

CITY OF
Polokwane
NATURALLY PROGRESSIVE

2023/24

INTEGRATED DEVELOPMENT PLAN

Table of content

(i)List of Acronyms	31
(ii) Foreword of the Executive Mayor	37
(iii) Foreword of the Municipal Manager.....	39
(iv) Vision, Mission & Values	42
(v)Meaning of each value.....	43
(vi) Meaning of colour of Stars.....	44
(vii) 15 Meter Bronze Sculture	44
(viii) Vision 2030 –Smart City	45
(ix) Reaga Polokwane Programme.....	47
Chapter One: The Planning Framework.....	49
1.1 Introduction	49
1.2 Legislative Background and Policy Imperatives	49
1.2.1 The Objects of Local Government as set out in Section 152 of the Constitution	49
1.2.2 National Spatial Development Perspective (NSDP)	50
1.2.3 MTSF	51
1.2.4 Government Programme of Action	51
1.2.5 The New Growth Path.....	51
1.2.6 National Development Plan (NDP).....	52
1.2.7 Outcome 9.....	52
1.2.8 Limpopo Development Plan (LDP)	52
1.3 Process Plan	52
1.3.1 Structures that manage/drive the IDP and Budget process	52
1.3.2 Functions and context of public participation	60
1.3.3 Mechanism and Procedures for Public Participation Process	60
1.3.4 Procedures for participation	60
1.3.5 Activity Flow.....	61
1.4 Time Schedule for Municipal Planning Process	62
1.4.1 IDP Review Time Schedule.....	62
1.4.2 Performance Management Time Schedule	69
1.4.3 Audit & Performance Audit Committee Time Schedule	80
1.4.4 Budget and Reporting Time Schedule.....	82
1.4.5 Risk Management Committee Time Schedule.....	84

1.4.6 Executive Committee Meetings Timeframes (EXCO).....	86
1.4.7 Extended Executive Committee Meetings Timeframes (Extended EXCO)	86
1.4.8 Speaker’s Office - Magoshi Forum Time Schedule	87
1.4.9 Monitoring of the Process.....	87
CHAPTER Two: Spatial Planning and Land Use Analysis	89
2. SPATIAL RATIONALE.....	89
2.1 Strategic Location of Polokwane City	89
2.1.1 Map of Limpopo Province (Polokwane Strategic Location).....	89
2.1.2 City of Polokwane Entrance	90
2.1.3 The main 7 Clusters of settlements in Polokwane.....	91
2.2 REGIONAL CONTEXT.....	93
2.3 HIERARCHY OF SETTLEMENT	94
2.3.1 National and International legislative guides and programme	96
2.4 SPATIAL PLANNING AND LAND USE MANAGEMENT TOOLS/LUMS	96
2.4.1 Town planning and Township Ordinance, Ordinance 15 of 1986 (to be repealed).....	96
2.4.2 Proclamation R293 of 1962 (Black Administration Act 38 of 1927)	97
2.4.3. Proclamation R188 of 1969 (Black Administration Act 38 of 1927)	97
2.4.4 Local Government Municipal Systems Act, Act 32 of 2000.	98
2.4.5 Spatial Planning and Land Use Management Act, Act 16 of 2013.....	98
2.5. THE PURPOSE OF THE SPATIAL PLANNING AND LAND USE MANAGEMENT ACT (SPLUMA) ..	101
2.5.1 SPLUMA implementation Progress.....	101
2.6 Land Use Management Scheme (LUMS).....	101
2.7. MUNICIPAL PLANNING BY-LAW 2017	102
2.8. POLOKWANE URBAN RENEWAL STRATEGY (URS) AND CBD DEVELOPMENT PLAN, 2016.....	103
2.9. GROWTH POINT ANALYSIS.....	104
2.10. MUNICIPAL LAND ANALYSES.....	105
2.11. LAND CLAIMS ANALYSIS.....	106
2.12. LAND AVAILABILITY ANALYSIS.....	106
2.13. LAND INVASIONS COURT ORDERS	108
2.14. SPATIAL CHALLENGES AND INTERVENTIONS.....	109
2.14.1 General challenges and Intervention.....	111
2.15. SPATIAL INTERPRETATION OF THE POLOKWANE MUNICIPALITY.....	113
2.15.1 Key guiding policies and municipal By-laws.....	113
2.15.2 Economic opportunities and growth	113

2.16. RURAL DEVELOPMENT	114
2.17. URBAN DEVELOPMENT	115
2.17.1 Integrated Urban Development Framework Plan.....	115
2.18 ECONOMIC SPIN-OFF DEVELOPMENTS.....	116
2.18.1 Baobab Gardens Motor City	116
2.18.2 Eskom Regional Offices	118
2.18.3 Polokwane International Convention Centre (PICC).....	120
2.18.4 Urban Renewal projects.....	121
2.18.5 City wide Development initiatives	124
2.18.6 Commercialisation of Municipal Facilities/Properties	126
2.18.7 Metropolitan Municipal Requirements	126
2.18.8. ROAD MAP TO METRO.....	128
2.19. IDENTIFICATION OF LAND FOR STUDENT ACCOMMODATION.....	128
2.20 LEGISLATIVE AND POLICY CONTEXT.....	129
2.21 Catalytic Land Development Programme in support of the CEF.	130
2.21.1 Science Park	131
2.21.2 Arts and Cultural Hub.....	131
2.21.3 Industrial Park or SEZ N1 North Corridor	131
2.21.4 Agro processing.....	132
2.21.5 TOD precinct	132
2.21.6 Softball stadium	132
2.21.7 Post incubation Hub.....	132
2.21.8 Academic Hospital.....	133
2.21.9 Eco-Estate at Game reserve	133
2.22 Progress on priority/ Catalytic Land Development Programme.....	133
2.23 Progress with the implementation of Circular 88.....	135
2.24 Intergovernmental Planning	136
2.24.1 Intergovernmental Projects in progress	136
2.24.2 Pilot Projects for Inter-Governmental Planning.....	137
2.25 IUDF Implementation to Date.....	138
2.25.1 CEF Modules Progress Status Quo.	138
2.25.2 Capital Expenditure Frameworks (CEF) Status Quo	138
2.26 IUDG Process Roadmap followed.	139
2.26.1 CEF Success and Challenges	140

2.26.2 Impact of the adjustments budget on CEF priority projects.....	140
2.26.3 IUDF Levers	140
2.26.4 District Development Model (DDM) Progress	140
2.27 Challenges experienced in endeavor to seek integration and collaboration.	140
2.28 Approved Land for New Leases	141
2.29 Sales of sites –City Planning and Properties.....	141
2.30 Progress Report on Aganang Township Land	141
2.31 CORPORATE GEO-INFORMATICS	142
2.31.1. INTEGRATED GIS SYSTEM.....	143
2.31.2 Modules that form part of the integrated GIS System	144
2.31.3 Challenges and Intervention of GIS.....	144
2.31.4 Successes of Corporate Geo-Informatics SBU	145
2.31.5 Role of GIS in the City of Polokwane.....	146
2.32 Economic Development and Tourism.....	147
2.32.1 Introduction	147
2.32.2 Local Economic Development (LED) strategy	147
2.32.3 Highlights of the Local Economic Development Strategy:.....	148
2.32.4 Local Skills Base on LED.....	148
2.33 Status Quo of Programs and Projects of Economic Development	150
2.33.1 Investment Promotion and Tourism.....	150
2.33.2 Types of Tourism industries found in Polokwane.....	151
2.34 Strategies used to promote Polokwane Municipality.....	151
2.34.1 Polokwane Visitor Information Centre (VIC).....	152
2.34.2 Stakeholder relations	152
2.34.3 Tourism Development	153
2.35 Marketing.....	153
2.36 ENTERPRISE DEVELOPMENT	153
2.36.1 Itsoseng Entrepreneurial Centre.....	154
2.36.2 INCUBATION PROGRAMME AND ITS BENEFITS	154
2.36.3 BUSINESS SUPPORT CENTRES	155
2.36.4 Business Compliance and Regulation	156
2.36.5 Economic Research and Development:	158
CHAPTER Three: Housing and Human Settlements Analysis	159
3.1 HUMAN SETTLEMENT STATUS QUO ANALYSIS.....	159

3.2 NEW DIRECTORATE: HUMAN SETTLEMENT.....	159
3.2.1. Housing Challenges	159
3.3 HUMAN SETTLEMENT STRATEGIC OVERVIEW.....	160
3.3.1 HUMAN SETTLEMENT PLAN.....	160
3.3.2 DEMAND VS SUPPLY	160
3.3.3 Priority Human Settlement Developments and Housing Development Areas (PHSHDA) .	161
3.4 legislative and policy frameworks.....	162
3.5 Challenges confronting sustainable human settlement.	163
3.6 Housing Backlogs	163
3.7 Status of rental housing	164
3.8 Urban Housing Developments	165
3.9 Land availability and acquisition strategies	166
3.10 Informal Settlements Profile.....	167
3.10.1 Summary of informal settlements within the jurisdiction of the municipality.	167
3.10.2 Juju Valley	168
3.10.3 Mamahule Settlement	168
3.10.4 Polokwane Extension 78	169
3.10.5 Response plan and project Prioritisation.....	170
3.10.6 Progress with the implementation of informal settlement upgrading.....	172
3.10.7 Good Story to tell for Council (EXT 78 Houses under Ward 08)	172
3.10.8 Top 3 Priorities for the City of Polokwane in engaging informal settlements.	174
3.11 Social/Rental Housing	174
3.12 Tenure Upgrading	175
3.13 Housing Accreditation.....	175
3.14 Priority Housing Development Areas (PHDA's)	176
3.14.1 Purpose and objectives of Priority Housing Development Areas.....	176
3.15 Building Inspection.....	178
3.15.1 Building Inspection Key challenges	178
3.15.2 Building Inspection Required intervention	178
3.15.3 Legislation and Policy Perspective for Building Inspection.....	178
3.15.4 Services Rendered by building Inspections sub-unit	179
3.16 Housing Allocation Status Quo from 2016-2021 Status Quo.....	179
3.16.1 2016/17 Financial Year allocation, Completed and Outstanding	179
3.16.2 Rectification of 2016/17 Financial Year	180

3.16.3 Additional allocation during 2016/17 financial year.....	180
3.16.4 2017/18 allocation, Completed and Outstanding	180
3.16.5 Challenges Experienced During 2017/18 Housing Backlog and Allocations.....	180
3.16.6 2018/19 allocation, Completed and Outstanding (Urban Allocation)	181
3.16.7 2020/21 allocation, Completed and Outstanding (COGHSTA)	182
3.16.8 2020/21 (HDA) Replacement of Vharanani Projects for 2017/2018 Housing Backlog....	182
3.16.9 Summary of Allocation, completed and Outstanding.....	182
3.16.10 Challenges of projects started but not completed.	183
3.17 Overall Housing Challenges.....	184
3.18 Military Veteran Housing Projects	184
3.19 City of Polokwane housing success over 25 years	184
3.20 Proposal for the walk-up RDP at extension Pietersburg 40.....	185
3.21 Relocation plan for 126 and 127	186
3.22 TITLE DEED REGISTRATIONS STATUS QUO	186
3.22.1 TITLE DEEDS RESTORATION	186
3.22.2 TITLE DEEDS RESTORATION LEGISLATION	186
3.22.3 Title Deed Status Quo for (Seshego; Westernburg; Ladanna; Mankweng and Sebayeng).....	187
3.23 Low-cost housing (RDP) Summary	191
3.24 Extended Enhanced Discount Benefit System (EEDBS)	191
3.25 Challenges and Intervention for Human Settlement.....	192
3.26 List of Building Plans Received (2016 to date)	193
3.27 List of Building Plans Approved (2016 to date).....	193
3.28 EXT 133 Allocation of Stands Status Quo.....	194
3.28.1 Scenarios suggested to address the Gap Markets Beneficiaries	195
3.28.2 Summary of sequence of event in respect of relocation of Ext 133 Beneficiaries	196
3.28.3 Challenges and intervention caused by delays in selling of site at Ext 133	197
3.28.4 State of Engineering Services within Ext 133.....	197
3.28.5 Building Plans Submission.....	198
3.28.6 Encroachment that affect the development controls (coverage, FAR, Height, and building lines	198
3.28.7 Encroachment that effect the adjacent properties.	198
3.29 Construction of RDP Houses to Ext. 133 – Top Structures	198
3.30 FLISP Programme	198

3.30.1 About FLISP program	198
3.30.2 How to apply for a FLISP Grant	199
3.30.3 Recommendation to be submitted to Council to deal with the Disposal of land.....	199
3.31 Polokwane Housing Association – PHA.....	200
3.31.1 Garena Phase 1 Rental Village in Ladanna	201
3.31.2 Seshego CRU	201
3.32 New Project under Development	202
3.32.1 Ga-Rena Phase 2	202
3.32.2 Ga-Rena Phase 2 Completed at Ladanna.....	203
3.33 PHA Projects and Year of Implementation	205
3.34 Designs of upcoming PHA key Projects.....	206
3.34.1 Phase 1-4 Student Accommodation Designs	206
3.34.2 Polokwane Ext 76 Social Housing Designs	207
3.35 Land parcels earmarked for Development of New Projects.....	207
3.36 Proposed Development Options.....	208
3.37 PHA Key Success over the past 5 years.....	209
CHAPTER Four – Economic Analysis	210
4. INTRODUCTION	210
4.1. DEMOGRAPHY.....	210
4.1.1 Total Population.....	211
4.1.2 Population by population group, Gender and Age.....	213
4.1.3 Number of Households by Population Group.....	215
4.1.4 HIV+ and AIDS estimates.....	217
4.2 Gross Domestic Product by Region (GDP-R).....	220
4.3 Gross Value Added by Region (GVA-R)	224
4.4 Tress Index	234
4.5 Location Quotient	234
4.6. Labour	236
4.6.1 Economically Active Population (EAP)	236
4.6.2 Labour Force participation rate	238
4.6.3 Total Employment.....	240
4.6.4 Formal and Informal employment.....	243
4.6.5 Unemployment	244
4.7 Income and Expenditure	248

4.7.1 Number of Households by Income category	248
4.7.2 Annual total Personal Income.....	250
4.7.3 Annual per Capita Income.....	251
4.7.4 Index of Buying Power	253
4.8 Indicators of Development	255
4.8.1 Human Development Index (HDI).....	255
4.8.2 Gini Coefficient.....	256
4.8.3 Poverty	258
4.8.4 Poverty Gap Rate	261
4.8.5 Education	262
4.8.6 Functional literacy.....	265
4.8.7 Population Density.....	267
4.9 Crime Rate.....	269
4.9.1 IHS Composite Crime Index.....	269
4.9.2 Overall crime index	270
4.10 Tourism	271
4.10.1 Trips by purpose of trips	272
4.10.2 Origin of Tourists.....	273
4.10.3 Bed nights by origin of tourist.....	275
4.10.4 Tourism spending.....	277
4.10.5 Tourism Spend Per Resident Capita.....	277
4.10.6 Tourism Spend as a Share of GDP.....	278
4.11 International Trade	279
4.11.1 Relative Importance of international Trade	279
CHAPTER Five: Water and Sanitation Analysis	282
5.1 Water and Sanitation Directorate Overview.....	282
5.1.1 Water Provision.....	282
5.1.2 Reliability of Water Supply in Polokwane	282
5.1.3 Water Provision – Short Term Interventions	282
5.1.4 Progress of Groundwater Developments projects	283
5.1.5 Water Provision – Long Term Interventions	283
5.2 Powers and Function of Polokwane Municipality.....	284
5.3. WATER.....	284
5.3.1 Principles of Water Service Provision	284

5.3.2 16 Regional Water Schemes (RWS).....	285
5.3.3 Water Scheme Sources	285
5.3.4 Lepelle Northern Water supplied Schemes.....	287
5.3.5 Polokwane Water Supply	287
5.3.6. Polokwane Groundwater Development	288
5.3.7 Setbacks in planning and implementation (Technical report approval)	288
5.3.8. Impact of reduction in RBIG funding (Water Projects)	289
5.3.9 Free Basic Water.....	290
5.3.10 Water Quality	291
5.3.11 Surface water quality test results.....	291
5.3.12. Challenges faced by the Municipality in providing water.	293
5.3.13. Water Supply to schools	294
5.4. SANITATION	294
5.4.1 Sanitation Provision	294
5.4.2 VIP Sanitation Programs in Rural Areas	295
5.4.3 Green Drop Audit.	295
5.4.4 Sanitation Provision - (Medium- & Long-Term Solutions)	295
5.4.5. Free Basic Sanitation.....	296
5.4.6. Wastewater Treatment Plants.....	296
5.4.7. Impact of reduction in RBIG funding (Sanitation Projects)	297
5.4.8 Challenges faced by the Municipality in providing Sanitation.	297
5.4.9 Sanitation in Schools	298
5.4.10 Rural Household Sanitation.....	298
5.5. BACKLOG OF BASIC SERVICES	299
5.5.1 Regional Water Scheme (RWS) –Demand and Shortfall	299
5.6. SMART METERING	300
5.7. AC Pipes Replacement	303
5.7.1 Challenges -AC Pipes Replacement.....	303
5.7.2 Phase 2 – AC Pipes Replacement	303
5.7.3 Remaining extent of AC Pipes Replacement per cluster	303
5.8 Construction of Borehole Infrastructure for Sandriver North Wellfield.....	304
5.9 Water Losses	304
5.9.1 Causes of Water losses	305
5.9.2 Water losses Mitigation Strategy.....	305

5.9.3 Longer term plan to address Water losses.	306
5.9.4 Progress in addressing water Provision Backlogs	306
5.9.5 Planned water expenditure towards new infrastructure	307
5.10 Strategic issues facing municipal water business (Water resilience)	307
5.10.1 Water Resource Security.....	307
5.10.2 Polokwane City Water Supply.....	308
5.10.3 Quality of Polokwane Drinking water: (Compliance with SANS 241)	308
5.10.4 Network Management:.....	308
5.10.5 Waste Water Treatment	308
5.10.6 Water Resilience Summary Risk Assessment.....	309
5.10.7 HR for Water and Sanitation Directorate (Professional Engineers).....	309
5.11 Smart Meters	310
5.11.1 Smart Meters Support and Enquiries.....	310
5.11.2 Turnaround Time when attending Complains.....	310
5.12 WATER TANKERS.....	311
5.13 Municipal Boreholes Status Quo.....	312
5.13.1 City of Polokwane Boreholes Status Quo Report	312
5.14 Pump Station Status Quo	312
5.15 CHALLENGES WATER SERVICES.....	313
5.16 Interventions to solve the Challenges.	314
5.16.1 WHY REGIONAL WASTE WATER TREATMENT PLANT	315
5.16.2 Impact of the reduction of RBIG funding.....	315
5.17 Polokwane Water Utility - Metro Vision	318
5.17.1 KEY WATER INFRASTRUCTURE.....	318
5.17.2 Recommendations for Polokwane Water Utility	319
CHAPTER Six: Energy Services Analysis	320
6.1. ENERGY SERVICES	320
6.1.1 Energy Master Plan	320
6.1.2 Free Basic Electricity	321
6.1.3 Free Basic Alternative Energy (solar light system).....	322
6.1.4 Solar Water Geysers.....	322
6.1.5 Challenges/Achievements by the Municipality to provide Energy.....	323
6.1.6 BACKLOG OF ENERGY SERVICES.....	324
6.1.7 Rural Areas Electrification.....	324

6.1.8 Polokwane/Seshego Urban Complex Technical Assessment.....	324
6.1.9 The Supply and Installation of Electrical network at EXT 78 - Phase 2	325
6.2 Electricity Losses	326
6.2.1 Causes of electricity losses.....	326
6.2.2 Longer Term plan to address Electricity losses (distribution and revenue)	326
6.2.3 Electricity Losses (Key Findings).....	327
6.2.4 Maintenance Plan for Electrical infrastructure.....	329
6.3 Ten-Year Township Development Plan (Energy Capacity Provision in Polokwane)	329
6.3.1 Approved Townships List that Require Electrification.....	330
6.3.2 Projects for Consideration (1 to 3 years and 3 to 5 years)	336
6.4 Electricity Master Plan	340
6.5 Future Township Developments.....	340
6.5.1 Energy Services Challenges	343
6.5.2 Financial Impact	343
6.5.3 Recommendations	343
6.6 The Electrification Acceleration Process.....	343
6.6.1 Rural Electrification Backlog	344
6.6.2 Challenges of Rural Electrification	344
6.7 Installation of High Mast Lights in rural areas	344
6.7.1 Challenges of High Mast lights.....	344
6.7.2 High Mast Lights Recommendations	345
6.7.3 Electrification Project in progress at EXT 78(July 2022).....	345
6.7.4 Construction of Bakone Substation	345
CHAPTER Seven: Environmental and Social Analysis	346
7.1. ENVIRONMENTAL ANALYSIS	346
7.1.1 Climate Description.....	346
7.1.2 Pollution Levels - Air Quality	346
7.1.3 Topography	347
7.1.4 Geology	347
7.1.5 Hydrology	347
7.1.6 Vegetation.....	348
7.1.7 Soils	348
7.1.8 Heritage Resources	348
7.1.9 Protection and Conservation of ecosystems (Biodiversity)	349

7.1.10 Euphorbia Clivicola.....	350
7.1.11 Euphorbia groenewaldii.....	350
7.1.12 Giant Bullfrog - Pyxicephalus adspersus.....	350
7.2. CLIMATE CHANGE AND GLOBAL WARMING.....	351
7.2.1 Climate Change Response Plans/Strategies.....	352
7.2.2 Environmental Challenges.....	353
7.2.3 Major Environmental Achievements.....	353
7.2.4 Provincial Intervention for Environmental Management – LEDET.....	354
7.2.5 Approved Capital Projects (2022/23).....	355
7.2.6 Polokwane Environmental Forum.....	355
7.2.7 Capricorn District Environmental Forum.....	355
7.2.8 Arbor Day Celebration.....	355
7.3 Maintenance of Open Spaces and Parks (48 x Municipal Parks).....	357
7.3.1 48 x Municipal Parks Status Quo.....	357
7.3.2 Grass Cutting Teams.....	362
7.3.3 Grass cutting teams on the Ground.....	363
7.3.4 AREAS for Grass Cutting Programme.....	363
7.3.5 Establishment of Animal Pound.....	365
7.3.6. An effective approach on animal pound (Revised approach).....	365
7.3.7. Options Available for Animal Pound Establishment.....	365
7.3.8 Availability of Alien Invasive Species Eradication Plan.....	366
7.4. National Arbor City Award Received.....	366
7.5. AIR QUALITY MANAGEMENT.....	367
7.5.1 Air Quality Management Plan developed and adopted/approved by Council.	367
7.5.2 Submission of AQO Annual Report & report on implementation of Air Quality Management Plan.....	368
7.5.3 Developed an Air Quality By-Laws.....	368
7.5.4 Air quality monitoring stations and monitoring of ambient air quality pollutants.....	368
7.5.5 Designation of Air Quality Management Officer.....	369
7.5.6 Conducting of industry inspection.....	372
7.5.7 Compliance, Monitoring and Enforcement by EMIs.....	372
7.5.8 Allocation and availability of Air Quality Management related work budget.....	373
7.6 ENVIRONMENTAL GOVERNANCE AND CROSS CUTTING ISSUES.....	373
7.6.1 Municipal Projects consider EIA.....	373

7.6.2 Municipal commenting on EIA as Affected and Interested Parties	373
7.6.3 Environmental Outlook.....	374
7.6.4 Environmental Management Framework (EMF)/ Strategic Environmental Assessment (SEA)	374
7.6.5 Environmental advocacy/ empowerment/ education and awareness	375
7.6.6 Availability of an organizational structure supporting environmental functions.....	375
7.6.7 Allocation and availability of budgets for staffing of environmental unit, environmental advocacy, EMF, SEA and EIA	375
7.7 WASTE MANAGEMENT	375
7.7.1 Waste Management Services Municipal Wide	375
7.7.2 Vision and Mission-Waste SBU	376
7.7.3 CORE FUNCTIONS OF WASTE SBU	376
7.7.4 Personnel (Waste SBU)	376
7.7.5 TYPES OF EQUIPMENTS REQUIRED.....	376
7.7.6 SERVICE LEVEL STANDARDS: OPERATIONS.....	377
7.7.7 weekly waste collection service.....	377
7.7.8 WASTE FACILITIES (Landfill sites and Transfer Stations).....	377
7.7.9 Rural Skips Distribution Summary.....	378
7.7.10 CURRENT WASTE PROJECTS: 2022/23	378
7.7.11 CONTRACTED SERVICES UNDER WASTE MANAGEMENT	378
7.7.12 IMPLEMENTATION OF BY-LAW	379
7.8 Challenges for cleanliness of the City	379
7.8.1 Designation of Waste Management Officer	379
7.8.2 South African Waste Information System (SAWIS) reporting.....	380
7.9. Designation of Waste Management Officer	380
7.9.1 Integrated Waste Management Plan (IWMP)	382
7.9.2 Recycling and Recovery of Waste	383
7.9.3 Refuse Removal Trends.....	383
7.9.4 Licensed Landfill Sites	384
7.9.5 Waste Management Challenges	384
7.9.6 Waste Management Status Quo.....	386
7.9.7 Waste Collection in Rural Areas.....	387
7.10 Waste Management Services Status Quo.....	387
7.10.1 Status Quo on Rendered Services	387

(ii) Foreword of the Executive Mayor

We are taking leaf from the words of President Ramaphosa during the 2023 SONA, that the people of South Africa want action, they want solutions, and they want government to work for them. We must be focused on actions that will make a meaningful difference now, that will enable real progress and that will lay a foundation for a sustained recovery into the future. This is what the people of Polokwane deserves – our commitment to make a difference now.

This commitment is in line with the mandate that the people of Polokwane gave to the ANC to provide sustainable basic services; develop infrastructure; achieve local economic recovery; fight poverty; improve our spatial development from that of apartheid; and enhance financial viability. We are implementing turnaround strategies in various strategic areas of the municipality in order to steer the municipality towards being self-sufficient and financially resilient.

We approach this IDP with clear understanding from our previous consultations with communities and various stakeholders that Council still needs to do more to ensure proper financial management and good governance, build better roads, deliver clean and reliable water supply, provide proper sanitation and housing, create opportunities for jobs and grow the city's economy. These input from communities remain our priorities until the end of this term of council.

Polokwane has after many years registered an improved audit outcome. This achievement is backed by clear steps and guiding principles that management has to adhere to. We are confident that these strategies will steer the municipality to recover from the current dire financial strains. We remain committed to improve our audit outcomes.

Our commitment to pioneer local economic activities that are geared to drive Polokwane to attain the Metropolitan status and positively develop the lives of our communities, particularly the youth, remains unchallenged. As we endeavour on a Metro Path, we must continuously remind one another that Polokwane remains the only hope of attaining the vision of having a metropolitan City in Limpopo. This vision is supported by our road to new economic growth

path as we strive to ensure that our communities and our youth are moved out of the poverty line and are participating in the inclusive economy of Polokwane. This IDP period will see a number of developmental projects designed to stimulate economic activities within the City and unlocking many job opportunities where our youth will be major beneficiaries of this developments.

A lot has been done to deal with the water issues and we will continue to work together with Lepelle Northern Water, the Department of Water and Sanitation and the National government to ensure sustainable supply of water in all areas. No economy can flourish without reliable supply of water and the municipality has in place plans to ensure reliable supply of water.

Transport and storm water remain the backbone of our economy. We will continue with ensuring proper roads and a reliable public transport service that will contribute to sustainable economic activities. Our storm-water drainage systems are getting attention in the wake of harsh weather conditions that we are recently experiencing.

We will continue to redefine participatory democracy through a massive stakeholder mobilisation and consultation to deal with rapid response service delivery on site. Polokwane has now become a mass-based municipality that is on the ground working with people.

Our plans and strategies to build a City of opportunities are in motion. Reaga Polokwane

Cllr Mosema John Mpe
Executive Mayor
Polokwane Municipality

(iii) Foreword of the Municipal Manager

The Local Government has delivered to the City of Polokwane the 05th Council administration. The resilient and patriarchy of South African citizens, and specifically residents of Polokwane Municipality has given the fresh mandate to the leadership of their choice, and we will forge ahead to provide basic services according to the needs of our people.

It gives me a great pleasure to present the Integrated Development Plan (IDP) after successful establishment of Polokwane Municipality Council.

The new normal has greatly affected and changed the plans of Municipalities in a major way, a great concern was the projected reduction in revenue collection by the municipalities owing to job losses, businesses facing enormous economic challenges, reduced household incomes and all this impacted on municipalities ability to meet other obligations. Polokwane Municipality like any other municipality had to drastically change plans.

This year we will be consulting and engaging various stakeholders face to face, and we hope this opportunity will assist the Municipality in getting first hand inputs and suggestion on how best we can deliver services to our residents.

The Constitution of the Republic of South Africa (1996) Chapter 7, section 152 (1) set out the objects of Local Government as follows;

- (a) To provide democratic and accountable government for local communities;
- (b) To ensure the provision of services to communities in a sustainable manner;
- (c) To promote social and economic development;
- (d) To promote a safe and healthy environment, and
- (e) To encourage the involvement of communities and community organizations in matters of local government.

To achieve the above local government objects, the local sphere of government or municipalities use the Integrated Development Plan (IDP) as the principal strategic planning instrument which guides and informs all planning, budgeting, management and decision – making processes in a municipality.

In terms of Municipal System Act, 32 of 2000, Section 28 (1), each municipal Council must adopt a process set out in writing to guide the planning, drafting, adoption and review of its Integrated Development Plan. Polokwane Municipality like any other municipality develops an IDP / Budget /PMS process plan on an annual basis.

The IDP/Budget/PMS process plan outlines activities and processes that will unfold culminating with the final approval and adoption of the IDP by Council. In simple terms it means it explains in detail what has to happen, when, by whom, with whom, and where. The process plan is also integrated within the municipality's corporate calendar. The process plan is always aligned to the corporate calendar, and the following key schedule areas, Risk, Audit, PMS, Budget and the District Process Plan. The main purpose for the alignment for Polokwane Municipality was to achieve the Smart Governance as specified on our Smart City Pillars. Polokwane Municipality prides itself for adhering to the set schedule of activities as reflected in the process plan.

To ensure that we develop an Integrated Development Plan (IDP) document that is people focused. We have followed legislations that requires municipalities to establish appropriate mechanism, processes and procedures and organs of state, including traditional authorities and other role players to be identified and consulted on the drafting of the Integrated Development Plan. For the purpose of achieving this legislative prescript, Polokwane Municipality has established the IDP/Budget/PMS technical and steering committee. Every financial year, Polokwane Municipality appoints Directors and Managers, and this committee is chaired by the Municipal Manager. The IDP/Budget/PMS technical Committee serve as the working committee for the development or review of the IDP, Budget and Institutional performance.

The Members of the Mayoral Committee (MMC's) are also appointed to serve in the Steering Committee which is chaired by the Executive Mayor. The Municipal Manager, Directors and selected Managers serve a supporting role whereas the Councillors play an oversight role in the development and review of the IDP, Budget and Performance of the Municipality. The political leadership is also charged with the responsibility to lead the public and stakeholder engagements in the development and review of the IDP, Budget and Performance. Polokwane Municipality has also established the IDP/Budget/PMS Representative Forum as a further mechanism/platform for further engagements mainly with organized formations and government departments.

The following are some of the stakeholders with which Polokwane Municipality engages with from time to time.

- Community
- Business Sector
- Government Departments
- Education Sector
- Non-Government Organizations
- Labour Unions
- Organized Groups
- Traditional Authorities
- Finance Institutions
- Mines
- Civic Organizations

Council has approved additional funds to complete the Seshego Groundwater Resources. The Seshego Water Treatment Works is earmarked to be completed in **May 2023** to deliver additional 10 Megaliters per day of additional water to the area of Seshego and Bloodriver.

The Municipality has submitted all planning documents to get between 8 – 10 MI of water in Sebayeng Dikgale area (Diep River Wellfield) and the refurbishment & upgrading of the Dap Naude pipeline, the additional water will be able augment water supply in Mankweng and Polokwane City.

We are taken aback by the increasing incidents of vandalism and cable theft throughout the Municipality, this makes it difficult for the proper maintenance of our electricity infrastructure, we call upon our communities to report incidents of crime to the law enforcement agencies.

Amidst the challenges faced by the city, we are still committed to put more effort in improving the lives of our people, it is business unusual but the implementation of the IDP will remain a priority.

Ms Thuso Nemugumoni
Municipal Manager
Polokwane Municipality

(iv) Vision, Mission & Values

The Municipality undertook an interactive process as part of ensuring that the current Vision, Mission and Values for the City of Polokwane are reviewed and refined in line with the Key Themes of becoming as Smart City.

The **Vision, Mission and Values** for the City of Polokwane are as follows:

(v)Meaning of each value

Transparency

- Being open and honest
- Being accountable to our stakeholders
- Providing truthful and accurate information

Respectfulness

- Being courteous and polite

Integrity

- Being fair, righteous and consistent
- Doing the RIGHT things in a reliable way

Responsiveness

- Reacting quickly and positively to the needs of the community

Loyalty (to the Municipality and the Community)

- Being faithful to our Municipality
- Adherence to legislation and policies

Professionalism

- Displaying excellence and competence

Approachable

- Being available, friendly and caring

Adaptable

- Willing to change with circumstances
- Respectful to others' view and belief systems

(vi) Meaning of colour of Stars

RED (Dynamic)

Red implies the energetic and dynamic mindset of both Polokwane people and the city towards Mutual goal achievement.

Black (stability)

Black implies confidence, stability and structure that the city rests and relies upon.

Green (Growth)

Green signifies the commitment the city displays towards its environment and preserving such also, the natural magnificence it has to offer.

The star

The star represents Polokwane as a city of realizing dreams under its perfect and pure, uninhibited clear African sky rarely found in other capital cities. Its people are focused, clear minded, fresh and innovative. All as one are reaching for the stars and looking ahead and all are looking to build their futures and those of their city.

(vii) 15 Meter Bronze Sculpture

Meaning of words on the sculpture erected at the Nelson Mandela Traffic Circle at N1 entrance:

- ❖ **Progress** Polokwane is a Municipality which is developing and growing.
- ❖ **Unity** The community and the municipality are united.
- ❖ **Equity** There is balance and people's rights are respected.
- ❖ **Prosperity** We are prospering as a province and also as a municipality.

Sculpture erected at the Nelson Mandela Traffic Circle at N1 entrance.

(viii) Vision 2030 –Smart City

The City of Polokwane has developed its long-term strategy for the next term and beyond through VISION 2030. This strategy is pegged against a long-term growth path to transform the municipality into a bustling and sustainable entity that distinguishes the Municipality as a City of stars leading in innovation through the **SMART CITY** concept.

Embedded in this strategic positioning is the need to continue on the foundation that best fits the municipal ability to deliver on its strategy and mandate. The process of planning towards 2030 has already been started from 2013/14 Financial year. Council has adopted Polokwane 20 Year Economic Growth and Development Plan (EGDP).

The main objective of the EGDP is to assist the City of Polokwane to achieve real and sustainable economic growth and development, as well as transforming and aligning the City to become a Smart City within the next 20 years. It is therefore vital that this plan set out very specific goals and implementable projects to attain the City's vision. **Smart City'** concept is a forward-looking plan into, **Economy, People, Governance, Mobility, Environment and Space.**

The plan has identified **4 Main clusters** that will guide the Municipality in realizing the vision:

1. **Economic Cluster**
2. **Physical Cluster**
3. **Social Cluster**
4. **Institutional Cluster**

The four clusters influence one another and failure to promote growth and development in one, would lead to failure in another. Integrative interventions would furthermore ensure that holistic planning takes place.

The EDGP has identified the **pillars** which should guide the Municipality to work towards achieving the realization of the Vision. All the planning within the Municipality should be guided by what the pillars want to achieve i.e.

- Smart Economy.
- Smart Environment.
- Smart Governance.
- Smart Living.
- Smart Mobility; and
- Smart People.

Figure: Below is a diagram representing the above-mentioned Pillars

Source: Polokwane EDGP

The description of each pillar is as follows:

“**Smart Economy**” refers to an economy that, through the use and integration of various Technological systems and devices, performs well in the market comparative to similar cities, is forward thinking by embracing new technologies and systems of operation and is sustainable in the long run by continually growing and adapting to the circumstances surrounding it.

“**Smart Environment**” refers to the effective and efficient use of the surroundings of the city, in both an Urban and “green/environmental” context, such as the landscape and unique geological aspects of the city as well as operating the city in an environmentally friendly manner by using resources as efficiently as possible and providing green spaces and Control of air Pollution by industries.

“Smart Governance/Administration” refers to the relationship between government and the citizens of city, being interactive through technological systems implemented by government and private enterprises along with the innovative means of governments to communicating with the citizens through systems such as e-governance/e-democracy, keeping them informed and involved with processes, decisions and systems available to them.

“Smart Living” refers to the quality of life for city inhabitants through the provision of essential services along with additional systems that make the city more livable. This also affects a city’s desirability and creates an environment that is conducive to attracting the citizens and investment that the city needs in order to prosper.

“Smart Mobility” refers to technologically advanced systems integrated with existing or new transport systems in and around the city affecting the transport and logistics. These systems could typically keep citizens informed about transport related issues and in so doing keep the city system functioning as smooth as possible.

“Smart People” refers to a citizenship of a city being well educated, both academically and also to the systems and processes of the Smart City and how to make optimal use of them. The involvement of citizens in the city and the way in which it functions forms another key aspect of this element of the Smart City and can determine the level of success of the smart city.

(ix) Reaga Polokwane Programme

The City of Polokwane has launched an exciting programme called "Re aga Polokwane", that is geared towards ensuring that the City and its citizens are working together to build the city of Polokwane.

The "Re aga Polokwane" programme will see greater communication and cooperation between the City and its various constituencies, including households, businesses and other stakeholders, to ensure that everyone associated with the City is working towards a common vision; building a smart city by 2030.

Polokwane, being the Capital city of the Limpopo Province has over the years seen a steady migration from other parts of the province to the City. This has been driven mainly by people coming to seek employment and business opportunities. According to Stats SA, the population of Polokwane was approximately 62 000 in 2001, and rose to over 130 000 in the census conducted in 2011; the **population more than doubling** in a period of ten years. There has been further population growth in the years since the last census.

This rapid increase in the population size has come with a number of challenges for the Municipality, particularly the development of the infrastructure required to support this increase in population. Recently, the municipality was required to place a moratorium on new property developments in order to allow the Municipality to focus on developing certain infrastructure required to support the rate of property development.

The Projects

Currently, there are a number of major projects being embarked on in the City of Polokwane. The nature and magnitude of these projects are such that they will have a permanent impact on the City – impacting quality of life for the average resident; stimulating growth; enabling the Municipality to improve its efficiency in service delivery and revenue collection, amongst other benefits. Some of these projects include the replacement of 177km of AC (asbestos cement)

pipes in the municipality's jurisdiction; a project to replace conventional water and electricity meters with smart meters in a number of areas in the City; the introduction of a rapid bus service; a waste management project; as well as a major student accommodation drive to support the growing number of students in the city.

In order for these projects to be successful; there is a need for broad support from all key stakeholders. This includes the leadership within the municipality, the workers at all levels of the municipality, the business community, as well as residents in general. The rolling out of these projects generally comes with short term inconveniences and challenges to the residents, such as the disruption of traffic and resultant congestion, as well as temporary and unscheduled disruption of water and electricity. This can typically lead to disquiet amongst the residents, and subsequently resistance to the projects. The City therefore considers it a priority to **actively engage** and **'on board'** all these stakeholders.

By creating the "Re aga Polokwane" programme, the City seeks to ensure that this **communication is enhanced** and **given a context** that will make the inconveniences more tolerable for the residents.

Through the Reaga Polokwane Programme the City will have a platform through which to communicate with its citizens on all projects it is running and will be able to run various campaigns that encourage residents to be part of the efforts to build Polokwane. Furthermore, residents and businesses will better understand the various inconveniences they are suffering, and tolerate them better, knowing that there are long term gains for all associated with the city.

Reaga Polokwane also provides a **partnership platform** for the City and citizens to work together to ensure the long-term development of the city. Individuals and businesses will be encouraged to approach the City and through the Reaga Polokwane programme work with the City on initiatives and campaigns that have long term benefits for the City of Polokwane and its residents.

The "Re aga Polokwane" platform will be used to ensure the City's citizens have a better understanding of the various projects that the city is embarking on and why the city has embarked on these projects.

The "Re aga Polokwane" brand provides residents and businesses with a platform and opportunity to use their own initiative to come up with programmes that will benefit and improve the city in various ways.

Communication will be designed to speak to the multi-cultural composition of the City's residents. This is a brand for the Municipality, businesses, residents and visitors. We are creating a unified identity that will be easier and more cost effective to manage. By speaking with one voice, under one brand, we will present a united front with all our individual programmes contributing to the City of Polokwane's reputation for leadership, innovation and community service.

Chapter One: The Planning Framework

1.1 Introduction

Integrated Development Planning (IDP) is a **process** through which municipalities prepare a strategic development plan which extends over a five-year period. The Integrated Development Plan (IDP) is a **product** of the IDP process. The IDP is the principal strategic planning instrument which guides and informs all planning, budgeting, management and decision-making processes in a municipality.

Through Integrated development planning, which necessitates the involvement of all relevant Stakeholders, a municipality can:

- Identify its key development priorities.
- Formulate a clear vision, mission and values.
- Formulate appropriate strategies.
- Develop the appropriate organizational structure and systems to realize the vision and mission; and
- Align resources with the development priorities.

1.2 Legislative Background and Policy Imperatives

1.2.1 The Objects of Local Government as set out in Section 152 of the Constitution

The Constitution of the Republic of South Africa, 1996 stipulates that the local sphere of government consists of municipalities which were established for the whole of the territory of South Africa – the so-called wall-to-wall municipalities. **The objects of local government are set out in Section 152 of the Constitution.** Accordingly, the objects are –

- a) To provide democratic and accountable government for local communities.
- b) To ensure the provision of services to communities in a sustainable manner.
- c) To promote social and economic development.
- d) To promote a safe and healthy environment; and
- e) To encourage the involvement of communities and community organizations in the matters of local government.

The Constitution commits government to take reasonable measures, within its available resources, to ensure that all South Africans have access to adequate housing, health care, education, food, water and social security.

The development of the Integrated Development Plan (IDP) in municipalities is in different legislations that govern local government. The legislative framework that the IDP is vastly discussed includes the Municipal Systems Act of 2001 and the Municipal Structures Act of 1997. Another piece of legislation which has a tremendous impact on the IDP is the Municipal

Finance Management Act 56 of 2003 (MFMA) as it outlines the alignment of the budget and IDP.

Other legislation and policy documentation which contain reference to integrated development planning are:

- The Constitution of the Republic of South Africa 200 of 1993
- Tourism Act 72 of 1993
- Development Facilitation Act, Act 67 of 1995
- The Municipal Finance Management Act 56 of 2003
- Housing Act 107 of 1997
- White Paper on Local Government of 1998
- Local Government: Municipal Structures Act 117 of 1998
- National Land Transportation Transition Act 22 of 2000
- Disaster Management Act 52 of 2002

The following Environmental legislations have been taken into consideration:

- National Environmental Management Act, Act 107 of 1998(NEMA)
- Environmental Conservation Act, Act 73 of 1989
- National Environmental Management Act: Air Quality Act (Act 39 of 2004)
- Heritage Resources Act (Act 25 of 1995)
- Atmospheric Pollution Prevention Act, Act 45 of 1965(APPA)
- National Environmental Management: Biodiversity Act 10 of 2004(NEMBA)
- National Environmental Management: Protected Area Act, Act 57 of 2003(NEMPAA)
- NEMA: Waste Management Bill (Notice 1832 of 2007)
- NEMA: Environmental Impact Assessment Regulations (Notice R385 of 2006)
- Limpopo Environmental Management Act, (Act 7 of 2003)
- National Water Act, Act 36 of 1998
- Water Service Act, Act 108 OF 1997

1.2.2 National Spatial Development Perspective (NSDP)

The National Spatial Development Perspective (NSDP) (Presidency, 2006) is the primary spatial lens through which policymakers view socio-economic development in the country as a whole. It presents wide variety of socio-economic trends emerging in South Africa, and then draws inferences about how that emerging space economy should affect public investment (expenditure) in the immediate future.

❖ National Spatial Development Plan and Principles

Those interpretations and conclusions are, however, guided by a number of normative principles that ultimately steer national infrastructure investment and development decisions. NSDP principles are that:

- Future settlement and economic development opportunities should be channelled into activity corridors and nodes that are adjacent to/linked to the main growth centres in the country. Infrastructure investment should primarily support localities that will become major growth nodes in South Africa.

1.2.3 MTSF

The Medium-Term Strategic Framework (MTSF) for the period 2009 to 2014 was approved by Cabinet on 1 July 2009. The MTSF, under the theme, 'Together doing more and better', is informed by the 2009 national electoral mandate and outlines the government's medium-term strategy to meet this mandate. It serves as the foremost frame of reference outlining the government's policy posture and Programme to improve the conditions of life of South Africans over the next five years. The MTSF identifies the development challenges facing South Africa and defines the priorities over the next five years.

The strategic priorities of government for the mandate period

- Ensuring more inclusive economic growth, decent work and sustainable livelihoods
- Economic and social infrastructure
- Rural development, food security and land reform
- Access to quality education
- Improved health care
- Fighting crime and corruption
-

1.2.4 Government Programme of Action

The Programme of Action (PoA) is an annual statement of government's priorities for the year. It aims to outline government's major plans for the year ahead. The PoA is informed by the MTSF, the deliberations of the January Cabinet lekgotla and the President's State of the Nation Address. Government has identified 10 priority areas, from now up to 2014. These are to:

- Speed up economic growth and transform the economy to create decent work and sustainable livelihoods.
- Introduce a massive Programme to build economic and social infrastructure.
- Develop and implement a comprehensive rural development strategy linked to land and agrarian reform and food security.

1.2.5 The New Growth Path

This National Policy framework deals specifically with issues such as creating decent work, reducing inequality and defeating poverty through "a restructuring of the South African economy to improve its performance in terms of labor absorption as well as the composition and rate of growth". Of practical consequence to local government, are the specific job drivers that have been identified:

1. Substantial public investment in infrastructure both to create employment directly, in construction, operation and maintenance as well as the production of inputs, and indirectly by improving efficiency across the economy.
2. Targeting more labor absorbing activities across the main economic sectors – the agricultural and mining value chains, manufacturing and services.

1.2.6 National Development Plan (NDP)

The National Development Plan (**NDP**) aims to eliminate poverty and reduce inequality by 2030. South Africa can realize these goals by drawing on the energies of its people, growing an inclusive economy, building capabilities, enhancing the capacity of the state, and promoting leadership and partnerships throughout society. South Africa has made remarkable progress in the transition from apartheid to democracy.

1.2.7 Outcome 9

As part of government performance monitoring and evaluation system, the Medium-Term Strategic Framework and government Programme of Action and 12 National outcomes give effect to the policy direction adopted by cabinet. Each outcome has a limited number of measurable outputs with targets.

The 12 outcomes have delivery agreement which in most cases involve all spheres of government and a range of partners outside government. Outcome 9 commits municipalities to deliver services in a responsive, accountable, effective and efficient manner to enhance the livelihoods of communities in a sustainable manner.

1. Improved quality of basic education.
2. A long and healthy life for all South Africans.
3. All people in South Africa are and feel free.
4. Decent employment through inclusive economic growth.
5. A skilled and capable workforce to support an inclusive growth path.
6. An efficient, competitive and responsive economic infrastructure network.
7. Vibrant, equitable and sustainable rural communities with food security for all.
8. Sustainable human settlements and improved quality of household life
9. **A responsive, accountable, effective and efficient local government system**

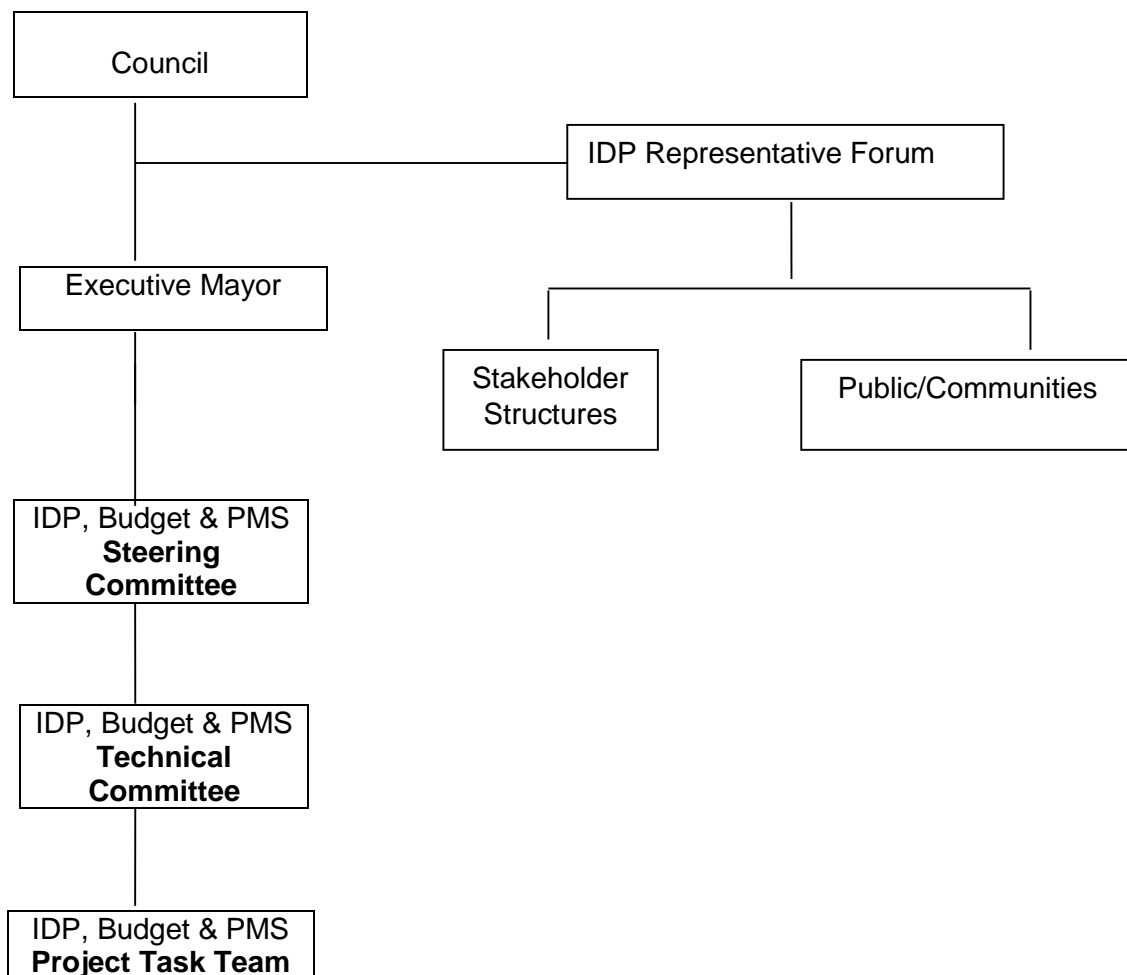

1.2.8 Limpopo Development Plan (LDP)

- The **LDP strives for economic development and transformation** to enable the province to address triple challenges: poverty, inequality and unemployment.
- The main economic agenda of the LDP is to intensify job-creation and enhance the skills base of the province towards supporting socio-economic growth and development in the province.
- The province aims to **diversify** the economy through placing emphasis in manufacturing thus creating value along commodities with competitive advantage within the prioritized economic sectors, in pursuit of addressing losses in employment and promoting sustained job opportunities. (Cluster Value-Chain development).

1.3 Process Plan

1.3.1 Structures that manage/drive the IDP and Budget process

The following diagram is a schematic representation of the organization structure that drives the IDP Process:

The following structures will be responsible to **develop, implement and monitor** the IDP/Budget/PMS of Polokwane. Polokwane Municipality's IDP, Budget and Process have been aligned as indicated in the table below:

Structure that manage/drive the IDP/BUDGET/PMS Process		
Structure	Composition	Role
Council	Members of Council (Chair: Speaker)	<ul style="list-style-type: none"> ➤ Make Final decisions. ➤ Consider and adopt Framework/ process plan. ➤ Consider, adopt and approve the IDP/Budget before the start of the financial year.
Executive Mayor	Executive Mayor	<ul style="list-style-type: none"> ➤ Manage the drafting of the IDP review. ➤ Assign responsibilities in this regard to the Municipal Manager. ➤ Submit the process plan to Council for adoption. ➤ Submit the draft and final reviewed IDP to the Council for adoption and approval. ➤ The responsibility for managing the draft of the IDP is assigned to the Office of the Municipal Manager.
Municipal Manager	Municipal Manager	<p>Municipal Manager has the following responsibilities:</p> <ul style="list-style-type: none"> ➤ Preparation of the Process Plan. ➤ Day to day management and coordination of the IDP Process in terms of the timeframes, resources and people. ➤ Ensuring involvement of all relevant role-players, especially management officials, to ensure that timeframes are being adhered to. ➤ That the planning process is horizontally and vertically aligned and complies with National and Provincial requirements. ➤ That community is provided with the opportunity to participate in the drafting of the

Structure	Composition	Role
	(Chair: National Treasury-Director: Intergovernmental Relations)	

1.3.2 Functions and context of public participation

Chapter 4 of the Municipal Systems Act, 2000 section 17(2) stipulates that a municipality must establish appropriate mechanisms, processes and procedures to enable the local community to participate in the affairs of the municipality.

Four major functions can be aligned with the public participation process namely:

- Needs identification.
- Identification of appropriateness of proposed solutions.
- Community ownership and buy-in; and
- Empowerment.

1.3.3 Mechanism and Procedures for Public Participation Process

The following mechanisms for participation will be utilized by the City of Polokwane:

- **Media**

National and Local newspapers, local radio stations and the Municipal newsletter will be used to inform the communities about the progress of the IDP.

- **Municipal Website**

The Municipal website will also be utilized to communicate and inform the community. Copies of the IDP and Budget will be placed on the Municipal website for people and service providers to download.

- **Traditional Authorities and Municipal Cluster Offices**

Copies of the IDP and Budget will be distributed to traditional authorities' offices, municipal cluster offices, and all municipal libraries.

1.3.4 Procedures for participation

The following procedures for participation will be utilized:

- **April Community Consultation Meetings**

For the entire review/development of the IDP/Budget/PMS, communities will be consulted during the months of **April** each financial year directly on soliciting the needs and presenting the draft IDP/Budget of the municipality as approved by Council. This will deepen the participation of the communities in the entire process of the IDP cycle.

Inputs raised and discussed in the IDP Public Participation Consultation will be noted by the IDP office and Public Participation SBU. All Community inputs and comments received will be taken into consideration when compiling the Public Participation Report to Council.

Complete Public Participation Report with all the inputs received will be submitted to Council as Annexure B of the Final IDP Document.

1.3.5 Activity Flow

- The Executive Mayor through the office of the Municipal Manager will be responsible for the development/review of the IDP and Budget.
- The Municipal Manager has delegated the responsibility of secretariat of the IDP to the Manager: IDP.
- The IDP and Budget offices shall draft the IDP/Budget Process Plan with the IDP Steering Committee and submit to Council for approval.
- The Executive Mayor shall establish and consult with the IDP/Budget Steering Committee and Municipal Stakeholders in the Process of Developing the IDP.
- The Executive Mayor shall submit IDP /Budget Process Plan to Council.
- The Municipal Manager shall facilitate the technical /steering committee in the drafting of the IDP in all the phases.
- The IDP Manager, Budget Manager and the Municipal Manager shall monitor the planning in all phases, ensuring involvement of communities and adherence to timeframes throughout the process.
- The IDP Steering Committee shall determine the strategic objectives and priorities for service delivery in the municipality in consultation with Municipal stakeholders.

- The IDP/Budget Technical Committee shall develop and compile the status quo report, analysis phase, identify strategies, draft programme and projects aligned to the sector plans.
- The draft and Final IDP/Budget shall be submitted to Joint Admin and Finance Portfolio Committee for oversight.
- The Executive Mayor shall submit the draft and Final IDP/Budget to Council.

1.4 Time Schedule for Municipal Planning Process

1.4.1 IDP Review Time Schedule

IDP Process Time Table			
Target Date	Output required	Coordinator	Stakeholders
Preparatory Phase			
01 June 2022	<u>Alignment</u> of the Draft Process Plan with the Approved Corporate Calendar, District Process Plan, Audit Committee Schedule, and Risk Committee Schedule, EXCO, Extended EXCO and Speaker Office Magoshi Forum.	Manager: IDP Manager: Legislative Support	MM, Directors and Managers
01-30 June 2022	Publish the Draft Process Plan for inputs and comments. (Internal and External Stakeholders)	Manager: IDP Manager Communication	MM, Directors and Managers, Sector Dept, NGO's & Community stakeholders
20 July 2022	Submission of the Final Process Plan to Admin /Gov Portfolio Committee. (Process Plan)	Manager: IDP Manager: Legislative Support	MM, Directors and Managers
25 July 2022	Submission of the Final Process Plan to MAYCO. (Process Plan)	Manager: IDP Manager: Legislative Support	E. Mayor, MAYCO, MM,

- The IDP, Budget and PMS Offices shall coordinate the development of the IDP and Budget according to the Approved Process Plan and report accordingly to the Municipal Manager.
- The National Treasury shall monitor Compliance of the approved Process Plan dates during the Mid-Year Engagement and NT Benchmarking Session.
- The IDP/Budget/PMS Steering committee will monitor and ensure compliance in the implementation of IDP /Budget Process Plan dates as approved by Council.

- Department of Cooperative Governance, Human Settlement and Traditional Affairs (CoGHSTA) and Office of the Premier will ensure support on the co-ordination and alignment of Provincial and National Departments and role players.

CHAPTER Two: Spatial Planning and Land Use Analysis

2. SPATIAL RATIONALE

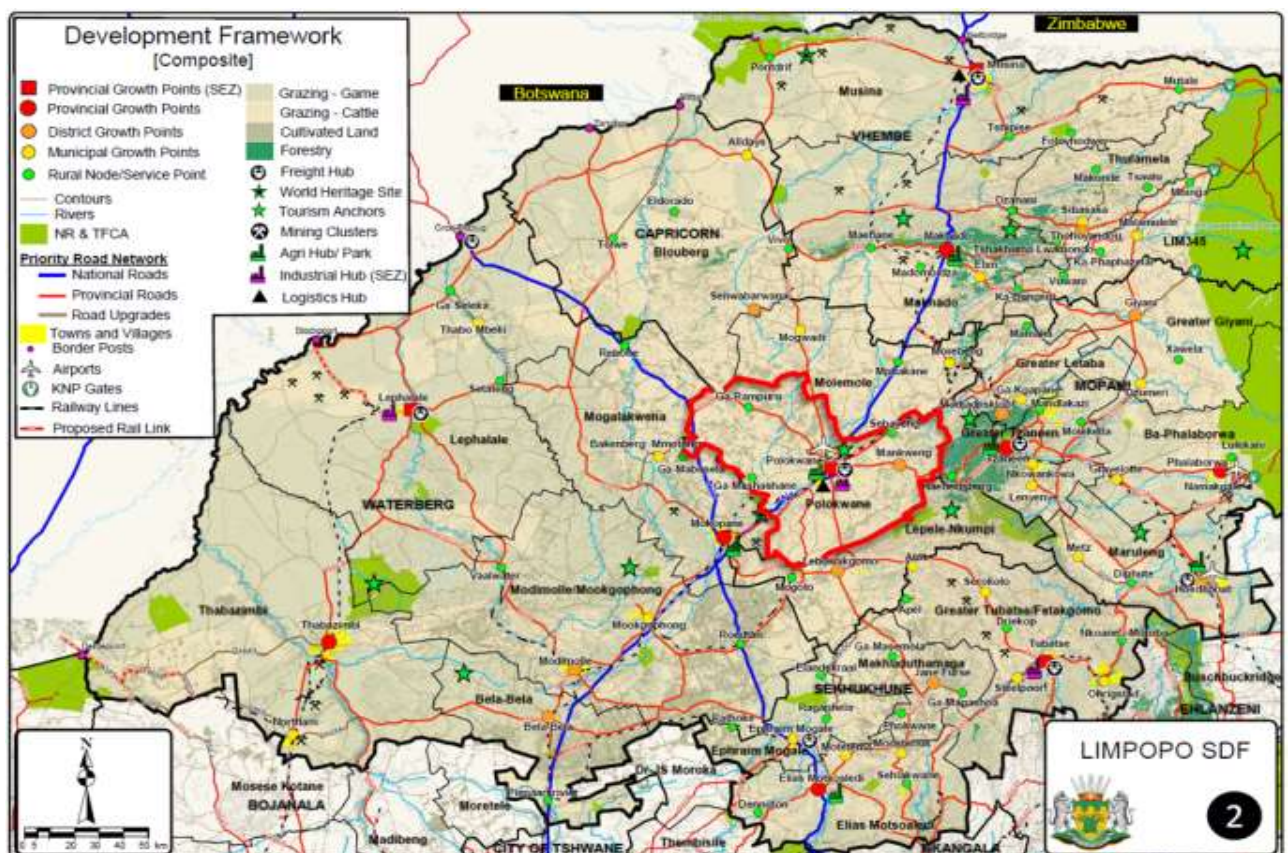

2.1 Strategic Location of Polokwane City

The central and strategic location of City of Polokwane, which is complemented further by the National Road **N1** highway, which strategically links the City of Polokwane to the south with **Gauteng** and to the north with **Zimbabwe**, and Polokwane International airport. The City is seen as a gateway to Africa, particularly for the neighbouring Southern African countries such as **Zimbabwe, Mozambique and Botswana**.

The City of Polokwane is not only earmarked as one of the Provincial Growth Points in Limpopo and as a **Special Economic Zone (SEZ)** in the Provincial SDF and Limpopo Development Plan 2030.

Located within the Capricorn District, City of Polokwane is the **economic hub** of Limpopo Province and is strategically located to be the **administrative and economic capital** of the province.

2.1.1 Map of Limpopo Province (Polokwane Strategic Location)

Source: Limpopo Province SDF

2.1.2 City of Polokwane Entrance

City of Polokwane Entrance

Polokwane meaning "Place of Safety" in Sotho, is a City and also the Capital City of the Limpopo Province, Polokwane is South Africa's largest urban centre north of Gauteng.

Polokwane municipality comprises of a total area of +/- **539 982.5 Ha** and is located in the central part of the Limpopo Province. Polokwane Municipality is located within the Capricorn

District in the Limpopo Province and accounts for 3% of the Province's total surface area of ±124 000 km². In terms of its physical composition Polokwane Municipality is **23%** urbanised and **71%** still rural. The remaining area (**6%**) comprises small holdings and institutional, industrial, and recreational land.

It is the economic hub of Limpopo Province and is strategically located to be the administrative and economic capital of the Province. It is situated at the cross roads of important national and provincial roads which radiate out into the hinterland providing good access to other towns. There is a definite opportunity for Polokwane to become a logistics hub and freight interchange within the region, also given its proximity to the neighbouring countries of Botswana, Zimbabwe, Mozambique and Swaziland. Three of the four Spatial Development Initiatives pass through Polokwane, which repeat the City's strategic location and its importance as far as the economy of the province is concerned.

The municipal spatial pattern reflects that of the historic apartheid city model characterised by segregated settlement. At the centre of the area is the Polokwane economic hub, which comprises the CBD, industrial area, and range of social services and well established formal urban areas servicing the more affluent residents of Polokwane.

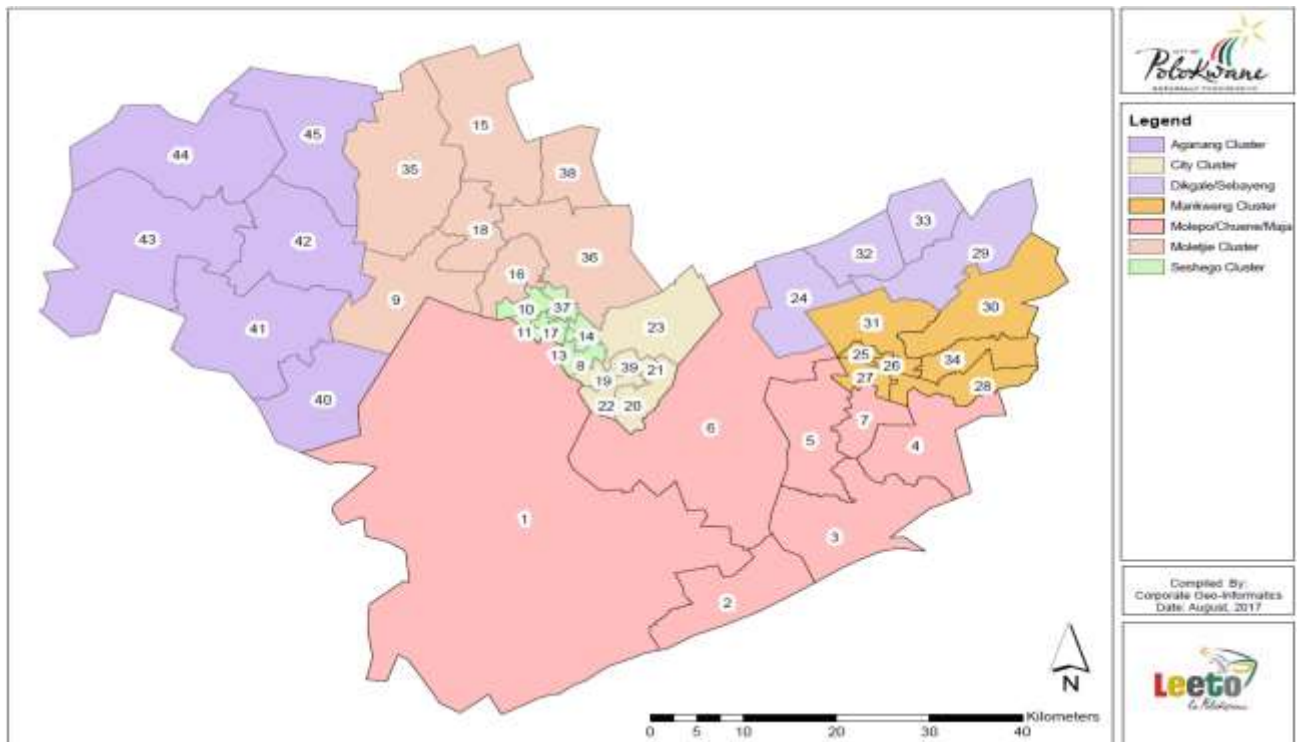

Situated on the outskirts in several clusters are less formal settlement areas which are experiencing enormous influx from rural urban migration trends. These areas are in dire need of upgraded services and infrastructure, both social and engineering, and are struggling to cope with the informal influx of more people who want access to an improved quality and standard of living. Polokwane municipality is made up of Forty-Five (**45**) wards.

2.1.3 The main 7 Clusters of settlements in Polokwane

The main 7 Clusters of settlements are:

- 1) City
- 2) Seshego
- 3) Mankweng
- 4) Sebayeng/Dikgale
- 5) Molepo/ Chuene/ Maja
- 6) Moletjie
- 7) Aganang

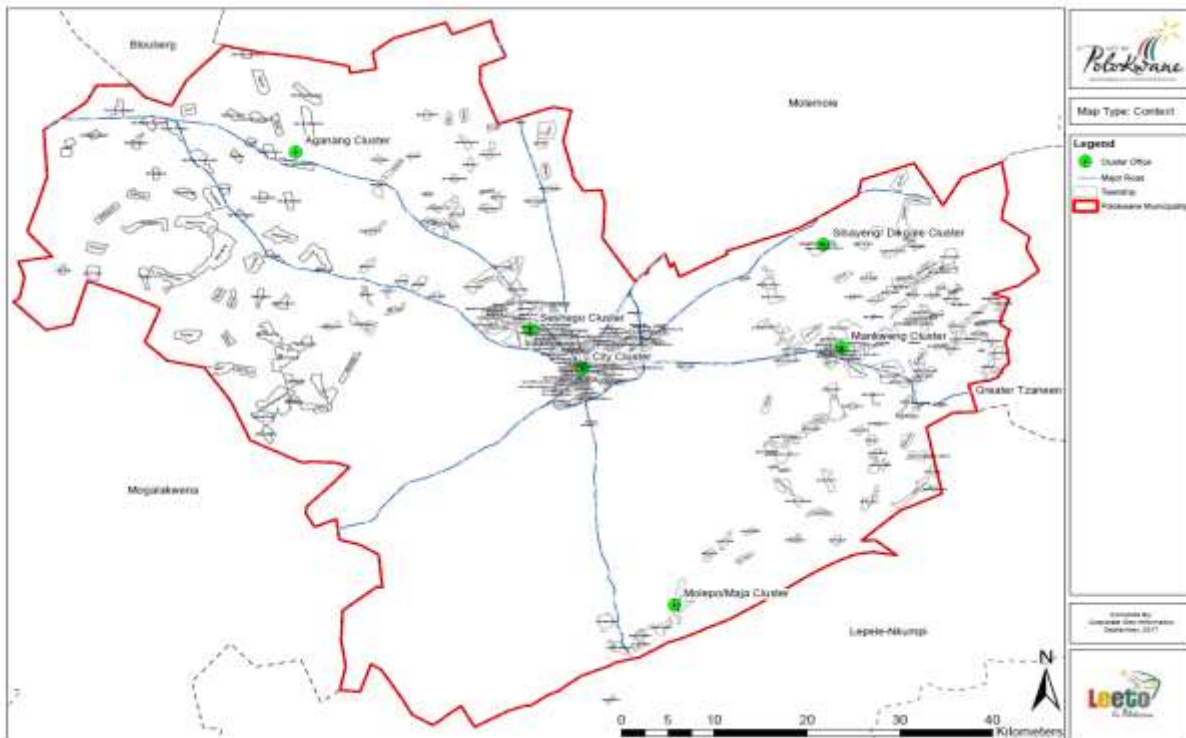

Map: Polokwane Cluster Map (all 45 wards)

Source: Polokwane G.I.S SBU:

- **Seshego:** located west of the CBD. It is nearest to the economic core of all settlement areas and thus has the best access to the formal economy of Polokwane.
- **Mankweng:** located 30km to the east of the city. It constitutes a large area and is mixed formal and informal. It accommodates the University of Limpopo and is a long-established settlement area.
- **Sebayeng:** located 30 km to the north-east of the city centre and is less formal and newer than Mankweng. The area is experiencing influx and is growing at a rapid rate.
- **Maja:** is located 20km to the south and comprises an informal settlement area, with very limited services and infrastructure. The settlement area sits on the fringe of the rural hinterland and is hence surrounded by a vast clustering of rural / semi-rural areas.
- **Moletjie:** It is about 32 km northeast of City of Polokwane and comprises an informal settlement area, with very limited services and infrastructure. The settlement area sits on the fringe of the rural hinterland and is hence surrounded by a vast clustering of rural / semi-rural areas.
- **Aganang:** is situated 45 km west of Polokwane. It is a rural Cluster and has 4 Traditional Authorities namely Moletji, Matlala, Maraba and Mashashane. The area has been incorporated into Polokwane Local Municipality and is now serving as the seventh cluster area for Polokwane. The area is purely rural and has no township; it has potential in Agriculture and Tourism.

Map: Polokwane Municipal Jurisdiction

Source: Polokwane G.I.S SBU:

Polokwane City is the vibrant capital of Limpopo Province, situated on the Great North road to Zimbabwe; it is the largest Municipality that serves as a Capital of Limpopo with major economic centre. Its proximity to the neighbouring countries of Botswana, Zimbabwe, Mozambique and Swaziland, as well as its convenient distance from the Kruger National Park and Magoebaskloof that makes it a perfect gateway to Africa and attractive tourist destination in itself.

2.2 REGIONAL CONTEXT

Polokwane Municipality is located at the heart of Limpopo Province within Capricorn District Municipality. In view of the City’s central location in the Province, a number of main arterial routes converge in Polokwane. Polokwane City inter-connects and interrelates horizontally with the adjacent municipal areas. Municipalities that are adjacent to Polokwane Municipality include the following:

Table: Regional Context

Municipalities that are adjacent to Polokwane	
Mogalakwena	The N1 National Road forms the main carriage way from the south to the north. The main connection between Polokwane Municipality and Mogalakwena Municipality is the Makapan’s World Heritage site in the north eastern part of the Mogalakwena Municipal Area.

Molemole	Agriculture forms the main economic base of Molemole Municipal area. Agricultural produce is transported to Polokwane City. Road P94/1 and the N1- North form the main links between Molemole Municipality and Polokwane Municipality.
Greater Tzaneen	Road P17/1 (R71 east)) forms an important link between Polokwane Municipality and Greater Tzaneen Municipality. Various tourism attractions exist in the western part of the Greater Tzaneen Municipal Area, e.g., Magoebaskloof, the Wolkberg Conservancy Area and various overnight accommodation facilities. Apart from tourism, the R71 is used as a transport corridor for agriculture and mining.
Lepelle Nkumpi	Lebowakgomo, which is the capital of Lepelle Nkumpi Municipality, is located approximately 40km South of Polokwane City. The legislature and other government related functions are located in Lebowakgomo. Road P33/1 forms the main link between Lebowakgomo and Polokwane City. Lepelle Nkumpi Municipality has a strong mining base. Mining- related goods and services are transported along Road P33/1

Source: PLK town planning SBU

2.4 SPATIAL PLANNING AND LAND USE MANAGEMENT TOOLS/LUMS

The provision of the Spatial Planning and Land Use Management Act, Act 16 of 2013 requires that the Municipality must develop a system of planning that guide the spatial and land use planning within the Municipality. The Municipality is administered by the series of planning legislations that govern the administration of land use planning namely:

2.4.1 Town planning and Township Ordinance, Ordinance 15 of 1986 (to be repealed).

The application of the Ordinance is within the area that is within the proclaimed Polokwane/Perskebult Town planning Scheme, 2016 and the Polokwane Land Use Scheme

(Mankweng, Sebayeng, Aganang and Rural Areas), 2017. The area provides types of ownership such as deed of transfer (secured ownership). The said act is applicable in area proclaimed by the said legislations.

Therefore, mixed tenure rights are found within the Municipality. In this regard, there is a need for upgrading of the R293 tenure system from the deed of grant, Permission to Occupy (**PTO**) to Deed of transfer. Those entire townships have to be upgraded in terms of the provision of SPLUMA, Act 16 of 2013 through which the one scheme is developed and land releases on the state land is finalised and incorporated through a formal process.

The Municipality have witnessed the issue of revenue collection and valuation of the properties contradicting with the provision of proclamation R293 of 1962 since it has its own application that differs with the rates act and property valuation. There is a great need to deal with the current situation and upgrade the status quo of the townships through the engagement with the Limpopo provincial department of Corporate Government, Human Settlement and Traditional Affairs for those outstanding township to be donated to the Municipality.

2.4.2 Proclamation R293 of 1962 (Black Administration Act 38 of 1927)

Polokwane Municipality has the black Township known as Mankweng, Sebayeng and Seshego as developed by the provision of the said legislation. Several issues need to be dealt with in terms of upgrading the status of the Land and the rates collection. Polokwane has witnessed the issues of boycott on the payment of rates by the community of Mankweng for example. The issues cut across the provision and services and better planning since the majority has district potential use such as hospitals, universities, and FET colleges. The following are key challenges:

- a. The zoning in terms of the provision of the proclamation R293 of 1962 is govern by the condition attached to the Deed of Grant that does not provide different classification of zoning unlike in terms of the provision of ordinance.
- b. There is a Town Planning Scheme and a Land Use Scheme to deal with the issue, even though the Municipality still need to comply and Compile the Land Use Scheme (Wall to Wall) in terms of the SPLUMA Act. Section 2(2) of the SPLUMA may be used but the upgrading of the Tenure System has to be deal with since the act may not automatically change the tenure system.
- c. The provision of the scheme as control tool needs to be accompanied by upgrading of all the Townships within those areas under R293 of 1962 as briefed on (b) above. The final approval is still with the provincial governance for other processes since the amendment on the condition still within the ambit of the provincial department.

2.4.3. Proclamation R188 of 1969 (Black Administration Act 38 of 1927)

Polokwane was assigned power of dealing with processing of the Land Use Rights in areas under the control of the Traditional Local Authorities. The ownership is Permission to Occupy (P.T.O). In this form, there is no real right registered against the property since the majority of the settlement are not proclaimed and registered with the deed's registry. The provision of the SPLUMA requires that all citizens should have access to secure tenure. In this regard, it is the duties of all the spheres of government to properly plan the development in rural areas for

better transfer of ownership to occupants. The introduction of the Rural settlement development strategy is used as a key towards addressing the issues of tenure and better management of the land use rights and associated uses. The Provision of the Land Use Management Scheme for the entire Municipal Area as a control tool need to be accompanied by the upgrading of the Tenure System of all the Rural Settlements within those areas under R188 of 1962.

2.4.4 Local Government Municipal Systems Act, Act 32 of 2000.

The focus on the act is based on section 26 of the said legislation that demand that the Municipality in areas of operation must develop the Spatial Development Framework that will provide the guidelines for the Implementation of the Land use management System (Land Use Scheme or Town Planning Scheme). The Spatial Development Framework provides the current and future development plans of the Municipality looking at ensuring the integration with other components of the IDP. This includes financial spending, environmental management plans etc.

