource centre, Siloe School for the Blind and three old age homes.

VISION 2030=SMART CITY

The Provincial Department of Sport, Arts and Culture (DSAC) provided a library at Molepo area which is operated jointly by Polokwane Municipality and DSAC. Part of the Molepo-Chuene-Maja cluster office has been converted for library purposes but is not yet operational.

5.9.2 Available Services at Municipal Libraries

The Polokwane Municipal Libraries renders information service to the community and provides reading materials for a variety of purposes, e.g. education and cultural development, self-improvement and recreation. In order to promote and cultivate a culture of reading, the libraries section actively engages with the community through various "outreach" programs. The following are the core functions:

- Provision of information: The Reference & Study section of the libraries are frequented by users from various parts of the province. User groups are tertiary students; secondary learners doing research for school projects; smaller children and their parents; persons requiring information to enhance their general knowledge and to improve their personal circumstances.
- 2) Books for informal reading: Municipal Libraries provide a variety of materials suitable for informal/leisure reading. One improves his/her reading skills by consistently engaging in reading. The libraries provide books for self-development and cultural development.
- 3) Circulation service: Circulation of books remains an integral part of every library's services. While anybody may read as much as they can free of charge inside the libraries, a borrower of books must enrol as a library member (prescribed rules& subject to payment of the relevant fees) before being allowed to borrow library material for home use.
- 4) Provision of study space: Library users are in need of space to study, the environment of such space should be conducive for studies calling for good lighting levels, good ventilation, etc. The libraries made study areas available to accommodate daily visitors, allowing them the use all books in the library. This is a growing need in our libraries. There are also requests for after-hours utilisation of study areas which we try to provide during peak times.
- 5) Internet and Wi-Fi: The libraries currently offer a limited number of Internet connections to users to aid learners, students and upcoming entrepreneurs. A connection is free for one hour per day and is sponsored by the "Conditional Grant for Public Libraries" Free Wi-Fi is limited to the study section of the City Library, but covers branch libraries entirely. The Mzansi Libraries On-line project, initiated by the National Library of South Africa, promises relief with extra ITC equipment to be provided to some of our libraries. As mentioned by the EM in her SOCA the office of the Premier is also providing Free Wi-Fi (LCX Public Wi-Fi)

VISION 2030=SMART CITY

- 6) **Technological Aids:** To render distribution of information effectively all service points have dependable photocopiers/reprographic resources. The libraries offer photocopying at cost to users. All our libraries equipped with 3M Book Detection systems to ensure that patrons borrow books legitimately.
- 7) Library Outreach and awareness programs: The municipal libraries continuously present holiday programs, conduct outreach to schools to inform learners about libraries, assist in establishing reading clubs and provide library orientation for new user's /school groups. Municipal libraries support the celebration of National events like South African Library Week (SALW) and National Book Week in order to promote the use of libraries and reading. Our libraries facilitate and host in the annual Executive Mayor's debating tournament.

5.9.3 Library Challenges

High Vacancies:

The large number of vacancies, not filled for a long time, as well as positions provided on the organogram but not budgeted for, is detrimental to the upkeep of service standards. It also generates a lot of unhappiness as staff feels exploited and overworked.

Grading of library staff:

The current grading of qualified librarians (who holds a four-year degree) on levels lower than posts that require a three-year degree or even only a diploma is a justified complaint amongst library staff.

Library hours disputed:

All Polokwane libraries are open to the public beyond ordinary office hours. Summer hours are **08:00 to 18:00** on weekdays, winter hours **08:00 to 17:00** on weekdays and always up to **13:00** on Saturdays. While this practice serves community needs it calls for extended working hours. Library staff is willing to work these hours, but calls for overtime or other compensation. The current overtime budget will have to be adjusted upwards, should Council agree that library staff be re-classified as five day workers.

User fees:

The current policy regarding user fees should be revisited. Statistics on membership numbers (new as well as existing) indicates that our numbers do not meet targets due to the fact that many users prefer to visit the library to do the reading at the library instead of paying for membership which allows the user to use the reading material at home. Benchmarking amongst other municipal libraries indicates that Polokwane remain as one of few municipalities that still impose membership fees. The amount of monies collected also does not justify the risk involved in handling and transporting said income.

Book stock development:

The current book collection can be regarded as stale, outdated and irrelevant. Library book stock needs constant replenishment and updating in order to provide in the informational and

VISION 2030=SMART CITY

educational needs of the community. Every library should have an up to date, well balanced, representative and relevant book collection to give library users the best possible resources that will enable them to excel. Due to escalating publishers' prices our limited budget barely allows for maintenance. Additional funds required to provide books for envisaged new libraries.

No library expansion program:

Interpretations of the so called "Unfunded Mandate" is hampering the expansion and rendering of library services in Polokwane. Rural areas where people need to travel great distances to reach the nearest library are affected, contributing to poor performance at school. Areas identified in earlier IDP documents should be prioritized. Alternative forms of accommodation, (for example modular- and container libraries) should be considered for satellite libraries.

The existing City Library's position in the CBD is not ideal for library purposes. No parent will allow his child to face the traffic in order to visit the library for leisure reading. Insufficient parking makes it even difficult to bring him by car. Transport costs/availability is also a limiting factor for users that use public transport. In addition, the building can't easily be extended to accommodate the ever-increasing number of users. Council, or DSAC, will have to investigate the development of a new city library, maybe as part of a larger "**Cultural Precinct**".

It is important that in order to guide library development and align it with developmental goals, a library master plan be developed. Such a plan should be aligned with the IDP in order to provide services where communities prioritize the need for library services.

ITC and connectivity:

While Internet access and Wi-Fi can aid library services all remote locations experience various IT related problems, where slowness/lack of bandwidth is hampering service delivery.

Inter-Governmental Relations:

Limited assistance to fund libraries is being received from the Limpopo Department of Sports Arts and Culture through the "Conditional Grant" allocations. Needs related to books, equipment, ITC, personnel and maintenance is communicated to DSAC on a regular basis. The "partnership" between the department and municipalities leans to favour municipalities that can't afford to render services.

Status of library buildings:

Existing library buildings can be regarded as functional. There are challenges regarding ventilation, lighting levels, floor finishes, roof leakages. In almost all cases library usage exceeds expectations/projections at the planning stage. Library facilities are unable to cope with inflow of students during peak and exam times.

Interventions:

Staff matters

• HR/Council to address staff related challenges v/s service delivery.

VISION 2030=SMART CITY

User fees

• Council to take a decision about the abolishment of library membership fees, and introduce measures that will ensure the well-being of the municipal book collection in accordance with GRAP 17.

Library expansion

- Find sources for funding of new library infrastructure e.g. IUDG in order to provide branch libraries. Identify existing infrastructure in clusters that may be converted for library use. Invest in a mobile library service that can visit and utilize the new one-stop-service centres.
- Provide new City Library as part of Cultural Precinct in partnership with Limpopo DSAC.
- Prioritize funds for a Library master plan.
- Council to increase the allocation for maintenance and repairs of existing library infrastructure.
- Council to approve a program to replace at least one 3M Tattle Tape book detection system per year and to maintain others.

Book stock development

• Council to commit sufficient funding to renew and expand the library's book collection. The procedure of asset control of damaged, outdated and lost books should be revisited.

ITC and connectivity

• To address network problems, slow connection, insufficient licenses for Papyrus software.

Inter-governmental relations

 SLA between Polokwane Municipality and Limpopo DSAC to be finalized and signed off.

5.9.4 Museums Analysis

The aim is development of museums and heritage through research; collection; education; protection and conservation

Objectives of the Museum

- Upgrade all existing museum exhibitions to acceptable modernized standards, representative of all communities.
- Upgrade collection and its management systems.
- Undertake heritage studies to eventually include the whole municipal area and to develop Cultural Resources Management plans (CRMP) for areas identified as heritage sites.
- Engage museums in extensive research in an effort to accumulate data that will be necessary for the development and up-keeping of museum norms and standards.

VISION 2030=SMART CITY

- Engage the museums in aggressive collection of objects that are worthy/necessary for research, exhibition and conservation.
- Ensure proper conservation of museum collections as well as heritage sites.
- Upgrade infrastructure and amenities at museums and other heritage sites.
- Undertake museum related research and collection of specific books to enhance available information to public and academics.
- Be involved in internship programs related to museums, tourism and heritage related services;
- Equip museum staff with necessary knowledge relevant to the sector (museums)
- Engage in outreach programs to schools in an effort to promote museums.
- Engage in job creation through EPWP program.
- Take part in the Local Geographic Naming of Polokwane Municipality.
- Steer and take lead in directing the future of the vulnerable state of public statues and heritage in general, through the newly established heritage committee.

5.9.5 Bakone Malapa Open-air Museum

Bakone Malapa is regarded as a living museum, the Bakone Malapa Northern Sotho Open-Air Museum is one of several museums and national monuments that bear testimony to South Africa's peoples. It is an Open-air Museum, where tribesmen practise long-standing traditions to enlighten visitors about the traditions of Africa's people,

Bakone Malapa is a reconstructed village in the style used by the northern Sotho about 250 years ago designed to demonstrate the daily life of the Bakone, a highly sophisticated subgroup of the northern Sotho tribe.

The cultural village includes two homesteads or lapas that display and explain fire making, maize grinding and beer brewing as they would have been carried out years ago. There are also handcraft demonstrations that include pottery, basketry and bead work and most of these locally-made crafts are then sold from the local craft shop.

The guides are excellent story tellers and the village's architectural and cultural styles come alive through their eyes as they take one through the village's traditional way of life. the museum is more than a cultural village alone. There is a bird sanctuary, a game reserve, hiking trails and outdoor recreation areas

VISION 2030=SMART CITY

Bakone Malapa Open-air Museum

There are other 3 museums that are located within the City i.e

- 1. **Irish House Museum-** A cultural history museum where history and culture of people within Polokwane; Limpopo and beyond is exhibited. An exhibition budget has been put in place and currently the project is being executed to change the one currently on show.
- 2. **Hugh Exton photographic Museum** a museum of photography which contains a collection of the renowned photographer Hugh Exton who captured more than twenty thousand photographs on glass negatives
- 3. **Polokwane Art museum** a museum of art where painting, works on wood and sculptures are housed and maintained/conserved.

5.9.6 Heritage Sites Analysis

The museum services are also responsible for the management of heritage sites within Polokwane Municipality. The best known heritage sites are Eersteling, Marabastad and the Concentration camp-sites. Other heritage sites that have been identified by means of surveys are Moletjie heritage site (Rock Art) and Mothapo rock art site and it is planned to study them further for tourism development purposes.

Overall survey of heritage sites at Moletjie and Maja Chuene has been completed but detailed studies still need to be done. Excavation of a heritage site at Moletjie Ga-Legodi has been done. A conservation Management Plan needs to be done, which will include the Rock Art Site in this area. Heritage sites at Ga-Dikgale have been completed recently and therefore detailed studies are awaited. Specific site study of the site at Mothapo has been identified to be made. Heritage Sites have been identified in part within the newly incorporated areas of Aganang such as Percy Fyfe Nature Reserve to mention one. The museums continue to comment on structural demolition applications for developmental purposes.

Challenges:

Vacancies:

The large number of vacancies, not filled for a long time, as well as positions provided in the organogram but not budgeted for, is detrimental to the upkeep of service standards. It also generates a lot of unhappiness as staff feels exploited and overworked.

Budget is always a problem for the development of museums to fully function. Museums budget is always given low preference and the museums are expected to attract visitors to Polokwane as a Centre Hub and a Gateway to Africa. The absence or low budget cannot

VISION 2030=SMART CITY

afford to draw new museum audience and therefore additional allocation of funds is necessity for continuous visit to the museums.

The status of public Art is not earning full enjoyment as far as municipal holistic budget allocation is concerned. The museums are unable to render preservation as well conservation of public art due to either lack of budget or public consultation. The transformation of Industrial Art Park into a business site will ultimately lead to compromise into the City's public art space. Although progress is already at an advanced stage, the relocation of these works of art will need to be properly taken into consideration and have to be under strict care of art expert.

5.9 .7 Cultural Desk

There are cultural programs aimed at developing cultural practitioners, promoting social cohesion among the citizens of Polokwane Municipality and in developing sustainable cultural industries that will contribute meaningfully into the local economy. Important stakeholders/beneficiaries of the cultural programs are mostly young artists, school children and vulnerable such as children in places of safety/care, the aged and people in incarceration.

The following are key programs within the Cultural Desk: Cultural Competitions; Holiday Program, Mayor's Debate Tournament, Outreach Programs and Annual Polokwane Literary Fair

- 1. Cultural Competitions take place in all the clusters culminating in Municipal Finals. They include poetry, storytelling, stand-up comedy, drama, music and dance. There is a standardized financial reward for winners in each category.
- 2. Holiday Program is held once a year on a chosen public holiday. It sees children and senior citizens coming together to share in music, dance and Indigenous Knowledge Systems. It is aimed at promoting social cohesion among different age groups/generations.
- 3. Mayoral debate tournament is aimed at providing youth with requisite debating skills as well as sharpening their minds through research that is done in preparation for the debate.
- 4. Outreach Programs are a crosscutting function within Cultural Services SBU that seeks to connect municipality with its stakeholders through planned visits to their places of operation.
- 5. Annual Polokwane Literary Fair is held every September in collaboration with stakeholders such as National Book Week. It is a platform created especially for literary artists such as writers, poets and storytellers. It consists of skills workshops, poetry performances and various conversation platforms.

Challenges

An added function to Cultural Desk is the Polokwane Municipal Choir which was established some years ago and needs some financial support to assist their development such as attire and basic musical instruments.

VISION 2030=SMART CITY

Cultural organizations indicate that much needs to be done to stimulate culture in the province and those local artists should be provided the opportunity to develop through the provision of a theatre and other suitable venues.

Venues under Cultural Services such as the Library Auditorium and activities rooms are used extensively and there is a high demand for the free use of facilities by Cultural organizations which currently can only be granted use free of charge subject to certain conditions, during the week (up to Thursday) for one occasion. A delicate balance will have to be found between the need for free allocation of venues under certain circumstances to cultural organizations and income generation for the municipality from such facilities. Costs to maintain such facilities inclusive of overtime are very high and some facilities such as the Library Auditorium consistently need upgrading. There is also a dire need for the development of a policy and guidelines at provincial level for financial assistance towards cultural organizations for presentation of cultural events especially those aiming to promote and develop culture.

Facilities for the development of culture in general such as a theatre and workshop venues catering for art development.

CHAPTER Six-Financial Analysis

6.1. FINANCIAL MANAGEMENT AND VIABILITY

6.1.1 Revenue Management

The municipality derives revenue through rendering services as mandated through the Constitution of the Republic of South Africa, Municipal Finance Management Act (MFMA) and other related regulations. Municipal revenue comprises of own revenue as well as grants from the national government. Own revenue contributes 55% of total revenue.

The municipality's main sources of own revenue are as follows:

- 1. Property Rates;
- 2. Electricity,
- 3. Water and sewerage,
- 4. Refuse
- 5. Other income such as rental of property and traffic fines.

The municipality's own revenue across the board has increased by an average of 12% in the year under review. All the grants from the national government is dealt with in terms of the requirement of Division of Revenue Act (DoRA) and management of own revenue is dealt with in terms of the MFMA. The municipality also applies its indigent policy to cater for the indigent population within its jurisdiction

Two key revenue enhancement initiatives have been introduced namely the replacement of AC pipes and the smart metering project. The replacement of AC pipes will ensure that, water losses are substantially minimized. This will ensure that more water is available for future developments and therefore contributing more to revenue billing and collections.

The smart metering project entails the installation of pre-paid water and electricity meters to all non-high power consumers. This will ensure 100% cash backed pre-billing from electricity and water consumption per consumer. The municipality will also be performing monthly monitoring as a measure to identify and prevent illegal connections and breaching. In addition, a specific support centre will be established to ensure that any concerns of the consumer are timely addressed.

VISION 2030=SMART CITY

6.1.2 Status on Revenue Management

Averaged **95%** on collections for the last financial year. Pre-paid billings both on electricity and water sales contributed around **R84 million** in advance cash and a reduction in electricity distribution losses of around **R58 million**.

Approximately only 4000 accounts remain on conventional electricity meters whilst the rest of the accounts are on prepaid electricity. Out of the approximate **30 000 pre-paid water meters** installed around **10 000** meters have been converted to prepaid and is ongoing on a monthly basis averaging **1200** conversions a month \rightarrow pre-paid sales average around **R1.6 million** per month and growing by about **25%** per month as the conversions take place.

6.1.3Key Challenges Revenue Management

Bridging of meters. Low fine on by-laws of **R12 500** and a low 20% re-connection payment fee on outstanding balance. "Private" individuals assisting consumers on tempering meter consumptions and therefore lesser revenue flow.

Poor economy \rightarrow consumers choose to remain in the dark until pay day. Flat batteries on water meters \rightarrow frustrations although only 4% of total installed meters were problematic .

Mankweng debt book of around R300 million \rightarrow 25% of total debtor's book. Total debt book close to <u>R1.3 billion</u> with government debt around R130 million. Data cleansing \rightarrow small portion of wrong accounts cut off (20 out 1400 cut offs \rightarrow 1.4%).

| No | Challenge | Intervention |
|----|---|---|
| 1 | Bridging of meters. | Weekly inspections by credit control. Use of Cigicell reports for low purchases and the usage tracking for high users. |
| 2 | Low fine on by-laws of R12 500 and a low 20% re- connection payment fee outstanding balance. | To table a report to council on increasing the fine and reconnection thresholds - work on progress. |
| 3 | Private individuals tempering meters. | Separate law enforcement unit to specifically monitor breaching on daily basis. |
| 4 | Poor economy . | Possible incentives to be tabled to Council. |
| 5 | Flat batteries . | Potential problematic meters from the initial batch are been replaced – 4 971 meters replaced so far in addition to those reported. |

6.1.4 Interventions Revenue Management

VISION 2030=SMART CITY

| No | Challenge | Intervention |
|----|---------------------------------------|---|
| 6 | Mankweng debt book of R300 million. | Business cut offs done and installation of smart meters (Grant funded). |
| 7 | Government debt book of R130 million. | Consistent cut off and discussions with Treasury on paying advances. |

6.2 Billing System

6.2.1 Munsoft New Financial System

Munsoft is the new financial system will in the near future introduce an online citizen portal that will enable citizens to view statements and even pay their municipal bill online. The Municipality is exploring other interactive mobile apps that are cost effective to enhance this experience.

The Municipality has now concluded connecting most of the satellite offices to the internet and the network and residents in areas like Seshego, Sebayeng and Mankweng will no longer have to come to town to check and pay for their accounts. Outstanding satellite offices which are in the Moletji, Aganang, and Molepo Chuene Maja clusters will be connected before the end of 2019.

The Municipality is exploring solutions on Wi-Fi installation in the rural and urban areas at critical hotspots such as schools and libraries and others so that children in those areas can be able to access the global community. Soon the municipality will be inviting service providers in the area of Wi-Fi connection. The municipality continues to explore smart innovation towards service delivery in order to improve the experience of the residents when interacting with the municipality.

6.2.2 Smart Meter Programme

This project was initiated due to the City of Polokwane experiencing massive losses and negative cash flows emanating from water and electricity sales.

VISION 2030=SMART CITY

In an effort to increase and maintain the revenue base, the smart metering project was considered, through a detailed feasibility study, as an adequate model to ensure financial viability and sustainability for the City, the Smart Meter Programme Project commenced in **August 2017.**The Municipality has since appointed a service Provider to install Smart Meters. Up to date a total of **23 271** water Meters has been installed and a total of **8026** Prepaid electricity meters installed

| PHASE | DESCRIPTION | OVERVIEW | | | | |
|--------------|---|---------------------------|--|--|--|--|
| Phase 1 | Undertake the replacement of the bulk infrastructure. AC Pipe project at a This is currently being undertaken via the AC Pipes advanced stage whic Project as part of the overall revenue enhancement is complementing th project. | | | | | |
| Phase 2 | By exception replace the metering equipment with smart/prepaid meters. This Project commencing with the retrofitting of 17 000 faulty meters and a blanket replacement / installation of 7000 water meters in the Mankweng area. (Phase Total = 25000). | Completed. | | | | |
| Phase 3 | Review the revenue management structure and apply the same principles as per electricity for 14 000 electricity meters. | Advanced stage . | | | | |
| Phase 4 | To replace all conventional water (Phase Total = 42000) meters to smart prepaid. Blanket installations per area is to be updated as per stakeholder agreements. | Entering into this phase. | | | | |
| *Total water | meters to be replaced = 67000 | | | | | |

6.2.3 Objectives Smart Meter Programme

The City has applied for **R50 million** to the DWA for the purchase and installation of water meters – to cover the backlog. The City is in discussion with service providers on a financing model (e.g. entering to a model that replaces older prepaid meters).

VISION 2030=SMART CITY

6.2.4 Access to Properties Challenges

If the municipality is unable to read the account due to locked Gates, Dogs or Faulty Meters, an estimation on accounts are being done for that specific Months. Clients are encouraged to grant access to the meter readers to read their meter at all reasonable times, or to contact the municipality for alternative arrangements for reading. It is important that the meters are read monthly to avoid inflated usage that will attract the upper block tariff. The municipality adopted inclining block tariff which means if one consumes more, one would be charged with the upper block tariff. As indicated, the smart metering project is eliminating this challenge.

6.2.5 Surcharge on Water Consumption.

Water is a scarce resource as such residents are encouraged to safe water. Residential households are still encouraged to use up to 20kl per month. However, Council has adopted a resolution of which waved surcharges previously billed on the accounts.

Surcharges levied on accounts for the 2017/2018 financial years will be reversed as per the above Council resolution.

6.2.6 Account Overcharged

The municipality has and is correcting all accounts found to be overcharged. Clients who believe that their accounts are overcharged are requested to submit evidence or to report to the municipality for investigation, and correction of any incorrect billing.

6.2.7 Statements/ Monthly Invoices

Accounts are being issued on a monthly basis. Ratepayers not receiving their accounts are encouraged to come forward to update their records. However, with the implementation of the **MMS e-statements**, only consumers not receiving MMS will be sent paper invoice via postage. However, consumer has the right to opt out of the MMS and receive the ordinary tax invoice. The municipality continues to explore other convenient means to ensure consumers are conveniently invoiced.

Customers are encouraged to use the self-service, to view the website of the Municipality at <u>www.polokwane.gov.za</u> and use the icon city customers, my account and follow the registration process.

VISION 2030=SMART CITY

6.2.8 Payment of Accounts Facilities

Accounts can be paid at the Cashiers in the Civic Centre, Zone 1, Zone 3, Zone 4, Mankweng in Zone 1 and 3, and Sebayeng offices.

Customers can pay at Checkers, Pick & Pay, Shoprite, Woolworths, Spar, Boxer and at the Post Office. Electronic payments are also encouraged.

6.2.9 Unallocated Deposits / Payment

Some of the municipal customers are paying directly into Municipal accounts but they do not reference their accounts correctly. Proof of payment must be sent to the municipality. Each time the invoice is sent to the customer, the amount paid will reflect on the account and the amount due will be reduced by amount paid. Customers should report to the municipality regarding all payments not reflecting on their account after payments are made.

6.3. Budget Related Policies

In terms of governing legislation, the municipality is required to develop and implement rates and tariff policies or by-laws to guide the revenue management of the municipality. The following budget related policies have been approved and adopted by council.

- Borrowing policy
- Petty cash policy
- Budget policy
- Funding and reserves policy
- Indigent policy
- Banking & investment policy
- Supply chain Management policy
- Credit control and Debt collection policy
- Customer Care Policy
- Tariff policy
- Rates policy
- Subsistence & Travel Policy
- Leave Policy
- Virement policy
- Asset Management Policy

VISION 2030=SMART CITY

6.4 Expenditure Management

6.4.1 Expenditure Management Status Quo

All conditional grants maintained in a separate bank account and not used in normal operations. No double payments.

Salaries and Eskom bills paid promptly. Roll overs are cash backed in terms of National Treasury circular 94 - cash in bank and investments amounted to R184 million which exceeds the roll over request for R113 million.Cost containment regulations effective 30 September 2019 \rightarrow new policy is in progress.

6.4.2 Arears Affected by Cost Containment Regulations

The following areas has been affected by Cost Containment Regulations, i.e.

- Accommodation and travel
- Conferences/events and limitation on number of persons attending
- Catering
- Use of consultants
- Communication
- Sponsorships

6.4.3 Challenges Expenditure Management

- Payment not done in 30 days.
- Invoices submitted late to Finance.
- Expenditure incurred at very fast pace → more than the capacity of revenue earned from debtors.
- Eskom bill in excess of R103 million from R75 to R80 million per month.

6.4.4 Intervention Expenditure Management

| No | Challenge | Intervention |
|----|-----------------------------------|---|
| 1 | Payment within 30 days | Monthly cash flow to be submitted to all SBUs SBUs are not allowed to exceed the allocation for that month. |
| 2 | Invoice submitted late to Finance | Munsoft requires Managers to authorise/submit invoices on the system. |

VISION 2030=SMART CITY

| No | Challenge | Intervention |
|----|--|---|
| 3 | Expenditure incurred at very fast pace → more than the capacity of revenue earned from debtors | Monthly cash flow to be submitted to all SBUs. SBUs are not allowed to exceed the allocation for that month . |
| 4 | Eskom bill exceeding R103 million | Finalising the power bank feasibility . |

6.5 Investments Measures

The municipality is implementing stringent investment measures to ensure financial sustainable and all the investment are made in line with the investment policy. Grants are always cashed backed throughout the year. Municipality usually invests in risk free asset portfolios.

The municipality has an established sinking fund to repay future long-term debt on AC Pipes. The premium on the sinking fund will also be ring-fenced for the purpose of maintenance on water related infrastructure. The fund is being invested at CPIX + guaranteed 5%. The capital of the sinking fund is also guaranteed.

6.6 Asset Management

The municipality has established asset management unit which is now fully functional. Currently the unit is responsible to oversee the assets with a total value of 10 billion at net book value. The municipal asset register has the following key components;

- 1. Investment property
- 2. Community and infrastructure assets;
- 3. Movable assets;
- 4. Finance lease assets;
- 5. Biological assets;
- 6. Heritage assets;
- 7. Library books;
- 8. Land
- 9. And other assets.

VISION 2030=SMART CITY

Municipality makes hybrid method to account for municipal assets and verification of assets is performed ongoing basis. Assets are recorded either at fair value, cost or depreciated replacement cost.

6.6.1 Asset Management Plans

Polokwane Municipality is currently developing the wide comprehensive infrastructure asset management plans. This includes comprehensive built environment data base with analysis and predictive capacity, in support of service delivery assessments, integrated planning, strategic planning and implementation monitoring

Asset management plans (AMPs) for infrastructure and community services encompassing:

- Water and sanitation;
- Electricity;
- Roads and storm water
- Solid waste; and
- Community services.
- Water and sanitation;
- Electricity;
- Roads and storm water;
- Solid waste; and
- Community services.

6.7. DEBTORS MANAGEMENT

Mankweng debt book of around R300 million (25%) of total debtor's book. Total debt book close to <u>R1.3 billion</u> with government debt around R130 million. Data cleansing \rightarrow small portion of wrong accounts cut off (20 out 1400 cut offs \rightarrow 1.4%).

A total of seven debt collectors and two credit control companies are being appointed to assist with debt collection and credit control. A cost recovery service provider was appointed to address the public concerns. Community and stakeholder engagements in Mankweng are in progress

As discussed above, the smart metering project will be the **key catalytic** intervention that will assist in recovering arrear accounts. The draft revenue recovery plan is based on a 60/40 principle whereby all consumption/purchased for a month will be allocated at 60% for current

VISION 2030=SMART CITY

consumption and 40% will be allocated on the arrears. Water meters only. Furthermore, consumers will be categorized under certain levels depending on the amount of debt whereupon a payment structure will be developed. For example, if a consumer is owing above R100 000, will be required to pay a 20% upfront payment before activating his/her token or meter for purchases. The above approach will ensure that the majority of the debt is realised within 12 months.

6.8. CASH FLOW

Cash flow is monitored on an ongoing basis to ensure financial sustainability while at the same stringent budgetary system is being applied. Municipality makes cash flow projects based on realistic revenue to be collected against the planned expenditure to be incurred. It practices of municipality to have positive cash flow at the end of each month.

Municipality has met all its obligations throughout the year due stringent cash flow management and the municipality budget is cashed backed and credible. Municipality is work hard to ensure free cash flow as part of future funding strategy.

Further, the Office of the Chief Financial Officer has made the capital budget (both own and grant funded) VAT inclusive as opposed to the previous financial years. This will prevent the strain on the cash flows that would be required to fund the VAT payable to SARS until it is recovered. The VAT receivable in this approach will be directly invested in to a reserve account to ensure that the municipality is always cash backed and financially stable.

| FINANCIAL YEAR | AUDIT OUTCOME |
|----------------|-----------------------------------|
| 2008/2009 | Unqualified |
| 2009/2010 | Qualified |
| 2010/2011 | Qualified |
| 2011/2012 | Disclaimer |
| 2012/2013 | Disclaimer |
| 2013/2014 | Qualified |
| 2014/2015 | Unqualified (Matters of Emphasis) |
| 2015/2016 | Unqualified (Matters of Emphasis) |

6.9. AUDIT OUTCOMES

VISION 2030=SMART CITY

| FINANCIAL YEAR | AUDIT OUTCOME |
|----------------|-------------------------|
| 2016/2017 | Qualified |
| 2017/2018 | Qualified |
| 2018/2019 | A.G Report not released |

6.10 FINANCIAL SUSTAINABILITY

It has been recognized that the well-managed physical development of the municipal precinct and the sustainable provision of infrastructural and social services to the citizenry of Polokwane Municipality, both depend to a large degree on the efficiency of the municipality as an institution, as well as its financial viability.

Repairs and maintenance becomes fundamental to financial sustainability. All revenue generating assets have to be maintained and refurbished all the time to continue rendering the requisite services and yielding the revenue required to continue as a going concern. To this end the municipality has continued to set aside more and more resources both operational and capital to ensure that the assets are in a good state.

One of the processes the municipality embarked on as part of the turnaround was to develop a turnaround strategy striving to reduce costs and enhance revenue. Specific areas were targeted for budget reduction and streamlining. Luxury spending and unplanned spending was discouraged. Certain measures have been put in place to improve the management of revenue and collection thereof. In general municipality is working hard to ensure full compliance to circular 70 of the MFMA issued by National Treasury.

6.11 SUPPLY CHAIN MANAGEMENT POLICY (SCM)

The Polokwane Municipal Council adopted the Supply Chain Management Policy that was drafted in accordance with the requirements of the Local Government: Municipal Finance Management Act, No. 56 (MFMA), as well as the Municipal Supply Chain Management Regulations, Government Gazette Notice No. 868 of 2005.

Section 217 of the Constitution of the Republic of South Africa requires that when an organ of State contracts for goods and services, it must do so in accordance with a system which is fair, equitable, transparent, competitive and cost effective.

VISION 2030=SMART CITY

The Supply Chain Management Policy gives effect to these principles and the Preferential Procurement Legislation, and furthermore to comply with the provisions of the Local Government: Municipal Finance Management Act and its Regulations promulgated in terms thereof. The SCM policy has recently been reviewed and approved by Council to ensure that controls are tightened to combat fraud and corruption in procurement processes.

6.11.1 Supply Chain Committees

Chapter 11 of the MFMA compels the municipalities to establish Supply Chain Management Units and implement the SCM Policy, which gives effect to all SCM functional areas. The Supply Chain Management Unit has been established and operates under a direct supervision of the **Chief Financial Officer**.

Regulation 26 of the Municipal Supply Chain Management Regulations stipulates that a municipality's Supply Chain Management system must provide for a committee system for competitive bids consisting of at least a bid specification, bid evaluation and bid adjudication committee. The Municipality has established the following committees: -

- Bid Specification Committee;
- Bid Evaluation Committee and
- Bid Adjudication Committee.

Each Committee consists of a practitioner from Supply Chain Management and officials from key Directorates in the Municipality. The Accounting Officer is responsible for the appointment of bid committees and committees are appointed once a year and reviewed accordingly by the Accounting Officer. Although the chain of work of these Committees is intertwined, they operate separately from each other. All members of the Committees sign an Oath of Secrecy and Declaration of Interest to ensure that the bidding system is fair, transparency, openness and equitable.

Municipality has awarded 98% of the bids to the BBBEE compliant service providers as part of implementation of BBBEE legislation however the challenge remain on the category of empowerment insofar as disabled sector of society is concern. Currently municipality is advertising the tenders on the CSD as part of National Treasury initiative.

To curb irregular expenditure, the Office of the Chief Financial Officer has strengthened its compliance unit and developed a procurement checklist. The compliance officers verify whether all bids have been processes in accordance with the MFMA procurement regulations before been awarded. In the recent audit conducted by the Internal Audit unit, no irregular expenditure was identified since the introduction of these reforms.

VISION 2030=SMART CITY

6.11.2 Unauthorised, Irregular and Fruitless Expenditure

R3.5 million (last year R89 million) in irregular expenditure due to contracts appointed in the previous financial years. No new irregular expenditure was identified during the 2018/19 Financial year.

Checklist and capacitated compliance unit ensured adequate controls. No fruitless expenditure noted from City of Polokwane for the 2018/19 financial year. All unauthorised expenditures recorded are non-cash items (R489 million) and will be submitted to Council for write off as done so in the past financial years.

6.12 PUBLIC PRIVATE PARTNERSHIP (PPP)

Municipality is exploring various means of funding capital expenditure programme which have direct impact on optimizing balance sheet and revenue of the municipality. Below are the fundamental projects which are covered through alternative funding mechanism.

- Regional Waste water treatment plant –the feasibility study has been approved by council and the municipality will go out in tender in the second quarter of the financial year. Municipality received financial assistance through Project Development Facility and IIPSA as part of ensuring that the project is sustainable financially. The challenge remains the funding of the project since it is reliant on the private sector funding however the project is bankable from the financing point of view.DWS is also making contribution through the RBIG.
- Solar plant Park and Energy saving- Technical studies are underway at the cost of the service provider as part of reduction of Energy cost and this project will also be implemented along energy saving project.
- 3. **PICC** Off balance sheet project, feasibility completed procurement to commence in due course.
- 4. **Smart Metering** –Municipality is currently implementing the smart and intelligent solution in both the City cluster and Mankweng, the objective is to increase and protect the municipal revenue and improved customer care as well as financing the service delivery in sustainable manner.

Currently municipality is experiencing a challenges on water conservation and demand management hence the municipality will engage on the process of applying for additional grant support from DWS as part of strategy to replace all the old water meters.

VISION 2030=SMART CITY

Municipality will also replace all the conventional meters into prepaid meters while at the same business and government will priorities for smart meters on electricity. The projects for water and electricity meters as part of revenue enhancement are underway and the programme is expected to be completed in the next 36 months.

- 5. Land use and development projects BTO has been mandate to assist with the sustainability of PHA by ensuring that the various projects such as Social Housing ,GAP Market Housing and student market are implemented in an efficient manner within the ambit of the law and regulations, to date the municipality has finalized the Request for qualification and the process of identifying .The intention is to make PHA financially sustainable for 2020/2021 thereafter the municipality will to pump resources into PHA and the PHA will pay dividends to the City.
- 6. **Grant funding** Municipality is experiencing the challenges pertaining to funding of various key service delivery projects and programmes as stated in the IDP therefore the process of unlocking various grants on the risk of the service providers is underway, the tender has been issued to address these challenges.
- 7. **Municipal bonds** municipality will commission the study on how the municipality can finance projects such as roads, waste in sustainable manner.

6.12.1 Alternative Funding Model for Key Projects (PPP)

BTO still continues to support various department to prepare the Funding model to their projects in order to access funding in capital market, the following are the key projects which have been funded and finalized to and the projects are ready for implementation.

- 1. Social housing, GAP and student accommodations;
- 2. Solar energy park and power bank
- 3. Regional wastewater treatment plant
- 4. Mankweng wastewater treatment plant
- 5. Smart meters
- 6. Commercialization of properties,
- 7. Credit rating and bonds,
- 8. Self-insurance.
- 9. Grant sourcing

The municipality is in advance stage in implementing some of these projects however there is a need to capacitate employees for better understanding of this (PPP) program, this will speed up the level of project preparation and implementation.