2.4.5 Spatial Planning and Land Use Management Act, Act 16 of 2013

The Municipality has started with the key components of the as identified for the implementation of the SPLUMA which includes the following:

- Established MPT and Authorized official (Gazette as per Council resolution)ⁱⁱ
- Municipal Appeal Tribunalⁱⁱⁱ
- Delegation of Power^{iv}
- Tariff^v
- By-law^{vi}
- Land Use Scheme^{vii} (process for wall to wall is at Draft Stage)
- Municipal Spatial Development Framework^{viii}(Proposals Stage)

The above act provides new form of planning that demand new planning approaches such as development of the New Spatial Development Framework That complies with the contents as highlighted in section 20 of the said legislation. All above activities should be in line with the provision of or incompliance with section 6 of the SPLUMA, Act 16 of 2013. The principles below provide the guides for the application of the Act:

(a) The principle of spatial justice, whereby—

- (i). past spatial and other development imbalances must be redressed through improved access to and use of land.
- (ii). spatial development frameworks and policies at all spheres of government must address the inclusion of persons and areas that were previously excluded, with an emphasis on informal settlements, former homeland areas and areas characterised by widespread poverty and deprivation.
- (iii). spatial planning mechanisms, including land use schemes, must incorporate provisions that enable redress in access to land by disadvantaged communities and persons.

- (iv). land use management systems must include all areas of a municipality and specifically include provisions that are flexible and appropriate for the management of disadvantaged areas, informal settlements and former homeland areas.
- (v). land development procedures must include provisions that accommodate access to secure tenure and the incremental upgrading of informal areas; and
- (vi). a Municipal Planning Tribunal considering an application before it, may not be impeded or restricted in the exercise of its discretion solely on the ground that the value of land or property is affected by the outcome of the application.

Submission

The principle provides guides in addressing the spatial segregation by putting measures in place for proper planning for both areas' disadvantages and informal settlement. This is done through providing access to the use of land through policy such as SDF that provides spatial information useful for economic development at large (Mining, Agriculture etc.). It is through planned settlement that most of the Informal Settlement has to be eradicated and provides secure tenure. These aspects of secure tenure need to be addressed at large by looking at the rural areas as well.

Our plans and policies should visualise the long term's view of at least 20 years and beyond in an integrated manner. This is through our SDF, Density policies, URS, RSS, HSP, Infrastructure Master Plans, City development Policies, financial planning etc. Both urban and rural should be guarded for managed growth^{ix}.

"54% of the world's population lives in urban areas, a proportion that is expected to increase to 66 per cent by 2050. Projections show that urbanization combined with the overall growth of the world's population could add another 2.5 billion people to urban populations by 2050, with close to 90 percent of the increase concentrated in Asia and Africa, according to a new United Nations report launched today".

- (b) the principle of spatial sustainability, whereby spatial planning and land use management systems must—
 - (i). promote land development that is within the fiscal, institutional and administrative means of the Republic.
 - (ii). ensure that special consideration is given to the protection of prime and unique agricultural land.
 - (iii). uphold consistency of land use measures in accordance with environmental management instruments.
 - (iv). promote and stimulate the effective and equitable functioning of land markets.
 - (v). consider all current and future costs to all parties for the provision of infrastructure and social services in land developments.
 - (vi). promote land development in locations that are sustainable and limit urban sprawl; and result in communities that are viable.

Polokwane Municipality has developed the Economic Growth and Development Plan, a vision 2030 which was adopted by the Municipality in line with the national and provincial Development Plan. The vision 2030 of the Municipality has identified the 6 pillars that aimed addressing the challenges by year 2030 or prior. Each pillar signals the action needed within each directorate in driving the city into a "Smart City". Polokwane for example, it experiences shortage of water, and that is a basic need. The concept aimed at putting measures in place

to deal with the management and sustainable uses of limited resources in a sustainable means.

The programs as identified should cleared, be assessed and measures as per the targeted date. Until to date, there is still a great need for the alignment of the projects with the segments of each pillar and be measured or reviewed. This demands the revisiting of the Implementation Plan of the EGDP targeted time.

(c) the principle of efficiency, whereby—

- (i). land development optimises the use of existing resources and infrastructure.
- (ii). decision-making procedures are designed to minimise negative financial, social, economic or environmental impacts; and
- (iii). development application procedures are efficient and streamlined and timeframes are adhered to by all parties.

This principle tries to strengthen the physical cluster of the Implementation [plan of the EGDP with the aim of speed-up services delivery without Red tapes. Process plans and procedures should be clear and provided in various forms. The Introduction of the SPLUMA requires that, the systems and procedures must be transparent and fair.

(d) the principle of spatial resilience, whereby flexibility in spatial plans, policies and land use management systems are accommodated to ensure sustainable livelihoods in communities most likely to suffer the impacts of economic and environmental shocks.

The 2030 vision is a long plan that should be guided by the proper plans of the municipality. However, it is important that the plans should not be rigid or static but encourage flexibility when new development introduced. This enables the developers to be accommodated based on the sufficient evidence that such demand may yield good results at the end. Municipal plans must be accommodating when new initiatives introduced and be aligned with the municipal plans.

(e) the principle of good administration, whereby—

- (i). all spheres of government ensure an integrated approach to land use and land development that is guided by the spatial planning and land use management systems as embodied in this Act.
- (ii). all government departments must provide their sector inputs and comply with any other prescribed requirements during the preparation or amendment of spatial development frameworks.
- (iii). the requirements of any law relating to land development and land use are met timeously.
- (iv). the preparation and amendment of spatial plans, policies, land use schemes as well as procedures for development applications, include transparent processes of public participation that afford all parties the opportunity to provide inputs on matters affecting them; and
- (v). policies, legislation and procedures must be clearly set in order to inform and empower members of the public.

The IDP is an Integrated Development Plan that has to include all plans of the Municipality together with the national and provincial mandate in development. This is concluded based on the intergovernmental relations within the spheres of Government. Public participation becomes a key towards transparent governance. Therefore, the principle strengthens the use of all mechanism in collecting the data, communicating the data collected and interpretation of the data collected to the community. By so doing this, it will enable the Municipality to deliver its basic services with success.

2.5. THE PURPOSE OF THE SPATIAL PLANNING AND LAND USE MANAGEMENT ACT (SPLUMA)

It replaces the application of Town Planning and Township's ordinance, Ordinance 15 of 1986 and all other pieces of town planning legislation. In addition to all the land use applications which were processed through the ordinance, the following were repealed by the SPLUMA:

- Act No. 84 of 1967 Removal of Restrictions Act (The whole)
- Act No. 88 of 1967 Physical Planning Act (The whole)
- Act No. 113 of 1991 Less Formal Township Establishment Act (The whole)
- Act No. 125 of 1991 Physical Planning Act (The whole)
- Act No. 67 of 1995 Development Facilitation Act (The whole)

All of the above applications were administered through the Provincial Government, because of the SPLUMA; they will all be administered and processed by the local authority.

2.5.1 SPLUMA implementation Progress

The municipality has already developed and implementing the Municipal Planning By-law, 2017 as from the new financial year 2018/19. All components of the act were adhered to, and the Municipal Planning Tribunal is in operation. The Polokwane Land Use Scheme 2017 for areas under R293 and R188, that covers the area which was not included in the existing Town Planning Scheme has been developed and proclaimed. The Land Use Scheme for the entire Municipal Boundary and the Municipal Spatial Development Framework still need to be compiled (at Draft and Proposals Stage) to Comply the with SPLUMA ACT.

2.6 Land Use Management Scheme (LUMS)

Polokwane Land Use Scheme, 2017, has been adopted by Council and covers areas of Aganang, Sebayeng and Mankweng and other rural areas not covered by Perskebult/Polokwane Town Scheme, 2016 in order to regulate land uses through the whole municipal area.

The Municipality has developed the Land Use Scheme that was covering the area outside the Polokwane/Perskebult town Planning, 2016 which was adopted by 2017 and gazetted. We are using two different Schemes at the Moment.

A service provider is currently integrating the current Polokwane land Use Scheme for **Mankweng, Sebayeng, Aganang and rural areas** and the Polokwane/Perskebult Town

planning Scheme, 2016 to a **single** Land use scheme that is in line with the SPLUMA and Municipal Planning By-Law, 2017.

The Municipality has budgeted for the compilation of the Polokwane Municipal Land Use Scheme.

An integrated Land Use Management Scheme that will cover the wall to wall is currently under the process of being developed (Draft Stage) or to be compiled to address some of the main short comings of the existing Polokwane/Perskebult Town planning scheme, 2016 and current LUS, 2017. The existing Town Planning Scheme was limited to the urban area of Polokwane City/ Seshego as well as the adjacent small holdings / farm portions (Urban Fringe Area). The commercial farming area, rural villages and Tribal areas were excluded from the current land use scheme, but with the enactment of the SPLUMA, the Municipality has approved Polokwane Land Use Scheme, 2017 for Mankweng, Sebayeng, Aganang and rural area which will cover the rest of the municipal boundary excluding the area under the current Polokwane/Perskebult Town planning Scheme, 2016.

Land use management system of the municipality consists of various mechanisms of which the Spatial Development Framework (SDF), Municipal Planning Tribunal, Municipal Appeal Tribunal and Land Use Management Scheme (LUMS) form the main or core components of a land use management system.

Capacity building on land use planning and management are amongst the core strategic mandates of the Provincial Department. In terms of the Intergovernmental Relations Act 13:2005 the department is mandated to build the system's capacity in the province – especially Traditional Authorities for land use planning management and control. Mankweng and Sebayeng is now covered, and the Department of Cooperative Government, Human Settlements and Traditional Affairs has assisted the municipality with the Pilot project. Tribal Authority have mixed challenges relating to land use planning, control, management and integrity systems: linking to planning, legal rights, ownership, control records, conflict and environmental management failure.

2.7. MUNICIPAL PLANNING BY-LAW 2017

The Municipality was required to develop a Municipal Planning By-Law for its entire area in terms of section 32 of the Spatial Planning and Land Use Management Act, Act 16 of 2013. The reason for such demand was to have uniform procedures within the Municipality for Spatial Planning and Land Use Management and address the challenges caused by the old order legislations. Even though the By-law adopted and gazetted as well as comes in to operation, some section of the Ordinance may still be applicable for the outstanding issues on the Ordinance applications. This transitional arrangement may take up to two years or beyond subject that, the ordinance is phased out by the province. The Polokwane Municipal Planning By-law has positively included most issues that the ordinance fails to address the operation of the By-law commenced on the 2 July 2018 with all the supporting components in place.

2.8. POLOKWANE URBAN RENEWAL STRATEGY (URS) AND CBD DEVELOPMENT PLAN, 2016

The said plan has highlighted the key issue to be addressed in the retaining of the business within the city and unpacking the development needs as per the provision of the EGDP 2030 vision. Key principles identified for URS and CBD Development plan 2016 (page 63-88).

PRINCIPLE 1: URBAN MANAGEMENT AND MAINTENANCE
Action 1: Establishment of Polokwane CBD Manager's Office
Action 2: Establishment of Communication/ Complaints System in CBD Manager's Office
Action 3: Joint Service Agreements for External Stakeholders
Action 4: Minimum Basic Service Levels Commitment
Action 5: Special Precinct: Mini IDP/ Joint Maintenance Scheduling Programme/ Budget
Action 6: Dedicated Response Crews
Action 7: Public Property Management – Neglected Buildings
Action 8: Private Property Management – Neglected Buildings
Action 9: Monitoring and Review
PRINCIPLE 2: SAFETY, SECURITY AND BY-LAW ENFORCEMENT
Action 1: Visible Policing and Support Services
Action 2: CCTV and Other Crime Prevention Mechanisms
Action 3: Design-out Crime and Provision of Street Lighting
Action 4: By-Law Enforcement Campaign/ Capacity Building
Action 5: Implement By-Law Enforcement Programme
Action 6: Speeding Up Of Municipal Prosecution Processes
PRINCIPLE 3: LANDMARKS, PUBLIC SPACES, ARTS, CULTURE AND HERITAGE
Action 1: Enhancement of Gateways and Access Routes
Action 2: Establish Public Arts and Culture Initiatives in Civic Park and Mark Street Park
Action 3: Formalization of the Sterkloop Spruit Public Open Space
Action 4: Developing of the Water land Iconic Public Space
Action 5: Strengthening of the Provincial Sports and Recreation Precinct
Action 6: Enhance Priority NMT Movement Network
Action 7: Proper Management of the Visual City Scope
PRINCIPLE 4: LOCAL ECONOMIC DEVELOPMENT
Action 1: Informal Trading / Micro-retailing Formalization
Action 2: Revitalization of the African Market Square
Action 3: Waste Management and Recycling
Action 4: Expansion of Urban Development Zone
Action 5: Incentives
PRINCIPLE 5: SOCIAL DEVELOPMENT
Action 1: Social Capacity Building and Training Strategy
Action 2: Provision of Community Facilities
Action 3: Provide Access to Broadband Telecommunication at Iconic Public Spaces

The above principle will enable the city to restructure and consider key elements that will address the current challenges faced by the Municipality. If proper plans are integrated, the municipality will further attract investors to the city that will address city decay. Managing the city need dedicated team of both the external and internal to deal with the challenges holistically. Safety, open space management, LED and social development are important. Key strategic projects in response to the above principles are detailed in the page 89-98 of the said document.

2.9. GROWTH POINT ANALYSIS

Polokwane Municipality has the provincial growth point which functions as a first order settlement. However, the geographical area of Polokwane Municipality is predominantly rural including considerable land under traditional authority. Polokwane has a large portion of the population living in rural or peri-urban areas, which for most part is unplanned and poorly serviced. All spatial planning must take cognizance of the population and contribute to the improvement of their living conditions.

The Limpopo Spatial Rationale identified a hierarchy of settlements from provincial growth point to scattered settlements. Development interventions are proposed in terms of infrastructure provision and government services in such a manner that the natural economic potential of growth points is further stimulated. Interventions at scattered settlements are such that basic services are provided to ensure that the quality-of-life objective in the Growth and Development Strategy is achieved, but that prevents over investment in places that are depopulating.

1. **Provincial Growth Point: City and Seshego**
2. **District Growth Point: Mankweng**
3. **Municipal Growth Point: Sebayeng and Aganang (to be incorporated)**

However, the following Development Corridors (DC's) and Functional Development Areas Have been identified according to the SDF analysis, namely:

- **Development Corridor (DC) 1: The Pretoria/Gauteng - Pietersburg – Mankweng – Tzaneen**

Development Corridor (N1- south road/ R71 road)

- **Development Corridor (DC) 2: The Burgersfort/ Chuenespoort - Polokwane - Louis Trichardt Development Corridor (R33- N1 north road)**

The Municipality has opened the corridor by initiating the key project that are under catalytic project for CEF such as the **Science park, Bakoni Malapa** Township where the provincial State Theatre will be developed and **Eco-Estate** at the Game reserve. Their status will be elaborated further in detail.

Public Transport Integration Corridor F1; Due to the proposed re-alignment of N1 toll road bypass, it is necessary to revise a study conducted in 1999, namely the Development Plan for the Public Transport Integration Corridor alongside **Nelson Mandela Drive**.

Southern Gateway Development Corridor (F2); This corridor (N1 South, along the western entrance to Polokwane City) is an excellent example of positive spin-offs from this kind of forward planning of a development corridor, in view of recent development. The continued consideration of appropriate land-uses is essential for the long-term sustainability of this corridor and also with a view to not jeopardizing the other initiative in the SDF plan.

Eastern Gateway Development Corridor (F3; The functional development area was previously called the Eastern Corridor or Private Transport Corridor, and involved the Thabo

Mbeki and Grobler Streets one-way pair, stretching from Biccard Street to the Savannah Centre. The study conducted in July 1999, titled Eastern Corridor Development Plan and investigation to formulate policy on the Biccard Street Transitional Area, is being reviewed).

Northern Gateway Development Corridor F4; The corridor starts at Landros Maré Street extension on the northern border of the CBD and traverses the industrial area (Extensions 3 and 12), running past the International Airport, and also includes part of Annandale. The proposal for SEZ or Industrial Hub may also take cognisance of the proposed development on the proposal for the mixed use and proposal for the expansion of the satellite university Campus through a mixed-use development. The expansion of the Urban edge is crucial since the development of the industrial use has now bordered to the urban edge that is a success story for the past 8 years of implementing the current SDF.

Outer Eastern Link (F5); This is a completely new development area and was proposed because of the amalgamation of the different TLC areas. It is part of the Tshwane / Gauteng – Polokwane – Mankweng – Tzaneen Development Corridor (DC1) which would play a major role in integrating the Polokwane and Mankweng clusters with one another. This integration should be regarded as a long-term vision.

The PDA1 proposal for the Dalmada Precinct, is being developed in order to support the development and address the issues of informal or illegal occupation of the land and land invasion. Currently, the Municipality has received township application development in order to support the PDA1 that will comprise of the mixed-use development including the Business, industrial recreational and Residential in a form of a new Nodes or suburban area. Looking at the long terms plan of the SDF, the area will consider the area to be a catalyst for linking Mankweng and Polokwane City.

The development area starts where the Eastern Gateway Development Corridor (F4) ends. From this point it runs to the area in the vicinity of the Boyne and Ga-Mokwane villages, on the eastern border of the Polokwane Municipality Area.

In view of the above corridors, has open an opportunity for the spinoff- development for the key catalytic projects as planned for the various land that support the PHDA'S as gazetted. **R81 corridor** as well is becoming an active spinoff of the Mall of the North, the approved institutions or educational zoning around the area and other land uses will constitute to a kind of mixed used development that will constitute a **student village/Varsity village** since the interest of proposed development around the area as per the current applications received seen the potential for expansion.

2.10. MUNICIPAL LAND ANALYSES

The Municipality is currently intending to develop the Land Audit report in order to account on the opportunities that the land may impact looking beyond 2030 vision. The map below provides the developable properties within the register of the Municipality.

There is more land that the Municipality has not investigated or yet transferred to the Municipality that needs to be researched. The commissioning of the Land Audit may pave the

way for proper land management and the need to address urban challenges. The current land parcels of the municipality are not enough in terms of the projected 2060 urbanisation rate in Urban areas. It is vital that the Municipality advance its strategy in land acquisition with the 2060 urbanisation rate in mind. In this case, having a backlog of housing demand of almost 60000, what will the situation be if the strategic land is not used efficiently through planning approaches such as densification and compact settlement and do away with urban sprawl.

2.11. LAND CLAIMS ANALYSIS

A number of land claims have been lodged with Government within the Polokwane Municipal area of jurisdiction. However, the majority of these claims are not yet concluded or finalized. It is currently not possible to determine their likely impact on spatial development. There is concern from some quarters that more unsustainable rural settlements might be established as a result of restitution of land rights.

From a spatial development point of view, land claims do not necessarily impact on the type of land use. It, however, do have an impact in delaying development processes. Prospective developers are obliged to seek consent of the respective Land Claims Commissioner prior to undertaking any form of development, that is, either for township establishments or change in land use. Although consultations do not hinder development, they do derail the speed at which development moves.

The claimants that receive their land through restoration process becomes a challenging issue that impact negatively to the Municipality especially in areas that are within the Municipal proclaimed scheme. It also plays a negative role and foster illegal invasion. No settlement plans or Township established, and people tend to develop on those land. Such occupants tend to demand services on the area not well surveyed and declared suitable from environmental point of view.

2.12. LAND AVAILABILITY ANALYSIS

The municipality owns a sizable number of land parcels within the urban area. This includes erven within proclaimed townships, farm portions, agricultural holdings and proclaimed townships for mixed housing developments primarily to cater for the housing gap which is outlined in detail in the Housing Chapter.

Table: The below table represents vacant municipal owned townships

#	NAME	LOCALITY	NUMBER OF UNITS
1	Polokwane X72	Doornkraal	800 Residential 1
2	Polokwane X79	Doornkraal	500 Residential 1
3	Polokwane X78	Doornkraal	2863x "Residential 1"; 5x "Residential 2"; 7x "Residential 3"; 2x "Business 3"; 1x "Special"; 5x "Institutional" (Church) 7x

#	NAME	LOCALITY	NUMBER OF UNITS
			"Educational" 4x "Municipal"; 13x "Public Open Spaces" 1x "RSA"
4	Polokwane X108	Portion 188 (a ptn of ptn 8) of Doornkraal680 LS	200 Industrial 2 Sites
5	Polokwane X126	Engelschedoornboom 668LS	500 Residential 1 Erven
6	Polokwane X124	Portion 12 of the remainder of Krugersburg 933 LS	19 erven zoned "Special": "Business 2: 1 Erf ±6 650m². "Municipal": 1 Erf ±917m²
7	Polokwane X127	Engelschedoornboom 668LS	500 Residential 1 Erven
8	Southern Gateway X1 PICC	N1 southbound (Pretoria road) and Lawton Road, in the southwestern corner of Polokwane city adjacent to the Nirvana suburb and Ivydale Agricultural Holdings Portions 407, 408, 409, 410, 411 and 412 of the farm Sterkloop 688 LS	The "Special" zoned Erf for a Convention Centre: Tunnel Level Basement Level, Ground Floor First Floor Second Floor The "Special" zoned Erf for a Hotel The "Public Open Space" zoned Erf will be used as a Green Belt Buffer
9	Polokwane X106	Portion 171 Doornkraal 680 LS	190 Residential Erven
10	Polokwane X107	Portion 191 Doornkraal 680LS	142 Residential Erven
11	Polokwane X133	Klipfontein 670 LS Stoefontein 678 LS	3000 sites 208, 422 Ha 138,1129 ha
12	Polokwane X134	Farm Volgestruisfontein 667 LS	2591 sites 178.4699 Ha
13	Nirvana X 5	Portion 74 and 75 of Ivy Dale Agricultural Holdings	105 sites 8. 92224 Ha

Source: PLK Town planning SBU

Township establishment processes for Mixed Housing Development (BNG) are currently underway for the below farm portions:

Table: Land with Township Establishment in progress.

PROPERTY DESCRIPTION	SIZE
Portion of portion 7 of the Farm Palmietfontein 24KS	104.8367Ha
Farm Weltevreden 746 KS	Part of 5 980.00 Ha
Portion 151 to 160 Farm Sterkloop 688 LS	215 Ha

Source: PLK Town planning SBU (2021)

Although the Municipality does not own land in the Tribal Authority's area of jurisdiction, the provisions of the development objectives and development planning in general still vests within the Municipality's guidelines and control. These processes are illustrated in detail in the Spatial Planning and Land Use Management Act 16 of 2013 (SPLUMA) By-Laws as well as Proclamation R188 of 1969 regulations.

2.13. LAND INVASIONS COURT ORDERS

As land invasions were starting to be a problem in the City of Polokwane, Council has obtained **court orders** which protect the following land parcels.

1. Polokwane Extension 40
2. Polokwane Extension 108
3. Polokwane Extension 78
4. Polokwane Extension 106 and 107
5. Erf 6045 Pietersburg, Mikes Kitchen
6. Portion 1-16 of the farm Pelgrimshoop 630 LS
7. Erf 60 and 374 Seshego 9G
8. Erf 36 Seshego 9F
9. Erf 2406 Seshego E (Church)
10. Erf 5289 Pietersburg Extension 11
11. Erf 8518 Seshego Zone 1 extension

Farms:

1. Farm Engelshedoornboom 688LS
2. Farm Volgestruisfontein 667 LS
3. Farm Klipfontein 670 LS
4. Holding 76 of Ivy Dale Agricultural Holdings
5. Farm Doorndrai 606/ LS
6. Farm Sterkloop 688 LS

Court Orders are fully implemented in dealing with land invasion to assist the City with proper Land Management and Planning. But the challenging issue is the cost lost due to unplanned invasion since it is unknown. A comprehensive strategy to deal with the Land invasion is crucial for the municipality in order to safe guard its properties.

2.14. SPATIAL CHALLENGES AND INTERVENTIONS

Spatial analysis

i. Planning control and Outdoor advertising

Challenges

- inadequate control over illegal land use practices within the city
- lack of human capital to deal with illegal land uses (shortage of staff)
- inadequate control over illegal outdoor advertising
- management of contracts for outdoor advertising projects

Interventions

- reviewed the operational manual contained in the illegal land use strategy 2012- to enable the imposing of fines for illegal land uses.
- Council has budgeted for 2 positions of Planning Control Officers positions and have been advertised. Short listing and interviews still have been concluded.
- 3 contractors appointed to deal with the removal of illegal advertisement of council land. Their contracts expired, revised ToR submitted for approval and advertisement of the Project for new Contractors.
- The outdoor advertising bylaw has been reviewed to deal with inadequacies of the 2009 by-law

ii. Land Use Management

Challenges

- Installation of services on approved municipal townships.
- Installation of Services on new approved municipal townships.
- Lack of Truck in Facilities.
- Townships without Street names

Interventions

- The process of servicing municipal township has started. Engineering Services SBU had appointed engineer to start with the designs for (Polokwane Extension 108,26 and 126) and thereafter contractors will be appointed to install services. The Detailed design report has been submitted and approved. The Tender has been prepared and submitted for approval and advertisement of the project.
- List of Municipal Townships attached that require services to be installed. Engineering Services SBU to budget for and appoint engineers and contractors.

- Application for Truck Inn Facility lodged on Polokwane Extension 136 (Municipal Township). Municipal Planning Tribunal has decided on the application, and it is approved.
- Polokwane Local Geographic Names Policy has been adopted to deal with naming of streets within townships.

iii. Spatial Planning

Challenges

- Spatial Inequalities/Injustices
- Inadequate ownership of land in rural areas
- Underutilised airport infrastructure
- Lack of alignment in municipal plans
- Lack of areas earmarked for Student Accommodation and policy to address the need
- Confusion in Multiple legislation not repealed by SPLUMA
- Municipal By-Law Implementation

Interventions

- Neighbourhood Development Partnership Grant (NDPG) is a grant that unlocks investments, by funding neighbourhood development projects to improve the life of residents in targeted areas, generally townships. The partnership of the municipality and National Treasury with this program, enable the municipality to implement projects identified in municipal plans in order to curb spatial inequalities.
- The Department of Rural Development and Land Reform has approached the municipality on some portions which are owned by the state. The intention is to release land owned by state to the municipality in order to unlock development and promote ownership. For example, Portions affected by invasions (**Mamahule Area**) will be the initial intervention areas.
- Enhancing the status of the municipal airport has been prioritised. Mixed land uses are to be promoted around portions surrounding the airport. Terms of reference to conduct feasibility studies have been drafted in order to get a consultant to carry out the relevant studies.
- The Integrated Urban Development Framework (IUDF) is one of the fundamental policies of the Government that seek to action the National Development Plan for the future needs. The purpose of the Integrated Urban Development Framework (IUDF) is to fundamentally provide a micro plan for a specific area with proper development guides. A Capital Expenditure Framework (CEF) is a long-term infrastructure plan that flows from a Spatial Development Framework. The CEF was developed in order to incorporate those Strategic Development Areas that details the Future Priority Development Areas, as such there will be alignment between planning, infrastructure and financial plans.

- Through the Urban Renewal Strategy and CBB Plan, 2016, areas where student accommodation is to be promoted has been identified. Plans to acquire the subject land is one of the priorities for affordable student housing and social housing.
- Polokwane Municipal Bylaw, 2017 has been and approved by Council and currently in operation and covers the whole municipal area. Polokwane Land Use Scheme, 2017, has been adopted and will cover areas of Aganang, Sebayeng and Mankweng and other rural areas not covered by Perskebut/Polokwane Town Scheme, 2016 in order to regulate land uses through the whole municipal area.
- The Municipality must compile or integrate the current Scheme to have a single wall to wall Land Use Scheme for the entire Municipal area of jurisdiction in order to comply with SPLUMA Act and Municipal Planning Bylaws. The process is at the level of a Draft Land Use for the entire Municipal Jurisdiction.

2.14.1 General challenges and Intervention

Spatial Challenges	Intervention
<ul style="list-style-type: none"> • Inadequate ownership of land in rural areas • Illegal land uses • Lack of human resource to fast-track updating of spatial data regularly • Property Management (Leasing and valuation roll) • Human Capital • Limited Funding (Development of the strategies and feasibility studies) • Land claims • Illegal townships • Poor integrated human settlement with institutional facilities • Limited power on the administration of R293 proclamation • Illegally occupied RDP housing units • Underutilised airport infrastructure • Fresh produce market for regional trade • Lack of commitment on the establishment of Cargo HUB or Agro-processing HUB • Townships without Street names • Management of Contracts for Outdoor Advertising Projects • Installation of services on approved municipal townships. • Installation of Services on new approved municipal townships. • Lack of Truck in Facilities. • Spatial Inequalities/Injustices • Lack of Alignment in Municipal Plans • Lack of areas earmarked for Student Accommodation and policy to address the need • Confusion in Multiple legislation not repealed by SPLUMA 	<ul style="list-style-type: none"> • review the operational manual contained in the illegal land use strategy 2012- to enable the imposing of fines for illegal land uses. • Two (2) Planning Control Officers positions have been appointed to deal with illegal. • To Appoint 3 contractors/ or require services from Directorate Roads and transportation to deal with the removal of illegal advertisement on council land. • . The outdoor advertising bylaw 2009 has been reviewed to deal with inadequacies • To benchmark with Municipality of our size to learn how Management of Contracts for Outdoor Advertising Projects are done. The Municipal Council has already resolved that benchmarking should be conducted. • The process of servicing Municipal Township has started. Engineering Services SBU had appointed engineer to start with the designs for (Polokwane Extension 108,26 and 126) and the contractor are appointed to install services. • List of Municipal Townships attached that require services to be installed. Engineering Services SBU to budget for and appoint engineers and contractors. • Application for Truck Inn Facility lodged on Polokwane Extension 136 (Municipal Township). Municipal Planning Tribunal decided on the application and approved it.

Spatial Challenges	Intervention
<ul style="list-style-type: none"> Integrated Human Settlements 	<ul style="list-style-type: none"> Polokwane Local Geographic Names Policy has been adopted to deal with naming of streets within townships. Neighborhood Development Partnership Grant (NDPG) is a grant that unlocks investments, by funding neighborhood development projects to improve the life of residents in targeted areas, generally townships. The partnership of the municipality and National Treasury with this program, enable the municipality to implement projects identified in municipal plans in order to curb spatial inequalities. The Department of Rural Development and Land Reform has approached the municipality on some portions which are owned by the state. The intention is to release land owned by state to the municipality in order to unlock development and promote ownership. For example, Portions affected by invasions (Mamahule Area) will be the initial intervention areas. Enhancing the status of the municipal airport has been prioritised. Mixed land uses are to be promoted around portions surrounding the airport. The feasibility studies have been finalised and approved by Council. The Integrated Urban Development Framework (IUDF) is one of the fundamental policies of the Government that seek to action the National Development Plan for the future needs. The purpose of the Integrated Urban Development Framework (IUDF) is to fundamentally provide a micro plan for a specific area with proper development guides. A Capital Expenditure Framework (CEF) is a long-term infrastructure plan that flows from a Spatial Development Framework. The CEF was developed in order to incorporate those Strategic Development Areas that details the Future Priority Development Areas, as such there will be alignment between planning, infrastructure and financial plans. Through the Urban Renewal Strategy and CBB Plan, 2016, areas where student accommodation is to be promoted has been identified. Plans to acquire the subject land is one of the priorities for affordable student housing and social housing.

Spatial Challenges	Intervention
	<ul style="list-style-type: none"> Polokwane Municipal Bylaw, 2017 has been and approved by Council and currently in operation and covers the whole municipal area. Polokwane Land Use Scheme, 2017, has been adopted and will cover areas of Aganang, Sebayeng and Mankweng and other rural areas not covered by Perskebult/Polokwane Town Scheme, 2016 in order to regulate land uses through the whole municipal area. The Municipality must compile the wall-to-wall Land Use Scheme for the entire Municipal area of jurisdiction to comply with SPLUMA Act and Municipal Planning Bylaws. The process is at Draft Land Use for the entire Municipal Jurisdiction.

Source: PLK Town planning SBU

2.15. SPATIAL INTERPRETATION OF THE POLOKWANE MUNICIPALITY

2.15.1 Key guiding policies and municipal By-laws

- a. SDF
- b. EGD
- c. URS/CBD Development Plan
- d. Density policies
- e. Rural Settlement Strategy
- f. Telecommunication mast policy
- g. Spaza and Tavern Policy
- h. IUDF

2.15.2 Economic opportunities and growth

- 1) Polokwane Municipality is a gate way to Africa
- 2) SEZ/Industrial park development
- 3) Post incubation hub at Polokwane extension 26
- 4) Cargo Hub/Agro-processing HUB
- 5) Truck-Inn/Logistic HUB
- 6) Development of Science Park
- 7) Eco-estate around the Bakoni Malapa
- 8) Arts and Cultural Hub
- 9) Urban Renewal projects (development of the High-rise office and residential accommodation)

2.16. RURAL DEVELOPMENT

In terms of the Rural settlement development challenges, the Municipality must comply with section 3-8 of the SPLUMA.

Approximately 70% of the area in Polokwane Municipality is Rural and need to be careful considered. Through public participation on the Draft Rural Settlement Strategy, it was discovered that, rural areas have potential in Nodal development and those areas close to our Sub-urban areas. This tends to have major development along the main roads and attract people to seek residential properties, business etc. in the assessment, it was found that there are:

- Informal settlement within road reserve and flood lines
- Uncoordinated spatial settlement
- Poor streets and roads in informal settlement
- Un-planned desired land use types
- Unclear determination of the property's sizes
- Poor Cemetery planning and maintenance
- Land allocation disputes
- Poor monitoring and evaluation on the registered servitudes, flood lines, road reserves.

This goes beyond to old settlement as they extend. In this regards, Spatial Planning has developed the **Rural Settlement Strategy, 2017** with the aim of addressing this spatial pattern. Once the document has presented, the Traditional Local Authority has seen the potential and realize to partner with the Municipality through development of those area. Letters of request was received and need urgent attention.

Our Land Use Scheme survey conducted in 2012/2013 has data that portray zoning of that area and captures in the system. The following challenges have to be addressed:

- a. Development of the proper integrated human settlement that will be sustainable: this are the benefit
 - Building Plans approval fees
 - Rezoning
 - Managing land use since we have two land use Scheme and Town Planning Scheme that covers the wall-to-wall scheme.
 - Proper planning for other services such as Roads, Water and sanitation etc.
- b. Land survey for all settlement in Polokwane municipal Jurisdiction:
 - Proper stand numbers and streets
 - Land dispute resolution
 - Proper stats
 - Proper maintenance etc.
- c. Land Use Survey for the whole Municipality
 - Proper zoning and
 - conflict resolution
 - Business Registration and management
 - Adhere to SPLUMA

2.17. URBAN DEVELOPMENT

2.17.1 Integrated Urban Development Framework Plan

The future of the Polokwane City, we tend to develop policies that demand integration of all resources and different directorate to interact with one another. Looking at the directionless, the Municipality tends to shift away from purpose built (Future planning) and concentrate on basic services rather advance proactive Plans that aim at advancing service delivery mechanism looking at the 2030-2050 urbanization challenges. Government policies are being development with a long terms vision, but it is left with the planners to properly re-shape the city toward the future needs. Advance skills and commitment of the planners is required. The Integrated Urban Development Framework (IUDF) is one of the fundamental policies of the Government that seek to action the National Development Plan for the future needs.

The purpose of the Integrated Urban Development Framework (IUDF) is to fundamentally provide a micro plan for a specific area with proper development guides. In this case, The CBD and parts of the Industrial area and some neighbourhoods were left without being guided by any of those SDA's. In terms of Table 66 of the current Spatial Development Framework, 2010, it was noted that the IUDF must be developed. Therefore, the proposed development strategy seeks to incorporate those SDA's in to an Integrated Urban Framework Plan that details the Future and Integrated plan for the Provincial growth point.

The Integrated Urban Development Framework (IUDF) is a response to our urbanisation trends and the directive by the National Development Plan (NDP) to develop an urban development policy that will cater for the increasing numbers by ensuring proper planning and necessary infrastructure to support this growth. Polokwane Municipality has to develop its own Integrated Urban Framework Plan that will propose a detail plan on the City Development Strategy looking towards on a sustainable urbanisation model at the following key policy levers:

- Integrated urban planning and management
- Integrated transport and mobility
- Integrated sustainable human settlements
- Integrated urban infrastructure
- Efficient land governance and management
- Inclusive economic development
- Empowered active communities.
- Effective urban governance.
- Sustainable finances

Polokwane Municipality has developed a series of policies to deal with the development of the city but in a narrow view. Part of the current project within the Directorate is to have a comprehensive **City Development Strategy** that will underpin the key policy levers looking at the promoting the city through long terms development goals and models. This will enable to address the following:

- **A CDS is a potential trend breaker:** - motivating key decision-makers to think and operate differently so as to break the negative trends faced by a city.

- **Guiding short-term implementation within a long-term logic:** - A CDS informs the 5- year integrated development planning (IDP) process and shape term-of-office delivery objectives.
- **Pulling in the same direction:** - It allows multiple government agencies, communities and business to rally, act and invest along a similar logic; creating a common focus.
- **Identifying interventions with the highest leverage potential:** - A CDS serve to prioritise and direct resources effectively into those identified interventions that holds the best potential.
- **Anticipating future shocks and contextual changes:** - Through a CDS anticipated long term future changes can be identified and anticipated.
- **Assist in guiding growth:** - A CDS can influence how a city approaches infrastructure creation and physical growth; and
- **(Re)Positioning:** -A CDS serve to reposition the city in terms of national policies and public funding, place-marketing and also the confidence with which ordinary people view the potential of their city.

The budget was allocated for the development of the said document but is subject to the finalisation of the Draft SDF in order to be aligned. All the project within the Municipality must be in accordance to the approved CEF that will assist in the plotting of the various directorate project that will enable proper recording of the projects spatially.

2.18 ECONOMIC SPIN-OFF DEVELOPMENTS

2.18.1 Baobab Gardens Motor City

Baobab Boulevard township is surrounded by existing township developments on three sides. On the north eastern side is Bendor X87 (i.e., **Thornhill shopping centre**, an area approved for an office development with the rest being a residential development consisting of both single and sectional title residential development). Next to the Munnik road on the northern side are townships such as Bendor X32 and 44 (i.e. mostly residential development consisting of both single and sectional title residential development and a filling station). Adjacent to De Wet Drive to the south west of the application site is a township for up market single residential development known as Polokwane extension 11 (Sterpark). The area to the south is vacant and part of the Remaining Extent the Farm Krugersburg 993 LS. The site occupies an important location in relation to other significant features of the City. The site is close to the newly completed N1 ring road and therefore has excellent and direct connections to the south and north-east.

The location advantages are amongst other, the following:

- i. The eastern area has a large concentration of middle to higher income housing at Polokwane extension 138 that will include the botanical gardens and Bendor 126 for mixed land uses.
- ii. The huge volume of existing “older” motor industry/motor dealership rights in Polokwane city, and similar rights approved in recent years elsewhere outside the CBD such as along the N1 (now R101) south impact negatively on the development of Polokwane X124 for motor and motor related businesses. Most of the motor dealerships are “established” in their current locations and the remaining motor dealerships are currently being established in new locations such as MGM Group at Polokwane X124 (Baobab Boulevard) and others at the southern N1/R101 entrance such as Jeep/Mercedes/Mitsubishi/Dodge (pre-owned on Erf 141 Ivypark) and Audi (on Erven 2 and 3 Ivypark). Westvaal dealership (Chevrolet/Opel/Isuzu) will relocate to Erf 2506 Ivypark X52.
- iii. Mall of the north is a secondary activity node with Munnik road an activity spine/corridor and mixed-use development is allowed in this development area. The area is close to the Mall of the North regional shopping centre and therefore also close to the N1 ring road. Baobab Boulevard therefore has excellent and direct connections to the south and north-east.
- iv. Baobab Boulevard is part of the Mall of the North secondary activity node/Munnik road corridor and far enough from Polokwane CBD to functionally service a huge surrounding residential community. In conjunction with Thornhill shopping centre which is opposite the road on the most north eastern side of Baobab Boulevard the “combined Mall of the North node” is even more functional, without compromising the operations of the CBD.
- v. The north-eastern part of the city has been rapidly expanding in recent years, and the quality and nature of Baobab Boulevard once fully developed will be a huge attribute to the area and also to Polokwane City.
- vi. Secondary nodes and activity corridors are part of the urban structure, particularly in a rapidly growing city. The CBD is the central, economic heart of the city with a role to serve the high order retail and general business needs of the community. Activity nodes and corridors that lead into the city provide complementary economic opportunities and speciality functions, such as Mall of the North and Baobab Boulevard. Multi-nodal cities such as Polokwane are function-oriented, and these uses need not to be located in the CBD because they have specific space needs and operational requirements.

Motor City Baobab Boulevard Development

Source: PLK Town Planning SBU

2.18.2 Eskom Regional Offices

Eskom has recently completed a process of aligning their 7 regions into 9 provinces. They have identified a need to put their Provincial Headquarters in Polokwane as the Capital City of Limpopo Province. This initiative is aimed at catering the Eskom Northern Region employees amounting to 2000 employees and at the same time merging the Eskom Distribution, Transmission and Generation. The proposed development will require approximately **40 Hectares** of land for the purposes of Construction of an 8 Ha regional Head

Office (Main Building). The engagement with the regional Director is underway in order to either maximise the use of the land at Polokwane X 108 industrial Township in order to open up the Seshego Precinct Plan.

Establishment of a 10 Ha Training Academy to accommodate:

- Electrical Training Simulator
- Substation Yard (1 Ha)
- Line Yard (4 Ha)
- Dead-condition Construction Yard (4 Ha)
- Technical Training and Non-Technical Training requirements (0.3 Ha)

Establishment of the 4 Ha Engineering Block to accommodate:

- TSG,
- EDFS,
- MEW,
- Live Work And
- Technical Support

Further to that, Eskom has the intention to establish a high-quality commercial office building with a minimum 4-Star Green Star Rating certified with the Green Building Council of South Africa. This initiative is in line with the principles of sustainable development, and land use planning. The land is located on the **remainder of the farm Krugersburg 993 LS**. The land is zoned agricultural and vacant at this point. Locality map is indicated below. The total size as requested by Eskom is approximately 40 hectares

Benefits of the proposed development

The proposed development will act as landmark in Polokwane; it will enhance development within Polokwane and bring about job creation for local communities. Apart from the benefits directly linked to Eskom, this kind of development is important for the landscaping of the city. The development will furthermore stimulate economic growth for the city and promote investment in Polokwane. Below are the summarized benefits as motivated by Eskom.

- Adequate office accommodation for current and future Eskom employees
- Adequate parking space
- Improved Security
- Monetary savings
- Enhanced Eskom identity and public image
- Enriched worker morale
- Educational and training opportunities

Eskom is currently experiencing some challenges with their current offices scattered throughout the City. The shortage of parking for their employees' together with other reasons already mentioned has motivated for the need to establish Provincial Headquarters. Below is a snapshot of the current ESKOM offices.

Although there is a policy guiding the development of offices in Polokwane area, "CBD Development Plan" which encourages office development within the CBD, Eskom offices are not located within the CBD in other provinces. Given the non-availability of land to cater for such magnitude of office space within the CBD, it is argued that the proposed development has special merits therefore requires a special consideration in line with other development principles and regulations. The area falls within the Strategic Development Area 3 of

Polokwane municipality, and it is within the Urban Edge according to the Spatial Development Framework, 2011.

“That a portion not exceeding 78 Hectares of the Remainder of the farm Krugersburg 993 LS leased with a sale option to Eskom for the purposes of developing their Provincial Headquarters”.

Eskom appointed a consulting team to investigate the feasibility of the site in 2013 and it was established that the site had severe shortcomings for Eskom’s intended use. The impact of the restrictions imposed by Civil Aviation on the adjoining municipal landing strip and the provision of power to the site render the site inadequate to meet the initial objectives of Eskom. The height restrictions for the overhead power lines to the substation of the proposed Simulator and Training centre cannot be accommodated on Krugersburg 995 LS. Therefore, an alternative land was identified, **which is a portion of Remainder of Farm Weltevreden 746 LS**, this request is currently being processed.

2.18.3 Polokwane International Convention Centre (PICC)

The Polokwane International Convention Centre will be located at Southern Gateway Extension 1 Township on Portions 407, 408, 409, 410, 411 and 412 of the farm Sterkloop 688 LS Limpopo Province. The property is situated on the corner of the N1 southbound (Pretoria road) and Lawton Road, in the south-western corner of Polokwane City adjacent to the Nirvana suburb and Ivydale Agricultural Holdings. Southern Gateway Extension 1 is a Municipal township located on portion 83, 84, 85, 86, 87 and 77 of the holding Ivydale, see attached map. As part of the township establishment process, an EIA scoping was conducted, a Geo-technical report was prepared, a flood line certificate prepared, and a Traffic Impact Assessment conducted.

The following uses were approved as part of the conditions of establishment of the township. The “Special” zoned Erf for a Convention Centre consisting of the following components:

- Tunnel Level
- Basement Level,
- Ground Floor
- First Floor
- Second Floor

The “Special” zoned Erf for a Hotel

The “Public Open Space” zoned Erf will be used as a Green Belt Buffer.

There is a need for such a facility in Polokwane, The Township is proclaimed and registered with the registrar of deeds, proclamation notice and approved general plan. The proposed PICC will subject to the funding availability since the feasibility studies concluded. There are several engagements between the Municipality, appointed panel of consultant to source the funding through a long term’s development leases with the use of the other properties adjacent to complement the development.

2.18.4 Urban Renewal projects

Polokwane Municipality has adopted the Urban Renewal Strategy and CBD Development Plan 2016. This policy has set the key principles that support the current Program of “Re a ga” Polokwane that highlight the following:

The City of Polokwane has launched programme called "Re aga Polokwane", that is geared towards ensuring that the City and its citizens are working together to build the city of Polokwane. The "Re aga Polokwane" programme – strengthening the partnership in **building a smart city by 2030 and beyond**. Polokwane is the Capital city of the Limpopo Province-opportunity for economic growth and experience rural urban migration. Polokwane is likely to face urbanisation challenges as the signs have already surfaced such as engineering capacity and high demand of housing typologies. Major projects being embarked by the City of Polokwane:

- ✓ the **replacement of 177km of AC (asbestos cement) pipes** in the municipality's jurisdiction.
- ✓ **to replace conventional water and electricity meters** with smart meters in a number of areas in the City.
- ✓ the introduction of a **rapid bus service**;
- ✓ a **waste management project**.
- ✓ as well as a major **student accommodation** drive to support the growing number of students in the city.
- ✓ Other **Public Private Partnership on Mixed use development** through a Long-term development
- ✓ Water Master Plans
- ✓ Urban Renewal projects
- ✓ etc.

Key strategic/Catalytic development projects on the Long Terms Development leases and other Municipal initiative includes:

- Development of the Polokwane Towers (office accommodation and other SOE)
- Development of the Eco-estate on the part of the Game reserve or theme park
- Proposed Sasol Depot at the proposed Polokwane Extension 136
- Support initiatives for SEZ:

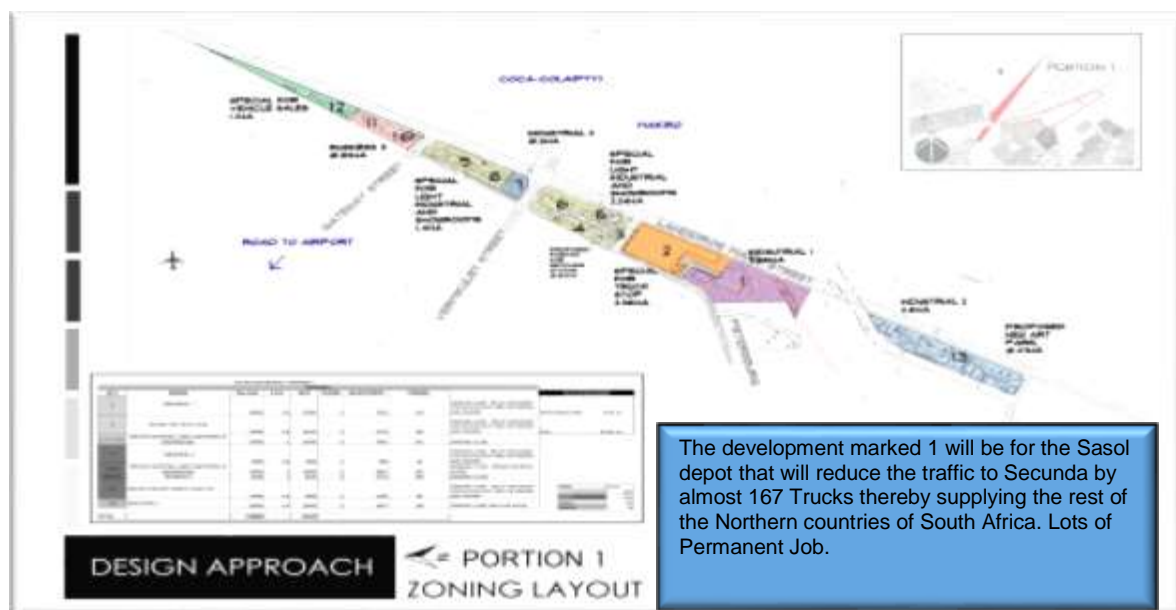

i. Cargo and Logistic Hub

The State of Province Address 2019, the Limpopo Premier Honorable Mathabatha has highlighted the progress made with regard to the proposed SEZ in the province and the district and provincial SDF identified Polokwane for SEZ base on the Agro-processing and Logistics.

Polokwane was identified and has positive factors that in terms of the regional logistics hub and business travel centre that will see the construction of an International Convention Centre being complemented to attract the events, conference and exhibition industry. The Municipality has begun with the process of the developing the feasibility study in order to determine if the SEZ looking at the key analyses and the use of the airport will suffice which was approved by the Council and Submitted to the Premier for implementation. Defining the spatial location becomes the key spatial issue for consideration by looking at the main economic centre such as the CBD, Industrial areas and the transportation linkages within and around the area. Polokwane position itself well since it intends to use its land parcels through a long-term development lease to address the need of the Municipality.

ii. Truck-inn and Cargo HUB (Polokwane extension 136 as approved)

The Figure below illustrates the proposed Township with the uses as highlighted. The **Long-term development leases** were awarded in line with the development of the Cargo and Logistic Hub concept. An **industrial Township** with the following uses:

- Industrial zone properties for Sasol depot, Tanker’s park-inn, cargo truck-inn, Vehicle sales lot.
- Public Garage
- Special for other uses.

iii. Agro-Processing.

Agro-processing industry is a subset of manufacturing that processes raw materials and intermediate products derived from the agricultural sector. Agro processing means

transforming products that originate from agriculture, forestry and fisheries. The Standard Industrial Classification also categorises the following eleven divisions under the agro-processing industry: food, beverages, paper and paper products, wood and wood products, textiles, wearing apparel, furniture, tobacco, rubber products, footwear and leather and leather products. Polokwane has a strong Logistic support from different part of the region and can be able to take that advantage.

Part of the development of the Agro-Processing, the Industrial development becomes that the key, since three modes of transport (Air, Rail and Road) are integrated within the identified area. The Agro-processing industry is among the sectors identified by the Industrial Policy Action Plan (IPAP), the New Growth Path and the National Development Plan for its potential to spur growth and create jobs because of its strong backward linkage with the primary agricultural sector. The Department of Agriculture, Forestry and Fisheries (DAFF) has established a Directorate: Agro-processing Support to complement the interventions undertaken by several governmental departments, notably, the Department of Trade and Industry, by focusing on supporting the establishment and growth of Small and Medium Enterprises (SMEs) for Agro-processing. Polokwane by far, has already earmarked the need for the Agro processing Hub to support the economic growth and development with the support of the sector Departments.

iv. Industrial Development

Polokwane Municipal Economic growth is being hampered by the less production in terms of the Manufacturing sector. The Municipality has dedicated the land on the Old N1 Road (North) now known as the Landros Mare Street as part of the Commercial and Industrial Development. In order to improve the **Airport Precinct**, all the encore development that complement the Agro-processing and Logistic Hub must be prioritised within the area. The main issue for the success of the industrial development is centered around the following key factors for the success of the industries:

- power supply.
- communications - including transport, telecommunications.
- labour supply - including workers with the right skills.
- access to market - where the goods are sold.
- grants and financial incentives - usually from governments.
- raw materials.

The DTI has collaborated with a range of institutions and stakeholders in developing strategies and policies to achieve rapid industrialisation of the country's manufacturing sectors. The institutions and stakeholders include other government departments, particularly in the Economic Sector and Employment Cluster, the National Economic Development and Labour Council, and organised business formations, such as Business Unity South Africa (BUSA) and Industry Associations.

The **DTI** has identified institutions and partners that support the implementation of its industrial development mandate which include:

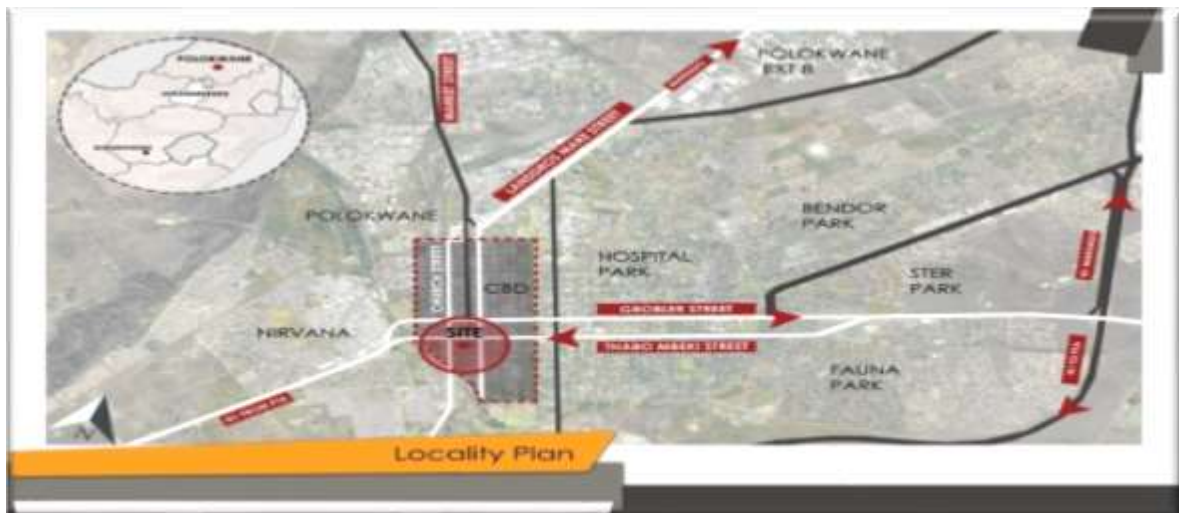

- National Regulator for Compulsory Specifications (NRCS)
- National Metrology Institute of South Africa (NMISA)
- South African Bureau of Standards (SABS)
- Industrial Development Corporation (IDC)
- The South African National Accreditation System (SANAS)

In order for the Polokwane to successfully have an area that supports fully the industrial development, the SBU on economic Development and Trade must be energised in order to access funding and attract investors through the support of the DTI for betterment of the Limpopo Economy and nationally.

NB: The projects in this regard to do a comprehensive feasibility study has commenced in order to deal with the aspects of the SEZ establishment after detail studies and approaches are dealt with.

2.18.5 City wide Development initiatives

The Municipality has developed the Urban Renewal Strategy and the CBD Development Plan, 2016. The ideal was to rejuvenate the city to be a functional business zone with Mixed Land Use Development that will complement the city's vision of being the SMART CITY. The Urban Development Framework developed by the National Department of COGTA laid several levers that are now incorporated in the **CEF** approved by Cogta as presented above. The municipality strives to align the said Policy with the URS and CBD Plan for its identified projects. This includes re-investing in engineering for more compactable city through high density development and office and Business development. The first approach was to look at the development of the Municipal Towers with the current Municipal offices with major development such as the Hotel, restaurant, Cinema, Theatre to mention the few. Figure represents the Location and intended development within the Municipal Precinct.

The proposed idea will strengthen the attraction of the Investors and office accommodation on the scattered Municipal services points around the city. The down Town area is mostly affected by the illegal land uses. It is from the said plans that the Municipality must enable major urban regeneration through Private Public Partnership for developing the area. Land acquisition is a best tool for the Municipality to develop high density development within the area and be supported by the relaxation of the development control and introduction of the incentive on development.

Several land parcels were identified for mixed uses looking at the potential impact that the development will have in the economic growth and addressing the unemployment rate. The approach will be sent to the Council regarding establishing the Data base for the prospective developer who have financial muscle to carry any task that the Municipality intend to develop. This include following the SCM processes and national Treasury Regulations.

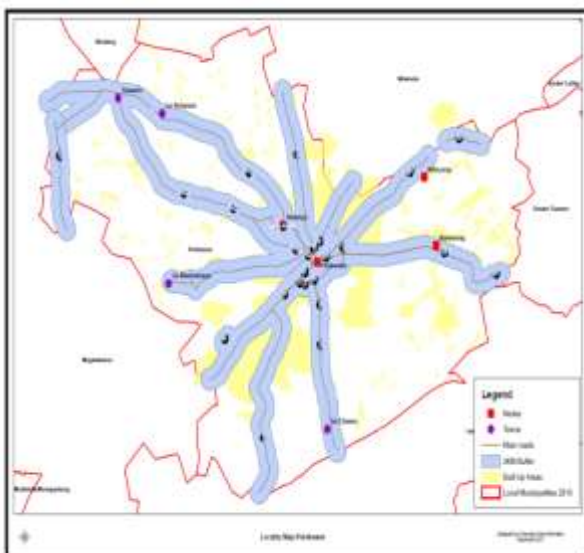

2.18.6 Commercialisation of Municipal Facilities/Properties

The municipality has number of the community facilities and other amenities that need urgent attention. This includes the Peter Mokaba stadium, the game reserve, Jack Botes hall Airport, Library Garden and Showground that may pose positive impact to the community if well managed. Some of these activities need expertise from the people who are specialising in such field. Learning from other cities that own such facilities, the majority are outsourced through the services of the private companies to generate more revenue and lessen the burden of expenditure by the Municipality. For example, the Game reserve may be turned in an Eco-estate that promote the men contact with the nature. The stadium for multipurpose centre Bakoni Malapa for Innovation art and cultural Hub as it is strategically located within the Corridors.

2.18.7 Metropolitan Municipal Requirements

It is the prerogative of the Municipality to become a metropolitan Municipality within the next 3-4 years. The basics should be laid in order to have a proper road map in achieving the Metropolitan status. The Municipal Structures Act, Section 2 provides that – Category A Municipality if that area can reasonably be regarded as-

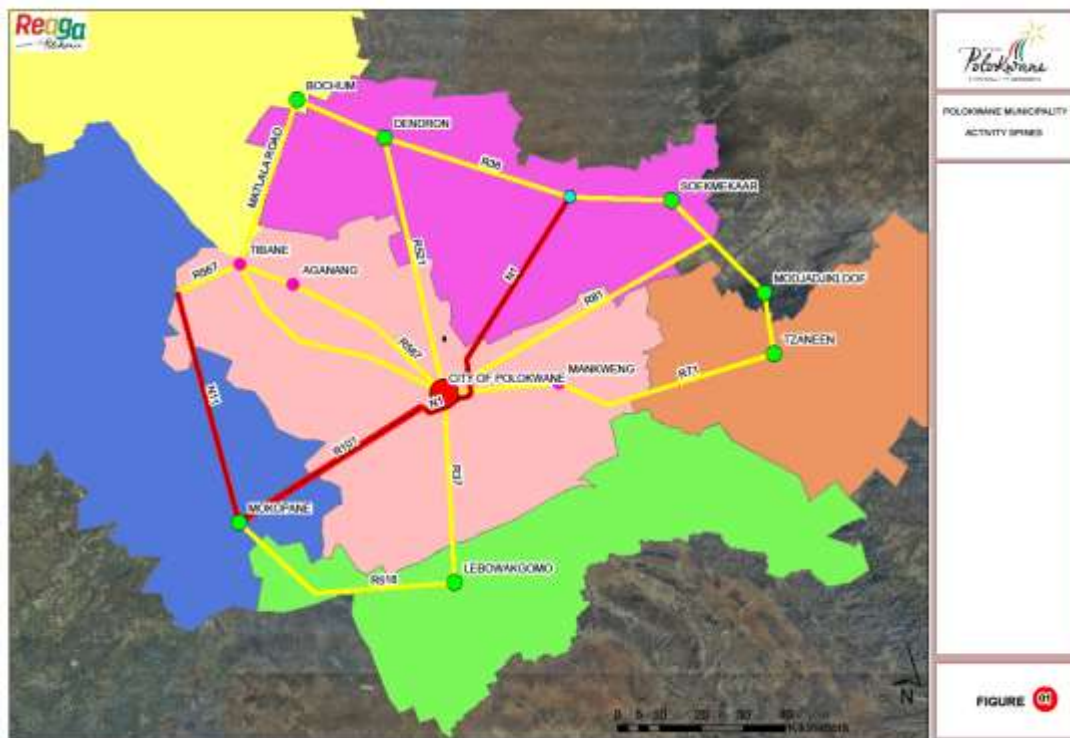

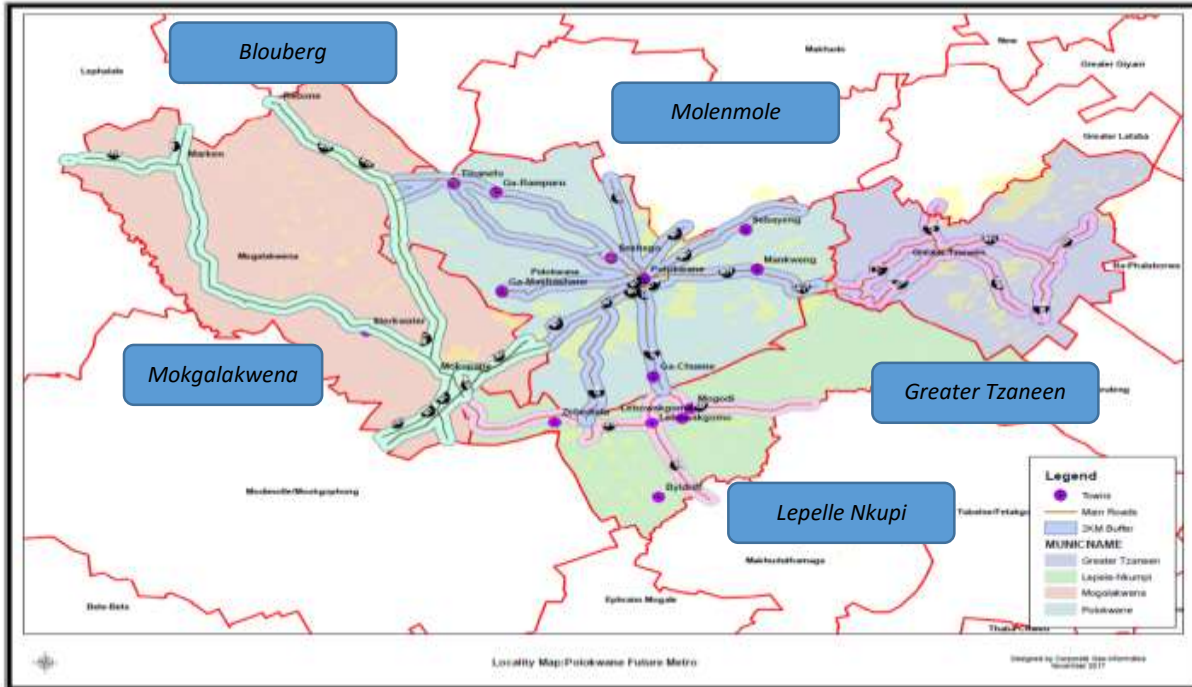

(a) a conurbation (continuous network of urban communities) [metropolitan] featuring-

- (i) areas of high population density.
 - (ii) an intense movement of people, goods, and services.
 - (iii) extensive development; and
 - (iv) multiple business districts and industrial areas.
- (b) a centre of economic activity with a complex and diverse economy.
- (c) a single area for which integrated development planning is desirable; and

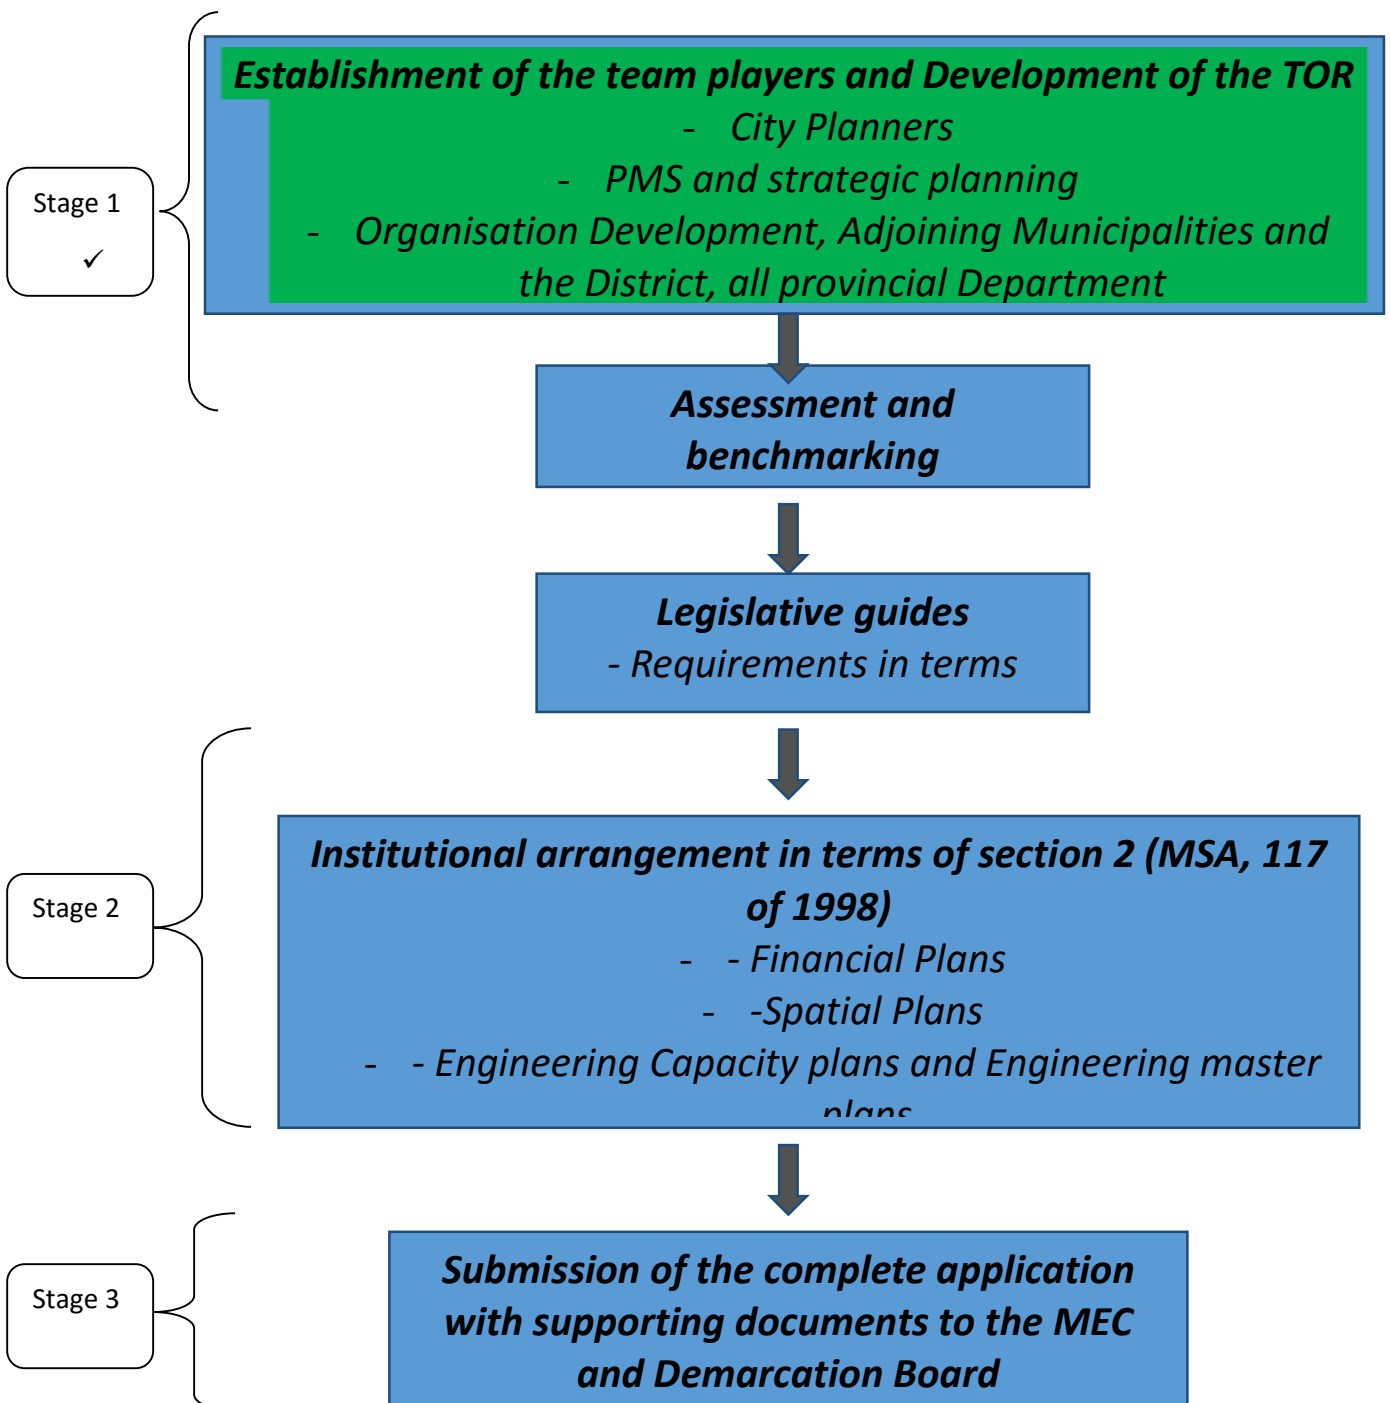

(d) having strong interdependent social and economic linkages between its constituent units. Should apply to the relevant authority for consideration and such application should be assessed looking at the above criteria and other requirement that the demarcation board may require.

Alignment with adjacent Municipalities and road networks

The above structure will be updated and used for the purpose of identifying the key role players in preparing the Municipality in to be **Category A Municipality**

2.18.8. ROAD MAP TO METRO

2.19. IDENTIFICATION OF LAND FOR STUDENT ACCOMMODATION

Erf 20802 – 20815 and 20818 – 20821 Polokwane Extension 106 zoned Residential 3 have already been advertised for **student accomodation**. Some other erven in Polokwane Extension 79 also advertised for high density residentail developments. Additionally Council

has adopted the CBD Urban Renewal Strategy of which one of its objectives was to identify a strategy to curb illegal accommodation and devise a means for student accommodation. The area in downtown CBD is in such a decay state, and vulnerable students are residing here in appalling state.

The list of five institutions namely the **University of Limpopo**, **UNISA Polokwane Campus**, **TUT Polokwane Campus**, **Capricorn FET College**, **Boston City Campus** and **Business College** which developers and the Municipality could partner with in order to meet the demand for student accommodation within the CBD. Only three of these institutions currently have accommodation available - **University of Limpopo located in Mankweng**, **TUT Polokwane Campus and Capricorn FET College** both located in Polokwane Town.

The majority of illegal land uses are located within the north-western part of the CBD as depicted (Buite, Boom, Bok, Dahl, Devenish, Excelsior and Onder Street). The majority of illegal land uses relate to student boarding accommodation and rental units, (approximately 33 properties), Some of the most serious problems associated with illegal land uses are illegal water/ electricity connections and temporary partitions within building structures. Amongst others, large numbers of people (up to 20 and more) use existing houses for informal accommodation purposes. Plans to acquire the subject land is one of the priorities for affordable student housing and or social housing. Block 1 to 6. The **Map Below** indicate the location of block 1-6.

Number 7 to 8 can be open for the mixed use for the city main library, open market on the 2-4th floor while the ground floor can be used as City parking or taxi holding as currently being used.

2.20 LEGISLATIVE AND POLICY CONTEXT

The Spatial Analysis chapter and the development growth of Polokwane Municipality is guided by the following legislative and policy frameworks:

- i. The Constitution of the Republic of South Africa (108 of 1996)
- ii. Spatial Planning and Land Use Management Act (16 of 2013)

- iii. Spatial Planning and Land Use Management Regulations: Land Use Management and General Matters, 2015
- iv. National Development Plan, 2012
- v. Town Planning and Township Ordinance 15 of 1986 to be repealed by the
- vi. Polokwane Economic Growth and Development Plan, Vision 2030
- vii. Administration and Control of Townships Regulations R293 of 1962
- viii. Proclamation R188 of 1969 Regulations
- ix. Communal Land Rights Act (11 of 2004)
- x. Upgrading of Land Tenure Rights Act (112 of 1991)
- xi. Interim Protection of Informal Land Rights Act No 31 of 1996
- xii. Extension of Security of Tenure Act (Act no. 62 of 1997)
- xiii. Prevention of Illegal Eviction and Unlawful Occupation of Land Act No 19 of 1998
- xiv. Restitution of Land Rights Act No 22 of 1994
- xv. Land Administration Act No 2 of 1995
- xvi. National Environmental Management Act No 107 of 1998
- xvii. Planning Profession Act No 36 of 2002
- xviii. LIBRA, Act 5 of 2003 and its regulation (Limpopo Business Registration Regulations 2015)

The next Housing Analysis will therefore be guided by the following legislative and policy frameworks:

- i. National Housing Act (107 of 1997)
- ii. Breaking New Ground, 2005
- iii. National Housing Code, 2009
- iv. Rental Housing Act (50 of 1999)
- v. Limpopo Housing Act (2 of 2006)
- vi. The Social Housing Act (16 of 2008)

2.21 Catalytic Land Development Programme in support of the CEF.

Below are the **9 key catalytic projects** that will unlock economic growth in those spaces and contribute towards job creation and ultimately reduce unemployment in the City of Polokwane.

2.21.1 Science Park

Science and Research Park to be establish at Weltevreden Farm at the southern part of the new interchange at N1-By-pass. The Municipality has already **awarded the land** amount to **274ha land** for development of the Science Park of which the studies has already commenced. Limpopo connection is currently conducting **Environmental Impact Assessment (EIA)** and engineering capacity assessment. The development form part of the **Dilokong Corridor** in support of the National Development Plan (**NDP**).

2.21.2 Arts and Cultural Hub

Bakoni Malapa arts and cultural hub as proposed will support the issues of artists in terms of the **film and recording studio, theatre, incubation stall.**

This will increase tourism at the Municipal facility. That will form belt of the **sport precinct** as proposed in the **SDF**, that stretches from Peter Mokaba stadium. The Feasibility study (**DSAC**) and Township Application processes funded by the Polokwane Municipality. Bulk engineering services to be provided by Polokwane Municipality to the area and funded under the IUDG. This project is part of implementing the **CEF**.

2.21.3 Industrial Park or SEZ N1 North Corridor

- **Industrial Park or SEZ N1 North Corridor** site identification around the **airport** will be a key towards **application for the expansion of the Municipal Boundary further to the North** in order to cater for at least **200km²** of land.
- Since the northern part of the City border with the **Molemole Municipality** just **5-10KM** from the City, it is prudent that Polokwane Municipality start with application to request the expansion of its Boundary (land) to at least **40km** from the current boundary to includes the SEZ or Industrial Park development.
- Municipality has received Lots of proposals for Townships by private developers of which that is encouraging in the area for Facilities such as Tertiary education facility (admin block, faculty departments, on campus student housing, warden housing, recreational facilities). Public garage, convenient shopping centre and food court to be assessed based on the Spatial Development Framework of the Municipality. The revised SDF has included the extending of the urban edge for support of the proposed SEZ/Industrial Park and Development within the earmarked areas. The initiatives will support Job creation and Economic Growth.

2.21.4 Agro processing

- **Agro-processing** - the support for the proposed development concept is centred on the **Logistic and Agro-processing** taking advantage of the transport modes available that includes:
 - **Air network (airport).**
 - **Rail network (railway Station).**
 - **Road's network (Bus, taxi station).**

- The Municipality will take advantage over the identified **Musina /Makhado SEZ and Tubatse SEZ** as Logistic Hub.
- Polokwane as a Capital City of Limpopo Province is also a gateway to Africa and rest of the World.
- Several MOU were signed for trade with the African Countries and the Municipality intend to participate in the market to boost in the **Economic Growth** through Manufacturing and processing of **raw materials**.

2.21.5 TOD precinct

Transit Oriented Development (TOD):

TOD precinct –will be development phases as part of supporting the **SEZ**: airport corridor or industrial parks. The TOD precinct development will include **truck inn**. All the roads from the SADC connects to Polokwane CBD. The massive industrial sites connect with the said modes of transport. Good positioning of the Land use with are compactable with each other and further be supported by the vast land available for future development. The Council has already release land for the feasibility by the Directorate Transportation to establish the **Truck inn**.

2.21.6 Softball stadium

- **International Softball stadium** - Polokwane Municipality has receive funding from **SRSA** through the **UIDG** to **design and construct** an international softball stadium over the **next 3 years**.
- **30M** was budget allocated for the 2020/21 FY.
- Polokwane Municipality has made a **pocket of land available** within its **sport precinct hub** for this development.
- The Concept designs have been approved with all stakeholders.
- The municipality is engaging **DCOG** support on maximisation of this project to showcase Real-time spatial transformations,

2.21.7 Post incubation Hub

- **Post incubation Hub** - the intension is to lease and develop a park with the aim of providing the alternative and opportunity to us **incubates and investors** that we attract during our Marketing.
- **Pharmaceutical company, charcoal Manufacturing Company** supported by government have already shown interest.
- The project is budgeted, and it is currently in finalisation of installation of services.

- **Engineering assessment completed** and the **taring and fencing** to be advertised for the contractor.

2.21.8 Academic Hospital

- **Academic Hospital** - Polokwane Local Municipality **and Edu park donated** remaining Extent of Erf 6861 Pietersburg Extension 30, measuring **19.90 Hectares**.
- The aforesaid Donation was in line with a Council Resolution as approved.
- Council Resolution contain conditions which the Done must comply with before the transfer of the ownership:
- **Rezoning** Application completed:
- Attorneys has been appointed to attend to the transfer of ownership of land.
- Land released, amended finalised for donation to the **Department of Public works**.

2.21.9 Eco-Estate at Game reserve

- ❖ **Eco-Estate at Game reserve** -proposal for the **Eco-estate** will boost the Polokwane Game reserve for **tourism and accommodation facilities** and attract **investors** on the South eastern part of the City as the **future expansion** of the City.
- ❖ This will be a **high marketed residential development** where man is in contact with nature.

2.22 Progress on priority/ Catalytic Land Development Programme.

CATALYTIC PROJECT NAME	PROJECT STATUS QUO DATE	PROJECT OWNER & PROGRESS (MUNICIPAL OR PROVINCIAL DEPARTMENT)	INVESTMENT TO DATE and (area of projects as per the Spatial Plans)
	23 August 2021		
1. 2.24 Intergovernmental Planning

Polokwane Municipality is part of the **provincial infrastructure committee and other committees as per the directorates** that report to **HOD's** forum and presented to the **Exco-Lekgotla (Province)**. All planned projects from the **SONA, SOPA**, and District are aligned to the Municipal plans for implementation and the **CEF**. The Municipality also form part of **other forums** at the **District level** such as:

- ❖ Provincial Intergovernmental Structure.
- ❖ National Planning forums (**SPLUMA, LED, Human settlement**).
- ❖ District Intergovernmental Structures: i.e.
- ❖ **Mayor Forum**
- ❖ **MM Forum and other technical forum**
- ❖ **Speaker Forum**
- ❖ **Communicators Forum**

2.24.1 Intergovernmental Projects in progress

The Municipality has identified a number of key spatial targeting areas that will further compliment the priority development areas and other areas within the municipality.

Intergovernmental Projects in progress

Brownfield Development	Greenfield Development
<ul style="list-style-type: none"> • Urban renewal projects in the CBD- Polokwane Towers • Urban renewal projects in the CBD - Mixed housing around Buite and Bok Streets • Urban renewal projects- Transit Oriented Development (TOD) around Itsoseng, bus station, Train station and Airport. • Housing – Mixed housing (Social, Gap and Student housing) • Industrial Development - Light industries development (small scale industries) to partner with Department of Small Business 	<ul style="list-style-type: none"> ▪ Polokwane Mixed Housing Development (leased properties) ▪ Science Park by LEDET (LEDA project) ▪ Commercialisation of the Strategic Assets such as the Game reserve for mixed use ▪ Development of the Arts and Cultural HUB (Bakoni Malapa) (Polokwane and DSAC) ▪ Logistic or Cargo Hub and Agro-Processing Hub to support SEZ (Feasibility study) ▪ Softball stadium (On Going) jointly with National Department of Sports and recreation. ▪ Academic Hospital (planning) land released for Department of Health and Social Development and Public works

Source: PLK Town Planning SBU

2.24.2 Pilot Projects for Inter-Governmental Planning

(A). International softball stadium

Polokwane municipality has received funding from SRSA (National **Department of Sports & Recreation South Africa**) through the **UIDG** to **design and construct an international softball stadium** over the next **3 years**. **R24.7 M** was allocated in the year **2020/21 Fy**.

Council has made available a **pocket of land** within its sport precinct hub for this development. **Concept designs** have been **approved** with all stakeholders. The municipality is engaging **DCOG** support on maximisation of this project to **showcase Real-time spatial transformations**.

(B). Provincial State Theatre

The National Department to design and construct **provincial State Theatre**. **Provincial Treasury** allocated approximately **R20 Million**; and additional allocation will be requested from **National Treasury** for 2021/22 Fy. Polokwane Municipality has budgeted **R2 Million** for 2020/21Fy-2021/22Fy for **Planning process**.

The Municipality has further budgeted **R10 Million** for **short term Engineering services** for 2021/22Fy. Council has made available a **pocket of land** within its **Bakoni Malapa** for feasibility study for this development. The **DSAC, Public works, Treasury** has already budgeted the cost associated with the project of Provincial State Theatre to be developed as

from the February 2022. Planning has commenced in order to support on maximisation of this project to **showcase Real time spatial transformations**.

2.25 IUDF Implementation to Date

COGTA introduced a consolidated grant (**IUDG**) for Intermediate City Municipalities (ICM).

Polokwane and **uMhlathuze** were identified as the **two pilot** municipalities. The ICM program aims at supporting the Municipalities in areas of Spatial Planning, Infrastructure/Capital projects and preparing financial access to the new **IUDG grant**. As such, the municipalities were requested to develop a **Capital Expenditure Framework**, which is a **long-term infrastructure plan** that flows from a **Spatial Development Framework (SDF)**. The process of developing the Capital Expenditure Framework was approached by dividing it in **3 different CEF Modules**.

- 1) **Module 1: Planning,**
- 2) **Module 2: Infrastructure,**
- 3) **Module 3: Finance**

2.25.1 CEF Modules Progress Status Quo.

- 1) **Module 1: Planning** was more focused with the Spatial Transformation Agenda, which involved dividing the municipal in functional areas, in this instance went further to priority development areas. **Development strategies for the above-mentioned areas has been developed. The Functional Area 4 developed as part of the CEF submission.**
- 2) **Module 2: Infrastructure** was more focused on technical assessments, which involves, **backlogs and capacity** being guided by development strategies completed in **Module 1 of Planning**. The module will indicate the backlogs, existing and required capacity of bulks and networks in the coming years.
- 3) **Module 3: Finance** is more focused on the long-term financial plan (**assumptions and projections**), which involves a fit on the development strategies for functional areas by **identified by planning**, together with the backlogs and need **outlined by infrastructure**. An analysis should also be provided to ensure staying within affordability margin.

2.25.2 Capital Expenditure Frameworks (CEF) Status Quo

Polokwane Municipality has concluded all three modules and the CEF was approved by the Cogta and Council as a Business plan to be aligned with the IDP and Budget.

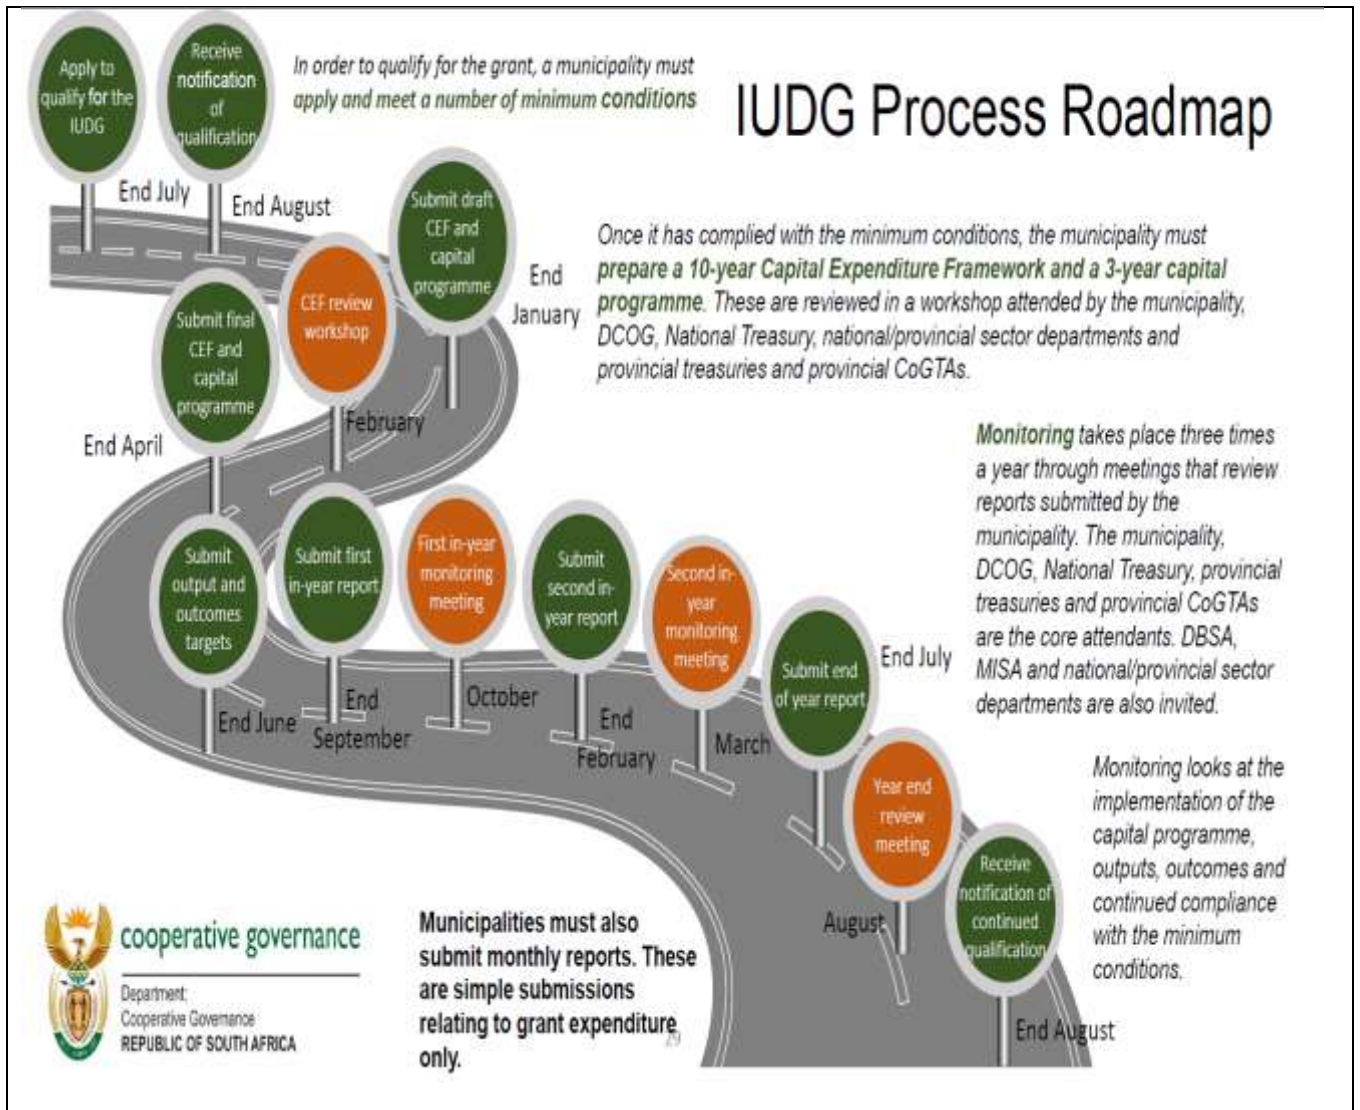

The draft revised Capital Expenditure Framework Report was planned to be ready on the 25th January 2020, but due to downward adjustment of Budget and COVID 19 affected the program. Comments and inputs were received during the budget adjustment and will be considered once Cogta guides on the revised CEF Report.

Currently, Planning SBU is concluding its section in the CEF report. The presentation on **Module 1: Planning** was presented, and all inputs and comments Received have been included.

Module 2: Infrastructure – under review and soon to be concluded, the different infrastructure sections to finalize their submissions

Module 3: Finance is currently also in a process of developing the financial plan being guided by the above 2 Modules. The revised draft CEF (Capital Expenditure Framework) report will be submitted for inputs and comments (The downward budget adjustment has affected the overall projection and planning Process of the CEF. The final submission of the Revised CEF report is planned **June 2021**).

2.26 IUDG Process Roadmap followed.

Source: Cogta Guide IUDG Process Roadmap

2.26.1 CEF Success and Challenges

Success	Challenges
<ul style="list-style-type: none"> • Approved CEF aligned with the IDP. • Well defined spatial targeted area in line with the SDF. • Well defined projects with funding (External and Leases). • Possibility of attracting investors in ideal location. • Driving the spatial agenda of the City. 	<ul style="list-style-type: none"> • Alignment and unfunded budget due to community needs analyses. • Unequal Share due to Municipal community's composition (Urban 30% and Rural 70%). • Financial sustainability due to culture of non-payment. • Budget vs Community needs. • Prioritisation of projects and their return.

Source: PLK Town Planning SBU

2.26.2 Impact of the adjustments budget on CEF priority projects

The adjustment of the CEF and **resubmission** to National Treasury. Reducing the planned projects guided by available budget. Community redress on the planned and pronounced projects. Rescheduling of the Projects and planned program of implementation have been moved to outer **years**.

2.26.3 IUDF Levers

After careful consideration of the **Smart City Pillars** of the Municipal **long-term vision**, the **IUDF levers** are well presented in the projects that are to be implemented within the **CEF**. All **9 levers** as presented below has sharpens our approach when integrating the Municipal Planning and the other sphere of government and **SOE** as presented on the catalytic projects.

2.26.4 District Development Model (DDM) Progress

Capricorn District Municipality held a successful **launch** of the District Development Model (DDM) on **07 February 2020**, at Polokwane Aganang Cluster Sports Ground, Ceres Village in Polokwane Municipality. Polokwane Municipality **participate in** the Development of District Development Model as part of the Local Municipality within the Capricorn District (**CDM**). All plans and engagement are attended as part of alignment of the planned programme.

2.27 Challenges experienced in endeavor to seek integration and collaboration.

(A) Misalignment of Planning Cycle for Municipalities and Sector Departments.

The introduction of the **IUDF and DDM** in dealing with the alignment of the budget and intergovernmental projects pave the positive input to foster such relationship. Alignment of the Spatial Planning and project from the national, province, district and local municipality **SDF** as categorised by the **SPLUMA** is becoming a key in directing where investment should be prioritised.

(B) Priority Interventions that must be addressed dealing with the community needs.

Priority should be given to Municipality Funded **mandate projects** in the IDP and Unfunded **mandate Projects** Should be referred to the Relevant Department to address the need (e.g., **Library**). **Such** projects should be addressed by the DDM. Effectiveness of the forums on the priority projects and monitoring. Grants alignment vs Priority needs on the ground.

2.28 Approved Land for New Leases

The Council of Polokwane has approved about **21 properties** within the established township (**Brownfield development**) and 6 portions of farms (**green field development**). Notice on intention to lease the land was released and two objections received and address since they were related to water. Notice for invitation of bids in underway as per the resolution of Council

2.29 Sales of sites –City Planning and Properties

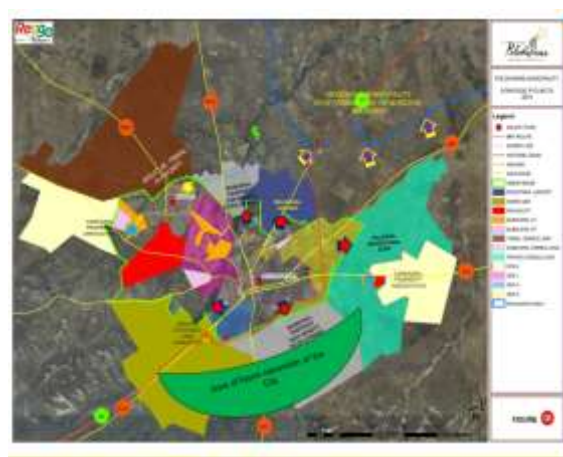

Progress with the sales of sites:

- ✓ Polokwane X 72
- ✓ Polokwane X 79
- ✓ Bendor
- ✓ Nirvana X 3
- ✓ Flora park

ESTABLISHED TOWNSHIP SERVICES COST: Water and Sanitation

Township servicing

Land Ownership & Future needs

2.30 Progress Report on Aganang Township Land

City Planning and Property management SBU has initial prepared the report for submission to the Council. The land was having the suspensive condition that the Municipality has failed to conclude on the following basis. The Department of Agriculture and Rural Development has to releases the land. To date, the Municipality has managed to achieve all outstanding issues that are within the Municipal Control such as the Approval of the Surveyor General Diagram

for the initial Township and land for extension. After several letters sent and requested, that delay by the Department has caused the delays and is still awaiting the land release. Community resolution was provided with the SG diagram but no response by the Department.

This project was dated back in 1995 and 2005, but with no success of land release. The Traditional Authority has alternatively requested for the withdrawal in order to finalise the township using the private developer. The report was considered by the Council as requested by the Traditional Local Authority.

2.31 CORPORATE GEO-INFORMATICS

The City of Polokwane has established the Corporate Geo-informatics SBU under the Planning and Economic Directorate in order to handle all GIS related Mater in the Municipality.

GIS is an abbreviation for '**Geographic Information System**'. It is a computer-based tool used to store, overlay and distribute spatial data of the same geographical area to be able to apply manipulation, queries, analyse and presentation of the data to enhance decision. GIS is a critical tool that supports a number of municipal legislative requirements contained in the Municipal System Act (No. 32 of 200), the Municipal Structures Act (No. 117 of 1998), and the Spatial Data Infrastructure Act (No. 54 of 2003), the Promotion of Access to Information Act (No. 2 of 2000) and the Property Rates Act (No. 6 of 2004).

Most importantly, GIS is a vital tool to support the Municipal Integrated Plans (**IDPs**), undertaken in accordance with the Polokwane Spatial Development Framework (**SDF**) and with projects have a recorded spatial location.

GIS is the only technology that will allow the City of Polokwane to manage its assets spatially in an interactive environment and thereby ensure that all municipal assets are managed electronically.

The SBU: Corporate Geo-Informatics is expected to make a significant contribution to the planning process in the municipality. Currently, the SBU is working on ensuring that **Revenue SBU** receives clean and accurate **Property data** which will enable accurate **billing** of properties.

A spatial land audit that is GIS based will be conducted to support the Spatial Development Framework and Land Use Management System in the municipality. GIS will play a pivotal role in the maintenance and monitoring of these plans as they change overtime. For example, **Municipal boundary demarcation adjustment**, land subdivision and ownership transfer, amendment schemes and urbanization.

Professional Land Surveyors are not limited to preparing plot plans and placing boundary markers. In addition to being experienced in all types of land surveying and Geomatics

services, they consult and incorporate the use of technological innovations and data management techniques as it relates to our communities and infrastructure.

Utilizing products like online Geographic Information Systems (GIS) that help municipalities **manage their assets**, save time and efficiently deploy resources; quickly provide the accurate spatial data, boundary definitions and geo-referenced information clients need to move their land development or infrastructure projects toward successful completion.

Surveyors always play a key role in **urban planning**, responsible for data collection and for the management of different design and engineering plans such as transportation, water system, and power system plan using proper metric standards (e.g., coordinate system, accuracy, drafting specifications, etc.).

2.31.1. INTEGRATED GIS SYSTEM

The **integrated GIS system** - With this system, the City of Polokwane will have an integrated system where the majority of systems that were **running independent** of each other will be running from a federated platform underpinned by geographic information system (GIS) or spatial data. The municipality will for the first time empower all of its employees and its customers with relevant information that they'd need when carrying out their responsibilities.

The City of Polokwane being the largest business hub in the Limpopo Province and being the most strategically located City in the heart of the Limpopo, it attracts all major economic opportunities and play a significant role in the socio-economic space by providing the best services to its residents. The municipality also as a population concentration centre where people from all walks of life migrated to the City in search for a better life. In order for the City to plan better and efficiently, the use of spatial data become paramount to the City's planning and development. The municipality has since embarked on a journey to become one of the role players in the data driven institutions in the country.

The Integrated Geographic Information system has been developed to streamline and improve the institutional business process flow and to restore customer confidence in the institution by providing efficient and reliable services.

The introduction of the integrated GIS system in the municipality is aimed at transforming the organization to a point where every person or official/s who make use of the spatial data to make well informed decisions, have access to spatial data and its attributes at all times. The system integration in the municipality is designed to empower the Council decision makers

such as SBU's Managers, Directors and Municipal Manager (MM) to explore data independently even if one is working with data from various sources.

The new technology (Integrated GIS System) has made it possible now than ever to capture, store and manipulate large quantities of data in a more cost-effective manner. The integrated GIS system gives decision makers a competitive edge in the sense that it does not only prove them with reports on what had happened but rather report on what is happening, e.g., **Town Planning Application Management Module System (TPAMS)** provide town planners and management a real time feed on those applications that are being processed by the municipality. Similar protocol is being followed with **Building Plans Application Management System (BPAMS)** and **Cemetery Management System (CMS)**.

The integrated GIS system function as a tool through which the various databases or systems that were running independent of each other will now be accessed and managed from a **single central point** with map enabled functionalities.

The advantages of using such a system are that end users need not be academically trained to navigate through the various platforms. The following application modules form part of the integrated GIS System:

2.31.2 Modules that form part of the integrated GIS System

- a) Land Information Management System (**LIMS**)
- b) Town Planning Application Management System (**TPAMS**)
- c) Building Plans Application Management System (**BPAMS**)
- d) Cemetery Management System (**CMS**)
- e) Billing Information Management
- f) Document Management System
- g) Infrastructure Asset Management
- h) Valuation Roll

For quick access to any of the above listed module please click the link below and you will be taken to the Polokwane Integrated GIS System landing page.
<http://gis.polokwane.gov.za/polokwanewebpage/>

2.31.3 Challenges and Intervention of GIS

Challenges	Intervention
<ul style="list-style-type: none"> ▪ Lack of both GIS and Land survey technicians. ▪ Illegal land subdivision and consolidation leads to spatial data inaccuracies and may affect municipal billing system. ▪ Lack of cadastral data from rural areas leads to poor and improper forward planning. ▪ Lack of a GIS strategy to guide the municipality with regards to the use and maintenance of spatial data. ▪ In adequate budget allocation. ▪ Lack of update imagery to assist in supplementary valuation. ▪ Difficulty in tracking development pattern/ city growth due to lack of updated imagery. 	<ul style="list-style-type: none"> • The integrated GIS model is being updated • The upgrade of the system will be integrated with the financial system (Munsoft) to ensure accurate billing at all times. It will further assist the municipality in visualising all IDP projects spatially. • In order for the City to plan better and efficiently, the use of spatial data become paramount to the City's planning and development. • The Integrated Geographic Information system has been developed to streamline and improve the institutional business process flow and to restore customer confidence in the institution by providing efficient and reliable services.

Source: PLK GIS SBU

2.31.4 Successes of Corporate Geo-Informatics SBU

Despite all the challenges mentioned above the SBU: corporate Geo-Informatics had brought in the following successes within the Directorate. Below is the list of **Success** for the SBU.

- Successfully implemented seven **(7)** of the eight **(8)** modules.
- Through the full implementation of the integrated GIS system, the municipal authority will be able to track all land development applications right from the moment the application is lodged with the municipality to the decision stage.
- Revenue SBU will receive accurate property information for accurate billing.
- The system will make it easy for authorities and municipal officials to draw statistical reports from the system which will pass the audit master's test.
- Continues with the support for site identification across the municipality.
- The SBU plays an important role in revenue data, IDP project spatial presentation and correct presentation of the valuation roll.

- Assisted service providers who are carrying out municipal duties by rendering its technical services such as land surveying and spatial data dissemination to minimise errors and save Council its resources.
- The collaborative work between GIS and Revenue unit has resulted in the billing having accurate data which reduced the amount of dispute from members of the community. However, the process of updating and correcting the data on both the Billing and GIS system is continuous.
- The SBU is currently engaging with other relevant departments streamline the flow of spatial data in the municipality.
- The municipality has successfully entered into an enterprise license agreement (ELA) with ESRI South Africa for a period of three years. This will enable the municipality to improve in its service delivery as mandated by municipal structures act.
- The SBU has successfully resolved all the boundary dispute that were lodged with the municipality during the period under review.
- The relocation informal settlement residence from Polokwane Extension 106 and Freedom Park to Polokwane Ext 126 and 127 was made possible with the help of Land survey unit.
- Mapping of all municipal strategic capital projects as reflected in the IDP.

2.31.5 Role of GIS in the City of Polokwane

The City of Polokwane has been using GIS technology for over **10 years**, and this technology has proven to be a catalytic tool when it comes to decision making relating to land development and other related activities. Therefore, various SBU's either directly or indirectly make use GIS in carrying out their functions. But even though the tool has been in the City of Polokwane for many years, the system has not been fully utilised.

With the Introduction of **Integrated GIS System**, this means that the use of spatial data ought to be placed right in the hands of the people who are taking decisions on land development matters. The consolidation of various systems into GIS platform is one way of allowing for automatic updating of information that can be seen by everyone at the same time and this will eliminate the duplication of work by different SBUs and will ultimately lead to efficient productivity and save municipal resources. This merely shows that the Corporate Geo-informatics SBU has a major role to play in realising the municipality's **Smart City 2030** vision.

2.32 Economic Development and Tourism

2.32.1 Introduction

The SBU has four (4) sections: i.e.

- 1) Investment Promotion and Tourism
- 2) Enterprise Development.
- 3) Business Compliance and Regulation.
- 4) Economic Research and Development.

2.32.2 Local Economic Development (LED) strategy

Polokwane Local Municipality's (PLM) 2020-2024 Local Economic Development (LED) strategy. The strategy advocates for the strengthening of the multi-sectoral response against the rising levels of unemployment, inequality and poverty facing PLM. The strategy was launched at a time when the local economy is facing one of its worst crises in history. The pace at which the economy is growing is not sufficient enough to take care of the mounting socio-economic needs of the local population.

The strategy provides a “package of game changing solutions” to some of the socio-economic challenges. In partnership with other stakeholders Provincially and Nationally, Economic Development and Tourism Unit leads efforts in ushering the local economy on the path of a turnaround. With the unwavering support of all social partners (labour, private sector and all spheres of government), the idea to create an inclusive local economy with a high job absorption capacity (as cherished in the National Development Plan (NDP), the Limpopo Development Plan (LDP) and the Integrated Development Plan (IDP)) is still feasible.

_This strategy gives effect to objective No 3 of section 152 of the constitution. Objective No 3 underscores the need for PLM to design and implement impactful strategies that improve the socio-economic conditions of local communities. Due to changes in the local economy over the past 10 years because of shifting global, national and provincial contexts, PLM took a decision to review its 2008 LED strategy in order to realign it with its **2030 Economic Growth and Development Plan (EGDP)**._The triple crisis of poverty, unemployment and inequality remain the Municipality's unresolved developmental challenges. This strategy outlines some of the measures PLM intends to implement in the next five years (2020/2024) to address some of these developmental concerns.

2.32.3 Highlights of the Local Economic Development Strategy:

1. VISION 2024

“Towards a job absorbing economy”

2. GOALS

- i. Reduction of unemployment rate
- ii. Report a steady GVA growth rate
- iii. Improve ease-of-doing business
- iv. Promote economic inclusion and social cohesion
- v. Enhance development coordination capabilities

3. STRATEGIC OBJECTIVES

- i. Prioritization of high job creation investments
- ii. Unleash sectoral potential and growth
- iii. Enhance investment competitiveness
- iv. Widen access to economic opportunities and choices
- v. Strengthen multi-sectoral response

2.32.4 Local Skills Base on LED

Education is important to the economic growth in a country and the development of its industries, providing a trained workforce and skilled professionals is required. The education measure represents the highest level of education of an individual, using the 15 years and older age category. (According to the United Nations definition of education, one is an adult when 15 years or older. IHS uses this cut-off point to allow for cross-country comparisons. Furthermore, the age of 15 is also the legal age at which children may leave school in South Africa).

Within Polokwane Local Municipality, the number of people without any schooling decreased from 2011 to 2021 with an average annual rate of -3.82%, while the number of people within the 'matric only' category, increased from 112 759 to 163 908. The number of people with 'matric and a certificate/diploma' increased with an average annual rate of 7.00%, with the number of people with a 'matric and a Bachelor's' degree increasing with an average annual rate of -0.13%. Overall improvement in the level of education is visible with an increase in the number of people with 'matric' or higher education.

HIGHEST LEVEL OF EDUCATION: AGE 15+ - POLOKWANE, CAPRICORN, LIMPOPO AND NATIONAL TOTAL, 2021 [NUMBERS]

	Polokwane	Capricorn	Limpopo	National	Polokwane as % of district	Polokwane as % of province	Polokwane as % of national
No schooling	20,455	48,529	256,016	1,444,565	42.15%	7.99%	1.42%
Grade 0-2	5,285	9,443	50,024	432,804	55.97%	10.57%	1.22%
Grade 3-6	28,473	50,938	241,425	2,598,612	55.90%	11.79%	1.10%
Grade 7-9	73,818	124,583	583,919	5,783,491	59.25%	12.64%	1.28%
Grade 10-11	132,332	214,438	1,015,843	9,785,628	61.71%	13.03%	1.35%
Certificate / diploma without matric	6,892	9,895	33,081	169,179	69.64%	20.83%	4.07%
Matric only	163,908	232,100	892,454	12,974,900	70.62%	18.37%	1.26%
Matric & certificate / diploma	63,726	89,155	302,954	2,705,345	71.48%	21.03%	2.36%
Matric & Bachelor's degree	21,657	27,063	80,388	1,558,606	80.02%	26.94%	1.39%
Matric & Postgrad degree	11,887	16,071	49,909	956,828	73.97%	23.82%	1.24%

Source: IHS Global Insight 2022

The number of people without any schooling in Polokwane Local Municipality accounts for 42.15% of the number of people without schooling in the district municipality, 7.99% of the province and 1.42% of the national. In 2021, the number of people in Polokwane Local Municipality with a matric only was 163,908 which is a share of 70.62% of the district municipality's total number of people that has obtained a matric. The number of people with a matric and a Postgrad degree constitutes 73.97% of the district municipality, 23.82% of the province and 1.24% of the national.

Functional literacy

Functional literacy describes the reading and writing skills that are adequate for an individual to cope with the demands of everyday life - including the demands posed in the workplace. This is contrasted with illiteracy in the strictest sense, meaning the inability to read or write. Functional literacy enables individuals to enter the labour market and contribute towards economic growth thereby reducing poverty.

FUNCTIONAL LITERACY: AGE 20+, COMPLETED GRADE 7 OR HIGHER - POLOKWANE LOCAL MUNICIPALITY, 2011-2021 [NUMBER PERCENTAGE]

Financial Year	Illiterate	Literate	%
2011	79,686	430,475	84.4%
2012	79,538	440,223	84.7%
2013	80,501	448,377	84.8%
2014	80,630	458,180	85.0%
2015	80,187	468,762	85.4%
2016	79,727	478,442	85.7%
2017	78,428	488,361	86.2%
2018	75,790	499,961	86.8%
2019	70,461	515,139	88.0%
2020	63,225	532,896	89.4%
2021	55,958	549,723	90.8%
Average Annual Growth			
2011-2021	-3.47%	2.48%	0.73%

Source: IHS Global Insight 2021

A total of 549 723 individuals in Polokwane Local Municipality were considered functionally literate in 2021, while 55 958 people were considered to be illiterate. Expressed as a rate, this amounts to 90.8% of the population, which is an increase of 6.40 percentage points since 2011 (84.4%). The percentage of illiterate individuals decreased on average by -3.47% annually from 2011 to 2021, with the percentage of functional literate people increasing at 2.48% annually.

Polokwane Local Municipality's functional literacy rate of 90.8% in 2021 is higher than that of Capricorn at 88.2% and is higher than the province rate of 86.0%. When comparing to National Total as whole, which has a functional literacy rate of 89.1%, it can be seen that the functional literacy rate is lower than that of the Polokwane Local Municipality.

In terms of the literacy rate for each of the regions within the Capricorn District Municipality, Polokwane Local Municipality had the highest literacy rate, with a total of 90.8%. The lowest literacy rate can be observed in the Blouberg Local Municipality with a total of 80.8%.

2.33 Status Quo of Programs and Projects of Economic Development

2.33.1 Investment Promotion and Tourism

The objective of the section is to market Polokwane as a tourists and investment destination. The Municipality has a potential of high growth and development potential for the economy to grow sustainably. The strategic location of Polokwane also offers opportunities and in addition

businesses that trade, transport and conduct business across the border should need a space of their own in Polokwane and this can only be achieved by promoting Polokwane and the advantages it offers.

Polokwane should be known for its advantageous business policies that incentivise development of desired uses in the municipality while offering a distinct competitive advantage when seeking access to the rest of the continent and providing great opportunities for businesses to grow and prosper. Marketing is a tool ever increasing in necessity for any industry and sphere. It also helps shape perceptions that dictate the emotions associated with the subject being advertised.

As part of a marketing strategy to attract, retain and promote investments and tourism within the Municipality, Polokwane needs tools in order to reach out and grab the attention of potential investors and businesses by bringing them to Polokwane to stay and invest. These tools include the use of media as well as structures present in Polokwane that offer growth potential and prospects for economic development; by highlighting the vision and goals Polokwane has and the plans being made to achieve these goals, it becomes increasingly attractive, and the goals become more achievable.

2.33.2 Types of Tourism industries found in Polokwane

1. Transportation e.g., car rentals
2. Accommodation
3. Food and Beverages
4. Recreation and entertainment
5. Travel agents
6. Tour operators
7. Tourist guides
8. Event Organisers
9. Health and Wellness

A number of strategies and platforms are utilised to market the Municipality, locally, nationally and Internationally.

\

2.34 Strategies used to promote Polokwane Municipality

Below are the Strategies that are used to promote the Municipality i.e.

- 1) Information Centre
- 2) Stakeholder relation

- 3) Tourism development
- 4) Marketing

2.34.1 Polokwane Visitor Information Centre (VIC)

The Municipality in partnership with Limpopo Tourism Agency operates a Visitor Information Centre that was built and donated to the Municipality by the **National Department of Tourism**. The centre provides tourism and investment information to the residents of the Municipality, National and International visitors. This is done through walk ins, telephone, email and other social media platforms.

Business is encouraged to partner with the Municipality and ensure that their information is available at the centre and the Municipality also has a database of all businesses operating within the Municipality which is revised often to ensure accuracy.

Polokwane Visitor Information Centre (VIC)

2.34.2 Stakeholder relations

The Municipality has assisted the tourism industry to establish a Tourism Association which the Municipality supports through the following:

- Secretariat services for the Association
- Venue for its meetings
- Procurement of marketing platforms
- Accommodation for the Executive members when they attend trade shows outside the Municipal boundaries

The Municipality also established a Local Economic Development Forum that comprises of business representatives and other Government Departments and Parastatals within the Economic cluster. The Municipality provides support by providing the following to the Forum:

2.34.3 Tourism Development

The Municipality in partnership with other institutions provides support to the tourism industry in order to develop tourism within the Municipality. This is done through the following activities:

- Training based on the skills gaps that are identified within the sector.
- Provision of marketing opportunities such as hosting of exhibitions
- Workshops
- Networking sessions for industry to collaborate.

Due to the limitations of COVID-19 pandemic the workshops and networking sessions have been impacted but new ways and platforms are being explored. The industry will have to adjust to the new ways of doing business.

2.35 Marketing

A number of platforms are identified to market the Municipality as an investment and tourist destination. The Municipality has been utilising the following platforms although COVID-19 has posed a challenge for some of the platforms. However, the Municipality is busy exploring new channels to be used in response the global challenge.

- Trade shows
- Exhibitions
- Adverts in identified platforms
- Social media
- Investor's Guide (Hard and E-Copy)
- Visitor's Guide (Hard and E-Copy)

2.36 ENTERPRISE DEVELOPMENT

Enterprise Development is one of the key focus areas within Economic Development and Tourism in Polokwane Municipality Integrated Development Plan (IDP) and is a provincial priority as stated in the provincial growth and development strategy. It is therefore essential that Polokwane Municipality support entrepreneurs not only through selected programmes but to be incorporated in the implementation of all projects geared towards providing service delivery to the communities. Services offered by Enterprise Development to all SMMEs and Cooperatives:

- SMMEs Database

- Skills Audit
- Business Profiling
- Capacity building and skills development
- Provision of access to market through flea markets and exhibitions.
- Conducting effective monitoring of projects/co-operatives /and SMME
- Provision of access to finance from other institutions
- Facilitate business to business linkages big or small

The Municipality has also provided Infra-structure in a form of facilities to promote enterprise development initiatives as described below:

2.36.1 Itsoseng Entrepreneurial Centre

Itsoseng Entrepreneurial Centre is an SMME Incubation Centre that was founded by Polokwane Municipality's Local Economic Development SBU.

Primarily, this manufacturing incubator was founded upon the need to provide development support services to SMME's involved in the strategic sectors of the local economy, especially manufacturing.

This initiative ties in with the targets of ASGISA and LDP, which among others, are employment creation and poverty alleviation.

In order to achieve this, LED SBU is conducts **Business Incubation Programme** aimed at providing intensive business counselling to SMME's that have a potential to grow into a successful business.

2.36.2 INCUBATION PROGRAMME AND ITS BENEFITS

Incubation programme is a three-year programme whereby SMME's will receive the following services:

- Business management advice
- Facilitation of access to finance
- Accounting/Bookkeeping systems advice
- Regular visits by Business Development Officer to ensure progress
- Trainings on specific skills needed by the SMME
- Linkages to markets
- Linkages to industry experts
- Assistance in marketing their business
- Access to key business information

ELIGIBLE CRITERIA AND ENTRY REQUIREMENTS:

To participate in this programme, SMME's need to complete and submit an application form at Itsoseng Entrepreneurial Centre 's office. The applicant must also meet the following criteria:

- The business must be located within the boundaries of Polokwane Municipality
- The business must be a manufacturing enterprise.
- The owner must be prepared to sign a three (3) year lease agreement with Polokwane Municipality and should also demonstrate intent to abide by all rules.

- The business must have been trading for at least 1 year or more.
- Business owners must be South African citizens
- Women and Disabled will be given first preference.
- Owners must submit proof of residence.

ITSOSENG ENTREPRENEURIAL CENTRE

Itsoseng Entrepreneurial Centre provide incubation program for SMMEs for a period of 3 years. Developmental support services to SMMEs is offered in different sectors of the economy with focus on manufacturing sector of the local economy. Our services include the following:

- Provision of subsidized rental services to SMME and Co-operatives
- Facilitation of access to market/market linkages.
- Facilitation of capacity building with other stakeholders
- Facilitations of access to finance to SMME and Co-op.
- Provision of other non-financial support services to SMME and co-op

The sectors that the center was designed to incubate 41 SMMEs who are doing mainly the following:

- Art & Crafts - Includes bead work, paintings, crafted products etc.
- Steelwork Includes welding, aluminum products, steel pipes, others steel products such as readily made shacks, toilets etc.
- Woodwork – Includes furniture, or any other wood products.
- Upholstery – includes furniture, car seats, leather work etc.
- Textile – include bags, shoes.
- Clothing – includes all types of clothes such as traditional, wedding, uniforms, evening wear and casual wear.

The center is established to provide SMME with incubation programme which offers services such as access to market, commercial and technical training, monitoring and evaluation, subsidized cubicles and other related enterprise developmental programmes. The facility has thus by far been very instrumental in promoting the plight of SMME and continues to play a critical role in advancing SMME development support.

2.36.3 BUSINESS SUPPORT CENTRES

The municipality has constructed stalls in some clusters in an attempt to offer support to emerging entrepreneurs. This forms part of the municipality initiative to provide business Centre development support programme. The following is the list:

i. Mankweng University gate 1 Center

The facility is located closed to University of Limpopo gates Offering various products to the student community and the general public around Mankweng The center has 86 Entrepreneurs provided with subsidies infrastructure by municipality. The main activity of SMMEs in the center is trading / selling of products and services such as fruit and vegetables, Pap and vleis, Fast food, shoe repair, IT, hair dressing general merchandise etc.

ii. Mankweng hospital gate Center

The facility is able to accommodate at least 58 SMME offering different types of ranging from food, veggies, etc.

iii. Limpopo cooks Center.

The municipality has allocated 24 units to SMME involved in cooking targeting taxi commuters and many other customers in town. Entrepreneurs undergo developmental training which focuses on aspect of health and safety and other commercial training to improve on their business.

iv. Knobel business center

The municipality has constructed 12 stalls to enterprises offering variety of services including among others, cooked food, fruit and vegetables, shoe repair etc. The facility assists patients who visits the hospital and also community members in an around the area.

V. Aganang business center

The facility is located at Aganang cluster office and has become instrumental in servicing the communities in the area. The municipality has allocated 12 stalls to SMME who sells food, maize, shoe repair etc.

2.36.4 Business Compliance and Regulation

Informal trade economy plays a large and vital role in the overall economy of Polokwane, Limpopo and South Africa as a whole as it forms the very livelihood for thousands of people. Informal Trade consists of economic activity outside the influence and control of institutions. The livelihoods of many people across the country are dependent on the informal economy, especially in rural areas and therefore it is vital to support and sustain this sector of the economy as well.

The objective of the section is to demarcate special areas for informal trade to take place, to regularize the informal economy and to have more efficient transformation from informal to formal economy.

Strategic Interventions The value of the informal trade sector should not be underestimated and/or discredited but should rather be harnessed and employed to stimulate growth in the economy of Polokwane. However, negative perceptions towards informal traders often exist

in Polokwane as this sector is regarded as caused excess pollution and chaos in the inner city. This notion is premised on the fact that no proper structures and trading spaces exist for entrepreneurs, and they therefore occupy any available area.

By implementing viable and manageable interventions for the informal trade economy, the benefits of this economic activity can be felt, and sustainable economic growth and development be supported. The management of these interventions and processes becomes an institutional function supported by the infrastructure developed to assist and cater for the needs of both the informal traders and the Municipality. The economic activities generated by informal trade can be improved by regulation of informal trade without going as far as formalizing the sector. The reason being that formalizing the sector can make advantages offered be lost and the efforts fruitless. Rather opportunity should be created that assist and support the informal trade economy and, in the process, create a better image of Polokwane.

Interventions are implemented for the development of informal trade in Polokwane.

The following interventions are implemented for the development of informal trade in Polokwane.

1. Management of Street Trading Permits:

Permits are issued for different categories/ sectors within the Municipality, and they are renewed monthly. There are **1031 permits issued** across different areas within the Municipality - City cluster, Seshego cluster, Mankweng cluster, Aganang cluster.

We have currently opened for applications for street trading permits in this 2022/23 financial year. The invitation was issued on the 07th of July 2022 to 15th August 2022 We anticipate issuing over 500 permits to complying traders under the following categories:

- 1) Fruits and Vegetables
- 2) Meat and Porridge
- 3) Bunny Chow
- 4) Accessories
- 5) Shoe repair
- 6) Home utensils
- 7) Photography

2. Developmental Support:

The street traders that have permits are offered developmental support through trainings and workshops. The Municipality conducts workshops and trainings to empower street traders to run successful business and comply with Municipal by-laws and policies. There are some workshops conducted in partnership with parastatals, and private sector.

1. Trading Opportunities:

The communities are given trading opportunities during events hosted in Municipal Infrastructures such as stadium. The events such as soccer matches, festivals and church gatherings. These events offer economic spin-offs through trading. However, this project has been put on hold due to the compliance of the Covid-19 Lockdown Regulations protocols.

2. Trading Stalls constructed by the Municipality:

- (i) Bok Street Traders Stalls next to the Taxi Rank – accommodates 25 traders.
- (ii) Church Street Traders Stalls next to the Taxi Rank – accommodates 19 traders.

3. Future Plans:

(1) Infrastructure Development through NDPG Project

The Municipality through NDPG programs for infrastructure development, has got plans for construction of informal trading stalls. The infrastructure development will assist informal traders within Seshego cluster to improve business operating conditions, which will in turn improve the quality of life and also contributing to the cleanliness of the Municipality.

(2) Implementation of the Limpopo Business Registration Act (LIBRA), 05 of 2003

The Act provides for law regarding the registration and carrying on of businesses in the Province, establishment of the Limpopo Directorate of Business Registration and Business Registration Centres.

The implementation of LIBRA will provide full control of the functions within the Municipal environment. The Department of Economic Development, Environment and Tourism will provide training related to the LIBRA functions at a Municipal level. Through the performance of the function, the Municipality will retain all the revenue generated

2.36.5 Economic Research and Development:

The economic analysis as per the Performance of the Local Economy and the Investment Trends is Compiled each financial year. The 2023/24 Economic Analysis was compiled to guide the City in planning Process.

CHAPTER Three: Housing and Human Settlements Analysis

3.1 HUMAN SETTLEMENT STATUS QUO ANALYSIS

The right to adequate housing is enshrined in the Constitution (Act 108 of 1996) and it states that everyone has the right to have access to adequate housing and that the state must take reasonable legislative and other measures within its available resources to achieve the progressive realisation of this right. Polokwane Municipality, as the economic hub of the Province is experiencing population growth which results in the influx of people from the rural areas into the urban parts of the municipality. This influx has necessitated an increase in the provision of housing and other basic services that promote Integrated Sustainable Human Settlement.

The Municipal housing environment comprise of formal and informal dwellings. A number of households are in poor housing conditions including informal settlements, backyard rental shacks, overcrowded in formal urban houses, and rural areas without proper access to basic services. In addition to this, urbanization rate continues to increase put much pressure on the Municipality for delivery of housing.

The SBU is still operating with an old organogram which consists of two Sub division:

1. Building Inspectorate
2. Housing

3.2 NEW DIRECTORATE: HUMAN SETTLEMENT

Council adopted the New Organisational Structure in January 2019 which resulted in the Split of Planning and Economic Directorate, creating a new Directorate Human Settlement,

The new Human Settlement Directorate consist of two SBU:

- 1) Planning, Policy and Administration
- 2) Programme Implementation and Quality Assurance

3.2.1. Housing Challenges

Housing:

- Growing housing demand in relation to supply
- Unplanned/unsustainable human settlements on the urban edge – defeating the objective of integrated and sustainable human settlements.
- Reduction of allocated Housing and delays of appointment of contractors by COGHSTA
- Funding of PHA by Municipality
- Staffing
- Blocked projects
- Provincial Department not engaging with the Municipality on crucial issues.
- Stagnant housing database
- No long-Term Housing Master Plan

3.3 HUMAN SETTLEMENT STRATEGIC OVERVIEW

1. BACKGROUND

Regardless of all challenges, the City remains committed to creating environments that enables the creation of integrated sustainable human settlements, i.e., settlements that meets the total social, economic and material needs of the City's populace. The strategic Human Settlement objective remains relevant and sound for driving the City towards the achievement of national and provincial policy objective, which includes:

- Improving the spatial planning patterns by planning and integrating or locating of new housing developments closer to major transport nodes and corridors, economic opportunities and social facilities to ensure the building of an economically and socially integrated and sustainable space.
- Improving spatial efficiency by increasing the densities of new housing developments.
- Increasing the development of housing in the gap market by developing partnerships with the private sector.
- Diversifying housing products with greater investment in rental housing stocks.
- Providing municipal engineering services consistently and at a higher level.
- Using housing as a major job creation strategy and breaking down barriers between the first-economy residential property boom and the second-economy slump

3.3.1 HUMAN SETTLEMENT PLAN

In the financial year 2016/2017, the City adopted the Five-Year Human Settlement Plan for the period 2016/2017 until 2020/2021. The Plan presented the housing realities of the City and set out strategies for addressing prevalent housing policy gaps. Each year, the plan was reviewed in line with the IDP to ensure that its strategies are relevant to the changing municipal environment. This financial year, the five-year term of the Plan is lapsing and therefore, a new five-year HSP is been developed following the procedures of the IDP.

This Plan, in line with the IDP of the City, is based on the reassessed housing environment of the City. The main aim of the Plan is to guide the City to deliver human settlements in a planned and coordinated manner. The Plan is developed to assist the Municipality to stimulate the local economy, create an environment for job creation and address the housing needs of the people, also it helps the Municipality to correct the spatial disparities and ensure that integration and coordination happens between housing and other service providing sectors such as Water and Sanitation, Roads, Electricity, etc.

The strategic housing programmes of the Plan are not only relevant to responding to the housing conditions, aligned with the programmes of the Limpopo Provincial Department of Cooperative Governance, Human Settlements, and Traditional Affairs (CoGHSTA). The proposed human settlement and housing delivery projects are within the framework of the spatial development plans of the City.

3.3.2 DEMAND VS SUPPLY

Since 2004 the Municipality has developed a Municipal housing demand database which was upgraded in 2008 and in 2011/12 financial years. Currently the Municipality is migrating its

housing data to the new National Housing Needs Register (NHNR). With the migration still in process and new registration, the overall municipal housing backlog is estimated at 57 000 including informal settlements households, households in rural areas, blocked housing backlog, gap housing, and greenfield housing development. The overwhelming majority of these households have a monthly income of less than R3 500 and are living in overcrowded conditions and in informal houses, in the backyards accessed through family members and any others willing to provide them with an informal rental opportunity.

A majority of households are in overcrowded situations, informal settlements, and backyard shacks without any tenure.

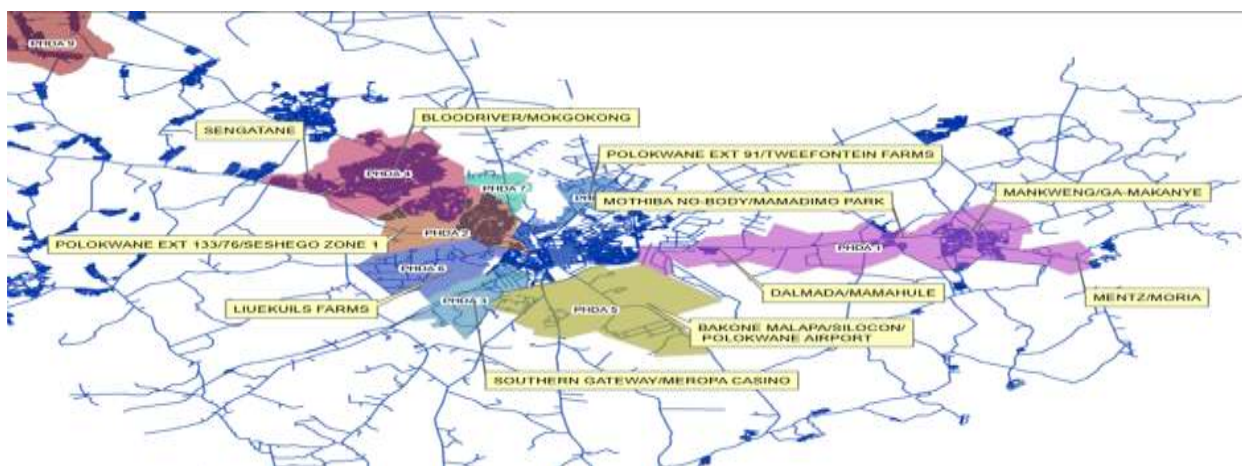

Over the past four years (2016 – 2020) the City delivered well over 5 000 housing opportunities including serviced land. However, the rate of new housing need is overwhelming in relation to the supply.

3.3.3 Priority Human Settlement Developments and Housing Development Areas (PHSDA)

The housing problem in Polokwane is not confined to the City/Seshego cluster and surrounding areas only due to urbanization that led to migration. Other areas outside the urban edge; at the rapidly growing area of Mankweng and Moletjie the need for housing development has reached crisis proportions while the provision of the basic services is manageable in other areas. To deal with this challenge, following the National spatial transformation and consolidation framework, the City has identified and demarcated locations as Priority Housing Development Areas (PHDA's).

This should enable the City to consolidate and access funding to deal, in an integrated manner for the Human Settlement needs of such identified communities, the identified PHDAs of the City include the Polokwane CBD and surrounding – extending from the South-western gateway of Polokwane covering Polokwane Extensions, the Polokwane R71 corridor extending from the eastern Polokwane along the R71, covering Dalmada AH, **Mamahule**, Nobody, running through to Boyne, , Leeukuil farm, and the Sengatane-Bloodriver. These Priority Housing Development Areas are experiencing fast growth and somewhat unplanned development. Transforming these regions is crucial in overall objective of creating integrated and sustainable human settlements

Map 1 Priority Housing Development Areas of the City.

To deal with greenfield housing, the Municipality adopted an incremental approach to human settlement delivery. The rationale behind this approach is to curtail the problem of untraceable beneficiaries, unoccupied houses, illegal occupation of State funded houses. Further, to curb land sterilization in a situation where the need is higher than the rate of land development and housing delivery.

3.4 legislative and policy frameworks

The Housing Analysis will therefore be guided by the following legislative and policy frameworks:

- 1) Constitution of RSA**
- 2) Housing Act (107 of 1997)**
- 3) Breaking New Ground, 2005**
- 4) National Housing Code, 2009**
- 5) National Development Plan (NDP)**
- 6) Rental Housing Act (50 of 1999)**
- 7) Limpopo Housing Act (2 of 2006)**
- 8) The Social Housing Act (16 of 2008)**

The right to adequate housing is enshrined in the Constitution (Act 108 of 1996) and it states that everyone has the right to have access to adequate housing and that the state must take reasonable legislative and other measures within its available resources to achieve the progressive realisation of this right. Polokwane Municipality, as the economic hub of Limpopo Province is experiencing population growth which results in the influx of people from the rural areas into the urban parts of the municipality. This influx has necessitated an increase in the demand for housing and other basic services that promote Integrated Sustainable Human Settlement.

The Municipal housing environment comprise of formal and informal dwellings. A number of households are in poor housing conditions including informal settlements, backyard rental shacks, overcrowded in formal urban houses, and rural areas without proper access to basic services. In addition to this, urbanization rate continues to increase put much pressure on the Municipality for delivery of housing.

Polokwane Municipality has obtained Level 2 housing accreditation (the subject will be elaborated in detail below). In collaboration with the department (COGHSTA), the Municipality to facilitate the development of integrated human settlement in accordance with the City's vision. The Municipality normally receives annual allocation of housing units from the Department of Cooperative Governance, Human Settlements and Traditional Affairs

(COGHSTA). For 2018/19 Financial Year, 1 425 housing units were allocated to upgrade the informal settlement in Ext 78 (previously known as Disteneng). The construction work is complete.

The Municipality adopted an incremental approach to human settlement development. The rationale behind this approach is to curtail the problem of untraceable beneficiaries, unoccupied houses, illegal use of State funded houses. The case in point, includes Polokwane Extension 133, 126, 127, and 134. The mixed income Township of Extension 133 is proclaimed, sites allocated and currently engineering services (water and sanitation) are installed. Overtime, top structures will be built. Extension 126 & 127 are planned for relocation of the last SDA 1 informal settlements (Freedom Park and Extension 106), while the mixed income Township of Extension 134 establishment process is at an advanced stage.

The delivery of subsidised houses has expanded access to secure shelter for many poor households, and there has been growth in property markets in townships and broadening of home ownership. But progress up the property ladder for many is hindered by steep price cliffs for residential properties and construction on the other hand.

3.5 Challenges confronting sustainable human settlement.

There are formidable challenges confronting sustainable human settlement development.

- Settlement patterns are dysfunctional,
- well-located land is expensive; and
- urban planning and approval processes are slow and frustrating.
- Insufficient bulk infrastructure
- Limited middle-income housing stock and credit constraints contribute to the so-called “gap market” – households with incomes that are above the thresholds for subsidized housing but insufficient to be able to access commercial bank home loans.
- Establishment of settlements by Traditional Authorities without following proper Township establishment processes and engagement with the Municipality (uncoordinated land release by Traditional Authorities)

3.6 Housing Backlogs

The municipal housing backlog is distributed between households in informal settlements, rural housing, rental, blocked housing, and Greenfield housing.

The ensuing Tables provide the status quo of the municipal housing backlog per housing category.

Table: Categorical analysis of the Municipal housing need

Housing Category/Area	TYPE OF NEED AND BACKLOG				
	Informal Settlement	Greenfield	Rental	Rural	Blocked
Urban Data Base		±57 000			
Polokwane Ext 78	Relocated 1690				
Seshego					±100
Freedom Park	300				
Polokwane Ext 40					107
Mankweng Unit F					100

Source: PLK Housing SBU

3.7 Status of rental housing

The Municipality established an entity called Thabatshweu Housing Company Pty, t/a Polokwane Housing Association (PHA), with a mandate of developing and managing rental housing within its jurisdictional area. The company is accredited by the Social Housing Regulatory Authority (SHRA) as required by the Social Housing Act (16 of 2008).

The Municipality, in support of the rental housing initiatives avail land to PHA and has designated Restructuring Zones to enable PHA to access the Restructuring Capital Grant (RCG) administered by SHRA for social housing development.

The most common type of rental accommodation that is available for new and particularly low-income urban lodgers is backyard rooms.

Polokwane Housing Association is currently managing 697 rental units of which 508 are social housing and 189 are Community Residential Units (CRU).

Additional Social Housing projects have been initiated by Polokwane Housing Association for example, Ext 76 to yield 240 units. Site is expected to be handed over to the developer October/November 2019. Another social project called Annadale Extension 2 planned to yield 494 units is under construction, started in May 2019 for a period of 18 months.

Negotiations are in progress between the entity and COGHSTA regarding the release of land earmarked for Social Housing to PHA in Bendor Ext 100 township. On the other hand, two Student Accommodation projects; one in Ext 108 and the other one in Ext 106 have been initiated. The two projects are projected to yield over 5000 student beds. Procurement for these projects is concluded.

3.8 Urban Housing Developments

The Municipality encourages the Brownfield development and discourages Greenfield developments. This initiative of brownfield development encourages densifying the existing land available for various use. Through spatial planning policies analyses, the development of the land will help alleviate the increase demand for housing, including the gap market and student accommodation around the City.

There are other land portions which have been identified. The Department of Cooperative Governance, Human Settlements and Traditional Affairs, together with the Municipality, and the Housing Development Agency are working together to establish more Townships for human settlement. Some of the developments are close to completions while other recently commenced.

The Table below provides a summary development and their status

Table: summary of developments

PROPERTY DESCRIPTION	PROGRAMMES	TARGET	STATUS
Polokwane Ext 72	GAP housing FLISP	800	<ul style="list-style-type: none"> •Township complete •Services installed. <p>RISIMA which is an entity of Economic Development is appointed to spearhead the marketing and sale of properties including building packages.</p>

Source: PLK Housing SBU

3.9 Land availability and acquisition strategies

The City's Five-Year Human Settlement Plan recorded the following pieces of land as the one suitable for Human Settlement development. The Municipality has adopted Land Acquisition and Disposal Policy.

Property Description	Extent	Ownership	Proclamation Status	Proposed Development
Ptn 151 to 160 Sterkloop 688 LS	215 Ha	Municipality	Farm Land	Mixed Housing Development
Ptn 76 of Ivydale Agricultural Holdings	4.96112 Ha	Municipality	Farm Land	Mixed Housing Development

Source: PLK Housing SBU

3.10 Informal Settlements Profile

This section provides a summary of informal settlements within the jurisdiction of the municipality. By far, the Seshego/City Cluster has the highest number of structures; Informal settlement upgrading is a priority programme for the Municipality. Since 2005 the Municipality has successfully upgraded 07 informal settlements. Currently there are two remaining informal settlements namely, Freedom Park and Ext 106 (recently relocated (as a holding land) people from former Disteneng)

This section provides a summary of informal settlements within the jurisdiction of the municipality. By far, the Seshego/City Cluster has the highest number of structures; Informal settlement upgrading is a priority programme for the Municipality. Since 2005 the Municipality has successfully upgraded 06 informal settlements, eradicated and prevented the formation of new informal settlements. The Municipality has adopted a simple approach to the Management of Informal settlement by:

- a) Identify and recognise the settlement.
- b) Profile the settlement
- c) Mark each shack and develop a database for the settlement.
- d) Develop a buffer to protect expansion of shack.
- e) Conduct regular monitoring of the settlement.

3.10.1 Summary of informal settlements within the jurisdiction of the municipality.

The City has **three (3) informal Settlements** which are as follows:

1. Freedom Park

This is an informal Settlement situated in Seshego F, and it has ± 300 shacks. Occupancy has been verified during the month of July 2018 in preparation for the relocation to the new established township. The households will be relocated to Polokwane Ext 126/127. 45 of the households will be re-settled where they are since their settlement is on an approved township (45 residential sites).

2. Ext 106 (Holding Area)

The holding area is in Ext 106, next to Luthuli 9G. The area is in a proclaimed Township, the land occupied is zoned for Res 3 (medium to High density developments). The land is earmarked for development of Student Accommodation.

± 700 households were relocated from Disteneng to Ext 106 as holding area. They were relocated because they could not be allocated sites during re-settlement process due to insufficient sites earmarked for BnG income earners. These people will be relocated to Ext 126/127 together with Freedom Park informal settlement.

Challenges or Delays in the process of relocation

- Removal of Cattle kraals and farmers are delaying the process of relocation
- Burning of tires and submission of memorandums to the Municipality by angry and inpatients communities

3. Mankweng unit F

3.10.2 Juju Valley

In 2015 - 2017 the municipality was alerted of the land invasion on the private property known as **Juju Valley** within the established townships known as **Polokwane Extension 118 and 119**. The property is a well-established township, engagement with the municipality was never materialised. The action, thereafter, tends the activity being illegal land use. It should be acknowledged that the invasion may results in informal settlement unless the property owner finalises and install all services and settle the community accordingly. Various options may be explored of which the owner may engage with the Municipality. The Municipality may not spend the Public funds to the private development unless the land may be transferred to the Municipality

3.10.3 Mamahule Settlement

Illegal & uncontrolled settlement on fringe of the City. Some residents of **Mamahule, Maboi, Mothapo and Mothiba** have lodged **land claims** on Kalkfontein 1001 LS farm portions. Some Kalkfontein farm portions are **privately owned** while other portions are owned by the state (Department of Rural Development and Land Reform).

A task team was appointed comprising of various stakeholders (Polokwane Municipality, SAPS, COGSHTA, Office of the Premier, Limpopo Department of Agriculture and Rural

Development), with the Department of Rural Development and Land Reform in the leading front to deal with land disputes in and around Mamahule areas.

There have been discussions between Department of Rural Development and Land Reform and Polokwane Municipality to check feasibility of transferring the land to the Municipality and formalize the settlements.

The Department is also expediting the **land claim process** for the affected claimants and determine whether the remaining land is sufficient for settlement of the remaining claimants and if not, to look for alternative land.

As part of planning coordinated settlements, particularly in the area of concern, the Municipality is intending of developing a Precinct Plan (**Dalmada and Kalkfontein Precinct Plan**) to curb invasions, promote coordinated settlements and compatibility of land uses. This will result in establishing new Nodes and encourage development which is in line with the provision of the Polokwane/Perskebult towns Planning Scheme, 2016.

Polokwane Municipality has adopted and gazetted Polokwane Land Use Scheme for Mankweng, Sebayeng, Aganang and Rural Areas on the 8 November 2019. The aim of the above-mentioned scheme is to regulate land uses on areas outside of the Polokwane /Perskebult Town Planning Scheme, 2016 and most importantly to control and promote coordinated settlement patterns

The tender was advertised, proposals submitted, and the process of appointment was at evaluation stage at the time of National Lockdown. The process of appointment was delayed by the lockdown and will be re-advertised.

3.10.4 Polokwane Extension 78

The current Polokwane extension 78 has already accommodated almost approximately 1690 and only 1425 were Low-income beneficiaries qualifying for the low-income housing. + 109 were on flood line due to roads and storm water the sites were left not to be suitable for housing as of now but will be dealt with once the storm water is installed. Additional housing units will soon be accommodated in the new approach of walk-ups RDP that will be built through densification of some of the High-density properties. The proposal will enable the Municipality to deal extensively with the housing backlog and RDP provision close to the Public transport in order to support the BRT. For example: typical low-income residence (RDP)

Polokwane Extension 78 previously known as Disteneng informal settlement was the biggest Informal settlement of them all. A new Township layout is approved, and 1690 households are settled and 29 households still to be resettled in Ext 78 from ext. 106 whereby they were settled temporarily. The Progress of Relocating and Resettling beneficiaries to their rightful stands, is recorded as 100%.

Settlement Name	Classification	Est. no of structures	Services Status			
			Water	Sanitation	Electricity	Roads
Disteneng	Urban	2000	Services are installed	Services are installed	Services are installed	Gravelled, access routes, no internal routes
Freedom Park	Urban	275	4 communal taps	8 VIP Toilets	None	Gravelled, access routes, no internal routes
Mankweng F	Urban	61	Illegal connections	Pit latrines	None	Informal gravelled internal routes
Mankweng G Ext	Urban	255	Illegal connections	Pit latrines	None	No proper roads
Ext 106	Urban	138	Services are installed	Services are installed	Services are installed	Properly graded roads

3.10.5 Response plan and project Prioritisation

Settlement Name	Priority	Land Ownership	Readiness	Land Condition	Service and Budget Estimate
Disteneng	1	Municipal	<ul style="list-style-type: none"> Beneficiaries relocated and resettled. 1 690 	Suitable for Human Settlement	Services are installed

Settlement Name	Priority	Land Ownership	Readiness	Land Condition	Service and Budget Estimate
			<ul style="list-style-type: none"> ▪ 29 still to be relocated. ▪ The area is serviced. ▪ Plan to allocate 1500 RDP houses 		
Freedom Park	2	Settlement in a State Land	Preparations are underway to relocate beneficiaries to new Townships that are established.	Not Suitable for Human settlement	Interim Basic Services are in place. -
Mankweng F	4	State Land	Settlement is on a land earmarked for school, proposed to be relocated to an alternative land/ formalized	Suitable for HS, although very small	Decision yet to be taken whether to relocate or formalize
Mankweng G Ext	3	State Land	Settlement is on a flood line and waterlog area, relocation proposed	Not suitable for HS	Interim services are required, while alternative land is sought. -
Ext 106	2	Municipal Land	RDP Houses completed with services. The Township is also being used as a holding land for Disteneng residents	Suitable for Human Settlement	Services are installed

Source: PLK Housing SBU

3.10.6 Progress with the implementation of informal settlement upgrading.

City/Seshego Cluster has the highest number of structures. Informal settlement upgrading is a priority programme for the Municipality. Since **2005**, Polokwane Municipality has successfully upgraded **06 informal settlements, eradicated and prevented** the formation of new informal settlements. Council has adopted a **simple approach/Steps** to the Management of Informal settlement by:

- 1) **Identify and recognise the settlement.**
- 2) **Profile the settlement.**
- 3) **Mark each shack and develop a database for the settlement.**
- 4) **Develop a buffer to protect expansion of shack.**
- 5) **Conduct regular monitoring of the settlement.**

The Municipality is addressing the issues of finalisation of the **last two** informal settlements through **relocation** of the people who were **temporarily provided site** while planning for new Township at **Polokwane X 126, X127, X133 and X134** to be relocated. Once installation of engineering services is finalised, the Municipality will be free of informal settlement.

The current **Polokwane X 118 and 119** (private township) was occupied illegally and the Municipality through **court process** were turn down by the **developer** who claimed to have an agreement with the people. In this case, only when the land owner or land expropriation may be approached in order to address the current occupation since, the Townships are approved by the Municipality.

3.10.7 Good Story to tell for Council (EXT 78 Houses under Ward 08)

Previously known as **Disteneng** informal settlement). – Good Story to tell for Council EXT 78 Houses under Ward 08 Previously known as **Disteneng** informal settlement). –

EXT 78 Houses under Ward 08

Electrification Project in Progress at EXT 78 (18 January 2022)

3.10.8 Top 3 Priorities for the City of Polokwane in engaging informal settlements.

- 1) Finalisation of **installation of engineering** services (126, 127, 134 and 133) in order to eradicate informal settlements.
- 2) Finalisation of the **relocation for 106** and Freedom park to 126 and 127.
- 3) **Allocation of BNG** for 134 and Applying for more **Top structure** to all extension for BNG.

3.11 Social/Rental Housing

Source: PLK Housing SBU

In line with regulations of the Social Housing Regulatory Authority, the entity is provisionally accredited as a Social Housing Institution. A full accreditation will enable the entity to access additional funding for the development of social housing units within designated restructuring zones of the Municipality.

3.12 Tenure Upgrading

Secure tenure is a central part of the housing development process. The municipality in collaboration with CoGHSTA is running a programme of Township upgrading, Title Deed restoration and registration. Incomplete Township in the areas of Seshego and Mankweng are currently finalised and proclaimed. Over 6 000 subsidized housing units in the areas of Polokwane Ext; 40, 44, 71, 73, 75, 76, Seshego; E, F, 9F, 9G, 9L, 9H, Seshego A Ext 1, and Sebayeng B are registered and transferred into the names of the beneficiaries.

3.13 Housing Accreditation

Housing Accreditation is a progressive process of building Government capacity thereby transferring housing functions from the Provincial to the Local Government sphere. The aim is to provide an opportunity for Polokwane Municipality to plan, execute and expedite housing service delivery. The process unfolds in three stages, where each stage is linked to institutional capacity of the municipality to undertake specified housing functions. Thus, municipalities should demonstrate capacity to undertake housing functions attached to the level of accreditation.

Polokwane is accredited to perform level 2 housing functions which are amongst others:

- ✓ Project evaluation and approval,
- ✓ contract administration,
- ✓ subsidy registration,
- ✓ programme management including cash flow projection and management.
- ✓ and technical (construction) quality assurance.

The Municipal Council approved a new Human Settlement Directorate in support of the additional delegated functions for level 2. An Implementation Protocol (IP) to be signed by the MEC for CoGHSTA and the Executive Mayor has been finalised.

3.14 Priority Housing Development Areas (PHDA's)

Polokwane is one of the Municipalities identified by the National Department of Human Settlements as a growth municipality to identify PHDAs. In accordance with the National call for spatial transformation and consolidation in human settlement development, the Municipality in conjunction with the National Department of Human Settlements has identified and is currently in the process of adopting two Priority Housing Development Areas (PHDAs), namely:

- ✓ Polokwane R71 corridor (starting from Ramahlodi Park to Boyne)
- ✓ South-western Gateway corridor (starting RBA taking Matlala road up to Sengatane, including Bloodriver)

The identified PHDA's were designated using the following national criteria:

- a) High demand for housing and related services e.g., basic engineering services.
- b) Large enough to accommodate economic, social infrastructure and housing needs.
- c) Support sustainable environmental management and the integration of land uses and amenities.
- d) Would grant reasonable access or progressive realization of such access to bulk infrastructure, social amenities, economic activities and transport.

3.14.1 Purpose and objectives of Priority Housing Development Areas

The purpose and objectives of Priority Housing Development Areas are:

- 1) To **target and prioritize areas** for integrated housing and human settlements development to ensure the delivery of housing for a broad range of income groups within an integrated mixed-use development. To this end, the following is considered as circumstances of priority:
 - Areas of urgent housing need where there is an established high demand and low supply of housing opportunities.
 - Areas requiring upgrading and/or redevelopment for purposes of delivering housing choices including subsidized housing; and
 - Areas requiring improved access to infrastructure, amenities and services.
 - Areas that supports the integration of different housing typologies, land uses and economic development.

2) To **transform entrenched spatial patterns** which have historically exacerbated social inequality and economic inefficiency.

- Achieve a balance between spatial equity, economic competitiveness and environmental sustainability.
- Implement spatially targeted projects to achieve spatial transformation – Develop new post-apartheid cities and city patterns that ensure urban access.

The identified PHDAs are not in conflict with any of the City's development plans. It should however be emphasized, given the spatial context of the City, that the PHDAs should not mean that housing delivery would be limited to the identified PHDAs, but only specific housing programmes will be implemented in the areas. The National department indicated that the programme will be funded by the department.

Polokwane extension 133 and 134 is an Integrated Sustainable Human Settlement that aims at addressing the Housing backlog since 2004 there was no movement as people continue to apply for different housing typologies. The Municipality was faced with land invasion crisis. In order to mitigate the land invasion risk, the settlement of the beneficiaries on demarcated sites was beneficial to the Municipality by safeguarding the Municipal properties while preparing for the installation of permanent basic engineering services. Based on the above information, the Municipality allocated beneficiary for RDP section and proceeded to allocate on the Gap market as per the Municipal Housing Data base as guided by several Council resolutions in order to cater for different housing codes since the settlement is for the integrated sustainable Human settlement and piloted by the national and provincial department. The COGHSTA has played an important role in provision of the services for the different housing program to support of the PHDA.

The Polokwane Extension 133 is a proclaimed Township established on farm Klipfontein 670 LS. Located in Ward 1, adjacent Seshego Zone 8, this new Township comprise of 2 969 stands of different sizes (<200x<350 m²), objectively demarcated to ensure integration of different income households within the settlement. Notwithstanding this, the Township provides other land uses including Educational, Institutional, Business, and Public Open Space. Polokwane extension 34 has approximately 2090 sites for different housing guided by the Integrated Sustainable Humane settlement concept. The Municipality will deal with the housing backlog as per the Council resolution addressing the 2004-2009.

In terms of the data base migration to the national is at 60% since the issues request attention of the Municipality and the national housing that was also affected by COVID-19.

3.15 Building Inspection

The challenging factor within the directorate is deeply on the records management of the Building plans approved hence, the Municipal records management SBU does not have control over the building Plans that are approved. Several cases were observed where the majority of the Building Plans found to be missing. A proper plan should be considered to locate the building plan within the records management. This may pose negatively since; the coming operation of the Spatial Planning and Land use management Acts demand the wall-to-wall Scheme and Planning By-law.

3.15.1 Building Inspection Key challenges

- Record management of the Building Plans
- Electronic Filling and submission of the Building Plans
- Staffing for key positions such as plan examiner and Building inspectors
- Incompetency for the Building inspectors due to limited training on the following:
 - ✓ Sewerage inspection
 - ✓ Structural and Concrete engineering
 - ✓ Plumbing (including trading)

3.15.2 Building Inspection Required intervention

- Records management to deal with the recoding of building plans
- Purchase of the relevant equipment's for the electronic filling
- Re-structuring of the Building inspection and creation of the Building inspection SBU
- Filling of the vacancies.

3.15.3 Legislation and Policy Perspective for Building Inspection

The following legislative requirements are used by the SBU on a daily basis in the application and enforcement of the Act on National Building Regulations and Building Standards (Act 103 of 1977) as well as in the evaluation and approval of building plans, hoarding, demolition and other applications in terms of the following:

- The National Building Regulations Act (Act 103 of 1977).
- Act on architects (Act 35 of 1970).
- The Polokwane/Perskebult Town Planning Scheme, 2016.

3.15.4 Services Rendered by building Inspections sub-unit

- 1) Building plan evaluation and approval
- 2) Minor works permit approval (for work such as swimming pools, small 'Wendy' houses)
- 3) Extension of the validity of an approved building plan
- 4) Temporary structures permit
- 5) Hoarding permits
- 6) Demolitions permits.
- 7) Copies of approved building plans

In additions, other responsibilities are:

- a) Building Inspection during the construction period
- b) Issuing of Occupation Certificates
- c) General enforcement of building Regulations
- d) Investigation and resolving building complaints, contraventions and illegal building work.
- e) Maintaining statistics on building construction activities

3.16 Housing Allocation Status Quo from 2016-2021 Status Quo

3.16.1 2016/17 Financial Year allocation, Completed and Outstanding

3.16.5 Challenges Experienced During 2017/18 Housing Backlog and Allocations

Most of the wards were allocated to Vharanani Properties and HAD appointed Zhora Khan, Mamondo Developers and Aventino to rectify 442 units in 2020/2021

Ward 1 - Bergnek - Never allocated Contractor

Most of the wards were allocated to Vharanani Properties and HAD appointed Zhora Khan, Mamondo Developers and Aventino to rectify 442 units in 2020/2021
Ward 2 – Ga-Phiri – Never allocated Contractor
Ward 5 – Mamondo was appointed but could’nt built
Ward 18 – Mamondo was appointed but couldn’t built. Moshung, Mmakgabo, Mahibitswane, Mashishi, Madikoti and Leokama - Never allocated Contractor
Ward 24 - Never allocated Contractor
Ward 27 - Never allocated Contractor
Ward 28 - Thabakgone - Never allocated Contractor
Ward 29 - Moduwane, Kgwareng, Potse, Segopje, Ga-Mogashoa, Maokgobeng, Dipalaneng - Never allocated Contractor
Ward 30 - Segopje, Masealama, Makeketela - Never allocated Contractor
Ward 35 and 36 - Thodi was appointed as a contractor, but the houses were not completed, his contract was terminated
Ward 36 - Mabotja and Ramphele - Never allocated Contractor
Ward 37 – Thakgalang – Thodi was appointed as a contractor but didn’t build the houses
Ward 40 - Mandela, Gernane, Sekgwahleng - Never allocated Contractor
Ward 43 - Debeng - Never allocated Contractor
Ward 44 - Chloe, Hwibi - Never allocated Contractor
Ward 45 - Never Allocated Contractor

3.17 Overall Housing Challenges

- Shortage of beneficiaries to be approved (Ward Councillors not responding on time)
- Approved beneficiaries at development area while residing at non development areas.
- Councillors not returning forms on time after rectifications.
- The client (COGHSTA) took units from service Provider (Contractor) due to non-performance and took time to replace them.
- Slow approval of beneficiaries which caused delay to Service Provider
- Slow NHBRC enrolment approval
- Sites affected by flood line.
- Delay in water connections by beneficiaries which affect testing of water & sewer.
- Community unrest due to 2017/18 allocation not being attended to while new beneficiaries are getting houses.
- Contractors not working with councillors and tribal authorities.
- Contractors not paying CLO.
- Untraceable beneficiaries and councillors taking time to replace.
- Differences in Tribal Authorities and community where councillor didn't follow the agreement between two indunas' when allocations were being made.

3.18 Military Veteran Housing Projects

The Department of Military Veterans (DMV) and The National Department of Human Settlements (NHDS) signed Memorandum of understanding in 2012. The MOU's objective was to ensure the effective delivery of houses for Military Veterans. Military Veterans database is maintained by DMV.

Housing Development Agency (HDA) is appointed by CoGHSTA as implementing Agency on the Programme and they Appointed Vharanani Properties to build houses in different areas of the Municipality. A total number of 50 beneficiaries were approved on HSS for Polokwane Municipality Fourteen (14) of the approved beneficiaries have indicated that they do not own stands for construction of their houses. Missing/untraceable Beneficiaries. Fourteen (14) MV Beneficiaries requires sites within Urban Areas. Beneficiaries complains about the sizes of their houses.