VISION 2030=SMART CITY

6.13. VALUATION ROLL

The Municipality is currently at the end of the 2014 - 2019 valuation roll which has been effective from 1st July 2014. The Municipality has appointed a new Valuer for a period of 5 years. The contract was signed on the 26th of June 2018.

6.14 BUDGET REPORTING

AFS submitted to the AGSA on the 30[°] August 2019 as per section 126 of the MFMA. Successful migration to Munsoft \rightarrow data cleansing to be finalised within the next two months.

mSCOA complaint budget – The Municipality did not lose our equitable share. Normal transactions are on mSCOA format, mSCOA training is ongoing.

6.14.1. Municipal Regulations on a Standard of Charts of Accounts (MSCOA)

mSCOA stands for "standard chart of accounts" and provides a uniform and standardized financial transaction classification framework. Essentially this means that mSCOA prescribes the method (the how) and format (the look) that municipalities and their entities should use to record and classify all expenditure (capital and operating), revenue, assets, liabilities, equity, policy outcomes and legislative reporting. mSCOA is a "proudly South African" project researched by National Treasury based on municipal practices, reporting outcomes, policy implementation and review, etc.

mSCOA is multi-dimensional in nature

mSCOA is a business reform rather than a mere financial reform and requires multidimensional recording and reporting of every transaction across the following 7 segments

Background

Minister of Finance has, in terms of section 168 of the Local Government: Municipal Finance Management Act, 2003 (Act No.56 of 2003), and acting with the concurrence of the Minister of Cooperative Governance and Traditional Affairs gazetted the Municipal Regulations on Standard Chart of Accounts (mSCOA) into effect on 22 April 2014. Municipal SCOA provides a uniform and standardized financial transaction classification framework. Essentially this means that mSCOA prescribes the method (the how) and format (the look) that municipalities and their entities should use to record and classify all expenditure (capital and operating), revenue, assets and liabilities, policy outcomes and legislative reporting. This is done at transactional level and ensures that a municipality and its entities have minimum business

VISION 2030=SMART CITY

processes in place. This will result in an improved understanding of the role of local government in the broader national policy framework and linkage to other government functions.

The Regulations apply to all municipalities and municipal entities and indicate its applicability and relevance to each specific municipal environment while accommodating organizational uniqueness and structural differences. The Regulation provides for a three-year preparation and readiness window and all 278 municipalities had to be compliant to the mSCOA classification framework.

VISION 2030=SMART CITY

CHAPTER Seven - Good Governance and Public Participation

7.1. Performance Management System (PMS)

Chapter 6 of the Local Government: Municipal Systems Act makes provision for the establishment of the performance management system in municipalities. The establishment of the performance management system is meant to assist the municipalities to monitor, measure and evaluate its performance against its developmental targets that are set in the IDP. Polokwane Municipality has developed and adopted the Performance Management Framework that guides how performance needs to be undertaken in the municipality. Furthermore, the municipality has developed the Performance Management Policy that guides the day to day implementation, monitoring and evaluation of performance. The Policy is reviewed annually as part of the review of the budget related policies.

In order to ensure that performance management gets implemented at Polokwane, the organisational structure made provision of a Business Unit that should management performance. The organisational structure has four position and the breakdown of the positions are that of the Manager, Assistant Manager and two PMS Coordinators. Currently there is one vacancy of a PMS Coordinator and the position will be filled during the 2019/20 financial year.

In terms of performance reporting, the policy makes provision for quarterly reporting of performance. Performance reporting has been automated since 2016 and a web-based system is used to input, process and produce performance reports. Individual performance assessments are still at the level of senior managers; however, the PMS Policy makes provision for cascading to lower levels. The municipality is currently finalising the evaluation of all the positions and thereafter a phased-approach will be implemented to cascade performance starting with managers directly reporting to senior managers.

7.1.1. Audit of Performance Management Information

The Performance Management System Policy of the municipality makes provision for the auditing of the performance information. All the performance management reports are submitted to Internal Audit for verification and quality assurance. Audited performance management information are processed to Council through the Audit Committee. The Audit Committee Chairperson is responsible for presenting the reports in Council once the reports have served and are approved by the Audit Committee.

VISION 2030=SMART CITY

7.2 Integrated Development Plan (IDP)

7.2.1 Integrated Development Planning

Local Municipalities in South Africa have to use "*integrated development planning*" as a method to plan future development in their areas. Apartheid planning left us with cities and towns that:

- Have racially divided business and residential areas
- Are badly planned to cater for the poor with long travelling distances to work and poor access to business and other services.
- Have great differences in level of services between rich and poor areas
- Have sprawling informal settlements and spread out residential areas that make cheap service delivery difficult.

Rural areas were left underdeveloped and largely unserviced. The new approach to local government has to be developmental and aims to overcome the poor planning of the past.

Integrated Development Planning is an approach to planning that involves the entire municipality and its citizens in finding the best solutions to achieve good long-term development.

An Integrated Development Plan is a <u>super plan</u> for an area that gives an overall framework for development. It aims to co-ordinate the work of local and other spheres of government in a coherent plan to improve the quality of life for all the people living in an area. It should take into account the existing conditions and problems and resources available for development. The plan should look at economic and social development for the area as a whole. It must set a framework for how land should be used, what infrastructure and services are needed and how the environment should be protected

All municipalities have to produce an Integrated Development Plan (IDP). The municipality is responsible for the co-ordination of the IDP and must draw in other stakeholders in the area who can impact on and/or benefit from development in the area.

Once the IDP is drawn up, all municipal planning and projects should happen in terms of the IDP. The annual Council budget should be based on the IDP. Other government departments working in the area should take the IDP into account when making their own plans.

It should take **6 to 9 months** to develop an IDP. During this period service delivery and development continues. The IDP is reviewed every year and necessary changes can be made.

The IDP has a lifespan of 5 years that is linked directly to the term of office for local councillors. After every local government election, the new council has to decide on the future of the IDP. The Council can adopt the existing IDP or develop a new IDP that takes into consideration existing plans.

VISION 2030=SMART CITY

The Executive Mayor of the municipality have to manage the IDP Process. The Executive Mayor may assign this responsibility to the Municipal Manager.

The IDP has to be drawn up in consultation with forums and stakeholders. The final IDP document has to be approved by the Council.

7.2.2 IDP/ Budget Process Plan

In terms of Municipal System Act, 32 of 2000, Section 28(1), each municipal Council must adopt a process set out in writing to guide the planning, drafting, adoption and review of its Integrated Development Plan. Annually, City of Polokwane Council approves IDP/Budget/PMS process plan that is aligned with the Municipal Corporate Calendar detailing activities and processes that will unfold culminating with the final approval and adoption of the IDP and Budget by Council and it is aligned with the Municipal Corporate Calendar.

7.2.3. The IDP/Budget Committees

Legislation requires municipalities to establish appropriate mechanism, processes and procedures for the organs of state, including traditional authorities and other role players to be identified and consulted on the drafting of the Integrated Development Plan. To achieve this purpose, the City of Polokwane established committees towards attainment of the above legislative requirement as follows:

7.2.4 IDP Technical Committee

The committee is chaired by the Municipal Manager and constituted by all Directors and all Managers who are appointed annually by the Municipal Manager. This committee serve as a working committee for municipal planning, budgeting and institutional performance.

7.2.5 IDP Steering Committee

This committee is chaired by the Executive Mayor and composed of all members of the mayoral committee, Speaker of Council, Chief whip; MPAC Chairperson, Ethic Chairperson,

VISION 2030=SMART CITY

Geographic Names Chairperson, MM, all Directors and selected Managers. Councillors in the committee play oversight role over municipal planning, budgeting and institutional performance whereas municipal employees provide expertise and technical knowledge in a supporting role.

7.2.6 IDP Representative Forum

The IDP/Budget/PMS Representative Forum is platform that the City of Polokwane use to engage with organized formations and government departments. The Forum is fully functional and its meetings are held every phase of the IDP for feedback purposes and further engagements with stakeholders.

7.3 Public Participation and Stakeholder Engagements

Municipal System Act, 32 of 2000, Chapter 4 provides for the municipalities to develop a culture of municipal governance that complements formal representative government with a system of participatory governance and to encourage and create conditions for the local community to participate in the affairs of the municipality including in the preparation, implementation and review of its Integrated Development Plan. Polokwane Municipality is divided into seven (7) clusters for administrative purposes and further has a diverse and active citizenry that requires an effective public participation process to ensure that they are fully engaged in matters of their development. These includes community, business sector, government departments, non-governmental organisations, Traditional Authorities amongst others

Polokwane Municipality has dedicated the month of April annually to consult with its stakeholders and source inputs into the tabled draft IDP and Budget. During these meetings Council gives feedback on the implementation of the current financial year projects, budgets and interventions where necessary and further present proposed projects, programmes, budgets and tariff increases for the coming financial year for engagements with stakeholders. Copies of both the draft and final IDP and Budgets are placed at strategic places within the seven (7) municipal clusters, libraries and also get posted on the municipal website for consumption by members of the public.

7.4 MEC IDP Assessments

Municipal System Act, 32 of 2000, Section 32 requires municipalities to submit the adopted Integrated Development Plans (IDP) to the Office of the MEC for local government within ten (10) days after Council approval. This is to allow the MEC for local government to assess the IDPs of municipalities for compliance and to make proposals for amendments where possible for consideration by local councils. Polokwane Municipality has always complied with

VISION 2030=SMART CITY

legislation and submitted the adopted IDP within the prescribed timelines. Polokwane Municipality always considers proposals by the MEC for Local Government from the IDP Assessments and incorporates them into planning.

7.5 Strategic Planning Sessions (Bosberaad)

The purpose of the strategic planning session is to maintain a favourable balance between an organization and its environment over a long run. Strategic Planning has been defined as "a disciplined effort to produce fundamental decisions and actions that shape and guide what an organization is, what it does, and why it does it". It provides a systematic process for gathering information about the bigger picture and using it to establish a long-term direction and then translate that direction into specific goals, objectives, and actions. It blends futuristic thinking, objective analysis, and subjective evaluation of goals and priorities to chart a future course of action that will ensure the organization's vitality and effectiveness in the long run. "At best it permeates the culture of an organization, creating an almost intuitive sense of where it is going and what is important".

In today's highly competitive business and organizational environment, budget oriented planning or forecast planning methods are insufficient for organization to prosper. There is a need to engage in strategic planning that clearly defines objectives and assesses both the internal and external situation to formulate strategy, evaluate progress, and make judgments as necessary to stay on track. Polokwane Municipality usually host its strategic planning sessions each financial year in terms of the IDP/Budget/PMS Process Plan. The session is led by the Executive Mayor. The Executive Mayor with the support of the Members of the Mayoral Committee, Senior Management and Managers holding key strategic positions embarks on a retreat to make a thorough introspection on whether the municipality is on track to achieve its vision and take the necessary actions / decisions to ensure that Polokwane Municipality succeeds in bettering the lives of its communities and therefore achieve its Vision 2030.

7.6. MUNICIPAL CLUSTER OFFICES

Polokwane Municipality is Consist of 7 Clusters that should be provided with services.ie

- 1) City Cluster
- 2) Seshego Cluster
- 3) Mankweng Cluster
- 4) Molepo/Chuene/Maja Cluster
- 5) Sebayeng/Dikgale Cluster
- 6) Moletjie Cluster
- 7) Aganang Cluster

The number of wards are now 45 wards.

7.6.1 City Cluster Office

The Civic Centre will remain the Municipal Head Office and will also accommodate staff that is deployed to work in the City Cluster. It has been recommended that rates halls be incorporated into the Westernburg and Nirvana Community Centres, municipal offices in Ladanna and the Thorn-hill shopping Centre to provide residents around these areas with access to officials with regards to queries on their accounts and other municipal services. Relocation of staff that is deployed to other clusters (to their respective cluster offices or depots) will provide an opportunity for essential refurbishment to be done to the Civic Centre and also alleviate the problem of office accommodation at the Main Building.

7.6.2 Molepo-Chuene-Maja Cluster Office

The existing municipal cluster office at Mothiba Ngwana-Mago in the Maja area for which a photographic image is provided below, is suitably located in terms of centrality, population concentrations and numbers as well as access roads. Access will be further improved once the existing tarring of the road from Polokwane via Silicon Smelters is completed. The office however needs to be extended to meet the deployment requirements of staff as well as the municipal services to be provided in the cluster area. It is recommended that a secure site be established from where mobile services can be made available to residents in the Molepo area. The site has already been identified at Rampheri village in the Molepo area. This will allow mobile service providers such as Departments of Health, SASSA, SAPS, Home Affairs to move in and utilize the facility to render services to the local community. Office accommodation requirements are summarized in the table at the end of this section, with concept-level proposals from an architect provided in the following section.

7.6.3 Mankweng Cluster Office

There are currently three satellite offices situated at Unit A, B and C in Mankweng as well as a Community Library and a Fire Station. A proposal is made to develop a Thusong Service Centre in the vicinity of Paledi Mall because of the accessibility and development potential of this area. The Thusong Service Centre programme is a government initiative to extend government services and information to communities in an integrated manner. This could form the nucleus of an office precinct for Mankweng, with an Education Circuit office and other sector departments such as Home Affairs, Social Development, Health and parastatals to follow.

VISION 2030=SMART CITY

There is also need to consider establishing a Municipal Depot to accommodate all heavy duty and other vehicles particularly from the Engineering and Community Services Directorates that are rendering services to the local community. It is also likely that the proposed Transfer Station for the Integrated Rapid Public Transport Corridor between the City and Mankweng will eventually be constructed in this vicinity. The new office must have a discernible image that will form part of the Polokwane Smart City brand.

7.6.4 Sebayeng-Dikgale Cluster Office

The existing Municipal Cluster Office in Sebayeng town is suitably located, but the facility needs to be upgraded and expanded according to the cluster staff deployment requirements. A secure site is also recommended at Segopje village in the Mamabolo area to provide mobile services to benefit the local community. Several sector departments such as Health, SASSA, Home Affairs and parastatals have been engaged in this regard and have shown keen interest. A visual image of the office is provided below. ICT connectivity must also be significantly improved. A depot is required for Engineering and Community Services to best render services to the local community. There is also a need for a Community Library in the cluster area.

7.6.5 Seshego Cluster Offices

In a rapidly changing world, space is increasingly becoming a scarce resource as productivity and work efficiencies are crucial to the success of any institution. Space planning is therefore vital in addressing this challenge. Although the Municipality is currently implementing the open floor plan, decentralization of more services to the outlying cluster areas could go a long way in alleviating the problem of office space at the main building.

Seshego is currently having three municipal offices situated at Zone 1, 3 and 8 and are suitably located to serve as rates halls and providing other municipal services for the local communities and should therefore be retained as such for local neighbourhoods.

A new Cluster Office, branded according to the Polokwane Smart City Vision, is proposed to be developed in close proximity to the Seshego Circle Mall. This is the most accessible point in the Cluster and it is located close to the Seshego Hospital. It is also densely populated. The vacant land is available for this project. The Transfer Station for the proposed Rapid Public Transport Corridor between the City and Seshego is earmarked for the same vicinity. The proposed new cluster office should provide motor vehicle licensing services and form part of the Seshego Precinct Development Plan.

VISION 2030=SMART CITY

7.6.6 Moletjie Cluster Office

The existing municipal office at Koloti is suitably located to serve as a cluster office due to its centrality with regard to the population settlement pattern and the primary transport corridors. However, this facility will require infrastructure upgrading and expansion according to staff deployment needs. Access from the main road will also have to be improved. Although there is a functional Thusong Service Centre in Moletjie some few meters from the municipal cluster office, secure sites are recommended to be established for mobile services at the primary road intersections at Ramongwana and Chebeng. This will improve access to municipal and other government services for residents on the periphery of the Moletjie cluster who have to travel long distances to access government services.

7.6.7. Aganang Cluster Office

The Aganang area that has been incorporated into Polokwane Municipality is now serving as the seventh cluster area for Polokwane. The municipal complex at Ceres village has been converted into a Cluster Office with 64 offices, four boardrooms and a community hall. The facility has a separate Traffic Centre with six offices, a conference room and testing rooms. There is need to upgrade the ICT infrastructure in order to facilitate efficient operational communication between the Civic Centre and the Cluster office.

It is proposed that a suitable Municipal Depot be developed next to the Traffic Station to accommodate the deployed staff, plant and machinery and other specialized vehicles of Engineering and Community Services. This should have appropriate office accommodation and workshops for operations of the Engineering Services and the necessary space for materials and equipment. There is need to establish a community library at the Cluster Offices as well as expansion of the provision of municipal services to satellite offices at Matlala One-Stop Centre and Mohlonong Office in Mashashane to access Social Development, Health, Education and Post Office services. The building is illustrated in the figure below.

| | Clusters | Wards No. |
|---|--------------------------------|--------------------------|
| 1 | Mankweng Cluster | 06,07,25,26,27,28, 34 |
| 2 | Moletjie Cluster | 09,10,15,16,18,35, 36,38 |
| 3 | Molepo / Chuene / Maja Cluster | 1,2,3,4,5 |
| 4 | Sebayeng / Dikgale Cluster | 24,29,32,33,30,31 |

7.7. Clusters and their Wards

VISION 2030=SMART CITY

| | Clusters | Wards No. |
|---|-----------------|----------------------|
| 5 | Aganang Cluster | 40,41,42,43,44,45 |
| 6 | City Cluster | 08;19,20,21,22,23,39 |
| 7 | Seshego Cluster | 11,12,13, 14,17,37 |

7.7.1. Clusters Challenges

- ICT: Poor Network Connectivity at Cluster Offices Moletjie, Sebayeng/Dikgale, Molepo/Chuene/Maja, Mankweng, Aganang and Moletjie Thusong Service Centre
- Office accommodation: Inadequate office space at the existing cluster offices to accommodate the anticipated number of employees to be deployed at these offices particularly Moletjie, Sebayeng/Dikgale, Molepo/Chuene/Maja, Seshego and Mankweng.
- Hostel Accommodation (Barracks): Inadequate hostel accommodation for employees attached to the Fire Services and Water and Sanitation at Unit A in Mankweng cluster.
- Municipal Depots: Lack of municipal depots in the different cluster areas. The Municipality is currently leasing a Facility in Seshego (LIMDEV Building) with unsatisfactory conditions. The facility is used by Roads and Storm Water, Environmental Management and Waste Management Strategic Business Units. In Mankweng cluster, the municipality is using the prefabricated facilities from the Department of Water Affairs to accommodate employees of Roads and Storm Water and Water and Sanitation strategic business units.
- **Under-utilised office** accommodation at Aganang cluster offices. The Municipal complex at Ceres village has a total of 64 offices, 4 boardrooms and a community hall. The facility has a separate Traffic and Licensing centre with 6 offices, a conference room and testing rooms.

7.7.2 Proposed Clusters Intervention

- ICT: There is need to upgrade the ICT infrastructure at Cluster offices in order to facilitate efficient operational communication between the Civic Centre and the cluster offices and also to accelerate service delivery to communities.
- Office accommodation- it is recommended that a new Cluster Office be developed on a vacant land across the Circle Mall in order to form part of the Seshego Precinct Development Plan. The location is central in terms of the residents of the cluster area and will offer convenient access for all modes of transport. The existing satellite offices in Zone 1, 3 and 8 will continue operating as Rates Halls for local neighbourhood.
- It is further recommended that a Thusong Service Centre be developed in Mankweng cluster in the vicinity of Paledi Mall to provide not only municipal services but also those provided by other government departments, nongovernmental organisations and parastatals.
- There is need also to upgrade or expand the existing office facilities at Moletjie, Sebayeng/Dikgale and Molepo/Chuene/Maja in line with the numbers of employees and services rendered at the respective offices.
- Hostel accommodation- there is need to construct a new hostel facility for employees doing night and stand-by shifts in Fire Services, Water and Sanitation, Energy and other Emergency related services in Mankweng cluster.
- Municipal depots- Construction of depots in Seshego, Mankweng and Moletjie clusters as a first priority and with consideration also of the other cluster areas such as Aganang, Sebayeng/Dikgale and Molepo/ Chuene/Maja.
- Decentralisation of more municipal services to cluster areas in particular Aganang which may also be converted into a Thusong Service Centre. Three sector departments are already rendering services on the same premises namely Social Department, SASSA and the South African Post Office.

7.8. PROJECT MANAGEMENT UNIT (PMU)

The PMU is responsible for the management of the local infrastructure programme (municipal scale) as well as physical project implementation activities including:

- The coordination of regular progress meetings
- The associated project management administrative functions, from project registration and evaluation through to final project completion reports.
- Co-ordination of strategic bulk water and sanitation programs
- Management of infrastructure programs for critical service delivery objectives of the municipality.

The PMU is currently responsible for capital infrastructure projects funded from MIG now UIDG, RBIG, NDPG, WISG; EPWP and CRR. PMU also provides support and oversight in the INEP and IRPTS grants.

7.8.1 Grants Allocation and Expenditure for 2018/19 FY

The figure below indicates the grants allocation, adjustment and expenditure for the 2018/19 financial year as at **30 June 2019** as per council approved adjustment budget.

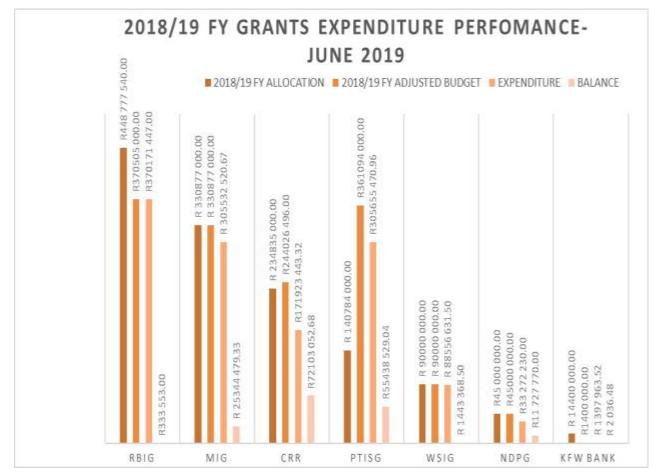

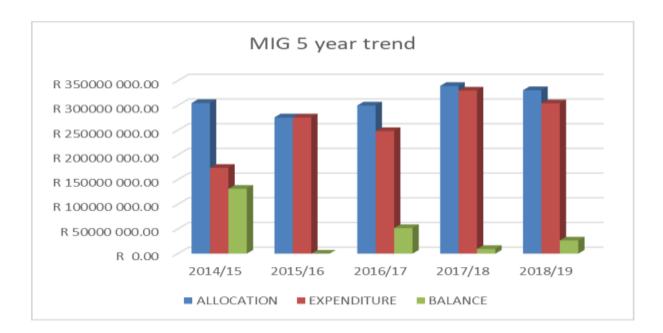

Figure: Grants allocation and expenditure 2018/19 FY

The above graph shows the following:

VISION 2030=SMART CITY

- RBIG was allocated R 448 777 540.00, adjusted budget was R370 505 000.00 the expenditure was R370 171 447.00 and the balance is R333 553.00. Expenditure as at 30th June was 99.91%
- CRR was allocated R 244 026 496.00, the expenditure was R171 923 443.32 and the balance is R72 103 052.68. as at 30th June was **70.45%.** R 68 337 770.99 of expenditure is for infrastructure projects.
- PTISG was allocated R361 094 000.00, the expenditure was R305 655 470.96 and the balance is R 55 438 529.04. Expenditure as at 30th June was 84.65%.
- WSIG was allocated R 90 000 000, the expenditure was R 88 556 631.50, and the balance is R 1 443 368.50 as at 30th June was 98.40%.
- NDPG was allocated an amount of R 45 000 000, the expenditure was R33 272 230.00 and the balance is R11 727 770.00. Expenditure as at 30th June was 73.94%.
- KFW Bank (donation) is allocated R 1 400 000, the expenditure is R 1 397 963.52 and the balance is R 1 172 036.00. Expenditure to date is **99.85%.**

* the reported expenditures are subject to final reconciliation with expenditure office.

7.8.2 MIG Trends Over Five Years (2014/15 to 2018/19)

Figure: MIG Trends over five years (2014/15 to 2018/19)

The above graph shows the following:

- In 2014/15 MIG was allocated R 266 671 000 and an additional R 38 243 000, the expenditure was R 173 597 827 and the balance was R 133 711 393.
- In 2015/16 MIG was allocated R 275 800 000, the expenditure was R 275 800 000 and the balance was R 0.
- In 2016/17 MIG was allocated R 299 943 000, the expenditure was R 248 153 952 and the balance was R 51 789 047.
- In 2017/18 MIG was allocated R 339 577 572, the expenditure in June 2018 is R 328 757 127 and the balance at end of June 2018 is R 10 820 445.
- In 2019/20 IUDG (previously known as MIG) allocation is R 378 290 000.00, the expenditure as in July 2019 amounted to R0.00 and the balance at end of July is R 378 290 000.00

7.8.3 Grant Allocation for 2019/20 FY

| Grant | Amount |
|---|------------------|
| Integrated Urban Development Grant | R 378 290 000.00 |
| Public Transport Network Grant | R159 433 000 |
| Neighbourhood Development Partnership Grant | R40 613 000 |
| Water Services Infrastructure Grant | R94 717 000 |
| Regional Bulk Infrastructure Grant | R630 998 000 |
| Integrated National Electrification Programme Grant | R10 000 000 |
| Road Concession (Loan / sinking fund) | R300 000 000 |
| CRR | R228 050 000 |
| Finance Lease | R80 000 000 |
| VISION 2030=SMART CITY | Page 266 |

The table below indicates the 2019/20 financial year allocation per grant:

| Grant | Amount |
|----------|-------------|
| KFW Bank | R14 000 000 |

7.8.4 Neighborhood Development Programme

The Precinct Plan is for development and connection of the identified business nodes in Seshego urban hub as part of the NDPG (Neighbourhood Development Partnership Grant) funded project from National Treasury. During the investigations about Seshego Urban hub, it was realized that there are some areas where the facilities/infrastructure need re-designing to accommodate growth patterns at Seshego. It becomes the priority of the precinct plan to address those problems at a minimal cost while ensuring that people still receive the required services as they are supposed to.

The precinct plan is aimed at promoting the performance of Seshego urban hub with the following objectives:

- Formalise public transportation facilities and services.
- Increase pedestrian volumes to the hub by defining and improving pedestrian movement.
- To create vibrancy, job opportunities and increase population thresholds by means of the integration and mix of land uses such as commercial, transport, social and public space, higher residential densities and training facilities.
- Establish a public square to encourage social and cultural gathering and interaction.
 Improve the Economic Development within the entire hub.

To date, 25 projects have been identified during the precinct planning and it will require R850 300 125.00 to complete the project in phases.

AM Consulting Engineers have been appointed by the municipality to assist with implementation of the projects within the precinct plan in Seshego Urban Hub. Though the precinct plan has been approved by the Council, National Treasury has allowed the

VISION 2030=SMART CITY

municipality to revise the plan, reprioritise the implementation of certain projects and propose new projects where possible. This will assist both the municipality and National Treasury to fully implement the NDPG Programme by also exploring other possible sources of funding.

From the precinct plan, three projects were completed by 2017/18 Financial Year (FY) and five more are under implementation for the 2018/19. The precinct plan is reviewed regularly and engagements are done with national Treasury for assessment and prioritisation of projects.

7.8.5 Other Grants Financial Overview (2017/18-2019/20)

NEIGHBOURHOOD DEVELOPMENT PARTNERSHIP GRANT (NDPG)

The 2017/18 financial year, total allocation was R41 000 000.00 and expenditure as at June 2018 was R 32 115 499 therefore the expenditure percentage was 78%. The balance not spent by June 2018 is R 8 884 501.00.

The total 2018/19 financial year allocation was R35 000 000.00 and was adjusted to R45 000 000.00, the expenditure as at June 2019 was R33 272 230.00, therefore the expenditure was 73.94%. Balance not spent by June 2019: R11 727 770.00= 26.06%. A rollover application is prepared to be submitted.

In 2019/20 financial year the NDPG allocation is R40 613 000. Expenditure to be spent by June is R40 613 000.00.

1. REGIONAL BULK INFRASTRUCTURE GRANT (RBIG)

For the 2017/18 financial year, the total allocation was R 343 676 000.00 and expenditure as at June 2018 was R 343 676 000.00, therefore the expenditure percentage was 100%.

VISION 2030=SMART CITY

For the 2018/19 financial year, the total allocation for RBIG was R 344 002 544.00, was adjusted to R 370 505 000.00 and expenditure as at June 2018 was R370 171 447.00, therefore the expenditure percentage was 99.91%.

For the 2019/20 financial year, the total allocation for RBIG is R 630 998 000, and expenditure as at July 2019 was R0.00, therefore the expenditure percentage was 0%.

a. SUMMARY STATUS OF THE 2019/20 PROJECTS

A total of nine (9) projects were allocated to be implemented under the Regional Bulk Infrastructure Grant for the 2019/20 financial year and are multi-year projects. Four (4) projects are at design, two (2) projects are at tender and three (3) are at construction.

MUNICIPAL INFRASTRUCTURE GRANT (MIG)

In 2017/18 financial year the MIG allocation was R339 577 572, the expenditure as of June 2018 amounted to R 328 757 127. Therefore, the expenditure percentage was 97%. The balance not spent by June 2018 is R 10 820 445 = 3%.

The municipality has applied for a rollover amount of R 9 520 739.00 and it was rejected by the National Treasury with the reason that the rollover amount was not cash backed.

In 2018/19 financial year the MIG allocation was R330 877 000.00 and there was no adjustment. Expenditure was R 305 532 520.67 and the balance is R 25 344 479.33. A rollover application of the balance is being prepared to be submitted.

In 2019/20 financial year the IUDG (formerly known as MIG) allocation is R 378 290 000.00 expenditure to be spent by June is R 378 290 000.00.

7.8.6 Summary Status of the 2019/20 Grants Funded Projects

Projects summarised as follows:

VISION 2030=SMART CITY

| Project category | Completed | Practically completed | Construction | Design | Tender |
|----------------------------|-----------|-----------------------|--------------|--------|--------|
| Roads and Storm water (15) | 0 | 0 | 3 | 11 | 1 |
| Water and sanitation (18) | 0 | 0 | 4 | 10 | 4 |
| | | | | | |
| Waste (3) | 0 | 0 | 2 | 1 | 0 |
| Sports (7) | 0 | 0 | 2 | 4 | 1 |

There is a total of fifteen (15) roads and storm water for the 2019/20 financial year, eleven (11) projects are at design, one (1) at tender, three (3) of the projects are at construction between 0-44%.

There is a total of eighteen 18 water and sanitation projects for the 2019/20 financial year. Thirteen (13) water supply and reticulation projects: Four (4) projects are awaiting technical report approval and preparations, three (3) projects are at design, and four (4) projects are at tender stage and two (2) at construction at 5%. There are Five (5) sanitation projects: with three (3) at design stage and two (2) are at construction stage.

There is a total of three (3) waste management projects. Two (2) of the projects are currently at construction between 15%-85% and one (1) at design stage.

There is a total of seven (7) projects for sports and recreation in the 2019/20 financial year. Four (4) projects are at design stage, one (1) at tender and two (2) projects are at construction between 28%-61%.

7.9 CASH REPLACEMENT RESERVE (CRR)

The total 2017/18 financial year allocation was R268 384 533.00 and expenditure as at June 2018 was R 187 869 173 and the balance is R 80 515 359, therefore the expenditure was 70%. Balance not spent by June 2018: R 80 515 359= 30%

The total overall 2018/19 financial year allocation is R 234 835 000.00 and was adjusted to R 244 026 496.00 and the balance is R72 103 052.68, therefore the expenditure was 70.45%. Balance not spent by June 2019: R72 103 052.68= 29.55%.

In 2019/20 financial year the CRR allocation is R228 050 000. Expenditure to be spent by June 2020 is R 228 050 000.

7.9.1 Summary Status of the 2019/20 CRR Projects

Projects summarised as follows:

| Project category | Completed | Practically completed | Construction | Design | Tender |
|----------------------------|-----------|-----------------------|--------------|--------|--------|
| Roads and Storm water (14) | 0 | 0 | 6 | 8 | 0 |
| Water and sanitation (5) | 0 | 0 | 2 | 3 | 0 |
| Waste(2) | 0 | 0 | 0 | 2 | 0 |
| Facilities (20) | 0 | 0 | 2 | 18 | 0 |
| Sports (1) | 0 | 0 | 0 | 1 | 0 |
| Energy (20) | 0 | 0 | 4 | 14 | 2 |

There is a total of fourteen (14) roads and storm water for the 2019/20 financial year, eight (8) projects are at design, six (6) are at construction between 0-80%.

There is a total of five (5) water supply and reticulation projects: Three (3) projects are at design stage and two (2) are at construction.

VISION 2030=SMART CITY

There is a total of two (2) waste management projects which are currently at design stage.

There is a total of twenty (20) projects for facilities in the 2019/20 financial year. Eighteen (18) projects are at design and planning and two (2) projects are at construction stage.

There is a total of one (1) Sports project for the 2019/20 financial year which is at design stage.

There is a total of twenty (20) projects for energy in the 2019/20 financial year. Fourteen (14) projects are at design and planning and two (2) projects at tender and four (4) are at construction stage.

7.10 OTHER GRANTS SUPPORT

The PMU provides project management support and oversight to the Public Transport Infrastructure System Grant as well as INEP grant.

7.10.1 Expanded Public Works Programme

The Expanded Public Works Programme (EPWP) is a nation-wide Government Programme aiming at drawing significant numbers of unemployed into productive work, so that they increase their capacity to earn an income.

The Expanded Public Works Programme (EPWP) was initiated in 2004 with the primary goal of reducing unemployment across South Africa. The EPWP provides labour intensive employment created through the infrastructure sector, social sector, environment sector as well as the non-state sector. These sectors under the EPWP therefore have a dual purpose namely, job creation and upgrading of infrastructure

The persistently high rate of unemployment in South Africa is one of the most pressing socioeconomic challenges facing the Government and Polokwane Local Municipality is not immune to these challenges. High youth unemployment in particular means young people are not acquiring the skills or experience needed to drive the economy forward. Therefore, job creation and skills development remains the key priorities of the Polokwane Local Municipality. EPWP targets are set annually by the National Government, which the Municipality is expected to achieve. With the introduction of the EPWP phase III, the Municipality has performed well in terms of job creation, by achieving their target for the first year. Currently most jobs are created through Capital projects as well as Operational projects, and quite a significant amount of jobs are created through Water and Sanitation, Waste Management, Roads and storm water, Environment Management and Transportation Projects.

An EPWP policy document was developed and approved by Council in 2012/13 financial year, and is reviewed annually. The policy is aimed at providing an enabling environment for the Municipality to upscale the EPWP Programme, through the re-orientation of the line budget function and channelling a substantial amount of the overall annual budget allocation and human resources towards the implementation of EPWP. This policy also advocates for the establishment of a Municipal EPWP Steering Committee which has since been established and is responsible for the strategic direction and coordination of EPWP.

To ensure accountability by all Directorates in the achievement of these set National EPWP targets, the Directorates are allocated annually, a portion of the total target which the Directorates must achieve. Objectives and key Changes in EPWP Phase IV. The Municipality is currently implementing the new phase of the Expanded Public Works Program, EPWP Phase IV, which came into effect in April 2019.

7.10.2 The Objective of EPWP Phase IV

To provide work opportunities and income support to poor and unemployed people through the delivery of public and community assets and services, thereby contributing to development"

- EPWP Phase IV Focus
- Strengthening the monitoring of the core EPWP principles to improve compliance to the EPWP guidelines

- Expansion of the programme through replication and improved in programmes across all sectors.
- Enhancing the EPWP coordination and institutional arrangements including the PEP-IMC.
- Strengthening impact evaluation of the EPWP and ensure greater transparency and accountability through the introduction of Social Audits.
- Strengthening partnerships with the private sector and TVET Colleges.