3.19 City of Polokwane housing success over 25 years

Over the past 25 years of democratic governance, the municipality has achieved great success in implementing national housing policy.

- Over 20 000 housing opportunities were provided in rural and urban areas of the Municipality.
- More than 10 000 households have secure tenure over their accommodation (Title Deeds).

- Adding to this, the social/rental housing environment is progressively stabilizing, following the establishment of a Municipal rental housing entity (Polokwane Housing Association) which is currently managing over 500 rental units
- The municipality has Conditionally obtained **Level 2 Housing Accreditation**
- The number of informal settlements is currently reduced from 7 to 2, with an estimated household below 1 200
- Adding to this, over 13 low-income Townships have been development and some occupied. These Township has a combined residential capacity of over 10 000 units.
 - Currently 5 Townships, with over 3 000 units, are unoccupied and due for servicing.

3.20 Proposal for the walk-up RDP at extension Pietersburg 40

The proposed solution was identified on the bases that, by densifying the land available will provides enough walk-RDP houses than individual stand. The provision of the houses through a sectional title scheme was identified as the best model that will house people closer to work, in a walkable distance from the city and neighbouring industries. This will enable the Municipality to address the abandoned RDP and rental of RDP houses whereas other community needs such housing. By supporting the densification, the Municipality have noted that the Pietersburg extension 40 Township has approximately 8 Erven with the following extent:

- Erf 11981/1= 7068m²
- Erf 11981/2 = 2.3ha (23000m²)
- Erf 11981/3 = 1.3ha (13000m²)
- Erf 11981/4 = 1600m²
- Erf 11981/5 = 1509m²
- Erf 11981/6 = 1509m²
- Erf 11981/7 = 1509m²
- Erf 11981/8 = 1509m²

In total, the Erven will have 50704 m². This can be utilised for the following zoning if Rezoned to Residential 3 with the density of 50 or 74 or 84 Dwelling Units per Ha or higher. The following are the number of units for the double storey building from each density.

- For 50 Dwelling units, approximately 253 dwelling units can be developed.
- For 74 Dwelling units, approximately 375 dwelling units can be developed.
- For 84 Dwelling units, approximately 426 dwelling units can be developed.

3.21 Relocation plan for 126 and 127

Housing section has already developed the relocation plan for 126 and 127 subject that the timeline will be implemented once the City planning, and property management execute the Council resolution. Corporate Geo-Informatics has already surveyed the area for relocation. EM's office facilitates the engagement with the community for meeting to deal with the relocation process.

3.22 TITLE DEED REGISTRATIONS STATUS QUO

3.22.1 TITLE DEEDS RESTORATION

The Co-operative Governance, Human Settlements and Traditional Affairs Department and Polokwane Municipality are in the process of registering and transferring Low-Cost Houses to the approved beneficiaries through the **Title Deed Restoration and Post 2014 Subsidy Market PROGRAMME**. These are National Programme that were implemented to ensure that all approved beneficiaries (rightful occupiers) of state housing receive their legal proof of property ownership (in the form of a title deed) in a timely and affordable manner; with the state playing a direct enabling role to ensure that this is achieved.

Polokwane Municipality has a backlog in **Seshego; Mankweng and Westernburg** which will be addressed through these programmes in the 2018/20 financial years. **Popela Make Incorporated** has been appointed to register and transfer 1000 houses in Ext. 78. Since the properties are State funded; The Municipality is therefore requesting exemption from the issuing of clearance certificates as outlined in the MSA which reads as follows:

3.22.2 TITLE DEEDS RESTORATION LEGISLATION

Section 118 Restraint on transfer of property

(1) A registrar of deeds may not register the transfer of property except on Production to that registrar of deeds of a prescribed certificate:

- issued by the municipality or municipalities in which that property is situated; and
- which certifies that all amounts that became due in connection with
- that property for municipal service fees, surcharges on fees, property rates and other
- Municipal taxes, levies and duties during the two years preceding the date of application for the certificate have been fully paid.

1A) A prescribed certificate issued by a municipality in terms of subsection (1) is Valid for a period of **120 days** from the date it has been issued.

(2) In the case of the transfer of property by a trustee of an insolvent estate, the provisions of this section are subject to section 89 of the Insolvency Act, 1936 (Act 24 of 1936).

(3) An amount due for municipal service fees, surcharges on fees, property rates and other municipal taxes, levies and duties is a charge upon the property in connection with which the

amount is owing and enjoys preference over any mortgage bond registered against the property

Subsection (1) does not apply to-

- a transfer from the national government, a provincial government
- or a municipality of a residential property which was financed with funds or loans made available by the national government, a provincial government or a municipality; and the vesting of ownership as a result of a conversion of land tenure rights into ownership in terms of Chapter 1 of the Upgrading of Land Tenure Rights Act, 1991 (Act 112 of 1991):
- Provided that nothing in this subsection precludes the subsequent collection by a Municipality of any amounts owed to it in respect of such a property at the time of such transfer or conversion.

(5) Subsection (3) does not apply to any amount referred to in that subsection that became due before a transfer of a residential property or a conversion of land tenure Rights into ownership contemplated in subsection (4) took place.
[S. 118 substituted by s. 44 of Act 51 of 2002.].

3.23 Low-cost housing (RDP) Summary

- Number of houses built: = **15 166**
- Number of houses transferred= **11 087**
- Number of houses to be transferred= **4079**

3.24 Extended Enhanced Discount Benefit System (EEDBS)

This are old Municipal houses (**Pre-1994**) that were transferred to Beneficiaries.

- Number of houses= 281
- Number of houses transferred= 215
- Number of houses remaining =66
- Number of sites on flood-line =107 at Ext. 40a – Beneficiaries were reallocated to Hospital View and Ext. 71

3.25 Challenges and Intervention for Human Settlement

CHALLENGES	INTERVENTION
Access to Deeds Search	HDA linked 5 Human Settlement staff to Lapsis.
Untraceable beneficiaries	Identified, advertised, letter sent to Province to de-register/re-allocate
Double allocations	Allocate in current projects if alternative sites are available
Incorrectly registered properties	To be rectified e.g., Westernburg Ext. 3/Mankweng
Illegally occupied sites/houses	Owner to give them notice/apply for an eviction
Illegal sale of municipal sites/houses	Refer matter to legal services and properties e.g., Ext40 and Zone 5
Townships not proclaimed	Properties to submit the list to HAD
Outstanding Deed of Donation	Finalize with DOW, CoGHSTA and properties (Hospital View; Bikopark & Zone 6 8172
Tribal Authority Interference	Political intervention
General plans provisionally approved	Properties to submit list to HDA to assist.
Township register not opened	Properties to submit to HDA to assist.
Family disputes (Deceased Estate)	Advise them on the laws of succession.
Lost title deeds	Compile list and submit to CoGHSTA/advise clients to apply for a lost copy
Incorrectly linked information between HSS,	Verify and rectify e.g., Mankweng unit F.

CHALLENGES	INTERVENTION
layout map and municipal rates	
EEDBS	Engage with Town Planners and GIS
(Beneficiaries who have benefited before or are registered property owners)	Compile a report to council to sell properties to non-qualifying beneficiaries.
Subdivisions that are not registered at Deeds office	Town planners, GIS and HDA to assist with the registrations.
Collection of title deeds Houses built but not approved on HSS	Door to door visitation was done and a list was also submitted to councillors

3.28 EXT 133 Allocation of Stands Status Quo

Polokwane Extension 133 is a proclaimed Township established on farm Klipfontein 670 LS. Located in Ward 1, adjacent Seshego Zone 8, this new Township comprise of 2 969 stands of different sizes (<200x<350 m²), Objectively demarcated to ensure integration of different income households within the settlement. Notwithstanding this, the Township provides other land uses including Educational, Institutional, Business, and Public Open Space.

Polokwane Ext 133 is a township established to accommodate people of various income categories (integrate various income categories) for sustainability purposes. The township was invaded before the Municipality could embark on a formal process of allocation of sites as per housing demand database. In order to mitigate the land invasion risk, the settlement of the beneficiaries on demarcated sites was beneficial to the Municipality by safeguarding the Municipal properties while preparing for the installation of permanent basic Engineering Services.

The invaders **were removed** through the private security company which was contracted by the Municipality to deal with land invasion, for these reasons, it prompted the municipality to immediately secure the land; swiftly allocate the sites to curb the invasion and ultimately requested the Council **to approve the allocation as guided by the CR/62/11/18.**

Following Proclamation of the Township and Council Resolution CR/62/11/18, the report that served before the Council resolved to allocate stands to families that are registered on the Municipal Housing Demand Database, also resolved as per resolution number 4 of the Council report: **60% of site allocation in Ext 133 be favored forward 11 and the remaining 40% be shared by other urban wards of Seshego i.e. 12, 13, 14, 17, and 37.**

Based on the above information, the allocation started with reserved sites for low-income earners and when the sites were exhausted, then allocation continued to the reserved sites for middle income earners (Gap Market).

The reserved sites for middle income earners (Gap Market) **was done with the intention to prepare a report to Council to alienate which are 200m² to non-qualifying RDP**

beneficiaries due to various reasons and to sell sites to prospective beneficiaries. This oversight of allocation of these sites randomly resulted in people who are in the category of low-income earners allocated sites in these category (and they will not afford to purchase the sites).

those who falls within the middle-income earners allocated these sites, were informed during allocation that they will be expected to purchase these sites after Valuation of sites is done. Majority have now built permanent structures. Municipalities intends to start engaging these people its intention to sell the sites to them, and also those who are in the low-income categories to be relocated to the appropriate sites even if they are to be moved out of the township (relocated to new sites),

3.28.1 Scenarios suggested to address the Gap Markets Beneficiaries

The affected occupants (Gap Markets) of sites in Ext. 133, particularly those who are earning salaries exceeding **R3 500** and those who do not qualify due to cases ranging from not being first-time property owners or had received state subsidized housing, be treated in accordance with principle laid in the housing code for dealing with similar cases under the “Informal Settlement Upgrading Programme”, being that:

“This category of people, who wish to acquire the individual stands in ownership, be required to pay a purchase price equal to the cost of the development of the stand. This cost will comprise a land acquisition component, component equal to the cost of provision of the Municipal Engineering Services and the transfer costs”.

The calculations of costs will be done by calculating the cost of development of each site taking into considerations Land Acquisition, Engineering Services Being Water and Sanitation, Roads and Storm Water, Electrification and transfer costs. In this view, during the allocation of the sites, there were no Engineering Services installed hence the intension was to counter the land invasion and safeguard the sites as elaborated above. It was noted that, since the services were not installed, valuation at that time was not possible.

To appoint a Municipal Valuer to evaluate the properties and determine the market value of properties for the various categories of incumbents to pay the purchased price in terms of valuated prices as mostly is the case. Upon obtaining the valuation report, a deed of sale shall be conducted between the occupants and the Municipality. The deeds of sale shall outline the terms and condition of the sale, including the purchased price payable and payment due date. The township is an Integrated Sustainable Human Settlement, the beneficiaries within the GAP housing sites will subject to valuation and the relevant cost associated with Housing programs will be followed in order to recover the cost associated with the land from qualifying beneficiaries to fairly benefit from the housing programmes since the data base was used.

Polokwane Extension 133 is a mixed income human settlement established on Farm Klipfontein with a residential capacity of 2 968 sites. The process of site allocation began in November 2018 and to date 2 403 sites are allocated. A breakdown of the allocation is presented in the Table below:

No	Ward No	Allocation
1.	11	1172
2.	12	333
3.	13	155
4.	14	333
5.	17	274
6.	37	136

3.28.3 Challenges and intervention caused by delays in selling of site at Ext 133

Challenges	Interventions
<ul style="list-style-type: none"> ▪ Long awaited Pro-Forma Agreement ▪ Most beneficiaries are erecting structures without submission of building plans 	<ul style="list-style-type: none"> ▪ Final meeting to be arranged between the ext. 133 Internal Task Team: i.e. City Planning, Property Management, Legal Unit and Human Settlement Unit officials ▪ Notice of intensions was issued from the high Court to stop erecting without proper documentations.

Source: PLK Housing SBU (2021)

3.28.4 State of Engineering Services within Ext 133

To obtain Security Tenure (Title Deeds), the Township should first be serviced by installation of permanent basic Engineering Services – being Water and Sanitation, Roads and Storm Water, Electrification. CoGHSTA appointed a Service Provider to install Engineering Services. (Water and sanitation). The project is not yet completed; the delay was due to the Covid 19 Lock down Regulation.

3.28.5 Building Plans Submission

A fee as Legislated in Government Gazette for the submission of Building Plan will have to be paid on submission Building Plans to the Local Authority

3.28.6 Encroachment that affect the development controls (coverage, FAR, Height, and building lines

Those properties that may not have encroachment to the engineering network and the other site should be subject to the process of the Polokwane/Perskebult Town Planning Scheme 2016 for either clause 32 or 33 for relaxation.

3.28.7 Encroachment that effect the adjacent properties.

In case where the development has encroached to the adjacent properties, they are subjects to demolition since; all sites are allocated to different people as per Housing Database

3.29 Construction of RDP Houses to Ext. 133 – Top Structures

The Construction of 165 RDP Houses that were allocated to Ext. 133, the project is complete, and the Contractor was **Mamondo Developers**. Furthermore, Housing Development Agency HDA- appointed by CoGHSTA as Implementing Agency allocated 350 units for the construction of RDP houses in Ext. 133.

3.30 FLISP Programme

The beneficiaries that are within the GAP program will be assisted in the application of the FLISP that will assist them to cover the cost of the land and their building. As per discussion with the CoGHSTA, the GAP housing, Extension 133 will be the pilot for the program MOA/MOU is signed by the Municipality and CoGHSTA as part reimbursement for the cost on engineering services installed.

3.30.1 About FLISP program

The subsidy rates were amended in 2018, so If you earn R15,000 a month, you can now qualify for a subsidy of R62,304, compared to the previous amount of R20,000. If you earn R22,000 a month you can qualify for a subsidy of R27,960. Since the 2018 changes to the FLISP programme, if you are a public servant getting housing assistance through the Government Employees Housing Subsidy Scheme (GEHS), you can still qualify for a FLISP subsidy.

as described for RDP houses above. FLISP grants can be used for both existing houses and to build a new one. It used to be the case that you could not sell a FLISP house before eight years, like an RDP house, but that no longer applies. However, if you sell your house, you may not apply for a second FLISP grant. Besides getting approval for a home loan and earning between R3,500 and R22,000 per month, you must meet the same criteria.

3.30.2 How to apply for a FLISP Grant

- a) To apply for a FLISP grant, you must first go to your bank or financial institution and apply for a home loan. For that you will need:
- b) Certified copy of your South African ID or passport/permanent residence permit
- c) Copy of your signed Offer to Purchase the house or property.
- d) Proof of your current residential address
- e) Official salary slip or stamped bank statement showing the last three months of income.
- f) To qualify for a home loan, you have to be over 21, have been employed for a minimum of six months, have no defaults on your credit profile and earn above the minimum salary requirement as decided by your chosen bank. If your home loan application is denied, your FLISP application will not be considered.
- g) Once this has been completed:
- h) Ask for an "Approval in Principle" letter from the bank.
- i) Register on the FLISP website: www.flisp.co.za or go to your municipal offices to register for a FLISP grant.

Compile the following certified documents for your application:

- 1) Home Loan Approval in Principle letter from your bank
- 2) Completed FLISP application form available from National Housing Finance Corporation (NHFC) website
- 3) RSA ID document or permanent residence permit
- 4) Certified copies of birth certificates/RSA IDs of all your dependents, and proof of foster children guardianship (where applicable)
- 5) Proof of marriage, civil union or partnership (an affidavit can be done for the latter)
- 6) Divorce settlement (where applicable)
- 7) Spouse's death certificate (where applicable)
- 8) Proof of monthly income
- 9) Agreement of sale for the property or building contract and approved building plan (where applicable)
- 10) Once this is done, your completed FLISP application will be sent to the National Housing Finance Corporation to be processed.

3.30.3 Recommendation to be submitted to Council to deal with the Disposal of land.

- That the Council request for the 50% discount on the market value of the property like other Township for the qualified beneficiaries of the GAP housing
- That the Beneficiaries above the threshold to pay the market value of the property
- That the qualified beneficiaries on the FLISP program be exhausted guided by the CoGHSTA or Housing SBU.
- That the qualified beneficiaries be engaged on the program of FLISP

- That the duration for the beneficiary's payment as detailed above be paid within 24 months
- That the title deeds be registered for the BNG or RDP sites as soon as possible with the assistance with CoGHSTA.
- That the Title deeds for the GAP and High income once the settlement amount is paid
- That the encroachment and illegal building be attended by the Municipality relevant SBU.
- That pro-forma kind of ownership be provided for the verified beneficiaries in order to submit AS-BUILT building plans.
- That no exchange of land through sales by beneficiaries should be entertained, but only beneficiaries as per the data base once verifies be provided with the pro-forma ownership of land.
- That the remaining sites for GAP and High Income be disposed through the Municipal Land Policy.
- That the BNG beneficiaries within the GAP housing sites be allocated sites to either Polokwane Extension 134 or extension 40 as analysed.
- That legal services deal with all legal matter that may arise as a result of executing this resolution.

3.31 Polokwane Housing Association – PHA

The City of Polokwane is a leader within the province as it has an established housing entity (***Thabatshweu Housing Company PTY LTD***) – trading as Polokwane Housing Association - PHA), but the responsibilities that come with the fully and effective functioning of the PHA need to be addressed during the next five-year period to ensure that a sound base is established for building sustainable **integrated human settlements**. The focus should be on identification of mechanisms to fast-track delivery of social housing and therefore the level 2 accreditation of the PHA becomes critical and essential. This will also result that the Service Delivery Agreement (SDA) should be reviewed to incorporate these aspects. This will improve the property portfolio of the PHA and assist towards the establishment thereof as a viable municipal entity.

Critical for the operational requirements of the PHA will be the adherence and compliance of all integrated settlement establishment (spatial plans) with the Spatial Development Framework of the City of Polokwane. The PHA must also develop mechanisms to effectively deal with the conclusion and finalisation of the Garena housing project and to review and update the housing chapter. The development of a communication plan will assist the PHA to create awareness and obtain buy-in from the private sector with regards to planned developments. Human settlement demand database and other forms of pieces of information required need to be updated regularly and communicated to all various stakeholders as means to obtain buy-in. The PHA is also responsible for effective co-ordinated and regulated building and development within the municipal area.

PHA is currently managing **508 units** located in the City of Polokwane, **Ladanna** with an estimated **1,524** residents and **201** Community Residential Units. Seshego **CRU** with an estimated 567 residents. The projects are known as the **Ga-rena Hosing Village and Seshego CRU** and both projects and consists of a mixture of one-, two- and three-bedroom units and shops, shops, Live and work units for the CRU project. Both are within a radius of 5km from the CBD provides housing with easy access to transport and social amenities / places of interest.

3.35 Land parcels earmarked for Development of New Projects

Planned Development Start date from 2023-2025, The land parcels earmarked for development are the following: i.e.

- ✓ **Polokwane Ext 106 to deliver 546 student bed housing units. Planned construction.**
- ✓ **Polokwane Ext 107 to deliver 754 GAP market rental housing units. Planned construction.**
- ✓ **Polokwane Ext 76 to deliver 240 social housing units. Planned construction**
- ✓ **Polokwane Ext 79 to deliver 100 social housing units.**
- ✓ **Construction Total number of housing units = 1 952 housing units**

All these land parcels are situated within the development zone of Polokwane Municipality with vibrant development activities around them. Townships have been established on these land parcels and there are no bulk requirements.

3.36 Proposed Development Options

The following will be the development options that PHA will consider:

(a) Delivering housing on a development lease approach.

- The developer takes the risks of developing and managing housing units over an agreed period of time. At the end of the period the facility is transferred to PHA

(b) Delivering housing as a developer.

- PHA raises the funding required and provide management services like the Ga- Rena model.

(c) Acquiring CRU housing stock to provide property management services.

- PHA acquires these projects from CoGHSTA in an effort to grow its property portfolio.

(d) Providing student accommodation.

- The entity has Investigated the possibility of providing student accommodation. Each stream makes clear the following:
 - ❖ Type of development,
 - ❖ unit numbers,
 - ❖ facilities/amenities etc.
 - ❖ Status of land – town planning processes
 - ❖ Funding options and envisaged budget
 - ❖ Target market

(e) Project development agreement – i.e.,

PHA as developer vs developmental lease and all that which goes with either option.

- The **development lease** seems to be the preferred model to follow as PHA will not have any risk at all. At the end of the lease, the properties will be transferred to PHA. This approach is similar to the one the municipality has with developers on the **Motor City development**.
- The **developer approach model** will expose PHA to all kinds of risks that PHA is not ready to deal with.

PHA manages social housing stock in close cooperation with the residents through tenant committees and tenant meetings. It wants to provide **quality accommodation** in affordable ways, also working against slum conditions and promoting civic pride. PHA management product aims at being participatory and integrative of physical, social and human aspects.

a. Housing development

Polokwane Housing Association continues to identify possibilities for new housing development in the inner City, through Greenfield development, refurbishment or conversion of buildings and offices for residential uses. It wants to develop housing in response to unnecessary dislocation of people that are sometimes caused by so-called urban renewal processes.

b. Housing Information

A housing information desk provides information and advice on how to access various affordable housing options and housing subsidies, as well as information on housing policy, rights and responsibilities.

C, community Empowerment

PHA wants to support its tenant community through linkages to other social support services and empowerment programmes. It also wants to ensure that low-income housing, social and non-social housing in the inner city is on the agenda of relevant role players—local and provincial government, financial institutional, etc.—through an active advocacy programme. In conjunction with its partners, it advocates inner city residential opportunities for those previously excluded and without access. This is done through local community forums, participation in discussions on urban renewal, and so forth.

3.37 PHA Key Success over the past 5 years

- Maintain unqualified audit opinion for 8 years.
- Maintain level 2 accreditation for 8 years.
- Settling the NHFC Loan
- Successfully implementing 494 social housing units in Annadale Ext 2 which is 90% complete.

CHAPTER Four – Economic Analysis

4. INTRODUCTION

The following statistical overview report aims to quantify the economic, demographic and socio-economic environment of Polokwane Local Municipality in context of its neighbouring regions, the district, the province and South Africa. A better understanding of the demographic, economic and socio-economic environment could inform stakeholders to implement and monitor plans and policies that will allow for a healthy, growing and inclusive economy and society.

Understanding the changes in the composition of the population with respect to population group, age and gender is vital in the face of growing pressure on food, energy, water, jobs and social support on the country's citizens. An understanding of how the total fertility rates, age-specific fertility rates, sex ratios at birth, life expectancies and international migration affect the respective population groups, ages and genders is essential for effective planning on a spatial level. The first section of the Statistical Overview Report will aim to disentangle the changes in the Polokwane Local Municipality demographics in context of other locals of the region, the districts, the Province and South Africa.

The second section will provide insights into the economic environment of Polokwane Local Municipality in relation to the other local municipality in the region, the district, the province and South Africa's performance. The changing economic environment subsequently has an effect on the ability of the economy to create jobs. This section will therefore also include analysis on the employment and subsequent income dynamics of Polokwane Local Municipality.

The third component of the Statistical Overview will investigate issues pertaining to the socio-economic environment of residents in Polokwane Local Municipality. Analysis will include a review of the Human Development Index (HDI), Gini, poverty, education, population density, crime, bulk infrastructure, international trade and tourism indicators relative to that of the other locals of the region, the districts, the Province and South Africa.

4.1. DEMOGRAPHY

In this section, an overview is provided of the demography of the Polokwane Local Municipality and all its neighbouring regions, Capricorn District Municipality, Limpopo Province and South Africa as a whole.

4.1.1 Total Population

Population statistics is important when analysing an economy, as the population growth directly and indirectly impacts employment and unemployment, as well as other economic indicators such as economic growth and per capita income.

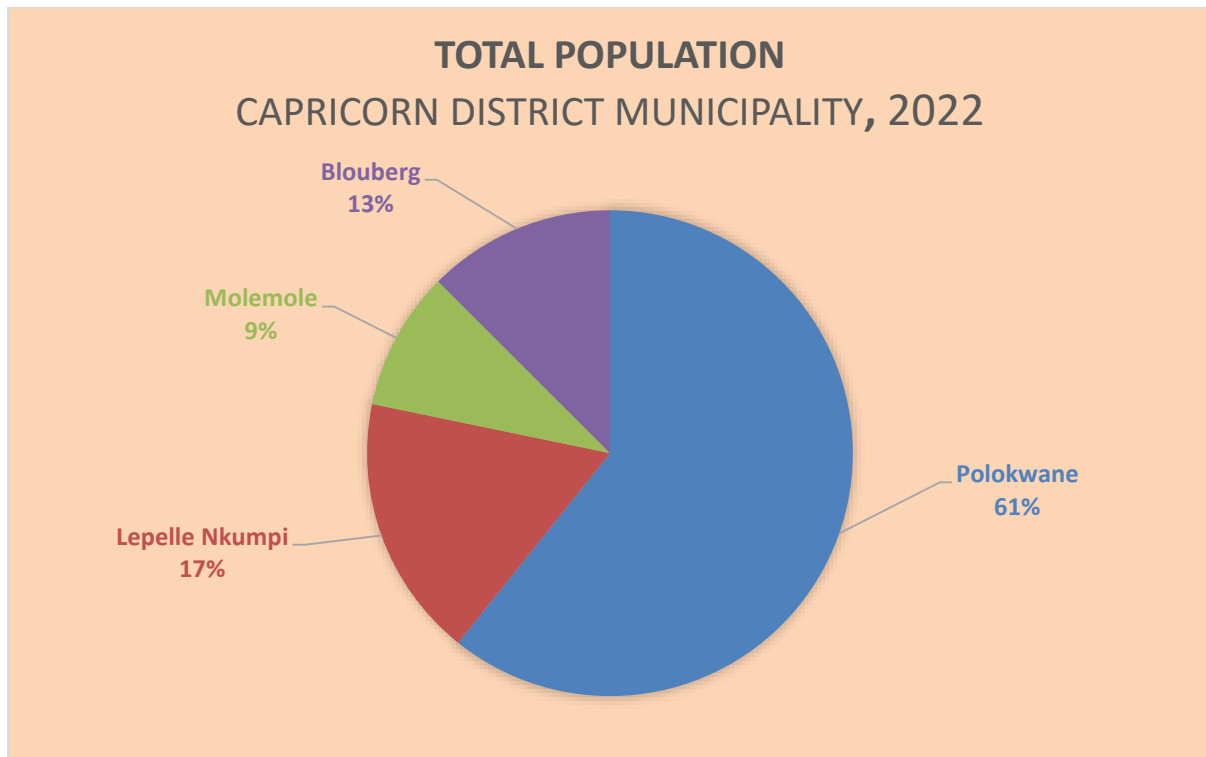

TABLE 1. TOTAL POPULATION - POLOKWANE, CAPRICORN, LIMPOPO AND NATIONAL TOTAL, 2011-2021[NUMBERS PERCENTAGE]

Financial Year	Polokwane	Capricorn	Limpopo	National	Polokwane as % of District	Polokwane as % of Province	Polokwane as % of National
2011	739,370	1,276,875	5,483,449	52,002,949	57.9%	13.5%	1.42%

2013	763,411	1,298,641	5,574,923	53,653,787	58.8%	13.7%	1.42%
2014	776,023	1,311,783	5,631,036	54,483,679	59.2%	13.8%	1.42%
2015	789,010	1,326,204	5,693,046	55,322,524	59.5%	13.9%	1.43%
2016	801,573	1,340,635	5,755,650	56,163,092	59.8%	13.9%	1.43%
2017	814,036	1,355,633	5,820,850	57,034,929	60.0%	14.0%	1.43%
2018	826,161	1,370,927	5,886,950	57,910,332	60.3%	14.0%	1.43%
2019	838,161	1,386,463	5,953,566	58,780,511	60.5%	14.1%	1.43%
2020	849,937	1,402,137	6,020,136	59,646,053	60.6%	14.1%	1.42%
2021	859,671	1,415,045	6,075,222	60,324,819	60.8%	14.2%	1.43%
Average Annual Growth							
2011-2021	1.52%	1.03%	1.03%	1.50%			

Source: IHS Global Insight 2022

With 859 649 people, the Polokwane Local Municipality housed 1.43% of South Africa's total population in 2021. Between 2011 and 2021 the population growth averaged 1.52% per annum which is slightly higher than the growth rate of South Africa as a whole (1.50%). Compared to Capricorn's average annual growth rate (1.03%), the growth rate in Polokwane's population at 1.52% was close to double than that of the district municipality.

**CHART 1. TOTAL POPULATION - POLOKWANE AND THE REST OF CAPRICORN, 2021
[PERCENTAGE]**

Source: IHS Global Insight 2022

When compared to other regions, the Polokwane Local Municipality accounts for a total population of 859 671, or 60.75% of the total population in the Capricorn District Municipality, which is the most populous region in the Capricorn District Municipality for 2021. The ranking in terms of the size of Polokwane compared to the other regions remained the same between 2011 and 2021. In terms of its share the Polokwane Local Municipality was significantly larger in 2021 (60.75%) compared to what it was in 2011 (57.90%). When looking at the average annual growth rate, it is noted that Polokwane ranked highest (relative to its peers in terms of growth) with an average annual growth rate of 1.52% between 2011 and 2021.

2.1.1 Population projections

Based on the present age-gender structure and the present fertility, mortality and migration rates, Polokwane's population is projected to grow at an average annual rate of 1.52% from 859 671 in 2021 to 922 151 in 2026.

TABLE 2. POPULATION PROJECTIONS - POLOKWANE, CAPRICORN, LIMPOPO AND NATIONAL TOTAL, 2021-2026 [NUMBERS PERCENTAGE]

Financial Year	Polokwane	Capricorn	Limpopo	National	Polokwane as % of District	Polokwane as % of Province	Polokwane as % of National
2021	859,671	1,415,045	6,075,222	60,324,819	60.8%	14.2%	1.43%
2022	874,112	1,426,992	6,127,027	61,208,477	61.3%	14.3%	1.43%
2023	886,275	1,442,291	6,193,080	62,055,961	61.4%	14.3%	1.43%
2024	898,307	1,457,236	6,257,498	62,898,069	61.6%	14.4%	1.43%
2025	910,247	1,471,885	6,320,538	63,735,866	61.8%	14.4%	1.43%
2026	922,151	1,486,318	6,382,540	64,569,690	62.0%	14.4%	1.43%
Average Annual Growth							
2021-2026	1.42%	1.01%	1.01%	1.39%			

Source: IHS Global Insight 2022

The population projection of Polokwane Local Municipality shows an estimated average annual growth rate of 1.42% between 2021 and 2026. The average annual growth rate in the population over the projection period for Capricorn District Municipality, Limpopo Province and South Africa is 1.01%, 1.01% and 1.39% respectively and is lower than the average annual growth in the Polokwane Local Municipality.

4.1.2 Population by population group, Gender and Age

Total population can be categorized according to the population group, as well as the sub-categories of age and gender. The population groups include African, White, Coloured and Asian, where the Asian group includes all people originating from Asia, India and China. The age subcategory divides the population into 5-year cohorts, e.g., 0-4, 5-9, 10-13, etc.

TABLE 3. POPULATION BY GENDER - POLOKWANE AND THE REST OF CAPRICORN DISTRICT MUNICIPALITY, 2021 [NUMBER].

Municipality Name	Male	Female	Total
Polokwane	417,940	441,730	859,671
Blouberg	79,900	97,080	176,980
Molemole	59,930	70,953	130,883
Lepele-Nkumpi	113,210	134,301	247,511
Capricorn	670,981	744,064	1,415,045

Source: IHS Global Insight 2022

Polokwane Local Municipality's male/female split in population was 94.6 males per 100 females in 2021. The Polokwane Local Municipality appears to be a fairly stable population with the share of female population (51.38%) being very similar to the national average of (51.10%). In total there were 441 730 (51.38%) females and 417 940 (48.62%) males. This is different from the Capricorn District Municipality as a whole where the female population counted 744 064 which constitutes 52.58% of the total population of 1.41 million.

TABLE 4. POPULATION BY POPULATION GROUP, GENDER AND AGE - POLOKWANE LOCAL MUNICIPALITY, 2021 [NUMBER].

Age	African		White		Coloured		Asian	
	Male	Female	Male	Female	Male	Female	Male	Female

Total	394,950	418,551	16,455	16,697	3,594	4,050	2,940	2,433

Source: IHS Global Insight 2022

In 2021, the Polokwane Local Municipality's population consisted of 94.63% African (813 501), 3.86% White (33 152), 0.89% Coloured (7 644) and 0.63% Asian (5 373) people.

The largest share of population is within the young working age (25-44 years) age category with a total number of 295 221 or 34.34% of the total population. The age category with the second largest number of people is the babies and kids (0-14 years) age category with a total share of (252 634) 29.39%, followed by the teenagers and youth (15-24 years) age category with 161 666 people. The age category with the least number of people is the retired / old age (65 years and older) age category with only 43946 people.

4.1.3 Number of Households by Population Group

If the number of households is growing at a faster rate than that of the population it means that the average household size is decreasing, and vice versa. In 2021, the Polokwane Local Municipality comprised of 245 963 households. This equates to an average annual growth rate of 1.86% in the number of households from 2011 to 2021. With an average annual growth rate of 1.52% in the total population, the average household size in the Polokwane Local Municipality is by implication decreasing.

TABLE 5. NUMBER OF HOUSEHOLDS - POLOKWANE, CAPRICORN, LIMPOPO AND NATIONAL TOTAL, 2011-2021 [NUMBER PERCENTAGE]

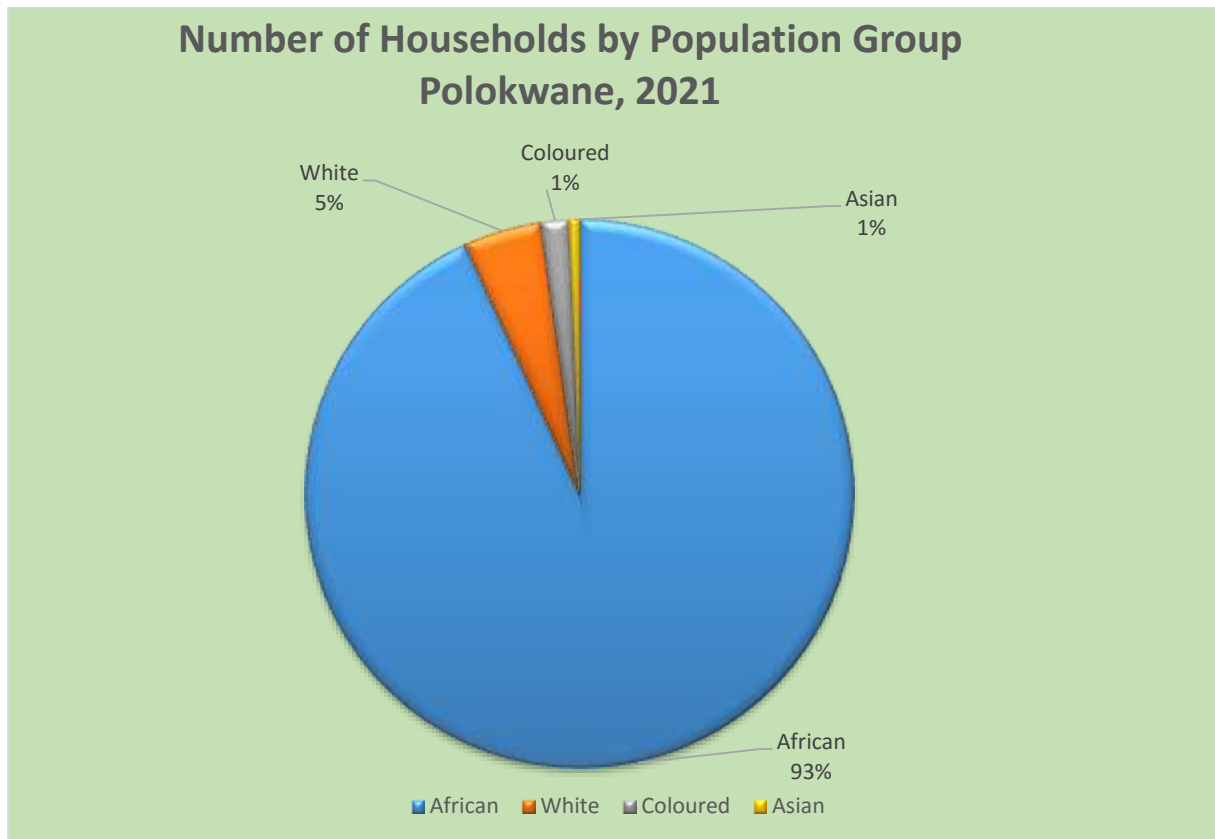

Financial Year	Polokwane	Capricorn	Limpopo	National	Polokwane as % of District	Polokwane as % of Province	Polokwane as % of National
2011	204,605	338,119	1,402,888	14,328,269	60.51%	14.58%	1.43%
2012	209,651	343,818	1,425,535	14,645,492	60.98%	14.71%	1.43%
2013	214,475	349,176	1,447,282	14,926,188	61.42%	14.82%	1.44%
2014	219,534	355,003	1,471,581	15,196,029	61.84%	14.92%	1.44%
2015	228,463	367,088	1,522,587	15,598,064	62.24%	15.00%	1.46%
2016	235,365	376,134	1,561,493	15,970,063	62.57%	15.07%	1.47%
2017	240,216	381,998	1,586,960	16,256,581	62.88%	15.14%	1.48%
2018	242,775	384,257	1,597,185	16,410,325	63.18%	15.20%	1.48%
2019	242,806	382,552	1,590,206	16,434,113	63.47%	15.27%	1.48%
2020	242,018	379,621	1,577,058	16,392,242	63.75%	15.35%	1.48%
2021	245,963	384,389	1,596,890	16,639,102	63.99%	15.40%	1.48%
Average Annual growth							
2011-2021	1.86%	1.29%	1.30%	1.51%			

Source: IHS Global Insight 2022

Relative to the district municipality, the Polokwane Local Municipality had a higher average annual growth rate of 1.86% from 2011 to 2021. In contrast, the province had an average annual growth rate of 1.30% from 2011. South Africa as a whole had a total of 16.6 million households, with a growth rate of 1.51%, thus growing at a lower rate than the Polokwane.

The composition of the households by population group consists of 93.16% which is ascribed to the African population group with the largest number of households by population group. The White population group had a total composition of 4.62% (ranking second). The Coloured population group had a total composition of 1.60% of the total households. The smallest population group by households is the Asian population group with only 0.62% in 2021.

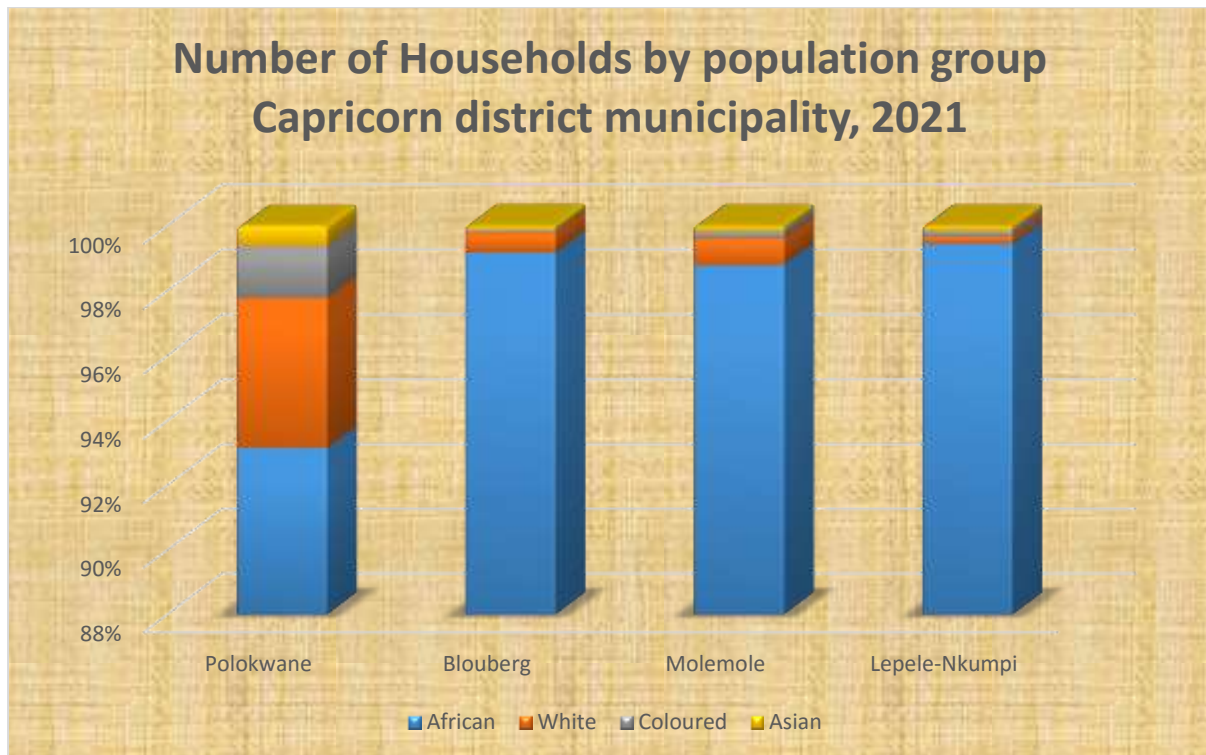

CHART 2. NUMBER OF HOUSEHOLDS BY POPULATION GROUP - POLOKWANE LOCAL MUNICIPALITY, 2021 [PERCENTAGE]

Source: IHS Global Insight 2022

The growth in the number of African headed households was on average 1.79% per annum between 2011 and 2021, which translates in the number of households increasing by 41358 in the period. Although the Coloured population group is not the biggest in size, it was however the fastest growing population group between 2011 and 2021 at 11%. The average annual growth rate in the number of households for all the other population groups has increased with 1.86%.

Source: IHS Global Insight 2022

4.1.4 HIV+ and AIDS estimates

HIV and AIDS can have a substantial impact on the growth of a particular population. However, there are many factors affecting the impact of the HIV virus on population progression: adult HIV prevalence rates; the speed at which the virus progresses; age distribution of the virus; the mother-to-child transmission; child treatment; adult treatment; and the percentage by which the virus decreases total fertility. ARV treatment can also prolong the lifespan of people that are HIV+. In the absence of any treatment, people diagnosed with HIV live for approximately 10 years before reaching the final stage of the disease (called AIDS). When patients reach this stage, recovery is highly unlikely.

HIV+ and AIDS estimates are defined as follows:

The HIV+ estimates are calculated by using the prevalence rates from the HIV/AIDS model built by the Actuarial Society of Southern Africa (ASSA-2008). These rates are used as base rates on a provincial level. IHS slightly adjusted the provincial ASSA-2010 data to reflect the national HIV Prevalence rate more accurately per population group as used in the national demographic models. The ASSA model in turn uses the prevalence rates from various primary

data sets, in particular the HIV/AIDS surveys conducted by the Department of Health and the Antenatal clinic surveys. Their rates are further adjusted for over-reporting and then smoothed.

TABLE 7. NUMBER OF HIV+ PEOPLE - POLOKWANE, CAPRICORN, LIMPOPO AND NATIONAL TOTAL, 2011 -2021 [NUMBER AND PERCENTAGE]

Financial Year	Polokwane	Capricorn	Limpopo	National	Polokwane as % of District	Polokwane as % of Province	Polokwane as % of National
2011	57,139	94,046	409,217	6,475,368	60.76%	13.96%	0.88%
2012	58,500	95,650	415,518	6,630,030	61.16%	14.08%	0.88%
2013	59,825	97,265	421,944	6,769,648	61.51%	14.18%	0.88%
2014	61,184	98,997	428,948	6,908,129	61.80%	14.26%	0.89%
2015	62,586	100,859	436,555	7,053,897	62.05%	14.34%	0.89%
2016	63,878	102,608	443,662	7,195,964	62.25%	14.40%	0.89%
2017	65,245	104,541	451,526	7,360,690	62.41%	14.45%	0.89%
2018	66,629	106,556	459,640	7,534,474	62.53%	14.50%	0.88%
2019	67,940	108,507	467,377	7,712,743	62.61%	14.54%	0.88%
2020	69,270	110,535	475,323	7,899,820	62.67%	14.57%	0.88%
2021	70,581	112,582	483,413	8,085,077	62.69%	14.60%	0.87%
Average Annual Growth							
2011-2021	2.14%	1.82%	1.68%	2.24%			

Source: IHS Global Insight 2022

In 2021, 70581 people in the Polokwane Local Municipality were infected with HIV. This reflects an increase at an average annual rate of 2.14% since 2011, and in 2021 represented 8.21% of the local municipality's total population. The Capricorn District Municipality had an average annual growth rate of 1.82% from 2011 to 2021 in the number of people infected with HIV, which is lower than that of the Polokwane Local Municipality. The number of infections in the Limpopo Province increased from 409217 in 2011 to 483413 in 2021. When looking at the South Africa as a whole it can be seen that the number of people that are infected increased from 2011 to 2021 with an average annual growth rate of 2.24%.

CHART 3. AIDS PROFILE AND FORECAST - POLOKWANE LOCAL MUNICIPALITY, 2011-2026 [NUMBERS]

Source: IHS Global Insight 2022

Presenting the number of HIV+ people against the number of people living with AIDS, the people with AIDS added up to 1511 in 2011 and 818 for 2021. This number denotes a decrease from 2011 to 2021 with a high average annual rate of 5.95% (or -693 people). For the year 2021, they represented 0.10% of the total population of the entire local municipality.

3. Economy

The economic state of Polokwane Local Municipality is put in perspective by comparing it on a spatial level with its neighbouring locals, Capricorn District Municipality, Limpopo Province and South Africa.

The Polokwane Local Municipality does not function in isolation from Capricorn, Limpopo Province, South Africa and the world and now, more than ever, it is crucial to have reliable information on its economy for effective planning. Information is needed that will empower the municipality to plan and implement policies that will encourage the social development and economic growth of the people and industries in the municipality respectively.

4.2 Gross Domestic Product by Region (GDP-R)

The Gross Domestic Product (GDP), an important indicator of economic performance, is used to compare economies and economic states.

GDP-R can be measured using either current or constant prices, where the current prices measure the economy in actual Rand, and constant prices measures the economy by removing the effect of inflation, and therefore captures the real growth in volumes, as if prices were fixed in a given base year.

TABLE 8. GROSS DOMESTIC PRODUCT (GDP) - POLOKWANE, CAPRICORN, LIMPOPO AND NATIONAL TOTAL, 2011-2021 [R BILLIONS, CURRENT PRICES]

Financial Year	Polokwane	Capricorn	Limpopo	National	Polokwane as % of district	Polokwane as % of province	Polokwane as % of national
2011	54,3	71,4	229,2	3,327,0	76.08%	23.72%	1.63%
2012	59,4	77,8	245,4	3,566,3	76.36%	24.20%	1.67%
2013	64,9	84,7	265,5	3,868,6	76.63%	24.47%	1.68%
2014	69,9	91,1	281,6	4,133,8	76.81%	24.85%	1.69%
2015	75,7	98,4	298,7	4,420,7	77.01%	25.37%	1.71%
2016	83,3	107,9	324,4	4,759,5	77.13%	25.67%	1.75%
2017	89,4	115,9	348,5	5,078,1	77.19%	25.68%	1.76%
2018	95,5	123,7	372,7	5,348,6	77.22%	25.64%	1.79%
2019	99,1	128,4	390,1	5,613,6	77.22%	25.42%	1.77%
2020	99,7	129,2	397,0	5,556,9	77.19%	25.12%	1.79%
2021	115,1	149,3	471,5	6,225,4	77.10%	24.41%	1.85%

Source: IHS Global Insight 2022

With a GDP of R 115.1 billion in 2021 (up from R 54.3 billion in 2011); the Polokwane Local Municipality contributed 77.10% to the Capricorn District Municipality GDP of R 149.3 billion

in 2021 increasing in the share of the Capricorn from 76.1% in 2011. The Polokwane Local Municipality contributes 24.41% to the GDP of Limpopo Province and 1.85% of the GDP of South Africa which had a total GDP of R 6.2 trillion in 2020 (as measured in nominal or current prices). It's contribution to the national economy stayed similar in importance from 2011 when it contributed 1.63% to South Africa, but it is lower than the peak of 1.85% in 2021.

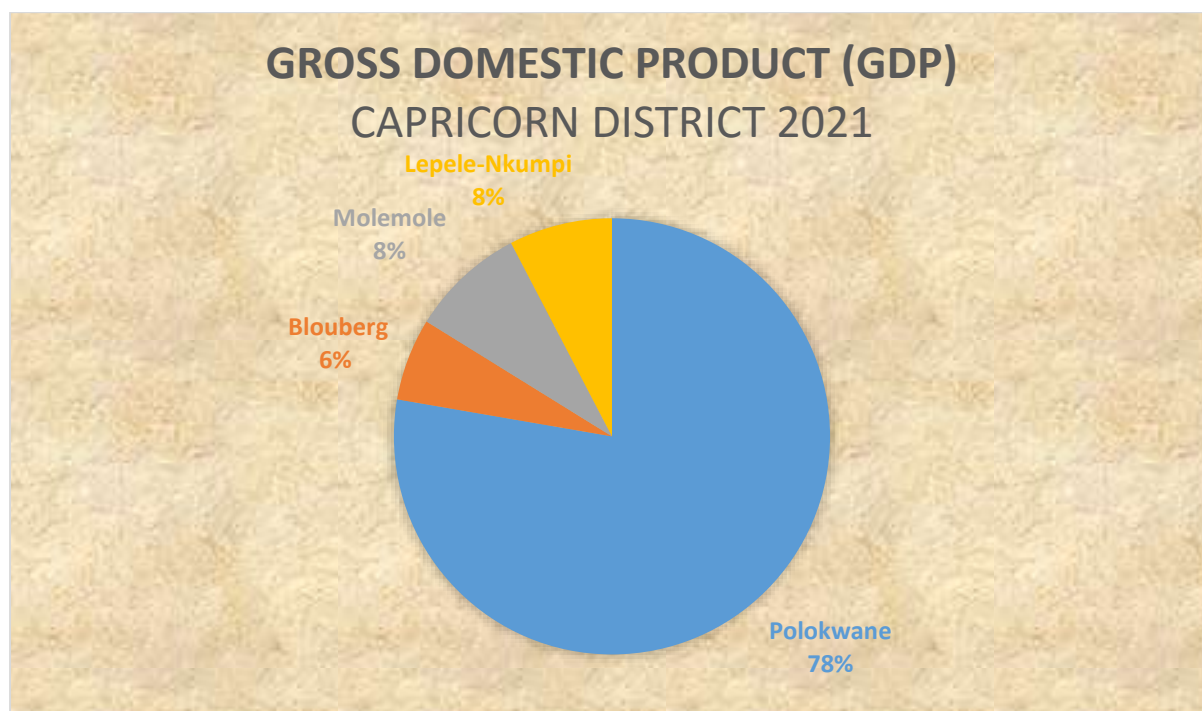

TABLE 9. GROSS DOMESTIC PRODUCT (GDP) - POLOKWANE, CAPRICORN, LIMPOPO AND NATIONAL TOTAL, 2011-2021 [ANNUAL PERCENTAGE CHANGE, CONSTANT 2015 PRICES]

Financial Year	Polokwane	Capricorn	Limpopo	National
2011	7.5%	6.4%	2.5%	3.2%
2012	3.0%	2.6%	1.3%	2.4%
2013	3.3%	2.9%	2.5%	2.5%
2014	2.0%	1.8%	1.0%	1.4%
2015	2.2%	2.0%	1.9%	1.3%
2016	3.1%	2.8%	0.1%	0.7%
2017	0.9%	0.9%	1.4%	1.2%
2018	1.5%	1.4%	1.2%	1.5%
2019	0.0%	0.0%	0.1%	0.3%
2020	-5.9%	-5.9%	-7.2%	-6.3%
2021	7.1%	6.9%	7.0%	4.9%
Average Annual Growth				
2011-2021	2.3%	2.0%	1.1%	1.2%

Source: IHS Global Insight 2022

In 2021, the Polokwane Local Municipality achieved an annual growth rate of 7.1% which is a significant increase in GDP growth than the Limpopo Province's 7.0%, but is higher to that of South Africa, where the 2021 GDP growth rate was 4.9%. Contrary to the short-term growth rate of 2020, the longer-term average growth rate for Polokwane (2.3%) is significantly higher than that of South Africa (1.2%). The economic growth in Polokwane peaked in 2011 at 7.5%.

CHART 4. GROSS DOMESTIC PRODUCT (GDP) - POLOKWANE LOCAL MUNICIPALITY AND THE REST OF CAPRICORN, 2021 [PERCENTAGE]

Source: IHS Global Insight 2022

The Polokwane Local Municipality had a total GDP of R 81.9 billion and in terms of total contribution towards Capricorn District Municipality the Polokwane Local Municipality ranked highest relative to all the regional economies to total Capricorn District Municipality GDP. This ranking in terms of size compared to other regions of Polokwane remained the same since 2011. In terms of its share, it was in 2021 (77.72%) significantly higher compared to what it was in 2011 (76%). For the period 2011 to 2021, the average annual growth rate of 1.50% of Polokwane was the highest relative to its peers in terms of growth in constant 2015 prices.

TABLE 10. GROSS DOMESTIC PRODUCT (GDP) - REGIONS WITHIN CAPRICORN DISTRICT MUNICIPALITY, 2010 TO 2020, SHARE AND GROWTH

Municipality Name	2021 (Current Prices)	Share of District Municipality	2015 (Constant Prices)	2021 (Constant Prices)	Average Annual growth
Polokwane	115,1	77,10%	69,3	81,9	2,25%
Blouberg	9,1	6,10%	5,7	6,4	1,18%
Molemole	13,0	8,73%	8,3	8,9	1,01%
Lepele-Nkumpi	12,1	8,07%	7,3	8,0	1,17%

Source: IHS Global Insight 2022

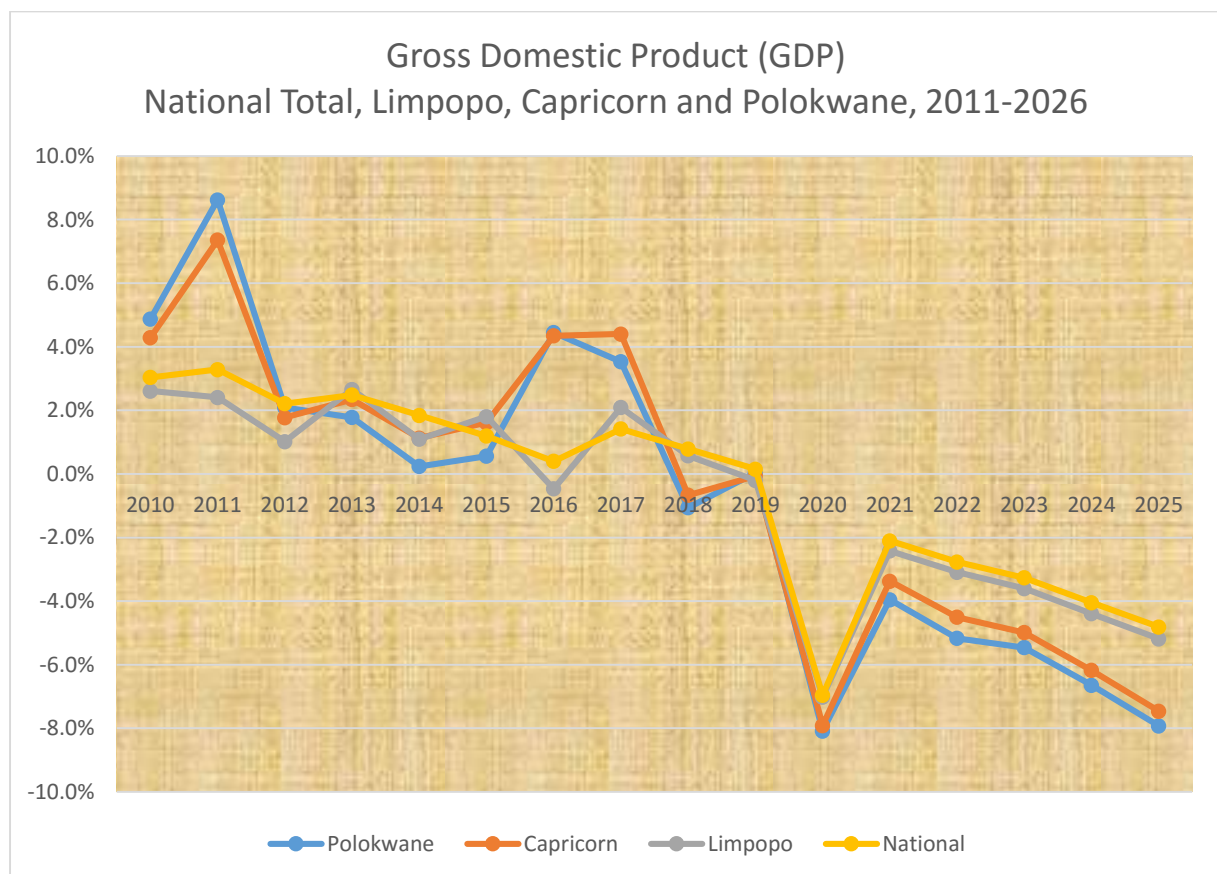

Polokwane had the highest average annual economic growth, averaging 2.25% between 2011 and 2021, when compared to the rest of the regions within Capricorn District Municipality. The

Molemole Local Municipality had the lowest average annual growth rate of 1.01%. Blouberg Local Municipality had the second highest average annual growth rate of 1.18% between 2011 and 2021.

3.1.1 Economic Growth Forecast

It is expected that Polokwane Local Municipality will grow at an average annual rate of 0.7% from 2021 to 2026. The average annual growth rate in the GDP of Capricorn District Municipality and Limpopo Province is expected to be 0.6% and 0.1% respectively. South Africa is forecasted to grow at an average annual growth rate of 0.1%, which is lower than that of the Polokwane Local Municipality.

TABLE 11. GROSS DOMESTIC PRODUCT (GDP) - POLOKWANE, CAPRICORN, LIMPOPO AND NATIONAL TOTAL, 2011-2026 [AVERAGE ANNUAL GROWTH RATE, CONSTANT 2011 PRICES]

Source: IHS Global Insight 2022

In 2026, Polokwane's forecasted GDP will be an estimated R 82.5 billion (constant 2015 prices) or 77.65% of the total GDP of Capricorn District Municipality. The ranking in terms of size of the Polokwane Local Municipality will remain the same between 2021 and 2026, with

a contribution to the Capricorn District Municipality GDP of 77.7% in 2026 compared to the 77.7% in 2021. At 1.76% average annual GDP growth rate between 2021 and 2026, Polokwane ranked the highest compared to the other regional economies.

TABLE 12. GROSS DOMESTIC PRODUCT (GDP) - REGIONS WITHIN CAPRICORN DISTRICT MUNICIPALITY, 2011 TO 2026, SHARE AND GROWTH

Municipality Name	2026 (Current Prices)	Share of District Municipality	2011 (Constant Prices)	2026 (Constant Prices)	Average Annual Growth
Polokwane	140,1	77,44%	69,3	85,7	1,4%

4.3 Gross Value Added by Region (GVA-R)

The Polokwane Local Municipality's economy is made up of various industries. The GVA-R variable provides a sector breakdown, where each sector is measured in terms of its *value added* produced in the local economy.

The summary table below puts the Gross Value Added (GVA) of all the regions in perspective to that of the Polokwane Local Municipality.

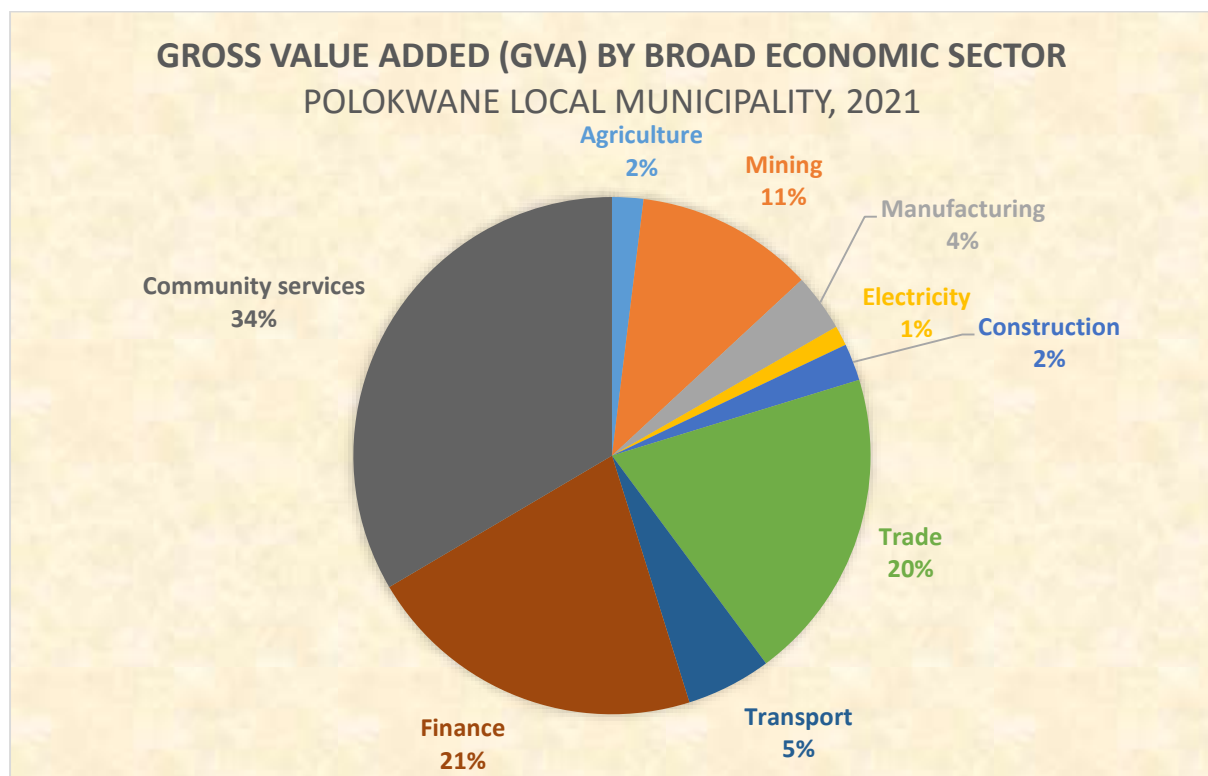

TABLE 13. GROSS VALUE ADDED (GVA) BY BROAD ECONOMIC SECTOR - POLOKWANE LOCAL MUNICIPALITY, 2021 [R BILLIONS, CURRENT PRICES]

SECTOR	Polokwane	Capricorn	Limpopo	National	Polokwane as % of district	Polokwane as % of province	Polokwane as % of national
1 Agriculture	2,0	2,9	12,9	152,8	67.57%	15.47%	1.32%
2 Mining	11,4	16,9	132,3	474,9	67.50%	8.67%	2.41%
3 Manufacturing	3,6	4,5	10,4	729,8	81.70%	35.53%	0.51%
4 Electricity	1,2	1,8	14,6	171,6	70.26%	8.78%	0.75%
5 Construction	2,3	3,0	7,7	141,0	78.51%	30.55%	1.69%
6 Trade	20,1	24,9	56,4	751,3	80.58%	35.64%	2.68%
7 Transport	5,4	6,6	15,1	397,7	81.98%	36.13%	1.37%
8 Finance	21,9	27,4	71,4	1,320,4	79.94%	30.73%	1.66%
9Community services	34,4	44,5	103,5	1,432,8	77.37%	33.26%	2.40%
Total Industries	102.80	132.90	424.70	5,572.60	77.35%	24.21%	1.84%

Source: IHS Global Insight 2022

In 2021, the community services sector is the largest contributor within Polokwane Local Municipality accounting for R 34.4 billion of the total GVA in the local municipality's economy. The sector that contributes the second most to the GVA of the Polokwane Local Municipality is the finance sector with R21.9 billion, followed by the trade sector with R20.1 billion. The sector that contributes the least to the economy of Polokwane Local Municipality is the electricity sector with a contribution of R 1.2 billion of the total GVA.

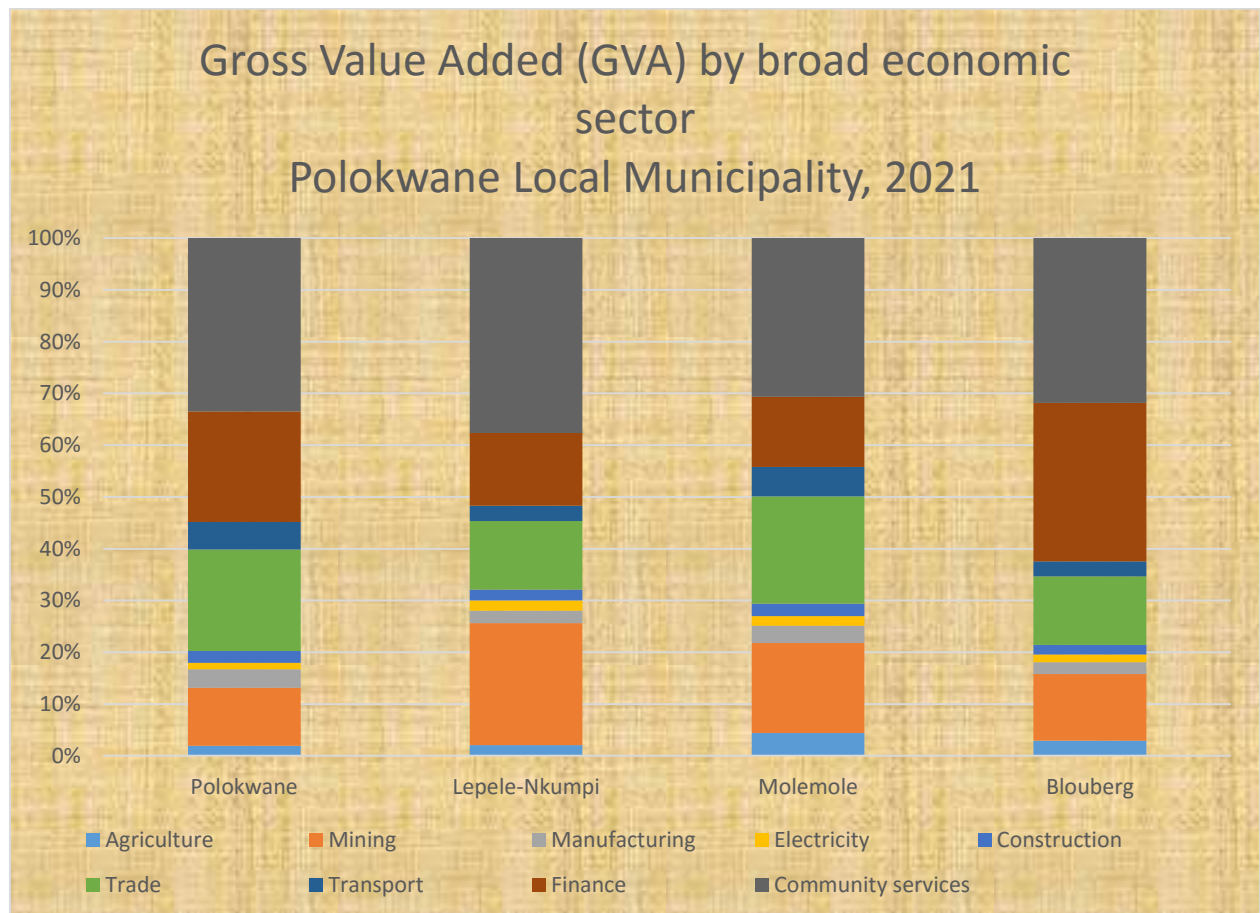

CHART 5. GROSS VALUE ADDED (GVA) BY BROAD ECONOMIC SECTOR - POLOKWANE LOCAL MUNICIPALITY, 2021 [PERCENTAGE COMPOSITION]

Source: IHS Global Insight 2022

The community sector, which includes the government services, is generally a large contributor towards GVA. When looking at all the regions within the Capricorn District Municipality, it is clear that Polokwane contributes the most community services towards its own GVA, with 77.37%, relative to the other regions within Capricorn District Municipality. The Polokwane municipality contributed R 102.8 billion or 77.35% to the GVA of Capricorn District Municipality. The Polokwane economy also contributes the most out of the overall GVA of Capricorn District Municipality of R132.9 billion.

CHART 6. GROSS VALUE ADDED (GVA) BY BROAD ECONOMIC SECTOR - POLOKWANE, BLOUBERG, MOLEMOLE AND LEPELE-NKUMPI, 2021 [PERCENTAGE COMPOSITION]

Source: IHS Global Insight 2022

3.2.1 Historical Economic Growth

For the period 2011 to 2021, the GVA in the agriculture sector had the highest average annual growth rate in Polokwane at 6.75%. The industry with the second highest average annual growth rate is the mining sector averaging at 6.73% per year. The construction sector had an average annual growth rate of -0.72%, while the electricity sector had the lowest average annual growth of -2.77%. Overall, a positive growth existed for all the industries in 2021 with an annual growth rate of 2.33% since 2011.

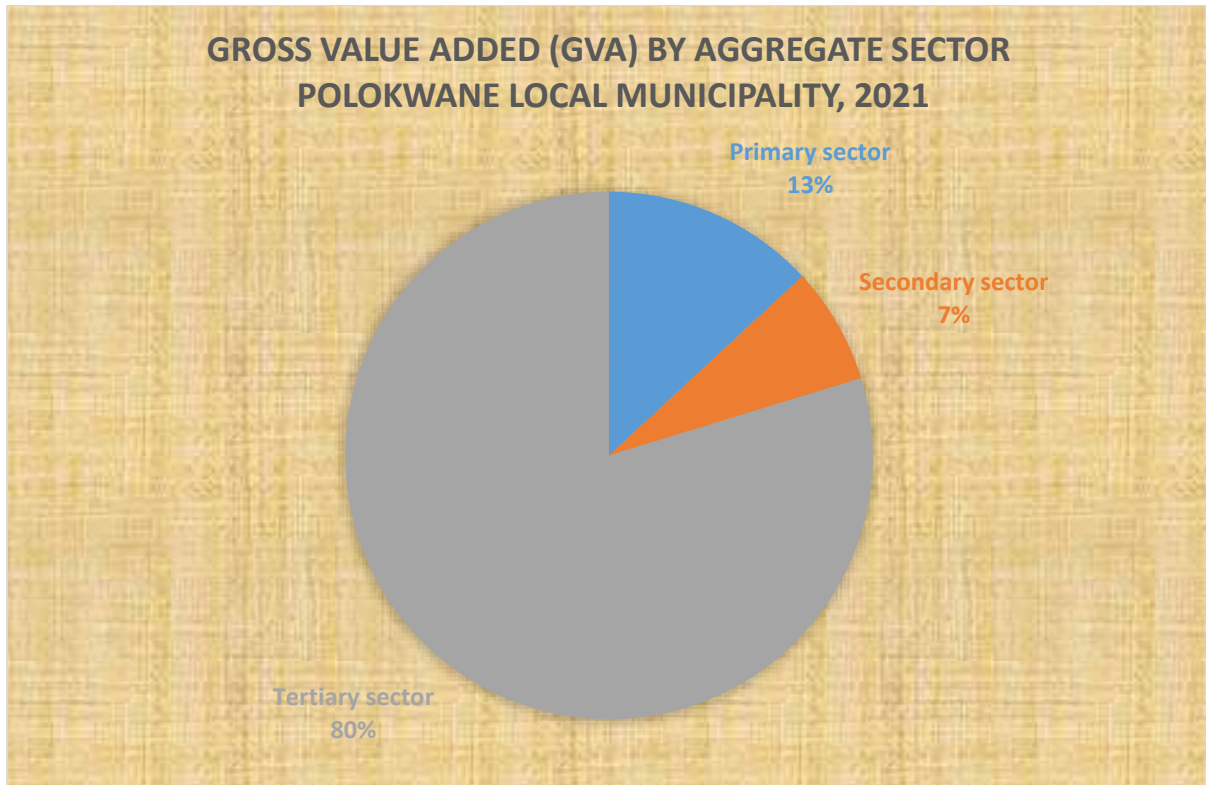

TABLE 14. GROSS VALUE ADDED (GVA) BY BROAD ECONOMIC SECTOR - POLOKWANE LOCAL MUNICIPALITY, 2011, 2016 AND 2021[R BILLIONS, 2015 CONSTANT PRICES]

Sector	2011	2016	2021	Average Annual Growth
Agriculture	1.0	1.20	1.8	6.75%
Mining	3.1	3.90	5.5	6.73%
Manufacturing	2.6	2.90	2.7	1.16%
Electricity	1.1	0.80	0.7	-2.77%
Construction	2.9	3.30	2.4	-0.72%
Trade	12.9	14.50	13.5	1.08%
Transport	3.8	4.60	4.3	1.95%
Finance	12.8	14.00	15.9	2.30%
Community Services	21.3	25.30	26.6	2.98%
Total Industries	61.4	70.50	73.4	2.33%

Source: IHS Global Insight 2022

The tertiary sector contributes the most to the Gross Value Added within the Polokwane Local Municipality at 79.7%. This is significantly higher than the national economy (70.0%). The secondary sector contributed a total of 7.2% (ranking second), while the primary sector contributed the least at 13.1%.

CHART 7. GROSS VALUE ADDED (GVA) BY AGGREGATE ECONOMIC SECTOR - POLOKWANE LOCAL MUNICIPALITY, 2021 [PERCENTAGE]

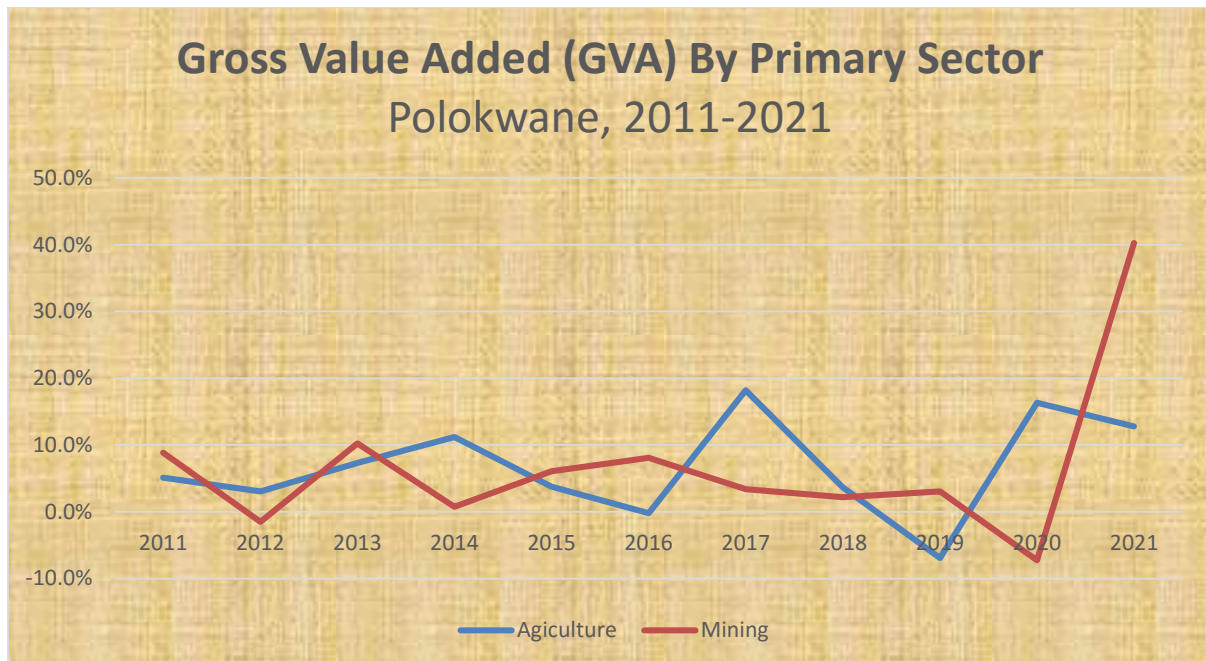

Source: IHS Global Insight 2022

The following is a breakdown of the Gross Value Added (GVA) by aggregated sector:

3.2.1.1 Primary Sector

The primary sector consists of two broad economic sectors namely the mining and the agricultural sector. The following chart represents the average growth rate in the GVA for both of these sectors in Polokwane Local Municipality from 2011 to 2021.

CHART 8. GROSS VALUE ADDED (GVA) BY PRIMARY SECTOR - POLOKWANE, 2011-2021 [ANNUAL PERCENTAGE CHANGE] 2015 CONSTANT PRICES

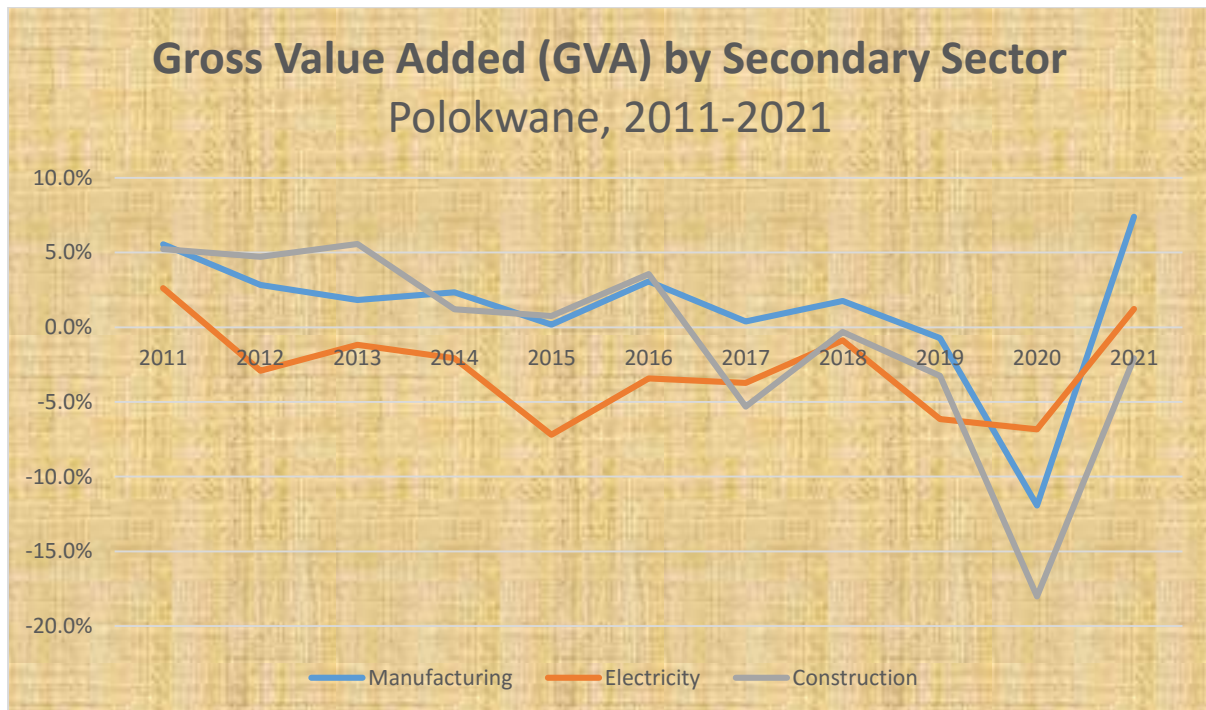

Source: IHS Global Insight 2022

Between 2011 and 2021, the agriculture sector experienced the highest positive growth in 2017 with an average growth rate of 18.2%. The mining sector reached its highest point of growth of 40.3% in 2021. The agricultural sector experienced the lowest growth for the period during 2019 at -6.9%, while the mining sector reaching its lowest point of growth in 2020 at -7.3%. Both the agriculture and mining sectors are generally characterised by volatility in growth over the period.

3.2.1.2 Secondary Sector

The secondary sector consists of three broad economic sectors namely the manufacturing, electricity and the construction sector. The following chart represents the average growth rates in the GVA for these sectors in Polokwane Local Municipality from 2011 to 2021.

CHART 9. GROSS VALUE ADDED (GVA) BY SECONDARY SECTOR - POLOKWANE, 2011-2021 [ANNUAL PERCENTAGE CHANGE]

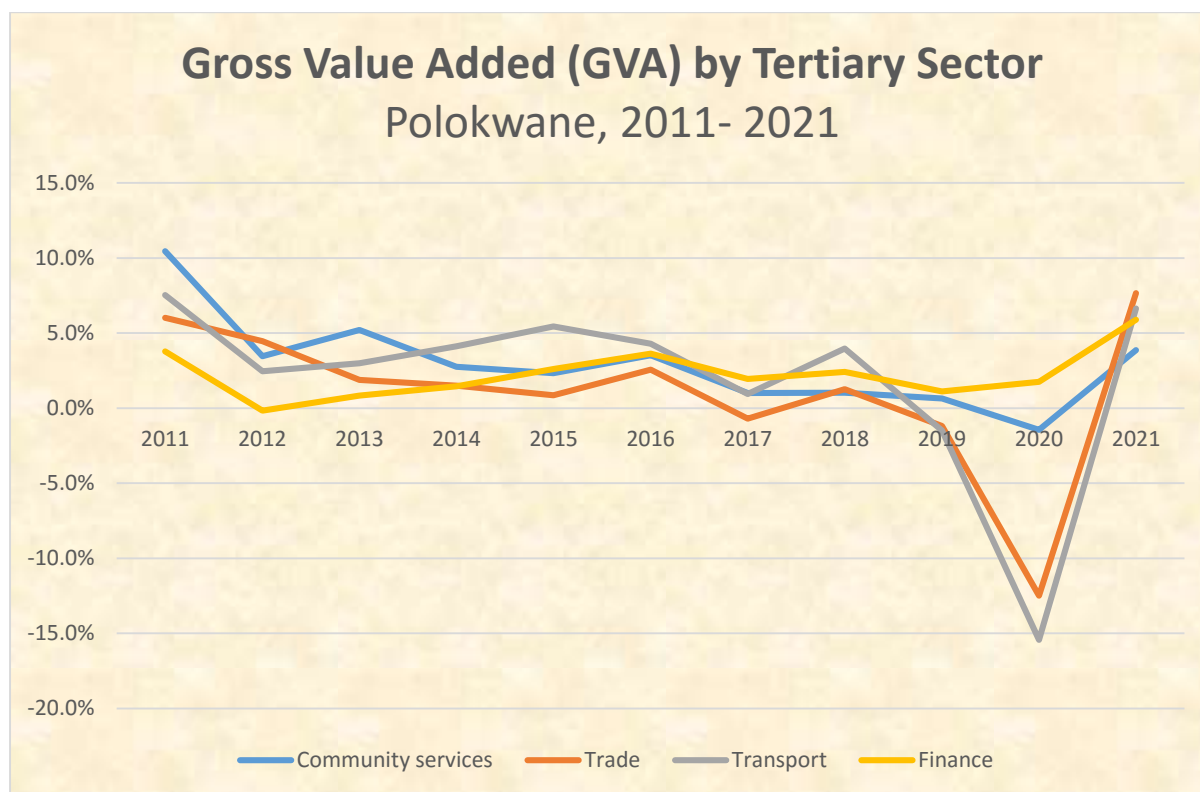

Source: IHS Global Insight 2022

Between 2011 and 2021, the manufacturing sector experienced the highest positive growth in 2021 with a growth rate of 7.4%. The construction sector reached its highest growth in 2013 at 5.6%. The manufacturing sector experienced its lowest growth in 2020 of -11.20%, while construction sector reached its lowest point of growth in 2020 as with -18.0% growth rate. The electricity sector experienced the highest growth in 2011 at 2.6%, while it recorded the lowest growth of -6.8% in 2020.

3.2.1.3 Tertiary Sector

The tertiary sector consists of four broad economic sectors namely the trade, transport, finance and the community services sector. The following chart represents the average growth rates in the GVA for these sectors in Polokwane Local Municipality from 2011 to 2021.

CHART 10. GROSS VALUE ADDED (GVA) BY TERTIARY SECTOR - POLOKWANE, 2011-2021 [ANNUAL PERCENTAGE CHANGE]

Source: IHS Global Insight 2022

The trade sector experienced the highest positive growth in 2011 with a growth rate of 7.5%. The transport sector reached its highest point of growth in 2011 at 7.5%. The finance sector experienced the highest growth rate in 2021 when it grew by 5.9% and recorded the lowest growth rate in 2012 at -0.2%. The Trade sector also had the lowest growth rate in 2020 at -12.5%. The community services sector, which largely consists of government, experienced its highest positive growth in 2011 with 10.5% and the lowest growth rate in 2020 with -1.4%.

3.2.2 Sector Growth forecast

The GVA forecasts are based on forecasted growth rates derived from two sources: historical growth rate estimates and national level industry forecasts. The projections are therefore partly based on the notion that regions that have performed well in the recent past are likely to continue performing well (and vice versa) and partly on the notion that those regions that have prominent sectors that are forecast to grow rapidly in the national economy (e.g. finance and telecommunications) are likely to perform well (and vice versa). As the target year moves further from the base year (2010) so the emphasis moves from historical growth rates to national-level industry growth rates.

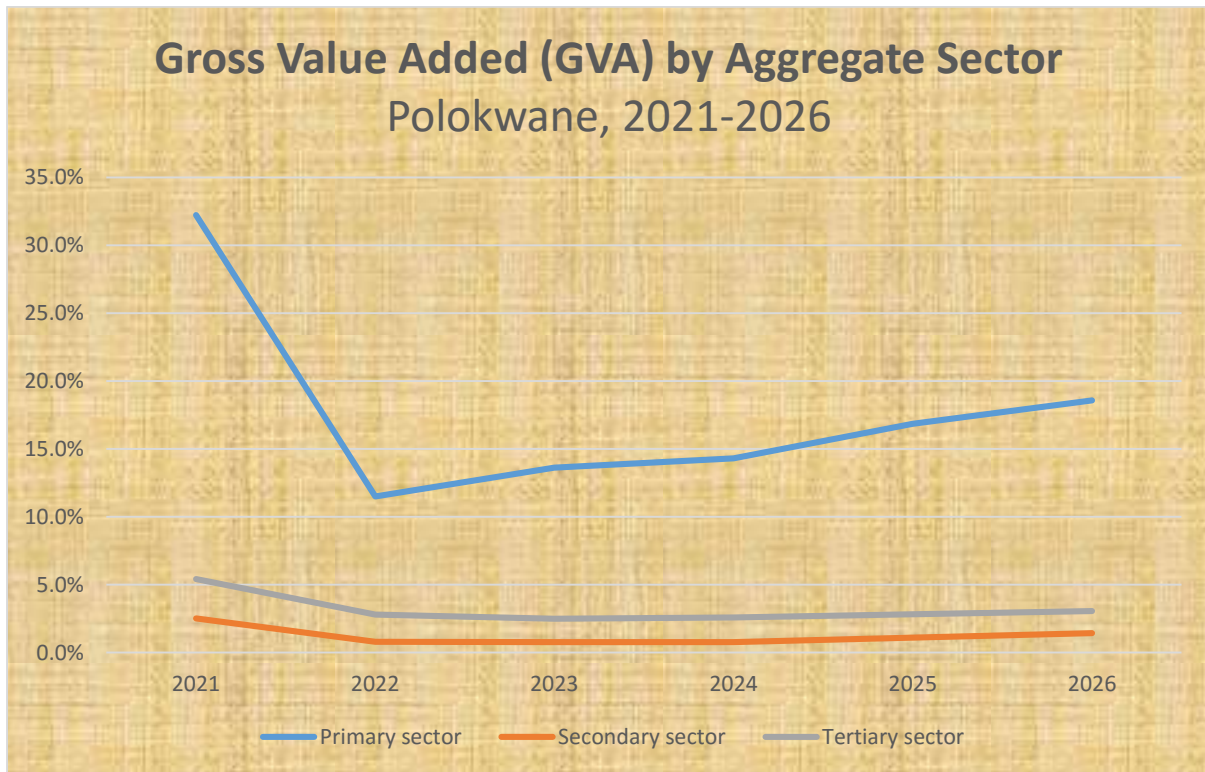

TABLE 15. GROSS VALUE ADDED (GVA) BY BROAD ECONOMIC SECTOR - POLOKWANE LOCAL MUNICIPALITY, 2022-2027 [R BILLIONS, CONSTANT 2015 PRICES]

	2022	2023	2024	2025	2026	2027	Average
Agriculture	1.84	1.84	1.91	2.14	2.19	2.13	2.9%
Mining	5.20	5.29	5.51	5.80	6.07	6.32	3.9%
Manufacturing	2.81	2.79	2.77	2.75	2.72	2.70	-0.8%
Electricity	0.72	0.66	0.62	0.60	0.59	0.53	-5.8%
Construction	2.36	2.23	2.19	2.04	1.87	1.68	-6.6%
Trade	13.62	13.61	13.53	13.24	13.04	12.92	-1.0%
Transport	4.67	4.68	4.71	4.66	4.58	4.57	-0.4%
Finance	16.49	16.82	17.05	17.48	17.89	18.31	2.1%
Community services	27.13	27.56	27.97	28.20	28.44	28.78	1.2%
Total Industries	74.88	75.48	76.34	76.63	77.12	77.99	0.8%

Source: IHS Global Insight 2022

The Agricultural sector is expected to grow faster at an average of 2.9% annually from R 1.84 billion in Polokwane Local Municipality to R 2.13 billion in 2027. The community services sector is estimated to be the largest sector within the Polokwane Local Municipality in 2027, with a total share of 36.90% of the total GVA (as measured in constant 2015 prices), growing at an average annual rate of 1.2%. The sector that is estimated to grow the slowest is the construction sector with an average annual growth rate of -6.6%.

TABLE 16. GROSS VALUE ADDED (GVA) BY AGGREGATE ECONOMIC SECTOR - POLOKWANE LOCAL MUNICIPALITY, 2021-2026 [ANNUAL GROWTH RATE, CONSTANT 2015 PRICES]

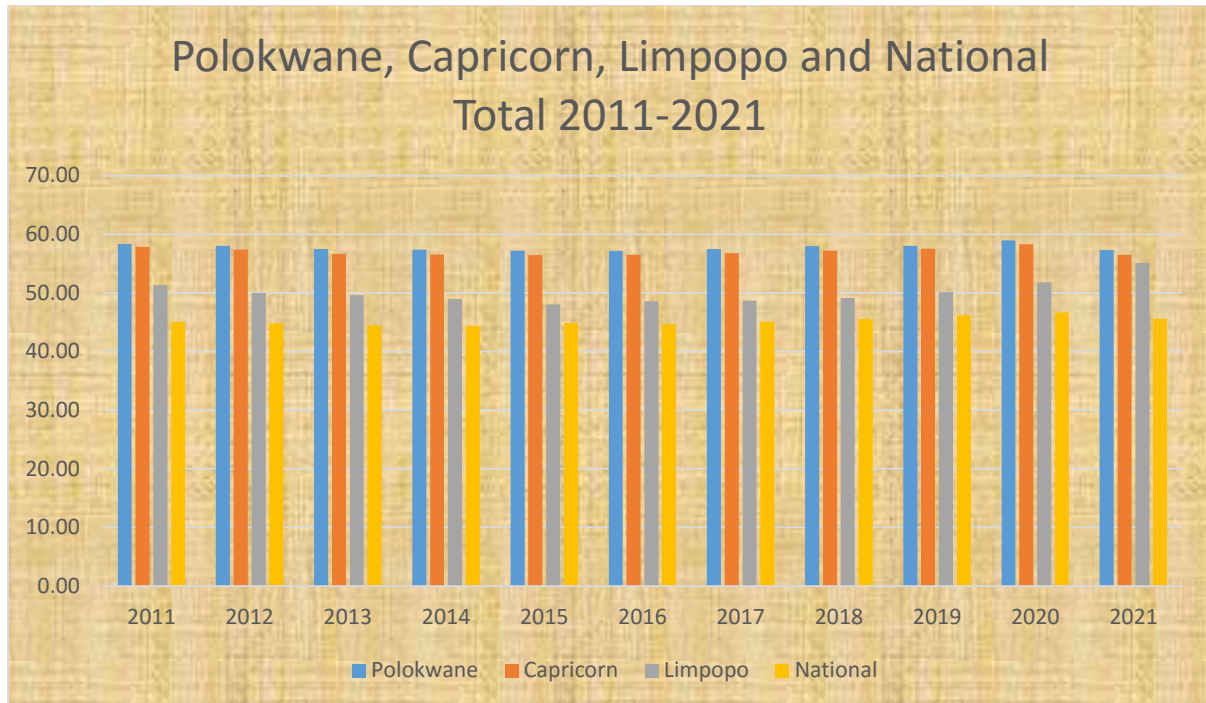

Source: IHS Global Insight 2022

The Primary sector is expected to grow at an average annual rate of 17.9% between 2021 and 2026, with the Secondary sector growing at 1.2% on average annually. The Tertiary sector is expected to grow at an average annual rate of 3.2% for the same period.

4.4 Tress Index

CHART 11. TRESS INDEX - POLOKWANE, CAPRICORN, LIMPOPO AND NATIONAL TOTAL, 2011-2021 [NUMBER]

Source: IHS Global Insight 2022

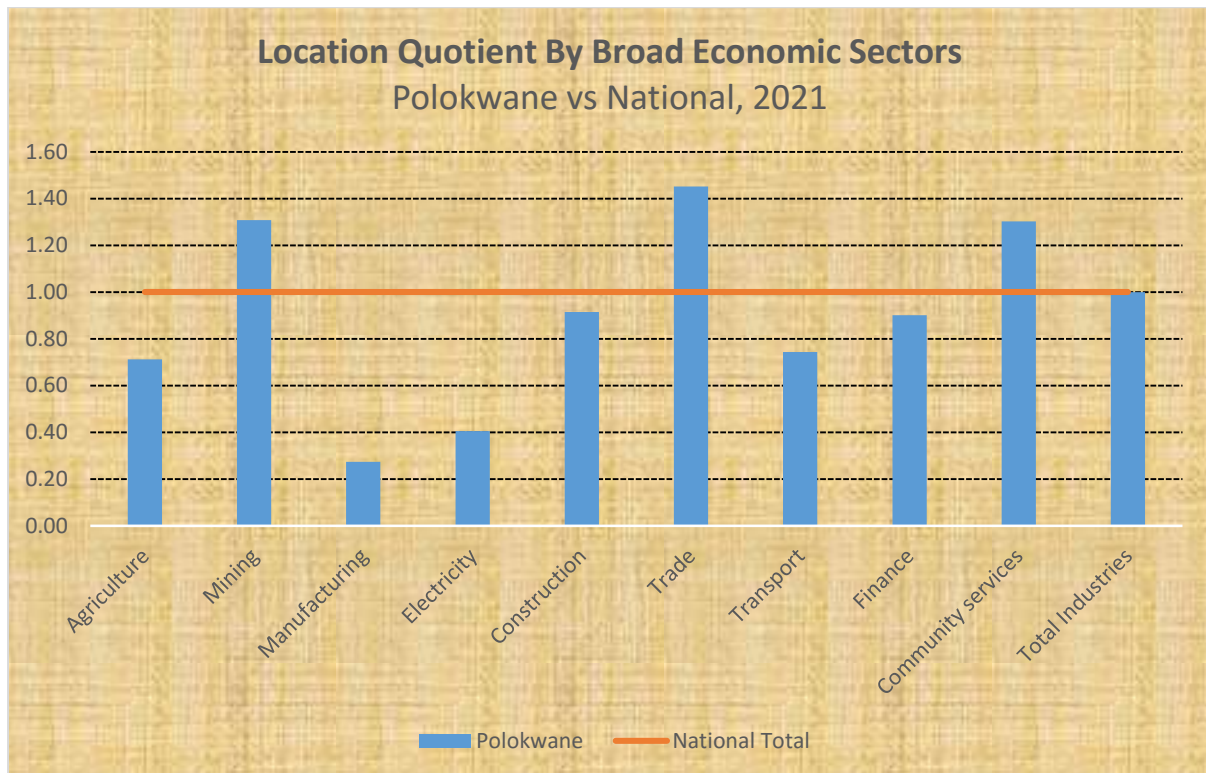

In 2021, Polokwane's Tress Index was estimated at 57.31 which are higher than the 56.51 of the district municipality and higher than the 55.11 of the Limpopo province. This implies that - on average - Polokwane Local Municipality is less diversified in terms of its economic activity spread than the province's economy as a whole.

The Polokwane Local Municipality has a concentrated trade sector.

4.5 Location Quotient

If the location quotient is larger than one for a specified sector within a region, then that region has a comparative advantage in that sector. This is because the share of that sector of the specified regional economy is greater than the same sector in the national economy. The location quotient is usually computed by taking the percentage share of the sector in the regional economy divided by the percentage share of that same sector in the national economy.

CHART 12. LOCATION QUOTIENT BY BROAD ECONOMIC SECTORS - POLOKWANE LOCAL MUNICIPALITY AND SOUTH AFRICA, 2021 [NUMBER]

Source: IHS Global Insight 2022

For 2020 Polokwane Local Municipality has a comparative advantage in the trade sector. The community services sector has a comparative advantage. The finance also has a comparative advantage when comparing it to the South African economy as a whole, although less prominent. The Polokwane Local Municipality has a comparative disadvantage when it comes to the manufacturing and agriculture sector which has a large comparative disadvantage. In general, mining is a very concentrated economic sector. The Polokwane Local Municipality area does have some mining, but this is very limited and fairly unimportant.

4.6. Labour

The labour force of a country consists of everyone of working age (above a certain age and below retirement) that are participating as workers, i.e., people who are actively employed or seeking employment. This is also called the economically active population (EAP). People not included are students, retired people, stay-at-home parents, people in prisons or similar institutions, people employed in jobs or professions with unreported income, as well as discouraged workers who cannot find work.

TABLE 17. WORKING AGE POPULATION IN POLOKWANE, CAPRICORN, LIMPOPO AND NATIONAL TOTAL, 2011 AND 2021 [NUMBER]

Age	Polokwane		Capricorn		Limpopo		National	
	2011	2021	2011	2021	2011	2021	2010	2021
15-19	86,558	77,228	159,179	135,963	675,488	574,237	5,122,453	4,876,170

Total	488,331	580,278	804,416	905,973	3,444,924	3,866,996	34,952,791	40,883,062

Source: IHS Global Insight 2022

The working age population in Polokwane in 2021 was 580 278, increasing at an average annual rate of 1.71% since 2011. For the same period the working age population for Capricorn District Municipality increased at 1.18% annually, while that of Limpopo Province increased at 1.15% annually. South Africa's working age population has increased annually by 1.55% from 34.9 million in 2011 to 40.8 million in 2021.

4.6.1 Economically Active Population (EAP)

The economically active population (EAP) is a good indicator of how many of the total working age population are in reality participating in the labour market of a region. If a person is economically active, he or she forms part of the labour force.

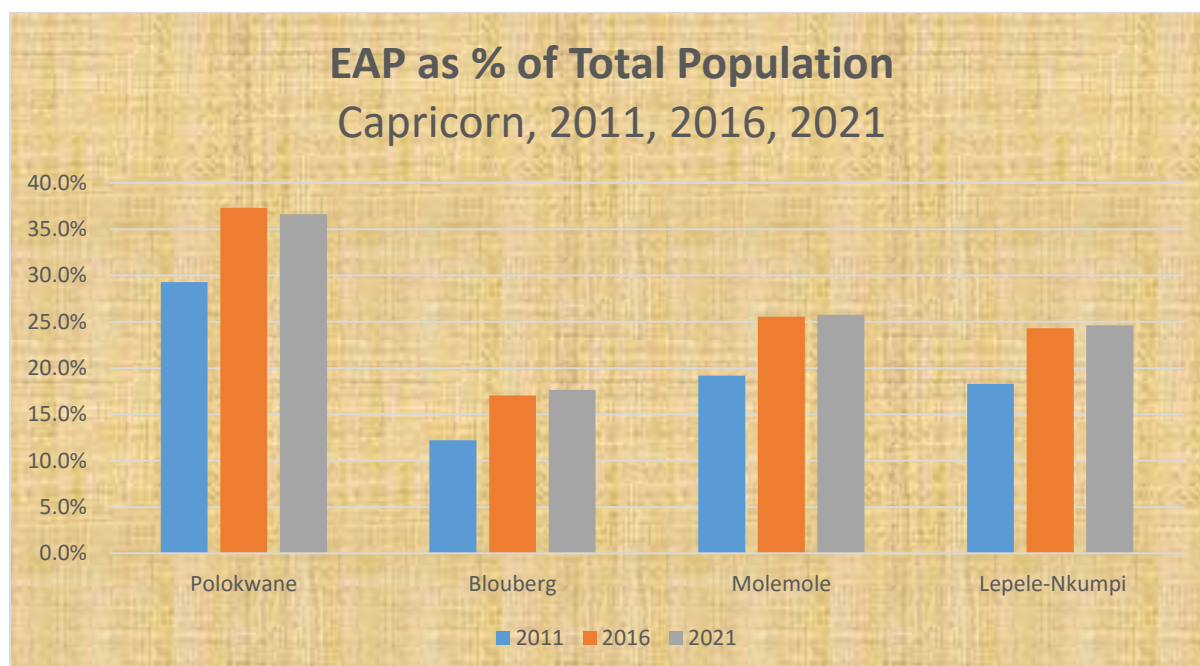

TABLE 18. ECONOMICALLY ACTIVE POPULATION (EAP) - POLOKWANE, CAPRICORN, LIMPOPO AND NATIONAL TOTAL, 2011- 2021 [NUMBER, PERCENTAGE]

	Polokwane	Capricorn	Limpopo	National	Polokwane as a % of district	Polokwane as a % of province	Polokwane as a % of national
2011	216,487	305,271	1,221,960	18,261,812	70.92%	17.72%	1.19%
2012	225,637	316,719	1,255,845	18,696,935	71.24%	17.97%	1.21%
2013	239,089	334,487	1,314,791	19,296,680	71.48%	18.18%	1.24%

Average Annual Growth							
	3.82%	3.74%	3.45%	1.96%			

Source: IHS Global Insight 2022

Polokwane Local Municipality's EAP was 314 881 in 2021, which is 36.63% of its total population of 859 671, and roughly 71.44% of the total EAP of the Capricorn District Municipality. From 2011 to 2021, the average annual increase in the EAP in the Polokwane Local Municipality was 3.82%, which is -0.08 percentage points lower than the growth in the EAP of Capricorn's for the same period.

CHART 13. EAP AS % OF TOTAL POPULATION - POLOKWANE AND THE REST OF CAPRICORN, 2011, 2016, 2021 [PERCENTAGE]

Source: IHS Global Insight 2022

In 2011, 29.3% of the total population in Polokwane Local Municipality were classified as economically active which increased to 36.6% in 2021. Compared to the other regions in Capricorn District Municipality, Polokwane Local Municipality had the highest EAP as a percentage of the total population within its own region relative to the other regions. On the other hand, Blouberg Local Municipality had the lowest EAP with 17.6% people classified as economically active population in 2021.

4.6.2 Labour Force participation rate

The following is the labour participation rate of the Polokwane, Capricorn, Limpopo and National Total as a whole.

TABLE 19. THE LABOUR FORCE PARTICIPATION RATE - POLOKWANE, CAPRICORN, LIMPOPO AND NATIONAL TOTAL, 2011-2021 [PERCENTAGE]

	Polokwane	Capricorn	Limpopo	National
2011	45.5%	39.1%	36.5%	53.9%
2012	46.6%	40.2%	37.2%	54.3%
2013	48.5%	42.1%	38.6%	55.2%
2014	51.5%	45.0%	41.1%	56.6%
2015	54.5%	48.0%	43.8%	57.7%
2016	57.5%	51.0%	46.4%	58.8%

	Polokwane	Capricorn	Limpopo	National
2017	58.9%	52.5%	47.9%	59.5%
2018	59.0%	52.8%	47.9%	59.4%
2019	59.0%	53.0%	48.1%	59.4%
2020	56.8%	51.0%	46.3%	57.0%
2021	55.9%	50.4%	45.9%	56.3%

Source: IHS Global Insight 2022

The Polokwane Local Municipality's labour force participation rate increased from 45.5% in 2011 to 55.9% in 2021 which is an increase of 10.40 percentage points. The Capricorn District Municipality increased from 39.1% to 50.1%, Limpopo Province increased from 36.5% to 45.9% and South Africa increased from 53.9% to 56.3% from 2011 to 2021. The Polokwane Local Municipality labour force participation rate exhibited a higher percentage point change compared to the Limpopo Province from 2011 to 2021. The Polokwane Local Municipality had a lower labour force participation rate when compared to South Africa in 2021.

CHART 14. THE LABOUR FORCE PARTICIPATION RATE - POLOKWANE LOCAL MUNICIPALITY, 2011-2021 [PERCENTAGE]

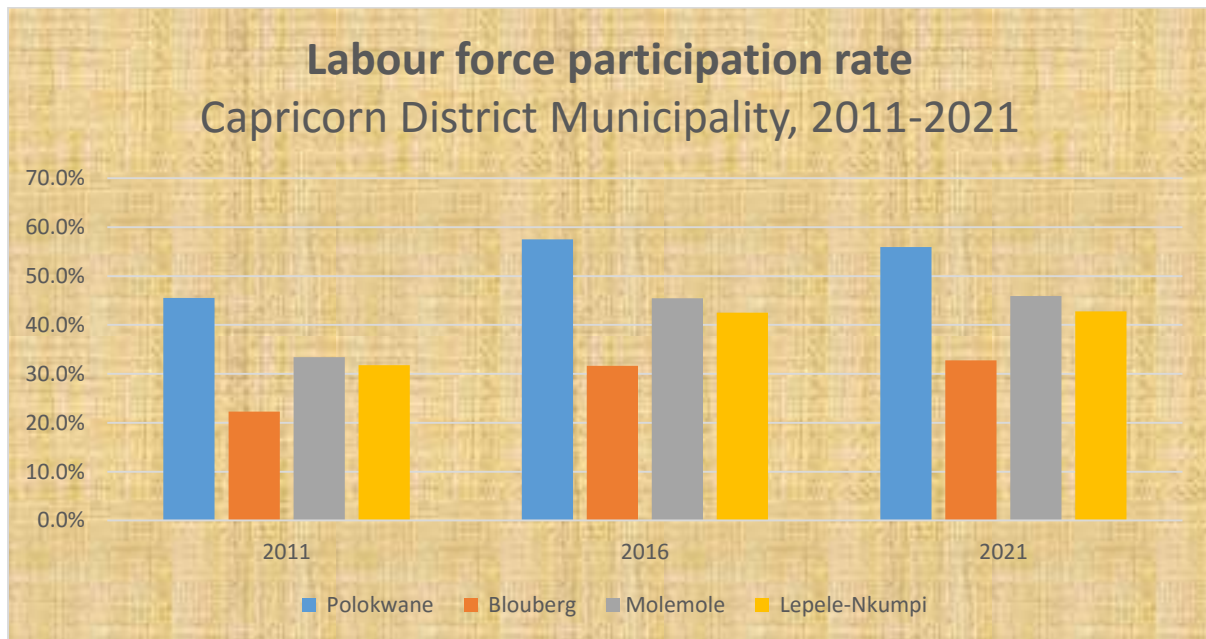

Source: IHS Global Insight 2022

In 2021 the labour force participation rate for Polokwane was at 55.9% which is significantly higher when compared to the 45.5% in 2011. The unemployment rate is an efficient indicator

that measures the success rate of the labour force relative to employment. In 2011, the unemployment rate for Polokwane was 18.4% and increased overtime to 20.7% in 2021. The gap between the labour force participation rate and the unemployment rate decreased which indicates a negative outlook for the employment within Polokwane Local Municipality.

CHART 15. THE LABOUR FORCE PARTICIPATION RATE - POLOKWANE, BLOUBERG, MOLEMOLE AND LEPELE-NKUMPI, 2011, 2016 AND 2021 [PERCENTAGE]

Source: IHS Global Insight 2022

Polokwane Local Municipality had the highest labour force participation rate with 55.9% in 2021 increasing from 45.5% in 2011. Blouberg Local Municipality had the lowest labour force participation rate of 32.8% in 2021, this increased from 22.3% in 2011.

4.6.3 Total Employment

Employment data is a key element in the estimation of unemployment. In addition, trends in employment within different sectors and industries normally indicate significant structural changes in the economy. Employment data is also used in the calculation of productivity, earnings per worker, and other economic indicators.

TABLE 20. TOTAL EMPLOYMENT - POLOKWANE, CAPRICORN, LIMPOPO AND NATIONAL TOTAL, 2011-2021 [NUMBERS]

	Polokwane	Capricorn	Limpopo	National Total	Polokwane as % of District	Polokwane as % of Province	Polokwane as % of National
2011	171,489	241,114	898,443	13,682,557	71.12%	19.09%	1.25%
2012	182,846	256,615	955,054	13,995,488	71.25%	19.15%	1.31%
2013	197,295	276,531	1,018,462	14,443,237	71.35%	19.37%	1.37%
2014	215,958	302,599	1,107,614	15,030,411	71.37%	19.50%	1.44%
2015	232,523	325,868	1,189,740	15,497,776	71.35%	19.54%	1.50%
2016	248,796	348,357	1,255,937	15,785,399	71.42%	19.81%	1.58%
2017	258,113	361,293	1,302,796	16,030,782	71.44%	19.81%	1.61%
2018	263,755	368,774	1,322,737	16,201,043	71.52%	19.94%	1.63%
2019	264,192	368,803	1,319,746	16,225,383	71.63%	20.02%	1.63%

2021	239,808	330,575	1,154,660	14,730,052	72.54%	20.77%	1.63%
Average Annual Growth							
2011-2021	3.41%	3.21%	2.54%	0.74%			

Source: IHS Global Insight 2022

In 2021, Polokwane employed 239 808 people which is 72.54% of the total employment in Capricorn District Municipality (330 575), 20.77% of total employment in Limpopo Province (1.154 660), and 1.63% of the total employment of 14.7 million in South Africa. Employment within Polokwane increased annually at an average rate of 3.41% from 2011 to 2021. The Polokwane Local Municipality average annual employment growth rate of 3.41% is less than the average annual labour force growth rate of 3.82% resulting in unemployment increasing from 18.4% in 2011 to 20.7% in 2021 in the local municipality.

TABLE 21. TOTAL EMPLOYMENT PER BROAD ECONOMIC SECTOR - POLOKWANE AND THE REST OF CAPRICORN, 2021 [NUMBERS]

Sector	Polokwane	Blouberg	Molemole	Lepele-Nkumpi
Agriculture	12,472	3,019	6,734	3,369

Households	15,815	1,663	3,960	1,744
Total	239,808	18,220	37,802	34,745

Source: IHS Global Insight 2022

Polokwane Local Municipality employs a total number of 239 808 people within its local municipality. Polokwane Local Municipality also employs the highest number of people within Capricorn District Municipality. The local municipality that employs the lowest number of people relative to the other regions within Capricorn District Municipality is Blouberg local municipality with a total number of 18 220 employed people.

In Polokwane Local Municipality the economic sectors that recorded the largest number of employments in 2021 were the community services sector with a total of 66 605 employed people or 27.77% of total employment in the local municipality. The trade sector with a total of 58 493 (24.39%) employs the second highest number of people relative to the rest of the sectors. The electricity sector with 1 523 (0.64%) is the sector that employs the least number of people in Polokwane Local Municipality, followed by the mining sector with 4 543 (0.64%) people employed.

CHART 16. TOTAL EMPLOYMENT PER BROAD ECONOMIC SECTOR - POLOKWANE LOCAL MUNICIPALITY, 2021 [PERCENTAGE]

Source: IHS Global Insight 20

4.6.4 Formal and Informal employment

Total employment can be broken down into formal and informal sector employment. Formal sector employment is measured from the formal business side, and the informal employment is measured from the household side where formal businesses have not been established.

Formal employment is much more stable than informal employment. Informal employment is much harder to measure and manage, simply because it cannot be tracked through the formal business side of the economy. Informal employment is however a reality in South Africa and cannot be ignored.

The number of formally employed people in Polokwane Local Municipality counted 183 209 in 2021, which is about 76.40% of total employment, while the number of people employed in the informal sector counted 56 599 or 23.60 % of the total employment. Informal employment in Polokwane increased from 44 143 in 2011 to an estimated 56 599 in 2021.

CHART 17. FORMAL AND INFORMAL EMPLOYMENT BY BROAD ECONOMIC SECTOR - POLOKWANE LOCAL MUNICIPALITY, 2021 [NUMBERS]

Source: IHS Global Insight 2022

In 2021 the Trade sector recorded the highest number of informally employed, with a total of 21 649 employees or 38.25% of the total informal employment. This can be expected as the barriers to enter the Trade sector in terms of capital and skills required is less than with most

of the other sectors. The Finance sector has the lowest informal employment with 3 441 and only contributes 6.08% to total informal employment.

TABLE 22. FORMAL AND INFORMAL EMPLOYMENT BY BROAD ECONOMIC SECTOR - POLOKWANE LOCAL MUNICIPALITY, 2021 [NUMBERS]

Sector	Formal	Informal

4.6.5 Unemployment

The choice of definition for what constitutes being unemployed has a large impact on the final estimates for all measured labour force variables. The following definition was adopted by the Thirteenth International Conference of Labour Statisticians (Geneva, 1982): The "unemployed" comprise all persons above a specified age who during the reference period were:

- "Without work", i.e., not in paid employment or self-employment.
- "Currently available for work", i.e., were available for paid employment or self-employment during the reference period; and
- "Seeking work", i.e., had taken specific steps in a specified reference period to seek paid employment or self-employment. The specific steps may include registration at a public or private employment exchange; application to employers; checking at worksites, farms, factory gates, market or other assembly places; placing or answering newspaper advertisements; seeking assistance of friends or relatives; looking for land.

TABLE 23. UNEMPLOYMENT (OFFICIAL DEFINITION) - POLOKWANE, CAPRICORN, LIMPOPO AND NATIONAL TOTAL, 2011-2021 [NUMBER PERCENTAGE]

Financial year	Polokwane	Capricorn	Limpopo	National	Polokwane as % of district municipality	Polokwane as % of province	Polokwane as % of national

Source: IHS Global Insight 2022

In 2021, there were a total number of 65 254 people unemployed in Polokwane, which is an increase of 25 444 from 39 810 in 2011. The total number of unemployed people within Polokwane constitutes 60.33% of the total number of unemployed people in Capricorn District Municipality. The Polokwane Local Municipality experienced an average annual increase of 5.07% in the number of unemployed people, which is better than that of the Capricorn District Municipality which had an average annual increase in unemployment of 5.25%.

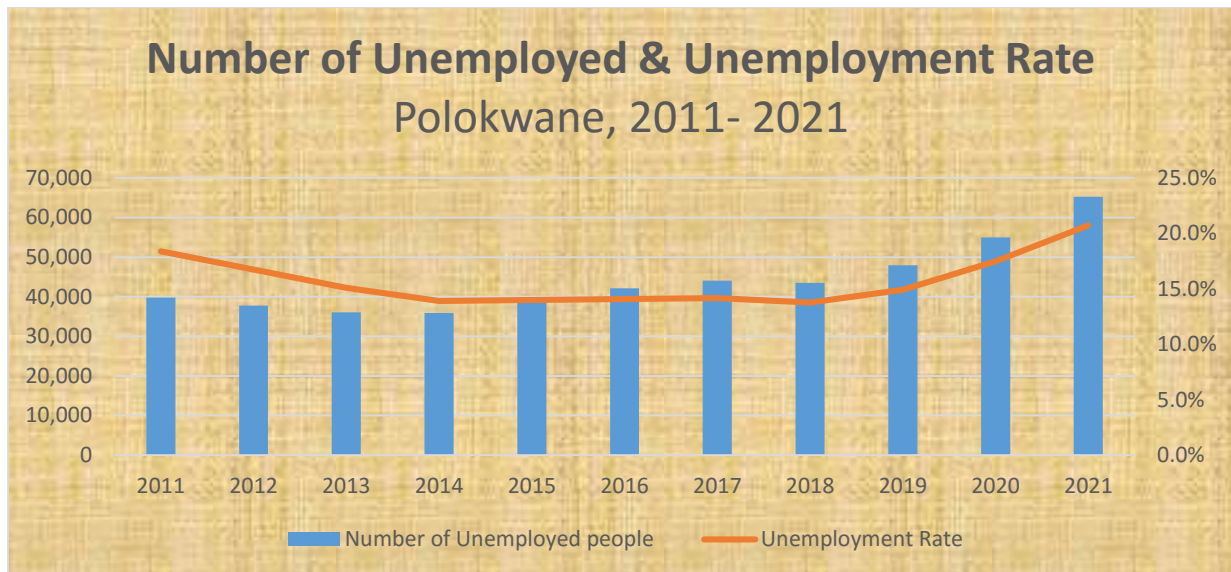

TABLE 24. UNEMPLOYMENT RATE (OFFICIAL DEFINITION) - POLOKWANE, CAPRICORN, LIMPOPO AND NATIONAL TOTAL, 2011-2021 [PERCENTAGE]

Financial Year	Polokwane	Capricorn	Limpopo	National
2011	18.4%	21.3%	22.2%	25.1%
2012	16.7%	19.5%	20.8%	25.1%
2013	15.1%	17.7%	19.3%	25.2%
2014	13.9%	16.4%	18.2%	25.2%
2015	14.0%	16.6%	18.6%	25.5%
2016	14.1%	16.9%	19.7%	26.4%
2017	14.2%	17.0%	20.0%	27.2%
2018	13.8%	16.6%	19.7%	27.4%
2019	14.9%	17.9%	21.3%	28.4%
2020	17.5%	20.8%	25.0%	30.3%
2021	20.7%	24.5%	29.9%	33.6%

Source: IHS Global Insight 2022

In 2021, the unemployment rate in Polokwane Local Municipality (based on the official definition of unemployment) was 20.70%, which is an increase of 2.30 percentage points. The unemployment rate in Polokwane Local Municipality is lower than that of Capricorn. Comparing to the Limpopo Province it can be seen that the unemployment rate for Polokwane Local Municipality was lower than that of Limpopo which was 29.90%. The unemployment rate for South Africa was 33.60% in 2021, which is an increase of 8.50 percentage points from 25.10% in 2011.

CHART 18. UNEMPLOYMENT AND UNEMPLOYMENT RATE (OFFICIAL DEFINITION) - POLOKWANE LOCAL MUNICIPALITY, 2011-2021 [NUMBER PERCENTAGE]

Source: IHS Global Insight 2022

When comparing unemployment rates among regions within Capricorn District Municipality, Lepele-Nkumpi Local Municipality has indicated the highest unemployment rate of 36.7%, which has increased from 30.5% in 2011. It can be seen that the Polokwane Local Municipality had the lowest unemployment rate of 20.7% in 2021, this decreased from 18.4% in 2011.

4.7 Income and Expenditure

In a growing economy among which production factors are increasing, most of the household incomes are spent on purchasing goods and services. Therefore, the measuring of the income and expenditure of households is a major indicator of a number of economic trends. It is also a good marker of growth as well as consumer tendencies.

4.7.1 Number of Households by Income category

The number of households is grouped according to predefined income categories or brackets, where income is calculated as the sum of all household gross disposable income: payments in kind, gifts, homemade goods sold, old age pensions, income from informal sector activities, subsistence income, etc.). Note that income tax is included in the income distribution.

Income categories start at R0 - R2,400 per annum and go up to R2,400,000+ per annum. A household is either a group of people who live together and provide themselves jointly with food and/or other essentials for living, or it is a single person living on his/her own. These income brackets do not consider inflation creep: over time, movement of households "up" the brackets is natural, even if they are not earning any more in real terms.

Households by income category - Polokwane, Capricorn, Limpopo and National Total, 2021
[NUMBER PERCENTAGE]

Income category	Polokwane	Capricorn	Limpopo	National	Polokwane as % of district	Polokwane as % of province	Polokwane as % of national
0-2400	19	30	128	1,253	64.19%	14.81%	1.52%
2400-6000	302	479	2,056	20,550	63.13%	14.70%	1.47%
6000-12000	2,520	4,048	17,455	167,150	62.26%	14.44%	1.51%
12000-18000	4,511	7,300	31,516	289,824	61.79%	14.31%	1.56%

132000-192000	24,991	38,885	159,232	1,718,577	64.27%	15.69%	1.45%
192000-360000	27,302	40,264	153,845	1,950,899	67.81%	17.75%	1.40%
360000-600000	18,968	26,303	92,570	1,437,461	72.11%	20.49%	1.32%
600000-1200000	12,695	16,538	56,001	1,135,200	76.76%	22.67%	1.12%
1200000-2400000	4,899	6,422	22,234	535,537	76.28%	22.03%	0.91%

Income category	Polokwane	Capricorn	Limpopo	National	Polokwane as % of district	Polokwane as % of province	Polokwane as % of national
2400000+	631	782	2,980	101,820	80.69%	21.17%	0.62%
Total	243,323	383,921	1,596,890	16,639,102	63.38%	15.24%	1.46%

Source: IHS Global Insight 2022

It was estimated that in 2021 7.80% of all the households in the Polokwane Local Municipality, were living on R30,000 or less per annum. In comparison with 2011's 13.60%, the percentage has decreased by almost half. The 54000-72000 income category has the highest number of households with a total number of 29 088, followed by the 192000-360000 income category with 27 302 households. Only 19 households fall within the 0-2400 income category.

CHART 20. HOUSEHOLDS BY INCOME BRACKET - POLOKWANE LOCAL MUNICIPALITY, 2011-2021 [PERCENTAGE]

Source: IHS Global Insight 2022

For the period 2011 to 2021 the number of households earning more than R30,000 per annum has increased from 79.04% to 90.18%. It can be seen that the number of households with income equal to or lower than R6,000 per year has decreased by a significant amount.

4.7.2 Annual total Personal Income

Personal income is an even broader concept than labour remuneration. Personal income includes profits, income from property, net current transfers and net social benefits.

TABLE 25. ANNUAL TOTAL PERSONAL INCOME - POLOKWANE, CAPRICORN, LIMPOPO AND NATIONAL TOTAL [CURRENT PRICES, R BILLIONS]

Financial Year	Polokwane	Blouberg	Molemole	Lepele-Nkumpi
2011	26.63	2.9	2.58	4.97
2012	29.45	3.22	2.84	5.54
2013	32.1	3.48	3.09	6.07
2014	34.57	3.73	3.33	6.59
2015	37.39	4.02	3.61	7.2
2016	40.82	4.38	3.95	7.93
2017	43.48	4.78	4.28	8.52
2018	46.17	5.17	4.62	9.32
2019	48.13	5.44	4.84	9.73
2020	46.88	5.36	4.75	9.46
2021	52.05	6.07	5.34	10.56
Average Annual Growth				
2011-2021	6.93%	7.67%	7.55%	7.83%

Source: IHS Global Insight 2022

When looking at the annual total personal income for the regions within Capricorn District Municipality it can be seen that the Polokwane Local Municipality had the highest total personal income with R 52.05 billion which increased from R 26.63 billion recorded in 2011. It can be seen that the Molemole Local Municipality had the lowest total personal income of R 5.34 billion in 2021, this increased from R 2.58 billion in 2011.

TABLE 26. ANNUAL TOTAL PERSONAL INCOME BY POPULATION GROUP - POLOKWANE AND THE REST OF CAPRICORN [CURRENT PRICES, R BILLIONS]

Source: IHS Global Insight 2022

The total personal income of Polokwane Local Municipality amounted to approximately R 52.05 billion in 2021. The African population group earned R 41.44 billion, or 79.62% of total personal income, while the White population group earned R 9.1 billion, or 17.51% of the total. The Asian and the Coloured population groups only had a share of 1.40% and 1.47% of total personal income respectively.

4.7.3 Annual per Capita Income

Per capita income is often used as a measure of wealth particularly when comparing economies or population groups. Rising per capita income usually indicates a likely swell in demand for consumption.

CHART 21. PER CAPITA INCOME - POLOKWANE, CAPRICORN, LIMPOPO AND NATIONAL TOTAL, 2021 [RAND, CURRENT PRICES]

Source: IHS Global Insight 2022

The per capita income in Polokwane Local Municipality in 2021 is R 60, 552 which is higher than both the Limpopo (R 45,789) and of the Capricorn District Municipality (R 52, 325) per capita income. The per capita income for Polokwane Local Municipality (R 60, 552) is lower than that of the South Africa as a whole which is R 73, 130.

CHART 22. PER CAPITA INCOME BY POPULATION GROUP - POLOKWANE AND THE REST OF CAPRICORN DISTRICT MUNICIPALITY, 2021 [RAND, CURRENT PRICES]

population group	Polokwane	Blouberg	Molemole	Lepele-Nkumpi
African	50,948	33,044	39,136	42,302
White	274,919	-	-	-
Coloured	100,030	-	-	-
Asian	135,702	-	-	-

Source: IHS Global Insight 2022

In Polokwane Local Municipality, the White population group has the highest per capita income, with R 274,919, relative to the other population groups. The population group with the second highest per capita income within Polokwane Local Municipality is the Asian

population group (R 135,702), whereas the Coloured and the African population groups had a per capita income of R 100,030 and R 50,948 respectively.

4.7.4 Index of Buying Power

The Index of Buying Power (IBP) is a measure of a region's overall capacity to absorb products and/or services. The index is useful when comparing two regions in terms of their capacity to buy products. Values range from 0 to 1 (where the national index equals 1), and can be interpreted as the percentage of national buying power attributable to the specific region. Regions' buying power usually depends on three factors: the size of the population; the ability of the population to spend (measured by total income); and the willingness of the population to spend (measured by total retail sales).

TABLE 27. INDEX OF BUYING POWER - POLOKWANE, CAPRICORN, LIMPOPO AND NATIONAL TOTAL, 2021 [NUMBER]

	Polokwane	Capricorn	Limpopo	National
Population	859,671	1,415,045	6,075,222	60,324,819
Population - share of national total	1.4%	2.3%	10.1%	100.0%
Income	52,055	74,042	278,180	4,411,524
Income - share of national total	1.2%	1.7%	6.3%	100.0%
Retail	7,012,380	10,065,861	38,487,415	1,166,202,000
Retail - share of national total	0.6%	0.9%	3.3%	100.0%
Index	0.01	0.02	0.06	1.00

Source: IHS Global Insight 2022

Polokwane Local Municipality has a 1.4% share of the national population, 1.2% share of the total national income and a 0.6% share in the total national retail, this all equates to an IBP index value of 0.01 relative to South Africa as a whole. Capricorn has an IBP of 0.02, were Limpopo Province has an IBP index value of 0.06 and South Africa a value of 1 relative to South Africa as a whole.

The considerable low index of buying power of the Polokwane Local Municipality suggests that the local municipality has access to only a small percentage of the goods and services available in all of the Capricorn District Municipality. Its residents are most likely spending some of their income in neighbouring areas.

CHART 23. INDEX OF BUYING POWER POLOKWANE LOCAL MUNICIPALITY, 2011-2021 [INDEX VALUE]

Source: IHS Global Insight 2021

Between 2011 and 2021, the index of buying power within Polokwane Local Municipality increased to its highest level in 2013 (0.01058934).

The buying power within Polokwane Local Municipality is relatively small compared to other regions and increased at an average annual growth rate of -0.24%.

4.8 Indicators of Development

Indicators of development, like the Human Development Index (HDI), Gini Coefficient (income inequality), poverty and the poverty gap, and education, are used to estimate the level of development of a given region in South Africa relative to the rest of the country.

Another indicator that is widely used is the number (or percentage) of people living in poverty. Poverty is defined as the deprivation of those things that determine the quality of life, including food, clothing, shelter and safe drinking water. More than that, other "intangibles" is also included such as the opportunity to learn, and the privilege to enjoy the respect of fellow citizens. Curbing poverty and alleviating the effects thereof should be a premise in the compilation of all policies that aspire towards a better life for all.

4.8.1 Human Development Index (HDI)

HDI is the combination of three basic dimensions of human development: A long and healthy life, knowledge and a decent standard of living. A long and healthy life is typically measured using life expectancy at birth. Knowledge is normally based on adult literacy and / or the combination of enrolment in primary, secondary and tertiary schools. In order to gauge a decent standard of living, we make use of GDP per capita. On a technical note, the HDI can have a maximum value of 1, indicating a very high level of human development, while the minimum value is 0, indicating no human development.

CHART 24. HUMAN DEVELOPMENT INDEX (HDI) - POLOKWANE, CAPRICORN, LIMPOPO AND NATIONAL TOTAL, 2011, 2016, 2021 [NUMBER]

Source: IHS Global Insight 2022

In 2021 Polokwane Local Municipality had an HDI of 0.62 compared to the Capricorn with a HDI of 0.60, 0.58 of Limpopo and 0.64 of National Total as a whole. Seeing that South Africa recorded a higher HDI in 2021 when compared to Polokwane Local Municipality which translates to a lower human development for Polokwane Local Municipality compared to South Africa. South Africa's HDI increased at an average annual growth rate of 0.58% and this increase is higher than that of Polokwane Local Municipality (0.32%).

CHART 25. HUMAN DEVELOPMENT INDEX (HDI) - POLOKWANE, BLOUBERG, MOLEMOLE AND LEPELE-NKUMPI, 2021 [NUMBER]

Source: IHS Global Insight 2022

In terms of the HDI for each of the regions within the Capricorn District Municipality, Polokwane Local Municipality has the highest HDI, with an index value of 0.62. The lowest can be observed in the Blouberg Local Municipality with an index value of 0.54.

4.8.2 Gini Coefficient

If the Gini coefficient is equal to zero, income is distributed in a perfectly equal manner, in other words there is no variance between the high- and low-income earners within the population. In contrast, if the Gini coefficient equals 1, income is completely inequitable, i.e., one individual in the population is earning all the income and the rest has no income. Generally, this coefficient lies in the range between 0.25 and 0.70.

CHART 26. GINI COEFFICIENT - POLOKWANE, CAPRICORN, LIMPOPO AND NATIONAL TOTAL, 2011-2021 [NUMBER]

Source: IHS Global Insight 2022

In 2021, the Gini coefficient in Polokwane Local Municipality was at 0.61, which reflects a decrease in the number over the ten-year period from 2011 to 2021. The Capricorn District Municipality and the Limpopo Province had a Gini coefficient of 0.60 and 0.60 respectively. When Polokwane Local Municipality is contrasted against the entire South Africa, it can be seen that Polokwane has a more equal income distribution with a lower Gini coefficient compared to the South African coefficient of 0.63 in 2021. This has been the case for the entire 10-year history.

TABLE 28. GINI COEFFICIENT BY POPULATION GROUP - POLOKWANE, 2011, 2021 [NUMBER]

Financial Year	African	White	Coloured	Asian
2011	0.60	0.41	0.56	0.50
2021	0.59	0.42	0.52	0.48
Average Annual Growth				
2011-2021	-0.25%	0.14%	-0.65%	-0.36%

Source: IHS Global Insight 2022

When segmenting the Polokwane Local Municipality into population groups, it can be seen that the Gini coefficient for the African population group decreased the least amongst the population groups with an average annual growth rate of -0.25%. The White population group

had the highest average annual growth of 0.14% from 2011 to 2021. The Gini coefficient for the Coloured population group decreased the most with an average annual growth rate of -0.65%. This implies that the African and Coloured population groups have not improved in terms of income equality within its own population group over the period. The Asian population group has seen no change in terms of income equality and the White population group has seen an improvement in income equality from 2011 to 2021.

CHART 27. GINI COEFFICIENT - POLOKWANE, BLOUBERG, MOLEMOLE AND LEPELE-NKUMPI, 2021 [NUMBER]

Source: IHS Global Insight 2022

In terms of the Gini coefficient for each of the regions within the Capricorn District Municipality, Polokwane Local Municipality has the highest Gini coefficient, with an index value of 0.61. The lowest Gini coefficient can be observed in the Blouberg Local Municipality with an index value of 0.56.

4.8.3 Poverty

CHART 28. NUMBER AND PERCENTAGE OF PEOPLE LIVING IN POVERTY - POLOKWANE LOCAL MUNICIPALITY, 2011-2021 [NUMBER PERCENTAGE]

Source: IHS Global Insight 2022

In 2021, there were 5 514 47 people living in poverty, using the upper poverty line definition, across Polokwane Local Municipality - this is 1 294 22 higher than the 4 549 43 in 2011. The percentage of people living in poverty has increased from 30.4% in 2011 to 31.8% in 2021, which indicates an increase of 1.40 percentage points.

TABLE 29. PERCENTAGE OF PEOPLE LIVING IN POVERTY BY POPULATION GROUP - POLOKWANE, 2011-2021 [PERCENTAGE]

Financial year	African	White	Coloured	Asian
2011	60.3%	1.1%	28.0%	7.1%
2012	60.7%	1.1%	30.1%	7.3%
2013	60.8%	1.2%	31.6%	7.3%
2014	61.3%	1.3%	33.2%	7.3%
2015	61.2%	1.3%	35.2%	7.1%

Financial year	African	White	Coloured	Asian
2016	62.5%	1.6%	38.0%	8.8%
2017	63.7%	1.7%	38.1%	10.8%
2018	64.4%	1.9%	36.5%	13.6%
2019	65.6%	2.3%	34.2%	18.8%
2020	67.9%	3.0%	33.0%	23.0%
2021	67.2%	3.0%	30.1%	20.6%

Source: IHS Global Insight 2021

In 2021, the population group with the highest percentage of people living in poverty was the African population group with a total of 67.2% people living in poverty, using the upper poverty line definition. The proportion of the African population group, living in poverty, increased by 6.90 percentage points, as can be seen by the change from 60.3% in 2011 to 67.2% in 2021. In 2021 30.1% of the Coloured population group lived in poverty, as compared to the 28.0% in 2011. The White and the Asian population group saw an increase in the percentage of people living in poverty, with an increase of 1.90 and an increase of 13.5 percentage points respectively.

TABLE 30. PERCENTAGE OF PEOPLE LIVING IN POVERTY - POLOKWANE, BLOUBERG, MOLEMOLE AND LEPELE-NKUMPI,2021 [PERCENTAGE]

Source: IHS Global Insight 2022

In terms of the percentage of people living in poverty for each of the regions within the Capricorn District Municipality, Blouberg Local Municipality has the highest percentage of people living in poverty, with a total of 82.5%. The lowest percentage of people living in poverty can be observed in the Polokwane Local Municipality with a total of 64.1% living in poverty, using the upper poverty line definition.

4.8.4 Poverty Gap Rate

The poverty gap is used as an indicator to measure the depth of poverty. The gap measures the average distance of the population from the poverty line and is expressed as a percentage of the upper bound poverty line, as defined by StatsSA. The Poverty Gap deals with a major shortcoming of the poverty rate, which does not give any indication of the depth, of poverty. The upper poverty line is defined by StatsSA as the level of consumption at which individuals are able to purchase both sufficient food and non-food items without sacrificing one for the other.

It is estimated that the poverty gap rate in Polokwane Local Municipality amounted to 31.8% in 2021 - the rate needed to bring all poor households up to the poverty line and out of poverty.

TABLE 31. POVERTY GAP RATE BY POPULATION GROUP - POLOKWANE LOCAL MUNICIPALITY, 2011-2021 [PERCENTAGE]

Source: IHS Global Insight 2022

In 2021, the poverty gap rate was 31.8% and in 2011 the poverty gap rate was 30.4%. It can be seen that the poverty gap rate increased from 2011 to 2021, which means that there was an increase in terms of the depth of the poverty within Polokwane Local Municipality.

TABLE 32. POVERTY GAP RATE - POLOKWANE, BLOUBERG, MOLEMOLE AND LEPELE-NKUMPI,2021 [PERCENTAGE]

Source: IHS Global Insight 2022

In terms of the poverty gap rate for each of the regions within the Capricorn District Municipality, Blouberg Local Municipality and Lepele-Nkumpi Local Municipality share the highest poverty gap rate, with a rand value of 31.9% and 31.9% respectively. The lowest poverty gap rate can be observed in the Polokwane Local Municipality with a total of 31.8%.

4.8.5 Education

Educating is important to the economic growth in a country and the development of its industries, providing a trained workforce and skilled professionals required.

The education measure represents the highest level of education of an individual, using the 15 years and older age category. (According to the United Nations definition of education, one is an adult when 15 years or older. IHS uses this cut-off point to allow for cross-country

comparisons. Furthermore, the age of 15 is also the legal age at which children may leave school in South Africa).

CHART 29. HIGHEST LEVEL OF EDUCATION: AGE 20+ - POLOKWANE LOCAL MUNICIPALITY, 2011-2021 [PERCENTAGE]

Source: IHS Global Insight 2022

Within Polokwane Local Municipality, the number of people without any schooling decreased from 2011 to 2021 with an average annual rate of -3.82%, while the number of people within the 'matric only' category, increased from 112 759 to 163 908. The number of people with 'matric and a certificate/diploma' increased with an average annual rate of 7.00%, with the number of people with a 'matric and a Bachelor's' degree increasing with an average annual rate of -0.13%. Overall improvement in the level of education is visible with an increase in the number of people with 'matric' or higher education.

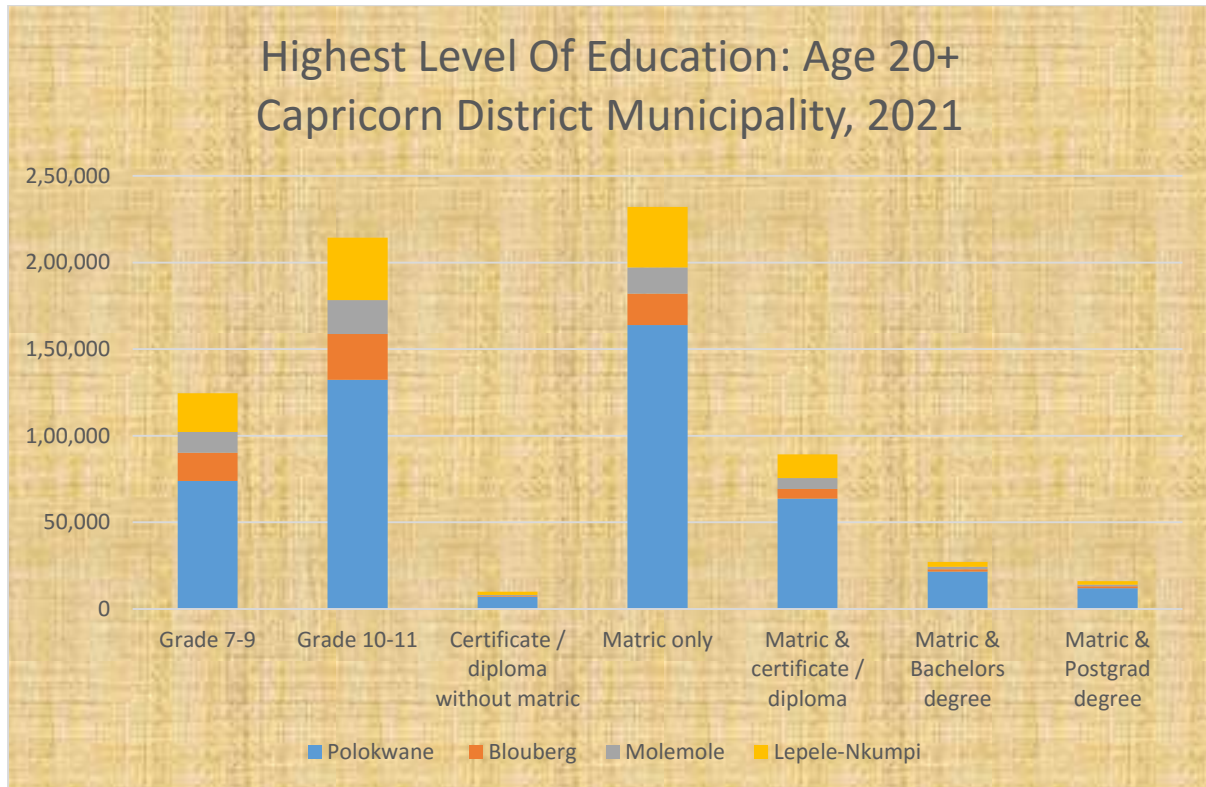

TABLE 33. HIGHEST LEVEL OF EDUCATION: AGE 15+ - POLOKWANE, CAPRICORN, LIMPOPO AND NATIONAL TOTAL, 2021 [NUMBERS]

4.8.6 Functional literacy

Functional literacy describes the reading and writing skills that are adequate for an individual to cope with the demands of everyday life - including the demands posed in the workplace. This is contrasted with illiteracy in the strictest sense, meaning the inability to read or write. Functional literacy enables individuals to enter the labour market and contribute towards economic growth thereby reducing poverty.

TABLE 35. FUNCTIONAL LITERACY: AGE 20+, COMPLETED GRADE 7 OR HIGHER - POLOKWANE LOCAL MUNICIPALITY, 2011-2021 [NUMBER PERCENTAGE]

Financial Year	Illiterate	Literate	%
2011	79,686	430,475	84.4%
2012	79,538	440,223	84.7%
2013	80,501	448,377	84.8%
2014	80,630	458,180	85.0%
2015	80,187	468,762	85.4%
2016	79,727	478,442	85.7%

Financial Year	Illiterate	Literate	%
2017	78,428	488,361	86.2%
2018	75,790	499,961	86.8%
2019	70,461	515,139	88.0%
2020	63,225	532,896	89.4%
2021	55,958	549,723	90.8%
Average Annual Growth			
2011-2021	-3.47%	2.48%	0.73%

Source: IHS Global Insight 2021

A total of 549 723 individuals in Polokwane Local Municipality were considered functionally literate in 2021, while 55 958 people were considered to be illiterate. Expressed as a rate, this amounts to 90.8% of the population, which is an increase of 6.40 percentage points since 2011 (84.4%). The percentage of illiterate individuals decreased on average by -3.47% annually from 2011 to 2021, with the percentage of functional literate people increasing at 2.48% annually.

CHART 30. FUNCTIONAL LITERACY: AGE 20+, COMPLETED GRADE 7 OR HIGHER - POLOKWANE, CAPRICORN, LIMPOPO AND NATIONAL TOTAL, 2010-2020 [PERCENTAGE]

Source: IHS Global Insight 2022

Polokwane Local Municipality's functional literacy rate of 90.8% in 2021 is higher than that of Capricorn at 88.2% and is higher than the province rate of 86.0%. When comparing to National Total as whole, which has a functional literacy rate of 89.1%, it can be seen that the functional literacy rate is lower than that of the Polokwane Local Municipality.

CHART 31. LITERACY RATE - POLOKWANE, BLOUBERG, MOLEMOLE AND LEPELE-NKUMPI, 2021 [PERCENTAGE]

Source: IHS Global Insight 2022

In terms of the literacy rate for each of the regions within the Capricorn District Municipality, Polokwane Local Municipality had the highest literacy rate, with a total of 90.8%. The lowest literacy rate can be observed in the Blouberg Local Municipality with a total of 80.8%.

4.8.7 Population Density

CHART 32. POPULATION DENSITY - POLOKWANE, CAPRICORN, LIMPOPO AND NATIONAL TOTAL, 2021 [NUMBER OF PEOPLE PER KM²]

Source: IHS Global Insight 2022

In 2021, with an average of 170.11 people per square kilometer, Polokwane Local Municipality had a higher population density than Capricorn (65.19 people per square kilometer). Compared to Limpopo Province (48.31 per square kilometer) it can be seen that there are more people living per square kilometer in Polokwane Local Municipality than in Limpopo Province.

CHART 33. POPULATION DENSITY - POLOKWANE AND THE REST OF CAPRICORN, 2011-2021 [NUMBER OF PEOPLE PER KM]

Financial Year	Polokwane	Blouberg	Molemole	Lepele-Nkumpi
2011	146.30	18.56	35.14	66.86
2012	148.64	18.41	34.99	66.93
2013	151.06	18.31	34.92	67.12
2014	153.55	18.25	34.93	67.43
2015	156.12	18.23	34.99	67.84
2016	158.61	18.22	35.10	68.28
2017	161.08	18.25	35.24	68.79

2019	165.85	18.38	35.65	69.93
2020	168.18	18.48	35.89	70.53
2021	170.11	18.55	36.08	71.04
Average Annual Growth				
2011-2021	1.52%	0.00%	0.26%	0.61%

Source: IHS Global Insight 2022

In 2021, Polokwane Local Municipality had a population density of 170.11 per square kilometre and it ranked the highest amongst its peers. In terms of growth, Polokwane Local Municipality had an average annual growth in its population density of 1.52% per square kilometre annually. It was also the region that had the highest average annual growth rate. In 2021, the region with the lowest population density within Capricorn District Municipality was Blouberg with 18.55 people per square kilometre; it was also the region with the lowest average annual growth rate of 0.00% people per square kilometre over the period under discussion.

CHART 34. POPULATION DENSITY - POLOKWANE, BLOUBERG, MOLEMOLE AND LEPELE-NKUMPI, 2021 [PERCENTAGE]

Source: IHS Global Insight 2022

In terms of the population density for each of the regions within the Capricorn District Municipality, Polokwane Local Municipality had the highest density, with 170.11 people per square kilometre. The lowest population density can be observed in the Blouberg Local Municipality with a total of 18.55 people per square kilometre.

4.9 Crime Rate

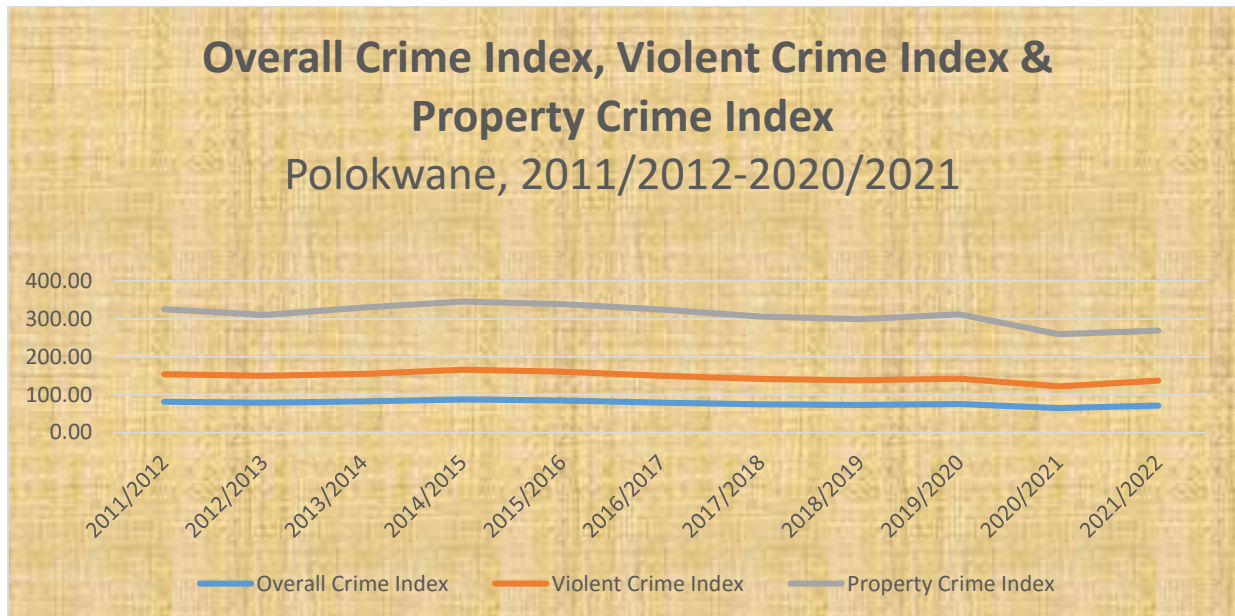

The state of crime in South Africa has been the topic of many media articles and papers in the past years, and although many would acknowledge that the country has a crime problem, very little research has been done on the relative level of crime. The media often tend to focus on more negative or sensational information, while the progress made in combating crime is neglected.

4.9.1 IHS Composite Crime Index

The IHS Composite Crime Index makes use of the official SAPS data, which is reported in 27 crime categories (ranging from murder to crime injuries). These 27 categories are divided into two groups according to the nature of the crime: i.e., violent crimes and property crimes. IHS uses the (a) Length-of-sentence and the (b) Cost-of-crime in order to apply a weight to each category.

4.9.2 Overall crime index

CHART 35. IHS CRIME INDEX - CALENDER YEARS (WEIGHTED AVG / 100,000 PEOPLE) - POLOKWANE LOCAL MUNICIPALITY, 2011/2012-2020/2021 [INDEX VALUE]

Source: IHS Global Insight 2022

For the period 2011/2012 to 2021/2022 overall crime has decreased at an average annual rate of -1.29% within the Polokwane Local Municipality. Violent crime increased by -1.02% since 2020/2022, while property crimes increased by -2.64% between the 2011/2012 and 2021/2022 financial years.

TABLE 36. OVERALL CRIME INDEX - POLOKWANE LOCAL MUNICIPALITY AND THE REST OF CAPRICORN, 2011/2012-2021/2022 [INDEX VALUE]

Financial Year	Polokwane	Blouberg	Molemole	Lepele-Nkumpi
2011/2012	81.27	35.70	66.81	56.23
2012/2013	78.59	31.78	64.42	49.86
2013/2014	81.71	28.65	64.55	48.76
2014/2015	87.00	30.61	66.27	53.06
2015/2016	84.72	33.60	73.09	60.36
2016/2017	79.03	31.73	69.33	52.16
2017/2018	74.87	35.86	68.73	52.95
2018/2019	73.02	37.59	77.13	54.72
2019/2020	75.49	36.06	78.95	53.86
2020/2021	64.15	30.79	65.15	53.82
2021/2022	71.40	39.06	73.38	54.67
Average Annual Growth				
2011-2022	-1.29%	0.90%	0.94%	-0.28%

Source: IHS Global Insight 2022

In 2021/2022, the Polokwane Local Municipality has the highest overall crime rate of the sub-regions within the overall Capricorn District Municipality with an index value of 71.40. Molemole Local Municipality has the second highest overall crime index at 73.38, with Lepele-Nkumpi Local Municipality having the third highest overall crime index of 54.67. Lepele-Nkumpi Local Municipality has the second lowest overall crime index of 54.67 and the Blouberg Local Municipality has the lowest overall crime rate of 39.06. The region that increased slightly in overall crime since 2011/2012 was Molemole Local Municipality with an average annual increase of 0.94% followed by Blouberg Local Municipality with a moderate average annual increase of 0.90%.

CHART 36. IHS CRIME INDEX - CALENDER YEARS (WEIGHTED AVG / 100,000 PEOPLE) - POLOKWANE, CAPRICORN, LIMPOPO AND NATIONAL TOTAL, 2021/2022 [INDEX VALUE]

Source: IHS Global Insight 2022

From the chart above it is evident that property crime is a major problem for all the regions relative to violent crime.

4.10 Tourism

Tourism can be defined as the non-commercial organisation plus operation of vacations and visits to a place of interest. Whether you visit a relative or friend, travel for business purposes, go on holiday or on medical and religious trips - these are all included in tourism.

4.10.1 Trips by purpose of trips

The main purpose for an overnight trip is grouped into these categories:

- Leisure / Holiday
- Business
- Visits to friends and relatives
- Other (Medical, Religious, etc.)

TABLE 37. NUMBER OF TRIPS BY PURPOSE OF TRIPS - POLOKWANE LOCAL MUNICIPALITY, 2010-2020 [NUMBER PERCENTAGE]

Financial Year	Leisure / Holiday	Business	Visits to friends and relatives	Other (Medical, Religious, etc)	Total
2011	131,262	93,926	730,462	315,655	1,271,304
2012	124,754	103,902	755,191	346,235	1,330,083
2013	110,189	104,969	781,840	390,124	1,387,122
2014	96,179	102,310	819,454	413,796	1,431,740
2015	83,912	100,539	835,095	420,339	1,439,885
2016	83,765	106,986	849,670	433,715	1,474,136
2017	91,243	106,516	829,804	421,762	1,449,324
2018	103,377	105,524	814,047	374,568	1,397,516
2019	119,237	98,725	808,760	318,668	1,345,389
2020	73,147	67,785	402,661	129,309	672,901
2021	52,605	58,759	393,772	98,986	604,122
Average Annual Growth					
2011-2021	-8.74%	-4.58%	-5.99%	-10.95%	-7.17%

Source: IHS Global Insight 2022

In Polokwane Local Municipality, the Visits to friends and relatives, relative to the other tourism, recorded the highest average annual growth rate from 2011 (730 462) to 2021 (393 772) at -5.99%. Business recorded the lowest number of visits in 2021 at 58 759, with an average annual growth rate of -4.58%. The tourism type that recorded the lowest growth was Leisure/ holiday tourism with an average annual growth rate of -8.74% from 2011 (131 262) to 2021 (52 605). Other (Medical, Religion, etc.) recorded 604 122 visits in 2021 with an average annual growth of -7.17 from 2011 (127 1304).

CHART 37. TRIPS BY PURPOSE OF TRIP - POLOKWANE LOCAL MUNICIPALITY, 2021 [PERCENTAGE]

Source: IHS Global Insight 2022

The Visits to friends and relatives at 65% have largest share of the total tourism within Polokwane Local Municipality. Other (Medical, Religious, etc.) tourism had the second highest share at 16%, followed by Leisure / Holiday tourism at 9% and the Business tourism with the smallest share of 10% of the total tourism within Polokwane Local Municipality.

4.10.2 Origin of Tourists

In the following table, the number of tourists that visited Polokwane Local Municipality from both domestic origins, as well as those coming from international places, are listed.

TABLE 38. TOTAL NUMBER OF TRIPS BY ORIGIN TOURISTS - POLOKWANE LOCAL MUNICIPALITY, 2011-2021 [NUMBER]

Financial Year	Domestic tourists	International tourists	Total tourists
2011	1,152,329	118,975	1,271,304
2012	1,196,518	133,565	1,330,083
2013	1,249,492	137,630	1,387,122
2014	1,293,322	138,418	1,431,740
2015	1,312,390	127,494	1,439,885
2016	1,328,736	145,400	1,474,136
2017	1,297,444	151,880	1,449,324
2018	1,240,081	157,436	1,397,516
2019	1,191,197	154,192	1,345,389
2020	622,618	50,283	672,901
2021	567,783	36,339	604,122
Average Annual Growth			
2011-2021	-6.83%	-11.18%	-7.17%

Source: IHS Global Insight 2022

The number of trips by tourists visiting Polokwane Local Municipality from other regions in South Africa has decreased at a very low average annual rate of -6.83% from 2011 (115 2329) to 2021 (567 783). The tourists visiting from other countries decreased at a relatively high average annual growth rate of -11.18% (from 118 975 in 2011 to 36339 in 2021). In 2021 International tourists constitute -7.17% of the total number of trips, with domestic tourism representing the balance of 93.98%.

4.10.3 Bed nights by origin of tourist

A bed night is the tourism industry measurement of one night away from home on a single person trip. The following is a summary of the number of bed nights spent by domestic and international tourist within Polokwane Local Municipality between 2011 and 2021.