The Municipality is currently implementing the new phase of the Expanded Public Works Program, EPWP Phase III, which came into effect in April 2014.

7.10.3 Community Work Programme

The Municipality in partnership with the Department of Co-operative Governance Human Settlements and Traditional Affairs (COGHSTA) is implementing the Community Work Program (CWP). The CWP targets specific areas, where a significant number of people unemployed are drawn into productive work. The communities identify useful work at community level. The programme aims to provide an employment safety net, by providing a minimum level of regular work opportunities to participants, with a predictable number of days of work provided per month. It is targeted at the unemployed and/or underemployed people of working age, including those whose livelihood activities are insufficient to lift them out of poverty. The Polokwane Municipality has received an allocation of 1000 participants from (COGHSTA) through the CWP, and the Programme is currently implemented in the following clusters:

| Mankweng Cluster | Moletjie Cluster | Aganang Cluster |
|--------------------------------------|--------------------------------------|---------------------------------------|
| 500 participants | 500 participants | 1000 participants |

VISION 2030=SMART CITY

The Municipality has also received an additional 450 participants, for the CWP Pilot programme which the Department is rolling out, specifically targeted towards the traditional Authorities Villages/ Wards and the following Traditional Authorities are to benefit from the programme:

- 1. Kgoshi Maja D.C
- 2. Kgoshi Molepo M
- 3. Kgoshigadi Mothapo M.R.M
- 4. Kgoshi Dikgale M.S
- 5. Kgoshi Mamabolo M.V
- 6. Kgoshigadi Chuene

7.10.4 EPWP Vuk'uphile Learnership Programme.

This is also one programme implemented by the Polokwane Municipality in partnership with the National Department of Public Works (NDPW), and is called the Vuk'uphile Learnership Programme. The Vuk'uphile programme has been developed to build the capacity amongst emerging contractors to execute the increasing amount of labour-intensive work that is part of the EPWP. Although the programme does not focus entirely on the Youth, it is the requirement of the programme that 50% of the individuals benefitting from the programme should be Youth.

Learner contractors in this programme receive all training required as part of the EPWP guidelines, so that when they exit the programme they are fully qualified to bid and execute labour intensive projects under the Expanded Public Works programme. The Learner Contractors must also exit the programme, with a CIDB Grade higher than the grade on joining the programme, so that they are able to compete in the open market.

projects. The classroom training which resumed on the 05 April 2018, came to an end on the 27 July 2018. The learner contactors are currently working on the following projects:

• Rehabilitation od streets in Seshego and Madiba park

- Fencing around electrical substations
- Upgrading of Storm water infrastructure
- Upgrading or road in Mankweng

7.10.5 EPWP Jobs

As part of the EPWP, the municipality set EPWP targets for each projects which contractors have to achieve. It is also a requirement in terms of demographics that, 55% of the people employed during project construction should be youth. For the 2018/19 Financial year a total of **4618** EPWP participants were recruited on projects, out of which **2247** were youth.

EPWP

- EPWP Job Creation Target for 2018/19Financial Year is =4249
- Work Opportunities achieved = 4618

Demographics

- Women: =2203
- Youth: =2247
- Disabled: =42

7.10.6 PMU Challenges

- Low spending on Capital Budget.
- Community stopping project implementation usually due to failure of contractors to pay wages on time.
- Disagreements on the EPWP recruitments and appointments / terminations.
- Challenges with unrealistic expectations with SMME recruitments that do not align to contract framework.
- Poor preforming service providers leading to delayed project completions.
- Service providers failing to meet financial obligations on projects results in delays and stoppages

7.10.7 Proposed Intervention for PMU

- PMU Support Team appointed to strengthen the support and Capacity of the PMU unit.
- Political intervention to be done at community level, the Municipality to ensure that Communities complaints are successfully addressed.
- Continuous community consultations be done in order to identify potential actions that may hinder projects progress.
- Termination of poor performing service providers or use of subcontractors where feasible to complete works.

7.11 INTERNAL AUDIT

7.11.1 Definition and Mandate of Internal Audit

The International Professional Practices Framework defines Internal auditing as an independent, objective, assurance and consulting activity designed to add value and improve an organization's operations. It helps an organization accomplish its objectives by bringing a systematic, disciplined approach to evaluate and improve the effectiveness of risk management, control, and governance processes.

According to chapter 14, section 165 of the MFMA, *each municipality and each municipal entity must have an internal audit unit.* The MFMA allows the IAA to be outsourced to assist the municipality or the municipal entity to develop its internal capacity. However, the Council or the board of directors should ensure that it is cost-effective to outsource

The Internal Audit Function of Polokwane Municipality has been established in terms of Section 165 of the Municipal Finance Management Act, 2003 (Act 56 of 2003). The primary objective of Internal Audit division is to assist the Municipal Manager and the Audit and Performance Audit Committee in the effective discharge of their responsibilities; Internal Audit provide them with independent analysis, appraisals, recommendations, counsel and information concerning the activities reviewed, with a view to improving accountability and service delivery.

Section 62(1) (c) (ii) of the MFMA requires internal audit to operate in accordance with prescribed norms and standards. This would imply that Internal Audit Activity should apply the Standards for the Professional Practice of Internal Audit (SPPIA) in the execution of its functions.

VISION 2030=SMART CITY

The purpose of the Standards is to:

- Delineate basic principles that represent the practice of internal auditing
- Provide a framework for performing and promoting a broad range of value-added internal auditing
- Establish the basis for the evaluation of internal audit performance
- Foster improved organisational process and operations

Standards for the Professional Practice of Internal Audit (SPPIA) consists of Attributes, Performance and Implementation standards:

Attributes standard

Attributes standards address the attributes (characteristics) of organisations and individuals performing internal audit services. These includes that the purpose, authority and responsibilities of the Internal Audit Activity should be defined in the audit charter, Internal Auditors should apply proficiency and due professional care in discharging internal audit work and the Internal Audit activity should go through the process of quality assurance and devise a development program.

Standard 1110 requires that the "Chief Audit Executive should report to a level within the organization that allows the Internal Audit Activity to fulfil its responsibilities. The Chief Audit Executive must confirm to the 'board', at least annually, the organizational independence of the Internal Audit Activity".

The standards further require that Internal Audit should be free from conditions that threaten the ability of the Internal Audit Activity to carry out internal audit responsibilities in an unbiased manner. Standard 1010 require that "The Chief Audit Executive should discuss the Definition of Internal Auditing, the Code of Ethics, and the *Standards* with senior management and the board. "Standard 1010 require that "The Internal Audit Activity must be independent, and internal auditors must be objective in performing their work".

Performance standards:

Performance Standards provide guidance on the nature of audit work and planning, conducting, managing, communicating, and reporting throughout the audit activity, the

VISION 2030=SMART CITY

standards also address aspects such as resource and risk management, policies and procedures, control, and governance.

Implementation standard:

Implementation Standards are provided to expand upon the Attribute and Performance standards, by providing the requirements applicable to **assurance** or **consulting** activities.

Assurance services involve the internal auditor's objective assessment of evidence to provide an independent opinion or conclusions regarding an entity, operation, function, process, system, or other subject matter. The nature and scope of the assurance engagement are determined by the internal auditor.

Consulting services are advisory in nature, and are generally performed at the specific request of an engagement client. The nature and scope of the consulting engagement are subject to agreement with the engagement client.

Internal Audit operate in terms of approved Charter which set out the nature, role, responsibility, status and authority of internal auditing within Polokwane Municipality and to outline the scope and responsibilities of the Internal Audit activity.

7.11.2 Internal Audit Strategic Coverage Plan

The rolling three-year Internal Audit Plan is developed based on the strategic organisational risk register and the annual Internal Audit Plan is derived or based on the Rolling Three-Year Strategic Internal Audit Plan.

The critical success factors for an effective internal audit plan are that it:

- Is aligned with the strategic objectives of the organisation.
- Covers the strategic risk areas facing the organisation, not just the financial risks and controls.
- Is risk based addresses the key risk areas/concerns of management.
- Is prepared in consultation with management and the Audit and Performance Audit Committee.
- Matches assurance needs with available resources.
- The Internal Audit Plans includes risk based, performance information reviews compliance, ICT, financial, follow up and adhoc (requests from management) reviews. The Internal Audit Plans also highlights the objectives, scope, risks to achieving objectives and the resource allocation.

VISION 2030=SMART CITY

7.11.3Audit Committee and Performance Audit Committee

The Audit and Performance Audit Committee (APAC) is a committee of Council primarily established to provide independent specialist advice on financial performance and efficiency, compliance with legislation, and performance management. A combined committee was appointed to represent both Performance Audit and Audit Committees in compliance to section 166 of MFMA no 56 of 2003 and section 14(2) of Municipal Planning and Performance Management Regulations. The Audit and Performance Audit Committee must liaise with Internal Audit in terms of Section 166(3) (a).

The Audit and Performance Audit Committee must ensure that the strategic internal audit plan is based on key areas of risk, including having regard to the institution's risk management strategy. The Committee reviews the work of Internal Audit through the internal audit reports.

APAC operate in terms of approved Charter which outline the role, responsibilities, composition and operating guidelines of the committee of Polokwane Municipality and report to Council quarterly.

7.11.40peration Clean Audit (OPCA)

The Municipality also established a task team to drive the Clean Audit initiative called "**Operation Clean Audit**" and which aims at improving governance, financial systems and service delivery at both local and provincial government level, reversing poor internal controls, poor quality of financial statements and non-compliance with Supply Chain Management whilst attaining a clean audit opinion.

The Task Team is an operational forum which formulates action plans and monitor progress in implementing action plans towards achieving a clean audit.

The Task Team report to Council via the Audit and Performance Audit Committee which is responsible to Council for financial and internal control oversight in line with the Audit and Performance Audit Committee Charter

Prevailing challenges noticeable include rrecurring audit findings indicated in the Internal Audit reports; information not presented to internal audit on time or not submitted at all, establishing greater synergy between Council committees and Audit and Performance Audit Committee; achieving greater compliance with key areas of legislation, the MSA, other regulations and policies.

7.11.5 Resources Availability

The current Internal Audit function comprises of the Manager, Senior Internal Auditor, seven (7) Internal Auditors and Co-Sourced Internal Audit Service Provider appointed to assist Internal Audit in discharging its responsibilities in terms of approved Internal Audit Charter.

7.12 RISK MANAGEMENT

Risk Management is one of Management's core responsibilities in terms of section 62 of the Municipal Finance Management Act (MFMA) and is an integral part of the internal processes of a municipality. It is a systematic process to identify, evaluate and address risks on a continuous basis before such risks can impact negatively on the service delivery capacity of a Municipality.

Polokwane municipality has established the Risk Management unit. Its role and responsibility is to develop and maintain an effective risk management system which will ensure an internal control environment that is conducive to the achievement of the municipality's objectives. This is achieved by developing and implementing an effective Risk Management framework and conducting institutional risk assessment in consultation with all stakeholders including the Audit and Performance Audit Committee on matters of governance.

7.12.1 Risk Management Committee

The Risk Management unit works hand in hand with the Risk Management Committee. The Risk Management Committee is comprised of the following members:

- Chairperson- Independent person not in the employee of the municipality
- All Municipal Directors-Members
- Manager: Risk Management- secretary
- Manager: Internal Audit
- Manager: Performance Management

7.12.2 Top 10 Strategic Risks Identified

The Following strategic risks were identified for **2019/20** Financial year. The list below indicates the top **10 strategic risks** identified;

Top 10 strategic risks identified

1. Ageing & insufficient infrastructure (e.g. Public Theaters, Libraries recreation facilities)

VISION 2030=SMART CITY

- 2. Theft and vandalism of municipal properties
- 3. Non-compliance to regulatory framework within OHS practices and Policy
- 4. Ineffective involvement of public in municipal processes
- 5. Illegal land use and illegal advertisement
- 6. Water scarcity
- 7. Low Revenue collection /Low Revenue Base
- 8. Inadequate ICT infrastructure (Not keeping with the current ICT developments)
- 9. Fraud and Corruption
- 10. Ineffective coordination of spatial planning

7.12.3 Fraud and Corruption Strategy

Anti-Fraud and Corruption strategy and Whistle Blowing Policy is implemented to curb fraud and corruption, An Anti-Fraud toll free hotline has been launched to help combat fraud and corruption in partnership with the Capricorn District Municipality. The hotline is a District shared service and is outsourced to an independent party. The hotline provides an opportunity to anyone wishing to report anonymously on unethical activities or dishonest behaviour that affects the municipality.

Polokwane Municipality is committed to maintaining the highest standards of honesty, integrity and ethical conduct and has adopted a zero tolerance to fraud and corruption. Any fraud and corruption committed against the municipality is a major concern to council.

7.13 PUBLIC PARTICIPATION AND COUNCIL SUPPORT

7.13.1 Key Municipal Stakeholders

The relationship between the Municipality and its stakeholders is very important. The involvement of all stakeholders in the matters of the municipality is necessary because the municipality is accountable to them for decisions taken. Stakeholders are not only local people. They include governments and their agencies, as well as people, organizations, institutions and markets. Stakeholders include people and institutions that impact directly but also indirectly on the organization, and they can include people who may not even be aware that they have a stake in the management of these organization.

The primary aim of stakeholder *identification* is to name all those who could and should have a stake in a planning and management process.

VISION 2030=SMART CITY

The following is a list of key stakeholders for Polokwane Municipality

- Traditional Authorities
- Community
- Business Sector
- Traditional Healers
- Government Departments
- Education Sector
- Non-Governmental Organisations
- Transport Sector
- Labour Unions
- Financial institutions
- Farmers
- Civic organisation
- Religious groups

7.13.2 Relationship with Traditional Leaders

The relationship between the Municipality and the Traditional Leaders has improved drastically and we were able to engage them on numerous occasions and towards and after any IDP/Budget Review consultations, the Municipality meet with Magoshi and discuss the consultation programme with them first before we go to our rural areas.

During the development of the New Organizational Structure (Organogram), Traditional Leaders have been officially placed under the Office of the Speaker and all engagement is facilitated from the Speakers' Office through Public Participation Unit.

The municipality have established a structural relationship between the Municipality and our Traditional Leaders. Quarterly annual schedule of meetings excluding IDP/Budget Review consultations. During the Community Outreach programmes (IMBIZO's), the Municipality pay courtesy visit to our Traditional authorities before the Executive Mayor speaks to the community.

The Executive Mayor have established an Annual Charity Fund that benefit the most Rural Poor Organizations (NGO's & CBO's) and to strengthen our relations, our Traditional leaders have been tasked to identify the neediest NGO's & CBO's to benefit from the proceedings.

The municipality Previously also has **Five (05)** Traditional Authorities participating in our Council sittings: namely;

- 1) Mothiba Traditional Authority under Kgosi Mothiba
- 2) Maja Traditional Authority under Kgosi DC Maja

- 3) Makgoba Traditional Authority under Kgosi MG Makgoba
- 4) Mamabolo Traditional Authority under Kgosi MR Mamabolo, and
- 5) Mamabolo Traditional Authority under Kgoshigadi MV Mamabolo

The Office of the Speaker quarterly convenes special meetings with all Traditional Authorities to focus on Service Delivery matters and this has worked well.

7.13.3 Additional Tribal Offices

Incorporation of Aganang Cluster comes with three Traditional Authorities.

- 1) Kgoshigadi Matlala
- 2) Kgoshigadi Maraba and
- 3) Kgoshi Mashashane

One will represent the Aganang cluster in Council. This will bring the number to **14** Traditional Authorities with **6** T/A's represented in Council.

The Traditional Leaders receive a monthly cellular Phone allowances and stipends. Generally, the Polokwane Municipality has a smooth relationship with all our Traditional leaders and they participate actively in our Municipality Programmes.

7.13.4 The Building Blocks of Good Governance

The building blocks of good governance are participation, accountability, predictability and transparency. Developmental local government requires municipalities to promote good governance and community participation. In promoting and ensuring a culture of good governance in providing services municipalities are required to establish components and mechanisms that promote good governance and community participation.

7.13.5 Ward Committee and CDW's

The table below is depiction of ward committee system and number of CDW's deployed in Polokwane municipality:

Table: Distribution of ward committees and Community Development Workers

| Number of Wards | Number of CDW's | Number of ward committees | Number of wards committees not functional | Challenges |
|--------------------|--------------------|---------------------------------|--|---|
| 45 | 29 | 450 | 0 | Limited capacity building programmes due to financial constraints Limited number of CDW's in the municipal area. CDW's report to CoGHSTA, BUT MUST ATTEND ward committee meetings. |

7.14 SECRETARIAT

7.14.1The Objectives for Secretariat Unit

The main objectives for Secretariat unit are:

- To run an effective Councillors, support programme.
- To perform the general administration of Council, Mayoral committee and other committee established by Council.
- Perform the general administration of Council, Mayoral Committee and all other Committees established by Council.
- Internal Political Interface with the Mayor's Office, Speakers Office and the Chief Whip.
- To run an effective decision support programme for portfolio committees.

7.14.2 Challenges of Secretariat Unit

- None adherence to the meeting dates scheduled for Portfolio meetings and MAYCO.
- Unavailability of items for discussion by portfolio committees.
- Office and record filling space.
- Implementation of Council resolutions

Solutions

• Adhere to the meeting date schedule for Portfolio meetings and MAYCO by regular reminders through cellular phones text messaging system.

VISION 2030=SMART CITY

• Request HR training division to attend to the matter of training and induction processes.

7.15 COUNCIL COMMITTEES

Council is the body that makes policy and oversees its implementation. Its key role in its current structure is to focus on legislative, participatory and oversight roles. The Executive Mayor is the political head championing the strategy of the municipality. Executive Mayor is assisted by the Mayoral Committee made up to 10 councillors and six are full time councillors. The Mayoral Committee is responsible for individual portfolio and report directly to the Executive Mayor.

Polokwane Municipality holds its Council meetings, on average, quarterly Mayoral Committee meetings are held fortnightly while Portfolio Committee meetings are held once a month. The Council is consisting of **45 Ward** Councillors.

7.15.1 Political Representation

Polokwane Municipality has a political presentation of **five political parties**. The political parties and the number of its representatives are listed on the table below.

- 1. Total number of Councilors: = **90**
- 2. Total number of ward Councilors: = **45**
- 3. Total number of PR Councilors: = **45**

<u>5 Political</u> Parties are represented in Council:

| | Name of Political Party | No of Councillors |
|---|-------------------------|-------------------|
| 1 | ANC | 51 |
| 2 | EFF | 27 |
| 3 | DA | 10 |
| 4 | COPE | 1 |
| 5 | FF+ | 1 |

7.15.2 Council Meeting

7.16 Portfolio Committees

In accordance with the delegated powers and function of the executive, all reports first serve at the Portfolio Committee then escalated to Mayoral committee before they are submitted to Council for decision making. At the Council reports are noted and adopted.

The Municipality has **Ten (10) Portfolio committees**. Each of the ten members of the Mayoral Committee chairs a Portfolio Committee and reports their activities to the Executive Mayor. The Executive Mayor reports to Council during Council meetings, which are open to the public. Polokwane Municipality holds its Council meetings, on average quarterly, Mayoral Committee meetings are held once a month while Portfolio Committee meetings are held once a month.

7.17 Municipal Public Account Committee - MPAC

That in accordance with Section 129 (5) of the Municipal Finance Management Act, Council of Polokwane Municipality has adopted the "Guideline for Establishment Municipal Public Accounts Committees" ("Guideline"). The members of the Polokwane Municipal Public Accounts Committee ("MPAC") are consisting of the following Councillors:

Table: MPAC Members

| | Name of Councillors: |
|----|---|
| 1. | Cllr Tsiri Martinus (Chairperson) |
| 2. | Cllr Mathye Veronica |
| 3 | Cllr Mothapo Samuel |
| 4 | Cllr Mphekgwane Jackson |
| 5 | Cllr Mogale T.J |
| 6 | Cllr Maakamela Elizabeth |
| 7 | Cllr Chidi Tiny |
| 8 | Cllr Sesera Cedric |
| 9 | Cllr Najma Khan |

Members of Polokwane Municipal Public Accounts Committee are guided by the following pieces of legislation to consider and scrutinize the Annual Reports:

- Circular No. 32 of 15 March 2006

VISION 2030=SMART CITY

The MPAC has been tasked with the responsibility of assessing the annual reports of the Municipality. Council appointed a multi-party Oversight Committee to review the annual report and Councillor **Tsiri Martinus** has been appointed **Chairperson of MPAC**.

7.18 COMMUNICATION AND MARKETING

Communication and marketing are important elements of good governance. It is through communication that the communities and other stakeholders are informed about the activities, challenges and achievements of the municipality and thereby getting empowered to participate in the affairs of the municipality. Section 18 of the Municipal Systems Act stresses the importance of communication between the Council and its communities. It gives guidelines of issues that the municipality must communicate about to its stakeholders.

The incorporation of Aganang Municipality resulted in the municipality growing bigger in size and this necessitates a review of the organogram and the approach model of the Communications and Marketing so that the municipality can efficiently respond to the needs of the communities in that cluster with the assistance of the Public Participation section.

Different platforms and media are being used to encourage community participation. These include programmes of mobilizing, informing and educating, engaging and empowering communities in municipal affairs. The turnaround strategy implementation priorities are highlighted during direct and regular communication with local communities and complemented by proper messaging that is driven by the political leadership.

The municipality is taking advantage of new electronic and social media channels to improve on the speed through which information reaches residents and other stakeholders. These include communication through mobile phones technology in the form of **MMS**, **SMS**, **chat groups**, **broadcast lists**, **Facebook**, **Twitter**, **YouTube etc**.

Face-to-face, direct communications with communities & community structures are conducted through outreach programmes such as the mayoral roadshows, "Imbizo" and other interested groups meetings.

Services challenges and achievements, products and programmes of the municipality have been and continue to be profiled on various radio stations (national, regional and

VISION 2030=SMART CITY

community) newspapers, posters and third party website as a way of marketing Polokwane as a city that is capable to respond to the needs of its communicators and visitors to the province. The municipality created and maintains sound relationships with the media.

The municipality has adopted a communications brand which is an umbrella brand that would provide shelter under which developmental activities that relates to the growth of the city could be communicated to the residents of Polokwane. The *"Re aga Polokwane"* platform will be used to ensure the City's citizens have a better understanding of the various projects that the city is embarking on and why the city has embarked on these projects. Further, the brand provides residents and businesses with a platform and opportunity to use their own initiative to come up with programmes that will benefit and improve the city in various ways. The programme has taken off the ground.

The municipality must develop and implement a comprehensive well researched marketing strategy that will implement campaigns geared towards revenue enhancement, water conservation, key municipal projects, service delivery achievements, investments opportunities and internal communications.

The municipality will continue to develop and improve processes to enhance public participation and strengthening of relations with critical stakeholders to entrench participatory local government.

7.18.1 Complaints Management System

The municipality uses suggestions books to record all the complains, suggestions and complements by the community about municipal services or any other matter that affects the municipality. The books are placed at the rates halls and cluster offices throughout the municipality's clusters where the community frequents. The books are attended to regularly to ensure that the inputs are attended to.

When complains are retrieved from the book, they are forwarded to the relevant Directorate through the Directors office.

The Call Centre manned by the Community Services Directorate is available and allows members of the public to report complaints or other service related issues like pipe bursts. Processes are currently underway to improve and implement an integrated will be able to deal with services standards within the municipality.

VISION 2030=SMART CITY

Currently the Facebook Page is used to complement the current control room where complaints and complements are forwarded to the relevant departments for intervention. Complaints are also received through government hotlines, walk-ins and media enquiries.

The municipality also participates in the District and the Provincial Hotline and Batho Pele Forums where management of complaints are entertained with the aim of reducing complaints received.

There is an urgent requirement for the municipality to have a dedicated business unit that will deal with development of **performance standards drawn** from standard operating procedures developed by all the business units in the municipality. This will be used as a benchmark for **acceptable and non-acceptable standards of delivery of services**. This unit should be able to keep track of service complaints received from all government hotlines, suggestion books, walk-in, and control room and media queries.

7.19 SPECIAL FOCUS PROGRAMMES

The Special Focus Unit is located within the Office of the Executive Mayor to address issues that affect previously deprived and marginalized groups of the society, such as **women**, **children**, **youth**, **people with disabilities and older persons as well as people living with HIV**. The forums for all the targeted groups were established, including the Local Aids Council and the Local AIDS Council Technical Committee, with the aim of mainstreaming all the special focus programmes into the municipal services and processes. HIV and AIDS and other opportunistic diseases are also programmes within the Special Focus unit. The HIV and AIDS Centre provide training, information and counselling to individuals, organizations, schools and other community structures. The centre also serves as a condom distribution site.

Section 73(1) of the Municipal Systems Act, Act 32 of 2000 requires municipalities to give effect to the provisions of the Constitution to give priority to the basic needs of the local community and to promote its development. The Act, Section 73 (2) further states that municipal services should be equitable, accessible and be provided in a manner that is conducive to the prudent, economic, efficient and effective use of available resources.

| | | South African National Association of the Blind and Partially sighted (SANABP). Plans are underway to have the IDP and Budget document printed in Braille. Plans are also underway for the procurement of the Braille machine for the municipality. |
| 2. | The money raised during the Mayor`s Charity Fund not enough to cover the huge number of NGOs in the Municipality. | The municipality in partnership with government departments and financial institutions strive to capacitate Community Based Organizations (CBOs) in terms of financial management and fundraising skills to ensure sustainability of their initiatives. |
| 3. | The Participation of people with disabilities and women as well in the procurement process. | Women and people with disabilities and youth are encouraged to register on the municipal data base. |
| 4. | Most of our buildings still not user friendly to our people living with disabilities. | Access ramps were constructed at the 1 st , 2 nd and 3 rd floor entrances of the building. |
| 5. | Inclusion of people with disabilities in the workforce (non- compliance to the 2% employment mandate) The Employment Equity Survey conducted confirmed an increase of employees with disabilities from 1.1% to 2% . | People with disabilities are encouraged to apply for advertised jobs through the disability forum and organizations. |
| 6. | Shortage of land for NGOs and CBOs. | The land acquisition and disposal of municipal property policy that was adopted by council will enable community organizations to make applications for leasing or buying of land. |
| | | Plans are underway to seek permission for the utilization of some Municipal Vacant land as a one stop centre for community service organizations, including the Victim Support and Empowerment Centre. |

7.20 HEALTH AND SOCIAL DEVELOPMENT

VISION 2030=SMART CITY

7.20.1 Health Facilities Analysis

To optimize the delivery of quality health care services to the community of Polokwane, the provision of health services is fairly covering the communities. There are 40 clinics and 1 health care centre found in the municipal area. Most of the clinics operates 24 hours and are fairly equipped with all necessary infrastructures. The municipality also harbours a provincial hospital, 1 District hospital and 2 tertiary hospitals.

7.20.2 Regional Hospitals and Clinics

- 1. Polokwane Hospital in Polokwane City
- 2. Mankweng Hospital in Sovenga township (30 km east of Polokwane)
- 3. Knobel Hospital in Aganang Cluster (60 km North West of Polokwane.)
- 4. Rethabile Health Centre in Polokwane City
- 5. Seshego District Hospital (10 km out of Polokwane City)
- 6. Pholoso Netcare Hospital next to savannah Mall
- 7. Over 40 clinics associated with all the above three hospitals

7.20.3 HIV /AIDS Prevalence in Polokwane

Table: HIV and AIDS

| | 2016 | 2017 | 2018 |
|----------------|--------|--------|--------|
| HIV infections | 59,664 | 69 539 | 71 007 |
| AIDS deaths | 1 376 | 1 234 | 1 241 |

Source: Regional Explorer, 2019

The burden of HIV and AIDS continue to pose a developmental hurdle because it put PLM's human assets at risk of morbidity and mortality. Data extracted from Regional Explorer (2019) showed that 59,664 people were infected with HIV in 2016; 69,539 in 2017 and 71,007 in 2018. During the same period, 1376 AIDS related deaths were reported in 2016; 1234 deaths in 2017 and 1241 deaths in 2018. Owing to an effective ARV treatment strategy adopted in 2009, AIDS related deaths reduced significantly by 9.8% between 2016 and 2018. The City of Polokwane is arguably one of the top HIV hotspot in Limpopo Province.

VISION 2030=SMART CITY

7.20.4 National HIV Prevalence

The estimated National HIV prevalence was 29.5%, showing a slight drop of 0.7% from the 2010 national HIV prevalence (30.2%). However, Limpopo indicated a steady increase from 21.4% in 2009 to 22.1% in 2011 whereas the Capricorn District has shown an increase from 24.9% to 25.2%. The Polokwane municipality has therefore a vigorous role to play in the prevention and support objectives of the Provincial HIV and AIDS strategy. The Centre also serves as a condom distribution site (distributing \pm 120 000 condoms per month).

7.20.5 Awards Received by Special Focus

The Special Focus unit received an award for the most resourceful Council in terms of gender mainstreaming during the Capricorn/Swaziland Gender Protocol and Justice summit

VISION 2030=SMART CITY

CHAPTER Eight - Municipal Transformation and Organisational Development

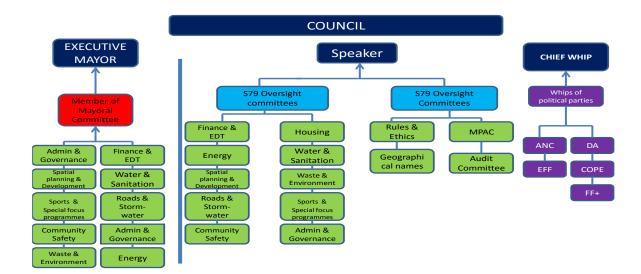

8.1. ORGANIZATIONAL STRUCTURE

The delivery of services is made possible through the improvement of human capital. Polokwane municipality can position itself to deliver effectively and efficiently from inside by attracting and keeping skilled workers and by promoting itself as being desirable place to relocate to or grow up and stay in. The ability to maintain skilled workers is accomplished by anticipating and accommodating new trends in service delivery, skills, local population, demographics and new economic opportunities.

The organizational structure is not simply an organization's chart. It is all people, positions procedures, processes, culture, technology and related elements that make up the organisations. It explains how all this pieces work together (or in some instances don't work together). The structure must be aligned to the strategic objectives of the municipality in order to achieve the mission and goals of a Smart City. The structure must be totally aligned with strategy for the organization to achieve its mission and goals.

A review process was undertaken with a view of separating powers in the governing structure, the creation of a Metro as well as creating an efficient structure that will be responsive to service delivery challenges. The governance model consists of the Legislative Authority (Speaker of Council, Chief Whip and Section 79 Portfolio and Standing Committees), the Executive Authority (Executive Mayor and Members of the Mayoral Committee (MMCs) as indicated below.

8.1.1 Legislative Authority

The position of a Transitional Advisor has been created for coordination of the metropolitan status processes and applications (metro status). The functions are listed as follows;

- Research on the attainment of Metro status with relevant Metropolitan cities.
- Benchmarking
- Analysis of status quo
- Assist directorates in identifying projects aimed at driving the attainment of a Metro in the IDP and budget
- Monitoring and evaluating set deliverables for various directorates.
- Regular reporting on project road map to EXCO, Portfolio Committees, MAYCO, and Council

The organizational structure is reviewed to strengthen service delivery by splitting Engineering Services Directorate into two Directorates, that is Water and Sanitation and Energy Services. Furthermore, that the Public Safety is split from Community Services and be a Directorate.

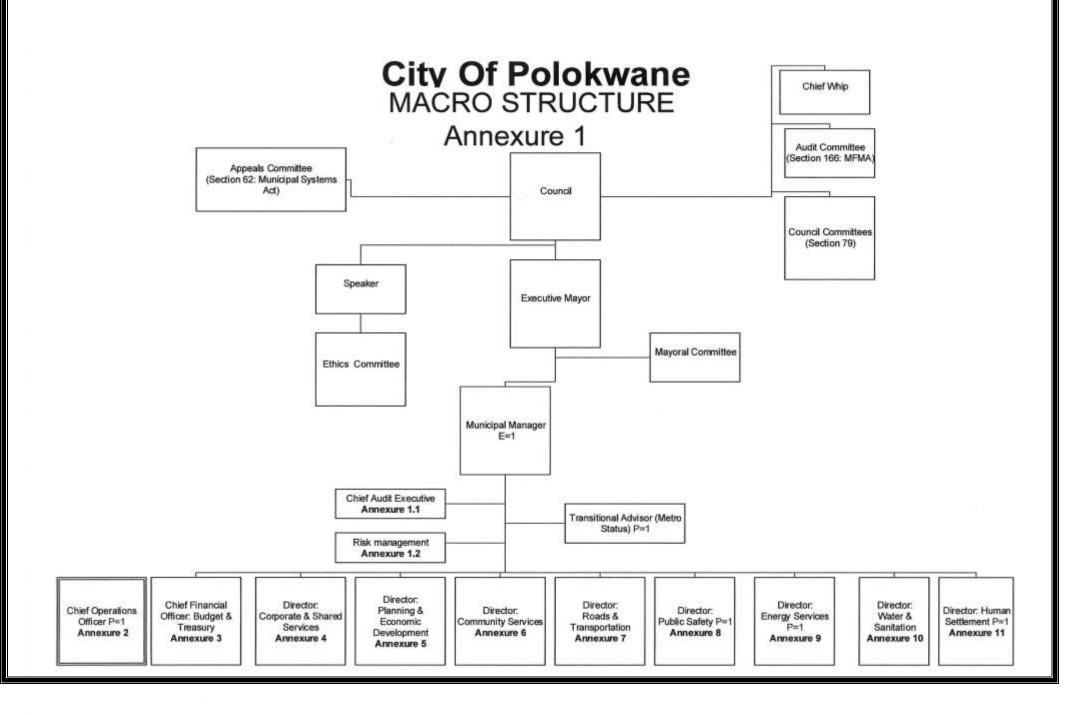

VISION 2030=SMART CITY

The adopted organizational structure increased the number of positions in the municipality to 4339. New position constitutes 2159. The organizational structure is being implemented through phases in response to new developments.

8.2 The New Organizational Structure

Council adopted the New Organogram on the 29 January 2019

The total staff complement based on the current organizational structure stands at 1901 with a 3.6% turnover rate. Municipalities are highly regulated as such it's a challenge to retain or attract talent. It is a common occurrence that skilled employees will always look for greener pastures or leave for bigger cities due to the highly regulated salaries and wages. A job

evaluation process is underway led by SALGA (South African Local Government Association). The process is meant to:

- Evaluate all new positions within Polokwane Municipality
- Implement the results of the evaluation in line with the wage curve.

TABLE:3

| Number of jobs on the structure | Number of jobs evaluated | Number of jobs submitted to |
|---------------------------------|--------------------------|-----------------------------|
| | | Provincial Audit Committee |
| 658 | 632 | 348 |

8.3 Skills Development and Training

Training presents a prime opportunity to expand the knowledge base of all employees. In some instances, many employers find training as an expensive opportunity; work time is consumed by training session. Despite this drawback, training and development provides both the municipality and the individual employee with benefits that may cost time, however it's a worthwhile investment.

Addressing Weakness

Most employees have some weaknesses in their workplace skills. A training program allows you to strengthen those skills that each employee needs to improve. A development program brings all employees to a higher level so they all have similar skills and knowledge. This helps reduce any weak links within the municipality

Improved Employee Performance

An employee who receives the necessary training is better able to perform his/her job. The training may also build the employee's confidence because she/he has a stronger understanding of the systems within a municipality.

Consistency

A structured training and development program ensures that employees have a consistent experience and background knowledge. All employees need to be aware of the expectations and procedures within the municipality.

Employee Satisfaction

Employees with access to training and development programs have the advantage over employees in other institutions that are left to seek out training opportunities on their own. The investment in training that an institution makes shows the employees that they are valued. MSA 2000 S68 (1) requires municipalities to develop their human resource capacity to a level that enables them to perform their function and exercise their powers in an economical, effective, efficient an accountable way.

The Skills Development Act (SDA) aims to provide an institutional framework to devise and implement national, sector and workplace strategies in order to develop and improve the skills of the South African workforce. Furthermore, it aims to provide the financing of skills development by means of a levy – financing scheme and a National Skills Fund.