TABLE 39. BEDNIGHTS BY ORIGIN OF TOURIST - POLOKWANE LOCAL MUNICIPALITY, 2011-2021 [NUMBER]

Financial Year	Domestic tourists	International tourists	Total tourists
2011	3,524,057	388,786	3,912,843
2012	3,368,901	395,991	3,764,892
2013	3,238,707	408,699	3,647,406
2014	3,147,686	452,777	3,600,464
2015	3,108,847	471,163	3,580,011
2016	3,128,670	596,687	3,725,356
2017	3,073,118	663,889	3,737,008
2018	2,915,951	670,073	3,586,025
2019	3,436,861	596,003	4,032,864
2020	1,455,949	169,853	1,625,801
2021	1,575,150	115,773	1,690,923
Average Annual Growth			
2011-2021	-7.74%	-11.41%	-8.05%

Source: IHS Global Insight 2022

From 2011 to 2021, the number of bed nights spent by domestic tourists has decreased by an average annual rate of -7.74%, while in the same period the international tourists had an average annual decrease of -11.41%. The total number of bed nights spent by tourists decreased at an average annual growth rate of -8.05% from 3.9 million in 2011 to 1.6 million in 2021.

CHART 39. GROWTH IN TOURISM (USING BEDNIGHTS) BY ORIGIN - POLOKWANE LOCAL MUNICIPALITY, 2011-2021 [NUMBER]

Source: IHS Global Insight 2022

4.10.4 Tourism spending

It is important to note that this type of spending differs from the concept of contribution to GDP. Tourism spending merely represents a nominal spend of trips made to each region.

TABLE 40. TOTAL TOURISM SPENDING - POLOKWANE, CAPRICORN, LIMPOPO AND NATIONAL TOTAL, 2011-2021 [R BILLIONS, CURRENT PRICES]

Financial Year	Polokwane	Capricorn	Limpopo	National Total
2011	3,929,630	4,808,487	13,534,637	205,797,354
2012	4,682,549	5,707,770	15,848,157	229,814,599
2013	5,261,693	6,385,143	17,428,230	253,328,244
2014	5,821,866	7,212,210	19,109,439	275,442,708
2015	5,245,171	6,491,405	17,487,001	253,885,070
2016	5,894,171	7,266,702	19,162,056	277,552,316
2017	5,505,982	6,755,917	18,111,414	264,008,625
2018	6,394,670	7,673,197	20,530,050	291,131,895
2019	9,857,762	11,648,121	30,429,835	406,184,692
2020	1,975,235	2,459,623	9,039,028	131,051,777
2021	4,294,484	5,314,661	18,774,244	296,534,867
Average Annual Growth				
2011-2021	0.89%	1.01%	3.33%	3.72%

Source: IHS Global Insight 2022

Polokwane Local Municipality had a total tourism spending of R 4.2 billion in 2021 with an increase in average annual growth rate of 0.89% since 2011 (R 3.9 billion). Capricorn District Municipality had a total tourism spending of R 5.3 billion in 2021 and an average annual growth rate of 1.01% over the period. Total spending in Limpopo Province increased from R 13.5 billion in 2011 to R 18.7 billion in 2021 at an average annual rate of 3.33%. South Africa as whole had an average annual rate of 3.72% and increased from R 205.7 billion in 2011 to R 296.5 billion in 2021.

4.10.5 Tourism Spend Per Resident Capita

Another interesting topic to look at is tourism spending per resident capita. To calculate this, the total amount of tourism spending in the region is divided by the number of residents living within that region. This gives a relative indication of how important tourism is for a particular area.

CHART 40. TOURISM SPEND PER RESIDENT CAPITA - POLOKWANE LOCAL MUNICIPALITY AND THE REST OF CAPRICORN, 2011,2016 AND 2021 [R THOUSANDS]

Source: IHS Global Insight 2022

In 2021, Polokwane Local Municipality had a tourism spend per capita of R 4995 and an average annual growth rate of -0.62%, Polokwane Local Municipality ranked highest amongst all the regions within Capricorn in terms of tourism spend per capita. The local municipality that ranked lowest in terms of tourism spend per capita is Lepele-Nkumpi with a total of R 1292 which reflects a decrease at an average annual rate of -0.55% from 2011.

4.10.6 Tourism Spend as a Share of GDP

This measure presents tourism spending as a percentage of the GDP of a region. It provides a gauge of how important tourism is to the local economy. An important note about this variable is that it does not reflect what is spent in the tourism industry of that region, but only what is spent by tourists visiting that region as their main destination.

TABLE 41. TOTAL SPENDING AS % SHARE OF GDP - POLOKWANE, CAPRICORN, LIMPOPO AND NATIONAL TOTAL, 2011-2021 [PERCENTAGE]

Financial Year	Polokwane	Capricorn	Limpopo	National Total
2011	7.2%	6.7%	5.9%	6.2%

2013	8.1%	7.5%	6.6%	6.5%
2014	8.3%	7.9%	6.8%	6.7%
2015	6.9%	6.6%	5.9%	5.7%

Financial Year	Polokwane	Capricorn	Limpopo	National Total
2016	7.1%	6.7%	5.9%	5.8%
2017	6.2%	5.8%	5.2%	5.2%
2018	6.7%	6.2%	5.5%	5.4%
2019	9.9%	9.1%	7.8%	7.2%
2020	2.0%	1.9%	2.3%	2.4%
2021	3.7%	3.6%	4.0%	4.8%

Source: IHS Global Insight 2022

In Polokwane Local Municipality the tourism spending as a percentage of GDP in 2021 was 3.7%. Tourism spending as a percentage of GDP for 2021 was 3.6% in Capricorn District Municipality, 4.0% in Limpopo Province. Looking at South Africa as a whole, it can be seen that total tourism spending had a total percentage share of GDP of 4.8%.

4.11 International Trade

Trade is defined as the act of buying and selling, with international trade referring to buying and selling across international border, more generally called importing and exporting. The Trade Balance is calculated by subtracting imports from exports.

4.11.1 Relative Importance of international Trade

In the table below, the Polokwane Local Municipality is compared to Capricorn, Limpopo Province and South Africa, in terms of actual imports and exports, the Trade Balance, as well the contribution to GDP and the region's contribution to total national exports and imports.

TABLE 42. MERCHANDISE EXPORTS AND IMPORTS - POLOKWANE, CAPRICORN, LIMPOPO AND NATIONAL TOTAL, 2021 [R 1000, CURRENT PRICES]

	Polokwane	Capricorn	Limpopo	National Total
Exports (R 1000)	1,631,442	1,760,072	32,068,104	1,810,179,453
Imports (R 1000)	425,612	464,155	2,383,400	1,328,526,000
Total Trade (R 1000)	2,057,053	2,224,227	34,451,504	3,138,705,453
Trade Balance (R 1000)	1,205,830	1,295,918	29,684,704	481,653,453
Exports as % of GDP	1.4%	1.2%	6.8%	29.1%
Total trade as % of GDP	1.8%	1.5%	7.3%	50.4%
Regional share - Exports	0.1%	0.1%	1.8%	100.0%
Regional share - Imports	0.0%	0.0%	0.2%	100.0%
Regional share - Total Trade	0.1%	0.1%	1.1%	100.0%

Source: IHS Global Insight 2022

The merchandise export from Polokwane Local Municipality amounts to R 1.6 billion and as a percentage of total national exports constitutes about 0.1%. The exports from Polokwane Local Municipality constitute 1.4% of total Polokwane Local Municipality's GDP. Merchandise imports of R 425 million constitute about 0.00% of the national imports. Total trade within Polokwane is about 1.8% of total national trade. Polokwane Local Municipality had a positive trade balance in 2021 to the value of R 1.2 million.

CHART 41. IMPORT AND EXPORTS IN POLOKWANE LOCAL MUNICIPALITY, 2011-2021 [R 1000]

Source: IHS Global Insight 2022

Analysing the trade movements over time, total trade decreased from 2011 to 2021 at an average annual growth rate of -0.33%. Merchandise exports decreased at an average annual rate of -1.16%, with the highest level of exports of R 2.99 billion experienced in 2015. Merchandise imports increased at an average annual growth rate of 3.79% between 2011 and 2021, with the lowest level of imports experienced in 2011.

CHART 42. MERCHANDISE EXPORTS AND IMPORTS - POLOKWANE AND THE REST OF CAPRICORN, 2021 [PERCENTAGE]

Source: IHS Global Insight 2021

When comparing the Polokwane Local Municipality with the other regions in the Capricorn District Municipality, Polokwane has the biggest amount of international trade (when aggregating imports and exports, in absolute terms) with a total of R 425. million. This is also true for exports - with a total of R 1.63 billion in 2021. Lepele-Nkumpi had the lowest total trade figure at R 5.8 million. The Lepele-Nkumpi also had the lowest exports in terms of currency value with a total of R 1.7 million exports.

CHAPTER Five: Water and Sanitation Analysis

5.1 Water and Sanitation Directorate Overview

The Water and Sanitation Directorate consist of 3 SBU's: i.e.

- 1) Infrastructure Development Planning and Reticulation Design.
- 2) Reticulation, Distribution and Maintenance, Water Demand and Conservation.
- 3) Operations: Water and Wastewater, Quality Management and Laboratory Services.

5.1.1 Water Provision

Provision of water in accordance with the obligations of the municipality as Water Services Authority is a high priority.

To meet Polokwane Municipality's strategic vision, an Integrated Water Master Plan(IWMP) has been developed in phases, to ultimately address the full water distribution cycle i.e. from Source-to-Tap-to-Effluent discharge for all areas, and all water supply infrastructure within Polokwane Municipality. **(Approved by council)**

The supply areas consist of the City and urban areas as well as an extensive rural area, and both urban and rural areas are facing severe challenges in terms of water services.

Polokwane Municipality complies with the **sans 241 standards** on provision of portable water – PREP assessment is underway for the next Green Drop Audit.

5.1.2 Reliability of Water Supply in Polokwane

Residents of Polokwane are not getting reliable water supply due to identified water supply challenges i.e.

- 1) **Water abstraction restrictions** on the Polokwane System by Lepelle Northern Water Board
- 2) **Infrastructure challenges** on both the Ebenezer and Olifantspoort Bulk Water Schemes.
- 3) **Lack of backup power** at both Ebenezer and Olifantspoort plants to act as an alternative when there are power outages and load shedding.
- 4) **Theft and vandalism** of ESKOM Transformers and Borehole Pumping Equipment in rural areas.
- 5) **Illegal connections in RWS** that are designed to cater for RDP standards leaving some residents without water because of excessive water use.

5.1.3 Water Provision – Short Term Interventions

The Municipality has identified the water supply shortfall in the Urban Complex as a threat to the growth of the city and a threat to the Economy and implemented measures to turn the situation around:

- Polokwane Municipality took an initiative to engage in intensive **ground water development** to augment the supply with 34 MI/d at peak operation.
- **Three (3) Contractors** are on site with 3 key projects to deliver the water at two water purification sites from wellfields developed around the City and Seshego
- We are constructing **2 new Water Treatment Plants** with bigger capacity to purify the ground water from the projects above.

5.1.4 Progress of Groundwater Developments projects

CONTRACT NAME	PROJECT VALUE	% PHYSICAL PROGRESS	START DATE	STATUS AND ESTIMATED COMPLETION DATE
Sandriver North Water Treatment Works	R 151 643 977	78.0%	4 July 2019	30 Dec 2022.
Seshego Water Treatment Works	R 190 391 610	67%	18 Nov 2019	30 Oct 2022.
Sterkloop and Sandriver South Wellfield Development and distribution	R 88 959 047	98.0%	25 June 2019	30 Dec 2022.
Sandriver North Wellfield and Polokwane boreholes development and distribution	R 108 569 468	93.0%	25 June 2019	30 Dec 2022.
Bloodriver Wellfield and Seshego boreholes development and distribution	R 75 390 102	98%	18 Nov 2019	31 Oct 2022.

Source: PLK Water and Sanitation SBU

5.1.5 Water Provision – Long Term Interventions

- Upgrading of Dap Naude pipeline to provide an additional 4 MI/d to Dalmada – Planning completed awaiting approval of BWS IRS.
- Exploration of the Dieprivier Wellfield to deliver an additional 7 MI/d into the system. This will relieve the supply from Ebenezer and more water can therefore be delivered in the City – Planning completed awaiting approval of BWS IRS.

- Implementation of the pressure management and Hydraulic re-modelling of the City network (put pressure zones in place) – Planning completed awaiting approval of BWS IRS.
- Continuation of the exploration of the **Malmani Dolomites** for an access to additional 21 MI/d – Pre-Feasibility conducted and requires funds for further planning.
- Finalize water reclamation at the new Polokwane Regional Wastewater Treatment Works (50% of the effluent discharged) – Pre-Feasibility conducted and requires funds for further planning.

5.2 Powers and Function of Polokwane Municipality

In terms of the Constitution, Municipal Structures Act and other policy frameworks Polokwane Municipality is responsible for the following functions:

<ul style="list-style-type: none"> ▪ Water and Sanitation (Both portable and bulk supply system and domestic wastewater and sewage disposal system) ▪ Air Pollution ▪ Building regulations ▪ Childcare facilities ▪ Electricity and Alternative energy ▪ Firefighting services ▪ Municipal planning ▪ Municipal public works ▪ Storm water management ▪ Trading regulations ▪ Billboards and the display of advertisements in public places 	<ul style="list-style-type: none"> ▪ Cemeteries ▪ Cleansing ▪ Control of public nuisances ▪ Local sport facilities ▪ Municipal parks and recreation ▪ Roads ▪ Noise pollution ▪ Pounds ▪ Public places ▪ Waste Management (refuse removal, refuse dumps and solid waste disposal) ▪ Street trading ▪ Street lighting ▪ Traffic and parking
--	---

5.3. WATER

Polokwane Municipality is a **Water Service Authority (WSA)** and also a **Water Service Provider (WSP)**. Every Water Service Authority has a duty to all customers or potential customers in its area of jurisdiction to progressively ensure efficient, affordable, economical and sustainable access to Water Services [Water Services Act of 1997 Section 11]. Thus, a Water Service Authority has the duty to provide water services with the focus on: Ensure, Efficient, Affordable, Economical and Sustainable deliverables.

5.3.1 Principles of Water Service Provision

- To ensure: effectiveness, efficiency, viability, sustainability.
Requires: proactive approach, pre-thinking, deliberation, understanding, thus coordinated planning.
- Therefore: Every Water Services Authority must prepare a Water Services Development Plan for its area of jurisdiction [Water Service Act of 1997 Section 12].

Water is life – it is the most important resource to encourage both social and economic development within communities. There has been tremendous improvement in the provision of the basic service in the municipal area at and above RDP standard.

5.3.2 16 Regional Water Schemes (RWS)

Municipal water provision is divided into Regional Water Schemes. **Polokwane Municipality** has been sub-divided into **16 RWS** and each scheme is allocated **budget** for water reticulation:

1. Mothapo RWS,
2. Moletjie East RWS
3. Moletjie North RWS,
4. Moletjie South RWS,
5. Houtriver RWS,
6. Chuene/Maja RWS,
7. Molepo RWS,
8. Laastehoop RWS,
9. Mankweng RWS,
10. Boyne RWS,
11. Segwasi RWS,
12. Badimong RWS,
13. Sebayeng/ Dikgale RWS,
14. Olifantspoort Sand RWS.
15. Aganang East RWS
16. Bakone RWS

The municipal Regional Water Schemes depends on the following **water sources**:

5.3.3 Water Scheme Sources

Water source	RWS supplied	Average Daily Supply	Source Capacity
Ebenezer	Mankweng RWS	23 MI/Day	21 MI/day
	Rural (Mothapo RWS, Molepo RWS, Segwasi RWS, Boyne RWS, Badimong RWS, Sebayeng Dikgale RWS)	7.7 MI/Day	
Olifants Sand	Chuene/Maja RWS, Olifants Sand RWS (Seshego, some portion of City and Mmotong wa Perekisi)	27.3 MI/day	27 MI/d
Dap Naude Dam	Olifants Sand RWS (Polokwane City)	12 MI/Day	18 MI/d
Seshego Dam	Olifants Sand RWS (Seshego)	1,6 MI/day	3,9 MI/d

Water source	RWS supplied	Average Daily Supply	Source Capacity
Seshego Borehole	Olifants Sand RWS (Seshego)	1,2 MI/day	2.0MI/d
Ebenezer	City	16 MI/Day	11 MI/Day
Boreholes	Augment water from dams	5,5 MI/Day	25,33 MI/d
Rural dams			
Houtriver Dam	Houtriver RWS	2,0 MI/day	3,9 MI/d
Chuene/Maja Dam	Chuene Maja RWS	1.2 MI/day	2,7 MI/d
Molepo Dam	Molepo RWS	1.2 MI/day	6 MI/d
Mashashane (Utjane) Dam	Moletjie south RWS	0.6 MI/day	1.5 MI/d
Total		99.3 MI/day	122.33 MI/d
Peak flow demand		163 MI/day	

Source: PLK Water and Sanitation SBU

It is the responsibility of local government to make sure that adequate and appropriate investments are made to ensure the progressive realization of the right of all people in its area of jurisdiction to receive at least a basic level of services.

Polokwane Municipality is a water scarce City with more than 60% of its water sourced outside the boundary of the Municipality. To ensure the sustainability of water sources the municipality undertakes water conservation awareness campaign.

On annual basis funds are made available to improve the water accessibility to all **16 various Regional Water Schemes**. The first priority is to develop the sustainable bulk water sources and then develop or extend the internal infrastructure. The biggest problem to keep water sources sustainable is theft and vandalism on boreholes and reliable surface water.

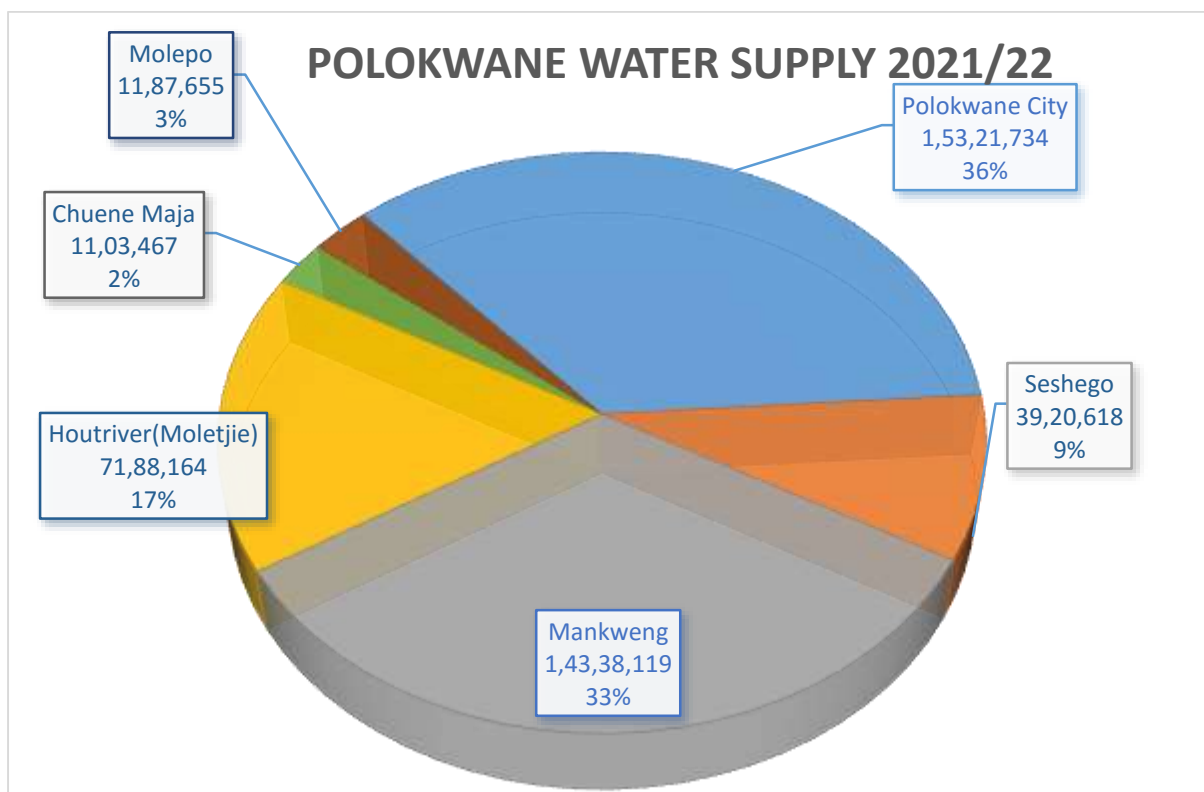

As a part of water provision, the municipality provides free basic water to communities. Free Basic Water is offered to all rural Regional Water Schemes, for the Urban Regional Water Scheme the free basic water is only given to the registered indigent people. According to the FBW policy, implemented by Local Government, households are entitled up to 6000 litres (6kl) of potable water every month at no cost. Households that use more than 6kl of free basic water must be responsible for the payments of further consumption.

Most of municipal Regional Water Schemes are 100% reticulated with metered yard connections. The rural households with yard connections do not pay for the service. The municipality has intentions to recover costs in Regional Water Schemes or villages that are fully reticulated with metered yard connections.

5.3.4 Lepelle Northern Water supplied Schemes.

		Total 21/22	
Polokwane City	LNW	15 321 734	Ebenezer + Olifantspoort
	Own Source		Masharl & Sand River North Boreholes + Dalmada Plant
Seshego	LNW	3 920 618	Olifantspoort
	Own Source		Seshego Plant & Sand River South Boreholes
Mankweng	LNW	14 338 119	Ebenezer
	Own Source		Estimated from the number of working Boreholes in the area
Houtriver (Moletjie)	LNW + P - Hoop	7 188 164	Olifantspoort + Pilgrimshoop
	Own Source		Houtriver Plant + Mashashane
	Own Source		Estimated from the number of working Boreholes in the area
Chuene Maja	LNW	1 103 467	Olifantspoort
	Own Source		Chuenespoort Dam
	Own Source		Estimated from the number of working Boreholes in the area
Molepo	LNW	1 187 655	Ebenezer
	Own Source		Molepo Dam
	Own Source		Estimated from the number of working Boreholes in the area

5.3.5 Polokwane Water Supply

5.3.6. Polokwane Groundwater Development

Output of the Groundwater Projects

(Polokwane Groundwater Development) - **PM131/2018**: Construction of Sandriver North Water Treatment Works - (18ML/day) to treat Polokwane boreholes (Sterkloop, Sandriver South, Sandriver North) – to be completed by **December 2022**

(Polokwane Groundwater Development) - **PM132/2018**: Construction of Borehole Infrastructure and Pumping Mains for the Sterkloop and Sandriver South Wellfields. Equip 18 boreholes in Sterkloop WF and Sandriver South WF (6,3ML/d average supply; 12,6ML/d peak supply); Pump to new Sandriver North Water treatment works and distribute to existing Doornkraal reservoir – to be completed by **December 2022**

(Polokwane Groundwater Development) - **PM133/2018**: Construction of Borehole Infrastructure and Pumping Mains for the Sandriver North Wellfield and Polokwane Boreholes. Equip 32 boreholes in Sandriver North WF and Polokwane boreholes (6,4ML/d average supply; 12,8ML/d peak supply); Pump to new Sandriver North Water treatment works and distribute to existing Krugersburg and Potgieter reservoirs – to be completed by **December 2022**

(Polokwane Groundwater Development) - **PM02/2019**: Seshego Water Treatment Works - (11ML/day) to treat Seshego boreholes (Seshego, Bloodriver, Pilgrimshoop) and Seshego dam (2ML/day) – to be completed by **November 2022**

(Polokwane Groundwater Development) - **PM01/2019**: Bloodriver Wellfield and Seshego Groundwater Development and Pumping Mains - Equip 17 boreholes in Bloodriver and Seshego Wellfields; pump to new Seshego WTW (4,1ML/d average supply; 7, ML/d peak supply); pump to new Seshego Water Treatment Works and distribute to Perskebult and Seshego reservoirs. – to be completed by **November 2022**

5.3.7 Setbacks in planning and implementation (Technical report approval)

The following Regional Water Schemes (RWS) have experienced setbacks in planning and implementation due to inability to obtain technical report approval from the Department of water and sanitation. One of the key limitations being **insufficient water sources** from both subsurface and surface sources.

- **Moletjie North RWS** – inadequate reticulation network, water supply security and connection to bulk surface water supply. After extensive Geo-hydrological studies 2

boreholes were identified which resulted in an acceptable water balance. The technical report was approved in March 2021.

- **Moletjie South RWS** – serviced by a network of 11 boreholes which present very low yields during dry seasons. Constant vandalism of borehole infrastructure. No reticulation in extensions and no access to any surface water sources. The technical report was approved in March 2021 on condition that operational efficiency is maintained, and the existing boreholes remain operational and vibrant.
- **Badimong RWS** – inadequate reticulation network, water supply security and connection to bulk surface water supply. Inability to obtain acceptable water balance.
- **Aganang RWS** – At the time of amalgamation of Polokwane and Aganang Municipalities, the water supply challenges were already prevalent, and no approved technical report was handed over to Polokwane Municipality. Polokwane LM started with the process of funding approval from the former MIG which resulted in late commencement of the Projects. Implementation has since started in the 2018/19 Financial year. To date 5 villages have been completed, 9 villages are under construction, 2 villages are at planning while 12 villages have been submitted to the DWS for approval.

5.3.8. Impact of reduction in RBIG funding (Water Projects)

1. Refurbishment of the Dap Naude water pipeline.

- The Reduction in RBIG funding has affected the refurbishment of the pipe line from Ebenezer Dam to the City.
- This project is of strategic importance in order to secure additional potable water for Polokwane CBD.
- Supply to be increased from 14MI/day to 17,9MI/day. Water is available but needs to be conveyed to Polokwane. Increase of approximately 4MI/day.
- It is important to note that the 2022 water balance suggests a total demand of 169MI/day and a supply capacity of 153MI/day with all water supply projects commissioned and functional by the end of 2022. Even with all RBIG projects completed there will be a shortfall of 16MI/day. This deficit will increase if budgets remain as is.

2. Polokwane Distribution Pressure and Flow Management:

This project is of strategic importance in order to secure additional potable water for Polokwane CBD.

Progress has been made to reduce water losses through pipe breaks by replacing old AC pipes within the CBD of Polokwane. More work is needed to reduce water losses and to fine tune water balance requirements. This project is urgent to maximise the water distribution to the CBD and Seshego.

5.3.9 Free Basic Water

The provision of free basic water in Polokwane Municipality is determined by the indigent policy and register updated annually for those who stays in areas where cost recovery is ongoing, and all the rural villages are receiving free basic water.

Basic service	The limited amount	Free basic services provided	Rural/Urban	Number Customers
Water				
Free basic water.	6kl per month	50 villages received free Water monthly. 68 villages receive free Water supplied by Lepelle Water Board. 153 villages receive free water supplied by boreholes.	Rural	All households in rural areas

Source: PLK Water and Sanitation SBU

A statistical summary of the status quo assessment for water and sanitation services is provided per cluster in **Table** below:

Table: Water Service Levels

Service	Cluster	Service Level
Water	Mankweng/Sebayeng	67.9 % above RDP
	Moletjie	60.7 % above RDP
	Maja/Chuene/Molepo	44,3 % above RDP
	Aganang	59.0 % above RDP
	Municipal wide	82.04% access to water
	Municipal wide backlog	17.96%

Source: PLK Water and Sanitation SBU

There is still a considerable backlog that must be addressed especially in the Maja, Chuene, Molepo, followed by Moletjie and Mankweng clusters.

The elimination of backlog is challenged by limited and /or unsustainable source of water found in the rural areas and continuous increase of new settlements in some clusters in the municipal area. Funding limitations also affect the eradication of backlog on the expected rate.

5.3.10 Water Quality

According to the Constitution of the Republic of South Africa everyone has the right to an environment that is not detrimental to their health or wellbeing.

To ensure that water quality does not pose any health hazards to our people, Department of Water and Sanitation as the regulator has introduced the monitoring tool for water quality. According to DWS there is certain standard which both potable and waste water must meet.

Polokwane municipality obtained Blue drop for 2011 in the Mankweng and City water systems. The outlined ratings are from 2008 until 2015 assessment.

WATER SUPPLY SYSTEM	BLUE DROP CERTIFICATION	2008/2009	2009/2010	2010/2011	2011/2012	2014/2015
Polokwane City	95%	70.5%	95.70%	95.05%	92.03%	95.08
Mankweng	95%	70.5%	n/a	95.155	80.89%	86.07
Seshego	95%	42.5%	66.38%	89.65%	87.12%	86.81
Molepo	95%	70.5%	66.38%	79.89%	82.02%	85.38
Moletjie (Houtriver)	95%	70.5%	53.63%	76.57%	73.79%	85.26
Chuene/Maja	95%	70.5%	55.10%	81.44%	87.29%	88.09

Source: PLK Water and Sanitation SBU

5.3.11 Surface water quality test results

Surface water quality test results are as follows:

Determinant	Unit	Dap Naude	Ebenezer	Olifantspoort	Seshego Dam
pH	pH Unit	8.34	6.82	6.73	7.42
Turbidity	NTU	0.61	0.72	0.69	0.74
Conductivity	mS/m	2.46	4.83	77.63	77.70
Total Dissolved Solids (TDS)	mg/l	15.99	31.40	504.56	505.05
NO3	mg/l	0.40	0.13	0.28	0.35
SO4	mg/l	1.81	2.79	170.00	165.16
Alkalinity (m)	mg/l	8.80	15.83	115.90	115.09
Chloride	mg/l	4.25	6.91	85.95	62.40
Tot Hardness	mg/l	21.2	58.05	319.00	354.00
Ca Hardness	mg/l	20.00	23.25	123.25	135.00
Mg Hardness	mg/l	1.20	34.80	195.75	219.00

Source: PLK Water and Sanitation SBU

Polokwane Municipality Groundwater sources generally indicate elevated hardness levels, in excess of 300mg/l, which is defined as very hard water. Hard water is generally considered to be those waters that require considerable amounts of soap to produce foam and hard water also produces scale in water pipes, heaters, geyser and other units in which the temperature of the water is increased.

Although the South African National Standards 241:2015 do not specify a maximum limit for hardness levels the elevated hardness levels, when compared to the surface water sources, will lead to end-user complaints when the groundwater is introduced untreated into the reticulation system. It is therefore advisable to soften the groundwater sources to levels comparable to the Olifantspoort source to mitigate end-user complaints. Hard water is appropriate for human consumption similar to that of soft water. However, as hard water produces adverse actions with soap its use for cleaning purposes is unsatisfactory.

Table: Polokwane Local Municipality: Access to Safe Drinking water

Provision of Water	Yes	No	Unknown	Total
Households	202 107	75 714	2404	280 225
Percentage	72.1%	27.01%	1.01	100%

Source: PLK Water and Sanitation SBU

Table: Main Water Provision

Water provision (level of service)	2020
Piped (tap) water inside the dwelling/house	67 119
Piped water inside yard	126 846
Piped water on community stand	17 313
Borehole in the yard	14 361
Rain water Tank in Yard	2 114
Neighbour's tap	12 159
Public / Communal tap	11 027
Water Carrier / tanker	16 747
Boreholes outside the yard	6 769

Water provision (level of service)	2020
Flowing water or River / Stream	836
Well	224
Spring	142
Other	4 248
TOTAL	280 225

Source: PLK Water and Sanitation SBU

From the analysis, it is evident that population has increased from 178001 to 280 225 households and the number of households with piped water inside their house have increased this figure includes 67 119 HH with water in the dwelling and 126 846 HH with water in the yard while 17 313 HH are receiving piped water on communal tap.

The municipality has **45 441** households with no access to piped water. The elimination of backlog is challenged by limited and /or unsustainable source of water found in the rural areas and continuous increase of new settlements in some clusters in the municipal area. Funding limitations also affect the eradication of backlog on the expected rate.

5.3.12. Challenges faced by the Municipality in providing water.

1. Lack of sustainable water sources for current and future demand, the municipality is currently receiving between 80 to 99MI/d and unable to meet the peak flow demand of 163MI/day. The municipality should invest in upgrading existing Dap Naude Dap water scheme to utilise its current yield to maximum capacity including possible increase of dam wall.
2. Shortage of water will have a serious impact on projects that the municipality and other sector department are planning. E.g., Polokwane extension 78 Police station, Polokwane extension 71, 108, 72, 79,106 and 107, Bendor extension 100, Ivy park extension 35. Upon completion, all these developments will have a major impact on our currently insufficient water sources.
3. Over reliance on boreholes in rural areas with risk of contaminating ground water by pit latrines.
4. Lack of cost recovery in rural areas.
5. Aging water infrastructure in the CBD, Council in partnership with Department of Water and Sanitation has started with a programme to eradicate this challenge by investing more than R420Million to remove all Asbestos pipes in the CBD and surrounding townships).
6. More than R380 million is also required to increase the capacity of water infrastructure to be able to cater for current and new developments.
7. Uncoordinated allocation of new settlement in rural areas by traditional authorities has a major impact on municipal planning and budgeting.
8. Lack of maintenance plans and AS Built drawing to indicate the existing valves for water infrastructure. Some of the valves are buried under ground by residents while

- paving their drive ways which makes it difficult to locate them when doing maintenance or replacing burst pipes and as a result contributing to huge water losses.
9. Limited operation and maintenance of infrastructure due to shortage of funds.
 10. Theft and vandalism of the existing insufficient infrastructure remains a challenge. Theft of iron manhole and valves covers is increasing and there is a need to change them to plastic and it a huge safety risk within the city.
 11. Illegal extension of houses (back yard rooms) has an impact on water demand.
 12. Lack of smart metering systems that can control water demand and supply, monitor losses (+R180Million required).
 13. Unapproved technical reports for some regional water schemes due to insufficient water sources.
 14. Lack of enforcement of regulations/bylaws.
 15. Drought effects on surface water resources such as Molepo dam.
 16. Vast distances and scattered settlements in rural water schemes make it expensive and difficult for water resources to reach all households.

5.3.13. Water Supply to schools

Description	Polokwane Municipality
Total number of schools	310
Number of schools supplied with water	254
Number of schools remain to be serviced. Currently they have boreholes in the schools	56

Source: PLK Water and Sanitation SBU

5.4. SANITATION

Sanitation is about dignity. The availability of sanitation facilities not only improves the dignity of people, but also promotes their health. Areas without proper sanitation systems give rise to water borne diseases like cholera, diarrhoea, typhoid, etc. It is therefore important that the Municipality prioritise the service, particularly considering the backlog (rural sanitation) and the national target.

5.4.1 Sanitation Provision

Polokwane municipality sewer systems are **overloaded** due to the increase in population and economical activities in areas of **Seshego, Mankweng and Polokwane City**.

WWTW System	Design Capacity	Average Inflow
Polokwane WWTW	27 MI/Day	40 – 50 MI/day
Seshego WWTW	7.6 MI/Day	06 – 07 MI/day
Mankweng WWTW	7.6 MI/Day	06 – 08 MI/day

Source: PLK Water and Sanitation SBU

5.4.2 VIP Sanitation Programs in Rural Areas

- The municipality continues to implement VIP sanitation programs in rural areas to ensure that proper sanitation is provided, and ground water is protected.
- Sludge management is still a challenge – However USAID has signed an MOU with the municipality funded a training programme on Faecal Sludge Management.
- Capacity of the sewer pipeline network is also overloaded and requires upgrades (Requires Sanitation Master Plan for the entire area with waterborne system).

5.4.3 Green Drop Audit.

- Green Drop – The municipality was assessed on green drop compliance in November 2021 after the programme was halted for some few years.
- The municipality did not perform well in the outcome of the **Green Drop Audit**.

5.4.4 Sanitation Provision - (Medium- & Long-Term Solutions)

- Polokwane municipality has completed and submitted the Bulk Sanitation IRS that was subsequently approved in 2021.
- The municipality has completed 2 of the 3 Outfall Sewers and the remaining project is 80% completed.
- **Phase 2A** – (Construction of Earth Works) has been completed and Phase 2B – (Construction of Civil, Mechanical, EC&I) planning is completed (Bid for Civil works has closed on 22 August 2022 and the contractor should be on site by October 2022)
- Planning for refurbishment of Seshego and Mankweng is also completed and is awaiting funding allocation for implementation.
- Phase 1 of the refurbishment at the main Polokwane Wastewater Treatment Works were completed in 2020 and planning for phase 2 is completed awaiting funds for implementation.
- Ensure that groundwater water protocol is budgeted for to ensure that the groundwater resources are monitored for possible contamination.
- Ensure that funds are budgeted/ring-fenced for implementation of the faecal sludge handling particularly in rural areas. (**Emptying of VIP Toilets**).

Table: Toilet Facilities (Households)

Type of toilet facility	2020
Flush toilet connected to a public sewerage system	103 180
Flush toilet connected to a septic tank or Conservancy tank	6 044
Chemical toilet	1 686
Pit latrine / toilet with ventilation	40 575
Pit latrine / toilet without ventilation	102 965
Ecological toilet (Urine diversion, enviroloo etc.)	282
Other	25 756
None	4248

Source: PLK Water and Sanitation SBU

Major progress has been made in the provision of sanitation services in Polokwane since 2001, there major improvement in the provision of this service. However, with the improvement the municipality will not meet the Millennium Development Goal that every household must have access to healthy and dignified sanitation facility.

The municipality is currently having a huge backlog of sanitation facilities (VIP) and an amount of more than R500 million is required to eradicate it. The backlog figure includes 86 132 pit latrines that are not constructed according to the approved standards and as such it poses a risk of water borne diseases.

5.4.5. Free Basic Sanitation

For Improved provision of basic and environmental services in a sustainable way to our communities, each financial year Polokwane Municipality construct the Ventilated Improved Pit latrine (**VIP**) in rural Villages according to the priority list of the ward.

5.4.6. Wastewater Treatment Plants

For the purposes of increasing the capacity of the Waste Water Treatment Plants to support current and future development, the municipality is currently in a process of building:

- 1) New Regional waste water treatment.**
- 2) Seshego Waste Water Treatment Plant.**
- 3) Mankweng Waste Water Treatment Plant.**

As well as Refurbishment of the Waste Water plants.

Two of major projects on the construction of outfall sewer lines are complete while one is still under construction.

5.4.7. Impact of reduction in RBIG funding (Sanitation Projects)

The following projects are greatly affected by the Reduction of RBIG funding:

1. Polokwane Regional Wastewater Treatment Plant

Polokwane Waste Water Treatment Plant is the biggest with 26 Ml/day capacity and the current load standing at 34 Ml/day.

Plans are in place to construct the 100 ML/day Regional Waste Water Treatment Plant for the whole Polokwane Municipal sewage load and to cater for new developments (however there is limited budget). A memorandum of agreement to refurbish and upgrade the over loaded Polokwane Waste Water Treatment Plant has been signed by the Municipality and Anglo American to upgrade the WWTP as the first phase.

The upgrade is now complete and has been commissioned. The second phase of the project has been divided into two separate contracts namely an earthworks contract and an electrical, civil, structural and mechanical (CME) contract. The earthworks contract has been completed by end of June 2021. The second contract, the CME contract is due to commence. The earthworks for this project consisted of large excavations and open platforms the earthworks should not lay open as damage to platforms and excavations will most definitely occur. The municipality is reviewing the scope of the CME contract to advertise only the scope that fits within the approved MTERF budget of R210 000 000.

2. Upgrading and refurbishment of Mankweng treatment plant (intended to cater for the University of Limpopo growth).

The Reduction in RBIG Funding has also affected the plans for the Mankweng Sewer Plant, and Mankweng is a nodal point, the University of Limpopo has applied for funding with regard to student accommodation, there is a serious need of New Sewer Plant in Mankweng.

The treatment facility is in dire need of refurbishment and upgrading in light of the growth of Mankweng area and further plans by the University to develop student accommodation. This project cannot be delayed. The current treatment capacity is under strain and the effluent quality is compromised. The projects are tender ready, and the Municipality is reviewing the scope to align with the available allocation of R15 000 000.

3. Upgrading and refurbishment of the Seshego wastewater treatment plant.

The planning is at advanced stage, the treatment facility is in dire need of refurbishment and upgrading in light of the growth of Seshego. The current treatment capacity is under strain and the effluent quality is compromised. The projects are tender ready and was advertised in March 2020 and the Municipality is re-advertising the tender with revised scope to align with available allocation of R15 000 000.

5.4.8 Challenges faced by the Municipality in providing Sanitation.

1. The risk of contaminating ground water in rural areas due to huge backlog of pit latrine that is not according to the approved standards.
2. Lack of funding to eradicate rural backlog (more than R500 million is required).

3. Lack of funding for construction of regional waste water treatment plant. According to master plan 1st phase was supposed to be at implementation by now, more than R1, 2 billion required). DWS has completed the feasibility study for new regional wastewater works and is co funding the project through RBIG.
4. Aging sanitation infrastructure (some of old sewer lines in Seshego are running under houses or very close to the houses and should be moved).
5. Uncoordinated allocation of new settlement in rural areas by traditional authorities has a major impact on municipal planning and budgeting (VIP).
6. Lack of maintenance plans for sewer infrastructure.
7. Limited operation and maintenance of infrastructure due to shortage of funds.
8. Theft and vandalism of the existing insufficient infrastructure remains a challenge.
9. Illegal extension of houses (back yard rooms) has an impact on sewer treatment plant. Boyne is the home of two biggest churches and proper sanitation structure is needed to avoid future water contamination.

5.4.9 Sanitation in Schools

Description	Polokwane Municipality
Total number of schools	310
Number of schools supplied with sanitation	296
Number of schools remaining to be serviced with Sanitation	14

Source: PLK Water and Sanitation SBU

5.4.10 Rural Household Sanitation

Polokwane municipality is constituted by a composition of households that are 65% rural and the balance being urban. There is currently no formalised sewerage collection and network in the rural areas. Sanitation in rural areas is managed through construction of VIP toilets to eradicate the backlog in access to sanitation.

Polokwane Municipality is made up of **7 Clusters and 45 wards** that should be equally provided with services guided by the community needs i.e.

Clusters	Wards No.
Mankweng Cluster	06,07,25,26,27,28, 34
Moletjie Cluster	09,10,15,16,18,35, 36,38
Molepo / Chuene / Maja Cluster	1,2,3,4,5
Sebayeng / Dikgale Cluster	24,29,32,33,30,31
Aganang Cluster	40,41,42,43,44,45

Clusters	Wards No.
City Cluster (exempted from the VIP Allocation)	08;19,20,21,22,23,39
Seshego Cluster (exempted from the VIP Allocation)	11,12,13, 14,17,37

Source: PLK Water and Sanitation SBU

The two urban clusters i.e., **City and Seshego** Cluster are exempted from the allocation of VIP toilets as they have sewage system in place. Council focuses on allocating VIP toilets in the rural Clusters.

During the 2016/17 to 2020/21 financial year the following number of VIP toilets were allocated:

5.5. BACKLOG OF BASIC SERVICES

Below is the current status of existing backlog, which without annual maintenance will escalate.

Service	H/H	Access	Backlog
Water	280 225	202 107 (72.1%)	78 118
Sanitation		134 695 (48.1%)	145 530
Electricity		242 015 (87.2%)	38 210
Housing		160 980 (90.4%)	65 000
Waste		104 402 (48.1%)	175 823
Roads (7 495km)		1 419km (18.9%)	6 076.3km

Source: PLK Water and Sanitation SBU

5.5.1 Regional Water Scheme (RWS) –Demand and Shortfall

RWS Analysis

Regional Water Supply Scheme (RWS)	Current ground water abstraction	Current surface water source	Demand	Surplus/Shortfall
Mothapo RWS	3 618 Kl/day	1 514 Kl/day	3 292.3 Kl/day	1 839.7 Kl/day
Laaste Hoop RWS	725.8 Kl/day	445 Kl/day	798.7 Kl/day	372.1 Kl/day

Regional Water Supply Scheme (RWS)	Current ground water abstraction	Current surface water source	Demand	Surplus/Shortfall
Mankweng RWS	320.8 Kl/day	10357 Kl/day	12 017.7 Kl/day	-1 339.9 Kl/day
Sebayeng-Dikgale RWS	6 391.4 Kl/day	224 Kl/day	5 503.3 Kl/day	1 112.1 Kl/day
Badimong RWS	827.3 Kl/day	1691 Kl/day	2 473 Kl/day	45 Kl/day
Segwasi RWS	250.6 Kl/day	394 Kl/day	265 Kl/ day	379.6 Kl/day
Boyne RWS	103.7 Kl/day	867 Kl/day	701.3 Kl/ day	269.4 Kl/day
Molepo RWS	733.7 Kl/day	1 100 Kl/day	1 537.7 Kl/day	296 Kl/day
Chuene Maja RWS	324 Kl/ day	2 700 Kl/day	2 179 Kl/day	845 Kl/day
Moletjie South RWS	3 727 Kl/day	1 000 Kl/day	2 977 Kl/day	1 750 Kl/day
Moletjie North RWS	810 Kl/day	0	611.3 Kl/	198.7 Kl/day
The Hout River RWS	1 657 Kl/day	2 000 Kl/day	2 096 Kl/day	1561 Kl/day
Moletjie East RWS	4 055 Kl/day	0	2 627 Kl/day	1 428 Kl/day
Aganang East	3 108 Kl/day	0	1 545 Kl/day	1 563 Kl/day
Bakone RWS	4 394 Kl/day	0	2 229 Kl/day	2 165 Kl/day

Source: PLK Water and Sanitation SBU

Backlogs to the access of water services are mainly attributed to:

- Availability
- Sustainability
- Proximity
- Storage Requirements
- Treatment requirements
- And affordability

5.6. SMART METERING

The City of Polokwane Smart City Vision articulates the future development path. Consistent with the 2030 Smart City Vision, the City launched six pillars that will assist the municipality to work towards the realization of becoming a Smart City that embraces Smart Living and Smart People as some of its building pillars. This Smart City concept is carried within the City's vision to be the "The ultimate in innovation and sustainable development".

During the 2017 State of the City address, the City have articulated a number of initiatives that are out of the ordinary that the City will be embarking on towards attaining the goal of becoming a sustainable City that is geared towards improving service delivery.

For a couple of years, City of Polokwane have been announcing that the municipality is experiencing serious challenges with regards to water and electricity losses as a result of burst

pipes and illegal connections, among others. These losses accounted to loss of Millions of rand's annually in revenue to the municipality and distribution losses to the community.

The other challenge is around billing systems. The plan is to come up with smart solutions to these challenges. The City have come up with a programme that commissioned feasibility studies to check the technical aspect of the challenges experienced in relation to financial sustainability and concluded that in order to deal with all the underlying challenges the municipality first need to deal with the bulk infrastructure which is the replacement of AC pipes. At the same time will have to change all the meters with new technologies to address issues of human intervention (meter readers) and to improve the level of satisfaction to the consumers.

City of Polokwane have launched the **Smart Metering project** to members of the media and the community of Polokwane. The main aim was to connect with our stakeholders who are our customers so that they get to know that the project has resumed and not get surprised when people come to their homes for installation.

Prepaid smart meters are to be installed for all electricity users - both large power and small power users - making this roll-out probably the largest project to be undertaken by the City of Polokwane. The objectives of the project are to help the City overcome problems of inaccurate billing and encourage conservation of resources like water and electricity.

Furthermore, Smart Metering project will secure revenue losses for the municipality and bolster our financial position going forward. This will enable the municipality to free up resources that can be used to improve service delivery in other areas.

Most importantly, Smart Metering project aims to give power to the consumers because of its multiple benefits. Some of the benefits are as follows:

- Consumers having control over their usage or consumption, ease of access to purchases,
- Avoidance of unanticipated black-outs and disruptions.
- Customer service will be greatly improved through elimination of queries related to electricity billing, which account for the majority of customer queries.
- Earlier recognition of faults will become easier through increased data access.
- Illegal connections can also be identified quickly, reducing technical losses.
- There are also job creation and small business opportunities arising from system installation and operation of vending systems.

The new Smart Metering system also allows for remote and local reading of the meter as well as detection of any tampering with the system. The official installation of the smart meters to households has begun as a pilot project. The installation commenced at Nirvana Area and once completed, the project will move to other areas in the City, Seshego and Mankweng.

The smart meters will be rolled out in both prepaid and post-paid mode. The meters are replaced at **no cost** to the consumers. At the same time the City is embarking on a project to convert all household conventional electricity meters to prepaid. All the government Departments and other large consumers will be on smart conventional and those who are

serial defaulters will be put on prepaid immediately. Also, this will be done at no cost to the consumers. This project is a strategic focus project to ensure that the City is gearing towards the attainment of a Smart City and a Metro in the near future. The future is prepaid.

All Polokwane residents will soon get smart **electricity and water meters** installed as part of the City's Smart Meter Project which aims to improve service, monitor power consumption and reduce our residents' costs related to consumption of water and electricity. This project is a significant milestone towards the City objective to upgrade and improve the efficiency of services to our Communities.

Water New Pre-Paid Meters

Electricity New Pre-Paid Meters

5.7. AC Pipes Replacement

Objectives of AC pipe replacement:

- Renewing infrastructure assets that has reached the end of its useful life.
- Reducing water losses through burst pipes.
- Saving scarce resources - water and money.
- Improving reliability of the network and standard of service.
- Reducing maintenance costs.
- To improve revenue collection.
- Upgrading the network while replacing to address growth.

Phase 1 of the AC pipes replacement project including (Seshego, CBD and Annadale) is complete, a project to install the Scada Monitoring system will commence.

5.7.1 Challenges -AC Pipes Replacement

Some challenges experienced:

- The replacement of pipes in a 'live' network in built up areas with many hidden services is in many ways a very difficult task.
- Increasing the size of pipes in areas constrained by existing storm water pipes, electricity, fibre etc. is extremely difficult.
- Higher extent of rock/ hard material encountered than expected.
- Scarce water sources added to challenges, impacting negatively on the execution of work, testing pipes and connecting users.

5.7.2 Phase 2 – AC Pipes Replacement

Further replacement of AC Pipes:

- Planning for the next phase of pipe replacement has started.
- Council must consider all service and infrastructure needs and priorities because funding is limited.
- There is an urgent need for augmenting the currently inadequate water sources – this is the most critical current need.
- Council has decided to re-schedule the AC replacement program for the next two years to add funding for water source development.
- The remaining extent of AC Pipes amounts to approximately 370 km.
- Limited funds prevent replacement of all pipes, focus will be on pipes that are in very poor condition, and pipes critical for the network.

5.7.3 Remaining extent of AC Pipes Replacement per cluster

The estimated remaining extent per cluster is as Reflected on the table Below:

Cluster	Total Scope (km)
City Cluster	131.0
Mankweng Cluster	103.0
Molepo/Chuene/Maja Cluster	49.0
Moletjie Cluster	1.1
Sebayeng/Dikgale Cluster	10.0
Seshego Cluster	76.0
Total	370.1 km

Source: PLK Water and Sanitation SBU

5.8 Construction of Borehole Infrastructure for Sandriver North Wellfield

Project descriptions include:

- I. Equip 32 boreholes in Sandriver North Wellfields and Polokwane (6.4Mℓ/d average supply; 12Mℓ/d peak supply).
- II. Pump to new Sandriver North Water treatment works and.
- III. Distribute to existing Krugersburg and Potgieter reservoirs.
 - **Project is progressing well at 91% Physical progress and 67% time elapsed.**

5.9 Water Losses

Water loss	June - 2022		June - 2021		Jun - 2020	
	Units	Value	Units	Value	Units	Value
Loss	5 209 667.10 KL	R 30 528 649.21	7 991 916,25 KL	R 46 832 629.23	7 249 291.00 KL	R 38 203 763.57

Water loss	June - 2022		June - 2021		Jun - 2020	
	Units	Value	Units	Value	Units	Value
Percentage	25.3 % (difference between purchased & sold water)		19.3% (difference between purchased & sold water)		21.3 % (difference between purchased & sold water)	
Technical loss	8.4 % estimated** Values obtained from WCWDM report conducted by WRP on behalf of SWPN, ABInBev & Anglo		No water balance is done.		No water balance is done.	
Non-technical loss	5.5% estimated** Values obtained from WCWD report conducted by WRP on behalf of SWPN, ABInBev & Anglo		No water balance is done.		No water balance is done.	

Source: PLK Water and Sanitation SBU

5.9.1 Causes of Water losses

Technical losses

- Revenue losses due to bulk supply breakdowns
- Pipe bursts (Mainly AC Pipes)
- Leaking Valves & Fire Hydrants

Non-Technical Losses

- Bridged meters
- Unread meters
- Wrong meter readings

5.9.2 Water losses Mitigation Strategy

(1) Work stream – Bulk Water Supply & Bulk Meters

Objective:

- Provide bulk water balances to proactively establish accurate assessment of water losses in bulk water supply system – Water balance is now monitored through newly

installed bulk meters on the inlets and outlets of the reservoirs (*Project is currently in commissioning phase*)

- Replace/upgrade old infrastructure – AC Pipes replacement phase 2 planning concluded and is awaiting funds to implement the project in areas that still have old pipes (prepare and submit plans for funding to continue with Phase 2)
- Ensure adequate working bulk meters at all required supply points - Municipality has just completed a project for installation of Bulk meters, installation of top consumer meters (SAB, Coca Cola, Enterprise, etc) and monitoring systems. (*Project was completed in June 2022*)

(2) Assistance to the Poor and School Leak Repairs

Objective:

Ensure that internal water losses are identified and repaired - All leaks identified on the network are continuously repaired by our internal maintenance team and appointed term contractors depending on the complexity.

3.Leak Repair Contractor

Objective:

To reduce water losses identified by the leak detection team by the appointment of repairs and maintenance contractor – All leaks identified on the network are continuously repaired by our internal maintenance team and appointed term contractors depending on the complexity.

(4) Valve & Fire Hydrant Audits

Objective:

- ✓ To ensure all valves and fire hydrants are located, working and are on the record system – All valves and fire hydrants are continuously monitored to ensure that they are on a good working condition and fire hydrants are monitored for theft of water

5.9.3 Longer term plan to address Water losses.

Longer term plan to address Water losses - distribution and revenue.

- 1) **Pipe bursts** – Phase 1 of the AC pipes replacement is completed and planning for phase 2 underway.
- 2) **Bridged meters** – continuous meter audits are conducted.
- 3) **Incorrect meter readings** – program to change all meters to prepaid to avoid wrong readings is being rolled out in phases.
- 4) **Faulty meters** – all meters are being changed to prepaid.
- 5) **Installation of bulk meters** – appointed service providers are given job cards to install Bulk Meters at reservoir outlets.

5.9.4 Progress in addressing water Provision Backlogs

- Progress **to-date** in the provision of basic services is at **87%**.

- Addressing source developments for Regional Water Schemes (with or without approved Technical Reports).
- Continuing with the implementation of Capital Works Programs under **IUDG, WSIG and CRR**.

5.9.5 Planned water expenditure towards new infrastructure

Planned new expenditure by source

Funding Source	Draft IDP Budget 2022/23	Program
IUDG	R 91 000 000	Capital
WSIG	R 77 160 000	Capital
CRR	R 80 000 000	Capital / Operations
RBIG	R 154 584 000	Capital
Total	R 403 744 000	

Source: PLK Water and Sanitation SBU

5.10 Strategic issues facing municipal water business (Water resilience)

5.10.1 Water Resource Security

The calculated daily water demand (including water losses) for Polokwane City, Seshego and Perskebult has been calculated as follows: (WMP).

Year	Supply Reservoir Demand (MI/day GAAD)					Total (MI/day)
	Krugersburg	Potgieter	Doornkraal	Seshego	Perskebult	
2017	28.3	34.8	8.4	23.2	5.0	99.6
2020	29.3	36.9	10.2	23.8	5.5	105.7
2025	33.3	40.9	15.4	27.7	6.0	123.4
2030	36.5	44.0	17.1	30.8	6.5	134.9
2035	38.9	47.3	18.7	35.8	7.0	147.7
2040	43.5	51.6	27.8	48.0	8.0	178.8
2045	56.9	54.6	31.4	54.6	9.0	206.4

Source: PLK Water and Sanitation SBU

5.10.2 Polokwane City Water Supply

Currently Ebenezer WS = 19.9 ML/day and Olifantspoort WS = 24.8ML/day. A water supply shortfall in excess of 30 MI/day was calculated if water losses are included.

Resource Name	Average Supply to Polokwane City (Current)
Polokwane Boreholes	6.9 ML/day
Pelgrimshoop Boreholes	1.2 ML/day
Dap Naude Dam	10 ML/day
Seshego Dam	1 ML/day
Ebenezer Dam (LNW)*	46.7 ML/day
Olifantspoort RWS (LNW)*	27.3 ML/day
TOTAL	93.1 ML/day

Source: PLK Water and Sanitation SBU

5.10.3 Quality of Polokwane Drinking water: (Compliance with SANS 241)

Polokwane Municipality runs its own water quality laboratory. Samples from different points are collected on a weekly basis. Compliance with SANS 241(South African National Standard drinking water) is monitored daily. Weekly reporting on the Blue Drop portal is maintained.

5.10.4 Network Management:

- **Pipe bursts** are the biggest contributor to **NRW**.
- **Response** is maintained on a **24/7** basis.
- Less than **5%** of the network gets replace per year in response to bursts.
- **Sewer spillages** are reported as a daily feature due to blockages of the pipes by **tree roots, objects flushed through the toilet, fats from food outlets and storm water deposited into the system** through gullies.
- **No replacements** of sewer reticulation network have been done.

5.10.5 Waste Water Treatment

- (Compliance with licence conditions; capacity, condition and operational performance of wastewater treatment plants)

Due to the **age of our plants**, we have challenges with **license compliance issues**. For the current water balance, **we are the peak of the design capacity**. However, as we are increasing sources, **we will run out of capacity soon**.

The construction of the **New Regional Wastewater Treatment Works** will address the capacity backlog. **Plans for refurbishment of our plants are concluded** and the Grant funding approved (**projects for all three plants are shovel ready**).

5.10.6 Water Resilience Summary Risk Assessment

In line with the provided Table **below**, the responded questions help the City of Polokwane to understand the issues pertaining to water business. The essence of this question help the City comprehend perceived risk over the next 5 years in terms of the following categories- (very low, low, moderate, high, very high).

Table: Summary Risk Assessment

Perceived risk (over next 5 years) of ...	v low	low	mod	high	v high
Significant water restrictions being imposed			X		
Episodes of drinking water unsafe to drink	X				
Regular water supply interruptions (or less frequent but lengthy interruptions)				X	
Significant pollution of rivers / inland water bodies as a result of a failing sewer network or poor performance of wastewater treatment works		X			
Unsound technical decisions compromise service as a result of critical technical skills gaps		X			
Unsound technical decisions compromise service as a result of undue political interference		X			
Deterioration in assets and service quality as a result of inadequate spending on maintenance and rehabilitation/replacement of assets				X	

Source: PLK Water and Sanitation SBU

5.10.7 HR for Water and Sanitation Directorate (Professional Engineers)

Number of registered professional engineers in water & sanitation department.

- **x3 are candidates of registered** professional engineers in water & sanitation department.

Critical skills vacancies (Number of posts at Professional level or above vacant or with acting position, out of year-on-year posts

- Professionals Level = **Level 6-4**
- Number of Positions: =**21**,
- Number Vacant =**6 and**
- Number Filled= **15**

Number of posts at artisan level, out of year-on-year posts); Staff per 1000 customer.

- Artisan's level = Level 9-7
- Number of Positions= **55**
- Number Vacant= **24**
- Number Filled= **31**

Acting positions

- Director = **1**
- Manager = **1**
- Assistant Manager Purification= **1**
- Plant Supervisors = **2**
- Plumbers = **2**
- Fitter and Turner = **2**

5.11 Smart Meters

5.11.1 Smart Meters Support and Enquiries

In order to deal with the Smart Meters challenges, the City of Polokwane has established the following Measures as a way to Support and Resolve the enquiries faced by the community regarding the new Smart Meters. Dedicated Office to handle Smart meter was established i.e., **Office No. 110 Civic Centre (Head Office)**. For:

- New connections: -**Applied through building section at Civic Centre.**
- Shifting of a water meter: -**Office No. 110 Civic Centre.**
- Damaged water meter and CIU replacement: - **Office 110 Civic Centre.**
- Stolen water meter: **Office 110 Civic Centre.**
- Smart meter request: **Support Centre 087 350 2770.**
- Leakages, Low batteries and Conversions: **Support Centre 087 350 2770.**

5.11.2 Turnaround Time when attending Complains.

- New connections: **0-14 days.**
- Shifting of a water meter: **0-7 days.**

- Damaged water meter and CIU replacement: **24 hours.**
- Stolen water meter: **24 hours.**
- Smart meter request: **1 month.**
- Leakages and Low batteries: **24 hours.**
- Prepaid conversions: **0-7 days**

5.12 WATER TANKERS

In Clusters that have shortage of water, the City of Polokwane is Relying on water tankers to provide water to the community on daily and weekly basis. The table below indicates the schedule per cluster:

Cluster	Total Number of Areas Supplied by Tankers	Dates of Supply	Comments
City	4	Daily	Areas tankered in the city are due to low reservoir levels resulting in insufficient system pressures to supply high lying areas.
Seshego	1	Daily	New Development.
Moletjie	42	Weekly	Areas tankered in Moletjie are due to insufficient water supply from the boreholes and lack of a water distribution networks.
Mankweng	20	Weekly	Areas tankered in Mankweng are due insufficient water supply from the boreholes, Lepelle Northern Water and lack of a water distribution networks.
Molepo/Chuene/ Maja	16	Weekly	Areas tankered in Molepo/Chuene/Maja are due insufficient water supply from the boreholes, Lepelle Northern Water and lack of a water distribution networks.
Sebayeng Dikgale	17	Weekly	Areas tankered in Sebayeng / Dikgale are due insufficient water supply from the boreholes and lack of a water distribution networks.
Aganang	24	Weekly	Areas tankered in Aganang are due insufficient water supply from the boreholes and lack of a water distribution networks.

5.15 CHALLENGES WATER SERVICES

- Lack of sustainable water sources for current and future demand, the municipality is currently receiving between **80 to 99 MI/d** and unable to meet the peak flow demand of **163 MI/day**.
- Lack of As-Built drawings for the City and Mankweng
- Eradication of water supply backlog in RWS.
- Eradication of Sanitation backlog (**+68 000 HH**).
- Refurbish components of existing sewer plant to reduce the smell.
- Electrification of boreholes in RWS by ESKOM.
- Lack of capacity at the Mankweng wastewater treatment works, which creates challenge on future developments.
- Illegal yard connections in rural areas.
- Illegal disposal of sewage in storm water drains at Mankweng (Private University Residence).

- Shortage of staff that results in excessive overtime.
- Lack of rural sanitation maintenance plan.

5.16 Interventions to solve the Challenges.

- two water treatment plants, in constriction, progress is 75 % anticipated project delivery **2nd quarter 2022.**
- Refurbishment of Dap Naude Pipeline and Constriction of a new booster pump station.
- Upgrading and refurbishment of Seshego and Mashashane Water Treatment Works.

Water supply system 1. Water Shortage

- Refurbishment of City boreholes and intensify security.
- Implementation of Groundwater Project – Equipping of drilled boreholes, Bulk pumping lines and modelling (to produce supply zones, pressure zones, as built drawings).

2.Waste Water Treatment Works (WWTW) overloaded.

- Upgrading of Polokwane Wastewater Treatment Works to 32MI/day (current capacity by 26 MI/day). Phase 1 completed; Phase 2 planning completed awaiting funding.
- Construction of first 20MI/day module of the Regional Wastewater Treatment Works (RWWTW).
- Enhance the current operations (Capacity building to current personnel and filling the vacant positions).

3.Aging Infrastructure

Water

- Replacement of Asbestos Cement pipes (AC).
- Remodeling the water supply system (to locate valves, have as built drawings).

Sanitation

- Modelling the sewer system / Sewer Master Plan (for upgrading and refurbishment purpose)

4.Uncoordinated New Settlements

- All land developments to be coordinated through Planning Directorate.

5.Transformers, cable theft and vandalism/ Delay from Eskom to energise the boreholes.

- Develop security plan.
- Engage Eskom on their turnaround time for energizing of new boreholes and replacing the stolen transformers.

6.Private water supply by LNW to Municipal Residence

- Dalmada water users supplied directly from LNW.
- Engage with LNW and Dalmada Water users for Municipality to take over the water supply responsibility.

7.Maintenance of Rural Households Sanitation.

- Development of rural sanitation maintenance plan.

8.Over reliance to annual contractors.

- Build capacity to the internal personnel for the specialize functions e.g., boreholes and pump stations.

5.16.1 WHY REGIONAL WASTE WATER TREATMENT PLANT

The City has **three (3)** Waste Water Treatment Plants i.e.

- 1) **Polokwane,**
- 2) **Seshego and**
- 3) **Mankweng.**

Polokwane Waste Water Treatment Plant is the **biggest** with **26 MI/day** capacity and the current load standing at **34 MI/day**. Plans are in place to construct the **100 ML/day Regional Waste Water Treatment Plant** for the whole Polokwane Municipal **sewage load** and to cater for new developments (however there is limited budget).

A memorandum of agreement to **refurbish and upgrade** the **over loaded** Polokwane Waste Water Treatment Plant has been signed by the Municipality and **Anglo American**.**The upgrade is now complete and has been commissioned.**

For the purposes of increasing the capacity of the Waste Water Treatment Plants to support **current and future development, the** municipality is currently in a process of building:

- 1) **New** Regional Wastewater treatment 20MI/day.
- 2) **Seshego** Wastewater Treatment Plant (Refurb).
- 3) **Mankweng** Wastewater Treatment Plant (Refurb & Upgrade).
- 4) **Polokwane** Wastewater Treatment Plant (Refurb)

5.16.2 Impact of the reduction of RBIG funding

The following projects areas are affected by Reduction of RBIG funding:

- 1) **Phase 1 of the RWWTP (phase 1 complete, earthworks) (Photo Below).**

Source: PLK Water and Sanitation SBU

R120 Million has been invested to the 1st phase of the project. RBIG Funding the project has been reduced and the City of Polokwane Currently needs a new regional sewer plant.

2, Upgrading and refurbishment of Mankweng treatment plant (intended to cater for the University of Limpopo growth).

- The Reduction in RBIG Funding has also affected the plans for the Mankweng Sewer Plant, and Mankweng is a nodal point, the University of Limpopo has applied for funding with regard to student accommodation, there is a serious need of New Sewer Plant in Mankweng.

3) Refurbishment of the Dap Naude water pipeline.

- The Reduction in RBIG funding has affected the refurbishment of the pipeline from Ebenezer Dam to the City.

4) Upgrading and refurbishment of the Seshego wastewater treatment plant. (Progress at advanced stage) (*Photo below*).

Construction of the Seshego Water Treatment Works.

Source: PLK Water and Sanitation SBU

Construction of the Sand River North Water Treatment Works.

Construction of the Sand River North Water Treatment Works.

5.17 Polokwane Water Utility - Metro Vision

Polokwane Municipality is earmarked to be the first future Metropolitan Municipality for Limpopo Province.

For the municipality to reach that status it will have to satisfy number of requirements in terms of criteria and amongst those will be the City's development growth and the crux of that development is **water**.

Sustainable bulk water supply to the city will ensure that all lined up **catalytic projects** which are also meant to boost the City's opportunity to become a metro become successful.

Other Metropolitan Municipalities have successfully established their **own water entities** which successfully supply their own water and carry out maintenance.

Johannesburg Metro has established its own Municipal Water Entity called Johannesburg Water (CoJ) as its sole shareholder.

On the side of Ekurhuleni Metro, they have established East Rand Water Company (ERWAT) established in 1992 as Section 21 Company.

Polokwane Municipality sources **60%** of its water from **outside** the boundary of the Municipality the majority of which is supplied by **Lepelle Northern Water (LNW)**.

Water is bought from LNW for **R9/kl**. For the **2020/21** financial year, bulk purchases for water totaled **R 191 088 675.00** according to the audited financial statements

An external mechanism of water & wastewater service provision would imply that the full responsibility for the provision of all or a ring-fenced part of water & sanitation services, which may include **repairs, maintenance, upgrading, renewal and expansion** of the works (possibly even including the development of new works) is transferred to the **proposed utility**, which is then by implication a new WSP under the WSA.

The WSP is solely and autonomously responsible for the execution of the particular ring-fenced service, held accountable by the WSA based on an output specification, and carries substantial technical, operational and financial risk.

In such instance, output specification driven, performance-based agreement will be required between the city and its Water Utility.

5.17.1 KEY WATER INFRASTRUCTURE

Bulk Surface water abstraction system:

- Dap Naude Dam (18 MI/day)
- Seshego Dam (2 MI/day)
- Molepo Dam (6 MI/day)
- Houtriver Dam (1.6 MI/day)
- Mashashane/Utjane Dam (0.5 MI/day)
- Chuene Maja Dam (2.7 MI/day)

Bulk Ground Water System:

Ground water is classified according to two main supply schemes or systems, namely the **Polokwane groundwater system** and the **Seshego System** (also incorporating the surface water abstraction from Seshego Dam) to bring additional **20 MI/day**.

Water Treatment Works

- Dap Naude/Dalmada Water Treatment Works (**18 MI/day**)
- New Seshego Water Treatment Works (**10.4 MI/day**) **
- New Sand River Nort Water Treatment Works (**18 MI/day**) **
- Molepo Water Treatment Works (**6 MI/day**)
- Houtriver Water Treatment Works (**1.6 MI/day**)
- Mashashane/Utjane Water Treatment Works (**0.5 MI/day**)
- Chuene Maja Water Treatment Works (**2.7 MI/day**)

Wastewater Treatment Works:

- Polokwane Wastewater Treatment Works (**27 MI/day**)
- Seshego Wastewater Treatment Works (**9 MI/day**)
- Mankweng Wastewater Treatment Works (**8 MI/day**)
- New Regional Wastewater Treatment Works (**20 MI/day**) ***

*(***indicates Projects that are under implementation.)*

Other Infrastructure Includes but not limited:

- Sewer Pumps Stations.
- Raw Water & Portable Water Pump Stations.
- Bulk water and Bulk Wastewater pipelines.
- Bulk & Service Reservoirs.
- Reticulation Pipelines.
- Bulk and Domestic Meters.

5.17.2 Recommendations for Polokwane Water Utility

It is recommended that the Municipality:

- Engage in a **pre-feasibility** fact finding exercise to determine the potential of establishment of a water utility, it may be beneficial to engage with **Metros** regarding their successful transition to an establishment of water utility, specifically regarding any lessons learnt during their process.
- Conduct a study as per Section 76 of MSA to determine the service delivery mechanism, implications and overall feasibility, this study needs to be comprehensive and include as a minimum the MSA and WSA requirements.
- The current human capital may be affected. Engagement with labour **Unions** should be undertaken, and a resolution will be required concerning the existing staff.
- The recommended procedure is that the current staff employed by the city will be required to be transferred to the Utility for training and skills development.

CHAPTER Six: Energy Services Analysis

6.1. ENERGY SERVICES

Polokwane Municipality distributes electricity in the City/Seshego cluster while Eskom is the service provider in the rest of the Municipal area. 99% of dwellings in the City/Seshego cluster are supplied with electricity. Streetlights and High Mast lights are installed annually in various areas of the municipal area of jurisdiction.

The number of households with access to electricity increased from 230 177 in 2019 to 231317 in 2020 and to 232 172 in 2021 and 233 372 in 2022. Households for Polokwane municipality increased from 178 001 in 2011 to 239 116 in 2016 (Stats SA 2016), making the current access to electrification to 99.26%. IHS Global insight (2021) indicates that Polokwane municipality has 244 359 households. Although the backlog percentage seems less, the growth rate of the city makes the municipality to fail in making sure access to electricity by all. The municipal area increased in 2016, incorporating major parts of former Aganang municipality (76.93%) into Polokwane and thus adding backlog numbers.

6.1.1 Energy Master Plan

The **Energy Master Plan** has been reviewed in 2018/19 and has been approved by council. The draft master plan is prepared on the basis of 5 years' growth Projection. The analysis of the energy master plan forms the basis of a recommendation regarding the anticipated demographic and economic growth factor that should be provided for in terms of additional electricity demand during the next five years. The current challenge is the rate in which low-cost houses are constructed in the urban area, Polokwane Ext 78 and Ext 133, 134, 127 and 40 to name the few, thus creating urban backlog of 10800.

Table: Distribution of households with its main source of energy for lighting

Main source of energy	No of Households
Electricity from mains	227 641
Other sources of electricity (e.g., generator, etc.)	302
Gas	419
Paraffin	2038
Candles	8383
Solar	500
Other	394

Main source of energy	No of Households
None	554
Unspecified	435
Total	241 129

Source: PLK Energy Services Directorate

In comparison with the 2011 Census there is tremendous improvement of the number of households with access to electricity in 2022. The census shows that 225 628 households out of 239 116 have access to electricity with the current backlog being 8 939. The current Polokwane Municipality Priority list indicates an increase from backlog of 15 965 to 19371 in 2021. households. Polokwane municipality electrified 2013 households during 2021/22 financial year.

6.1.2 Free Basic Electricity

Free basic electricity is the amount of electricity which is deemed sufficient to provide basic electricity services to a poor household.

Polokwane municipality provides **50kWh** of free electricity to registered consumers in the Eskom supply area with 20,901 configured consumers (16,081 collecting) which is a reduction from the 21,504 households in rural Polokwane area Mankweng and Solomondale from the previous financial year. The number reduced after the process done to re-register and verification of beneficiaries. In Polokwane and Seshego (Polokwane license area) 100kWh is allocated monthly to 8663 households from 13134 registered beneficiaries. In Aganang cluster, 3995 households are benefitting from FBE whilst 500 households are benefitting from Free Basic Alternative Energy (FBAE).

Challenges

1. Non collection by some beneficiaries
2. Free Basic Electricity provided to able people while some indigents do not benefit.
3. Insufficient staff to verify and approve indigence in Eskom and municipal license areas.
4. Budget constrains to provide 100kWh in Polokwane license area, the national allocation is 50kWh for FBE.

Table: Free Basic Electricity Provision

Basic service	The limited amount	Free basic services provided	Number Customers	The level and standard
Electricity				
Eskom Area	R157.08 per month	16081collected	21437	50kWh at RDP standard

				(20amp connections)
Municipal License Area	R118.53 per month	8 663collected	8 400	100 kWh (20-amp connections)-

Source: PLK Energy Services Directorate

6.1.3 Free Basic Alternative Energy (solar light system)

Polokwane municipality had in the past in conjunction with Department of Mineral Resources and Energy provided solar light system to households that will not be provided with electricity in five years' time. The contract ceased since it was between the service provider and Department of mineral resources and energy. New service providers have been appointed and the municipality is busy with the application to activate it again.

Polokwane municipality is providing this service to 500 households with solar light, cooking gel and gel stoves to Aganang cluster, a cluster service provisioning that formed part of basic conditions for incorporating former Aganang municipality with Polokwane. The numbers also fluctuate as and when the areas get electrified. 445 households benefited for 2016/17 financial year till 2018/2019. From 2020 to date 500 beneficiaries are served.

Challenges

1. Financial constrains to provide the FBAE (free basic alternative) service.
2. The appointment of new service provider by department of mineral resources and Energy for alternative (non- grid) energy).
3. Service providers engaging directly with communities.
4. Not enough staff to verify beneficiaries.

6.1.4 Solar Water Geysers

Polokwane municipality received 10 000 units to be allocated to low-cost housing and indigent residences of wards **8, 11,12,13,14,17,19 and 37** within City and Seshego clusters with an additional 6000 added at a later stage. Council approved the criteria in 2016/17 financial year considering people who were living in low-cost houses and paying services to the municipality first. The program is planned to be rolled all over the municipal area as and when new allocations are provided. Currently 197 geysers installed with seven incidences of hot water bursts that resulted in four people with minor injuries. Polokwane, DMRE and the Department and Labor are busy with investigations and had to put the project on hold. **The project is continuing with different types of geysers (flat ones) and about 3000 geysers installed to date.**

Challenges

1. Geyser allocation to a moving target as new low-cost housing are allocated annually.
2. Water reticulation compliance of the project
3. Budget for Extra accessories and service requirements by the municipality. E.g., the cost to move water connection from the corner tap to the house.
4. Roof type, e.g., Asbestos roofs not strong enough to carry the weight.
5. Warn out roof structures and rotten corrugated irons.

6. Appointments and roll out by the department of mineral resources and energy.
7. Cases of inappropriate material provided, e.g., plastic taps, tap screws instead of bolt and nuts.
8. Roof leaks, etc.

6.1.5 Challenges/Achievements by the Municipality to provide Energy.

- Capacity Provisioning – the municipality will not be able to sustain future developments unless new programmes are implemented to provide electricity capacity. Projects were identified to strengthen the supply which, amongst others, includes construction of Bakone substation, which is at completion stage, construction of Bakone to IOTA 66kV line, construction of Matlala substation, construction of 66KV lines from Matlala substation to Alfa and Sigma substations respectfully as well as construction of a 90MW solar farm through PPP which are currently at planning stage.
- Delays in implementation of other strategic projects identified in the master plan due to budget constrains will result in lack of capacity in future which might require the implementation of internal load shedding.
- Illegal connections and bridging of electricity meters are contributing to electricity losses. Cigicell appointed to help with revenue enhancement.
- Ageing infrastructure
- Theft and vandalism of cables has been reduced in substations, but thieves are now targeting other areas such as household connections, miniature substations and low voltage cables in the industrial areas, streetlight and meter box covers. Storage of equipment by street vendors and people living in streets are breaking locks for mini substations.
- The reduction was because of the appointed of a service provider who is monitoring substations on 24 hours, 7 days a week basis.
- Theft of transformers which supplies residents and borehole pumps is very high in rural areas and is causing disruption of service delivery.
- ESKOM has upgraded Boyne and Nobel substations and now busy upgrading University substation and new Rampheri substation is also under construction. Network strengthening is also taking place in strategic areas within the municipality.
- A company was appointed to install prepaid meters for Domestic customers and Smart metering solutions for business and bulk supplied customers within the city/Seshego area.
- Meter auditing of the current prepaid meters is ongoing as part of programmes of reducing energy losses.
- Installation of check meters to verify the bill from Eskom, has been completed.
- A service provider has also been appointed to upgrade the current meters for Token Identifier (TID) compliance and replace meters that cannot be upgraded to be able to recognise new tokens post 2024.