The Skills Development Act (SDA) aims to provide an institutional framework to devise and implement national, sector and workplace strategies in order to develop and improve the skills of the South African workforce. Furthermore, it aims to provide the financing of skills development by means of a levy – financing scheme and a National Skills Fund.

The SDA also makes it a requirement for the municipality to compile a workplace skills plan and submit an implementation report. The municipality always adheres to this requirement.

Polokwane Municipality has implemented following four Learnership programmes i.e.

TABLE:4

| Item | Numbers |
|--|-------------|
| Municipal IDP Learnership | 20 employed |
| Municipal Finance and Administration | 25 employed |
| Municipal Finance Management Programme | 20 employed |
| Construction Roadworks Learnership | 30 employed |

Polokwane Municipality has lodged an application with the LGSETA to register as a service provider for Adult and Education Training (AET). the Municipality has a total of 58 employees that meet the Municipal Regulations on Minimum Competencies, 2007. Section 14 (4) requires of municipalities to compile a report on compliance with prescribed competency levels. Twenty employees have been enrolled with Resonance Institute for MFMP programme for the current year. The programme is funded by LGSETA.

8.4 Employment Equity

Polokwane Municipality views employment equity as a strategic priority and it recognises it as an important measure against which a Smart City and a world class organisation is benchmarked. The creation of an equitable working environment, with the dignity of all employees respected and the diversity of employees valued and properly managed, as a solid base for longer-term growth and competitive advantage.

The transformation and the successful management of diversity will deliver a competitive advantage that will deliver a stronger, more cohesive and more productive municipality. It contributes to greater employee satisfaction and commitment resulting in lower staff turnover and stronger customer and stakeholder orientation and satisfaction.

MSA 2000 S67 requires municipalities to develop and adopt appropriate systems and procedures to ensure fair; efficient; effective; and transparent personnel administration in accordance with the Employment Equity Act 1998. In implementing such the Municipality should be realistic for these programmes to be achievable. They should be based on accurate information with regard to race, gender and disability and reflect the demographics within Polokwane Municipality.

Summary of People with Disabilities

The Municipality has developed an Equity Plan as required by the Act. The aims are to ensure that positive measures envisaged in the Act are implemented within the Municipality. Goals and targets have been set in the current Employment Equity as guided by the National and Provincial Economically Active Population(EAP) as well as time frames to achieve them. The plan needs continuous Monitoring and Evaluation. Development of an effective communication strategy, Consultation and participation by all stakeholders. Research to inform ongoing policy making and planning process. The demographics as per Economically Active Population for Polokwane stands at 37.4% for women and 62.6% for men. The disabled employees constitute 2% of the total workforce and its contained the 100% of the total workforce in table six (6) above.

It should be noted that at top management level the municipality has implemented targets and it is in compliance with the Equity plan. Challenges still remain in the category of disabled persons and women. The solution to this is to:

• Implement targeted recruitment process (Targeting women and the disabled)

8.5 Job Grade Analysis

Job Grade Analysis

8.6 Vacancy Rate and Turnover

The total staff complement based on the reviewed organizational structure stands at 1901 with a 3.6% turnover rate. The turnover is as a result of amongst others; the highly regulated environment, challenges of retaining skills as a result of rigid wage/salary grades. Seven (7) Sec 56/7 positions have been filled for the period in question and only two (2) positions are vacant which are new position as a result of the review of the organogram.

8.7 OCCUPATIONAL HEALTH & SAFETY (OHS)

Occupational Health and Safety is not only the responsibility of the unit but a function that is applicable at all Strategic Business Units. Occupational Health and Safety is about compliance issues that not only include the Occupational Health and Safety Act but the compliance factor stretch over a variety of legislations including Mine Health and Safety and Railway Safety Regulator Act.

On 9 May 2018, Cabinet approved the Occupational Health and Safety Amendment Bill of 2018, which seeks to amend the current legislation, namely the Occupational Health and Safety Act, 85 of 1993. The Bill provides protection for workers regarding injuries and diseases in the workplace. A health and safety management systems is outlined which is in line with best practices, aimed at safe working conditions.

Major changes that will have a direct impact on the Municipal Manager is the fact that penalties will increase from R200 000 to R5 million, Department of Labour will also be able to issue spot fines up to R50 000. All the legislations point towards a Safety Management System to be implemented; the only system currently is the ISO 45001:2018, Occupational health and safety management systems.

The unit is also responsible for all medical screenings of employees that expose employees to occupational health risks such as noise, vibration, ventilation, gasses and illumination risk. Lately ergonomic issues have also started contributing to injuries and this could directly relate to the office furniture and workplace designs. The Medical Surveillance Policy was approved and budget for to address this responsibility.

All injury on duty incidents are reported by this unit to the Compensation Commissioner. This is done electronically to the Department of Labour. Due to the fact that the Commissioner is not paying hospitals and doctors our employees do not always receive the quality treatment they deserve. All injuries are investigated and risk assessments are conducted for discussions

on the relevant Strategic Business Units Health and Safety Committees. This is a legislative requirement.

In the event of serious injuries, the Department of Labour will conduct an investigation regarding this injury and this unit, represent the Polokwane Municipality. Occupational Health and Safety is also responsible for the drafting of safety specifications of personal protective clothing and ensure employees do wear them. Previously the unit also ordered and distributed the personnel protective clothing, this has now been stopped due to the fact the unit cannot in terms of compliance be the judge and jury.

All construction projects must have site specific health and safety specifications and baseline risk assessment that the unit develop and must be included in the tender. Once the contractor has been appointed this unit must approve the health and safety file before any construction may start. During some of the construction projects Health and Safety Consultants are appointed and the management of these consultants are the responsibility of this unit.

The unit also do have the responsibility to ensure that all legislative required health and safety training is identified and that employees do attend these training. The training budget is centralised and this unit do not have control thereof.

8.7.1 Challenges for OHS unit

- Staff complement is not sufficient to ensure that proper consultations and compliance are effective and manage health and safety pro-actively.
- A proper electronic health and safety management system needs to be implemented.
- Budget for operational issues for example external audits, up skilling and training are not sufficient.
- No structured continuous improvement programs are being followed.
- Strategic Business Managers and employees must receive occupational health and safety training to ensure that a better level of compliance could be achieve.
- General occupational health and safety skills should be improved.
- Lack of proper scheduled maintenance programs that have an effect on the health and safety of employees and public this include:

o Lifts

- Fire alarms and smoke detection systems
- o Air conditioner

8.7.2 Injury On Duty per SBU

8.8 EMPLOYEE RELATIONS

Employment relations are important and viewed as key in the creation of a successful organization, economic prosperity. People employment is viewed as a critical factor for the development of any organization. The point of engagement with organized labour in the Local Labour Forum is important. Training of Line Managers on employee relations remains key to the management of relationship in the workplace. Training must not only be restricted to line managers, worker representatives form an important part in employee relations, and therefore any capacity building initiatives should include worker representatives.

Workshops on employee code of conduct were held across all Directorates in order to make employees aware of the required standard for conducting oneself. SBU's like Water & Sanitation, Waste Management, Roads & Storm water and Environmental experienced challenges with rampant absenteeism and they were advised on how to deal with absenteeism and workshops with employees were held upon their request to workshop them on how to seek leave of absence. Generally, the discipline level of the Municipality is satisfactory but we have realised a rising trend towards diesel theft, and we are hopeful that the investigations that we are currently embarking on will curb this concerning trend before it becomes uncontrollable. Major misconduct dishonesty or theft and negligence.

8.8.1 Employee Assistance Programme (EAP)

Employee Assistance Programme is important in any organization as it deals with the wellbeing of employees. EAP offers services that address personal, family problems and workrelated problems. The range of problems that they assist with includes: ill-health, poor productivity, personal finance management, emotional instability, stress and depression management, trauma, grieve and various addictions amongst others. Services are offered internally (to employees and management) and externally (to employees and their immediate families). Two service providers have been appointed for a period of three years to assist those who need further specialized intervention.

Employees often encounter challenges as they interact with their counterparts' on a daily basis both in the workplace and outside. Some of employees who seek assistance are affected by poor working relations, lack of resources, unproductive communication channels and relations with superiors.

It would be in the best interest of the Employer and Employees to have regular team cohesion sessions, attend health proactive programme, self enhancement activities, as this will result in energised, goal orientated employees who are set to meet the objectives of the organization; resulting in return on investment for the employer.

EAP also incorporates proactive wellness programmes. It is very imperative for employees to be empowered on wellness issues, so that they can be informed and always be in the know of new medical developments or research findings which could promote healthy lifestyles. Proactive Information sharing sessions are conducted on issues such as cancer, substance abuse, HIV & AIDS, stress management, healthy lifestyle, work-life balance and so forth. Health screenings are also done quarterly in order to conscientise about their health status and make it part of one's lifestyle to undergo regular medical check-ups. These health screenings also help with early detection of health concerns. There is a need for employees to take proper care of their health and to participate in wellness programmes.

The Employee Assistance Programme has established a good working relations with stakeholder such as Old Mutual and Sanlam who are rendering financial wellness to our employees freely. This will go a long way in reducing the financial burden that they are subjected to which has resulted in a number of workplace challenges such as absenteeism, stress, poor productivity and high turnover of resignation due to debts.

The functionality of the Peer Educators programme within the workplace – this has prompted a positive outlook on the EAP activities such as wellness champions and promotion of healthy living, as by virtue of having support system in a form of health champion or an enabler it makes things easier for those who are in need of support and knowledge. The availability of peer Educators within all the directorate and clusters have created a channel of communications for employees and the EAP unit.

8.9. RECRUITMENT

Municipalities are a sphere of government that is closer to communities. The challenges of transformation place these municipalities in the centre of the job markets where competition is high. In order to survive municipalities must ensure that to succeed there should be a rigorous recruitment and selection process which is aimed at employing the right people with necessary competencies and attributes in order to accelerate service delivery.

In order to make smart hiring for top talent the municipality has approved a recruitment policy as well as a scarce skill policy. After all, an institution's productivity and profitability depend on the quality of its workers. The policies, considers a mix of factors, including credentials, work experience, personality and skills.

Challenges of a highly regulated bargaining environment still persist although as an institution we have policies in place to attract and retain talent. Ninety-One (91) vacancies filled. The turnover rate is reasonable at 3.6% it is attributed to the high unemployment rate as employee turn to stay longer except in the high skill category.

8.10 FLEET MANAGEMENT SERVICES

Polokwane Municipality has a Fleet Management Services unit which is situated in Ladanna area. The unit responsibilities include:

- To provide Fleet Management operational support to the municipality through effective provision of roadworthy vehicles.
- Procurement and disposal of vehicles in accordance with SCM policy.
- Vehicle contracts management.
- Vehicle administration (licensing and registration).
- Maintenance and repairs coordination.
- Vehicle allocation and utilization monitoring.

- Fuel management.
- Facilitation of accident claims and repairs.
- Monitoring of the fleet asset register.
- To ensure compliance to the relevant Acts and regulations such as the National Road Traffic Act, AARTO Act and OHS Act.
- To develop, implement and review fleet management policy.

8.10.1 Total Fleet for Polokwane Municipality

Currently the Municipality has overall 677 of which 597 is active in operation

Council Fleet = 362

Fleet Africa =225

Special Car Allowance Scheme for Traffic and Law Enforcement Officers =90

8.10.2 Challenges of fleet SBU

- Ageing of Fleet
- High Maintenance Expenditure
- Misuse / Negligence

Ageing of Fleet

The municipality has a total of 460 of old fleet and a total of 80 that is uneconomical to repair. Furthermore, the municipality intends to dispose about 127 units of the Old Municipality fleet due to ageing. (Guided by the Municipality Fleet Policy)

- Municipality Owned Old Fleet
- Municipality Owned Old Fleet 235
- Operational 155 (98 to be retained)
- Non Operational 80
- Total no to be disposed in total 127

| Item No. | Туре | Number |
|----------|---|--------|
| 1. | Luxury vehicle (Executive Mayors vehicle) | 1 |
| 2. | Sedans | 22 |
| 3. | LDV | 33 |
| 4. | 4 Ton Trucks | 5 |
| 5. | Compactors | 3 |
| 6. | Load Lugger | 2 |
| 7. | Trailers | 38 |
| 8. | Water Trailer | 5 |
| 9. | Tractor | 2 |
| 10. | Minibus | 2 |
| 11. | Cherry Pickers | 1 |
| 12. | Motorbikes | 6 |
| 13. | Grader | 2 |
| 14. | Grab | 1 |
| 15. | Generator | 2 |
| 16. | Roll on – Roll off | 1 |
| 17. | Tipper Truck | 1 |

8.10.3 Categories of Vehicles to be Disposed /Auction

8.10.4 High Maintenance Expenditure

During the 2018/2019 the Municipality have incurred a high maintenance expenditure pattern on fleet maintenance. The below table is reflecting the Municipality maintenance expenditure patterns for various financial year end – 2017-2018 and 2018/2019

| Months/Year | PLM SCM & FLEET AFRICA | MINATLOU |
|-------------|------------------------|----------------|
| Aug-17 | R 1 601 243.59 | |
| Sep-17 | R 2 902 171.68 | |
| Oct-17 | R 1 008 413.70 | |
| Nov-17 | R 780 207.54 | |
| Dec-17 | R 808 758.00 | |
| Jan-18 | R 827 867.04 | |
| Feb-18 | R 1 539 057.98 | |
| Mar-18 | R 548 742.28 | R 728 745.28 |
| Apr-18 | | R 274 244.63 |
| May-18 | | R 766 152.42 |
| Jun-18 | | R 689 340.55 |
| Jul-18 | | R 1 160 447.61 |
| Aug-18 | | R 1 450 905.76 |
| Sep-18 | | R 1 500 910.49 |
| Oct-18 | | R 1 125 730.64 |
| Nov-18 | | R 1 521 384.05 |
| Dec-18 | | R 922 848.14 |
| Jan-19 | | R 1 035 333.37 |
| Feb-19 | | R 1 096 017.46 |
| Mar-19 | | R 1 564 800.84 |
| Apr-19 | | R 1 795 124.40 |
| May-19 | | R 1 817 887.45 |
| Jun-19 | | R 1 161 913.27 |
| Jul-19 | | R 1 578 553.34 |

The main focus on the table above should be on the total number of fleet that were maintained during that particular year.

- During the 2017/2018 financial year the total number of vehicles that the municipality was maintaining was 460.
- Currently in the 2018/2019 financial year the municipality has increased its fleet to the total of 677, of which 460 units are old fleet which its maintenance is high.

Even though there was a fleet increase the budget allocation for maintenance remained the same. The budget allocation could not cater for the overall financial year and this hampered SBU's to render good service to our communities.

Misuse/ Negligence

As Fleet Management Unit we have observed that there's high volume of misuse of council vehicles due to the following:

- Driver negligence
- Lack of Operators skill

The guiding municipal framework of how misuse is handled is guided by the Council approved Fleet Policy Clause 14 – Safe Custody of Municipal vehicles

> Clause 23 – Irregular improper and authorised use of municipal transport Clause 25 – Suspension of Officials from driving municipal vehicles

8.10.5 Interventions by the Fleet Unit

- A budget of R80mil has been allocated to the municipality for the acquisition of new fleet in the 2019/2020 financial year
 - ✓ R30 mil for red fleet
 - ✓ R50mil for vanilla fleet
- As a corrective measure to reduce high maintenance expenditure, the municipality has embarked on an exercise to upskill all the identified municipal drivers on different fleet vehicles. Our key focus will be on Operators for specialised vehicles and machinery, training will be provided in an attempt to avoid unnecessary mechanical breakdown and to reduce high maintenance expenditure cost. Training programme is currently facilitated by HR Training with all identified SBU drivers. Training to be offered are for the following fleet categories:
- 1) Graders
- 2) TLB
- 3) Cherry Pickers
- 4) Grab
- 5) Compactor
- 6) Tractors
- 7) Fire Trucks
- 8) Compressor
- 9) Load Lugger
- 10) Roll on Roll off
- 11) Advance Driver Training

Fleet management Unit renders support to the overall municipality for them to achieve their municipal service delivery programmes. For management purpose fleet unit are submitting monthly vehicle utilisation reports to Managers and Assistant Managers to make them aware of their vehicle usage to SBU's (i.e. maintenance expenditure, fuel expenditure, accidents, vehicle movements-tracking) to curb the risk.

Fleet Management Unit provides fleet management training to SBU's on how to manage their fleet operations on a day to day basis.

Corporate Directorate plans to establish a committee that will focus on driver negligence/abuse, the policy is currently at the labour forum for scrutiny.

8.11 INFORMATION COMMUNICATION AND TECHNOLOGY (ICT)

The world has seen extraordinary development in information and communications technology with significant global dimensions. It is impossible to ignore the importance of ICT wherever and whenever good governance is pursued. The use of ICT has been identified as the other challenge facing the transformation of municipalities, both within local government agencies and also regarding to external stakeholders (traditional leaders, citizens and local businesses).

The effective and intelligent use of ICT has been an essential component of modern administrative science. It is a fact that ICT has great potential to speed up the transformation process. However, the public service track record in the use of ICT is far from ideal. It is a verity that ICT has brought a bright perspective to the human condition, but two factors must be taken into consideration, in order to take advantage of it and to facilitate public participation; accessibility and availability. If this aspect is not addressed, the use of ICT for more efficient public-service delivery might become a value which serves the vested interests of a few stakeholders, while others view them as constraints to their freedom.

ICT plays an important role in strengthening democracy, as it improves the relationship between citizens and public administration. The relationship includes the information privacy of citizen boundaries within and between the organizations; political and public accountability; and citizenship in a consumer democracy. Strategically use of ICT in a public service environment produces the following benefits:

- Speed or quality of service delivery
- Increased public access to service agencies or departments
- The facilitation of remote communication and transactions
- Enhance transparency

The integration of public services and the destruction of the administrative walls Separating bureaucratic departments and government agencies.

8.11.1 ICT – Smart City Concept

During the State of the City Address, the municipality announced its adoption of the 2030 Smart City Vision as a way of fast tracking service delivery to the community. Consistent with

the 2030 Smart City Vision, the city launched six pillars that will assist the municipality to work towards the realization of becoming a Smart City; this will be the city that is characterized by a Smart Economy, Smart Environment, Smart Governance, Smart Living, Smart Mobility and Smart People. This Smart City concept is carried within the city's vision to be the "The ultimate in innovation and sustainable development".

All six of the aforementioned elements of a smart city can increasingly become more achievable and manageable by being connected through the use of ICT and developing technological systems. Furthermore, we believe that there is a great opportunity for this council to join other smart thinking cities the world over who see the opportunity to own ICT infrastructure which may be a major source of revenue in the future.

8.11.2 ICT Governance

The ICT SBU is required by the Corporate Governance of ICT Policy Framework (CGICTPF) to develop and maintain an ICT Architecture, consisting mainly of the **ICT Strategic Plan** (also known as an ICT Strategic Master Systems Plan) **ICT Implementation Plan, and Operational plan**; and those three plans are approved and adopted

8.11.3 Alignment of Municipal Objectives and ICT objectives.

The below diagram shows the alignment of Municipal objectives and ICT objectives.

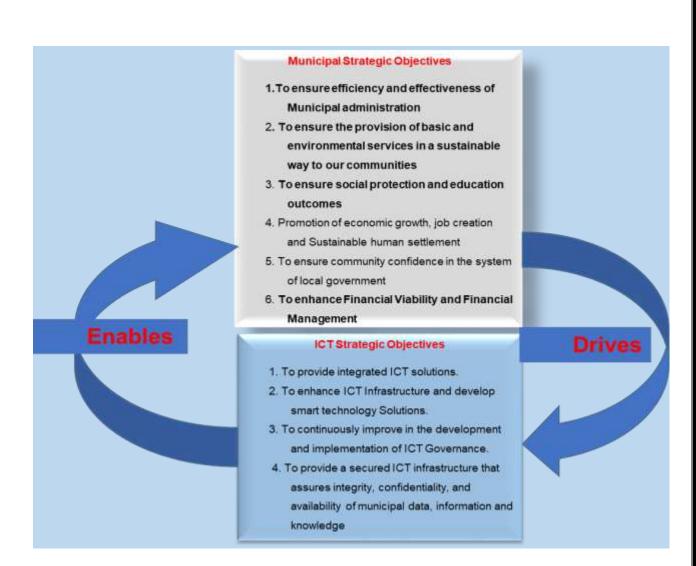

Figure: Objectives and Alignment

8.11.4 ICT Challenges

- a) Lack of Electronic Records Management System.
- b) Telephone services not functioning properly especially in critical office like control centre.
- c) Lack of integrated systems.

Interventions

- a) Enterprise Resource Planning Implementation.
- b) Network Connectivity and VOIP Telephone System Implementation.

8.11.5Enterprise Resource Planning Project

Objective:

- a) To digitize and modernize business operations to enable delivery of services effectively and efficiently.
- b) To upgrade server hardware, financial management, and HR system.
- c) To automate manual operations.

- d) To resolve the incorrect billing currently experienced.
- e) Implementation of Electronic Records Management system

Deliverables:

- a) ICT Infrastructure Upgrade.
- b) Implementation of Financial Management System
 Revenue Management
 Supply chain Management
 Billing
 Contract Management
- c) Implementation of Human Resource Management.
 Employee's self service

Payroll

d) Integration of 3rd party systems to FMS

TCS

GIS

Performance Management

Risk and Audit management system

Library system

Progress to date:

- a) New server room hardware implemented.
- b) Migration of data to new servers has started.
- c) Security firewall system implemented.
- d) Internet filtering system implemented.
- e) Reliable backup and disaster recover solution implemented.
- f) Financial Management System and Human Resource Management systems implemented

8.11.6 New ICT Hardware

Below picture shows the new hardware installed as part of Data centre upgrade.

Figure: New ICT Hardware

New Hardware Benefits:

a) The new storage of has 75 TB capacity which is two times bigger than the old system (35 TB).

- b) Backup and disaster recovery system.
- c) Improved security systems with new firewall,
- d) Improved compliance e.g. AGSA findings, and
- e) Stability and improved response time of systems such as email, internet and other systems.
- f) High availability of critical server equipment.
- g) Hardware is under manufacturer warranty maintenance unlike the old infrastructure.
- h) Equipment will sustain Council for the next 5 years with minor upgrades required.
- i) The hardware will enable the implementation and smooth running of integrated ERP system.

8.11.7 Network Connectivity and VOIP Telephone System Implementation

Objectives:

- a) To implement a reliable network connectivity to all 56 site offices.
- b) To implement voice over IP telephone system to all 56 sites and Civic Centre.

Deliverables:

- a) Replace old 2 mbps links with faster 50 mbps bandwidth links.
- b) Implementation of new telephone system that supports queueing system.
- c) 24/7 network connectivity support for a period of 36 months.

8.11.8 Network Connectivity for Aganang and Chuene/Maja Cluster

The below diagram shows the network connectivity for **Aganang cluster and Chuene/Maja** cluster

Connectivity Benefits

- a) Fast network connectivity with 50 mbps bandwidth link.
- b) High availability of critical services such as email, telephones, internet and financial system.
- c) Council will be able to decentralize services to all 56 municipal sites.
- d) Built-in integration with mobile link in telephone system
- e) Telephone system support queueing system for switchboard.
- f) Scalable network that accommodates new requirements.

8.12 RECORDS MANAGEMENT

8.12.1 The Objectives of Records Unit The main objectives of records unit are:

- a) To keep all Records and perform the general administration of Council, Mayoral Committee and all other Committees established by Council.
- b) To attend to the electronic document management system
- c) To move away from paper documents to electronic documents for all committees.

8.12.2 Challenges for Records Unit

- a) Lack of Electronic document management system
- b) Lack of storage cabinet for current files

Solutions:

- a) There are allocated funds for this financial year 2019/20 to ensure that Electronic document management system is implemented.
- b) Institution record management awareness or roadshow.
- c) Request HR training division to cover Record Management as part of induction package for new employees.

8.13 LEGAL SERVICES

8.13.1 Core Responsibilities for Legal Services

The municipality has a well-established legal services unit which is responsible for the following:

- Co-ordinate, facilitate and manage all external and internal legal actions and processes on behalf of and against the Municipality
- Develop and review by-laws and policies
- Develop and review a system of delegation of powers
- Advise on matters of legal compliance
- Effective legal support services
- Municipal policy framework
- Contracts (including service level agreements) drafting and vetting
- Finalization of (long) outstanding litigious matters.
- Management of Illegal Land Use.

8.13.2 Four Specialized Areas at Legal Services:

The Unit is further sub- divided into the following 4 Specialized areas:

- 1) Litigations
- 2) Properties
- 3) Legislation and law enforcement
- 4) Governance and corporate affairs

The unit has FIVE lawyers appointed to handle each area of specialization in the municipality

> Litigation

There has been growth in litigation initiated by law firms and private parties since the beginning of the new democracy; this signifies the population exercising their rights freely in the courts of law. There is a need for the Municipality to put measures in place to reduce costs where is necessary to do so. There is a panel of qualified and experienced Attorneys from where appointment to represent the Municipality is affected. Attorneys are appointed on a necessity basis as some matters are according to their complexity handled internally and/ or referred to the Insurance with a view to reduce legal fees. As a way of reducing spending on cases, matters that are less complex are handled internally and when the matter is ripe for hearing an Attorney is appointed to represent the Municipality as and when a need arises

Litigation Challenges

- Civil litigation takes a long time to finalise and this impact on the budget as there has to be more funds budget to finalise the matter.
- Further instructions from User departments not furnished.
- Lack of financial resources (constraint budget).
- Non-compliance with rules and regulations resulting in litigation.
- No progress from matters referred to the Insurance.

Interventions for Litigations

- Attorneys called for in house clarity where same is sought.
- Instruction to dismiss long outstanding matters issued.
- Supervisory intervention in the event of instructions not being furnished.
- In house drafting of pleadings to alleviate high spending on the budget.

> Governance and Corporate Affairs

Legislation and Law Enforcement

- By-laws drafted & adopted by council pending promulgation-8
- By-laws adopted & promulgated-7
- Policies drafted & pending adoption by council-7
- Policies adopted-6

Challenges Experienced in the drafting of by-laws and Policies

- It happens from time to time that SBU's do not include Legal Services in the consultation process when embarking on the drafting of various by-laws and policies.
- This conduct causes delays in the process and also creates a risk for the municipality where documents which have not been legally vetted gets adopted by Council.

Intervention aimed at addressing Challenges

- Regular updating of the Municipal Code Enables Legislation and Law Enforcement to effect amendments to and to update existing policies and by-laws and presenting such documents to the relevant SBU's requesting their comment and inputs.
- Such relevant policies and by-laws are then reviewed and updated via this initiation process, thus minimising possible risk.

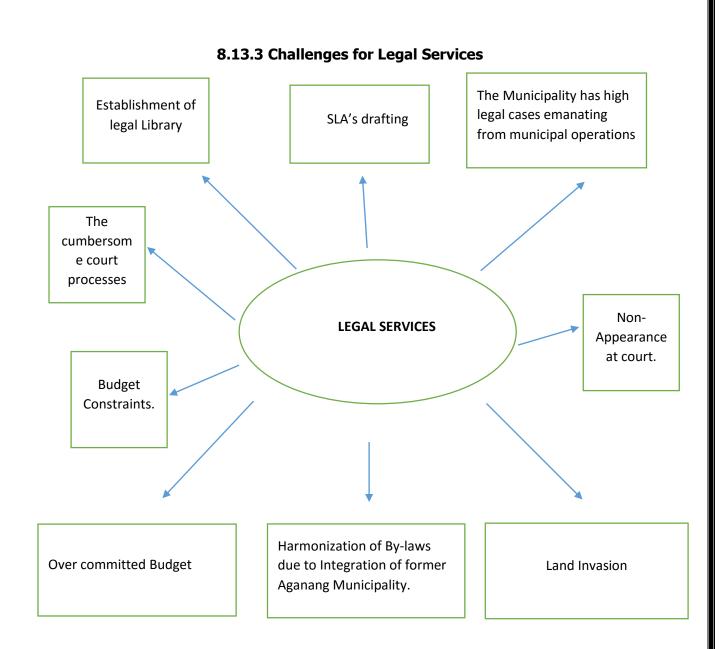

Challenges Property Management

- Purchasers relies on financial institutions to finance the sale of the immovable property through mortgage bond and the process delays the transfer of ownership
- Dealing with project managers who does not have necessary expertise in property matters or real estate

Interventions Property Management

Property Management SBU should manage ALL Council owned properties.

 The Department of Rural Development has brought service closer to the City of Polokwane by opening the Office of the Registrar of Deeds and this will enable the Municipality to expedite the transfer of ownership of the immovable properties and registration of Notarial lease agreements.

8.13.4 Interventions for Legal Services

- Appointment of legal Services Officials to be members of Bid Specification Committee (BSC).
- Approval of quotation for quality assurance and effective drafting of SLA's finalization.
- Budget provision
- Handling of litigious matters internally prior to handing them over to private attorneys
- Constant engagement with the justice cluster(Judiciary) to ease the delay in dealing with contraventions of Municipal By-laws.

8.14 FACILITIES MANAGEMENT

The Municipality has established the SBU to assist in maintaining and up keeping of municipal buildings. The SBU is responsible for routine maintenance over 110 municipal facilities. The objective of the SBU is to maintain municipal facilities in accordance with SANS 10400:1990, SABS Standard Act: 2008 and the Occupational Health and Safety Act Regulations Act 85/1993 and Safety at Sports and Recreational Events Act 2010 (Act 2 of 2010) (SASREA) in order to provide a conducive environment to the employees and the community at large, utilising or visiting the Municipal offices.

8.14.1 Procedures for Maintenance Services

The following procedures are in place when maintenance complains or request have been received at the facility management unit:

- Every maintenance service request forwarded by a client to the office of facility management SBU shall be recorded.
- Once the request has been received a response to acknowledge the request is sent back to the client.
- At the closure of each request the client shall sign off on the job card which was opened at the beginning of the request.
- Should a job card come back with comments that it cannot be done internally; the client will be informed of such and the request will further be attended to by a service provider until its closed.

8.14.2 Priority of Work and Response Times

Priority of work is taken up in three stages:

- (i) <u>High priority</u>: where maintenance is required by law or is life threatening and affects or compromises the core business of the Municipality. This request shall be attended to at our earliest convenience.
- (ii) <u>Medium priority</u>: where maintenance is not of a high priority. This request shall receive the priority it requires.
- (iii) <u>Low priority</u>: where the core business of the Municipality is not compromised by the need of maintenance. This request shall receive the priority it requires.

8.14.3 Maintenance of Municipal Facilities

Routine maintenance

Routine maintenance is regarded as a service attending to day to day maintenance needs. This type of maintenance is done when maintenance requests are reported to facility management by the client on a day-to-day basis.

Scheduled Maintenance

This type of maintenance is regarded as maintenance needs identified by way of annual, quarterly and monthly inspections conducted by the facility management SBU. The findings are then handed over to PMU for further assessment and implementation.

| ITEM | SERVICE/TRADE | DESCRIPTION |
|------|------------------------|--|
| 1. | Electrical maintenance | Repair/replace plugs, switches, light fittings and bulbs |
| | works: | repair/replace electrical reticulation within erfs |
| | | Verification and certification of electrical installations on premises |
| | | repair/replace distribution board |
| | | |
| | Dhumbing maintananaa | |
| 2. | Plumbing maintenance | Repairing/replacing of damaged sewer pipes |
| | works: | •Replacing of sanitary ware: basins, toilet pots, seats |
| | | Replacing of damaged toilet mechanisms |
| | | •Unblocking of sewer pipes |
| | | Repairing/replacing of damaged water supply pipes |
| | | Repairing/replacing of damaged rain water gutters |
| | | •Repairing/replacing of element in the geyser and geyser complete |
| 3. | Air conditioning | Repairing of elements in the air-conditioners and heat pumps |
| | maintenance works: | Replacing of damaged elements, gas etc. |
| | | Servicing of air-conditioners and heat pumps |
| 4. | Sound and microphones | Repairing/servicing and replacing of microphones |
| | maintenance works | Repairing/servicing and replacing of amplifiers |
| | | Repairing/servicing and replacing of speakers |
| | | •Repairing/replacing of cables and wires |
| | | |
| | | |

8.14.4 Trades Conducted Under Routine Maintenance

| ITEM | SERVICE/TRADE | DESCRIPTION |
|------|----------------------------|---|
| 5. | General building | Repairing of damaged brickwork |
| | maintenance works | Repairing of damaged plastering and painting work |
| | | Repairing/replacing of damaged carpets |
| | | •Replacing of damaged window panes |
| 6. | Carpentry and joinery | |
| | maintenance works | Repairing/replacing of damaged ceilings |
| | | Repairing of damaged wood furniture and doors |
| | | Repairing/replacing of door locks, hinges, window stays and |
| | | handles etc. (Ironmongery) |
| | | • Repairing/replacing of waterproofing membrane on the following: |
| | | (i)Roofs |
| | | (ii)Windows |
| | | (iii)Doors |
| | | (iv)Basements |
| | | (v)Walls |
| 7. | Precast concrete and metal | •Repairing of damaged hot steel works etc |
| | maintenance work | •Repairing/replacing of metal structures and precast concrete work |
| 8. | Fixed generators | Servicing of the generator, quarterly or per specification |
| | maintenance works | •Refilling of diesel |
| | | Testing of generators monthly (Required by law) |
| 9. | Fumigation of municipal | •Fumigation of municipal facilities |
| | facilities | Bees and birds nest removal |
| | | Removal of termites mount |
| | | •Replacing of damaged window panes |
| 10. | Supply and delivery of | Supply and delivery of building materials |
| | building and cleaning | Supply and delivery of cleaning materials |
| | material | |
| 11. | Cleaning of offices and | Deep and conventional cleaning of offices and public toilets |
| | public toilets | Issuing out of toilet papers to the public |
| | | Up keeping of cleanness of the facility during the day |
| | | Ensuring that the properties are not vandalised by constant |
| | | appearance and locking up at the end of the day |
| 12. | Cleaning and disinfection | •Cleaning and disinfection of sanitary fittings (basins, toilet pot and |
| | of municipal wide ablution | seat) |
| | facilities | Servicing of sanitary bins monthly (required by law) |
| | | Servicing of hand dryer |
| | | •Servicing of soap dispenser |

| ITEM | SERVICE/TRADE | DESCRIPTION |
|------|------------------------|---|
| | | •Servicing of seat wipes |
| | | Servicing of air fresheners |
| 13. | Servicing of the lifts | •Monthly servicing of the lifts (Library garden, council chamber; old |
| | | peter Mokaba stadium and civic centre) |

8.15 CODES AND STANDARDS FOR MAINTENANCE

Paint colours

(i) The standard paint colours to be applied on interior walls of municipal facilities are cream, white or peach, unless otherwise specified by the client as special request.
 (ii) The standard paint colours to be applied on exterior walls of municipal facilities

falls under the earthy group of colours or corporate colours, unless otherwise specified by the client as special request.

<u>Carpets</u>

- (i) Standard carpets to be used are tile carpets.
- (ii) Standard colour on the carpets is blue for all and maroon for executive offices.

<u>Tiles</u>

- (i) Tiles to be used are porcelain and should be non-slippery
- (ii) Staircase tiles must be fitted with an aluminium non-slippery strip

Roof coverings

(i) Roof coverings should have a non-reflective finish

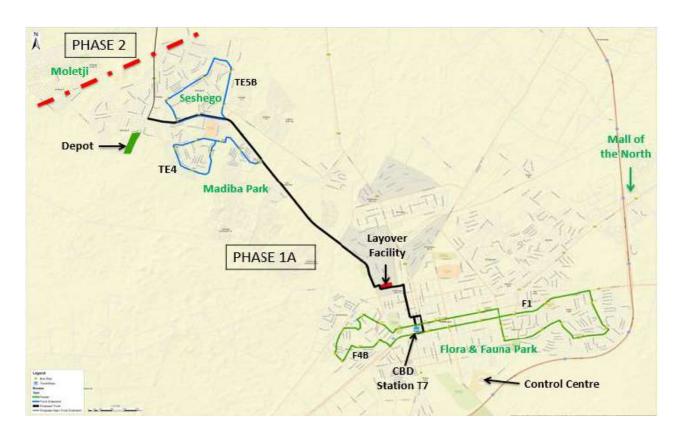

CHAPTER Nine: Roads and Transportation Services

9.1. Leeto la Polokwane

9.1.1. The Benefits of Leeto la Polokwane

- Leeto La Polokwane is on the brink of becoming operational and has been nominated as one of the flagship program by the Minister of Transport.
- In terms of operational readiness, Leeto La Polokwane is currently finalising the infrastructure and engagements with stakeholders to actualise the operations.
- The Municipality allowed its residence to name their transport system through intensive public participation processes. Some of which allowed for creativity in suggesting a name that emulates and represent the culture of Polokwane.
- The Public Transport System is intended to transform the public transport sector through the provision of a high-quality and affordable public transport system in line with the national policy. The Public Transport System will also be aimed at reducing the overall journey times for public transport users.
- The key characteristics of the system will be an improvement in access between residential areas and major economic nodes. The main objective of the Public Transport System is therefore, to provide new and attractive road-based public transport services.
- Submitted a credible business plan to both National Treasury and National Department of Transport
- Ongoing engagements with the affected Taxi industry operators, to this end Process Agreements on Vehicle Operating Company Agreement (VOCA) and Compensation were signed to usher in the negotiation process.
- The Seshego Polokwane Taxi Association (SPTA) leadership impasse caused delays in terms of the negotiation processes and ultimately the launch date which is earmarked the 2019/2020 financial year still.
- Procurement process of the buses has been concluded
- Advertised for the procurement of the AFC, PTMS to be fitted in the buses and the control centre.
- The construction of the Depot, Layover Facility and the Station at General Joubert is underway.

9.1.2 Road Network Map for Leeto

9.1.3 Commuter Transport Corridors and Facilities

There are two major commuter transport corridors in Polokwane:

- Between Seshego/Moletji and the CBD
- Between Mankweng and the CBD

Seshego/Moletji Corridor:_This corridor serves the \pm 38 000 households north-west of the CBD. Most commuters in this area stay within 15 km from the CBD in the Seshego, Perskebult, Blood River, Moletji and surrounding residential areas. According to the 2010 National Household Travel Surveys, less than 4% of working people staying in Seshego also work there. 74% of working people who stay in Seshego, work in Polokwane. The corridor is served by taxis and buses with the modal split 4:1 in favour of taxi passenger trips. The split between public and private transport is also 4:1 in favour of public transport trips.

Based on travel-time surveys undertaken in 2012, the average travel speed on this corridor (including stops) is around 35 km/h. This means that commuters from Seshego take approximately 25 minutes to travel the average distance of 15 km to town. This excludes other legs of the journey such as walking from the drop-off to the actual place of employment.

While the Seshego-Polokwane Taxi Association serve the Seshego area up to \pm 15 km from the CBD, the Moletji Taxi Association serves the area further north, as far as 80 km from town. The population density north of Perskebult is however very low and the number of passenger trips are low in comparison with those from Seshego.

Mankweng Corridor: Taxis from the Mankweng Taxi Association make use of this corridor to serve commuters staying in villages in the Mankweng and Moria areas, between 25 and 50 km east of the CBD. Taxis from the Sebayeng and Dikgale villages along the northern municipal boundary use the R81 while villages in the Mankweng and Moria areas are served by taxis using the R71. The 25 km travelled on the R71 increases the average speed to 50 km/h meaning that a taxi from University of Limpopo in Mankweng will cover the distance of 30 km to town in \pm 35 minutes. The 40 km to the Boyne taxi rank in Moria will take \pm 50 minutes.

9.1.4 Mode of Public Transport Facilities

Seshego/Moletji facilities: Public transport facilities on this corridor consist only of bus/taxi stops and lay-bys on some arterial roads, because commuters are picked-up along the routes in the AM by both taxis and buses, there are no formal ranks in the residential areas. In the PM, commuters are also dropped off along the route. The fact that there is no need for modal transfers or transfers from long distance to local taxis also negates the need for ranks in the area.

Mankweng facilities: Because of the longer distance from town compared to Seshego, Mankweng has a more vibrant commercial center. The University of Limpopo (Turf Loop campus), the shopping center and the hospital form the core of the economic hub in Mankweng. Public transport users coming from the university shopping center and hospital rely on taxis departing from the Turf Loop Plaza Rank and the Hospital Rank to take them to town or the surrounding villages. These ranks are not specifically used during the AM or PM peak as is the case for most ranks, but are used at a low intensity throughout the day as nurses finish their shifts and students come from class.

Polokwane CBD facilities: For inward trips, most of which are during the AM peak, bus and taxi passengers are dropped-off at various bus and taxi stops throughout the CBD. The lack of lay-bys or formalised drop-off points in the CBD however forces taxis and buses to stop in the roadway to off-load passengers. This blocks the general flow of traffic resulting in unnecessary congestion and vehicle-pedestrian conflict.

It is generally accepted that taxis and buses off-load commuters along the route instead of at a central rank. This is done to reduce walking distances and enable commuters to get to work quicker. For outward trips, most of which are during the PM peak between 16:00 and 19:00, taxis and buses depart from various ranks within the CBD. There are more than 23 taxi facilities in the Polokwane Municipal area of which approximately 60% are formalised.

A total of ± 17 ranks provide local commuter services. There is only one informal rank specifically dedicated for long-distance taxis, while the remaining ranks provide both local and long-distance services. There are also four taxi holding areas of which only one has been formalised. There is a rank in Hospital/Silicon Street for subsidised commuter buses and a terminus in Thabo Mbeki Street for long distance buses. Metered taxis do not currently have allocated holding areas but on street locations are used to hold and load passengers.

i) Pick 'n Pay Taxi Rank a (Church Str)

- ii) Pick 'n Pay Rank a (Pres Paul Kruger / Devenish Str)
- iii) Taxi Holding Area (Along Nelson Mandela Drive)
- iv) Taxi Holding Area (Devenish / Buite Str)
- v) Taxi Holding Area (Rissik / Buite Str)
- vi) Spar Taxi Rank (Rissik / Bok Str)
- vii) Checkers Taxi Rank (Biccard Str)
- viii) Oriental Plaza Taxi Rank (Excelsior Str)
- ix) Dahl Taxi Holding (RSA Café : Dahl between Grobler and Thabo Mbeki Str)
- x) Westernburg Taxi Rank(Ben Harris Str)
- xi) No. 87 Paul Kruger Street Long Distance Taxi Rank(Privately owned)
- xii) Mall of the North Taxi Rank(R81)
- xiii) Sasol Taxi Rank: Paledi Mall (R71)
- xiv) Boyne Taxi Rank (R71)
- xv) Bus Rank (Silicon Str)
- xvi) Mankweng Hospital Taxi Rank
- xvii) Turfloop Plaza Taxi Rank (University of North Str)
- xviii) Mankweng Taxi Rank 2 (opposite the hospital)

Metered taxi data

- Metered taxis operate all over and outside Polokwane;
- Polokwane metered taxi association have 64 cabs with 31 owners;
- Capricorn metered taxi association has 113 cabs with 83 owners;
- They operate 24 hours a day;
- Metered taxis are not branded;
- No facilities provided for metered taxis, subsequently they stop all over town.
- Less than eight (08) are legally operating

Currently metered taxis hold at the following locations:

- Pick 'n Pay in Church Street between Devenish Street and Rissik Street;
- Shoprite located at the corner of General Joubert and Thabo Mbeki Street;
- Grobler Street between Schoeman and Landros Mare Street;
- At Savannah Mall;
- Churles Parking area between Biccard and Hans van Rensburg Street;
- Capricorn Metered Taxi Association are still waiting for operating licenses.

9.1.5 Polokwane International Airport

Although there are **two airports** in Polokwane (Gateway Airport Authority Limited **(GAAL**) and Polokwane Municipality Airport). Polokwane International Airport (GAAL) is flying passengers between Polokwane and Johannesburg.

The airport is located approximately **5 km** to the north of the Polokwane CBD (Central Business District).**SA Air link** has a scheduled flight service to between Johannesburg (OR Tambo) and Polokwane under the management of Gateway Airport Authority Ltd (GAAL). The service is code shared with South African Airways as the marketing carrier and SA Air link as the operating carrier.

There are also local and international unscheduled flights that make use of this airport. The approximate annual flights are between 4000 and 5 000 with an approximate passenger traffic of 38 000. There are four flights from Monday to Friday, one flight on a Saturday and two flights on Sundays.

9.1.6 Polokwane Municipality Airport

Polokwane Municipality Airport is leased to a private operator. Only private airplanes are landing in this airport. The lease agreement is with Land use under City Planning. This Airport is using the GAAL tower for taking off. The Municipality is not contributing financially to the rental of the tower, which leaves GAAL with the responsibility of renting the tower for the Airport that is not monitored. The near accidents that are audited in Polokwane Municipality Airport are counted under GAAL. The Monitoring and Regulation of Polokwane Municipality Airport in terms of Civil Aviation Authority compliance is very important.

9.1.7 Comprehensive Integrated Transport Plan (CITP)

National Land Transport Act of 2009 requires all Transport Authorities to develop the Integrated Transport Plans for their area for a period of Five (05) years and must be updated annually. The CIPT must be submitted to the MEC for approval. Polokwane Municipality must also submit its CITP to the Minister for approval of the Commuter Rail and Airports.

Polokwane Municipality CITP was developed in 2012 and still need to be updated. It was adopted by Polokwane Municipality and was also approved by MEC as a living document which guides the Transport Planning within Polokwane Jurisdiction.

9.1.8 Rail

The Passenger Rail Agency (**PRASA**) operates the Shosholoza Meyl long distance passenger service between **Johannesburg and Musina via Polokwane.** It is an economy class service (sitter accommodation) that operates 3 times per week in each direction.

The train leaves Johannesburg Station on Monday, Wednesday, and Friday evenings at 19:00 and arrives at Polokwane station at 03:50 in the morning. It departs at 04:30 for Musina and arrives there at 11:15.

The train to Johannesburg leaves Musina on Tuesday, Thursday and Sunday afternoons at 15:25 and arrives at Polokwane at 21:48. It then departs for Johannesburg at 22:35 and arrives there at 05:44.

There are no intermodal transfer facilities for passengers who need to transfer between rail, bus or taxi. The distance by foot, from the railway station to both the Hospital Street bus rank and the Pick 'n Pay taxi rank is **1 km**.

Given the lack of transfer facilities and the inconvenient arrival and departure times, the service is not very popular and most passengers prefer to travel by bus.

9.2 FREIGHT TRANSPORT

9.2.1 Road Freight

Polokwane is the largest town on the N1 transport corridor between Gauteng and SADC countries to the north including Zimbabwe, Zambia, Malawi, the DRC and Tanzania. Most of the freight imported from and exported to the above countries is transported by road. These trucks park all over the City during the day and night. They damage the sidewalks, Road signs and electricity poles. The construction of the **Truck Inn** was recommended by the Comprehensive Integrated Transport Plan and development of intermodal freight logistics hub at the Airport.

9.2.2 Air Freight

Due to its central location in relation to the neighbouring countries such as Botswana, Mozambique and Zimbabwe, Polokwane International Airport has a significant potential for the export of freight. Long distances to Gauteng and other provinces also create opportunities for air freight transport, specifically for perishable goods such as fruit, beef and venison produced locally. The need for an Inter-modal freight hub in Polokwane has been identified by previous studies.

9.2.3 Rail Freight

Polokwane generates fresh produce and as such, freight rail plays an important part in transporting these products to various destinations in and out of the South Africa. Due to the high cost of freight road transport, it is expected that the freight rail will boost the economy of Polokwane by transporting the products at a lower cost. Based on the Department of Transport through Transnet Freight Rail has estimated that the cost of transportation can be reduced from R1.9 billion to R1.7 billion if 35% of cargo is transported by rail. This will result in the reduction of road trucks transporting citrus fruits to port from 55 000 trips to 32 000 trips.

Due to the high cost of road freight transport, Transnet has announced plans to move more freight by rail. This is a positive development for Polokwane as it will reduce damage to roads because of high freight volumes currently transported by road. On routes such as the N1 and the R81, the percentage of heavy vehicles is as high as between 15% and 20%. The fact that up to 17% of trucks are overloaded indicates that a lot of damage is being caused to road infrastructure.

It should however be noted that it is not only overloaded trucks which damage roads. The exponential relationship between axle loads and stresses in road pavement layers means that even trucks which are within the legal limit, causes a lot of damage to roads.

9.2.4 Polokwane Integrated Rapid Public Transport System (IRPTS)

The City of Polokwane is introducing an Integrated Rapid Public Transport System (IRPTS), comprising various modes including taxes, buses and non –motorised transport service. This is in line with the National Land Transport Strategic Framework developed by the National Department of Transport. The IRPTS currently being planned for Polokwane is intended to transform the public transport sector through the provision of a high quality and affordable transport system whilst reducing the overall journey times for transport users

As part of its mandate, the municipality has continuously been engaging with stakeholders but not limited to the current public transport operators, ward councillors and committees, commuters as well as residents about the upcoming Integrated Rapid Public Transport System.

9.2.5 Transport Implications of the SDF

Polokwane is facing high migration into its towns from rural areas and which is fuelled by the expectations of finding of urban jobs. Daily migration into and out of Polokwane CBD for many workers to go and work elsewhere (mining and industrial areas) is a transport matter that needs to be understood in future planning, thus linking the urban and regional perspective is partly to be understood and described in the ITP.Such integrated transport and land-use planning strategies to achieve transport provision includes:

- The urban perspective by means of:

- Concentrating residential development at stations along public transport corridors;
- creating a high density of trip-attracting activities in central areas well served by public transport; and
- Issuing guidelines, which try to ensure that new developments are accessible to public transport.

The wider regional perspective:

- Upgraded rail, road and air transport facilities
 - Lack of transport facilities for the long distance transport services and the integration with the existing local public transport services. The integration of the above services with land use management becomes a central issue to ensure that proper transport services is provided where people live.
 - Proper land use rights and densification is promoted to make transport more effective and efficient.
 - Public transport amenities e.g. taxi- bus and railway facilities are focused in the north western part of Polokwane CBD between the Buite Street taxi holding area and the Polokwane Railway station.
 - Future links can be established between the taxi/bus terminus, the railway station and Polokwane International Airport

A specific feature of Polokwane's demographic profile is the high density Seshego and Moletji corridor north-west of the CBD. The following figure indicates household densities in Polokwane on a spatial format. The corridor provides an ideal opportunity for the development of an IRPT System which is appropriate for Polokwane's specific needs. The corridor has specific features:

- It includes the most densely populated part of Polokwane with a high demand for public transport;
- This high demand corridor stretches along Nelson Mandela Drive and New Era Road

through the Seshego and Moletji residential nodes;

- The corridor is approximately 4 km wide and 15 km long making it suitable for the development of an IRPT system;
- The residential areas along the main corridor extend over ± 80 % of the route;
- The corridor is currently served by taxis and buses there is no passenger rail;
- The residential areas along this corridor include ± 37 500 households within an area of approximately 38 km².

9.2.6 Intermodal/ Long Distance Transport Hub

Lack of transport facilities for the long distance transport services and the integration with existing local public transport services, the integration of these services with land use management becomes a central issue to ensure that proper transport services is provided where people live. Proper land use rights and densification is promoted to make transport more effective and efficient. Public transport amenities e.g. taxi- bus and railway facilities are focused in the north western part of Polokwane CBD between the Buite Street taxi holding area and the Polokwane Railway station. Future links can be established between the taxi/bus terminus, the railway station and Polokwane International Airport

9.3 TRUNK ROUTES CONSTRUCTION

IRPTN has constructed a trunk route in the median between Seshego and the CBD. Currently it is about 4,5 kilometres. This route will be used by BRT Buses for the effective and efficient scheduled service.

Polokwane Municipality under IRPTN have also constructed the Non-Motorized Transport (NMT) both sides between the CBD and Seshego, Greenside and Westernburg. This infrastructure will be used by people walking and cycling.

9.4. ROADS & STORM WATER

9.4.1 Roads and Storm Water Analysis

Polokwane Municipality is characterised by radial road network of approximately 7 495 km covering its area of jurisdiction whereby 1 364km is surfaced roads and 81% backlog of gravel roads is approximately 6 131.5km as per the recent inventory conducted by I@ Consultants. This is due to the establishment of new developments both formal and informal settlements coupled with the recent incorporation of part of Aganang Municipality into Polokwane Municipality. It is situated at the point where National and Provincial roads converge from where they radiate out in all directions providing good regional accessibility. The municipality is faced with huge challenges in providing and maintaining the local roads at an acceptable standard which ensures accessibility at all times. Coupled with the latter, there is also challenge of storm water management and control to an extent that it poses a threat to mobility, infrastructure and communities. The long term strategy of the municipality is to surface all roads within the municipal area. Based on high road backlog different strategies is implemented including preventative maintenance of the road infrastructure

The Municipality implements an average of **19km**road upgrading per annum. In the 2018/2019 Financial year the Municipality has budgeted approximately R177M for construction of access roads in townships and rural areas which will have an impact in reducing backlog of gravel roads in those areas. Although the Municipality relies on MIG Grant funds to address backlog of gravel roads in rural areas, Council has managed to secure approximately R85.6M to address back log of gravel roads in Seshego and Mankweng area. Council has however passed a resolution that, all roads that are to be upgraded by the municipality should only be municipal roads, streets and accesses. There is a new submission to advise council to consider completing the provincial roads that the municipality partly implemented. The report has already served at portfolio committee

In terms of the current analysis, City / Seshego and Mankweng Cluster have roads that deteriorated due to limited routine and preventative maintenance hence most of the roads have exceeded their design life. Last year's resolution to upgrade township's roads and rehabilitate urban roads is being implemented but only for upgrading of township's roads as the concession to rehabilitate urban roads is at halt. Councillors submitted their priority roads for upgrading 5km of roads per ward in all 38 wards to be included in the concession program. Upgrading of 5km of roads from gravel to surfacing per ward will cost approximately R1.62 Billion and rehabilitation of urban roads will cost approximately R950M which totals to 2.57Billion, of the rural roads submitted by Councillors, 96% are RAL roads and the Municipality needs to enter into a Memorandum of agreement with RAL for implementation of RAL roads. In 2018/2019 financial year Council has however set aside approximately R84.5M for the rehabilitation of roads through concession project. Implementation of 19km per annum will take the Municipality 320 years to address the backlog

Roads and storm water SBU is made out of 2 divisions but only Roads is mostly considered over Storm water, Storm water should have its own budget. The other challenge affecting the roads is the unavailability or the insufficiency of Storm water system. The Municipality has for long time neglected the issue of storm water in that there is never a dedicated budget for storm water to address areas that are too problematic. Areas like Seshego, Flora park, CBD, Welgelegen and Mankweng get flooded each time that it rains. Some areas are completely without storm water system and other areas have insufficient capacity. R8.7M has been budgeted with the Neighbourhood Development Partnership Grant for Construction of storm water system in Municipal area. Construction of low level bridges in rural area has started as requested by community during IDP consultation meetings. An average of 10low level bridges will be constructed per financial year.

The Municipality is also implementing Non-Motorized transport infrastructure projects that are funded by KFW Bank and Neighbourhood Development Partnership Grant and approximately R14.4M and R27.9M has been allocated for the implementation of these projects respectively

Traffic safety can be linked with the existing condition of roads in the municipal area. With increased road users, congestion has also increased in recent years, and has now become problematic in the City/Seshego and Mankweng clusters. In addition, road safety has become a concern with increasing accidents occurring on municipal roads. The Municipality has from the previous financial year approved five **(5) speed humps** per ward in areas that are critical. Traffic calming measures are still a problem on Provincial roads. The municipality has during the financial year 2015/16 erected two traffic lights at some of the problematic roads and for

18/19 the Municipality has budgeted R3M for erection of traffic lights. The bulk contribution policy is one of the thorny issues in that we are losing millions monthly

9.4.2 Classification of Roads

The municipality has developed the Road Master Plan that has been approved by council in 2014. This Master plan will be updated to include the incorporated area of Aganang. It was in anyway due for review and such will take place in the 2019/20 financial year.

The Roads Provincial Gazette was published and Roads authorities are familiar with their new Road Network. It is still not clear if National Treasury will fund Polokwane Municipality for the additional roads that have been transferred from the Department of Public Works to the Municipality.

The municipality is faced with huge challenges in providing and maintaining the local roads at an acceptable standard which ensures accessibility at all times. Coupled with the latter, there is a challenge with storm water management and control to an extent that it poses a threat to mobility, infrastructure and communities. The Municipality will develop a storm water master plan for municipal wide which will assist in planning and addressing storm water challenges that are faced by the Municipality.

The long term strategy of the municipality is to surface roads within the municipal area. Based on huge road backlog different strategies are implemented including preventative maintenance of the road infrastructure. In terms of the current analysis, City / Seshego and Mankweng Cluster have roads that deteriorated due to limited routine and preventative maintenance.

9.4.3 Roads Challenges

- Aging infrastructure (deterioration of roads due to limited routine and preventative maintenance)
- Most of roads have exceeded their design life span (approximately R1.5Billion required to rehabilitate the existing roads) in both Polokwane and Aganang area
- Unavailability or insufficient storm water systems
- Huge rural backlog with minimal impact of 19Km per annum.
- Approved organogram not adequate to address the existing Roads and Storm Water functions.
- Most roads operator's personnel from Aganang have medical unfitness certificates
- 98% of Roads that Community prioritize during IDP's do not belong to the Municipality but to RAL and the Department of Roads.
- Insufficient budget
- Insufficient plant (construction machinery)

9.4.4 ROADS BACKLOG

Below is the current status of existing roads backlog, which without annual maintenance will escalate.

| Service | Service H/H | | Backlog | | |
|---------|-------------|--|---------|--|--|
| | | | | | |

| Roads (7 495km) | 239 116 | 1364km (18%) | 6 131.5km |
|-----------------|---------|----------------------|-----------|
| | | | |

9.5.3 Seshego Precinct Plan

A number of Roads projects are implemented in Seshego through the Neighbourhood Development Grant(**NDPG**) which includes the following:

- Construction of None Motorized Transport (NMT) facilities, street lighting and beautification along Ditloung Street in Zone 2 at R4.6 million.
- Construction of NMT facilities on 27th Street and upgrading from gravel to tar which also include street lighting for both Zone 1 and Zone 2 at R11.2 million. The contractor was terminated due to poor performance and another contractor appointed in 2018 to complete the work.
- Construction of storm water culvert, street lighting and NMT between 36th Street and Zondi Maphanga at R40.7 million. The project started in 2017 and was finished in April 2019.
- Upgrading from single to dual carriageway of Polokwane Drive, NMT and street lighting that started in November 2018 at R27.3 million. The project is a multiyear project and is continuing
- Landscaping and Lighting of the Triangle Park in Zone 2 which include paved pathways, children play area, upgrading of outdoor gym, Skate Park, street lights at R8.2 million
- Upgrading of Hospital link road and Bookelo Road to link Hospital View at R8.9 million. The project experienced stoppage by the community with allegations that the road is upgraded for the church and they also want title deeds before developments take place within their area.
- Through own capital revenue reserves the municipality is also implementing road upgrading projects in Seshego Zone 1,2,3,4,5 and 8 that started during the 2018/19 financial year and planning is in place for Zone 6 and Zone 8 in the current financial year

9.6. Leeto First Bus Arrival in Polokwane

The first Leeto bus arrived in Polokwane During the State of the City Address held on the **11** July 2019.

CHAPTER Ten: Strategies Phase

10.1 Polokwane Municipality Strategies Chapter

Strategic planning is the process through which the leadership of an organization envision its future and develops the necessary procedures and operations to achieve that future - Goodstein, Nolan, & Pfeiffer, 1992. The leadership focuses on its organization and what it should do to improve its performance and is often viewed as a system in which managers go about making, implementing and controlling important decisions across functions and levels in the organization.

The purpose of strategic planning is to transform the organization and should be a continuous consulting process that must be tailored to accommodate the climate of an organization. Strategic planning helps leaders to:

- Create its own organization's future;
- Improve the standard of living through effective, efficient and socio-economic service; delivery to all citizens of the municipal area;
- Provide a framework and a focus for improvement efforts;
- Build a critical mass; and
- Provide a means for assessing progress.

10.2 SWOT Analysis

The SWOT analysis is a strategic planning tool that is used to discuss and evaluate the Strengths, Weaknesses, Opportunities, and Threats of a particular organisation. It is a situational analysis in which the internal strengths and weaknesses of an organisation and external opportunities and threats faced by it are closely examined to chart a strategy.

Conducting a SWOT during a strategic planning session is advantageous for decision-making and to create understanding of dependencies between an organisation and its environment. It sets the framework for reviewing the strategy, the position and direction of the organisation and ensures versatile application of possible solutions.

The table below depicts the SWOT for Polokwane Municipality that was reviewed during the Strategic Planning sessions

| STRENGHTS | WEAKNESSES |
|--|---|
| Compliant community consultative processes (IDP) | Directorates and SBU's working in silos (inadequately planning and working together as teams) |
| Sound and sustainable fiscal and financial management | Poor infrastructure planning (inclusive of ageing infrastructure and inadequate maintenance) |
| Good investment rate (Internal rate of return on allocation of resources) | ICT systems inadequately integrated and insufficient capacity building on the usage and application of IT Systems. No automated record management system in place and manual system no longer appropriate |
| Sound governance | Inadequate engagements with various stakeholders |
| COP 17 compliant (Green/ Cleanest City award & Arbour award) | Future Strategic Land owned by Municipality not serviced yet that results in inadequate or inappropriate utilisation |
| Water Service Authority | Non-implementation of approved policies |
| Electricity License Authority City/Seshego that creates stable revenue from electricity | Lack of Retention Strategy |
| Provincial Sporting and Recreation Hub (sporting games, indigenous games, rural sports, festivals, arts and culture, Mayoral Road race, Mayoral Charity Golf, Mapungubwe) | Outdated policies and by-laws |
| Land availability within urban edge (Polokwane extension 40, 78, 72, 79, 106, 107, 108, 124, 126, 127, 133, 134, Ivydale Plots, Klipfontein, Stoefontein, Volgestruifontein, Engelsboom, Sterkloop, Weltervreden, Doornkraal, Doorndraai etc. but no serviced) | No billing in rural areas |
| Only Municipality in the province with Social Housing Institution (SHI) and designated restructuring zone | Security of tenure in rural areas |
| Accredited Level 1 & 2 Housing provider | Insufficient implementation of plans and systems |
| SPLUMA Compliant | Infrastructure in rural areas not adequately upgraded |
| Only Municipality in the province with Integrated Geographic Information System (increased revenue via effective billing system, effective property management, proper recording and eased location of MIG projects, bulk infrastructure, boreholes, sewer plants, efficient service delivery, management of illegal land uses, cemetery management, Valuation Roll and building control management) | |
| OPPORTUNITIES | THREATS |
| Broad revenue base (potential to collect from total of 239 116 households), revised valuation roll and bulk contributions. | Rapid Population growth (Services, CBD growth, informal settlement, crime, uncontrolled Influx Urban Decay,) |
| Potential for various hubs to be established: Economic, political, logistics, sporting and recreation hubs in Limpopo (Tourism, Gateway to Africa, capital city, provincial offices, International Airport, sporting games, festivals, arts and culture, Mapungubwe) | Climate change (Natural disasters) |

| Available land for development | Service protests | | | | | | | |
|---|---|--|--|--|--|--|--|--|
| Accredited Level 1 & 2 Housing service provider to receive direct funding for housing programmes | Insufficient ICT infrastructure Planning (external) | | | | | | | |
| Proximity to Higher learning institution – collaboration with higher learning institutions | Unstructured Land Use in Rural and Urban areas (Community needs vs municipal planning, Political influence and Land Grab) | | | | | | | |
| Secondary City aspiring to achieve metropolitan status | Perception of corruption | | | | | | | |
| Decentralized development and services through Clusters | Sustainability of Public Transport (Leeto la Polokwane) | | | | | | | |
| Alternative energy sources | Litigation | | | | | | | |
| Transport contracting authority | Inadequate Water Source | | | | | | | |
| Public Private Partnership for development and implementation of Vision 2030 - Smart City initiatives | Weak economic growth | | | | | | | |
| Young population | High unemployment rate | | | | | | | |
| 4 th Industrial revolution | | | | | | | | |
| Geographic location of the municipality | | | | | | | | |
| Rural development | | | | | | | | |
| Extension of the electricity license area | | | | | | | | |
| Transformation | | | | | | | | |

10.3 Strategic Intent of Polokwane Municipality

Section 152 (1) of the Constitution of the Republic of South Africa (1996) states that the objects of local government are:

- (a) to provide democratic and accountable government for local communities;
- (b) to ensure the provision of services to communities in a sustainable manner;
- (c) to promote social and economic development;
- (d) to promote a safe and healthy environment; and
- (e) to encourage the involvement of communities and community organisations in the matters of local government.

Section 152(2) prescribes that a municipality must strive, within its financial and administrative capacity, to achieve the objects set out in subsection (1). It is necessary for Polokwane Municipality to always strive for the attainment of the objects of local government. As such the municipality has set out its strategic priorities that the 2016-2021 council will strive to achieve when the end of their term expires. The strategic priorities are aligned to the objects of local government as enshrined in the constitution and furthermore, the municipality has developed its strategic objectives to ensure that the set out priorities are attained.

10.4 Polokwane Municipality Service Delivery Priorities for the 2016 – 2021 term of council

The service delivery priorities as set out below are very important in directing the resource allocations of the municipality. The priorities are biased towards service delivery functions and such the budget of the municipality will prioritise service delivery.

- 1. Provision of basic services, which include electricity provision, water and sanitation and refuse removal
- 2. Strengthen the local economic development structures and expansion of expanded public works programme
- 3. Upgrading of informal settlements and promotion of sustainable human settlements
- 4. Overhaul of ageing service delivery infrastructure and maintenance of municipal facilities
- 5. Improving transport, roads and bridges
- 6. Improving sports and recreational facilities and promotion of social cohesion
- 7. Development of municipal capacity to manage disaster risk and protection of environment
- 8. Ensure long-term planning capacity, monitoring and evaluation
- 9. Promotion of sound financial management to ensure financial sustainability
- 10. Promotion of good governance and the participation of local communities in the municipal affairs

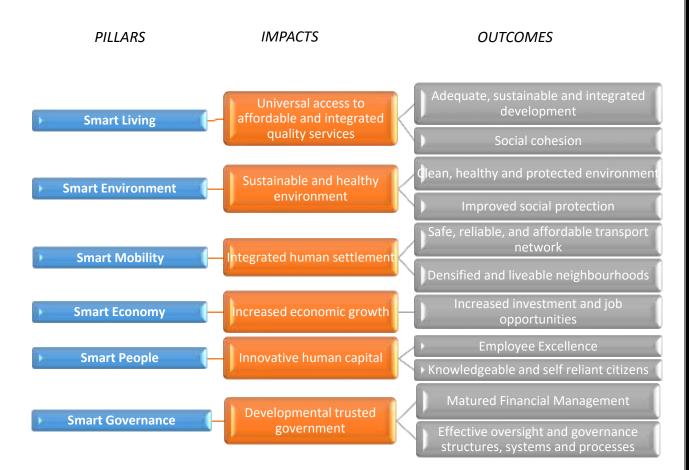

10.5 Polokwane Municipality's IDP Strategic Objectives

Polokwane municipality has developed its strategic objectives guided by the priorities that the municipality set out to achieved. The objectives are aligned and addresses the local government objects as set out in the constitution of the country. The strategic objectives were reviewed during the Mayoral Bosberaad in 2017 and there are aligned with the SWOT, Smart Pillars, Municipal Smart Pillars and Outcomes.

Polokwane Municipality IDP Strategic Objectives

- 1 To ensure efficiency and effectiveness of Municipal administration
- **2** To ensure the provision of basic and environmental services in a sustainable way to our communities
- 3 To ensure social protection and education outcomes

- 4 Promotion of economic growth ,job creation and Sustainable human settlement
- 5 To ensure community confidence in the system of local government
- **6** To enhance Financial Viability and Financial Management

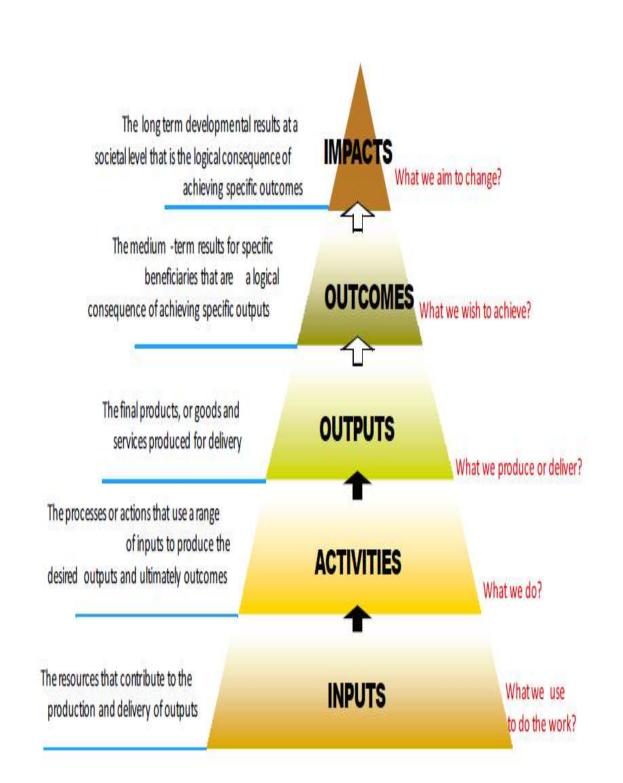

10.6 Smart Pillar Impacts and Outcomes

10.7 Outcomes Based Management and Logic Model

At the beginning of 2013, the Municipality embraced Vision 2030 with an aim to transform the Polokwane Municipality into a bustling and growing metropolis that provides high-quality of life for its people through adopting the 'Smart City' concept. The development of the Vision 2030 broadened the long-term planning horizon to reposition the municipality in order to maximize the efficiency, effectiveness and impact of the Municipality.