6.1.6 BACKLOG OF ENERGY SERVICES

Below is the current status of existing backlog in energy services, which without annual maintenance will escalate.

Service	H/H	Access	Backlog
Electricity	280 225	242 015 (87.2%)	38 210

Source: PLK Energy Services Directorate

6.1.7 Rural Areas Electrification

Each year the City of Polokwane get INEP (Integrated National Electrification Plan) grant Budget to Electrify Rural Areas that still do not have Electricity. Council has approved electricity Priority list that guide the Process. there is so much progress in this Programme.

6.1.8 Polokwane/Seshego Urban Complex Technical Assessment

Electricity Services

Level of Service	Grid Electricity Service - connected and metered (conventional and or pre-paid).
Overview	The Municipality distributes electricity in the Polokwane City/Seshego Functional Area while Eskom is the service provider in the rest of the Municipal area.
Capacity and Backlog	<p>The electricity backlog in the Polokwane Electricity Supply Area is 10800. New township development in the Seshego (Extension 133, 134, 127,126) area have not been electrified but the process of building more low-cost housing continues.</p> <p>ESKOM currently supplies Polokwane Municipality from two substations namely the Pietersburg Substation and the Silica Substation. Indications are that the demand on the Pietersburg Substation exceeds the secure capacity of the supply lines by 45% but does not exceed the secure capacity of the 132kV / 66kV transformers. The demand at the Silica Substation does not exceed the secure capacity of the incoming lines or the secure capacity of the 132kV /66kV transformers. ESKOM has the following upgrading/strengthening strategies:</p> <p>Pietersburg Substation:</p> <p>ESKOM is currently busy with the planning for the construction of a new 132kV supply line from the ESKOM Witkop Main Transmission Substation to the ESKOM Pietersburg Substation. This line will have a capacity of 195MVA and is expected to be completed in 2026. At the completion of this line the secure capacity of the supply lines to Pietersburg Substation will be 172MVA which will be sufficient until 2028.</p> <p>After completion of the new line one of the existing lines will be upgraded as well to have a capacity of 195MVA. The date of completion of the upgrading of this line is currently unknown. Completion of the upgrading of this line will bring the secure capacity of the</p>

supply lines to, Pietersburg Substation to 281MVA. This upgrade falls outside the 10-year planning window.

Silica Substation: No upgrading for the substation is planned.

Seshego Metering Point - Sigma Substation: No upgrading for this metering point is planned.

Pietersburg Substation: area: The completion of the Bakone - Iota 66kV line and the Bakone intake substation is scheduled for completion in year three (3) after which the 66kV lines feeding into the old Pietersburg area will have a firm capacity of 4 x 80MVA = 320MVA. This is sufficient for the foreseeable future demand.

Seshego area: Supplied from Eskom Pietersburg substation to the Seshego metering point by a single non-firm 66kV line with a capacity of 42MVA which is concerning for the following reasons:

It is mostly a wood-pole line with poles dating from 1976/1977. This indicates that the line is 41 years old and has reached the end of its lifespan.

The supply is not firm, and a breakdown of the line could result in a lengthy period without electricity for the entire Seshego.

It is recommended that this line be replaced due to the age of the existing line.

It is further recommended for the Construction of Matlala and Dentron substations with its connector 66kV lines to make a complete 66KV ring in Seshego area as well

Bakone Intake Substation: The Bakone substation is scheduled for completion in 2023 and no problem is envisaged in the study period with this substation.

Alpha Intake Substation: The 66kV supply line to Sigma substation is currently supplied from the Eskom Pietersburg substation and is under control of Eskom. This situation is unacceptable, especially when the 66kV system will be modified to become a firm supply when control of the system must be by the Municipality. To correct the situation, Eskom moved the metering point to Alpha/Pietersburg substation but not yet transferred ownership of the line to Polokwane municipality.

The existing transformer substation has sufficient capacity for the 10-year study period. In the long-term new transformer substations are required with the proposed establishment of Tweefontein, Dendron and Matlala to unlock the development of the areas.

Source: PLK Energy Services Directorate

The largest contributor to service charges is **electricity services** with a contribution of 68% followed by water services accounting for approximately 18% of the total service charges levied.

6.1.9 The Supply and Installation of Electrical network at EXT 78 - Phase 2

Project Description

STANDS) –Multiyear Project: The Supply and Installation of Electrical network at Polokwane EXT 78 - Phase 2 (1210)

6.2 Electricity Losses

The municipality has managed to decrease electricity losses to **11,8%** in the 2021/2022 financial year. Automatic meter reading has been installed on all Large Power Users allowing constant monitoring of 503 large consumers. This automatic meter reading systems, meter audits and ad hoc operations to identify illegal connections are used to reduce energy losses. The municipality has also established a Revenue Protection Unit to assist with finding illegal connections, meter tampering and meters that are not on the financial system.

6.2.1 Causes of electricity losses

(a) Technical losses

- Transmission/distribution losses (**Inherent resistance of conductors to conduct electricity**).
- Transformer losses (**Copper and iron losses**).

(b) Non-Technical Losses

- Bridged meters.
- Illegal connections.
- Unread meters.
- Wrong readings.
- Meters not on the system.

6.2.2 Longer Term plan to address Electricity losses (distribution and revenue)

(a) Non-Technical Losses:

- Continuous meter auditing.
- Implement a check and area metering solution to identify where the main losses occur – area metering, substation and feeder levels.
- Purchase “**smart ready**” **pre-payment meters** to replace tampered and faulty meters.
- Back to basics approach and improve and enhance the customer service programmes and education programmes in the field.
- Ensure that all consumers are metered and are paying for the energy consumed.

(b) Technical Losses:

- Contribute to approximately **6-8%** of total losses depending on the loading and the age of the networks.
- **Re-prioritise** spending to increase the funding for upgrading and refurbishing of electrical networks.
- **Develop Maintenance Plans** to improve the performance of networks to reduce the technical losses.

- Consider network operations **under optimum “open point”** conditions to avoid long feeders and high resistances.
- Maintain networks to the standard as prescribed by **NERSA**.
- Electrical meters to be installed on all municipal buildings, street and traffic lights to account for own use which is now shown as losses.

6.2.3 Electricity Losses (Key Findings)

Electricity loss	June 22		Jun-21		Jun-20	
	Units	Value	Units	Value	Units	Value
Loss	78 885 211 kWh	R 103,603,776.84	103 721 777 kWh	R 115,503,859.95	103 514 579 kWh	R 107,822,221.05
Percentage losses	11,8%		15%		15%	

Source: PLK Energy Services Directorate

Progress in addressing backlogs in basic services (Electrification)

The municipality is electrifying houses on a **priority list** that was approved by council in **2017** with approximately **1500** houses to be electrified per year.

2013 Houses were electrified in 2021/23 with 1800 planned to be electrified for the next three years with funding as per the current **DORA allocation**.

Challenges Experienced

- ✓ Funding deductions – A certain number of houses are planned and included in the IDP and then needs **to be reduced** when the DORA is published.
- ✓ Capacity shortages on Eskom networks.
- ✓ Site allocation by Indunas/Kgoshi's are generally **not planned properly** and are sometimes in **wetlands**.
- ✓ Additional houses **built after** the planning was finalised is a challenge.
- ✓ DMRE allocation per house **too little** to cover the actual cost.
- ✓ Number of additional houses is **increasing faster** than what is electrified.
- ✓ **CoGHSTA** is implementing housing projects without funding for electricity.

Progress in addressing backlogs in basic services (Public lighting)

Public lighting

Only **five high mast lights** are installed per year due to funding shortages on CRR and as and when CRR funds are available.

Solar lighting technology, even though not as effective as Grid connected lighting, is going to be used in 2022/2023 for the first time to avoid high connection costs and capacity constraints in the Eskom supply areas. It will also assist with lighting up high crime areas during load shedding and load reduction.

Challenges Experienced

- The demand for high mast lights is **much higher** than what is installed.
- Eskom connections are **very costly** and takes for ages to be completed.
- Capacity constraints on Eskom networks hampers the completion of most of the high mast light projects.
- Energy services is implementing solar High Mast lights as a resolution to this.

New infrastructure

- New infrastructure is planned and implemented by means of the **Energy Master Plan** which was approved by Council in **2020 Fy**.
- The City is, however, **growing faster** than what can be funded from the CRR.
- The municipality is currently in negotiations with Eskom and NERSA for **taking over** some of the **Eskom networks** that are in close proximity of municipal networks and that are falling in the **SDF** and or is creating unsafe islands within the Polokwane supply area.
- The municipality is busy advertising for the installation of **Power Banks** to reduce the **Eskom Maximum Demand** and the installation of a **Solar Farm** to reduce the consumption on the Eskom Bill is also in an advanced planning stage.

New infrastructure

Power Bank and Solar Farm Projects

- The municipality is busy advertising for the installation of **Power Banks** to reduce the **Eskom Maximum Demand**.
- The project will be implemented on a Risk Based Approach with minimal to **zero expenditure for the municipality**.
- Service providers will recoup their capital layout from a share of the savings on the Eskom Bill.
- Further to the **Power Banks project**, the municipality embarked on a feasibility study for the installation of a **Solar Farm project**, in which the **DBSA got** involved and found it to be a viable project with the potential of becoming a **regional supplier** that can include supply to smaller neighbouring municipalities.
- The 100MW approval by government suits this project ideally.

Planned expenditure towards (new infrastructure, operations; maintenance and planning)

(Projects Planned for the next three years)

Projects planned for the next three years	Required Budget
Completion of Bakone Substation	R20m
Bakone to Iota 66kV connector line	R60m
Securing of servitudes for 66kV Ring Feeders	R6,7m
Matlala Substation	R50m
New Pietersburg Substation	R55m
Sigma to Matlala 66kV connector line	R30m
Tweefontein substation	R52m
Electrification of houses	R108m
Replace street lights with LED luminaires	R24m

Source: PLK Energy Services Directorate

6.2.4 Maintenance Plan for Electrical Infrastructure

Maintenance Plan

- A **Maintenance Plan** is currently being developed with the assistance of the Asset team to plan and implement maintenance of infrastructure in an **organised and auditable fashion**.
- Funding allocation towards maintenance of infrastructure will in future be much easier.
- The City is currently **not honouring** its licence agreement with **NERSA** as far as maintenance of infrastructure is concerned.
- The funding allocation towards the maintenance of infrastructure currently stands at **R 27,705,043.00**
 - Refurbishment of Ivydale overhead networks = R4,5m
 - Replace cables = R14m
 - Replace meter boxes and 11kV Oil switchgear = R15,7m

6.3 Ten-Year Township Development Plan (Energy Capacity Provision in Polokwane)

Introduction

Polokwane municipality has been issued with the licence to distribute Electricity in the City and Seshego areas. The other areas and townships are supplied by Eskom who has capacity challenges already and busy improving that through construction of substations. Electricity is one of the basic service deliveries KPI for any licenced Municipality. The process of capacity provisioning includes construction and/or

upgrading of substations and switching stations to be able to provide electricity as and when required. The delays in construction of substations means that some new developed areas will not be able to be provided with electricity.

Discussions

Annually the municipality do budget for the provisioning of bulk electrical infrastructure. CRR and INEP are used to provide infrastructure and electrification projects. Budget constrains causes some projects to be done way after their proposed construction period, which means some developmental areas will lack capacity to be connected. Township developments continues as some are done through private developers and some by COGHTA. Those by COGHTA are provided with gravel roads, water and sanitation. Electrical capacity provisioning is done by developers for private developments and by Polokwane Municipality for COGHTA and municipal developments.

6.3.1 Approved Townships List that Require Electrification

The following table is a report from Planning and Land Use management unit indicating the approved townships and those on planning to be implemented. Most of them shows water and sanitation completed, while electrical and taring of roads requires municipal budgets to be done.

A Ten-Year Township Development Plan (Energy Capacity Provision in Polokwane)

	TOWNSHIP NAME	PROPERTY DESCRIPTION	STATUS	INCOME CATEGORY	ESTIMATED NUMBER OF RESIDENTIAL UNITS	ENGINEERING SERVICES REQUIRED	ESTIMATED COSTING FOR INSTALLATION

6.3.2 Projects for Consideration (1 to 3 years and 3 to 5 years)

The above developments require electricity and in some areas the construction of a substation or switching station to make sure there is capacity available for electrical connections. The following summary shows the cost implementation to provide electricity as some shown above are costs for reticulation without capacity provisioning.

Urgent, Current and Medium Projects for Consideration (1 to 3 years and 3 to 5 years)				
Total townships	Total Low cost	Total Middle/High Income	Total Estimated Costs	Comments
Polokwane Ext 72	300 @ R 6 000 000	500 @ R 12 000 000	R 18 000 000	Bulk capacity available from Alpha substation, however, increase of feeder cables are required.
Polokwane Ext 76		240 @ R 6 000 000	R 6 000 000	Bulk capacity available from Alpha substation, however, increase of feeder cables are required.
Polokwane Ext 78	3000 @ R 60 000 000	3000 @ R 75 000 000	R 75 000 000	Busy with 2000 sites. 1000 households completed It requires the completion of new Pietersburg to connect all sites. Portion 2 could be connected from Emdo temporary.
Polokwane Ext 79	500 @ R 10 000 000		R 10 000 000	Bulk capacity available from Alpha substation, however, increase of feeder cables are required.
Polokwane Ext. 86	564 @ R 11 280 000		R 11 280 000	No capacity. It depends on completion of New Pietersburg substation.

Urgent, Current and Medium Projects for Consideration (1 to 3 years and 3 to 5 years)

Total townships	Total Low cost	Total Middle/High Income	Total Estimated Costs	Comments
Polokwane Ext 106	208 @ R 5 000 000		R 5 000 000	Capacity not available, can be connected temporarily from Luthuli 9L feeder. New 11KV switching station to be built through developers at Polokwane Ext. 109
Polokwane Ext. 107	438@ R8 760 000	200@ R5 000 000	R 13 760 000	Capacity not available, can be connected temporarily from Emdoring. New 11KV switching station to be built through developers at Polokwane Ext.109
Polokwane Ext. 121	300@R 6 000 000		R 6 000 000	No capacity. It depends on completion of New Pietersburg substation.
Polokwane Ext.126	500 @ R 10 000 000		R 10 000 000	No Capacity. It depends on the construction of Matlala substation but could be connected temporary to Zone 5 line
Polokwane Ext. 127	500 @ R 10 000 000		R 10 000 000	No Capacity. It depends on the construction of Matlala substation but could be connected temporary to Zone 5 line
Polokwane Ext.133	2000 @ R40 000 000	1000 @ R 20 000 000	R 60 000 000	No Capacity. It depends on the construction of Matlala substation but could be connected temporary to Zone 5 line

Urgent, Current and Medium Projects for Consideration (1 to 3 years and 3 to 5 years)

Total townships	Total Low cost	Total Middle/High Income	Total Estimated Costs	Comments
Polokwane Ext.134	2290 @ R 46 000 000		R 46 000 000	No Capacity. It depends on the construction of Matlala substation but could be connected temporary to Zone 5 line
Nirvana X 5	100 @ 3 000 000		R 3 000 000	Capacity available and could be connected from Epsilon substation through Southern Gate way substation.
Seshego C	100 @ R 2 500 000		R 2 500 000	Capacity available and can be connected from Zone 3 Or zone 6 ring
Mankweng Unit C X 1	402			No capacity but Eskom to confirm
Mankweng Unit F	500			Completed
Mankweng Unit G	500			Completed
Mamadimo Park	1007			Completed
Erf 514 and Erf 515 Annadale Ext 1 (Garena)	494 @ R 15 000 000		R 15 000 000	Busy and capacity available from Gamma substation
Erf 6403 Portion 1 Pietersburg	51 @ R 1 600 000		R 1 600 000	Capacity available through Le-Rouxville
Erf 6403 Portion 2 Pietersburg	55 @ R 1 700 000		R 1 700 000	Capacity available through Le-Rouxville

Erf 8634 Pietersburg	50 @ R 1 500 000		R 1 500 000	Capacity available from Epsilon substation

Urgent, Current and Medium Projects for Consideration (1 to 3 years and 3 to 5 years)				
Total townships	Total Low cost	Total Middle/High Income	Total Estimated Costs	Comments
Design and Construct New Matlala Substation including feeder line from Alfa substation			R 197 000 000	The designs should be completed in the 2022/23 financial year
Design and Construct New Pietersburg substation			R 66 000 000	Designs completed and required R66 000 000 including 3X11KV cables from Gamma to New Pietersburg substation, however, it is dependent on the upgrading of Gamma Substation
Upgrading of Gamma substation			R 70 000 000	To add 1X20MVA transformer, the feeder bay, the substation building extension and switchgear.
Completion of Bakone Substation			R 20 000 000	To complete the Bakone Substation ready to connect a 66kV feeder to IOTA substation
Build 66kV Feeder between Bakone and IOTA Substations			R 60 000 000	To build a 66kV feeder that will connect Bakone and IOTA Substations to enable firm supply to all the municipality's substations. Design completed, busy with servitude negotiations
Total Budget Required			R 710 840 000	

Source: PLK Energy Services Directorate

6.4 Electricity Master Plan

The Electrical master plan shows the developments and projects to be implemented, when to implement those projects and the cost estimates. If network infrastructure development could be done as indicated in the Master Plan, the above challenges could be avoided. Master plan indicates that the designs for New Matlala, 66KV substation to be started in 2020/21 financial year.

6.5 Future Township Developments

The table below indicate the future municipal owned townships to be budgeted for installation of **engineering services**. These will be considered at five to ten-year plan and estimates shown will be revised in five years to come.

Future Municipal owned townships to be budgeted for installation of Engineering Services.

	TOWNSHIP NAME	PROPERTY DESCRIPTION	STATUS	INCOME CATEGORY	ESTIMATED NUMBER OF RESIDENTIAL UNITS	ENGINEERING SERVICES REQUIRED	ESTIMATED COSTING FOR INSTALLATION
1	Not yet allocated	Portion 158 Sterkloop 688 LS	Planning Process	Middle income	700 units Residential 1	Bulk infrastructure and Service reticulation including roads	R 112 000 000.00 R21 000 000 for Electrical connection from Epsilon

Source: PLK Energy Services Directorate

6.5.1 Energy Services Challenges

The Polokwane City being the Capital of Limpopo Province, and the business hub, coupled with urbanisation contributes to high backlog into service delivery. The ageing infrastructure also needs to be considered, thus sharing the budget of electricity provisioning projects. Commitment of multi-year projects may allow annual budget provisioning to some of the projects.

Discussions with CIGICELL revealed that their current funding models does not make provision for the implementation of projects of this nature. They, however, agreed to investigate the possibility of funding such projects and will revert to the municipality in due course.

IUDG was identified as another source of funding. The fund was used to co-fund R12,000,000.00 for the installation of the Bakone to Iota 66kV feeder in the 2022/2023 financial year.

6.5.2 Financial Impact

The municipality should provide at least an annual budget of **R150 000 000** per year for the next five years for electrical capacity building and township developmental projects. A total of **R740 840 000 million rand** is required to implement the medium term (**next 5 years**) projects.

6.5.3 Recommendations

That Energy services be provided with a column to indicate the capacity availability in the identified townships to be developed and the substation to tap on the approved township developments and future projects, That Budget allocation to an amount of **R150 000 000** per annum be provided for urban electrification, That COGTHA be requested to provide budget for electricity to its developmental projects.

That the Department of Mineral Resources and Energy be requested to fund urban capacity provisioning for urban electrification projects, a funding model be negotiated with CIGICELL to assist the municipality with the implementation of electrical projects.

City Planning and Property Management is aware of the projects and support that Energy services plan accordingly.

That municipality plan an all-inclusive budget when they build new low-cost housing from 2023/24 onwards

6.6 The Electrification Acceleration Process

The acceleration process helped the municipality to complete all its villages in 2017/18 financial year and started electrifying extensions and newly established villages. In 2018/19 financial year, Polokwane municipality absorbed major portion of the former Aganang municipality, and created a cluster called Aganang with five wards (40,41,42,43,44 and 45).

Electrification in Aganang was also completed except extensions and new villages. In 2018/19 the new priority list was included that included Aganang cluster. It was discovered later that one of the conditions to incorporated Aganang was to make sure that each financial year, there should be an electrification project in Aganang cluster as well. This was a Resolution of Council when Aganang was Merged to Polokwane Municipality.

The National Treasury instructed the municipality to pay back the loan from 2017/18 financial year and the annual electrification processes reduced as the municipality was supposed to be pay back the loan in two financial years. The INEP allocation had then to be divided into two, a portion to continue with the work and a portion paying back the loan. CRR money could not be used because there is no revenue generation from rural electrification and was found to be an unfunded mandate to use CRR in rural Polokwane.

6.6.1 Rural Electrification Backlog

The current rural electrification backlog is **19 371** as per priority list and **8629** as per statistics 2016. The urban electrification backlog is **10 800** which covers the newly established townships in Seshego and Polokwane.

6.6.2 Challenges of Rural Electrification

1. Insufficient budget.
2. Housing development projects by COGHSTA which provides housing, water and roads but no electricity.
3. The way in which traditional leaders allocates sites need improvement.
4. Capacity challenge by Eskom.
5. Fast growing villages around the city.

6.7 Installation of High Mast Lights in rural areas

Polokwane municipality Council adopted the priority list for installation of to supply wards High Mast lights in Rural Villages. Each Financial year a budget for High mast is approved.

The Provincial Government Through the Office of the premier have Requested to Municipal Council to Prioritize Traditional Council Offices First in process of installation of High mast Lights. As part of intergovernmental Relation Polokwane Municipality has started to install Apollo lights at Tribal Offices.

6.7.1 Challenges of High Mast lights

1. Insufficient budget
2. Eskom capacity and delays in energizing
3. Monthly maintenance costs and unstable consumption payments costs

6.7.2 High Mast Lights Recommendations

That High Mast Lights be included in UIDG funding, That CCR budget be allocated for urban electrification. That COGHTA be requested to fund electrification as well as public lighting within their housing provisioning. That solar technology be used for high mast lighting. That communication be sent out to affected communities on the status of their uncompleted High Mast lights

6.7.3 Electrification Project in progress at EXT 78(July 2022)

CHAPTER Seven: Environmental and Social Analysis

7.1. ENVIRONMENTAL ANALYSIS

Every citizen has the right to an environment which is not harmful to their health or well-being and to have the environment protected for the benefit of present and future generations through reasonable legislative and other measures that prevent pollution and ecological degradation, promote conservation and secure ecologically sustainable development and use of natural resources while promoting justifiable economic and social development.

People depend on healthy ecosystems and sufficient natural resources to support their livelihoods. Ecosystem services provide physical resources such as clean air, water, food, medicinal plants, wood as well as the aesthetic value. The viability of these ecosystem services is a key factor in the economy, essential to poverty eradication and our national goals of shared and accelerated growth. Polokwane Municipality has a role to play in the management of biodiversity assets and ecological infrastructure. The municipality of Polokwane carries key responsibilities of implementing the important environmental legislations as well as several national strategies and policies relating to biodiversity and sustainable development.

7.1.1 Climate Description

Polokwane Municipality lies in the summer rainfall region and has a warm climate. Frost is rare. The highest temperatures occur during December and January. The daily average high temperature is 28.1 degrees Celsius in January, and the highest recorded temperature is 36.8 degrees Celsius. The average minimum winter temperature is 4.4 degrees Celsius in July with a record low of -3.5 degrees Celsius in 1964. The mean annual daily variation is 15 degrees Celsius.

The mean annual precipitation for the region is 478mm. Most precipitation falls between October and March with the peak period being December/January. Rainfall between the months of May and September is generally low with the average precipitation rate for the period June to August being 4,6mm.

Large-scale surface airflow over the region is dominated throughout the year by easterly and north-easterly winds. October and November are typically windy with wind speeds up to 13.8m/s. The frequency of southerly winds increases during June and July.

Source: Polokwane Municipality SDF,

7.1.2 Pollution Levels - Air Quality

The purchase of an air pollution monitor was approved during the 2015/2016 budget. The monitor will be used in different areas every quarter.

- Polokwane Smelter (SO_x, solid particulates, NO_x).
- Municipal Landfill (odours, carbon monoxide, methane, particulates).
- Industrial Activities (coal burning and related processes).
- Ready-mix Materials quarry (dust).
- Motocross track (dust, noise, carbon monoxide).

Source: Polokwane Municipality SDF

7.1.3 Topography

The Municipal area is divided into two rough topographical units, namely 'Moderately Undulating Plains' (mainly the eastern half of the municipal area) and 'Strongly Undulating Plains' in the west. The Polokwane Municipal area is situated on the so-called 'Pietersburg Plateau', which is bordered in the south by the Strydpoort Mountains, in the west and north by the Waterberg Mountains and in the east by the Great Escarpment. The highest part of the Plateau lies in the south near the Strydpoort Mountains which forms the watershed between the Olifants and Sand River systems.

There are a number of ridges which form constraints on development due to their visual exposure, potential as recreation or educational sites, former importance as sacred sites (likelihood of heritage sites) and likelihood of supporting sensitive plant communities.

Source: Polokwane Municipality SDF

7.1.4 Geology

The underlying geology consists of medium-grained, yellowish, laminated sandstone of the Makgabeng Formation of the Waterberg Group. It is also characterized by granite, biotite granite-gneiss, pegmatite, lava and pyroclasts.

Source: Polokwane Municipality SDF

7.1.5 Hydrology

There are 19 Catchment Areas represented in the municipal area. This includes 9 small portions of larger catchments outside the Municipal boundaries and the remaining 10 catchment areas are within the municipal boundary.

The Sand River catchment is drained by the Sand and Blood river. These are indicated as perennial streams but are often dry in the winter. The Blood river has its origin in the west of the Municipal Area and flows eastward between Blood river and Seshego. It is impounded in the Seshego Dam, and also joins the Sand River to the north of Polokwane City. The City of Polokwane has a number of storm water retention dams and storm water channels that eventually discharge into the Sand River via the Sterkloop Spruit and open storm water channels. There are a number of important wetland areas in the catchment. These areas support rare or endangered frog species and plant and red data bird species.

The utilisation of water in the catchment is mainly underground water abstraction via boreholes. There are a multitude of boreholes pumping into a number of reservoirs and tanks of various sizes in the municipal area. This aquifer is under threat from two major pollution sources, namely, the Polokwane Cemetery and the Seshego Sewerage Works.

Source: Polokwane Municipality SDF

7.1.6 Vegetation

There are 6 Vegetation Types that occur in the Polokwane Municipal Area. The largest Veld-Types are as follows: Pietersburg Plateau False Grassveld, Sourish Mixed Bushveld, Sour Bushveld, Mixed Bushveld, North-Eastern Mountain Sourveld and a relatively small area of Lowveld Sour Bushveld.

The veld is currently badly degraded and overgrazed and requires intervention from the municipality. North Eastern Mountain Grassveld occurs in the southern parts of Molepo-Maja-Chuene cluster and in the eastern part of the Mankweng cluster, along the Strydpoort Mountains, including 280 bird species, 22 butterfly species, 4 frog species, 12 mammal species, 6 reptile species and 5 scarab species.

Source: Polokwane Municipality SDF

7.1.7 Soils

The Pietersburg Plateau contains mainly grey iron-containing lateritic soil types that have been formed over the granite. These are sandy or gravel in texture and usually contain a hard iron containing bottom layer of hard pan. The area also contains, in certain areas, non-leached, black clay soil while to the West, light brown sandy soil of the Waterberg Sandstone and Lime deposits occur. The escarpments are also characterized by the round granite mounds that were formed by the intrusion of younger granites.

Source: Polokwane Municipality SDF

7.1.8 Heritage Resources

The fact that the municipality has not yet undertaken a comprehensive heritage survey of the entire municipal area, the heritage information on record is very limited. There are heritage sites that are currently recorded, namely, the **Bakone Malapa site** on the Chuenespoort Road which has been developed as a Museum and Mankweng **Rock Art Site** located in Mankweng which is linked to the Turf Loop Dam and provides other recreation activities such as hiking, picnicking and water sports. Other sites that provide good research material are the **Irish House Museum, Hugh Exton Museum and the Art Museum**.

The Zion Christian Church (ZCC)

The Zion Christian Church (ZCC) forms a unique heritage in Limpopo Province. Every year, mainly during the Easter holidays and in September, millions of ZCC congregation members flock to this area for worship, although the events were impacted by the outbreak of Covid-19 in 2020. The municipality has to capitalise on this unique advantage besides the fact that there is a by-pass directing these people to travel along the periphery of the City. Businesses in Polokwane should take advantage of this unique opportunity and gear it to provide a service to these people e.g. Open until late at night. There is a need for the municipality to develop a heritage database that will be looking at the Indigenous Knowledge System (IKS).

Source: Polokwane Municipality SDF

7.1.9 Protection and Conservation of ecosystems (Biodiversity)

Polokwane Game Reserve is just a 10 minutes' drive from the City Centre Covering **3200** hectares, this scenic reserve is one of the largest municipal reserves in South Africa.

The Game Reserve still has its unspoilt bush veld and meandering drives and it's also a home to 52 game species. Amongst the favourites are the rare white rhino (currently placed in a secure environment outside the reserve, sable antelope and giraffe. The centre of the city has a large bronze statue of necking giraffe so the animal's association with the City is a special one. The park is also the nesting place of approximately 200 bird species. It is a shining example of preservation of the threatened Pietersburg Plateau False Grassland and plant Oenthusiasts will discover 110 different grasses, approximately 280 flowering plants and 68 tree species. It is eco-tourism at its best.

It is important to note that, the following sensitive areas within Polokwane municipality must remain protected from development (i.e. no development within 150m):

Polokwane Botanical Reserve (one of only two habitats worldwide for endemic endangered **Euphorbia Clivicola**, a large Aloe marlothii 'forest', high geological and microclimate diversity, over 20 tree species) which is the highest and therefore the most visible point in Polokwane.

Flora park wetland (a seasonal wetland harbouring the only known community of endemic **Haemanthus montanus** bulbs and a rare form of Serapegia);

Polokwane Frog Reserve (breeding grounds for 12 Frog species including endangered Giant Bullfrog).

Buffer Zone along the Sand River of 100m on either side of the channel. The profusion of Syringa and other invasive weeds must be addressed as part of a planned rehabilitation strategy.

The **Suid Street drainage channel** (a dense stand of Vachelia karroo), which provides an ideal linear open space.

Unprotected Sensitive plant communities – The endemic plant communities (e.g., **Euphorbia clivicola** and **Euphorbia groenewaldii**) and other sensitive communities of high biodiversity around wetlands and ridges in the Polokwane area are not protected in any way and are therefore under threat from development, removal, habitat destruction, etc.

Source: Polokwane Municipality SDF

7.1.10 Euphorbia Clivicola

The Clivicola is located on the farm Krugersburg in Pietersburg Extension 11. The plant is a critically endangered species and has been listed as a CITES Schedule II species. It is only found in Polokwane and Percy Five in the whole wide world. The plant needs to be protected for the sake of future generations. Less than 300 plants are left in the habitat.

7.1.11 Euphorbia groenewaldii

Another endangered species that needs to be protected is the groenewaldii. The species forms part of the biodiversity of the Pietersburg false plateau. Plans are in place to fence off the area where these plants are located through creation of botanical garden.

7.1.12 Giant Bullfrog - Pyxicephalus adspersus

Common name	Scientific name	Status in Polokwane
Giant Bullfrog	Pyxicephalus adspersus	Restricted to a few seasonal wetlands scattered throughout the Polokwane Municipal Area

The **Giant bullfrog** (*Pyxicephalus adspersus*) is a species of frog in the Pyxicephalidae family. It is also known as the **pixie frog** due to its Latin name. Its natural habitats are dry savanna, moist savanna, subtropical or tropical dry shrubland, intermittent freshwater lakes, intermittent freshwater marshes, arable land, pastureland, and canals and ditches. This is a large frog, with males weighing 1.4 kg (3.1 lb), though can easily exceed 2 kg (4.4 lb); females are half the size, making it unique among frogs, as in most amphibian's females are usually larger than males. Males can reach 23 cm (9 inches) while females are much smaller. The Giant Bullfrog is the largest amphibian found in southern Africa. Areas has been identified within the Polokwane Municipal areas which serve as habitat for this species. the species needs to be protected.

7.2. CLIMATE CHANGE AND GLOBAL WARMING

When talking about climate, allusion is made to the long-term average weather patterns of a given region (i.e., temperature, pressure, precipitation). In this context, climate change then refers to perceived increases in the long-term average temperature of the earth's climate system. This temperature increase alters typical processes of ice formation and melting, changes the hydrological cycles and modifies the air and ocean currents. As a consequence, social, biological and ecological systems are also affected; and there is a strong threat on food supply, health, availability of water resources, economic growth, etc.

The understanding of climate change has been growing and today scientist is 95% certain that the perceived increases in global temperature are mostly caused by the concentration of Greenhouse Gases (GHG) in the atmosphere and other human activities. Solar radiation penetrates into the earth warming its surface; however only a fraction of this radiation is returned back to the space as most of it is trapped by the accumulation of these GHG gasses. The trapped radiation goes back to heat up the earth's surface, increasing its temperature just as a greenhouse operates.

Most of the GHG are present naturally in the atmosphere in small proportions; however, since the industrial revolution their concentration has notably risen. This rise has primarily been linked to the combustion of fossil fuels driven by the demand for energy, goods and services, and to the conversion of natural ecosystems to intensive land use.

Climate change is becoming increasingly apparent in Limpopo Province. The usual manifestations of climate change are evident by the long-term changes in weather indicators such as rainfall or temperature. Polokwane Municipality, as a secondary city, should play a role in planning and implementing Climate change mitigation strategies.

Rainfall

Typical rainfall for the Limpopo province ranges from 200mm in the hot dry areas to 1500mm in the high rainfall areas, with most of it happening between October and April. Rainfall in the province varies significantly between years. There has been a perceptible decrease in the total rainfall on much of the eastern part of Southern Africa including most of the Limpopo River Basin This can have serious impacts on the water balance of the region, affecting the largely rural population dependent on agriculture.

Drivers and Pressures

Without a doubt, the main drivers of climate change are population and economic growth. As the population numbers increase, more people aspire to higher material standards - creating an even greater demand for goods and services as for the energy to provide these. Transportation, industry, commerce, and the residential sector are the greatest contributors to GHG emissions, due to their high demand of energy which is supplied from non-renewable sources. The energy sector is responsible for about 89% of the national emissions of CO₂, mainly from energy industries (57%), transportation (9%) and manufacturing and construction (9%) Other sources of emissions are industrial processes and agriculture and land usage.

Source: Limpopo Environmental Outlook Report,

7.2.1 Climate Change Response Plans/Strategies

Climate Change Response Plans/Strategies

- a) Does the City of Polokwane Have Climate Change Response Plans/Strategies?
 - **No, the City of Polokwane don't have response strategy/plan.**
- b) **IF No** -What is the plan for Developing the Climate Change Response Plans/Strategies?
 - **The City of Polokwane just got funded by GIZ through assistance of DFFE to start developing climate change response plan.**
- c) **If Yes** -When was it Developed?
 - **N/A**
- d) Was the Climate Change Response Plans/Strategies Adopted by Council?
 - **N/A**
- e) What are the **Challenges** in the Implementation of Climate Change Response Plans/Strategies?
 - **Funding was a challenge.**
- f) Does the City of Polokwane Need Support on the **Climate Change Functions**?
 - **Yes, the City of Polokwane Need Support on the Climate Change Functions**
- (f) Was there any Previous Engagement with **National/Provincial** Department of Environmental Affairs Regarding the Climate Change Response Plans/Strategies -Briefly Explain what the engagement was all about and what was Resolved?
 - **Yes, engaged DFFE to assist in securing funding through GIZ and now GIZ is in the process of appointing service provider to assist in developing such a plan.**
- g) Does the City of Polokwane have an allocated Budget to address the **Climate Change Functions**?
 - **Yes, budget is being allocated, an amount of R1 300 000.00.**

Solar Energy

As part of Free Basic Electricity, the municipality has provided households with solar **Panels**. Plans are in place to increase the provision of **solar Panels** to other parts of the municipality.

7.2.2 Environmental Challenges

The following is a generalized summary of the existing Environmental problems encountered within the municipal area:

- Waste Management
- Mine and Industrial site rehabilitation
- Sinkholes.
- Depletion of Soil nutrients
- Soil erosion
- Reduction in scenic value
- Deforestation
- Overgrazing
- Invasive alien's plants
- Unprotected Sensitive plant communities
- Borrow pits.
- Illegal Sand mining
- Aging urban forest

General Challenging issues

There is a need to develop and maintain rural cemeteries, burial sites and recreational facilities. There is no proper control and coordination of identification process of suitable land that should be utilised for burial purposes; burial site ends up being established on environmentally sensitive areas. However, the municipality has completed the process of engaging traditional authorities in identifying ideal or suitable sites for the establishment of regional parks and cemeteries in rural areas.

7.2.3 Major Environmental Achievements

Item	Progress
Greening	Polokwane Municipality planted 3 714 trees in 2021/22 financial year
Arbor day celebration.	The municipality successfully celebrated Arbor Day 2021, at Ga-Matlala Moshate.
National Arbor City Awards	Polokwane Municipality was awarded first prize (winners of National Arbor City Awards) in the Local municipality category in September 2021 .
Invasive Alien plant control	Most of invasive alien plants were removed from Serkloop channel.

Item	Progress
Kroomdraai Plantation	Polokwane Municipality has appointed valuer to perform valuation count valuation of plantation Kroomdraai forest. Council owns portion 4 No 1025 Kroomdraai plantation farm which is located at Haenertsburg, with these GPS coordinates 23° 54'10.59" S 29° 56.09.51" E. The farm is about 49 hectors of which 41 hectares in planted. The main use of the land is forestry with pine trees (Pinus elliottii). The valuation was completed in June 2022.
Future environmental plans	The State of the Environment Report, the Strategic Environmental Assessment report and the Environmental Strategic Framework report has been developed, finalizing the submission of an Environmental Management Plan and the compilation of Environmental policy.
Cemetery Management system	A new system to be introduced for Cemetery Management in collaboration with the GIS section of the Planning SBU.
Tree inventory	Already captured 6840 trees on GIS
Maintenance of parks	Detailed activity-based operational/maintenance plans have been developed for all the parks within the Municipality
EPWP	Environmental Management have two projects funded through EPWP grant, namely rural bush clearance and Nursery management

7.2.4 Provincial Intervention for Environmental Management – LEDET

LEDET Interventions For Environmental Management				
PROGRAMME NAME	PROJECT DESCRIPTION/TYPE OF STRUCTURE	PROGRAMME DESCRIPTION	DISTRICT MUNICIPALITY	LOCAL MUNICIPALITY
Environmental Empowerment Services	Limpopo Green Schools competition	Schools' competition to promote green economy	Capricorn	All locals
	Tree planting	Promote planting of trees to mitigate for climate change	Capricorn	All locals

LEDET Interventions For Environmental Management				
PROGRAMME NAME	PROJECT DESCRIPTION/TYPE OF STRUCTURE	PROGRAMME DESCRIPTION	DISTRICT MUNICIPALITY	LOCAL MUNICIPALITY
	Environmental knowledge Capacity building	Environmental capacity building workshops to wards committees and Traditional Leader	Capricorn	All locals

Source: PLK Environmental Management SBU

7.2.5 Approved Capital Projects (2022/23)

	Project Name	Project Description	Budget	Available
1	Greening Programme	Procurement and planting of trees.	R 1 304.348	R 1 304.348
2	Development of regional parks in Rural areas	Construction of Ablution facilities at Tom Naude and Mankweng Unit C Park	R 2 260.869	R 2 260.869
3	Grass cutting equipment	Procurement of grass cutting equipment	R 1 595.123	R 1 595.123

Source: PLK Environmental Management SBU

7.2.6 Polokwane Environmental Forum

Polokwane Environmental Forum was established by City of Polokwane with the aim of addressing the environmental challenges in a coordinated manner within Polokwane City. Environmental management SBU being the custodian of the forum. Environmental challenges such as illegal dumping and illegal sand mining just to mention the few are addressed during the meetings. Meetings for the Forum are held once quarterly. The following are the key external stakeholders i.e., LEDET, Capricorn District Municipality, DEA, SAB, Polokwane Anglo Smelters, Coca Cola and University of Limpopo. Internal SBU's that are part of stakeholders include Waste, Environmental Health, Water, Environmental Management, Planning, Energy and GIS.

7.2.7 Capricorn District Environmental Forum

This forum is coordinated at District level (**Capricorn District**) and of which Polokwane Municipality is an active member of the forum. Meeting are held once quarterly.

7.2.8 Arbor Day Celebration

Polokwane Municipality has celebrated Arbor day through tree planting and provision of fruit trees under the theme "**Forest Restoration**" at Ga-Matlala Moshate. The municipality has provided 500 fruit trees to the community, while ornamental trees were planted in schools and within Matlala Traditional Offices.

Arbor Day Celebration

7.3 Maintenance of Open Spaces and Parks (48 x Municipal Parks)

The City of Polokwane has **48 parks** in total that needs to be maintained at all times for them to remain in Good Condition. The main Municipal Parks in the City are the **Civic Centre Park, Flora Park Dam, Tom Naude** being the main popular for usage by members of the public in the City.

In Seshego is the main one is Zone 4 Park and in Mankweng the main one is Unit C Park and Unit A Park which are popular. All the mentioned parks have irrigation systems but due to water Challenges in the City of Polokwane, Council has taken a decision to stop irrigation of all parks. With irrigation our parks were going to be in better shape. below is the list of all Municipal Parks which also provides maintenance plan and their status quo.

7.3.1 48 x Municipal Parks Status Quo

Park Maintenance Status Quo

Park Maintenance Status Quo				
	Name of the Park	Activity	Service/material required	Labour required
1	AGANANG OFFICE AND TRAFFIC	Litter picking	Refuse bags, gloves	03
		Weeding of flowerbeds	Forks, spade, rakes, refuse bags, gloves	03
		Hard surface, cleaning and application of herbicide	Hard brooms	03
		Grass cutting	Lawn mowers,	07
2	RAINBOW PARK	Litter picking, sweeping and weeding of hard surface	Refuse bags and spades	05
		Pruning of trees	Pole pruner	02
		Painting of benches and children's play equipment	Paints and brushes	02
		Sandpits	Weeding	02
		Preparations and Establishment of flowerbeds	Spades, folks and pik	05
		Grass cutting	Lawn mowers	
3	TOM NAUDE PARK	Litter picking	Refuse bags, gloves	05
		Weeding of flowerbeds	Forks, spade, rakes, refuse bags	05

Park Maintenance Status Quo

	Name of the Park	Activity	Service/material required	Labour required
		Grass cutting	Lawn mowers	07
		Grading of parkrun route	Grader	01
		Weeding of hard surface (scrubbing)	Spades	05
		Pruning of trees and shrubs	Pole pruner	02
		Painting of children's play equipment	Paints and brushes	02
4	SABC PARK A	Litter picking	Refuse bags, gloves	03
		Weeding	Forks, spade ,rakes,refus	03
		Hard surface and application of herbicide	Chemicals, knapsack, spades,	03
		Grass cutting	Lawn mowers, brush cutters,	07
		Pruning of shrubs	Hedge pruner	02
5	ZONE 4 PARK	Litter picking and sweeping of hard surface	Refuse bags, gloves	06
		Weeding of flower beds	Forks , spade,rakes,refuse bags,gloves	05
		Hard surface and application of herbicide	Chemicals,knapsack,spades,rakes,respirator,chemical gloves	6
		Grass cutting		15
		Pruning of shrubs	Pruning shear	02
6	TRIANGLE PARK	General cleaning/litter picking	Spades, forks ,refuse bags, gloves	05
		Weeding of flower beds	Spades and folks	05
		Grass cutting	Lawn mowers	04
		Pruning of trees and shrubs	Pruning shear	02
7	EXT 76 PARK	General cleaning/litter picking	Spades, forks ,refuse bags, gloves	05
		Maintenance of sandpit	Spade,rake	05
		Grass cutting	Tractors and brush cutters	15

Park Maintenance Status Quo

	Name of the Park	Activity	Service/material required	Labour required
8	MANKWENG UNIT A PARK	Maintenance of sand pits	River sand, rakes, spades.	05
		Hard surface treatment	Spades, rakes, chemicals, knapsacks	05
		Grass cutting	Brush cutters, tractor	10
		Litter picking	Refuse bags, truck,	05
9	MAMOTINTANE PARK	Grass cutting	Brush cutters, tractor	03
		Maintenance of sand pits	River sand, rakes, spades	05
		Flower bed maintenance	Forks and rakes	05
		Litter picking	Refuse bags, truck	05
10	MANKWENG UNIT C PARK	Maintenance of sand pits	River sand, rakes, spades.	05
		Litter picking	Refuse bags, truck	05
		Grass cutting	Brush cutters, tractor	05
		Hard surface-Sweeping	Brooms, spades,	03
11	FLORA PARK DAM	Grass cutting	Brush cutters, tractor	10
		Maintenance of sand pits	River sand, rakes, spades	05
		Flower bed maintenance	Forks and rakes	05
		Litter picking	Refuse bags, truck	05
12	RSA PARK (MOTOR CITY)	Litter picking	Refuse bags	05
		Grass cutting	Brush cutters, tractor	10
		Weeding of walkway	Spades	04
		Weeding of flower beds	rakes, spades	05
		Trimming and pruning of trees	Pole pruner	02
13	CIVIC CENTRE GARDENS	Litter picking and sweeping of hard surface	Leaf blower and refuse bags	05
		Maintenance of sand pits	rakes, spades	03

Park Maintenance Status Quo

	Name of the Park	Activity	Service/material required	Labour required
		Weeding of flowerbeds	Forks and rakes	05
		Deadheading of flower beds		03
		Pruning of shrubs and trees	Pruning shear and pole pruner	02
14	CONNIE VAN RENSBURG	Cleaning of sandpit	Spades	05
		Litter picking	Refuse bags, truck	05
		Pruning of trees and shrubs	Pole pruner	02
15	RSA DAM	Litter picking	Refuse bags	05
		Grass cutting	Brush cutters, tractor	10
		Pruning of trees and shrubs	Pole pruner	02
16	SEBAYENG PARK	Litter picking	Refuse bags	05
		Weeding of flowerbeds	Spades and folks	03
17	WESTERNBURG PARK	Litter picking	Refuse bags	02
		Grass cutting	Brush cutters, tractor	10
		Pruning of trees and shrubs	Pole pruner	02
18	WESTERNBURG PARK (RDP)	Litter picking	Refuse bags	02
		Pruning of trees and shrubs	Pole pruner	02
19	ALOE PARK	Litter picking	Refuse bags	03
		Pruning of shrubs	Pole pruner	02
		Removal of old children's play equipment		05
20	OOST SKOOL PARK	Litter picking	Refuse bags	02
		Weeding of flower beds	Spades	04
21		Litter picking	Refuse bags	02

Park Maintenance Status Quo

	Name of the Park	Activity	Service/material required	Labour required
	KOBIE VAN ZYL	Pruning of trees and shrubs	Pole pruner	02
22	SESHEGO ZONE 8 PARK	Litter picking	Refuse bags	02
		Weeding of flowerbeds	Spades and folks	04
23	STERPARK	Litter picking	Refuse bags	02
24	LADANNA PARK	Litter picking	Refuse bags	02
25	ZEN PARK	Litter picking	Refuse bags	02
26	NIRVANA PARK	Litter picking	Refuse bags	02
		Pruning of trees	Pole pruner	02
27	EDUAN PARK	Litter picking	Refuse bags	02
		Grass cutting	Brush cutters	05
28	EXT 22 IVY PARK	Litter picking	Refuse bags	02
		Cleaning of sandpit	Spades	03
		Tree staking	Poles	02
		Pruning of trees	Pole pruner	02
29	ZONE 3 PARK	Litter picking	Refuse bags	02
30	EMDO PARK	Litter picking	Refuse bags	02
		Pruning	Pole pruner	02
31	WILGE PARK	Litter picking	Refuse bags	02
32	MACDONALD PARK	Litter picking	Refuse bags	02
		Cleaning of children's play area	Spades and folks	05
33	HERMAN PARK	Litter picking	Refuse bags	02
34	RHEBOK PARK	Litter picking	Refuse bags	02
		Grass cutting	Brush cutters	05
35	VALENCIA PARK	Litter picking	Refuse bags	02

Park Maintenance Status Quo			
Name of the Park	Activity	Service/material required	Labour required
	Grass cutting	Brush cutters	05
	Weeding of Sand pit	Spades	03
	Weeding of flowerbeds	Spades and folks	05

7.3.2 Grass Cutting Teams

The grass cutting teams consists of permanent staff and temporary labors who are only brought in during rainy seasons to ensure there is adequate capacity to deal with the fast-growing grass. Due to lack of capacity, grass cutting teams from various areas (Seshego, Mankweng, City) are at times clustered together in one area with their tractors and brush cutters to ensure there is an immediate impact. The grass cutting teams are as follow:

CLUSTER /AREA	PERMANENT EMPLOYEES
1. Mankweng	7
2. Seshego	3
3. City	14
4. Game Reserve	5
5. Cemeteries	0
6. Nursery	3
Total	32

Source: PLK Environmental Management SBU

7.3.4 AREAS for Grass Cutting Programme

AREAS for Grass Cutting Programme (Location)
BENDOR
Veldspaat drive from Munnik to Sasol garage
De Meer side walk from Veldspaat to Logan open area
The Crescent Open area
De wet side walk from Outspan to De Meer
Vharanani street Sidewalk from Outspan to De Meer
Hilary open area
Hyde close
DE Villiers and Outspan Open area
Eduan Park
Logan sidewalk and Open area
De Meer Open area
Stadium peripheries
Suid street area from De Wet to Dorp street
Ster Park
Aquarius and Virgo Open area

AREAS for Grass Cutting Programme (Location)
Ster Park sidewalks
Apollo open area
Open Stands
Serala View
Sidewalks
Ivy Park and Ivy dale
Ext 34 entrance and sidewalks
Campbell street from Marshal to N1 South
CBD
Sidewalks
NIRVANA
Safire street open area
Ladana
Vermiculite from Micro to N. Mandela drive
Witklaap drive
Corner Vermiculite and N. Mandela drive Open area
Spelankon open areas
Barracks
MANKWENG AREAS
Sebayeng Entrance
Mankweng entrance from dumping towards Nkerase
Open area between Zone 1 and Toronto towards R71
Mamodimo Valley from unit C to Stop sign towards Mamodimo park sports ground
SESHEGO AREAS
Old road from circle centre to Traffic open area, Lesedi open area next to the ground
N1 South circle to Seshego zone 5 crossing
Ext 71 open area and taxi rank
Road from zone 8 AFM church to Txutxu Valley side walk
Zone 5 B, C, and D
Zone 4 Skotipola from circle to Blood river Robot
Khensani drive from circle to Hostel traffic lights
Ext 40 and Ext 44 open areas
Mahlasedi park Vermiculite from Micro to N. Mandela drive
Zone 8 outline from corner Helen Joseph to and Mandela
Entrance Legae la batho from traffic lights to Ext 75 and Madiba park to from Traffic light to Ext 73

7.3.5 Establishment of Animal Pound

7.3.6. An effective approach on animal pound (Revised approach)

The key question to the establishment of the Animal Pound is whether it should be operated by the **municipality or outsourced**, and it be operated by private company. To arrive at the determination on the two options of insourcing or outsourcing the Organisational Development Unit has been tasked to undertake a study to determine costs - benefit analysis of the two options and make a recommendation to the accounting Officer and ultimately to the Council. The draft report is circulating internally to source comments and inputs of relevant role players before submission to the Accounting Officer.

The study covers the following specific issues:

- ✓ Overall impact on employee salary bill,
- ✓ The estimated salaries which exclude benefits,
- ✓ Costs for the management of the pound which will include amongst other issues the following: shelter, food, water, travelling including necessary medical treatment to all animals in the pound.
- ✓ The municipality will have to arrange for an animal technician or veterinary doctor for emergencies and dispensing medications.
- ✓ Potential revenue to be collected based on the set tariffs.
- ✓ Risk of animal death and theft at the pound.
- ✓ Refurbishment of Animal Pound to bring it to a functional state and purchase of required truck and its future maintenance or repairs.

The proposal made by SPCA to operate the Animal Pound will be looked at upon finalisation of model to be used for establishment of the pound.

7.3.7. Options Available for Animal Pound Establishment

OPTIONS FOR ESTABLISHING THE POUND	COMMENTS /UPDATE
1. Municipality to run the pound	This option will require review of the organogram to create new positions and have all operational requirements and readiness in place including own pounding trucks, veterinary surgeon in place as well as refurbishment of the debilitated pound.

OPTIONS FOR ESTABLISHING THE POUND	COMMENTS /UPDATE
	This option is likely to take longer and to come at a cost
2. Use of the Animal Pound of neighboring Municipality	Lepelle - Nkumpi Local Municipality has existing pound. A letter has been sent to them to consider our request to use their pound in the meantime we are still finalizing processes relating to establishing own municipal pound. However, the municipality does not handle pigs due to their difficult nature.
3. Contracting a private entity or NGO/NPO`s to operate the pound	SPCA has made a proposal to host and operate municipal pound from their existing pound outside town. The process of considering and finalizing their proposal will take two to three months as it will have to be subjected to unsolicited bid process of the SCM, which includes calling for public comments and writing to the National Treasury for their comments before giving it final approval.

Source: PLK Environmental Management SBU

7.3.8 Availability of Alien Invasive Species Eradication Plan

Within the Environmental Management SBU of the City of Polokwane, there is a sub-unit dealing with Horticulture, there are dedicated Horticulturalist who are responsible for alien invasive eradication programme.

The programmes involve physical removal of alien species in the municipality jurisdiction. The programme is implemented through **EPWP**.

The plan covers the entire City of Polokwane and its being implemented in terms of the Conservation of Agricultural Resources Act (Act No. 43 of 1983); National Environmental Management: Biodiversity Act, 2004 (Act No 10 of 2004) and others.

7.4. National Arbor City Award Received

The City of Polokwane was awarded with the **National Arbor City Award** by the Department of Forestry, Fishery and the Environment. The City of stars has been participating in the National call for planting thousands of trees with the aim of eventually being an eco-friendly City. The award came with an amount of R300k, and a certificate sponsored by Absa. The event took place in Richards Bay, Durban

National Arbour City Award

7.5. AIR QUALITY MANAGEMENT

7.5.1 Air Quality Management Plan developed and adopted/approved by Council.

The City of Polokwane Environmental Health Section has developed the Air Quality Management Plan (AQMP) which was adopted by the Council.

Table: Status of Polokwane Sector Plans

Municipal Plans	Sector	AVAILABLE	NOT AVAILABLE	DEVELOPMENT STAGE	UNDER REVIEW
Air Management Plan	Quality	X			

Air Quality Management Plan provides the “**blue print**” upon which City of Polokwane will continue to implement air quality management effectively and efficiently within the City over the next coming years, to continually ensure good air quality for our children and future generations.

Section 24 of the Constitution states that ‘Everyone has the right to an environment that is not harmful to their health and well-being’ and to have the environment protected, for the benefit of present and future generations, through reasonable legislative and other measures that prevent pollution and ecological degradation; promote conservation; and secure ecologically

sustainable development and use of natural resources while promoting justifiable economic and social development.' The Constitution further places an obligation in terms of section 152(1)(b) and (d) on the part of Local Government as stipulated in sections 4(2)(d) and 4(2)(i), 73(1) and (2) of the Municipal Systems Act 32 of 2000 to ensure that the right to a clean and healthy environment is fulfilled.

The National Environmental Management: Air Quality Act 39 of 2004 (AQA) requires Municipalities to introduce Air Quality Management Plans (AQMP) that set out what will be done to achieve the prescribed air quality standards. After five years, the AQMP must be reviewed, the goals realigned and a revised AQMP should be developed. As part of their legal obligation,

An AQMP describes the current state of air quality in an area, how it is changing over time and what can be done to ensure clean air is achieved and maintained. An AQMP provides objectives and sets a course of action to attain air quality management goals. It identifies and addresses significant sources of impact using appropriate solutions to ensure that health effects and environmental impacts are minimized.

7.5.2 Submission of AQO Annual Report & report on implementation of Air Quality Management Plan

AIR QUALITY

The ambient air quality is measured in three places in Polokwane City, namely, the Civic Square, Annadale (close to the industrial area) and Seshego. The information from the monitoring station indicates that the readings for the City of Polokwane are well below the values for other South African Cities.

There are a number of air pollution risks in the Municipal area that must be recognized:

- Polokwane Smelter (SO_x, solid particulates, NO_x)
- Municipal Landfill (odours, carbon monoxide, methane, particulates)
- Industrial Activities (coal burning and related processes)
- Ready-mix Materials quarry (dust)
- Motocross track (dust, noise, carbon monoxide)
- Old Asbestos dump/factory, Industrial (Asbestos fibres, dust)

7.5.3 Developed an Air Quality By-Laws

The City of Polokwane has developed the Air Quality By –Laws which was adopted by Council the Public Participation Public Notice as published on local Newspapers, Municipal Website, Municipal Notice Boards.

7.5.4 Air quality monitoring stations and monitoring of ambient air quality pollutants

The following equipment have been placed around Polokwane municipality jurisdiction:

- a) One station is situated at Greenside Primary school (**CDM**)
- b) One is station is situated in the Polokwane Game Reserve (**Anglo Smelters**)
- c) Polokwane Municipality monitoring equipment has some Challenges that are being address, it is currently not functional.

7.5.5 Designation of Air Quality Management Officer

Designation of Air Quality Management Officer –

- a) Does the City of Polokwane have a Designated Air Quality officer? (**Yes or No**).
 - **NO**
- b) **If No** -why has the City not appointed the Air Quality Designated Officer – (Elaborate more on the Plans to Rectify this).
 - **The process of appointing Air Quality Officer will be finalised during this financial year 2022/2023.**
- c) **If Yes** -How many officers are Designated as Air Quality officer?
 - **N/A**
- d) When were they appointed by Who? (e.g., MM)?
 - **N/A**
- e) List the Names and Positions of the Air Quality Designated Officer at the City of Polokwane.
 - **N/A**
- f) What are the Duties and Responsibilities of the Air Quality Designated Officer?
 - **Coordinates matters relating to air quality management within the municipality.**
 - **Developed the air quality management plan.**
 - **Enforcing compliance with the requirements of the regulations developed in terms of the AQA: enforcing the dust control regulation as are of principle responsibility and providing input-role regulation of activities declared as controlled emitters (small boiler operations and temporary asphalt).**
 - **Monitoring of ambient air quality – baseline monitoring. Parameters being measured are particulate matter (PM10), sulphur dioxide, nitrogen dioxide, ozone and carbon monoxide.**
 - **Responding and resolving complaints from the members of the public pertaining to air pollution.**
 - **Monitoring compliance in terms of noise caused by activities.**
 - **Monitoring compliance in respect of reasonable steps taken prevent air pollution.**
 - **Participating in local and district forums for environmental management& air quality management.**
 - **Partaking in joint inspections with the environmental management inspectors.**
- g) Elaborate on the **Challenges and Corrective** Actions Faced by Air Quality Designated Officer.

- Procurement of proper air pollution monitoring equipment and payments of software licenses being stipulated on the service level agreement.
- This can be corrected by having proper service level agreements when purchasing the equipment.

There is an appointed official under Environmental Health SBU. The Official is **not yet** legally designated. Below is City of Polokwane approved Organogram Structure for Environmental Health SBU reflecting the position of Air Quality Officer which is currently filled.

Public Safety Environmental Health Services

Annexure 8.3

7.5.6 Conducting of industry inspection.

The industry inspections are being conducted by municipal officials on a quarterly basis.

7.5.7 Compliance, Monitoring and Enforcement by EMIs

Compliance, Monitoring and Enforcement are being conducted by municipal officials on a quarterly basis.

Compliance, Monitoring and Enforcement by EMIs (Environmental Management Inspectors)

- a) Briefly Indicate the compliance, monitoring and enforcement conducted by Polokwane Municipality together with the CDM district.
- **Continuous environmental compliance, monitoring and enforcement are conducted by Polokwane Municipality EMI's in most cases jointly with CDM, LEDET and DMR EMI's on both green and brown aspects**

- b) Does the City of Polokwane have Officers that are appointed as **EMIs**?

- **Yes**

- c) How Many Officers were appointed as EMIs?

- **Six in number (4 Environmental Management SBU and 2 Waste Management)**

- (c)) What are the areas of Focus by EMI of Polokwane Municipality?

- **Focus on Brown and Green issues**

- d) List the Names and Positions of Officers that are appointed as EMIs for the City of Polokwane.

(i)Pitjadi MB: SUPERINTENDENT: NATURAL RESOURCES

(ii) SEOLOANE MF: SUPERINTENDENT: OPEN SPACE

(iii) MABASO RJ: NATURE CONSERVATIONIST

(iv)MAIMELA A: SENIOR SUPERINTENDENT: WASTE

(v) TJIKANE P: MANAGER WASTE

(vi) MATUMBA TW: ENVIRONMENTAL EDUCATIONAL OFFICER

- e) What are the Duties and Responsibilities of the EMIs at the City of Polokwane?

- **To enforce the provisions of NEMA, NEMWA, NEMAOA, NEMBA and NEMPA**
- **To conduct routine inspections**

- f) Elaborate on the **Challenges and Corrective** Actions Faced by EMIs.

- **Lack of budget to procure specific uniform for EMI's and other supportive tools of work.**
- **Environmental enforcement must be subunit on its own, EMI's must be responsible for Enforcement as their key performance areas. Additional Personnel is needed**

- **Training should be continuous because we are dealing with legislation that changes from time to time**
- g) Were the EMI's in the City of Polokwane Trained /Attended any Training before they are appointed as EMI's -Elaborate Briefly on the Training attended or Conducted for EMI's
- **Yes, training was provided by DFFE for one month.**

7.5.8 Allocation and availability of Air Quality Management related work budget

The allocated budget is insufficient. There is a need for Council to allocate more budget on Air Quality Management related work. Over the previous financial years IDP, air quality related projects were developed, and allocated budget as reflected below:

7.6 ENVIRONMENTAL GOVERNANCE AND CROSS CUTTING ISSUES

7.6.1 Municipal Projects consider EIA.

It is reflected under the IDP Projects phase. All Municipal projects that trigger Environmental Impact Assessment (EIA) listing notices are subjected to EIA process.

Environmental Impact Assessment (EIA) is an environmental decision support tool, which provides information on the likely impacts of development projects to those who take the decision as to whether the project should be authorized. The purpose of an EIA is to determine the potential environmental, social, and health effects of a proposed development, so that those who take the decisions in developing the project and in authorizing the project are informed about the likely consequences of their decisions **before** they take those decisions and are thereby more accountable. It is intended to facilitate informed and transparent decision-making while seeking to avoid, reduce or mitigate potential adverse impacts through the consideration of alternative options, sites or processes.

7.6.2 Municipal commenting on EIA as Affected and Interested Parties

The EIA commence are now being done. The Environmental Assessment Practitioner (EAP) register under EAPASA are mandated to comment on the EIA application as interested/or and affected parties.

Municipal commenting on EIA as Affected and Interested Parties

- a) Briefly indicate if Polokwane Municipality Provide comments as interested and affected parties on EIA Application?
- **Yes, the Polokwane municipality through Environmental Management SBU has dedicated official providing comments on the received EIA reports.**

- b) Which other SBU /Directorate within the Polokwane Municipality are involved in the EIA Application comments (Specify the SBU and their areas of Focus on EIA application).
 - **Environmental management services focus on whole review of EIA applications.**
- c) Explain the Process for Approval of EIA Application at the City of Polokwane.
 - **Polokwane Municipality only review and offer formal comments of the EIA application for the competent Authority consideration.**
 - **LEDET, DFFE, DMR.DWS are the competent Authorities to issue Approval in the form of Environmental Authorisation (EA).**
- d) What is the Turnaround Time for Polokwane Municipality to Provide Comments on EIA applications?
 - **The turnaround time is 14 days.**
- e) What systems have been put in Place by Polokwane Municipality to ensure that all Major **Municipal Infrastructure Projects** are Complying with EIA requirements as specified in the Legislation?
 - **There is a need to Put in place team of Environmental Management Inspectors to monitor compliance.**

7.6.3 Environmental Outlook

For Environmental Outlook the City of Polokwane rely on CDM and LEDET plans. The City has not yet developed its own environmental Outlook.

7.6.4 Environmental Management Framework (EMF)/ Strategic Environmental Assessment (SEA)

EMFs are part of the suite of Integrated Environmental Management (IEM)/ Strategic Environmental Assessment (SEA) are tools that are used to support informed decisions regarding the management of environmental impacts that arise out of human activities and developments.

Environmental Management Frameworks are one of the tools that can attempt to achieve the desired developmental and ecological balance by utilizing early identification and mapping of sensitive ecosystems and resources to assist in pre-empting potential future land use conflicts.

Strategic Environmental Assessment (SEA) is a process of prior examination and appraisal of policies, plans, and programmes and other higher level or pre-project initiatives. The City of Polokwane developments decisions are guided by these two main Environmental tools.

Environmental Management Framework (EMF)/ Strategic Environmental Assessment (SEA)

- a) The City of Polokwane (**EMP**) **Environmental Management Plan** is more than 5 years and needs to be reviewed. -explain when this will be Conducted as the **EMP** is Outdated.
 - **Once the budget is allocated for the renewal of EMP, the preparation will start immediately.**

7.6.5 Environmental advocacy/ empowerment/ education and awareness

Environmental advocacy/ empowerment/ education and awareness which addresses air quality management, biodiversity, conservation, climate change, waste management, etc.

The City of Polokwane Municipality has a well-established team of officials that handles the environmental education and awareness programmes to the community. The City of Polokwane has established **Polokwane Environmental Education Centre** and other designated officials (Waste Education Officers) whose responsibilities is to educate the public about environmental management issues.

7.6.6 Availability of an organizational structure supporting environmental functions

Availability of an organizational structure supporting environmental functions such as Air Quality Management, Biodiversity and Conservation, Climate Change, Coastal Management, Waste Management, Intergrated Environmental Management, Environmental Advocacy and designation of officers in line with NEMA/SEMA requirements.

The City of Polokwane has an Approved Organisational Structure that has a Directorate called Community Services headed by the Director, all unit that deals with environmental aspect are located under this Directorate i.e. (***Environmental Management SBU, Waste SBU, and Environmental health SBU***).

The SBU's are headed by a Managers that is responsible for Unit daily functions that include supporting environmental functions such as Air Quality Management, Biodiversity and Conservation, Climate Change, Waste Management, Intergrated Environmental Management, Environmental Advocacy and designation of officers in line with NEMA/SEMA requirements.

7.6.7 Allocation and availability of budgets for staffing of environmental unit, environmental advocacy, EMF, SEA and EIA

Each Financial year, the City of Polokwane allocate a Budget for staffing of environmental unit, environmental advocacy, EMF, SEA and EIA, etc. including Projects in all those SBU.

7.7 WASTE MANAGEMENT

7.7.1 Waste Management Services Municipal Wide

INTRODUCTION

The **Waste Management SBU** strives to provide **efficient, effective and appropriate** waste management services to all waste generators, while recognizing the contributions made by private sector in enhancing the provision of these services as contained in the integrated waste management plan within these legislative prescripts:

- ❖ Waste Act & Environmental Management Act.
- ❖ Norms and Standards.

- ❖ Municipal Integrated Waste Management Plan.
- ❖ Municipal policies and Bylaw.

7.7.2 Vision and Mission-Waste SBU

Vision

- A clean and litter free environment for all through best innovative waste management practices.

Mission objectives

- To have all general waste collected, reused, recycled, and disposed of in an environmentally friendly manner.

7.7.3 CORE FUNCTIONS OF WASTE SBU

- Awareness and education to change public mindset about best waste management practices.
- Waste minimization i.e., **Reduction, Reuse and Recycling** of waste before disposal
- Waste storage, collection, transportation & disposal at licensed landfill sites.
- Cleaning and clearing of illegal dumping.
- Street cleaning services (manual litter picking and mechanical street sweeping in the CBD).
- Rural waste management including EPWP litter picking.
- Hazardous waste monitoring with special reference to medical waste: competency of province.

7.7.4 Personnel (Waste SBU)

Personnel-Waste SBU

- ✓ 1 x Manager.
- ✓ 1 x Asst Manager Operations.
- ✓ 1 x Asst Manager Awareness
- ✓ 1 x Admin Assistant, 1 x Admin clerk.
- ✓ 2 x Senior superintendents.
- ✓ 3 x Supervisor, 4 x Acting Supervisors.
- ✓ 22 X Operators, 8 X Acting Operators.
- ✓ 2 X Drivers, 7 X Acting drivers, 119 X Labourers.
- ✓ 75 X Temps working as loading labourers.
- ✓ 178 X Temps Street cleaning.
- ✓ 24 X Temps for street sweeping.
- ✓ 229 X EPWP beneficiaries (rural).

7.7.5 TYPES OF EQUIPMENTS REQUIRED

TYPE OF EQUIPMENT	QUANTITY	AREAS OF OPERATION	SHORTAGE
TLB	3	City, Mankweng & Seshego: Clearing of illegal dumping, Clearing of transfer stations	3 X TLB
Tipper trucks	3	Work with TLB's	Minimum of 2 X trucks per TLB

Grab trucks	2	Clearing of commercial and communal skip containers	2 X multipurpose 2 X Contracted
Multipurpose	3	Cleaning of rural skip containers	
Roll on roll off	3	Clearing of Transfer stations & skip containers in hospitals, industries. Skip containers in hospitals, schools, large industries	2X City 1X Seshego 1X Mankweng To purchase 2X ROROTrucks
Compactors	5 new 4 old trucks	Seshego, Moletjie and Aganang clusters waste collection City outer CBD routes Mankweng, Sebayeng and Dikgale waste collection	4 Seshego for residential and rural areas 2 Mankweng 3 Urban & 2 rural collection
Fleet Africa compactors	14	Daily collection of waste from businesses and institutions, rural weekly collection	8X City 7X Seshego 2X Mankweng
4 Ton Trucks	6	Collection of litter picking & street cleaning bags	2X City 2X Seshego 2X Mankweng

Source: PLK Waste Management SBU

7.7.6 SERVICE LEVEL STANDARDS: OPERATIONS

CATEGORY	EQUIPMENT	FREQUENCY
Residential	Compactor	Once a week
Business	Compactor	Daily
Transfer Station	Roro and FEL	Daily
Industrial	Load lugger and Grab	Week days
Communal Skip	Gran and Load Lugger	Daily
Illegal Dumping	Tipper trucks	Week days
Street Sweeping at Night CBD	2X Street Sweepers	Daily
Litter picking	4-ton trucks	Daily

Source: PLK Waste Management SBU

7.7.7 weekly waste collection service

SERVICE PROVISION

- **103 776** x Households receive weekly waste collection service in all urban areas: **City, Seshego, Mankweng and Sebayeng.**
- **53 x villages** receive **weekly waste collection service** in rural areas.
- Clearing and cleaning Illegal dumping **weekly in all hotspots**
- **14 x recycling companies** operational at Weltevreden landfill site.

7.7.8 WASTE FACILITIES (Landfill sites and Transfer Stations)

Landfill sites: Total 02

- Weltevreden Landfill site.

- Aganang Landfill site.

Transfer stations: Total 07

- City: Webster & Ladanna.
- Mankweng: Dikgale, Makotopong, Mankweng & Mankweng Buy Centre.
- Seshego: Makgakga & Vaalkop.
-

7.7.9 Rural Skips Distribution Summary

CLUSTER	NUMBER OF SKIPS	CHALLENGES
Maja/Chuene/Molepo	10	Insufficient equipment to service/clean them
Mankweng/ Sebayeng/ Dikgale	31	
Aganang/ Moletjie/ Seshego	28	

Source: PLK Waste Management SBU

7.7.10 CURRENT WASTE PROJECTS: 2022/23

PROJECT NAME	SCOPE OF WORK	BUDGET AMOUNT
Extension of Landfill site	Licensing of the new extension	170 365
Molepo Transfer Station	Fencing, earth works for ramp and retention wall, guard house, bore borehole and elevated tank	5 217 391
6 & 9 M ³ Skip containers	Purchase of skip containers	86 957
240 litre bins	Purchase of 240 litre bins	549 796
Building plans for Mankweng transfer station	As built designs for licencing	165 217
Educational material	Purchase of awareness and education material	304 348
No dumping Boards	Purchase of No Dumping Boards	130 435
Pavement bins	Purchase of pavement bins	347 826

Source: PLK Waste Management SBU

7.7.11 CONTRACTED SERVICES UNDER WASTE MANAGEMENT

3 Contracted services for these areas:

- City: CBD (2 compactors and 2 Street Sweepers by Mashumi Construction and Projects

- City Residential 3 waste compactors by Ingwe Waste and 3 Compactors Makayise
- Business and skips in the city and industrial areas 2 Grab Trucks by Mminatlou

IN-HOUSE SERVICES

Replaced outsourced services:

- ✓ 6 x Compactors for Seshego residential areas
- ✓ 3 x Compactors for Mankweng and Sebayeng.

7.7.12 IMPLEMENTATION OF BY-LAW

- Compliance monitoring of the By-Laws will also need to be implemented.
- The By-Laws put in place the necessary institutional and legal frame works.
- A critical component to the implementation of the IWMP is the supporting legal framework and budget.
- Law enforcement IS A CHALLENGE- lack of personnel.
- Issuing of fines and impounding of vehicles to be investigated.
- Fines imposed to be reflected in municipal billing to be investigated.

7.8 Challenges for cleanliness of the City

- Attitudes on Littering and illegal dumping by general public – only two officials allocated to deal with this anomaly.
- Down town untidy due to uncontrolled hawkers, car washers, illegal mechanics, job seekers, street kids sleeping in the city streets and illegal occupations.
- Contributing factors include mainly lack of adequate pole and pavement bins.
- Stakeholders that must be involved: Environment, Roads & LED SBUs, Law Enforcement, Ward Councillors.
- Illegal dumping-building rubble on open spaces & general waste in rural areas
- Lack of support for Ward by the public during cleaning campaigns.
- Lack of adequate personnel (aging staff, budget constraints to fill vacant positions timeously).
- Removal of planted no-illegal dumping boards for selling scrap yards for cash.
- Long turn-around time for repairs of trucks and aging fleet to render an effective service, e.g., cleaning of communal skip containers especially in rural areas.
- Weltevreden landfill site is remaining with only 1year lifespan and the process of extension is very slow.

7.8.1 Designation of Waste Management Officer

The City of Polokwane has designated Waste Management officer that is located under the Waste Management SBU.

7.8.2 South African Waste Information System (SAWIS) reporting

The City of Polokwane is timeously reporting on SAWIS portal as required by the Act. (**Waste Information System**).

The South African Waste Information System (SAWIS) developed by the Department of Environmental Affairs (DEA) in 2005, is a system used by government and industry to capture routine data on the tonnages of waste generated, recycled and disposed of in South Africa on a monthly and annual basis.

Publicly available reports generated from SAWIS are available through SAWIC 'Waste in South Africa. The Waste Information Centre provides the public, business, industry and government with access to information on the management of waste in South Africa. The Centre also provides users with access to the South African Waste Information System (SAWIS).

7.9. Designation of Waste Management Officer

Designation of Waste Management Officer

- a) Does the City of Polokwane have a Designation of Waste Management Officer?
- **Yes, the City of Polokwane have a Designation of Waste Management Officer**
- b) **If No** -why has the City not appointed the Designation of Waste Management Officer - (Elaborate more on the Plans to Rectify this).
- **N/A**
- c) **If Yes** -How many officers are Designated as Waste Management Officer?
- **1 X Designated as Waste Management Officer.**
- d) When were they appointed by Who?
- **Designated as Waste Management Officer Was appointed by the EXECUTIVE MAYOR on the 18 September 2015.**
- e) List the Names and Positions of the Designated Waste Management Officer at the City of Polokwane.
- **Mr Phineas Tjikana: Manager Waste Management**
- f) What are the **Duties and Responsibilities** of the Designated Waste Management Officer?
- **Implementation of IWMP as required by the Waste Act**
 - **Implementation of Council Polices and and By –Laws**
 - **Financial planning and management of the unit and budgeting**
 - **Project conception, implementation, and management**
 - **Liaise with internal and external stakeholders.**
 - **Coordinate and implement performance management system within the department.**
- g) Elaborate on the **Challenges and Corrective** Actions Faced by Designated Waste Management Officer.

Challenges

- Lack of adequate of personnel eg Awareness and education officers, operators of trucks, general workers for loading bins, supervisors to ensure that the work is done and completed according to service level standards
- Lack of adequate equipment eg, compactors, Grab trucks, Tipper trucks and FEL for clearing illegal dumpings and Load luggers.
- Lack of adequate equipment such as skip containers, 240 litre bins, pavement bins and No Dumping Boards.
- Growing and unabated illegal dumping in rural areas as well

Proposed solutions

- Adequate budgeting annually to acquire adequate personnel, equipment and trucks to render an effective and efficient waste management service to the community.
- Councillors to assist with education about best waste management practices in their constituencies.

Waste management

Waste management is one of the critical services rendered by municipalities. The availability and/or unavailability of this service have a direct impact on the quality of life of citizens, their health as well as the degradation of physical environment.

Waste management embraces "prevention, generation, characterization, monitoring, treatment, handling, recycling and residual disposition of solid wastes at the approved landfill sites. There are various types of solid waste that include municipal (residential, institutional, commercial), agricultural, and special (health care, household hazardous wastes, sewage sludge). Functions relating to waste management include:

- Awareness and education to change the attitude of the public.
- Waste minimization (reduce, re use and recycle) The 3 Rs.
- Waste generation, storage, collection and transportation.
- Waste treatment where waste is hazardous.
- Landfill disposal sites of waste
- Environmental negative impacts considerations
- Financial and marketing aspects
- Research, Policy and regulation
- Education, awareness and training
- Planning and implementation

Polokwane Municipality is able to handle this function satisfactorily as there is a full-fledged unit established to focus on waste management. Waste collection is currently rendered in the city, Seshego, Mankweng, and Sebayeng Townships from **103 776 HH**. Municipal trucks collect waste **once a week** at residential areas/suburbs/Townships and **daily** at businesses and industrial areas). A Plan is underway to roll out this full service to rural areas as contained in the IWMP. At the moment, **53 rural villages** receive weekly waste collection service. EPWP litter picking is being done in all wards but not all villages, the challenges being equipment and personnel. All collected wastes are transported to Weltevreden and Aganang municipal Landfill sites, which are both licensed. The Aganang landfill site receive waste mainly from Moletjie and Aganang clusters.