The development of the Polokwane Economic Growth and Development Plan (EGDP) gave effect to the Smart City Concept which further concretized the Municipality's Smart Pillars articulated in the diagram below:

- In 2013 the Municipality adopted a blended Outcomes Based Management and Logic Model methodologies to guide planning and reporting processes that feed into the high level strategic intent mentioned above.
- The Outcomes Approach, as a planning, monitoring, reporting and evaluation framework is advocated by the Department of Planning, Monitoring and Evaluation that published the Guide to the Outcomes Approach in May 2010. In terms of this Guide, the outcomes approach is designed to ensure that government is focused on achieving the expected real improvements in the life of all South Africans. It clarifies what we expect to achieve, how we expect to achieve it and how we will know whether we are achieving it. It helps all spheres of government to ensure that results improve the lives of citizens rather than just carrying out our functions.
- The outcomes approach requires organizations to think afresh about the logical links between what we do and what we achieve. In the main, the approach:
- Focusses on results
- Makes explicit and testable the chain of logic in our planning, so we can see the assumptions we make about the resources that are needed
- Links activities to outputs and outcomes and to test what works and what does not work
- Ensures that expectations are as clear and unambiguous as possible
- Provides a clear basis for discussion, debate and negotiation about what should be done and how it should be done
- Enables learning and regularly revising and improving policy, strategy and plans through experience
- Makes co-ordination and alignment easier.
- The outcomes approach aims that organizations go beyond the work that they do and interrogate the impact it that it has. This approach involves the municipality using the logic model which links inputs, activities, outputs, outcomes and impacts. The triangle below demonstrates these links more clearly:

10.8 Strategic Alignment

- Section 24 (1) of the Municipal Systems Act 32 of 2000 requires that the planning undertaken by a municipality must be aligned with, and complement, the development plans and strategies of other affected municipalities and other organs of state so as to give effect to the principles of co-operative government contained in section 41 of the Constitution.
- It must be noted that a variety of International, National and Provincial priorities and outcomes were considered during the strategic planning phase, namely: 2030 Goals for Sustainable Development, National Development Plan, Medium Term Strategic Framework (MTSF) 2014-2019 Priorities, Back to Basics, Limpopo Development Plan (LDP) 2015-2019 and the Local Government Manifesto 2016. The matrix below tabulate the alignment of the Smart Pillars and Impacts of Polokwane Municipality with the abovementioned priorities and outcomes as follows Local Government: Municipal Systems Act 32 of 2000 is available at: <u>http://www.gov.za</u>. Accessed 9 February 2017. The alignment of KPAs, Smart Pillars and the desired Impacts are outlined in the figure below:

| 2030 GOALS FOR SUSTAINABLE DEVELOPMENT | NATIONAL DEVELOPMENT PLAN | MTSF 2014 - 2019 PRIORITIES | BACK TO BASICS | LDP PRIORITIES | LG ELECTORAL MANIFESTO | Polokwane Municipality IDP Strategic Objectives | CoP SMART PILLARS AND IMPACTS |
|--|--|--|---|---|---|---|--|
| Promote inclusive and sustainable economic growth, employment and decent work for all | An economy that will create more jobs | Radical economic transformation, rapid economic growth and job creation | Putting people and their concerns first | Decent employments through inclusive growth | Develop and strengthen local economies, create jobs and promote job placements esp. for youth | Promotion of economic growth, job creation and sustainable human settlement | SMART ECONOMY - Increased economic growth |
| End poverty in all its forms everywhere | | Contributing to a better Africa and a better world | | | | | |
| End hunger, achieve food security and improved nutrition and promote sustainable agriculture Promote just, peaceful and inclusive societies | An inclusive and integrated rural economy | Rural development, land and agrarian reform and food security | | | | | |
| Ensure inclusive and quality education for all and promote lifelong learning | Improving quality of education, training and innovation | Improving the quality of and expanding access to education and training | | Quality basic education | Promote education as apex in local communities | Ensure social protection and education outcomes | |
| Achieve gender equality and empower all women and girls | Social protection | Social cohesion and nation building | | Inclusive Social Protection System Social Cohesion | Promote nation- building and socially cohesive communities | | |

| 2030 GOALS FOR SUSTAINABLE DEVELOPMENT | NATIONAL DEVELOPMENT PLAN | MTSF 2014 - 2019 PRIORITIES | BACK TO BASICS | LDP PRIORITIES | LG ELECTORAL MANIFESTO | Polokwane Municipality IDP Strategic Objectives | CoP SMART PILLARS AND IMPACTS |
|---|---|---|-------------------------------------|---|---|---|--|
| Revitalise the global partnership for sustainable development | Reversing the spatial effect of apartheid | | | Comprehensive rural development Human settlement development | Build spatially integrated communities | | SMART LIVING - Universal access to affordable and integrated quality services |
| Ensure access to water and sanitation for all | Improving infrastructure | Ensuring access to adequate human settlements and quality basic services | Delivering municipal services | Competitive economic infrastructure | Improve access to municipal services | The ensure the provision of basic and environmental services in a sustainable way to our communities | |
| Ensure access to affordable, reliable, sustainable and modern energy for all | | | | | Build on achievements made in delivering services | | |
| Build resilient infrastructure, promote sustainable industrialisation and foster innovation | | | | | | | SMART MOBILITY - Safe, reliable, affordable, sustainable integrated transport services |
| Ensure sustainable consumption and production patterns | Transition to a low-carbon economy | | | Environmental protection | Improve health in urban and rural communities | The ensure the provision of basic and environmental services in a sustainable way | SMART ENVIRONMENT - Safe, clean, healthy and protected environment |

| 2030 GOALS FOR SUSTAINABLE DEVELOPMENT | NATIONAL DEVELOPMENT PLAN | MTSF 2014 - 2019 PRIORITIES | BACK TO BASICS | LDP PRIORITIES | LG ELECTORAL MANIFESTO | Polokwane Municipality IDP Strategic Objectives | CoP SMART PILLARS AND IMPACTS |

CHAPTER TWELVE: INTEGRATION PHASE

12.1 INTERGOVERNMENTAL RELATIONS

Intergovernmental Relations in South African context concern the interaction of the different spheres of government. The Constitution declares that government is comprised of National, Provincial and Local spheres of government which are distinctive, interdependent and interrelated. According to the Constitution of the Republic of South Africa, Act, No.108 of 1996, Section 41 (2), an Act of Parliament must establish or provide structures and institutions to promote and facilitate Intergovernmental Relations and provide for appropriate mechanisms and procedures to facilitate settlement of Intergovernmental disputes. Intergovernmental relations processes are further developed to facilitate processes of development and cooperation between spheres of government.

12.1.1 Provincial Intergovernmental Structure

Polokwane Municipality participates in the Premiers Inter – Governmental Forum (P-IGF) that is comprised of the Premier as the chair and Members of the Executive Council and all the Executive Mayors supported by their Heads of Departments and Municipal Managers. Through the P-IGF both the Provincial and local sphere of government are able to inform and take decisions on policy and development issues that emanate from National, Provincial and local government level. The P-IGF discussed the implementation of the Limpopo Employment Growth Development Plan. Polokwane Municipality as a Provincial Growth Point participates in the forum to discuss and integrate development plans between the Province and the municipality.

12.1.2 District Intergovernmental Structure

Beside the P-IGF the municipality participates in established Capricorn District Municipality. The established forums are important for the purpose of integrated development planning and strengthening governance processes within the District. The following are intergovernmental relations forums that Polokwane Municipality participates in:

• Mayor Forum

Mayors Forum seeks to bring together Mayors and Executive Mayors to interact on common interest issues as well.

• Municipal Manager Forum and other Technical forum

Municipal Manager's Forum which seeks to create a platform for all Accounting Officers to share and interact on common interest issues. Municipal Managers attend these meetings

• Speaker Forum

• Communicators Forum:

Mainly facilitated through GCIS, the aim of this structure is to bring all government communicators together to share common issues.

12.2 List of Sector Plans Available in Polokwane

A key requirement of the IDP process is to achieve integration with the initiatives of other sphere of government, alignment between projects and programs and legislative requirements of Sectoral legislation. The following is an update on the status of such plans

Table: Status of Polokwane Sector Plans

12.3 Local Economic Development Strategy (LED)

The City has developed and adopted the Local Development Strategy. The strategy highlights the situational analyses of Polokwane Municipality in respect of its economic base, emerging development trends, possible comparative advantages and barriers that weaken investments and development and the regional location advantages.

The strategy is based on the following 5 strategic pillars:

- Agricultural development
- Tourism development
- Investment promotion
- Skills development
- Marketing Polokwane Municipality as a venue of choice

In the strategy, Strategic Options and Enablers were identified with the stakeholders during the LED strategy formation process.

Section 152 (1) (c) of the Constitution requires municipalities to promote social and economic development. In responding to that constitutional duty Polokwane Municipality developed a Local

Economic Development Strategy to direct and guide the mobilization and management of resources to stimulate local economy, creation of jobs and poverty reduction.

An assessment of the local economy was conducted, which sought to examine whether there were unique sets of local attributes in the municipality that would contribute to serve as a deterrent to its local development. In the process, the Sectoral and overall economic structure of Polokwane Municipality and its business climate amongst other variables were examined to identify the municipality's strength, weaknesses, opportunities and threats which might have an impact on the local economic development strategy.

The following strategic options and enablers were identified as relatively the most favourable ones:

Most favourable strategic options:

- 1. Becoming a regional trading hub
- 2. Agri-processing cluster
- 3. Mineral processing & beneficiation centre

Most favourable enablers:

- 1. Industrial development zone
- 2. Support for SMME's
- 3. Spatial development zone
- 4. Improve skills base
- 5. Skills development

The study also developed a SWOT analysis for Polokwane, and came out with the following findings

- 1. Strength- local assets
 - Access to industrial facilities
 - Access to a game reserve
 - Access to an international airport
 - Access to mineral resources
 - Relatively low levels of crime
 - Productive commercial farming
- 2. Weakness- obstacle to growth
 - Limited pool of skilled labour
 - Rural communities have inadequate access to hard infrastructure
 - Inadequate health facilities
 - High unemployment financial sustainability
 - Location groundwater pollution
- 3. Opportunities- favourable exogenous (external) conditions
 - Spatial hierarchy status
 - Proximity to SADC to develop a regional trading hub
 - Develop cultural tourism
 - Develop eco-tourism
 - Agri-processing cluster
- 4. Threats- unfavourable exogenous (external) trends
 - Institutional inertia

- HIV/AIDS
- Lack of finance
- Competition of investments
- Water shortage

The Polokwane Municipality approach and methodology to Local Economic Development constitute 4 major phases and incorporates a top-down approach:

- Phase 1: Organise the effort
- Phase 2: Local Economic Assessment
- Phase 3: The Filtering Process
- Phase 4: LED Strategy

Alignment of LED Strategy

The Local Economic Development Strategy was developed taking into consideration the National, Provincial and Regional Initiatives and Policies. At a National and Provincial level, the following initiatives and policies were considered:

- Reconstruction and Development Programme (RDP),
- Growth Employment and Redistribution Strategy (GEAR),
- Provincial Growth and Development Strategy (PGDS)
- And other major policies and LED implications were considered.

And at a Regional level, the following policies and initiatives were considered:

- Provincial Industrial Development Strategy (PIDS)
- Development corridors
- Northern Province Spatial Rationale
- Polokwane Municipality Integrated Development Plan

12.4 Polokwane EGDP

POLOKWANE 20 YEAR ECONOMIC GROWTHS AND DEVELOPMENT PLAN

Introduction

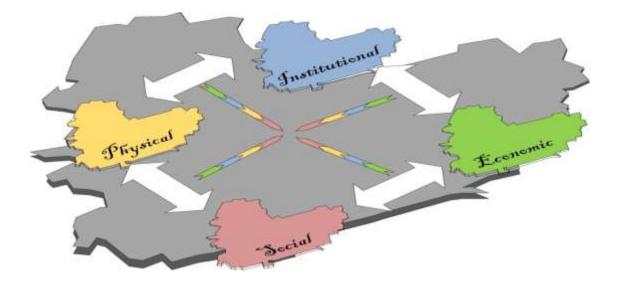

The main objective of this plan is to assist the City of Polokwane to achieve real and sustainable economic growth and development, as well as transforming and aligning the city to become a Smart City within the next 20 years. It is therefore vital that this plan set out very specific goals and implementable projects to attain the city's vision

Various interventions have been proposed per identified cluster and sub-cluster which together forms the 20 Year Economic Growth and Development Plan.

Smart City' concept for City of Polokwane

- a Forward looking plan into, Economy, People, Governance, Mobility, Environment and Space.
- Comprehensive integration of critical infrastructure in its totality.

- Build collective intelligence of the city through connecting the physical, the IT, the social, and the business infrastructure.
- Four Main clusters were used for the status quo analysis. These contexts influence one another and failure to promote growth and development in one, would lead to failure in another. Integrative interventions would furthermore ensure that holistic planning takes place.

1. Economic Cluster

.) Background: The marketing of Polokwane as a municipality with high growth and development potential is another imperative in order for the economy to grow sustainably. Through discussions with stakeholders the issue of Polokwane's image was emphasised. Polokwane needs to be portrayed in a better light in order to attract much needed investment and establish it as the number one destination in the north. Any businesses that trade, transport and conduct business across the border should need a space of their own in Polokwane and this can only be achieved by promoting Polokwane and the advantages it offers.

b.) Problem Statement: - Currently negative perceptions about Polokwane hinder investment.

- Marketing is inefficient.

c.) Objectives: - Innovative and effective marketing of Polokwane as investment opportunity with great future plans and development prospects.

- Marketing of the Polokwane lifestyle and tourism destination.

d.) Strategic Interventions: As part of a marketing strategy Polokwane needs tools in order to reach out and grab the attention of potential investors and businesses and in so doing bring them to Polokwane to stay. These tools include the use of media as well as structures present in Polokwane that offer growth potential and prospects for economic development. By highlighting the vision and goals Polokwane has, and the plans being made to achieve these goals, it becomes increasingly attractive and the goals become more achievable.

2. Physical Cluster

a.) Background: The availability and maintenance of infrastructure is crucial for economic development as infrastructure investment in the development of transport (road, rail and air), basic (electrical, sanitation and water) and social (school, hospital) infrastructure is vital for both economic development and quality of life.

b.) Problem Statement: From the research report it is clear that the current bulk infrastructure in Polokwane is under immense pressure. The sector is further hampered by rapid urbanisation, lack of finance, insufficient long term planning and overall capacity constraints. This is especially evident in the rural areas.

c.) Objectives: To ensure that infrastructure is designed and developed to support and promote economic growth and investment within a framework that benefits the poor and underprivileged in Polokwane.

d.) Strategic Interventions: The Infrastructure Development Strategy will focus on the following sections

3. Social Cluster

The main focus of a social cluster must be to utilise human energy and productive resources to meet all types of challenges and objectives and to bring a society together in all its forms, across income, gender, linguistic background and race. Furthermore, it should be noted that although social development is to some extent depended on economic growth, the opposite also holds true and therefore a myriad of non-economic factors is at play. In order to formulate strategies within this cluster, the following will be concentrated on to guide the formulation of the social strategy.

4. Institutional Cluster

In order for a city to prosper, a strong institutional strategy needs to be put in place and seeing a city is multi-dimensional, integration of both public and private institutions are vital. Institutions present various advantages for development as its main role is to govern society on various levels.

Furthermore, institutions could not only supply much needed skills, knowledge and financial resources, but also assist in issues such as implementation and monitoring. Due to its complexity and intricacy, this strategy will focus on only several broad themes/ sub sections including public private partnerships, community involvement, governmental governance and the smart city concept which together can provide better overall governance of the city and foster growth and development.

12.5 Integrated Transport Plan

The Comprehensive Integrated Transport Plan has been adopted by Council. Polokwane Local Municipality serves as the economic hub of Limpopo Province. The Polokwane CBD is therefore of regional importance, serving as a regional trading and shopping hub to the greater Polokwane area. Areas such as Seshego and Mankweng use the Polokwane CBD as their primary shopping destination.

Background

This Comprehensive Integrated Transport Plan has been prepared for Polokwane Local Municipality in terms of Section 36(1) of the National Land Transport Act 2009, (Act No. 5 of 2009) (NLTA).

Legislative requirements

The NLTTA requires planning authorities to prepare a number of statutory plans. Regulations have been published in the Government Gazette (No. 25245 of 1 August 2003) indicating the minimum

requirements for these statutory plans: Approved Statutory Plans for Polokwane LM are listed in the table below:

Statutory Plans for Polokwane LM:

The ITP therefore, forms an important component of each planning authority's Integrated Development Plan as specified in the Local Government Municipal Systems Act (Act 32 of 2009). The aim of the Integrated Transport Plan is to resolve transport issues and problems in line with a particular authority's goals and objectives. The principle to achieve this is to identify goals and objectives, generate, implement and evaluate policies, strategies and projects to achieve the stated goals and objectives.

The relationship of the various Transport Plans and their dependency on one another for Information is indicated in Figure 1.2 below.

Relationship between various Transport Plans in Local Government

In addition to the minimum requirements, the following principles must be applied in the Preparation of the ITP:

- The ITP must pay due attention to the development of rural areas;
- The ITP must be synchronized with other planning initiatives and must indicate how it is to be integrated into the Municipal Development Plans, the Land Development Objectives and the Municipal Budgeting processes;

• The ITP preparation must include consultation and participation of interested and Affected parties required for the preparation of the IDP in terms of Chapter 4 and section 29(1)(b) of the Local Government: Municipal *Systems Act 2000 (Act No 32 of 2000),* Therefore, the ITP is a specific sector plan that feeds into the Integrated Development Plan and ultimately form part of the Provincial Land Transport Framework. The figure below provides an illustration of this relationship.

Relationship between Transport and Development Plans in local development planning

Other available National and Provincial documents were also reviewed for guidance and input in the preparation of the Polokwane Municipal ITP. These documents are listed below.

National:

- Moving South Africa Action Agenda (1999);
- National Land Transport Strategic Framework (2002-2007);
- National Land Transport Transitions Act (NLTTA 2000);
- Municipal Systems Act
- Municipal Structures Act
- Public Finance Management Act
- Rural Transport Strategy for South Africa (Nov 2003);
- Integrated Sustainable Rural Development Strategy (2000).

Provincial:

- White Paper on Transport for Sustainable Development (2001);
- Limpopo Provincial Land Transport Framework;
- Northern Province Interim Passenger Transport Act (2000)
- Strategy Framework for Growth and Development 2004-2014 (2003)

Other:

• In terms of the National Land Transport Act 5 of 2009, Operating Licensing Boards are to be dissolved and replaced by Provincial Regulatory Entities, as well as Municipal Regulatory Entities to perform the function initially performed by the Operating Licensing Boards.

Institutional and Organizational Arrangements

The process with regard to the preparation of the CITP was overseen by a Technical Committee comprising of internal and external role-players. It is required to consult with residents and commuters of the Polokwane Local Municipality through a public consultation process. The following table illustrates the functions of various institutions providing transport

Transport Vision and Objectives

Vision Statement

The following are vision statements obtained from various policy documents and legislation Relevant to transport. The CITP vision statement encompasses the national, provincial and local policy frameworks and sets out the ideal outcome because of the goals and objectives set by Polokwane ITP vision as outlined.

Vision of the Department of Transport:

"Transport, the Heartbeat of South Africa's economic growth and social development"

White Paper on National Transport Policy:

The White Paper on National Transport Policy published in August 1996, describes the transport policies of the national government and the vision for South African transport as set out in the White Paper as follows:

Moving South Africa:

The vision of transport in South Africa for the year 2020 can be briefly summarized as follows:

Provincial Land Transport Framework, 2002:

The Provincial Land Transport Framework borrowed its vision from the White Paper on National Transport Policy, which reads as follows:

"To provide safe, reliable, effective, efficient, and fully integrated transport operations and Infrastructure which will best meet the needs of freight and passenger customers at improving levels of service and cost in a fashion which supports government strategies for

• To meet the needs of freight and passenger customers for accessible, affordable, safe, frequent, high quality, reliable, efficient and seamless transport operations and infrastructure,

- To do so in a constantly upgrading, innovative, flexible and economically and environmentally sustainable manner, and
- To ensure that transport will support and enable government strategies, particularly those for growth, development, redistribution, employment creation and social integration, both in South Africa and in the Southern region'

Limpopo Province Land Transport Framework

The Limpopo Province vision statement for transport stated in the Limpopo in Motion Document is "to provide quality transport infrastructure and services for all"

Capricorn District Municipality

"Capricorn District, the home of excellence and the opportunities for a better life"

Overarching Vision Statement for Polokwane Municipality

Goals of the Polokwane Integrated Transport Plan

The aim of integrated transport planning and spatial planning is to identify existing resources and apply relevant measures and guidelines in order to promote access to resources and Infrastructure to all spheres of the community in order to establish an integrated environment.

Resources such as public transport facilities, road infrastructure and ports of economic activity should be upgraded and made accessible to the benefit of the larger community in order to stimulate economic growth and economic development.

Objectives of the Polokwane Integrated Transport Plan

The objectives of the Integrated Transport Plan (ITP) are the following:

- > To provide for and manage future transport demand
- > provide a more balanced transport system
- > Promotion of public transport, integrated with other modes of transport
- > the plan must relate to and compliment the spatial development plan,
- the ITP must also support economic development strategies and long term environmental management strategies in order to achieve the above, the following vision for the ITP is proposed:

"To provide a safe, reliable, efficient, effective and integrated transport system for both passengers and freight that will enhance the quality of life for all".

Balanced Scorecard

The balanced scorecard is a prescriptive framework for a two to five-year period that has to be tailored to adapt to an organisation's changing circumstances. It is a vertical and horizontal "Provision of cost effective services which promote socio economic development, a safe and healthy environment through good governance and active community participation"

"The ultimate in innovation and sustainable development"

Key Strategies

Key strategies of the ITP should include the following:

Objectives Key Strategy Measurement

1) Maintain the transport system

- Blade and re-gravel gravel roads
- Maintain existing surfaced roads
- Repaint road markings
- Replace traffic signs
- Repair traffic signals
- Repair dangerous potholes
- Maintain public transport facilities
- Length of gravel roads
- Length of surfaced roads
- Length of road markings
- Number of traffic signs

12.6 Water Services Development Plan (WSDP)

The City has developed and adopted the **Water Services Development Plan (WSDP)** which guides all the planning and implementation of water services in the municipal area. Polokwane Municipality being the Water Service Authority and in complying with this legislative mandate, Municipalities are required to prepare a Water Services Development Plan (WSDP) In terms of the Water Services Act (Act 108 of 1997).

The municipality has ensured that the WSDP process is aligned with the IDP process. This ensured that all issues, objectives and projects developed during the IDP process formed part of the WSDP also resulted in the WSDP process providing much needed input in the IDP process.

Water Resource Profile

Polokwane LM was divided into **19 scheme areas**. Surface water is transferred from outside the municipal boundaries to the Polokwane Municipal area through three water transfer mains namely Ebenezer, Dap Naude and Olifants-Sand transfer mains. The future demand from users on the Ebenezer pipeline route would require upgrading to meet the demand growth. Groundwater sources are the only source for the single, distant rural communities but have, in general, low potential. High production aquifers occur in the Polokwane / Seshego area as well as the Sebayeng and Molepo areas. Due to the fact that major surface water schemes provide water to these areas the underdeveloped groundwater constitutes an important reserve.

Water Services Infrastructure

The bulk water infrastructure on the Ebenezer and Olifants-Sand transfer schemes are operated and maintained by Lepelle-Northern Water Board. Two of the 5 water treatment works are the responsibility of Polokwane LM. The others are currently being operated by DWAF. The Houtriver Dam RWS is a cross border scheme also providing water to the neighbouring Aganang LM. Bulk sanitation infrastructure consists of sewerage treatment works situated at Polokwane, Seshego and Mankweng.

Water Conservation and Demand Management

Water is a scarce resource in Limpopo Province and needs to be conserved and managed. Water has social, environmental and economic dimensions and access to water enhances the livelihoods of the poor. Reticulation leaks are the major contributing factor in water losses in urban areas. In rural areas, illegal connections and reticulation leaks are the major cause of water losses. Water conservation and demand management targets have been addressed in the WSDP. A 5-year strategy to repair leaks, authorize and meter illegal connections and implement a cost recovery system to reduce wastage is imperative.

Effective Management

The Polokwane LM as the WSA need capacity to be able to manage the water services adequately. The Municipal Infrastructure Grant (MIG) assists in funding necessary basic water service's needs. The cost of FBW can be recovered from the income from higher service water supplies initially. Increased water consumption on the medium to long term would result in a net income which can be utilized for water services development in future.

Water Services Institutional Arrangements

Lepelle Northern Water Board (LNW) is the bulk service provider for the Pietersburg Governmental Regional Water Supply Scheme (Ebenezer pipeline) and the Olifants-Sand Bulk Water Transfer Scheme. DWAF Water Services are presently the Water Service Provider to all rural areas not served by LNW. Polokwane LM operates the Dap Naude Dam Water Supply Scheme which currently supplies a summer peak flow of 7 Ml/day, of the potential 18 Ml/day, to Polokwane / Seshego area.

Strategy to eradicate backlogs

Backlog eradication applies to basic services provision in rural areas and at present comprises:

- a) Communal (pre-paid or manual) water supply financed by subsidies. Higher level of supply comprising Erf connections is on account of the client.
- b) Household sanitation to VIP standard or waterborne in dense settlements would also be subsidized (MIG). Some upgrading is done on own initiative.

Ground water pollution

The lack of water-borne sewerage systems leads to the contamination of ground water. The fact that 56.3% of rural households in Polokwane do not have RDP level sanitation constitutes a major risk in terms of ground water pollution. Care must be taken that pit latrines are not allowed near locations where ground water is used as a source of drinking water. Lack of access to adequate potable water has a direct effect on the health standards of the community, hence increasing the rate of opportunistic diseases like cholera. Access to sanitation is one of the most critical elements used to facilitate sustainable livelihoods. This complements the attainment of a healthy and aesthetic environment.

12.7 Spatial Development Framework (SDF)

The new Polokwane SDF 2010 has proposed 7 chapters that incorporate most of the chapters separated as chapters in the 2007 SDF. It is more detailed and strategically has clear alignment in each

of the respective component of the IDP such as LED, Environment, Project Identification, and Transportation Networks. These chapters are summarized as follows:

Chapter 1: Details the background of the spatial development framework, study area and the objectives to be achieved. This helps in understanding the reasons why the municipality should have a clear guideline for the implementation of the land use management system or Town Planning Scheme.

Chapter 2: this chapter provides the legislative guidelines on the drafting of the spatial development framework and the alignment with them i.e. local government municipal system act, ASGISA, Millennium development Goals, Breaking new grounds, LDP, Limpopo spatial rationale etc. By looking at the proposed plans of the above legislations and policies, it could be seen that the proposed integration of them will lead towards a common goal.

Chapter 3: Contextual spatial analyses, it is envisaging that, one has to look at the space in terms of the surrounding environment; Demographics and socio –economic profile, movement link, infrastructure/engineering services, social services in which the municipality is operating within. For a proper spatial plan, the SDF should clearly indicate how the land should be used, where to invest? By whom? And how the wealth should be distributed. These clearly show clear direction of the city growth and employment opportunities to be affected once the projects identified on the IDP being implemented.

Chapter 4: analyses of the spatial rationale, this chapter try to analyse the spatial development framework, 2007 its impact, challenges and gaps addressed. This provides indication of areas that the new approach of the Spatial Development should rectify and clarify in order to have a proper and manageable development within the municipality. It also highlighted the integration part with the surrounding municipality, other policies of the municipality.

Chapter 5: Synthesis/SWOT analyses, in order to draw a successful plan, the municipality must assess its development in terms of the SWOT analyses in order to identify the gaps of challenges that the municipality is experiencing, this also give the municipality area of improvement and opportunities that may come as a result of addressing key challenges in the area.

Chapter 6: the SDF at Macro level. This chapter provides the overall view of the municipality at a bigger scale. This includes settlement hierarchy, areas affected under land claim, environmental sensitive area, agricultural potential area, mining, tourism potential, land use management, densification etc. This makes the proposed plans functional and proper guidance in the future development and growth direction.

Chapter 7: The SDF **at** Micro level, this chapter zoom in to details on the proposed plans at a framework level, this includes identification of the urban edge, urban fringe, urban built-up, phasing of development, corridors, activity, public transport and roads network system, economic development proposal and proper plans for Mankweng/Badimong, Sebayeng/Dikgale and Polokwane/Seshego/Perskebult as well as rural remainder of the Polokwane Municipal Jurisdictions. The SDF of Polokwane Municipality is aligned to the **NSDP** and the **PSDF**.

SUMMARY

Polokwane is the capital of Limpopo province, there is a vast growth of urban population due to rural urban migration, and this was a result of the better living conditions, centralisation of government offices, industrial development, mining institution as well as private entities. All this has to be accommodated within a confined area that is better served with sufficient engineering infrastructure in order to function as a system

Accommodation is one of the major challenges that seek both national and provincial government to intervene in order to assist the local municipality. What should be understood is that, how the space will use and at which specific area that the space should be used for, as well location and availability of services (Social, economic, transport, environmental) will sustain the city and its neighbourhood. In view of the above, it is clear that the new SDF has detailed the above taking into consideration of the economic factor, employment factor, social factor as well as future growth of the Town.

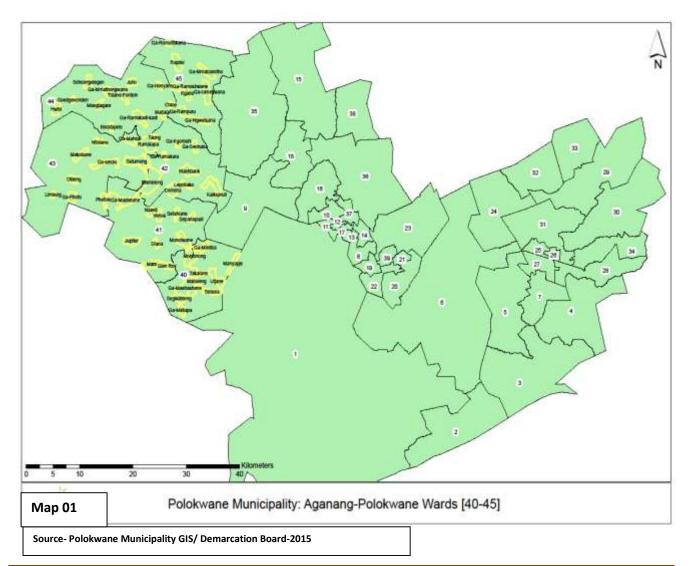

12.8 Disaster Management Plan

Chapter 01:

Introduction and Background

Section 26(g) of the Municipal Systems Act 32 of 2000 read with Sections 52 and 53 of the Disaster Management Act 57 of 2002 as amended compels each municipal entity to develop a prospective disaster risk management plan as part of and an integrated part of their Integrated Development Plans. This plan establishes the arrangements for disaster risk management and has been prepared in accordance with the requirements of the Disaster Management Act, 57 of 2002 (the Act) as amended and section 26(g) of the Municipal Systems Act, 2000.

Profile and Map of Polokwane Municipality

Structural and/or Organizational Institutional Capacity in the Municipality

Several organizations and infrastructures exist to assist the Disaster Management component to be able to confirm the capacity in terms of preparedness planning as well as response. The following infrastructure is identified to assist the Municipality

42 clinics, 3 publics and 2 private hospitals, 3 Fire Stations, 5 Police stations and 3 academic institutions including 2 TVET Colleges. 9 recreational centres including about 14 traditional council halls are in existence across all the clusters which will assist when disasters need occur in case of any temporary emergency shelter. Additional to the above centres-SASSA collection Centres are available for use in case of such emergencies.

Chapter 2-

Constitutional, Legislative and Policy Imperatives.

Provisions of Section 44. (1) A municipal disaster management centre-

(a) must specialise in issues concerning disasters and disaster management in the municipal area;

(b) Must promote an integrated and co-ordinated approach to disaster management in the municipal area, with special emphasis on prevention and mitigation, by-

(i) Departments and other internal units within the administration of the municipality, and, in the case of a district municipality, also by departments and other internal units within the administration of the local municipalities in the area of the district municipality:

(ii) All municipal entities operating in the municipal area; and (iii) other role-players involved in disaster management in the municipal

This section dealt with disaster management policy issues as outlaid in the Disaster Management Act 57/2002 as amended as well as Polokwane Local Municipality Disaster Management Framework document.

Departments or line responsible units for particular hazards commands much authority in term of providing measures to deal with an incident including the funding method. E.g. SASSA, SAPS, Department of Agriculture, Roads and Transport. Etc.

STATUS OF THE POLOKWANE DISASTER RISK MANAGEMENT PLAN AS PER THE

NATIONAL DISASTER MANAGEMENT FRAMEWORK:

Level 2 -- Prospective Disaster Risk Management Plan:

A level 2 Disaster Risk Management Plan focuses on the following:

- Disaster Risk Management Plan (three years' implementation period).
- Establishing processes for a comprehensive disaster risk assessment.
- Identifying and establishing formal consultative mechanisms for development of disaster risk reduction projects and
- Introducing a supportive information management and communication system and emergency communications capabilities.

Chapter 3:

Integrated Institutional Capacity

Primary Responsibilities of Disaster Management

To prepare communities and institutions to act and be equipped with knowledge and capacities for effective disaster risk management at times of disaster in order to reduce losses and damage to lives and property. To provide a basis for the establishment of policies and procedures which will assure maximum and efficient utilization of all resources to minimize the loss of life and/or injury to the community, and protect and conserve resources, facilities and property of the people from any potential hazard/ threats.

To contribute to the strengthening of early warning and early response to disaster hazard, threats and disaster situations in the municipality. To promote and support dialogue, collaboration and coordination and exchange of information among stakeholders involved in early warning, disaster risk management, disaster response, development and other relevant agencies and institutions at all levels, with the aim of fostering a holistic approach towards disaster risk reduction and sustainable development.

DISASTER MANAGEMENT ADVISORY FORUM

Disaster Management Advisory Forum is established and chaired by the Community Safety Portfolio Committee Chairperson or any delegate nominated by the Executive Mayor and/or the Portfolio Committee.

The committee is comprised of state departments, parastatals, and religious organizations including relief agencies like Red Cross. House of Traditional leaders and any other organization relevant coopted for a particular purpose.

CHAPTER 4 -

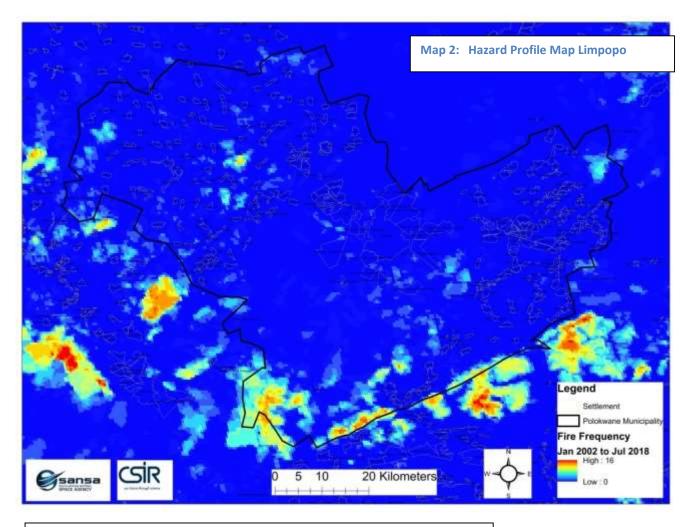

DISASTER RISK ASSESSMENT

Disaster Risk Assessment Process

The process of hazard Identification as well as risk Assessment through to treatment or mitigation process as well as the Council through Disaster Management Unit should continually monitor and review what hazards they have identified and whether the strategies proposed are feasible, reasonable and appropriate. In order to monitor and review their actions, they will need to consult various stakeholders.

Hazard Profile Map

GIS layers of hazards were overlaid and summed and Map 2 is the result for assessment conducted. The map below shows the number of hazards for a specific geographical area overlaid and summed. For example, the red areas indicate that there are between 6 and 8 hazards for that area. Therefore, the redder the area, the more hazards are present.

Map 2: Fire Frequency Map Polokwane Municipality (Source-SANSA/CSIR 2018)

Risk Assessment Methodology

Risk=Hazard x Vulnerability /Capacity

Critical cutting across hazards in the Municipality

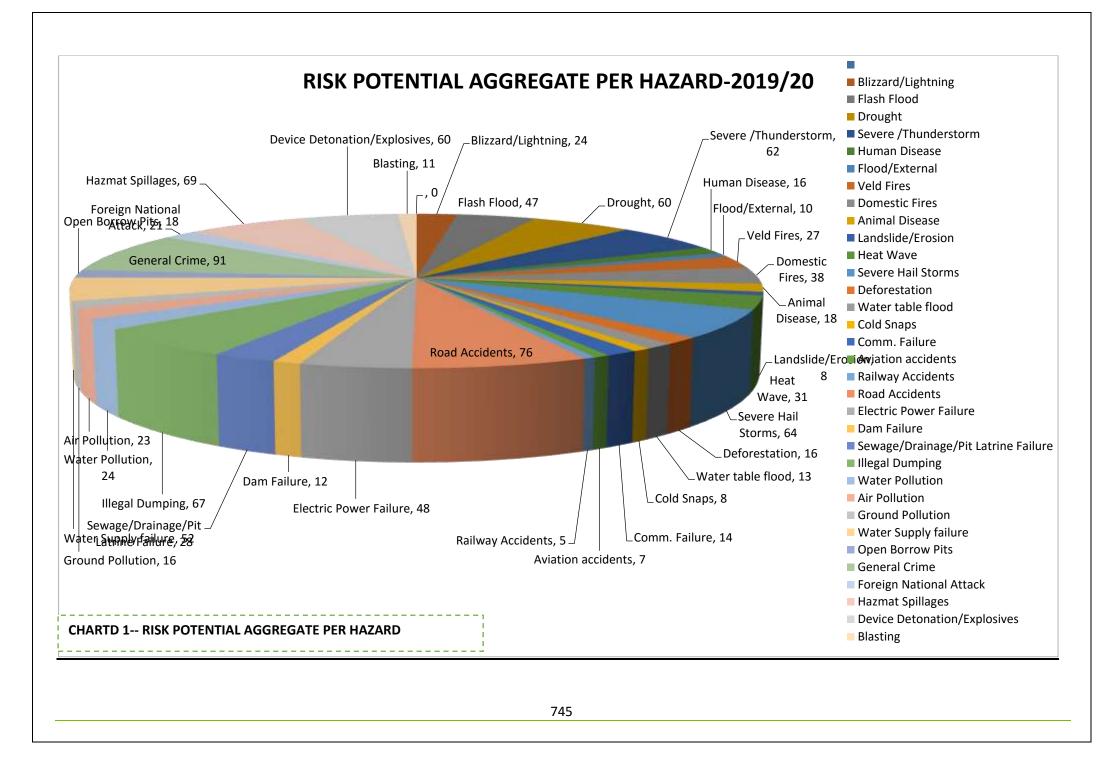

Water shortage leading to drought- This is a high risk stated hazard in the municipality that affects the lives of the residents hence regular protests. Water need demand exceeds the supply creating disharmony to the residents

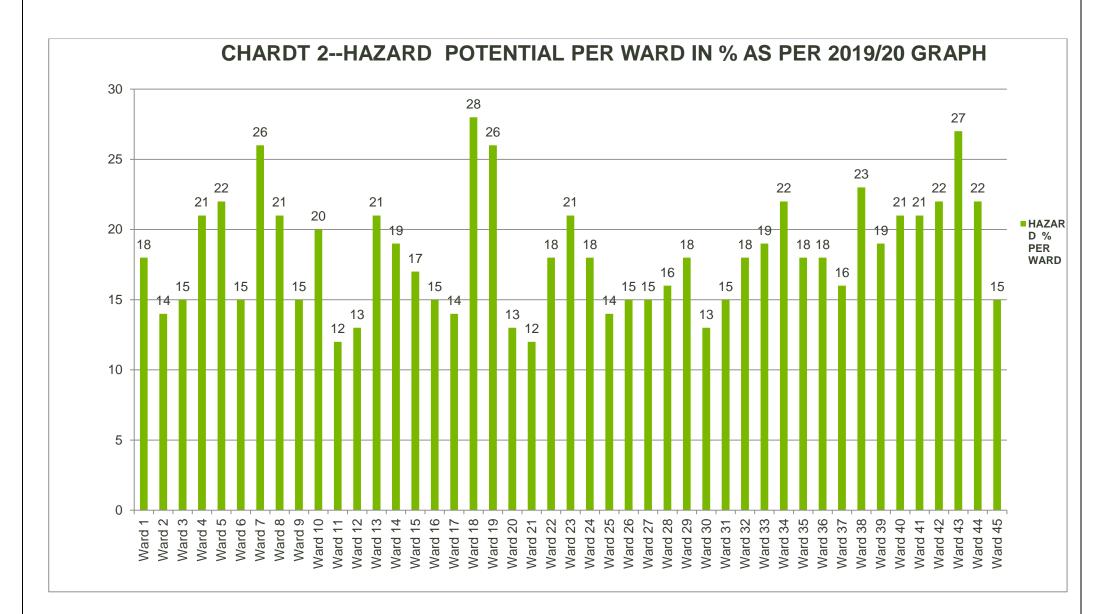

Gangsters / juvenile criminal actives leading to killings or death. High risk rated hazard potential as residents are killed from the established groups. Whilst such groups are not arrested, the community will trend to take law into their hands out of desperation.

Damaged and blocked storm water drainage systems. High risk rated hazard in majority of the Roads or streets in town Storm water drains are vandalised where steels are cut and stolen to the ultimate blocking of the drainage system

Affected communities as per different wards

CDM /Red Cross volunteers together with personnel from Polokwane Disaster Management Unit conducted risk assessment in all wards and established different levels of hazard potential as per the graphic illustration below.

Page 746

Other Hazards

Air pollution from smoke is occasionally experienced from the following areas around town.

- Polokwane Smelters ----Located at the Southern Side of the City
- Silicon Dumping Site ---Located at the Southern Side of the City
- Other Dry cleaning infrastructures---Inner-City of the Town
- Neglected Buildings out of Town: Chloe Sizal, Fynboss, Former Aganang Buildings at Ga-Kgopana

Inadequate Access local adjacent areas due to lack of safe bridges

- Lepotlako to Christiana from Matlala Road (D19)
- Wash bank to Christiana
- Mandela to Utjane
- Manamela (Matlala) to Christiana
- Ga- Phiri-Maja Connecting village with Moshate

Major or High Risk public events/gatherings

- Several events commanding high risk level potential regularly organized in Polokwane
- Overnight music festival with attendance over 5000.
- Soccer events with attendance over 5000 during the night
- Church Services with minimum attendance of 5000 to 20 million including other churches activated in the forest
- Voter Registrations and Elections- Provincial and National Elections 2019
- Tertiary Institutions applications and Registrations date

Commercial residential accommodation

The following structures are located within the RDP housing settlements as well as in some other houses located in urban and rural areas. e.g.---Mankweng and surrounding villages, majority of RDP housing settlements around town, Seshego, Westernburg and other settlements.

These settlements are hereby categorized as follows:

- Residential house surrounded by Shacks/ letting/background rooms within the same yard
- Residential site with shacks/leased/background rooms without main house.
- Main house leased for temporary residents

These commercial practises are purportedly engaged to mostly lease students, employees engaged around same vicinity for residents (Students and learners) and proximity to the academic institution and employment.

Such areas are mostly overpopulated due to university students and employees of various organizations wherein such residential structures do not have approved safety plans and permission to occupy from the Municipality.

| No | RURAL SETTLEMENTS | URBAN/SEMI | ENTIRE MUNICIPALITY |
|----|---------------------------|------------------------------|---------------------------|
| | | SETTLEMENTS | SETTLEMENTS |
| 01 | General crime | General crime | General crime |
| 02 | Road accidents | Hazmat spill accidents | Road accidents |
| 03 | Illegal dumping | Road accidents | Hazmat spillage accidents |
| 04 | Severe hail storms | Device explosives/detonation | Device |
| | | | explosives/detonation |
| 05 | Drought | Illegal dumping | Illegal dumping |
| 06 | Hazmat spillage accidents | Severe hail storms | Severe hail storms |
| 07 | Severe Hail Storms | Severe thunderstorms | Severe thunderstorms |
| 08 | Severe thunderstorms | Water supply failure | Drought |
| 09 | Device | Electric power failure | Water supply failure |
| | explosives/detonation | | |
| 10 | Water supply failure | Flash floods | Electric power failure |

Hazards Priority Status

4.6. HAZARDS PRIORITY MATRIX I T.O WARDS (Refer to Figure Above)

| NO | WARD NUMBERS | N | 0 | WARDS NUMBERS |

| 07 | 10 | 1 | 4 | 12;20;30 |

4.7. Risk Assessment Levels and Targets –Reports

4.7.1. Tribal Councils Reports

Tribal Councils were interviewed through engagements in the Kgoro/Council Meeting whilst in some other areas officials conversant with the area dynamics were able to provide the hazard potential. Key to the hazards identified are:

- **Maraba**—Key hazards potentials-illegal dumping, open borrow pits, land invasion, drought including grass Fires.
- Mothiba—Sand mining, road accidents and open borrow pits.
- **Dikgale**-Overcrowded clinic, Developing gangsters.
- Bakgaga Ba Mothapo-Road accidents at Nobody Paledi and Moremadi, illegal dumping at Makgwareng, Nobody, Tjatjaneng Moremadi Park, Drought in all areas, sporadic incidents of structural and grass fires, electric failure due to cable theft, lightning's, high risk pit latrines in the community and some schools, Open borrow pits at Paledi, Moshate and Makgwareng including high rate of criminal activities due to late closure of taverns.
- Matlala Seasonal high risk of flood at Setumong, Manamela, Dibeng etc., accidents potential at Main Roads Semaneng, Manamela and Koporasi, Illegal dumping at Setumog and Dibeng, drought, sporadic incidents of structural and grass fires. Unsafe pit latrines in the Community and some schools, poor water supply due to operators' inefficiency as well as illegal connection,

- Makgoba: Accidents cause by stray animals, low water supply and sometimes none, military base explosions affect the quality of housing structures in the surrounding villages.
- **Bjatladi;** Illegal dumping increasing whilst submission was made for the Municipality to have dust bins/ skip in the village. Drought potential is experienced across the whole area of villages. Deforestation keeps on increasing for commercial purposes. Congested and unsafe rental hostels/buildings next to the University pose a huge threat to potential structural Collapse as occupation Certificates purports not to be available.
- Moletji: Leokama is the area most flooded during rainy seasons with the main road overflowed and over flooded. Accidents on the Gilead road occur regularly. Illegal dumping happens in all villages. Structural and grass fires occur infrequently in the community. Electricity challenge is experienced whenever there is controlled black out, theft of cables and during serious lightings. Open borrow pits rife in the area after no being attended by the developers. - Soil harvesting occurs in local rivers as well as alongside main sandy roads.
- Mashashane: Mars and Mapangula picked up as key accident areas. High Rate of deforestation in Mashashane Moshate and Sebora. Unqualified pit latrines exist in the community and some local schools. Poor water supply arising from illegal connections and poor services from pump operators affecting Boetse, Mapateng, Kgasha, Sebora. High level of Illegal dumping experienced across the villages. Open borrow pits at Moshate and Mapateng left by the previous Developers. Illegal Mining mushrooming at Maune, Mohlonong and Madiba without the necessary prospecting rights and approvals.
- Makotopong: Occasional accidents potential except during festive periods. Illegal dumping occurs all year long in all areas however input for the waste/ dumping transfer station to be established. Both Grass and Domestic fires occurs infrequently with minimal damages. Electricity failure occurs mainly on Cable theft. Unsafe pit latrines still prevalent in the Village and at some schools. Water supply does not cover the entire community with water. High level criminal activities experienced in the community.

4.8. Institutional hazard specific Information

Several departments and other private organizations were interviewed to probe for the organization specific hazards that might ultimately negatively affect the community at large. In terms of the provision of Disaster Management Act each department/ relevant service within

the municipality is responsible for the preparation of a disaster Plan as well as any other Municipal entity. Based on the provision annotated above the following departments provided their information.

4.8.1. Department Health and Social Department:

Three provincial and two Private hospitals are located within the jurisdiction of the municipality servicing all communities in and outside the municipal jurisdiction. Those hospitals are linked to the local clinics in various clusters. Whilst the above medical Centres service the entire community of different illnesses or outbreak, no critical outbreak can be rated **extremely** high <u>risk</u> disease/burden. Despite the availability of perennial high risk disease, (not sporadic), the department conducts public health Education/awareness campaigns though the relevant practitioners on daily basis.

4.8.2.1. Disaster Management Plans for the hospitals and clinics

All hospitals are supplied with Standby generator with limited power, Emergency water in the form of tanks/reservoirs as contingency measure. However, that evacuation plan floor for hospitals is sometimes available or not whilst in some areas where it's available is not rehearsed and not even known by the staff.

As a matter of foundation Disaster Management assisted most clinics with floor plan and related rehearsal in line with provision of the Ideal Clinic Manual.

4.8.2.2. WF Knobel Hospital-

Structural Condition of the hospital is unsafe to the patience all the times. Safety equipment's or fire Extinguishers and hydrants are not serviced as per the prescripts of the Building Standards.

4.8.2.3. Pholoso Netcare-

An over 200 bed hospital experiences shortage of Water and energy interruptions. Such interruptions impede the provision of better services to the patients.

4.8.2. Department of Education

Disaster Management responsibility for schools is centralized at head office. No confirmation was found to the effect that schools do have Disaster/Evacuation Plans for any possible emergency as required by the provisions of Section 61(a) of the South African Schools Act 84/1996) read with the Regulations for Safety Measures at School at Public Schools (GG. No 29376/1128 dated 10/11/2006)

4.8.3. Anglo American Platinum Mines-

Hazards from Mine that will affect the community included Significant emission of noxious gasses affecting human inhalation, major air pollution control dam spillage affecting drinking water, Bushveld fires in farm around the mine, possible hazmat spillages from transportation trucks. However remedial measures exist in the mine where safety personnel have been appointed to deal with such identified potential threats.

4.8.4. SASSA:

Beneficiaries receive grants at their respective places where several execution challenges might negatively affect smooth operation of the department to access those beneficiaries- poor road Conditions, Overpopulated shacks, disaster incidents, increased pay trucks hijacking and foreign nationals without Identification during disaster Incidents. Whilst the above challenges may impede service delivery to the beneficiaries the necessary line responsible institution are advised to correct the situation

4.8.5. Parliamentary Office:

Gap on roles and responsibilities of politicians and traditional authorities impedes community services and sometimes create unnecessary duplication. However, that the following challenges were raised- Low Lying bridges, temporary school mobile structures, accidents at Tibane Mall, illegal sand mining at Ga- Moeti, Ramakgaphola,

4.8.6. Sports Arts and Culture-

Public events organized in the Municipality create some challenges to the department as the Departments is responsible to ensure safe events in the Municipality. Crime reports after every event creates challenges to the state. Non-Compliant public events pose a serious threat to the community members

4.8.7. Public Works Roads and Infrastructure:

Road signs along the roads are stolen, illegally removed or blocked for own purpose. This also includes the theft of fence alongside roads. Illegal sand mining alongside the main roads and causes silting.

4.8.8. Transnet:

Low pressure of water in hydrants, human crossing of the road at an unsafe railway line, stealing of the Railways carrying hazardous substances transported through settlements and should any accident occur the closest community will be negatively affected,

4.8.9. LEDET:

Water shortage and water pollution in the Municipality is identified as hazard in the municipality

4.8.10. SAWS-

Climate changes –Severe weather, heat or cold, veld fires electricity and Criminal Activities affects the proper recording of Climatic Conditions

4.8.11. CDM Health Services;

Noncompliance of food outlets which might cause food poisoning. Animals not vaccinated for which animal vector borne diseases might affect members of the Community.

4.8.12. Department of Rural Development:

Differences between Communal Property Associations are rife in the departmental structures. Land invasions occurs in State lands due to political reasons and sometimes lack of land for settlement development.

4.8.13. Provincial EMS-

Unregistered and unqualified Ambulance Service Companies on the road to the detriment of the patience.

CHAPTER 5-

DISASTER RISK REDUCTION.

The Disaster Risk Reduction primary objective is to ensure that all disaster risk Management stakeholders develop and implement integrated disaster risk management plans and risk reduction programmes in accordance with approved frameworks.

Each organ of state is expected to develop Disaster Risk Management Plans in terms of the institutional hazard specific policies and frameworks in line with the Intergovernmental Relations policies. Such plans should be aligned and integrated in the Municipal policies and Framework to curb or avoid duplication of responsibilities.

Communication in Emergency Operation Centre (MEOC-Charlie Mike)

The Emergency Control Centre is a central command and control facility responsible for carrying out emergency preparedness and emergency management functions at a tactical level in an emergency situation, and ensuring the continuity of operations.

The Incident Command Post (ICP) may be created at or in the immediate vicinity of an incident site, although primarily focused on the tactical on-scene response, may perform an ECC-like function in smaller-scale incidents or during the initial phase of the response to larger, more complex events. A standing main municipal Emergency Control Centre, or that activated to support larger, more complex events, is typically established in a more central or permanently established facility; within Charlie Mike.

For complex incidents, the PECCs may be staffed by personnel representing multiple jurisdictions and functional disciplines and a wide variety of resources. The PECC may be permanently activated with full staff at occurrence of disaster or may be established to meet temporary, short-term needs. The physical size, staffing, and equipping of an ECC will depend on the size of the jurisdiction, resources available and anticipated incident management workload. ECCs may be organized and staffed in a variety of ways.

Integrated Development Plan (IDP)

Certain IDP Project indicates that a number of other developmental projects contribute to disaster risk reduction in the municipality to some extent. Although those projects form part of the normal line function responsibilities, it already indicates that a vast number of projects are inherently taking issues of disaster risk reduction into account. However, it remains imperative to conduct detailed analysis of these as well as all future planned projects and align these with disaster risk priorities.

However, following the prerequisite of a proactive disaster risk reduction strategies, it's obligatory to ensure that all development planning is intertwined with the risk reduction objective (Prospective) as opposed to Reactive (Compensatory). In order to implement appropriate disaster risk reduction programmes, it will be deemed necessary to align the above-mentioned risk areas with the IDP and SDF of the municipality. It is very important not to duplicate projects, but rather to integrate disaster risk reduction into existing development initiatives. All potential risks, hazards and threats have to be dealt with, within each line department (integrate and align it with current existing processes) before it can go to the IDP manager.

Spatial Development Framework

The Spatial Development Framework of the municipality indicates economic development opportunities, growth point, and municipal land amongst others.

Implementing disaster management

At this stage it should become apparent that although for ease of reference and understanding, the application of disaster management can be implemented in different phases, many aspects could run concurrent, depending on what has been undertaken to date, and/or the level of progress being made with a specific item, or urgency, for that matter.

CHAPTER 6:

PREPAREDNESS PLANNINNG

Early Warning Measures

SA Weather services are able to notify officials through SMS on the Climate related threats for risk avoidance. This means of early warning is specific for climatic condition line function departments are also responsible for the Coordination of their identified potential threats and coordinate the message through Disaster Management Advisory Forum, technical teams etc. for preparedness planning and response capacity enhancement.

Standard Operating Procedures for the identified hazards have therefore being developed for the monitoring of the signs of any threat and related response. Ground Structures established by the Municipality also serves as a tool to deliver the messages to the community when need arises. Schools Emergencies and Welfare Centres are obliged in terms of the departmental policies to ensure that Evacuation procedures during emergencies are observed through the Occupational Health and Safety Component.

EVACUATION PLANS DRILLS/ REHEARSALS

It is evident that losses from natural and human induced disaster are increasing, causing death, injury to many people, leading to destruction of property. As a result of the current situation, every year people lost their lives, one cannot guarantee that the same can never happen to this institution. It has, therefore, become necessary that preventative measures and possible and effective plans of be decided upon in order to safeguard life and property of the municipality.

DEFINITION OF EVACUATION

Evacuation is defined as compulsory departure or leaving a place in an orderly fashion due to a threat or eminent threat especially for protection of life and property.

TYPES OF INCIDENTS

Evacuation takes two basic scenarios for it to be effective, namely; **planned** known as (evacuation with early warning) and a **spontaneous evacuation** (unplanned) as a result of unforeseen event.

COMMUNICATION OF THE EVACUATION PLAN

The plan should be communicated to all stakeholders, staff prior to deployment. All exit routes and assembly area must be clearly marked and should be known by all stakeholders and staff members for safe evacuation.

BASIC REQUIREMENTS FOR SAFE EVACUATION

EVACUATION AND DRILLS/ REHEARSALS TABLE TOP EXECIRSES ETC.

The purpose of any drill or exercise is to reveal planning weaknesses; uncover resource needs and shortfalls; improve coordination within the community and district; clarify roles and responsibilities; and improve overall performance of all staff and visitors.

EMERGENCY PLANNING TYPES

Community Evacuation

Community evacuation is twofold -

Whenever a community is threatened or affected by a catastrophic disaster incident, an evacuation for victims' safety will be activated through Disaster Management. To ensure that the evacuation plan or strategy is well applied to the entire to the community, regular rehearsals or drill with any identified community will be arranged to test the institutional capacity of the community and response agencies. Exercises or rehearsals to the affected community should be annually conducted through Disaster Management.

Institutional Evacuations

Drills and Simulation Exercises should regularly be conducted in the public and private institutions following the Patterns-Announced and Planned, Unannounced and Planned as well as Unannounced and Unplanned (Internally).

Tabletop exercises simulate an emergency situation in an informal, stress-free environment designed to elicit discussion to resolve coordination and responsibility issues based on existing Emergency Management Plans. Preparedness measures include:

- An informal discussion of simulated emergencies
- No time pressures
- Low stress
- Useful for evaluating plans and procedures
- Helpful to resolve questions of coordination and responsibility

Functional Exercises (Planned and Unannounced) simulate a real emergency under timesensitive conditions by testing coordination among various functions and outside response agencies.

Full Scale Exercises or Rehearsals

Full scale Exercises or rehearsals test an entire community's one organizational response capability including external response agencies

CHAPTER 7:

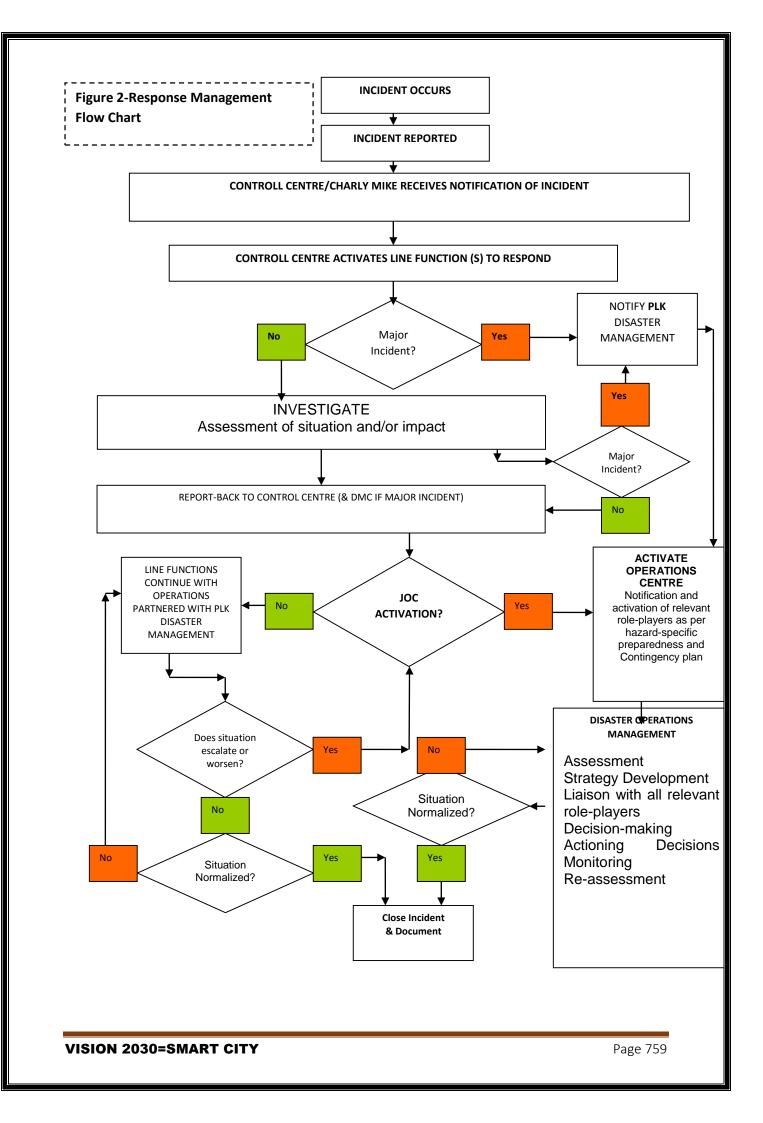

DISASTER RESPONSE.

This component is intended to facilitate the management of response and recovery operations and the recording, retrieval and updating of specific real-time information during single and multiple significant events and/or disasters. It must also allow for direct links with the communication system to provide the information required for mobilization.

The response and recovery component must include the following:

- the area affected (indicating the specific and surrounding affected areas and links to all the spatial and other relevant data associated with the area)
- the type of event (classification by type, magnitude and severity) analysis of status of critical lifeline infrastructure

- analysis of reported impacts and monitoring of progress with recovery operations in accordance with standard assessment and situation report formats
- situation reporting, tracking and analysis of status of critical disaster operations, such as search and rescue, emergency medical care, access routes and fire suppression
- response and recovery resource database, including: * primary agency (contact details of the primary agency, response and recovery plans and SOPs applicable to the specific area and event) * resources and support agencies (contact details of the support agencies, response and recovery plans and SOPs applicable to the specific activity) » relevant service providers (listing of all other related services that may be required to assist with response and recovery operations in a specific area).

Declaration of a local state of disaster:

"Section 55(1) "In the event of a Local disaster, the Council of a municipality having primary responsibility for the coordination and management of the disaster may: - by notice in the provincial gazette declare a local state of disaster if existing legislations and contingency arrangements do not adequately provide for that municipality to deal effectively with the disaster or b) other special circumstances warrant the declaration of a local state of disaster"

In the event of a local disaster the municipal council may through council resolution or notice declare a local state of disaster if existing legislation and contingency arrangements do not adequately provide for the municipality to deal effectively with the disaster; or other special circumstances warrant the declaration of a local state of disaster. If a local state of disaster has been declared, the Council may make by-laws or issue directions, or authorize the issue of directions to: Assist and protect the public, provide relief to the public; prevent or combat disruption; or deal with the destructive and other effects of the disaster.

CHAPTER 8:

RECOVERY

Responsibility for Co-ordinating response to specific known rapid - and slow-onset significant events and disasters must be allocated to a specific organ of state. I.e. responsibility assignment matrix should be completed to assist in the emergency and ultimate short and long term recovery measures. For example, flood response and recovery efforts would involve the combined efforts of many stakeholders, but the primary responsibility must be allocated to a specific organ of state with the other stakeholders assuming supportive responsibilities. In the case of riverine floods, for example, the Department of Water Affairs and Forestry could bear primary responsibility.

In the case of drought, the Department of Agriculture could be the primary agency, and in the case of extreme weather events, the NDMC could assume primary responsibility. The operational plans and guidelines of the various response agencies that contribute to field operations must be considered when allocating responsibilities for response and recovery. In this regard, primary and secondary responsibilities must be allocated for each of the operational activities associated with disaster response, for example, evacuation, shelter, search and rescue, emergency medical services and fire-fighting.

Response and recovery operations must also make provision for the delegation of responsibilities of the Head of the Centre and the assignment of alternate arrangements for a

disaster management Centre in a particular sphere as a contingency in the event that the particular disaster management centres itself is affected and unable to continue to operate.

CHAPTER 9:

MANDATORY TESTING AND REVIEW OF THE PLAN

In terms of Section 53 (1) (c) of Disaster Management Act 57/2002 as amended -the municipality may <u>regularly review or update its Disaster Management Plan</u> when it's considered appropriate subsequent to:

- The performance of the plan following activation as a result of a disaster.
- Exercises designed to practice or test aspects of the plan.
- Operational procedures have been changed.
- External disasters or introduction of new technology which suggest a review should be carried.
- The inevitable changes in the demographics, geographical spaces and boundaries in terms of the demarcation Board Gazettes.
- The impact of any new passed laws or acts have an influence on the plan in place.

It is also of critical importance that especially the emergency response aspects of this plan be exercised at regular intervals. Table Top, walk through and simulation exercises can be used to ensure that all role players know what is expected of them in different scenarios. It will further be advised to establish a comprehensive simulation programs for the municipality.

12.9 Housing Chapter

It is without doubt, for the City, that housing delivery is not only an act of legislative compliance, but a strategy for the development of the City's people; improved environmental conditions, alleviation of poverty, job creation, restoration of human dignity, and social integration of society. The review of Five - Year Human Settlement Plan is a continuation of work started by the City to coordinate the establishment of integrated and sustainable human settlements for the people. Reviewing the Plan presents City efforts to remain in balance with improving government policy frameworks, changing environmental conditions of the City, and to ensure a sustainable human settlement development process.

This 2020/2021 Human Settlement Plan essentially presents progress achieved and considers growth (City wide demographic changes), opportunities and challenges facing the City in human settlement development. While it is believed that the strategic Human Settlement goal (vision) of the City remains relevant and sound, it is also believed that the mechanisms of realizing the goal requires enhancement to ensure more responsive and effective housing delivery. To achieve the goal of creating Integrated and Sustainable Human Settlements where people live in decent houses with access to basic services and in close proximity of social and economic opportunities, it is believed that the City must;

Reviewing the HSP

As the City continues to observe physical growth and demographic changes, so is the need to review and realign Human Settlement Plan of the City with government policies and development plans. Reviewing the 2019/2020 HSP for 2020/2021 Financial Year is annual City commitment for effectively responding to improving government policies and local circumstances. While the City is facing the challenge of providing universal services to a growing population, tight capital funding, inadequate infrastructure, continues to threaten the human settlement development process. This 2020/2021 Five Year Human Settlement Plan has considered the improving policy as well changing environmental conditions of the City. As per Table 1 below, the City's population has grown from 628 999 (Census 2011) to 702 190 (Community Survey 2016).

| Data year | Population | Households |
|-----------------------|------------|------------|
| Census 1996 | 424 976 | |
| Census 2001 | 508 277 | 124 978 |
| Census 2011 | 628 999 | 178 001 |
| Community Survey 2016 | 702 190 | 214 451 |

Table 1: City statistics (1996 -2016)

Source: Statistics South Africa

Assessing City growth and development

According to recent data of Statistics SA, the general welfare of the City is improving. The population marked 702 190, approximately 12.11% of the provincial population of 5 799 090. The number of households increased from 178 001 (2011) to 214 451 (2016), marking approximately 83% of formal City housing. The number of formal residential dwellings increased from 159 082 (2011) to mark of 201 790 (2016). The commitment towards improving the lives of the people is further evidenced number of households having access to basic Municipal services. The number of households to having access to piped water increased from 171 054 (2011) to 177 669 (2016), while 203 406 households.

As a result of the redetermination of boundaries for the local government elections (2016), the geographic area of the City extended from 3 775 km² to 5 054 km², incorporating existing settlements of the Aganang Local Municipality. While this growth provides opportunities, it equally presents development challenges for the City. The incorporated communities have since brought about development challenges for the City. The City remains economically dominant in the Capricorn District, contributing about 63% of the District GDP. A breakdown of the annual household income is tabled below:

| Annual Income category | 2017 | 2018 | 2018 % |
|-------------------------|--------|--------|--------|
| R0 - R2 400 | 129 | 19 | 0.1% |
| R2 400 - R6 000 | 512 | 342 | 0.2% |
| R6 000 - R12 000 | 4 943 | 4 286 | 2.0% |
| R12 000 - R18 000 | 9 730 | 8 856 | 4.1% |
| R18 000 - R30 000 | 28 060 | 27 295 | 11.9% |
| R30 000 - R42 000 | 28 492 | 28 660 | 12.2% |
| R42 000 - R54 000 | 24 560 | 24 398 | 10.4% |
| R54 000 - R72 000 | 26 425 | 27 151 | 11.2% |
| R72 000 - R96 000 | 23 569 | 24 179 | 10.0% |
| R96 000 - R132 000 | 20 881 | 24 173 | 8.9% |
| R132 000 - R192 000 | 19 178 | 20 167 | 8.12% |
| R192 000 - R360 000 | 23 659 | 25 065 | 10.1% |
| R360 000 - R600 000 | 14 022 | 15 026 | 6.0% |
| R600 000 - R1 200 000 | 14 022 | 9 678 | 3.9% |
| R1 200 000 - R2 400 000 | 9 006 | 2 518 | 0.09% |
| R2 400 000+ | 264 | 287 | 0.1% |

Table 2: Annual Household Income profile

| Annual Income category | 2017 | 2018 | 2018 % |
|------------------------|---------|---------|--------|
| Total | 235 570 | 240 100 | 100% |

Source: Global Insight, 2016

The new City boundaries and demographic changes

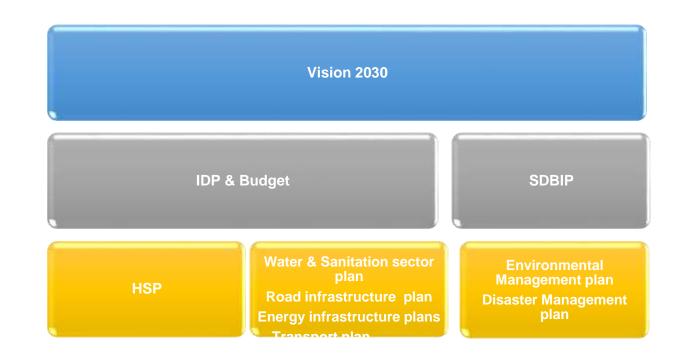

The 4th local government elections changed ward demarcations City boundaries. On the 3rd August 2016, the City adopted parts of the former Aganang Local Municipality, thus expanding the spatial extend of the City to measure approximately 5 054 km², with 45 Wards. The former is situated approximately 45 km west of Polokwane. It is largely rural. The total population marked 125 072 persons (2016), a decrease of approximately 0.01% for the 131 200 population of 2011. The decrease is deduced to out-migration. The incorporated parts of the former Municipality are now grouped to form Aganang Cluster, the 7th regional service centre.

From Aganang, the City adopted 12 of the Municipality's 19 wards, which were then restructured to make 6 wards. The re-demarcation of the City alone resulted in 39 wards. Two wards (6 &7) are split between Polokwane and other adjoining Municipalities of the former Aganang, thus the estimated population of 92 162 will not be incorporated wholly into the City. It is projected that a population of about 87 071 will be incorporated into Polokwane, thus growing the City population to 789 261 people.

The Relations between the City's Integrated Development Plan & the Human Settlement Plan

The IDP is the main tool for the development path of the City, based on a logical and participative process that assesses and prioritises community needs, identifies development strategies, and apportions Municipal resources for attaining the development strategies. The City's IDP contains a 5-year strategy (Vision). Beyond 5-year period, the City adopted a long term strategy (Vision 2030) contained in the Economic Growth and Development Plan. The strategy is pegged against a long term growth path to transform the City into a bustling and sustainable entity that distinguishes the Municipality as a City of Stars leading in innovation through the SMART CITY concept. Both policy documents work together towards sustainable development of the City.

Diagram 1: Relating the HSP and the City's Development Plans

The 2020/2021, Reviewed Human Settlement Plan is part and parcel of the City's development policies and marks continued commitment towards the creation of sustainable integrated human settlements, provision of affordable housing opportunities, and general welfare improvement of the City. While the strategic objectives of the HSP are responsive to the prevailing conditions of the City, they are also well aligned to the various human settlement and general development policies of the Government.

Aim and Objectives of the HSP

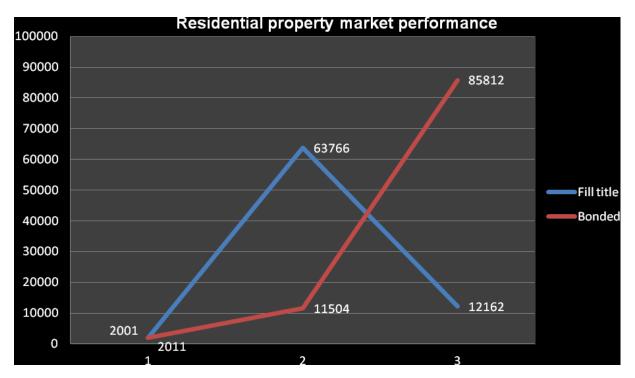

The core aim of the Human Settlement Plan is to ensure definite housing focus in the Integrated Development Plan of the municipality. The adoption of the Plan will ensure compliance whilst supporting the national Medium Term Strategic Framework and the provincial Multi-Year Housing Development Plan. To help achieve the national vision of sustainable human settlements and improved quality of household life, the municipality will drive and coordinate programmes to achieve the following strategic objectives:

Current human settlement realities

Although the City has made strides in housing delivery, the legacy of the pre democratic government, growing population, high urbanization and unemployment rates continue to exert pressure on limited City resources, therefore resulting in undesired human settlement conditions. According to stats SA, the number of formal residential dwellings increased from 159 082 (2011) to mark of 201 790 (2016), whilst informal dwellings decreased 16 044 (2011) to 7 731 (2016). Access to piped water improved from 171 054 (2011) to 177 669 (2016), while. sanitation (flush/chemical toilet) improved by 31%. The total number of household connected to the energy grid recorded 203 406 by 2016.

The City's living conditions has shown remarkable degree of improvement with an increase of 78% of formal housing, from 159 082 (2011) to 201 790 (2016). However, the functioning of

the property market is relatively low owing to a various reasons including unregistered and transferred tenure and insufficient affordable stocks.

Apart from a low functioning property market, the City continues to face a variety of challenges that aptly mirrors Country wide human settlements problems. The steady economic growth and improving physical environmental conditions of the City continues to attracting people into the City. But the mounting cost of living, relatively low incomes, appreciating housing costs, and stringent credit systems continues to displace and relegate people to appalling living situations. On the other hand, high investment costs, limited natural resources (water and land), makes it hard for City to deliver at a rate equal to the demand. It is not surprising that the existing housing conditions of the municipality appear somewhat the opposite of what is envisaged through national policies. A growing number of the urbanizing and households in overcrowded situations have since opted for backyard and squatting (informal settlement accommodation), both which do not meet the minimum requirements of adequate housing.

Increasing demand for affordable housing opportunities

The demand for new housing delivery (arising from urbanisation, new household formation, and other sub-related factors) is growing at a fast pace. But in the the mist of all confrontations, the City remains determined to facilitate the delivery of affordable housing opportunities in areas that provides convenient access to basic services, economic opportunities, transport, and social amenities. The 2018/2019 and 2019/2020 provincial human settlements allocations has paved the way for housing delivery in different areas of the City. The construction of 1 450

Source: Stats SA, 2011

units in Polokwane Extension 78 has made another milestone in the informal settlement upgrading project of the settlement. The servicing of the entire Township of Polokwane Extension 133 which holds almost 3 000 sites will make provide the basis for housing delivery. Furthermore, the completion of three Townships (Polokwane Extension 126, 127, and 134), which consolidates into almost 4 000 stands will make a large impact in housing delivery.

The City is in the currently migrating its previously separated housing demand backlogs into a single national housing demand s demand database comprise of 55 000 families awaiting full title State housing assistance. Addressing this delivery need would require resources beyond State capacity.

Growth and migration

The impact of growth and urbanisation in relation to low delivery rates (land and basic urban infrastructure) is evidenced in two main ways, viz; informal settlements and back yard shacks. The City is confronted with two informal settlements that hold a backlog of about 2 000 families. Both these informal settlements (Ext 106 and Seshego F) are due for relocation to permanent residential lands. Another rental projects are underway to curb the challenge of backyard rental and provide affordable rental housing for the people. Another emerging housing phenomenon of urban-rural migration is steadily increasing. If no planning and intervention is taken, this phenomenon can lead to the creation to dysfunctional human settlements.

Dysfunctional and inequitable property market

Although the provincial Department has made considerable strides in normalising the housing environment, there are still shortcomings as far the adequate housing is concerned. There is still a concerning backlog of tenure, especially in State funded housing projects. While properties in recently developed areas of Polokwane Extension 40, 44, 75, and 76 are registered and transferred, old areas such as Seshego Hospital View, Mankweng G, Sebayeng D, and others are stalling with the main challenge of centred on finalizing planning and Township proclamations.

Claims and Restitution of land

The land restitution programme has an influence on the City's human settlement development process. To this far, approximately 23.5894ha (at Polokwane Extension 40) of City owned land was donated for restitution of New Pietersburg land claimants. Implications include funding for the development of the land for human settlement. The presumption of the City's HSP is that restitution does not equate to adequate housing. The City will actively partake and assume its legislative responsibilities to ensure that the restitution conforms to the total development objectives of the City.

A growing informal sub market housing

The City's sub-urban housing market is largely characterised by informal sub market housing (backyard rental). Notable areas include Seshego, Mankweng, Westernburg, and Polokwane Extensions. It is estimated that at least two quarters of the City's sub-urban population lives

backyard housing for reasons ranging from overcrowding to affordability. The sub-market has become a feature of the National housing landscape that requires policy intervention considering the following constraints it bears:

Capacity skills to meet new policy objectives

The City is coordinating the implementation of various Government policies and strategies (planning, finance, construction, law, contract and project management) that forms part of human settlement development process. The implementation of these strategies and systems requires adequate level of understanding. This is very crucial for the City considering the accreditation of the municipality into a housing authority. The current skills level is limited due to functions performed by the municipality. But to maximise performance in line with anticipated functions for the municipality, the existing skills level of housing practitioners must be professionally enhanced, especially in areas planning, finance, contract, and project management.

Budgetary constraints

South Africa's public housing finance system is tied to national and provincial government, where funds are disbursed from national to the provinces are used by provincial government to finance human settlement programmes and projects. By far, expenditure and control of the funds rests with province. Expenditure is mostly linked to the strategic housing plans and targets of the province. The grant allocation, which comes in the form of approved projects by the province, is currently the only funding mechanism for the municipality. The limitation of this system relates to the lack of medium term budget projections for municipalities. This problem, partially affects delivery across the municipal jurisdiction. The City is however finalising accreditation implementation protocols with the Department. This should help with direct allocation of funds to the City for housing delivery.

Blocked housing projects

The City is confronted with the problem of incomplete housing projects (also known as Blocked housing projects). This problem is borne from various factors including historically inexperienced contractor and inadequate capacity to administer funds and manage projects. In some instances, community conflicts and land issues caused the problem. It is estimated that roughly 5 000 housing units are blocked on various stages (approval, foundation, wall and roof level) across the municipal jurisdiction. In the financial year 2012/2013, the province (NHBRC) commissioned a forensic engineering assessment of incomplete housing units developed between March 1994 and March 2010.

The NHBRC's assessment report provides recommendations based on the structural conditions of units. A budget well over R500 million is required for the provincial government to complete the units. There is no provincial strategy for the re-implementation of blocked projects, except the HDA guidelines. Although the absence of a Provincial blocked housing plan leaves the City at liberty to introduce local blocked housing plans, funding the implementation of such plans will require collaboration with the province. In the next five years, the municipality will collaborate with the province to unblock 2 000 units (at a minimum).

The Human Settlement Strategy of the City

Regardless of all challenges, the City remains committed to creating environments that enables the creation of integrated sustainable human settlements, i.e. settlements that meets the total social, economic and material needs of the City's populace. The strategic Human Settlement objective remains relevant and sound for driving the City towards the achievement of national and provincial policy objective, which includes:

Improving the spatial planning patterns by planning and integrating or locating of new housing developments closer to major transport nodes and corridors, economic opportunities and social facilities to ensure the building of an economically and socially integrated and sustainable space;

Improving spatial efficiency by increasing the densities of new housing developments; Increasing the development of housing in the gap market by developing partnerships with the private sector; Diversifying housing products with greater investment in rental housing stocks; Providing municipal engineering services consistently and at a higher level; Using housing as a major job creation strategy and breaking down barriers between the first-economy residential property boom and the second-economy slump

Strategic Human Settlement interventions

The City's housing backlog emanates from many socioeconomic issues including budgetary constraints that affect delivery rates. Adding to this is the fast population and urbanisation growth. The low supply rate is owed to a variety of factors including constrained infrastructure, as well as poor location and availability of developable land. However, all these challenges are not overwhelming to restrain the City from setting housing delivery targets, but calls for more robust housing delivery strategies. The City is determined, thereby rolling plans that will lead to sustainable delivery.

Restoring infrastructure quality for a sustainable human settlement development process The provision and maintenance of municipal engineering services at higher level and consistency is necessary for a sustainable human settlement development process. The reality is that the City's infrastructural capacity and quality has been under pressure as a result of age and capacity. The biggest waste treatment plant (28MI/day) is overloaded to 34MI/day. There are plan to construct a Regional Waste Treatment Plant that will carry the current load and cater for new developments. Already work is in progress for the replacement of asbestos pipes in the City centre and surrounding areas of Seshego in collaboration with the Department of Water and Sanitation. The dwindling water resources are augmented underground water abstraction (borehole) in rural areas. The risk of contamination is currently reduced through precast ablution facilities.

Intensifying efforts to enable a wider range of household's access to affordable housing

The existing housing programs require households to meet specific income restrictions. These restrictions can at times be too narrow to reach the income ranges of people in need of affordable housing. The households best served by current programs are those with basic

monthly incomes between R0 and R22 000. But several economic factors (raising house costs and credit laws) stiffen accessibility for moderate and progressing middle income. The income restriction of existing housing programs is largely suitable to smaller or low expenditure families that are able to devote their disposal incomes to putting a roof over their heads.

A bold approach to sustainable human settlement development: Despite considerable public investment to stimulate the production of opportunities that are affordable the low and moderate income earners, the supply has met the needs of only a fraction of the people. Moving forward, a bold approach to increasing and protecting the supply of affordable housing is needed to retain the diversity and vibrancy of the City's human settlements. The City's bold approach to increasing access to affordable housing for a wide range of income groups include:

Investigating the expansion of the gap market up to R25 000 for first time home buyers. The existing National housing program ends at R22 000. Although the maximum product price linked to the FLISP is collapsed, affordability remains a problem for the targeted income bracket as a result of raising property prices and tight credit regulations. Many subsidy applicants are not credit worthy/indebted. The possible expansion of income for the gap market will require the City to drive the housing development process, especially on Council owned land and to strike strong public-private partnerships for preserved housing affordability.

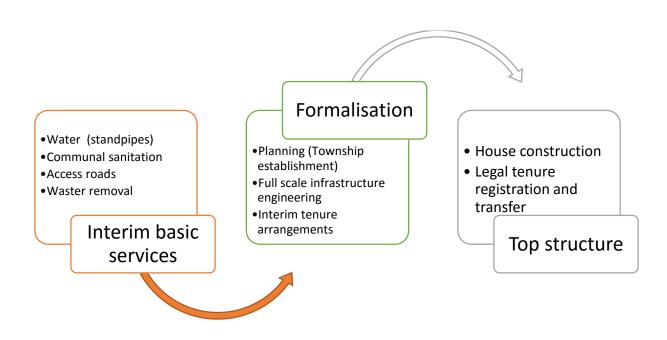

Promote inclusionary housing opportunities in all human settlement developments including social housing projects to ensure social cohesion and sustainability. The development of social housing projects is mostly from public funds with private top funding. Potential or eligible tenants are mostly low to middle-income households earning from R1 500 and up to R 7 500 per month, as eligible beneficiary standard of the National Housing Code. The reality however is target market is weakening to a point that the City's SHI finds it hard to collect rentals. Although rental fees idled since 2011, collection remains difficult. Influential factors to the challenge include inflation and to some degree public perception. These key factors stiffen rental affordability which in turn intimidates the overall viability of rental housing.

The existing model of bridging public funds for social housing delivery is open ended. Whilst provision is made for income groups eligible in terms beneficiary standards of the National Housing Code, there is nothing stopping the SHI from taking the initiative of introducing inclusionary housing (mixing individuals from different income groups in one rental housing project) to promote social cohesion and viability.

Informal settlement upgrading strategy

The City is aware of the substandard environmental conditions of people in informal settlements and the need to progressively work towards improving the living conditions of the households. The informal settlement backlog of the City is currently estimated at 2 000 families. Government's policy on the upgrading of informal settlements provides workable approaches for municipalities to tackle informal settlements. The City has worked closely with

Government institutions and agencies towards the upgrading of informal settlements. Initially the City identified and profiled 6 informal settlements and further adopted a Plan for the upgrading of the settlements. To-date, only two informal settlements remains. The City's Informal Settlement Upgrading Plan, complementary to the National Government policy, recognizes that informal settlements cannot be delivered at a sufficient rapid response and at scale. The Plan thus proposed an incremental approach to upgrading, taking basic service delivery as the initial step of the overall upgrading process.

By all means, the City's encourages and prefers the *in situ* upgrading approach, as opposed relocating residents to new a residential area. Where relocations occur, it is simply due to the high household densities and environmental conditions of the settlements. But regardless of temporary or permanent relocation, the City embraces community consultation/participation and basic service delivery for the relocating community as key success factors of the relocation process.

Generally, there is a lack of funding commitment towards the upgrading of informal settlements. The National funding framework (UISP) for informal settlement upgrading requires adequate project planning as well as collaboration between the Province and the Municipality. The City's strategy consolidates Government resources and work progress for sustainable informal settlement upgrading. This includes feasibility studies undertaken by the HDA and Municipal progress in upgrading other informal settlements.

Informal Settlement Management Plan

Apart from historical factors, informal settlements are generally lodging places for the urbanizing poor characterized by continuous in and outgoing of people. If unmanaged, such trends are likely to impact on overall planning and budget proposals for the upgrading. To curb such problems, the City's mechanisms include:

Recognizing the existence of informal settlements;

Assessing settlements in respect of geographic location, land status, and level of development; Surveying the community to determine the total number of dwellings and recording residents; Taking aerial photos of each settlement to reflect on the existing housing conditions and extend of the settlement; Creating a database of informal settlement; Marking the external edges of the settlement to define boundaries that prohibit settlement expansion; Conducting regular inspection to monitor illegal construction of new structures; Immediate reaction (removal) to new structures. The City is exploring the establishment of an Anti-Land Invasion Unit. There are currently engaging other Cities across the Country for best practices in controlling land invasion.

Spatial transformation and consolidation

To realize the objective of integrated sustainable human settlement, government adopted a policy framework for Spatial Transformation and Consolidation. The framework provides a spatial analysis of human settlements investment in municipalities to determine areas of housing distress, areas for growth, and areas of investment potential. The framework encourages the identifying of Priority Housing Development Areas (PHDA's) looking at the following criteria:

Priority Housing Development Areas

The identified PHDs of the City include the Polokwane south-western gateway, the Polokwane R71 corridor, Leeukuil farm, and the Sengatane-Bloodriver. These Priority Housing Development Areas are experiencing fast growth and somewhat unplanned development. Transforming these regions is crucial in overall objective of creating integrated and sustainable human settlements.

Acquiring and holding land for new human settlement developments

Sustainable human settlement follows sustainable availability of well-located land. The challenge however involved balancing land delivery for all social and economic needs of the community, and overcoming the hurdle of financing its acquisition and development. A sustainable human settlement development process cannot be realised if suitable land parcels are made available for such development.

The Spatial Development Framework and other planning prescripts of the City clearly directs where development should head in the medium and long term. But the challenges remain ownership of land parcels. On the other hand Town Planning frameworks put limitation on the development of available land parcels.

The City is holding raw and developed properties (to the Northern, Western and Central Business District) suitable for human settlement development in the medium term. Different housing typologies are planned to cater for the different housing market (student accommodation, gap market housing, and social housing). In the long run, the City is working closely with the Housing Development Agency which is a government agency to speed up the identification, development, and release of land for housing development. On the other hand, the City is fast tracking delivery through the Public Private Partnership model where land is made available to private investors on long term lease basis.

The below table, contains a number of developed, progressing, and undeveloped lands for housing development.

| NO | TOWNSHIP/FARM | EST UNITS | ZONING | DEVELOPMENT STATUS |
|------|------------------------------|-----------------------|--------------|-----------------------|
| | Polokwane Ext 40 | ± 300 | Res 1 | Township level |
| | Polokwane Ext 72 | 800 | Res 1 | Top structure |
| | Erf 40206 Ext 76 | 240 (rental) | Res 4 | Top structure |
| | Polokwane Ext 78 | 3 000 | Mixed | Top structure |

| Tota | | 11 467 units | | |

Table 3: Planned and Proposed land parcels for Human Settlement development

Affordable public rental housing stock

The Strategy for social housing delivery is to create a robust environment for affordable and well managed rental housing across the City. The two City housing estates, managed through a municipal entity, offers affordable rental accommodation to approximately 697 households. The strategy, already in motion, is to increase affordable rental housing stocks to cater for a variety of income groups. The City is moving away from its conventional way of public rental housing delivery to a new model of partnering with the private sector (Public-Private Partnership). This model will ensure that the City delivers good and affordable rental housing at a proportional rate. The City has identified and declared restructuring zones in areas around the City. This step will enable the City and its investors in affordable social housing to access top-up funds for the implementation of their projects. The designated regions are deemed suitable for achieving spatial transformation, social cohesion, and economic development. The physical location and immediate set up of regions support the material needs of the community in terms of basic services, transport, economic opportunities, and community facilities.

Refining and expanding funding sources to enable a wider range of household's access to affordable housing

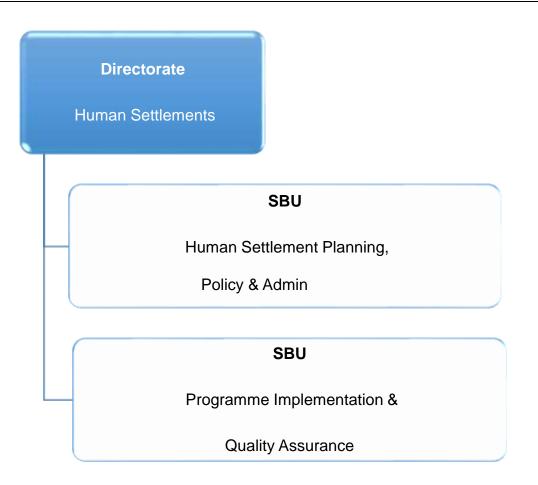

Financing human settlement development for the City is limited. The high escalating costs for land assembly, development, and house construction is affecting the delivery rate. On the consumer side, the increasing cost of borrowing makes affordability hard for the lower end income households, thus relegating families to homelessness. The alternative ways of financing is to strengthen relationships with the private sector to leverage for funding in the affordable housing delivery sector. While the City will continue creating environments suitable for housing development, it is important at a consumer level; to create a culture of saving for housing. It will be worth a while to investigate mechanisms of compulsory household or community based saving schemes. Further bold steps should be explored taken if the City is to achieve the goal of preserving housing affordability. This should include:

Discounted sale of serviced stands in City driven projects to first time home buyers whose basic monthly household income falls below R22 000. This income segmentation is generally guided by continuing costs hikes and credit regulations that largely preclude the lower end income groups. Supporting the latent energy of the people through charitable relationships with private and non-profitable organisations. People have the desire to realise their housing needs but often fall short of the necessary skills, financial means and support. Expanding charitable relationships and streamlining resources is crucial for the City to maximise housing delivery. The objective of the City is to drive and campaign for "Ubuntu for Housing" to ensure organised communities geared towards realising their housing needs by actively participating in the planning and building of their homes, where Government and the private sector work in collaboration to impart skills and provide support.

Institutional Capacity Building

In line with Level 2 housing accreditation, the City has developed and approved a new institutional structure for human settlements. As a Directorate, the City is prepared to undertake the housing function. Two key SBUs have been identified to coordinate the human settlement programme.

Diagram 2: High-level Human Settlements Directorate structure

The SBU Human Settlement Planning, Policy, and Admin is a compact unit that provides a range of services which largely focuses on providing strategic guidance to all activities of housing delivery. Working together with different government institutions including internal functionaries, the unit is responsible for the development of a five-year Human Settlement Plan, planning for human settlement development, monitoring programmes towards the creation of sustainable human settlements. The unit manages the housing demand database. Further, the unit provides a multitude of administrative support services that includes administration of the National housing subsidy system, general office administration, and clientele services. The Housing Consumer Education programme is also executed by the unit.

The SBU Programme Implementation and Quality Assurance manages housing projects through the application various project management strategies to ensure timely production of deliverables, adherence to build environmental norms and standards, identification and unlocking bottlenecks in the implementation of projects, and coordinates local stakeholder involvement in such projects.

Housing Demand Database management

The City's housing demand database contains details of roughly 45 000 families requiring housing opportunities. The City of however migrating its data to the National Housing Needs Register (NHNR), which is to help in many ways including planning for human settlement delivery. Furthermore, the use of the NHNR will improve interaction with housing applicants

and improve planning for human settlement development and equally minimise administrative challenges facing the City in the implementation of housing programmes and projects.

Housing Consumer Education

The Housing Consumer Education Programme is a year-on-year education programme adopted by the City to support the overall human settlement development. Without the knowledge, implementation and the goal of sustainable and functional property market may not be realised. But a shift is made from public funded housing consumer education to an all residential market housing education, with more focus on credit management, wills and last testaments, and homeowners' responsibilities towards service and rental fee payments.

Housing Accreditation

The City is accredited on Level 2 Municipal housing accreditation. The functions of Level 2 housing accreditation include program and project approval and evaluation, budgeting, contract administration, subsidy registration, and technical quality assurance.

Stakeholder engagement

The stakeholder engagement programme provides a platform for humble debates on housing delivery across the City area. The Housing Consumer Education programme offers training about subsidized housing but do not cover housing challenges facing communities. The stakeholder programme offers awareness and information to leaders answerable to communities and further offers an excellent environment to share industry best practice, drive innovation and establish relationships with key stakeholders. The Council Support, Traditional Affairs, and Public Participation SBU is managing stakeholder engagement. The SBU is running various sector forums including Magoshi's forum. The revitalization of the Human Settlement Forum is necessary to ensure effective communication between the City and housing stakeholders. The primary focus of the SBU is to identify local housing stakeholders for reestablishment of a human settlement forum.

Responding programs to housing challenges

The housing delivery programs of the City are aligned to the National Government's housing intervention strategies. This alignment provides for the City to access funding for the housing delivery. The below Tables provides a summary of housing intervention and programs applicable for the City.

| INTERVENTION | DESCRIPTION | PROGRAMS |
|--------------|--|----------|
| Financial | Operational and Capital funding for housing delivery (Top structure, Services, Tenure | |

| | upgrading) and | Rectification housing subsidy | | | |
|--|---|--|--|--|--|
| | institutional capacity | programme | | | |
| | building. | Individual housing subsidy programme | | | |
| Incremental | Capital funding for a progressive housing | Consolidation housing subsidy programme | | | |
| | delivery to qualifying households of State | Emergency housing | | | |
| | funded housing assistance | Integrated Residential Development Programme | | | |
| | | Enhance People's Housing Process | | | |
| | | Informal Settlement Upgrading Programme | | | |
| Rural | Capital funding for housing immediate housing delivery (Top structure) to qualifying households of State funded housing assistance | Rural housing subsidy programme | | | |
| Social & Rental | Funding for medium-high | Community Residential Units | | | |
| | density housing development that provides | Institutional Subsidy Programme | | | |
| | affordable rental | Social housing | | | |
| | accommodation to qualifying households | | | | |
| Enhanced Extended Discount Benefit Scheme | • • • | Beneficiaries must be households who in record have housing arrangements with the City in respect of houses they occupy | | | |
| Municipal | Provides funding for local | Municipalities identified by the | | | |
| Housing Accreditation | government capacity building | Municipalities and those whose applications for housing accreditation has been approved by the MEC for human settlement in the province | | | |

Table 5: Programme explanation and implementation framework

| PROGRAMME | DESCRIPTION | IMPLEMENTATION FRAMEWORK |
|---|---|---|
| Rectification housing subsidy programme | Facilitates for the improvement of Pre-1994 as well as housing stocks developed shortly after 1994 that are structurally compromised. | Funding may either be used for the improvement/upgrading of municipal engineering services where inappropriate levels of services were delivered or structural improvement of State owned properties (Provincial Government or the Municipality) where such properties are structurally compromised |
| Individual housing subsidy programme | Facilitate access to housing (existing house or vacant serviced stand linked to a building contract) available in the secondary market | Beneficiaries may not be registered on the City's housing demand database, but must meet the qualification criteria of the NHC. |
| Consolidation housing subsidy programme | Programme provides funding for the completion of houses on serviced stands provided by the State as part of the Pre 1994 Government housing schemes | Only original beneficiaries of the properties who meet minimum qualification criteria of the NHC can participate in projects planned under the programme |
| Enhanced People's Housing Process | Programme provides assistance to households who wish to enhance their houses by participating in the actual building of their houses | Beneficiaries may be organised communities or willing applicants registered on the City's housing demand database. Additionally, beneficiaries must meet the minimum qualification criteria of the NHC |
| Integrated Residential Development Programme | The programme provides for the creation of integrated human settlements and access to housing in two key phases (1) acquisition, planning and servicing of land (2) sale of properties and construction of subsidy houses for qualifying households | Beneficiaries of State funded houses must be registered on the housing demand database of the City and meet the qualification criteria of the NHC. Beneficiaries of residential stands not earmarked for State funded housing as well as non-residential will follow approved Council processes for the acquisition of the stands |
| Informal Settlement Upgrading Programme | Programme facilitates incremental upgrading of the environmental conditions of people living in informal settlements by | Only people living in an informal settlement subject to upgrading may participate in informal settlement upgrading projects subject to |

| advancing | g basis serv | /ices, | qualification | criteria | of | the | NHC | and |
|--------------------------|--------------|--------|---------------|----------|-------|------|-------|-----|
| tenure | security, | and | Council proc | esses ar | nd pi | roce | dures | |
| housing as key elements | | | | | | | | |
| of the upgrading process | | | | | | | | |

| PROGRAMME | DESCRIPTION | IMPLEMENTATION FRAMEWORK |
|---------------------------------------|--|--|
| Rural housing subsidy programme | The programme funding for the building of houses in areas of communal tenure where beneficiaries hold uncontested rights proved in the form of a Permission To Occupy certificate | Adding to the qualification criteria of the NHC, beneficiaries must be residents and in occupation of a stand on communal land |
| Community Residential Units | The programme provides funding for the building or remodeling of buildings for rental housing accommodation for families whose basic monthly household incomes falls below R3 500.00 | Beneficiaries registered on the demand database of the City SHI and meets the qualification criteria of the NHC |
| Institutional Subsidy Programme | Subsidies for constructions of multi ranged tenure rental accommodation for families whose basic monthly household income is between R1 500 and R3 500 | Beneficiaries registered on the demand database of the City SHI and meets the qualification criteria of the NHC |
| Social housing | Bridging finance to SHIs for medium/high density rental housing development in restructuring areas | Registered families who meets the qualification criteria of the NHC |

Human Settlements Projects & and delivery targets

The City's Five-Year human settlements delivery goal is to upscale delivery to reach a yearly delivery of at least 2 500 housing opportunities to a variety of income households. Already work has begun. The informal settlement of Disteneng, has over the past 3 years, progressed

into a formal Township of Polokwane Extension 78. Houses are now in construction to qualifying beneficiaries. Another incremental housing project is undertaken on an incremental basis at Polokwane Extension 133.

Table 6: Annual human settlements delivery targets

| Programme/Category | 2020/2021 | 2021/2022 | 2022/2023 |
|---------------------------|-----------|-----------|-----------|
| Top structure | 600 | 900 | 1 200 |
| Gap housing opportunities | 600 | 600 | 600 |
| Tenure upgrading | 300 | 350 | 400 |
| Serviced land release | 1 200 | 800 | 800 |
| Total | 2 700 | 2 850 | 3 000 |

Achieving these delivery targets will be a significant undertaking for the City. The renewed model of delivery will ensure the City coordinates across all agencies/stakeholders and use every tool at its disposal to maximise delivery. But crucial to this, is that the City will remain committed to being a leader in developing integrated sustainable human settlements and ensuring affordable housing stocks across the City.

Table 8: Progressing & proposed projects (2020/2021 – 2022/2023)

Policies and Plans

Breaking New Grounds; a Comprehensive Plan for the Development of Sustainable Human Settlement, 2004 (BNG) The human settlement strategies of the City will support and contribute towards meeting Government's BNG policy objectives. The City's plan seeks to create integrated and sustainable human settlements thereby improving the historic spatial planning trend to allow for mix land uses and development of sustainable human settlement on strategically located land. The identification and approval of PRZs to allow for the location of medium to high density housing developments in areas close to; economic opportunities, along transport corridors, and social amenities will contribute to the Government goal of spatial restructuring.

National Development Plan (NDP)

The cornerstone of the National Development Plan is to eliminate poverty and reduce inequality in the next two decades. The plan lays out comprehensive plans that call upon the energies of the society and the State towards driving change for the improvement of human living standards and growing the economy. The strategies of the City's five-year Human Settlement Plan have been formulated with understanding that:

Improving the spatial planning system is necessary for the development of integrated and sustainable human settlements; Streamlined spatial planning systems is the way to coordinated development and effective resource allocation; Improving the living conditions of people in informal settlements is the way for poverty alleviation;

Outcome 8

The City's human settlement strategies drew directives from National and Provincial strategic objectives and performance targets. This plan supports the achievement of Outcome 8: Sustainable human settlements and improved quality of household life. The comprehensive human settlement strategies and projects of the City are developed to meet the strategic outputs of Outcome 8 through:

Incremental upgrading of informal settlements; in well located land, to meet the housing needs of the 6 628 families; Speed up the provision of infrastructure for sustainable delivery of basic services that supports sustainable human settlements;

Limpopo Multi-Year Housing Development Plan (2019-2024)

The Five Year Human Settlement Plan of the City is guided and forms an integral part of the housing development planning of the Provincial Government objectives. The housing strategies of the City are developed in understanding of the strategic objectives of the Province as well as target of delivering 80 000 housing opportunities to a wide range of households including the gap market and driving infrastructure development.

The City's Planning Frameworks

There is a body of urban and regional laws and plans that provide direction for growth and the physical form of the City by allocating and promoting preferred utilisation of land. The City's Spatial Development Framework (2010) is the major spatial development plan that provides guidelines for growth and physical structure of the City thereby indicating areas best suited for

urban development, areas that should be protected, areas that should be prioritised (infrastructure investment), and areas experiencing development pressure. The strategic programmes and projects of this plan are informed and aligned with the spatial development goals of the City. Other development plans that this plan has considered includes the City Development Plan and Areas based Development Frameworks.

Implementing the Plan

The Human Settlement Plan has laid out the way for the coordination of cross cutting tasks essential for the City to deliver on its housing goals. The housing functions and capacity of the City are restricted. Achieving the set targets will require significant Capital commitment and much more effective use of resources. The City's approach to implementing the Plan is to capitalize on the assistance of Government, leverage private investment, civil society and the beneficiary communities themselves. The City and the SBU's strategic support Departments and Institutions include:

Funding the Plan

The goal of preserving affordability and delivering 10 000 housing opportunities over the next five years is a significant undertaking. A significant Capital is required for the City to deliver on human settlements. There two main sources of Capital funding for the City which includes Council Revenue Raised funds and Conditional Grants received from National Government. The primary source of Capital funding for human settlements development is the Human Settlement Development Grant (HSDG). The Municipal Infrastructure Grant (MIG) provides support for the City's infrastructure budgeting.

The Human Settlement Development Grant (HSDG)

The HSDG is contained in the DoRA as a Schedule 5 Conditional Grant payment to the Province for the creation of sustainable and integrated human settlements. The grant provides Capital funding for the implementation of housing programmes and projects. The grant provides funding for human settlement planning, engineering services, house construction, and tenure formalisation.

The Municipal Infrastructure Grant (MIG)

The MIG programme is a consolidation of old infrastructure funding programmes (water services project fund, urban transport fund, local economic development fund, national electrification programme, and others) into one comprehensive funding programme for basic municipal service delivery. It provides support to the City's capital budgeting programme for the provision of basic services. The City's Human Settlement funding plan comprise of Capital budgets of other City and Government Department that impact of the overall objective of creating sustainable and integrated human settlements.

This Human Settlement Plan provides the basis for coordinating cross cutting tasks essential for the City to deliver on its housing goals. The overall objective of the City is to ensure progressive access to adequate housing opportunities by all communities and citizens of the

City. As in this HSP, a range of projects are will be undertaken to ensure and support the creation of integrated sustainable human settlements where families shall live in durable and secure accommodation. At minimal, the goal of the City is to upscale delivery to reach a yearly delivery of at least 2 500 housing opportunities to a variety of income households.

| | 3. Sanitation (VIP toilets). | |
| | Other Needs | |
| | Tarring of road D1809, High mast lights and Waste removal across all villages. | |

ANNEXURE: C

3. ANNEXURE C: Public Participation Report

1.Legislative Mandate

Section 16 of Municipal Systems Act (32 of 2000) mandate municipalities to develop a culture of municipal governance that complements formal representative government with a system of participatory governance, and must for this purpose encourage, and create conditions for, the local community to participate in the affairs of the municipality, including in:

- The preparation, implementation and review of its Integrated Development Plan (IDP).
- The establishment, implementation and review of its Performance Management System(PMS);
- Monitoring and review of its performance, including the outcomes and impact of such performance;
- The preparation of its budget;
- Strategic decision relating to the provision of municipal services.

Section 152 of the Constitution (108 of 1996) provides objectives of local government. One of the objectives is to encourage the involvement of communities and community organizations in the matters of local government.

2 Public Participation process followed by Polokwane Municipality that is COVID-19 regulations compliant

In line with the above-mentioned legislative mandate, Polokwane Municipality undertook the IDP/Budget Public Participation process from the (**23 May 2020 - 26 May 2020).** Community Consultation Process on the 2020/21 Draft IDP and Budget was conducted using Media Platforms.

Guided by COGTA gazette that guide municipalities on matters of Municipal Operations and Governance, that stipulate that municipalities must ensure that the communities are consulted using media platforms and alternative methods of consultation, instead of contact meetings, to provide comments on the draft IDP and Budget. Community members were invited to submit their comments through email or WhatsApp line (email: <u>IDPBudgetComments@polokwane.gov.za</u> or WhatsApp line: **065 922 4017.** All Input and comments received from community consultation sessions were taken into consideration.

Public Participation Process followed

New Public Participation process was followed by Polokwane Municipality in compliance with the Gazette that discourage contact meetings. after the adoption of draft IDP and budget by Council on Friday 22 May 2020., the following were done i.e.

2.1 Public Notice Advert Released immediately after Council Meeting

A Public Notice / Newspaper advert was released immediately after virtual council meeting informing the public about the adoption of the draft IDP/Budget by Council and also specifying where communities can access the documents. The public notice was clearly specifying the period or dates for comments. The municipal website, Facebook, Twitter was used to publish the Public Notice.

The public notice also indicated the email address and WhatsApp for submitting comments to the municipality. A targeted approach was also used in solicit comments from stakeholders, as such, the public notice was circulated to Municipal Stakeholders via emails. Other registered municipal IDP Rep Forum Stakeholders, Coghsta, CDM and National Treasury were all provided with the public notice and requested to provide comments. Furthermore, the adopted 2020/21 draft IDP and Budget were emailed to the said Stakeholders.

The 2nd public notice was indicating the schedule for the radio slots secured for the Executive Mayor to present the Draft Budget at different radio stations. This notice was also circulated on the municipal website, Municipal Facebook and Twitter. The main purpose was to make the public aware of the date and time that they can listen to the Executive Mayor presenting the Budget in various Radio stations.

2.2 Executive Mayor's presentations in the Radio Stations

The Executive Mayor conducted Budgets Presentations for various Clusters in the community radio stations and the public was given an opportunity to call in and ask questions regarding the presented budget and other Service Delivery matters. The Executive Mayor visited the following Radio Stations to present the 2020/21 Draft IDP and Budget i.e.

| Radio Station | Date | Time |
|---------------|------------|-------|
| Moletji FM | 22/05/2020 | 18h00 |
| Turf FM | 22/05/2020 | 18h00 |
| Tshepo FM | 24/05/2020 | 17h00 |
| Thobela FM | 25/05/2020 | 12h00 |
| Energy FM | 26/05/2020 | 07h30 |
| Capricorn FM | 26/05/2020 | 18h30 |

The Executive Mayor presented the Budget highlights and Basic Services projects as contained in the 2020/21 draft IDP/Budget and proposed tariffs increases. After the questions were raised, the Executive Mayor answered and also provided clarity on the service delivery questions.

2.3 Municipal Website

After the adoption by Council, the Draft IDP/Budget documents and municipal policies were uploaded on the municipal website, hard copies were delivered to the Moshate and municipal cluster offices for the public to access the documents. All draft Budget policies were also placed on the municipal website.

IDP Presentations for various Clusters were simplified and divided into, seven (7) Clusters. The Draft Budget Presentations were also uploaded on the Municipal website.

2.4 Municipal Facebook and Twitter

Municipal Facebook and Twitter accounts were used to inform the public about the adoption of the draft IDP/Budget. The Twitter and Facebook accounts were also used to show videos of the Executive Mayor's presentations that were done in various Radio Stations. The videos are now on YouTube and will also serve as Portfolio of Evidence during audit period.

2.5 Email and WhatsApp line to receive Public Comments was Created

A specific email address and **WhatsApp line** was used as follows: <u>IDPBudgetComments@polokwane.gov.za</u>. and WhatsApp line: **065 922 4017**. Manager IDP, Manager Budget and Manager Revenue were all having access to this email containing submitted comments. All comments and input received were taken into consideration.

THE END