Currently in the Aganang Clusters, Waste Removal Services is Rendered in the following areas i.e.

- 1) **knobel hospital**
- 2) **Post office**
- 3) **Mashashane crossing.**
- 4) **Maphepha centre**
- 5) **SASSA**
- 6) **Matlala police station**
- 7) **the local market and**
- 8) **Tibane shopping centre.**
- 9) **Kgabo park**
- 10) **Vlakfontein**

Furthermore, street cleaning is also rendered in in all wards through Expanded Public Works Programme (EPWP) and all the waste collected is now transported for final disposal at Weltevreden and Aganang landfill sites.

7.9.1 Integrated Waste Management Plan (IWMP)

The City of Polokwane has developed and adopted an IWMP which embraces the concept of waste Management Hierarchy as follows:

- Waste Avoidance or prevention
- Waste Minimisation-reduce, reuse & recycle.
- Waste treatment
- Waste disposal

Integrated Waste Management Planning (**IWMP**) is a basic requirement for all municipalities as stipulated in the **National Environmental Management: Waste Act, 2008 (Act No. 59 of 2008)** (NEMWA). The Waste Act requires that the IWMP must be adopted for a period of five years and reviewed every five years as well. The primary objective of IWMP is to integrate and optimise waste management planning in order to maximise efficiency and minimise the associated environmental impacts and financial costs, and to improve the quality of life for all South Africans.

The National Waste Management Strategy provides a set of goals that municipalities must achieve in order to give effect to the Waste Act. It contains an action plan with various targets to be achieved by municipalities.

Polokwane IWMP not yet endorsed by MEC of LEDET

Polokwane IWMP not yet endorsed by MEC of LEDET

- a) What are the Plans to ensure that Polokwane **IWMP** is endorsed by MEC of LEDET?
 - **Polokwane municipality to review the current approved IWMP (2017), including performance thereof and submit to MEC LEDET.**

7.9.2 Recycling and Recovery of Waste

Polokwane Municipality IWMP Goal is to promote recycling and the recovery of waste; in a tabular format and this would be represented as follows:

Table: Promote Recycling and Recovery of Waste

Immediate goals	Short term goals	Medium term goals	Long term goals
Establish mechanisms for promoting separation at source (develop waste minimisation plan with clear programmes, project, budget and timelines for implementation.	Roll out separation at source to 30 % of households	Roll out separation at source to 70 % of households	100% households receiving separation at source
Conduct a feasibility study to determine whether there is a need to establish buy back centres	Develop plans to establish buy back centres	Buy back centres established	Utilization of buy back centres.
Develop a composting strategy/plan to divert garden waste from landfill sites	Establish a compost recycling plant	Compost recycling plant fully operational and is operated in a sustainable manner	

Source: PLK Waste Management SBU

7.9.3 Refuse Removal Trends

Table: Refuse Removal

Municipality	Removed by local authority/ Private company			Communal refuse dumps			No rubbish disposal		
	2018	2019	2020	2018	2019	2020	2018	2019	2020
Households	43.08*	43.332%	43.4%	56.92%	56.67%	56.6%	56.92%	56.67%	56.6%

Source: Stats, S.A,

There is an improvement in areas that had no service at all since 2017. As indicated earlier, the unavailability of such a service has a direct impact on the health of the citizen as well as the physical environment. A high number **56.6%** of households in rural areas still use

communal dumps in comparison of households with access to refuse removed by local authority/private company of **43.4%**.

Currently, only City / Seshego and Mankweng / Sebayeng clusters have conventional waste management services in place. There are now two landfill sites licensed and two transfer stations in the CBD area. In the **Mankweng/Sebayeng** there is one transfer station. There are three rural transfer station at **Makgaga, Vaalkop, Dikgale and Makotopong** that were completed and operational.

Planning of Westernburg and Seshego transfer stations is completed and budgeted on the outer years of 2203/4 for construction. Additional budget for rural transfer stations on the MTREF capital budget is required for transfer stations at **Maja/Chuene, Aganang cluster to take the service close to the residences**. Ladanna transfer station is without paving, proper retention walls and ramping. There is also a need to budget for it in order to comply fully to Norms and Standards for construction of transfer stations.

The bulk of rural areas normally do not have conventional waste management methods, illegal dumping characterised these areas without such services. A certain level of Rural Waste Collection service under the EPWP incentive Grant is undertaken in all **wards** municipal wide. The employees render litter picking service three days per week and the waste is collected by waste municipal trucks and disposed of at the two landfill sites.

One more rural transfer station is budgeted for on the MTREF namely Molepo for 2022/3. It is therefore important for the municipality to develop and implement a municipal-wide waste management plan in rural areas with clear sustainable service levels (IWMP). In order to promote the notion of waste recycling, DEA constructed and donated the **Mankweng Buy back centre** to Polokwane Municipality and the municipality is in the process of appointing a new service provider after the old one has expired.

According to the IWMP there are additional Buy back centres that must be established in rural areas as well to support and promote waste minimisation in those areas. Waste recycling should also be introduced in all rural transfer stations in order to intensity recycling and create basic job opportunities.

7.9.4 Licensed Landfill Sites

The City of Polokwane has **X 2 licensed landfill**, both fully operational namely, Weltevreden and Aganang landfill sites. The municipality also has **7 transfer stations in total**:

- 7 x permitted.
- 1 x ROD (Record of Decision) for Mankweng transfer station but not permitted, New plans were drawn to finalise the licensing thereof.

7.9.5 Waste Management Challenges

Challenges	Measures to address challenges
<ul style="list-style-type: none"> • Lack of adequate trucks and long turn-around time for repairs to render effective service in rural areas, illegal dumping and industrial cleaning resulting in over usage of overtime. • Weltevreden landfill site is remaining with only one years' lifespan. • Landfill site does not charge disposal fee currently 	<ul style="list-style-type: none"> ▪ Purchase of adequate trucks, compactors, tipper trucks and ROROS to render effective and efficient service in the urban and rural areas. ▪ Repairs of waste trucks to prioritised as there are no relief trucks during breakdowns. ▪ The feasibility study of the landfill site was completed, and the licensing process is still going on. ▪ Implementation of waste disposal charges at the landfill sites to be re-introduced to argument revenue
<ul style="list-style-type: none"> • Shortage of personnel for refuse removal. Some staff members are old and sickly and on light duty resulting in over usage of temporary workers on waste collection and transfer stations as well 	<ul style="list-style-type: none"> • Continuous budgeting and filling of vacant positions is imperative especially operators, labourers, supervisors and Awareness and education officers to enhance efficient service delivery
<ul style="list-style-type: none"> • There is no full refuse removal service in rural areas only 53 villages receive weekly service. • There are no transfer stations in all clusters.eg Maja/Chuene, Mashashane and Matlala areas. • Ladanna transfer station upgraded with walling around, water connection and guard house. The working area is not paved, ramp and retention are also dilapidated. • There are no transfer stations at Westernburg and Seshego resulting in lots of illegal dumping. 	<ul style="list-style-type: none"> • Construction of rural transfer station is currently underway at Ga Molepo with capital budget of R 5 000 000. There is a need to budget for additional transfer station at Westernburg, Seshego and other rural clusters. • A waste minimisation strategy /plan with clear programmes and projects with timelines to be finalised and implemented

Challenges	Measures to address challenges
<ul style="list-style-type: none"> The municipal area is characterised by lot of illegal dumping from building rubble due to inadequate awareness and education officers and inadequate law enforcement. Down town is untidy due to illegal activities by hawkers, illegal outdoor advertising, car washers, illegal mechanics, street kids, job seekers who sleep in the streets on municipal properties. Lack of adequate street pavement bins in the CBD 	<ul style="list-style-type: none"> All budgeted positions of senior superintendent, operators, supervisors, awareness and education officers to be advertised and filled. Outsourcing of litter picking in the City, Seshego, Mankweng and Sebayeng. A pilot outsourcing using cooperatives to be undertaken first in the City. Working together with other SBUs to control all illegal activities (Housing SBU) and the sweeping of sand in the CBD (Roads and Storm Water SBU) Waste awareness and education plan compiled and awaiting approval
<ul style="list-style-type: none"> Mankweng illegal dumping area is licensed for closure but without budget for rehabilitation 	<ul style="list-style-type: none"> Mankweng pit to be budgeted for closure and rehabilitation as it continues creating pollution of the environment.

7.9.6 Waste Management Status Quo

	ACTIVITY	PROGRESS
1.	IWMP	The approved IWMP to be reviewed after five years, which will be October 2022
	By-Law	By-Law approved by Council and is now gazetted. The fines and penalties are also approved already by the Chief Magistrate
2.	Waste collection in rural areas	EPWP litter picking, and collection is being done in all 45 wards. 53 villages are currently receiving weekly waste collection service and there is a need to extend to other villages in all wards. Additional acquisition of trucks and personnel will ensure that the service is rolled out to other villages

	ACTIVITY	PROGRESS
3	Plan\program on waste collection in the City, Seshego, Mankweng and Sebayeng	A schedule on waste collection is in place and it also guides the placement of personnel and allocation of trucks
4.	Weltevreden landfill site	<ul style="list-style-type: none"> • Cashier house is completed, and the landfill site has been classified as a high-risk area to collect cash at the site instead rates and taxes accounts of end users will be debited, including the use of coupons and other smart options. • Landfill external auditing is continuing and being done every year. • Feasibility study to extend has been completed and busy with licensing process
6	6 and 9 M ³ skip containers for rural transfer stations.	To appoint a three-year service provider to supply and deliver skip containers for rural areas. The allocated budget is not adequate to make inroads in rural areas
7.	Aganang landfill site	The site is completed and commenced operating on 1 July 2021
8	Upgrading of Ladanna transfer station	Construction of ablution facilities, sewer and water connections have been completed and functional. Outstanding items of paving, retention wall and ramping to be budgeted for.

Source: PLK Waste Management SBU

7.9.7 Waste Collection in Rural Areas

EPWP litter picking will be done in all **45 wards** with a total budget of R 2 520 000 for the first six months and the remaining months with CRR budget. Approval and implementation of rural waste strategy is part of IWMP.

7.10 Waste Management Services Status Quo

7.10.1 Status Quo on Rendered Services

NO	TYPE OF SERVICES	PLACES RENDERED	FREQUENCY	Transport Mode
1.	Residential kerb side collection	City, Seshego, Mankweng and Sebayeng	Once a week	In house compactors
2.	Businesses	Mankweng and Sebayeng	Daily	3 in house compactors
3.	Street sweeping and litter picking	City, Seshego, Mankweng and Sebayeng	Daily and week days only	2 x outsourced sweepers and 1 X 19 M ³ compactor truck. 210 x temporary employees for manual litter picking
3.	Industrial areas and communal skip containers	City, Seshego, Mankweng and Sebayeng	Daily and when necessary	In house Load luggers, Grab trucks and ROROS. 2 x Grabs adhoc rental
4.	Transfer stations and illegal dumping	City, Seshego, Mankweng, Sebayeng and rural areas	Daily and when necessary	In house tippers & TLB and ROROS
5.	Rural villages and EPWP	Villages in all rural wards	Once a week	In house compactor trucks and 4-ton trucks

7.10.7 Plan to improve Cleanliness of the City CBD

- a) Intensify supervision of litter picking in the CBD by rotating the limited Assisting supervisors.
- b) Re-arrange the current cleaning program in the CBD by grouping all the litter pickers to clean in the morning and afternoons while there less congestion, during the day to be taken to concentrate on hot spots areas during peak periods.
- c) Ensuring that the list of hot spots such as taxi ranks, bus stops and hawker's areas are marked or ticked daily by supervisors to make sure they have been attending to adequately.
- d) To ensure that skip containers are cleaned daily and twice at hot spots areas, such as, De Hoek, Dahl Street, Biccard street and Oriental Plaza/Indian Centre by the contractor.
- e) To coordinate with Law Enforcement SBU to issue notices and fines to transgressors since the waste By-Law has been approved and gazzeted
- f) To ensure Awareness and Education to businesses, hawkers and taxi areas is done and flyers in this regarded distributed to all in the CBD.
- g) To ensure that night shift street sweeper contractor is effective by allocation of a supervisor at night on alternating shift basis for three hours utilizing overtime.
- h) **Remove old damaged and defaced pavement bins** and replace them where necessary.

7.10.8 Waste Management Challenges and Intervention

- a) The previously decreased number of litter pickers will be increased to original quantities in order to improve cleanliness in the CBD and other areas.
- b) Certain number of temporary litter pickers are allocated to trucks because of shortage of permanent staff for loading of bins. There are 10 x temporary laborer's positions which were advertised in the second quarter, and they are filled as yet.
- c) Congestion and littering caused by car washers, hawkers and people sleeping on streets.
- d) Displacement and damage of refuse containers by vagrants, job seekers and street kids.
- e) The operations of multidisciplinary By-law enforcement task team will be intensified to prevail over these challenges on a continuous basis in relation to 2.3 and 2.4 above.
- f) Shortage of Awareness and Education officers. The whole municipality is manned with **one officer** instead of six. In addition to filling of the vacant positions, Ward

Committees who head Waste Management desks and Councilors to oriented on basic education and awareness during their community meetings so that they can play a key role in combating unhygienic throughout the municipal area. LEDET and Municipal Communication to be partners in this initiative.

7.10.9 Management of illegal Dumping in the City, Seshego and Westernburg

7.10.10 General Method of Dealing with Illegal Dumping

- Cleaning by TLB and Tipper trucks as per drawn program.
- Manual litter picking utilising EPWP urban cleaners.
- Awareness and education and law enforcement
- Planting of No Dumping Boards.
- Illegal dumping sites are cleaned on weekly basis.

7.10.11 Challenges in addressing illegal dumping problem.

- Lack of adequate equipment. E.g., Only one set of 1 X TLB and 2 x Tipper trucks per cluster
- Regular break downs with long turnaround time for repairs of the fleet
- Continued unabated illegal dumping of building rubble by unscrupulous developers especially at night.
- Transplanting/stealing of No Dumping Boards and being sold at scrap yards by street kids and job seekers for cash.
- Despite weekly house to house waste collection, communities continue to dispose waste at open spaces and corners of streets.
- Lack of transfer stations at Seshego, Westernburg and other areas. Those available are far apart and not accessible to other villages.

7.10.12 Progress Report on 2021/22 Waste Management Capital Projects

NO	PROJECT NAME	WARD NO	BUDGET	PROGRESS / STATUS QUO
1.	Extension of landfill site	Ward 20	1 000 000	Licensing process not finalized yet to enable the commencement with designing and construction of the project Consultant for designing and construction supervision appointed
2.	Seshego transfer station	Ward 8	906 098	Planning and designs completed
3.	Westenburg transfer station	Ward 11	556 098	Planning and designs completed

Source: PLK Waste Management SBU

7.11 By-Law Enforcement & SECURITY

The Municipality has an obligation in terms of Sect 152 (1) of the Constitution of the Republic of South Africa, 108 of 1996, to promote safety and healthy environment; and to encourage the involvement of communities and community organisations in the matters of local government. These objectives are achieved through constant crime prevention operations with other Law Enforcement Agencies. The SBU is sub-divided into the following three (3) sub-units:

1. **By-Law Enforcement**

The sub-unit provides the following services within the municipality:

- Enforcement of municipal by-laws
- Conduct crime prevention operations with other law enforcement agencies.
- Conduct crime awareness campaigns.
- Provide VIP Protection.
- Investigation of internal crime/incident cases
- Participate in the Community Policing and Community Safety Forums within the communities,

2. **Asset Protection**

The sub-unit renders the following services:

- Provide 24/7 security services to protect municipal properties, assets and employees,
- Conduct crime awareness to municipal employees and contractors operating with the municipality.
- Pre-Employment Screening and vetting of municipal employees and private companies rendering service to Polokwane Municipality with the assistance of SAPS and State Security Agencies.
- Conduct security inspections, risk assessments and surveys at municipal premises.
- Facilitate Technical Surveillance Counter Measure at critical premises.

3. Emergency Control Centre

- Provide 24/7 emergency control centre services.
- Provide technical access control and support of automated access into municipal buildings (e.g., motorized gates, card reader automated access control system, biometric access control system, walkthrough metal and parcel scanner).
- Provision, maintain and monitor CCTV Surveillance camera networks and IP related equipment.
- Manage emergency calls and complaint logging systems.

7.11.1 Challenges and the intervention Within the SBU

The table below illustrates the challenges and the interventions to address them.

Challenges	Interventions to address these challenges.
1. Shortage of resources (staff, equipment and funding).	- Fill all budgeted vacant posts and to request adequate budget for Security equipment
2. Lack of SBU Capacity (Law Enforcement Officers appointed as 5-day workers; and in the event of illegal land invasions, community protests and other incidents that happen after hours require the same 5 day workers to respond; and this impacts negatively on overtime budget).	- HR to advice and facilitate the process of ensuring 24-hour service for Law Enforcement Officers

Challenges	Interventions to address these challenges.
3. Insufficient Budget for the procurement of new and the replacement of CCTV cameras; and Access control systems; repairs and maintenance	- To request budget for the procurement of new and for the replacement of aged CCTV Cameras and Access Control Systems in the coming financial years.
4. Lack of human capacity on CCTV and Access Control system repairs and maintenance.	- To fast-track the appointment of technicians for control centre.
5. Insufficient office space for By-Law Enforcement & Security SBU	- To secure dedicated office space for the entire SBU
6. Huge amount of money spent on guarding services.	- To look for alternative best practice module and technology to reduce the spending on physical security.
7. Lack of specialised vehicles (armoured/Nyala) for crowd control	- To request for the procurement of armoured/Nyala vehicles
8. Increased vandalism and theft of municipal infrastructure (cable theft and vandalism of municipal infrastructure).	- Temporary deployment of law enforcement officers to patrol electrical infrastructure during the night (till additional officers to work 24/7 are employed).
9. Increased vagrants sleeping in the streets in the CBD.	- To engage relevant Government Sectors for interventions (psycho-support and accommodation).
10. The increased hair braiders and illegal street traders	- Employment of additional Law Enforcement Officers to augment and intensify police visibility and the enforcement of illegal street traders and hair braiders.

Source: PLK By-Law Enforcement & Security SBU

7.12 CALL CENTRE STATUS QUO

The call center had challenges with the telephone system which was not effectively distributing calls to various service delivery SBU's for reporting of service delivery complaints and emergency response. IT SBU has intervened on the matter and now the telephone system is able to guide callers to select an option for service delivery SBU's for reporting of their complaints, namely: Traffic accidents, fire, waste, accounts, water, electricity, roads, licensing, etc.

The other challenge is some members of the public who prefer not to use Control Centre reporting protocol rather prefer to call municipal officials or councilors directly, which render the Control Center redundant. In addressing this challenge, Municipal Communications has

issued notice to address the matter. However, it is acknowledged that if the Control Centre is not functioning properly, members of the public will face frustrations and opt for alternative means of reporting, hence calling municipal officials or councilors.

7.12 .1 Crime awareness at school

7.12.2 Re-launch of community safety forum and crime awareness

7.12.3 Joint Crime Prevention Operation (search for expired goods in businesses)

7.13 DISASTER MANAGEMENT AND FIRE SERVICES

7.13.1 Fire Services Status Quo

Polokwane Fire Services cover the Municipal area of jurisdiction with three Fire Stations that are manned 24 hours 7 days a week. There are many Major Hazardous Installations within the area of jurisdiction and specialised institutions. The municipality has grown geographically and has widen the scope of responses required on the services. Fire Services have limited staff complement to attend incidents and ensure fire prevention across the municipality. This limits the capacity of the service to conduct law enforcement, Inspections, implement fire safety legislations, By-laws, Fire investigation reports, building plans, new development plans, Flammable liquids and Hazardous substances as required in terms of Fire Brigade Services Act.

7.13.2 Polokwane Main Fire Stations

There are **three** existing Fire Stations in the jurisdiction of the municipality, namely:

- 1) **Main Fire Station in Laboria, Polokwane,**
- 2) **Satellite Fire Station at the Civil Airfield, Silicon Road and**
- 3) **Mankweng Fire Station.**

Clusters outside the city and Mankweng do not have Fire Stations. Areas like Moletji, Aganang, Matlala, Mashashane, Maja Chuene Molepo and Sebayeng clusters do not have Fire Sub Stations. There is no budget allocated to build stations in order to render the service. There is a need to allocate sufficient budget to build the Substations in those clusters.

7.13.3 Challenges of Fires Services Unit:

The amalgamation of part of Aganang in the former Polokwane Municipality has made the demographic area to be serviced too big to respond. This has made response time more difficult to be met in line with required standard. Fire Services vehicles are too old to be relied on and are not coping to the high rate of calls in the municipality.

The lifesaving equipment which are being used are also old and obsolete. At the same time, some of the equipment are insufficient and cannot be relied on during for firefighting and rescue incidents. The equipment does not have budget allocation to repair and maintain if they are broken. They are being are over used. lack of maintenance for existing infrastructure and facilities is adding to the problem of dilapidation. Limited budgetary constraints negatively affect service delivery and capital projects allocations.

The municipality is developing at a faster pace and that requires lot of inspections and approval of fire safety components. Serious staff shortages in strategic positions specifically in the Fire Safety Section where the workload has tripled, and the staff component shrunk. Appointment of additional adequately qualified instructors at both Fire Safety and Operations Section. Filling of vacated positions is imminent to address the shortage.

The Fire Safety component is seriously lagging behind in the execution of its duties. There is a very serious need for adequately qualified staff. The workload is ever increasing, and the present staff compliment just cannot cope with it. Building inspections as well law enforcement (including newly promulgated by-laws) is being done with limited staff available in the section. Shortage of staff has impact on the amount of law enforcement to be done and as such the risk of fire and illegal activities will continue unabated including the enforcement and National Veldt and Forest Fire Act of 1998.

Lack of water and low water pressure for firefighting is being a dominant challenge to fight fires in the municipality. This is complemented by old and shortage of water tankers and fire engines to supply water to team fire when on fire calls. The problem is further compounded by the use of fire trucks to deliver water to hospitals when there is no water. Under these circumstances water pumps are normally getting broken due to overuse to supply water to those Facilities.

Fire hydrants are burning issue for several years now. They are full of dirty items which break the pumps during the fire incidents. The current fire hydrants require fire hydrants cover to protect them. There is a need to move from up ground and resort to the undercover hydrants. Inadequate staff made it difficult to clean, clearly mark, and report on faulty hydrants.

It is very common now to see fire hydrants and booster connections stuffed with papers and plastics etc., especially in dark nights this will damage pumps and hamper operations. The newly promulgated Fire Emergency By-law compels Fire Services to commit itself to Fire Safety and requires it to carry out specific duties that are putting the Municipality at serious risk. Unsafe or non-compliant buildings in town and rural areas are major problem for the municipality.

However, The SBU is having a project to service and maintain fire extinguishers, fire hydrants, hoses and heels for municipal buildings. This project helps to prolong life span and effective use of these fire suppression equipment.

7.13.4 Accredited Fire-Fighting Course

Fire Training Section has been accredited by SAESI to conduct training as per course accreditation. There is sufficient capacity to conduct accredited fire-fighting training course in the station. These courses are offered to both internal and external moderators. the demand for the course has increased exponentially for the past three years. The section is awaiting approval of additional courses from **LGSETA** to enable the municipality to generate more revenue. The training is doing well and is able to generate revenue to the municipality.

However, the approval of new courses will require additional staff capacity to cope with the demand. The approval of the additional courses must be matched by requisite facility to meet the demand. The budget allocation for the upgrading of the training is very insufficient and cannot assist in planning project in phases. It is also important to finalise Memorandum of Understanding with **GAAL (Polokwane Airport)** or the proposed "**Ike Maphoto Airport**" to comply with the existing aviation laws.

7.13.5 Disaster Management Status Quo

Disaster Management Disaster Management role in terms of the Disaster Management Act (Act 57 of 2002) to ensure that the appropriate prevention, mitigation and disaster response initiatives have been implemented. Disaster Management performs a response coordinating role, ensuring that multi-disciplinary coordination is in place and communication between responding agencies is efficient. The section has conducted awareness campaigns to various business establishments on Covid-19 compliance.

Disaster Management Plan has been developed and adopted by council. The Unit plays a major role in safety and security (JOCCOM) in the municipality particularly during this pandemic. It is permanent stakeholder in Event Safety and Security Planning Committee in all Premier Soccer League games and other major or medium risk events. Both private and public sector are trained on safety issues particularly on evacuation drills or exercises. The Sub Unit offers training to the stakeholders in matters of evacuations. The Sub Unit further participate in National Key Point activities in terms of Critical Infrastructure Act.

It responds to incidents occurring within the jurisdiction of the municipality and offers relief items to victims' disaster incidents supported by SASSA, Capricorn District Municipality Disaster Management Centre and Provincial Disaster Management Centre. Victims of disasters are being referred to Home Affairs and Social Development Departments renew of IDs and psycho social support. The Sub Unit holds Disaster Management Advisory Forum meetings on quarterly to solicit technical advice on matters related to disasters. Coronavirus

pandemic has brought opportunities for development and changes to the human behaviour in terms of ensuring that prevention is better than cure.

7.13.6 Challenges of Disaster Management Unit

Like Fire Services, Disaster Management has limited capacity to respond and have few disaster capabilities to render its services effectively. Lack of resources is limiting the capacity of the Sub Unit to plan and respond quicker to assist the victims. There are insufficient personnel members and limited budget to cater other preventative activities in the municipality. Therefore, additional personnel are required to cater the entire clusters.

There is challenge in terms of budget to execute certain legislative mandate. The staff is not adequately trained on regular basis. Communities in rural areas are allocated residential sites in flood plain areas. The allocation exposed communities to loss of properties and municipal infrastructure.

7.15.3 Polokwane Road Accidents Statistics

The table below depicts yearly accident Statistics recorded within the City of Polokwane Municipality:

Financial Year	Accidents Statistics (Total)
2011/12	2317
2012/13	1704
2013/14	1927
2014/15	1860
2015/16	1004
2016/17	1908
2017/18	1862
2018/19	1942
2019/20	1696
2020/21	2341
2021/22	1995

Source: PLK Traffic and Licences SBU

The above figure highlights only accidents with Minor or no injuries and including minor damages on the affected vehicles. All accidents with fatalities are recorded and captured by The South African Police Services and including investigations thereof.

7.15.4 Traffic and Licences Challenges:

The following are current challenges:

- Offices need structural refurbishments. (Dilapidated)
- Inadequate traffic and licensing facility.
- Licensing services continuously disrupted due to Network.
- Centralized City licensing facility which is unable to cope with the influx.
- Inadequate parking facilities for both customers and employees.
- No waiting area facilities at all licensing stations

- Shortage of personnel.
- Inadequate specialized vehicles.

7.15.5 Measures to address Challenges:

Measures to address challenges:

- Refurbishment of the current facility and including structural expansion.
- Decentralization of services including satellite stations at strategic areas (Rates Hall, clusters and other service points thus accommodating "one stop shop" idea.
- New technological innovations including wireless, etc. thus relieving the current load on the conventional IT system.
- Satellite stations to cater for shorter travelling costs and time.
- Decentralization of Traffic services with licenses thus accommodating law enforcement operations.
- Whilst gearing towards being a Metro Municipality, gradually fund the newly approved positions on the recently approved Organogram thus avoiding pressure of reaching the targeted personnel number required for All services within Metro-Municipality.
- Procure specialized Vehicles such as Law Enforcement Motorbikes, adapted/specially made tow trucks for easy maneuvering during law enforcement operations.
- Decentralization of infrastructural facilities namely Vehicle Test yards, Vehicle pounds and other related at all clusters.

7.16. ENVIRONMENTAL HEALTH

Polokwane Municipality provides environmental health services only for the "City area". The Services in the other areas are done by the Capricorn District Municipality (CDM). There is no service level agreement entered into between the Polokwane Municipality and Capricorn District Municipality as it is a district function. The devolution process is not completed. The relocation of Environmental Health Services to the District Municipality will have a negative impact on Polokwane because of the different work activities and co-operation with other SBUs.

Services rendered are inter alia control and monitor of food premises, food control, food sampling, inspection of schools and pre-schools, inspection of accommodation establishments and air pollution control. The National Health Act 61/2003 sec 34 determine that "until a service level agreement contemplated in sec 32(3) is concluded, municipalities

must continue to provide, within the resources available to them, the health services that they were providing in the year before this act took effect “.

Although the above-mentioned functions are executed, the authorization of Polokwane Municipality has been withdrawn according to Government Notice 37297 of 4 February 2014:

- Section 10(3)(b)-Authorization of Environmental Health Practitioners in writing
- Section 11-Powers, duties and functions of inspectors
- Section 24-Right to prosecute per provision of environmental health services in the municipal area is limited as the available practitioners do not meet set standards. The standards determine that there must be 1 x EHP per 15 000 populations. Currently there is a shortfall of 12 of employees compared to the standards to cover the whole population.

7.16.1. Polokwane Environmental Health

Polokwane Municipality Environmental Health is conducting awareness campaign and health education to Communities in Polokwane. The following are our activities:

Food premises:

Monitoring of sanitization and wearing of masks.

Monitoring compliance with the social distancing regulations.

Monitoring compliance with the limited number of people (not more than **50** at one given time) depending on the Lockdown level we are at.

Funerals:

- Giving health education to families with positive cases.
- Monitoring of keeping of social distances at the graveyard.
- Ensuring sanitization at the household.

Contact tracing:

- We conduct the tracing of contacts of COVID-19 Positive cases.

Churches:

- Conduct health education or awareness campaigns.
- Monitoring of keeping of social distances, sanitization of hands, wearing of masks.

- Ensuring full compliance with the regulations.

Place of instruction:

- Monitoring and ensuring compliance with the regulation at schools and pre-schools (sanitization; wearing of masks and keeping of social distancing).

Complaints:

- Responding to non-compliance complaints.

Hospitals:

- Monitoring of handling of human remains at the hospitals.

Funeral undertakers:

- Giving health education to funeral undertakers on the pandemic.
- Inspection and monitoring compliance at the funeral undertaker's facilities.

7.17 SPORTS AND RECREATION ANALYSIS

Sports and Recreation has the potential to serve as a tool for development as well as catalyst for social and personal change. It is also worth noting that sport and recreation builds stronger, healthier, happier and safer communities, a vehicle for positive social change. The priority of the municipality is to enhance participation in Sport and Recreation activities which include hosting of municipal, district, provincial, international Sports and Recreation events. The municipality also assist sport structures with the aim of attracting major events that will market the City as sporting hub and that have an impact on the local economy. The focus continues to be provision of sport equipment and grading of rural sport facilities, conducting sport and recreation programmes and maintenance of existing infrastructure.

Sports is used in promotion and marketing of Polokwane through presenting major events in order to establish Polokwane as the sport hub of the Limpopo Province. The municipality continues to provide a marketing platform for the City through the hosting of the national sporting activities such as the premier league matches. The national event attracts TV coverage beyond the borders of the country, giving a glimpse into the sporting facilities that exist within our city.

The municipality has hosted other events that have directly benefitted the communities within the municipality such as the **Indigenous and Golden Games, the Mayoral Cluster Races, and the Mayoral Road Race**. Polokwane Mayoral Marathon has been classified as Comrade Marathon qualifier.

Currently Sports and Recreation also coordinates programmes that are aimed at raising funds for charity and providing bursaries for needy community members by hosting the Mayoral Charity Golf day and the Annual Road Race. Through partnership with the sponsors, the municipality continue to raise monies in order to fund needy students from Polokwane. There is hoped to continue amassing sponsorship that would make it possible to spread beneficiation

to a far greater audience than what is being reached at the moment. The partnerships with professional football clubs have provided the City with opportunities to contribute towards local economic development in that premier league matches played at the New Peter Mokaba Stadium contributes to local retail and hospitality establishments enhancing their revenue generation.

The municipality continuously promotes sport by hosting municipal cluster marathons, indigenous and golden games. These are hosted at ward to cluster level and finally municipal level. Holiday programmes are presented to the community during the school holidays to ensure that children who are on holiday spend quality time.

Polokwane Municipality has launched a programme that is Polokwane Mayoral Football and Netball tournament, which is running from ward, cluster and lastly at the municipal level. The main aim is to enhance talent identification while promoting Sport in the municipality. Polokwane Municipality will continue to strive to be a winning team in promoting Social Cohesion. The municipality continues to fulfil the constitutional mandate of social cohesion by actively maintaining facilities and bringing major events to such through the Directorate Community Services.

These events not only give access to the multitude of participants, but they generally contribute to economic growth of the City. Events and facilities are deliberately used to empower disadvantaged communities and individuals, providing them access to schooling, recreational activities as well. The notion of Sport and Tourism should be looked at quite seriously and deliberate programmes to be packaged in conjunction with other relevant stakeholders in the Economic cluster. The hosting of national and international games should provide an impetus to investors and role players in the hospitality and tourism sector to want to partner more and more as such programme would be proving to be catalysts for the business growths.

Polokwane Municipality also conduct skills development and capacity building workshops through federations for various sporting codes.

7.17.1 Municipal Swimming Pools

Municipality has several Swimming Pools within its area. ie City **CBD** Swimming Pool, **Seshego** Swimming Pool, **Westernburg** Swimming Pool
Municipal Swimming Pools

7.17.2 New Peter Mokaba Stadium

Figure: New Peter Mokaba Stadium

Source: PLK Sports SBU

The new Peter **Mokaba Stadium** is one of the five stadiums that was constructed to host the 2010 FIFA World Cup in South Africa. It was built next to the old Peter Mokaba Stadium and is currently being used for all types of events over and above Soccer, Rugby and meetings. Already the venue is popular for school tours, hosting of lifestyle activities and offices.

Peter Mokaba Stadium holds much historical significance in South Africa. It was named after one of the renowned sons of the struggle and emancipation of South Africa against the apartheid regime. **Peter Mokaba** was born and bred in Polokwane and was renowned for his fighting spirit and for his inspirational leadership.

Although the Peter Mokaba Stadium was built with a capacity for **45 000** spectators, this was reduced to **41 700** for the World Cup. Interestingly, the stadium's design was inspired by the **baobab tree**, which is often said to look like it is upside down, with its roots emerging out of the ground and reaching for the sky. The stadium's steel structure gathers together at each corner of the stadium and is supported by structures that resemble massive tree trunks.

There is a VIP area that accommodates up to **500 VIPs**, a VIP reception area and lounge, as well as offices and storage areas. The stadium is less than five kilometres from the City centre of Polokwane. This area boasts a number of other sights and activities, including the Polokwane Museum, Polokwane Bird and Reptile Park.

A number of major events have been hosted at the two venues, including Rugby matches, weddings, conferences, political rallies, IEC centre during elections, religious gatherings and meetings.

7.17.3 Two Premier Soccer League Teams Hosted at the new and old Peter Mokaba Stadium

The new and old Peter Mokaba Stadium host two Premier Soccer League teams in the Limpopo Province, namely **Marumo Gallants FC** and **Sekhukhune United FC**.

7.17.5 Horticultural Services

Horticultural Sub-SBU render services to all sport facilities (sport fields, community halls, swimming pools, showground and shooting ranges) at all cluster of Polokwane Municipality. Horticultural services include landscaping, pitch maintenance and refuse removal especially in City, Seshego and Mankweng clusters. Grass cutting (turf grass and wild grass) and tree felling is done to all facilities that falls under sport and recreation SBU.

Marking of soccer, rugby, softball, athletics, cricket and other sporting codes including all indigenous games is done within the SBU. Rolling of cricket pitch and preparation of all types of events that are hosted in our facilities is also a responsibility of horticultural service team.

7.17.6 Sport and Recreational Facilities

Polokwane Municipality is also responsible for managing sport and recreation facilities which are leased out on long- and short-term basis bringing in revenue and ensures that the maintenance of such facilities is done in terms of council policies and used in terms of Sport and Recreation Act 2, of 2010, for hosting of events.

Various outdoor and indoor sports and recreation facilities including community halls that are used for professional and leisure activities. The indoor facilities include **Jack Botes Hall** which host meetings, weddings, funerals, music concerts and legislature sittings. **Ngoako Ramathodi indoor centre** which hosts activities like indoor soccer, netball, basketball, volleyball, karate and also serves as a community hall for hosting of music events, community meetings and funerals. The Polokwane Indoor recreation centre caters for activity such as gymnastics, badminton, squash, kickboxing and a gymnasium (Virgin active).

Outdoor facilities include Golf club, Cricket, Tennis, Korfball, Jukskei, shooting range, Motorsport, 4X4 Motor Vehicle Track, Close Circuit Motorcycle track, Model Flying Aeroplanes, Rugby, Softball, Bowling, Soccer. The **Old Peter Mokaba stadium** remains the only facility in the province that complies to host national and international athletics events. The municipality also has various facilities with all-weather surfaces and artificial grass surfaces which ensures that sports and recreation activities can be played under various conditions.

7.18 New International Softball Stadium in Polokwane

7.18.1 Profile information on New International Softball Stadium in Polokwane as at (08 September 2022)

1. Background to the project.

The Polokwane Local Municipality has been identified as the home of softball. Polokwane Local Municipality is one of the Municipalities benefitting from the Ring-Fenced MIG (UIDG) Sport Allocation to the total amount of R85 m in three (3) financial years. The planning of the project commenced during the 2019/20FY, where Polokwane Municipality was allocated an amount R 25 000 000.00. However due delays caused by the National Lockdown announced in March 2020, the finalization of the Procurement process was delayed. Construction of the project commenced during 2020/21FY. The contractor has since commenced.

Polokwane Local Municipality has been allocated an amount of R 85 000 000.00. The funding is utilized for the Construction and professional fees of Polokwane Softball in Polokwane city cluster within Polokwane Municipality. The municipality forms part of the Capricorn District Municipality in Limpopo Province. The head office of the municipality is situated in Polokwane.

The project involves the Design, Planning and Construction of an International Softball Stadium in Polokwane. The project consists of design and construction of 3 Softball Fields, a practice field and associated 3500-seater Concrete Grand Stand for field A, steel and timber Grands for fields B and C and associated buildings

The detailed scope of works is as follows:

Associated Facilities & infrastructure for the whole stadium

- Grandstand Building (with facilities for visiting and home teams, administration, media, VIP, storage, ancillary spaces, ramps, staircases, part circulation spaces and ablutions.
- Ablution facilities for all Fields (A, B, C and 2 practice fields) located in the Grand Stand Building
- Electrical, Mechanical and Fire prevention works.
- Sewer collection and reticulation works, water supply and reticulation work.
- Roadworks for entry and exit to site, internal and circulation road works and parking.
- Public plaza works.
- Landscaping to spaces around the Grand Stand, Stand B and the public plaza.
- Secured Kids Play Area

Main Field A

- Field A Grand Stand with roof (3500-seating)
- Field A, 6260m² (International Standard) with netting and safety requirements as per manual
- Earth Berm (Future seating), Dugouts, Bullpens and batting cages
- Lighting and electronic requirements as per client specification

Field B

- Field B (Area 6260m²) (International Standard)
- Field B Seating Stand (1000 spectators)
- Earth Berm, Steel Structure Pavilion, Bullpens and batting cages
- Lighting and electronic requirements as per client specification
- Field C
- Field C (Area 6260m²) prepared for match standards and conditions.

2 x Practice Fields

- Open grassed area practice field of area 8250m² (75m x 110m).

The Polokwane Municipality has certain financial expenditure obligations to achieve (e.g., expenditure of allocated budgets within the required financial year). The Polokwane Municipality would try by all means to balance out the available budget with the actual expenditure claimed for work done.

2. Status of the project.

The overall progress is at 56% towards completion with the following breakdown:

- Preliminary & General 61%
- Building and Grandstand Works 38%
- Specialist Works-Civil Works 56%
- Specialist Works-Mechanical Works 0.00%
- Specialist Works-Electrical Works 16%

3. Expected completion date.

Construction of the works started **12 December 2020** and was scheduled to be completed by **26 September 2022** (21 Months Duration).

The contractor is behind schedule and a valid extension of time was applied for and granted. Intervention meetings have been held with the Contractor to get a commitment to put in place a catch-up plan. The Contractor has started increasing resources on site as agreed with the Project Team in order to catch up with the programme.

A realistic completion date is revised to **February 2023**.

4. How will the community benefit?

The Integrated Development Plan (IDP) for Polokwane Municipality has also noted the need for recreational facilities and has provided for such a development in the current 5-year plan. The Construction of an International Softball Stadium will attract tourists together with international events like World Olympics and World Cups Games. This will boost the local tourism industry.

5. Expected number of jobs to be created (temporary and permanent).

A cumulative number of local work (unskilled labour) opportunities created to date is **41** at cumulative wages of **R 568 129,12**

6. No of youth to benefit.

28 Youth male, **10** Youth female and **1** person living with a disability have been employed on the construction project.

7. Challenges and possible interventions.

The contractor is behind schedule and a valid extension of time was applied for and granted.

Intervention meetings have been held with the Contractor to get a commitment to put in place a catch-up plan. The Contractor has started increasing resources on site as agreed with the Project Team in order to catch up with the programme and there is a visible improvement.

The contractor has highlighted cash flow challenges due to price escalations on material caused largely by the pandemic. The municipality is assisting with paying for material directly through cession agreement and the contractor has submitted a variation order that is currently under review.

7.18.2 Softball Stadium Concept Designs

7.18.3 Construction of Softball Stadium Progress as at (08 September 2022)

Source: PLK Sports SBU

7.19 SPORTS GROUND GRADING STATUS QUO

Sports and Recreation has one grader for grading of sports ground in all 45 wards. The annual target is to grade 12 sports grounds per ward which equals to 540 for the entire municipal area.

The achievement of the set target is affected by the poor mechanical condition of the grader as it is more often send for repairs and maintenance. Currently it is on a breakdown for about 6 months, and it is waiting for imported part, namely top casket. To continue with the grading services, the grader is borrowed from Roads and Transport over the weekends.

Despite the challenge, grading has been done for 6 clusters and 36 wards with 97 grounds done: For purposes of becoming more efficient in grading sports grounds, a new Grader has to be budgeted for in the next financial year.

CLUSTER	NUMBER	WARDS
1. Mankweng	21 Sports Fields, 3 for each ward	7, 25, 26, 27, 28,30, 34
2. Sebayeng Dikgale	6 Sports Fields, 1 in each ward	06,24,31, 32, 33,29
3. Molepo/Chuene/Maja	10 Sports Fields= 2 in each ward	01, 02, 03, 04, 05
4. Moletjie	28 Sport Fields= 4 in each ward	09, 10,15,16, 18, 35, 36, 38,
5. Seshego	30 Sport Fields = 5 in each ward	11, 12, 13, 14, 17 and 37
6. Aganang	6 Sport Fields = 1 in each ward	40, 41, 42,43,44,45
7. City	5 Sports field for ward 8 only	08, 19,20,21,22,23,39
	Total 106	Total 39 Wards Done

Source: PLK Sports SBU

7.19.1 Sports Field Grading Program

The grading of fields is mainly seasonal and such services are mainly required during the festive season when tournaments are held and during the Easter weekends when such tournaments are continuing to be held in the communities.

Sport and recreation have been allocated 1 grader that is currently out of commission, however the plan has taken into consideration a situation where we have 2 operators and two graders all working in different areas servicing community needs. Essentially a minimum of two graders are required at any given time to become efficient and address the potential for back logs. The plan does not include ad hoc requests.

Sports Field Grading Program

Clusters:	Overall Grounds per cluster:	Grounds per ward:
Sebayeng/Dikgale Cluster (6 wards)	18 Grounds	3
Mankweng Clute (7 wards)	21 Grounds	3
Moletjie Cluster (8 wards)	24 Grounds	3
Molepo/Maja/Chuene Cluster (5 wards)	15 Grounds	3
Aganang Cluster (6 wards)	18 Grounds	3
Seshego Cluster (6 wards)	18 Grounds	3
City Cluster (4 wards)	12 Grounds	3
Overall grounds:	63	

Source: PLK Sports SBU

The above-mentioned grading plan take into consideration raining season and the fact that at times, sports field can be graded twice in a space of two or three months because of heavy rains. During Easter weekends, requests are also ad hoc and are treated on a first come basis and availability of equipment.

The lack of budget to maintain the sport and recreational facilities is a huge risk as most of the facilities are not in compliance with fire and disaster requirements. Sport and Recreation operates over 62 facilities mainly within the city bounds.

7.20 CULTURAL SERVICES

7.20.1 Cultural Services

The provision of cultural services is an important function of Polokwane Municipality in supporting social cohesion and promoting Local Economic Development through thriving cultural industries. The Strategic Business Unit (SBU) Cultural Services is responsible for libraries, museums, heritage and cultural programs – Promotion of Reading (Libraries); Promotion, Management and Conservation of Heritage Resources (Museums) and Presentation of Cultural Programs (Cultural Desk).

7.21 Libraries

7.21.1 Challenges and Interventions for Libraries

The Municipality renders a flagship library service in the CBD (City Library) and operate branch libraries in **Mankweng, Matlala, Moletjie, Nirvana, Seshego and Westernburg**. The Municipality provide library materials on loan to users within the municipal jurisdiction, Polokwane Place of Safety's resource centre, Siloe School for the Blind and three old age homes.

The Provincial Department of Sport, Arts and Culture (DSAC) provided a library at Molepo area which is operated jointly by Polokwane Municipality and DSAC. Part of the Molepo-Chuene-Maja cluster office has been converted for library purposes but is not yet operational.

Source: PLK Cultural Services SBU

Current Services:

The Polokwane Municipal Libraries renders information service to the community and provides reading materials for a variety of purposes, e.g., education and cultural development, self-

improvement and recreation. In order to promote and cultivate a culture of reading, the libraries section actively engages with the community through various “outreach” programs. The following are the core functions:

Provision of information: The Reference & Study section of our libraries are frequented by users from various parts of the province. User groups are tertiary students; secondary school learners doing research for school projects; primary school learners and their parents; persons requiring information to enhance their general knowledge and to improve their personal circumstances.

Books for informal reading: Municipal Libraries provide a variety of materials suitable for informal/leisure reading. One improves his/her reading skills by consistently engaging in reading. The libraries provide books for self-development and cultural development.

Circulation service: Circulation of books remains an integral part of every library’s services. While anybody may read as much as they can free of charge inside our libraries, a borrower of books must enrol as a library member (prescribed rules & subject to payment of the relevant fees) before being allowed to borrow library material for home use.

Provision of study space: Library users need space to study, the environment of such space should be conducive for studies – calling for good lighting levels, good ventilation, etc. The libraries made study areas available to accommodate daily visitors, allowing them the use of all books in the library. This is a growing need in our libraries. There are also requests for after-hours utilisation of study areas – which we try to provide during peak times.

Internet and Wi-Fi: The libraries currently offer a limited number of Internet connections to users to aid learners, students and upcoming entrepreneurs. A connection is free for one hour per day and is sponsored by the “Conditional Grant for Public Libraries” – Free Wi-Fi is limited to the study section of the City Library but covers branch libraries entirely. The **Mzansi Libraries On-line project**, initiated by the National Library of South Africa, promised relief with extra ITC equipment to be provided to some of our libraries. The office of the Premier also provided Free Wi-Fi (LCX Public Wi-Fi), which was discontinued in January 2022.

Technological Aids: To render distribution of information effectively all service points have dependable photocopiers/reprographic resources. Our libraries offer photocopying at cost to users. All our libraries **urgently need the installation** of updated 3M Book theft Detection systems to ensure that patrons borrow books legitimately. This Theft Detector Systems project was budgeted for during the 2021/2022 FY, but due to the inability to appoint a service provider it did not materialize.

Library Outreach and awareness programs: The municipal libraries continuously present holiday programs, conduct outreach to schools to inform learners about libraries, assist in establishing reading clubs and provide library orientation for new user’s /school groups. Municipal libraries support the celebration of National events like South African Library Week (SALW) and National Book Week in order to promote the use of libraries and reading. Our libraries facilitate and host in the annual Executive Mayor’s debating tournament annually.

Challenges:

Vacancies:

The large number of vacancies funded (1) and unfunded (48) have remained unfilled. Positions provided on the organogram but not budgeted for, is detrimental to the upkeep of

service standards. This has a negative effect on staff morale as the current staff feel exploited and overworked.

Grading of library staff:

The current grading of qualified librarians (who holds a four-year degree) on levels lower than posts that require a three-year degree or even only a diploma is a justified complaint amongst library staff. An anomaly is the requirement of a degree for librarians, yet the position of Library Assistant does not require a tertiary qualification other than Matric. This situation must be URGENTLY rectified to normalise this formal situation. Library Assistants must possess at least a national Diploma.

Library hours disputed:

All Polokwane libraries are open to the public beyond ordinary office hours. Summer hours are 08:00 to 16:30 on weekdays, winter hours 08:00 to 16:00 on weekdays. Libraries are not operational on weekends and public holidays. All other Small Business Units within the organization receive overtime remuneration for extra hours and Saturdays' work. While this practice serves community needs, it calls for extended working hours. Library staff are willing to work these hours, but this calls for overtime remuneration or alternative forms of compensation. The current overtime budget will have to be adjusted upwards, should Council agree that library staff be re-classified as five-day workers.

“Absenteeism” due to training, sick leave, maternity leave, study leave:

Budgeting for the compensation of additional and relief staff must be a priority in the municipality.

User fees:

The current policy regarding user fees should be revisited. Statistics on membership numbers (new as well as existing) indicates that our numbers do not meet targets due to the fact that many users prefer to visit the library to do the reading at the library instead of paying for membership which allows the user to use the reading material at home. Benchmarking amongst other municipal libraries indicates that Polokwane remain as one of few municipalities that still impose membership fees. The meagre amount of revenue collected does not justify the risk involved in handling and transporting said income.

Book stock development:

The current book collection can be regarded as stale, outdated and irrelevant. Library book stock needs constant replenishment and updating in order to provide in the informational and educational needs of the community. Every library should have an up to date, well balanced, representative and relevant book collection to give library users the best possible resources that will enable them to excel. Due to escalating publishers' prices our limited budget barely allows for maintenance. Annual funds required to provide books for envisaged new libraries must be appropriated. The proposed annual budget for this purpose must be approximately R2 000 000 to enable the institution to be provide the users with the latest editions of reference works, as opposed to the current allocation of R200 000 or less.

No library expansion program:

Interpretations of the so called “Unfunded Mandate” is hampering the expansion and rendering of library services in Polokwane. Rural areas where people need to travel great distances to reach the nearest library are affected, contributing to poor performance at schools. Areas identified in earlier IDP documents should be prioritized. Alternative forms of accommodation, (for example modular- and container libraries) should be considered for satellite libraries.

The existing City Library's position in the CBD is not ideal for library purposes. No parent will allow his child to face the traffic in order to visit the library for leisure reading. Insufficient

parking makes it even difficult to bring users by car. Transport costs/availability is also a limiting factor for users that use public transport. In addition, the building cannot easily be extended to accommodate the ever-increasing number of users. Council, DSAC and the Province are currently doing feasibility studies for the development of a new city library, as part of a larger “**Cultural Precinct**”.

It is important that in order to guide library development and align it with developmental goals, a library master plan be developed. Such a plan should be aligned with the IDP in order to provide services where communities prioritize the need for library services.

ITC and connectivity:

While Internet access and Wi-Fi can aid library services all remote locations experience various IT related problems, where slowness/lack of bandwidth is hampering service delivery. The allocation of funds for the appointment of unfunded positions of Education Assistants (Internet) must be prioritized. This will propel the library services towards the 2030 smart city vision.

Inter-Governmental Relations:

Limited assistance to fund libraries is being received from the Limpopo Department of Sports Arts and Culture through the “Conditional Grant” allocations. Needs related to books, equipment, ITC, personnel and maintenance is communicated to DSAC on a regular basis. The “partnership” between the department and municipalities leans to favour municipalities that can’t afford to render services.

Status of library buildings:

Our existing library buildings can be regarded as functional. There are challenges regarding ventilation, lighting levels, floor finishes, roof leakages. In almost all cases library usage exceeds expectations/projections at the planning stage. Library facilities are unable to cope with inflow of students during peak and exam times.

There is a backlog regarding maintenance tasks at all of the libraries. Our libraries and museums’ maintenance depends on the maintenance priority list of the Facilities and PMU Management teams. This leaves Cultural Services in a vulnerable position. Services such as water, sanitation, roads infrastructure and energy receive preference.

Interventions:

Staff matters.

- HR/Council to address staff related challenges v/s service delivery.

User fees

- Council to take a decision about the abolishment of library membership fees and introduce measures that will ensure the well-being of the municipal book collection in accordance with GRAP 17.

Library expansion

- Find sources for funding of new library infrastructure e.g., MIG in order to provide branch libraries. Identify existing infrastructure in clusters that may be converted for library use. Invest in a mobile library service that can visit and utilize the new one-stop-service centres.
- Provide new City Library as part of Cultural Precinct in partnership with Limpopo DSAC.
- Prioritize funds for a Library master plan.
- Council to increase the allocation for maintenance and repairs of existing library infrastructure.

- Council to approve a program to replace at least one 3M Tattle Tape book detection system per year and to maintain others.

Book stock development

- Council to commit sufficient funding to renew and expand the library's book collection. The procedure of asset control of damaged, outdated and lost books should be revisited. The proposed annual budget for this purpose must be in excess of R2 000 000, as opposed to the current allocation of R200 000 or less.

ITC and connectivity

- IT SBU must urgently address network problems, slow connection, insufficient licenses for Papyrus and other software.

Inter-governmental relations

- SLA between Polokwane Municipality and Limpopo DSAC is renewed annually.

7.22 Museums

The aim is development of museums and heritage through research; collection; education; protection and conservation.

7.22.1 Objectives of the Museum

- Upgrade all existing museum exhibitions to acceptable modernized standards, representative of all communities.
- Upgrade collection and its management systems
- Undertake heritage studies to eventually include the whole municipal area and to develop Cultural Resources Management plans (CRMP) for areas identified as heritage sites.
- Engage museums in extensive research to accumulate data that will be necessary for the development and up-keeping of museum norms and standards.
- Engage the museums in aggressive collection of objects that are worthy/necessary for research, exhibition, and conservation.
- Ensure proper conservation of museum collections as well as heritage sites.
- Upgrade infrastructure and amenities at museums and other heritage sites.
- Undertake museum related research and collection of specific books to enhance available information to public and academics.
- Be involved in internship programs related to museums, tourism, and heritage related services.
- Equip museum staff with necessary knowledge relevant to the sector (museums)
- Engage in outreach programs to schools to promote museums.
- Engage in job creation through EPWP program
- Take part in the Local Geographic Naming of Polokwane Municipality
- Steer and take lead in directing the future of the vulnerable state of public statues and heritage in general, through the newly established heritage committee.

7.22.2 Museums located within the City.

There are other 4 museums that are located within the City:

1. **Irish House Museum-** A cultural history museum where history and culture of people within Polokwane; Limpopo and beyond is exhibited. An exhibition budget has been put in place and currently the project is being executed to change the one currently on show. Currently the first phase of the exhibition has been completed. Plans are underway to complete the second phase of the exhibition.
2. **Hugh Exton photographic Museum-**a museum of photography which contains a collection of the renowned photographer, Mr. Hugh Exton who captured more than twenty thousand photographs on glass negatives. Since the exhibition is old, there is a need for exhibition update in this museum and provisional budget has been set aside in the multiyear budget to prepare for a change in the exhibition in this museum.
3. **Polokwane Art museum-** a museum of art where painting, works on wood and sculptures are housed and maintained/conserved.
4. **Bakone Malapa Open-Air Museum** Bakone Malapa is regarded as a living museum, the Bakone Malapa Northern Sotho Open-Air Museum is one of several museums and national monuments that bear testimony to South Africa's peoples.
It is an Open-air Museum, where tribesmen practice long-standing traditions to enlighten visitors about the traditions of Africa's people, Bakone Malapa is a reconstructed village in the style used by the northern Sotho about 250 years ago designed to demonstrate the daily life of the Bakone, a highly sophisticated subgroup of the northern Sotho tribe. The cultural village includes two homesteads or lapas that display and explain fire making, maize grinding and beer brewing as they would have been carried out years ago. There are also handcraft demonstrations that include pottery, basketry, and bead work and most of these locally made crafts are then sold from the local craft shop.
The guides are excellent story tellers and the village's architectural and cultural styles come alive through their eyes as they take one through the village's traditional way of life. the museum is more than a cultural village alone. There is a bird sanctuary, a game reserve, hiking trails and outdoor recreation areas.

7.22.6 Bakone Malapa Open-Air Museum.

Source: PLK Cultural Services SBU

7.23 Heritage Sites

The museum services are also responsible for the management of heritage objects, both movable and immovable within Polokwane Municipality. The best-known heritage sites are the Irish House Museum and the Hugh Exton Photographic museums due to their aesthetic and history attached to the presence today in the development of the City of Polokwane. These buildings are currently in use as museums and are Council owned. There are other buildings which could be noted such as churches and privately owned properties which still holds significant status in the City's development and in a well-preserved condition.

Eersteling monument-The first **gold mine** in the country before the discovery of Pilgrim's Rest and lately, the Witwatersrand Gold mine. The remains of these mine are still visible on site.

British Fort Marabastad monument-This fort was the site of a Boer Siege in 1880, where 140 soldiers were held for a period of 104 days. The Fort was declared a National Heritage site by the then National Monument Council (NMC), now South African Heritage Resources Authority (SAHRA) and Concentration camp-a concentration of graves for those who participated and succumbed the 1899-1902 war.

7.23.1 Eersteling monument

Source: PLK Cultural Services SBU

7.23.2 Other heritage sites that have been identified

Other heritage sites that have been identified by means of surveys are **Moletjie heritage site** (Rock Art) and Mothapo rock art site and it is planned to Investigate / study them further for tourism development purposes.

Overall survey of heritage sites at Moletjie and Maja Chuene has been completed but detailed studies still need to be done. Excavation of a heritage site at Moletjie Ga-Legodi has been done. A conservation Management Plan needs to be done, which will include the Rock Art Site in this area. Heritage sites at Ga-Dikgale have been completed recently and therefore detailed studies are awaited. Specific site study of the site at Mothapo has been identified to be made. Heritage Sites have been identified in part within the newly incorporated areas of Aganang such as Percy Fyfe Nature Reserve to mention one. The museums continue to comment on structural demolition applications for developmental purposes.

Challenges:

Vacancies:

The large number of vacancies, as well as positions provided for on the organogram but not budgeted for remain vacant. This is detrimental to the upkeep of service standards. It also generates a lot of unhappiness as staff feels exploited and overworked.

Budget is always a problem for the development of museums to fully function. Museum's budget is always given low preference and they (museums) are expected to draw visitors to Polokwane as a Centre Hub and a Gateway to Africa. The absence or low budget cannot afford to draw new museum audience and therefore additional allocation of funds is a necessity for continuous visit to the museums.

The status of public Art is not earning full enjoyment as far as municipal holistic budget allocation is concerned. The museums are unable to render preservation as well conservation of public art due to either lack of budget or public consultation. The transformation of Industrial Art Park into a business site will ultimately lead to compromise into the City's public art space. Although progress is already at an advanced stage, the relocation of these works of art will need to be properly taken into consideration and must be under strict care of art experts.

7.24 Cultural Desk

This section within Cultural Services is responsible for cultural programs aimed at developing cultural practitioners, promoting social cohesion among the citizens of Polokwane Municipality and in developing sustainable cultural industries that will contribute meaningfully into the local economy. Important stakeholders/beneficiaries of our cultural programs are mostly young artists, school children and vulnerable such as children in places of safety/care, the aged and people in incarceration.

7.24.1key programs within the Cultural Desk Subsection

The following are key programs within the Cultural Desk Subsection: Cultural Competitions; Holiday Program, Mayor's Debate Tournament, Outreach Programs and Annual Polokwane Literary Fair

1. Cultural Competitions take place in all the clusters culminating in Municipal Finals. They include poetry, storytelling, stand-up comedy, drama, music and dance. There is a standardized financial reward for winners in each category.
2. Holiday Program is held once a year on a chosen public holiday. It sees children and senior citizens coming together to share in music, dance and Indigenous Knowledge Systems. It is aimed at promoting social cohesion among different age groups/generations.
3. Mayoral Debate tournament is aimed at providing youth with requisite debating skills as well as sharpening their minds through research that is done in preparation for the debate.
4. Outreach Programs are a crosscutting function within Cultural Services SBU that seeks to connect municipality with its stakeholders through planned visits to their places of operation.
5. Annual Polokwane Literary Fair is held every September in collaboration with stakeholders such as National Book Week. It is a platform created especially for literary artists such as writers, poets and storytellers. It consists of skills workshops, poetry performances and various conversation platforms.

7.24.2 Cultural Desk Challenges

An added function to Cultural Desk is The Polokwane Municipal Choir which was established some years ago and needs some financial support to assist their development such as attire and basic musical instruments. Cultural organizations indicate that much needs to be done to stimulate culture in the province and those local artists should be provided the opportunity to develop through the provision of a theatre and other suitable venues.

Venues under Cultural Services such as the Library Auditorium and activities rooms are used extensively and there is a high demand for the free use of facilities by Cultural organizations which currently can only be granted use free of charge subject to certain conditions, during the week (up to Thursday) for one occasion. A delicate balance will have to be found between the need for free allocation of venues under certain circumstances to cultural organizations and income generation for the municipality from such facilities. Costs to maintain such facilities inclusive of overtime are very high and some facilities such as the Library Auditorium consistently need upgrading. There is also a dire need for the development of a policy and guidelines at provincial level for financial assistance towards cultural organizations for presentation of cultural events especially those aiming to promote and develop culture. Facilities for the development of culture in general such as a theatre and workshop venues catering for art development. The development of a Cultural Hub (which will include a library, theatre, etc) at the Bakone Malapa Open Air Museum facility is currently under development through the joint efforts of the Limpopo Dept of Public Works and Polokwane Municipality.

CHAPTER Eight - Good Governance and Public Participation

8.1 Performance Management System (PMS)

A Municipality's Performance Management System (PMS) is the primary mechanism to monitor, review and improve the implementation of its IDP and to gauge the progress made in achieving the objectives set out in the IDP. In addition, a Municipality's PMS must also facilitate increased accountability, learning, improvement, provide early warning signals and facilitate decision-making. Chapter 6 of the Local Government: Municipal Systems Act makes provision for the establishment of the performance management system in municipalities. The establishment of the performance management system is meant to assist the municipalities to monitor, measure and evaluate its performance against its developmental targets that are set in the IDP.

The most valuable reason for measuring performance is that what gets measured gets done. Polokwane Municipality has developed and adopted the Performance Management Framework that guides how performance needs to be undertaken in the municipality. Furthermore, the municipality has developed the Performance Management Policy that guides the day-to-day implementation, monitoring and evaluation of performance. The Policy is reviewed regularly to accommodate the performance changes in the municipal environment. The latest review was done in May 2022 and become effective and implemented in July 2022. The Standard Operating Procedure (SOP) was last reviewed during the 2019/20 financial year. The SOP is still up to date and there are changes that needs to be made.

In order to ensure that performance management gets implemented at Polokwane, the organisational structure made provision of a Business Units that should management performance. The organisational structure has four (4) position, and the breakdown of the positions are that of the Manager, Assistant Manager and two PMS Coordinators. All the four (4) positions are currently filled and there is no vacancy. The Integrated Development Plan (IDP) outlines how the challenges of sustainable development in a Municipality are to be met through strategic interventions and service delivery over the five-year period. The IDP is developed by the Municipality in conjunction with the community and a credible IDP must be supported by a realistic budget. The IDP is supported by a Municipal Scorecard which sets out the key deliverables over the election period in a log-frame format.

8.1.1 Alignment of the IDP, Budget and SDBIP

The Integrated Development Plan (IDP) outlines how the challenges of sustainable development in a Municipality are to be met through strategic interventions and service delivery over the five-year period. The IDP is developed by the Municipality in conjunction with the community and a credible IDP must be supported by a realistic budget. The IDP is supported by a Municipal Scorecard which sets out the key deliverables over the election period in a log-frame format.

8.1.2 Legislation that governs Performance Management in Municipalities

Legislation that governs performance management in local government includes the Municipal Systems Act (MSA), the Municipal Planning and Performance Management Regulations (MPPMR), the Municipal Finance Management Act (MFMA), the Municipal Performance Regulations for Municipal Managers and Managers directly accountable to the Municipal Manager and the Framework for Programme Information (FPPI) issued by National Treasury.

Cascading of Performance Management

The Approved Performance Management System Policy of Polokwane Municipality makes provision for cascading of performance to lower levels employees. Further, the Department of Cooperative Governance and Traditional Affairs published the Local Government Municipal Staff Regulations in September 2021. The key development brought by the new regulation is the introduction of the Individual Performance Management System for all employees in the municipality below the level of senior managers. Local government employees in South Africa are not expected to participate in the performance management system with the exception of employees under the Expanded Public Works Programme. The regulation came into effect on the 1st July 2022, however the Department of Corporative Governance has issued a Circular in July 2022 informing municipalities that the implementation date has been revised to 1st July 2023.

The Executive Mayor of Polokwane Municipality is passionate about employee performance management. His address to all municipal staff in March 2022, he requested executive management to implement performance management to all the employees of the municipality. Further, he indicated that employees that are performing well must be recognised and awarded performance bonuses in line with the provisions of the law.

Polokwane Municipality in line with the Local Government Municipal Regulations of 2021 and the pronouncement by Executive Mayor, started with the implementation of the individual employee performance. Strategic Planning, Monitoring and Evaluation is responsible for coordinating the implementation of the individual performance management. Corporate and Shared Services Directorate is responsible for all human resources function pertaining to the implementation of the Regulations. To date, SPME conducted sessions with all the municipal directorates regarding the implementation of the Regulations. Implementation of the Regulations is expected to be done and concluded latest by the second quarter of the 2022/23 financial year. Further, an assessment report in terms of compliance will be done by the executive management to ensure that all the employees have performance plans in place.

8.1.3 Performance Reporting

The PMS Policy of Polokwane Municipality makes provision for the reporting timeframes. The timeframes are guided by the IDP/Budget and PMS Process Plan that gets approved by Council. Furthermore, the reporting timeframes is in line with the provisions of the MFMA and the MSA. Polokwane Municipality compiles performance management reports quarterly, which is 30 days after the end of each quarter. Furthermore, performance assessment report is compiled during the first half of each financial year, that is in January every year. At the end of the financial year, an annual performance report is compiled and submitted to the Auditor General for auditing with the financial statements. Polokwane Municipality is being consistent in terms of ensuring that the performance management system is functional, and all legislative reports are compiled and submitted to the relevant stakeholders.

Polokwane Municipality automated the performance reporting system since 2016. The municipality has embraced the convenience of utilising the web-based reporting system, which makes it easy and convenient to do performance management. The effectiveness of the automated performance reporting system relies on the access to internet and the technological competency of the municipal staff. Reporting in the automated system is done by managers as the inputters and directors as the reviewers of the performance information. The automated system also provides internal audit unit with rights to audit inside the system. The Executive Management of Polokwane Municipality on the 4th August 2022 resolved that institutional performance reporting should be done on monthly basis as a build-up to quarterly reporting. This will assist management to proactively addresses issues of poor and under-performance before the quarterly reporting is done.

8.2. Audit of Performance Management Information

The Performance Management System Policy of the municipality makes provision for the auditing of the performance information. All the performance management reports are submitted to Internal Audit for verification and quality assurance. Audited performance management information is processed to Council through the Audit Committee. The Audit Committee Chairperson is responsible for presenting the reports in Council once the reports have served and are approved by the Audit Committee.

The Office of the Auditor General audits performance information on an annual basis as per the provisions of section 46 of the Local Government Municipal Systems and further as a requirement of the Public Audit Act. The outcome of the audit of performance information has been consistent for the past two (2) financial years, 2019/20 and 2020/21 financial years. Polokwane Municipality received an unqualified audit opinion for the two mentioned financial years. The audit of the 2021/22 financial year resumed already in the month of August 2022 and the audit outcome will be issued in November 2022.

8.2.1 PMS Challenges

- ❖ Performance Indicators needs to be reviewed annually to ensure that they are consistent and in line with the budget allocations.
- ❖ When developing performance targets, previous performance reports must be taken into considerations to ensure that targets are feasible and within the available resources.
- ❖ Directorates needs to compile Listing of all their reported achievements.
- ❖ Compilation of Portfolio of Evidence needs to be reviewed and aligned to reporting. All the necessary documentation must be included and properly referenced.
- ❖ There is a lack of review of reported performance information to ensure that the reports are complete, accurate, consistent and reliable.
- ❖ There is a need to align the Budget, IDP Indicators and Targets to ensure that the SDBIP is not misaligned with the two documents.
- ❖ Polokwane Municipality must ensure compliance with the Local Government Municipal Staff Regulations
- ❖ All municipal employees must have signed performance agreements and assessments conducted as per the Municipal Staff Regulations.

8.3. INTEGRATED DEVELOPMENT PLAN (IDP)

8.3.1 Integrated Development Planning

Local Municipalities in South Africa have to use "integrated development planning" as a method to plan future development in their areas. Apartheid planning left us with cities and towns that:

- Have racially divided business and residential areas
- Are badly planned to cater for the poor - with long travelling distances to work and poor access to business and other services.
- Have great differences in level of services between rich and poor areas.
- Have sprawling informal settlements and spread-out residential areas that make cheap service delivery difficult.

Rural areas were left underdeveloped and largely un-serviced. The new approach to local government has to be developmental and aims to overcome the poor planning of the past.

Integrated Development Planning is an approach to planning that involves the entire municipality and its citizens in finding the best solutions to achieve good long-term development.

An Integrated Development Plan is a **super plan** for an area that gives an overall framework for development. It aims to co-ordinate the work of local and other spheres of government in a coherent plan to improve the quality of life for all the people living in an area. It should consider the existing conditions and problems and resources available for development. The plan should look at economic and social development for the area as a whole. It must set a framework for how land should be used, what infrastructure and services are needed and how the environment should be protected.

All municipalities have to produce an Integrated Development Plan (IDP). The municipality is responsible for the co-ordination of the IDP and must draw in other stakeholders in the area who can impact on and/or benefit from development in the area.

Once the IDP is drawn up, all municipal planning and projects should happen in terms of the IDP. The annual Council budget should be based on the IDP. Other government departments working in the area should take the IDP into account when making their own plans.

It should take **6 to 9 months** to develop an IDP. During this period service delivery and development continues. The IDP is reviewed every year and necessary changes can be made.

The IDP has a lifespan of **5 years** that is linked directly to the **term of office for local councillors**. After every local government election, the new council has to decide on the future of the IDP. The Council can adopt the existing IDP or develop a new IDP that takes into consideration existing plans.

The Executive Mayor of the municipality have to manage the IDP Process. The Executive Mayor may assign this responsibility to the Municipal Manager.

The IDP has to be drawn up in consultation with forums and stakeholders. The Draft and Final IDP document has to be approved by the Council.

8.3.2 Evolution of the IDP (Trends since 2001)

1 st Generation (2001-2006)	2 nd Generation (2006-2011)	3 rd Generation (2011-2016)	4 th Generation (2016-2021)	5 th Generation (2021-2026)
Eradication of service delivery backlogs	Eradication of service delivery backlogs	Participation of provincial and national spheres of government	Intergovernmental programme pipelining	NDP vision 2030 – spatial transformation
	IDP being a plan of all government	Alignment of planning and budgeting processes	Respond to policy imperatives (NDP, IUFD, SPLUMA)	Facilitate spatial integration, growth, inclusion and access
		Integration of municipal sector plans into the IDP	Spatial planning	

Source: PLK IDP SBU

8.3.3 IDP/ Budget Process Plan

In terms of Municipal System Act, 32 of 2000, Section 28(1), each municipal Council must adopt a process set out in writing to guide the planning, drafting, adoption and review of its Integrated Development Plan. Annually, City of Polokwane Council approves IDP/Budget/PMS process plan that is aligned with the Municipal Corporate Calendar detailing activities and processes that will unfold culminating with the final approval and adoption of the IDP and Budget by Council and it is aligned with the Municipal Corporate Calendar.

8.3.4. The IDP/Budget Committees

Legislation requires municipalities to establish appropriate mechanism, processes and procedures for the organs of state, including traditional authorities and other role players to be identified and consulted on the drafting of the Integrated Development Plan. To achieve this purpose, the City of Polokwane established committees towards attainment of the above legislative requirement as follows:

8.3.5 IDP/Budget Technical Committee

The IDP /Budget Technical committee is chaired by the Municipal Manager and constituted by all Directors and all Managers who are appointed annually by the Municipal Manager. This committee serve as a working committee for municipal planning, budgeting and institutional performance.

8.3.6 IDP/Budget Steering Committee

The IDP Steering committee is chaired by the Executive Mayor and composed of all members of the Mayoral committee, Speaker of Council, Chief whip; MPAC Chairperson, Ethic Chairperson, Geographic Names Chairperson, MM, all Directors and selected Managers. Councillors in the committee play oversight role over municipal planning, budgeting and institutional performance whereas municipal employees provide expertise and technical knowledge in a supporting role.

8.3.7 IDP Representative Forum

The IDP/Budget/PMS Representative Forum is platform that the City of Polokwane use to engage with organized formations and government departments. The Forum is fully functional, and its meetings are held every phase of the IDP for feedback purposes and further engagements with stakeholders.

8.4 Public Participation and Stakeholder Engagements Process

Municipal System Act, 32 of 2000, Chapter 4 provides for the municipalities to develop a culture of municipal governance that complements formal representative government with a system of participatory governance and to encourage and create conditions for the local community to participate in the affairs of the municipality including in the preparation, implementation and review of its Integrated Development Plan. Polokwane Municipality is divided into seven (7) clusters for administrative purposes and further has a diverse and active citizenry that requires an effective public participation process to ensure that they are fully engaged in matters of their development. These includes community, business sector, government departments, non-governmental organisations, Traditional Authorities amongst others.

Polokwane Municipality has dedicated the month of April annually to consult with its stakeholders and source inputs into the tabled draft IDP and Budget. During these meetings Council gives feedback on the implementation of the current financial year projects, budgets and interventions where necessary and further present proposed projects, programmes, budgets and tariff increases for the coming financial year for engagements with stakeholders. Copies of both the draft and final IDP and Budgets are placed at strategic places within the seven (7) municipal clusters, libraries and also get posted on the municipal website for consumption by members of the public.

8.5 MEC IDP Assessments

Municipal System Act, 32 of 2000, Section 32 requires municipalities to submit the adopted Integrated Development Plans (IDP) to the Office of the MEC for local government within ten **(10) days** after Council approval. This is to allow the MEC for local government to assess the IDPs of municipalities for compliance and to make proposals for amendments where possible for consideration by local councils. Polokwane Municipality has always complied with legislation and submitted the adopted IDP within the prescribed timelines. Polokwane Municipality always considers proposals by the MEC for Local Government from the IDP

Assessments and incorporates them into planning. Below is the Ratings Received from MEC assessment on Polokwane final IDP's.

8.5.1 MEC rating for Polokwane Municipality IDP

MEC IDP Assessment Rating for Polokwane (High; Medium and Low)	
Financial Year Final IDP Assessment	MEC Rating
2011/12	High
2012/13	High
2013/14	High
2014/15	High
2015/16	High
2016/17	High
2017/18	High
2018/19	Medium
2019/20	High
2020/21	High
2021/26	High
2022/23	High

Source: PLK IDP SBU

8.6 Strategic Planning Session (Bosberaad)

The purpose of the strategic planning session is to maintain a favourable balance between an organization and its environment over a long run. Strategic Planning has been defined as “a disciplined effort to produce fundamental decisions and actions that shape and guide what an organization is, what it does, and why it does it”. It provides a systematic process for gathering information about the bigger picture and using it to establish a long-term direction and then translate that direction into specific goals, objectives, and actions. It blends futuristic thinking, objective analysis, and subjective evaluation of goals and priorities to chart a future course of action that will ensure the organization’s vitality and effectiveness in the long run. “At best it permeates the culture of an organization, creating an almost intuitive sense of where it is going and what is important”.

In today’s highly competitive business and organizational environment, budget-oriented planning or forecast planning methods are insufficient for organization to prosper. There is a need to engage in strategic planning that clearly defines objectives and assesses both the internal and external situation to formulate strategy, evaluate progress, and make judgments

as necessary to stay on track. Polokwane Municipality usually host its strategic planning sessions **each financial year** in terms of the IDP/Budget/PMS Process Plan. The session is led by the Executive Mayor. The Executive Mayor with the support of the Members of the Mayoral Committee, Senior Management and Managers holding key strategic positions embarks on a retreat to make a thorough **introspection** on whether the municipality is on track to achieve its Vision 2030/Smart City and take the necessary actions / decisions to ensure that Polokwane Municipality succeeds in bettering the lives of its communities and therefore achieve its Vision 2030.

8.7 District Development Model (DDM)

8.7.1 Background to the DDM

The President in the 2019 Presidency Budget Speech (2019) identified the “pattern of operating in silos” as a challenge which led to “to lack of coherence in planning and implementation and has made monitoring and oversight of government’s programme difficult”.

The consequence has been non optimal delivery of services and diminished impact on the triple challenges of poverty, inequality and employment. The President further called for the rolling out of “**a new integrated district-based approach** to addressing our service delivery challenges [and] localise[d] procurement and job creation, that promotes and supports local businesses, and that involves communities...”

The President is cognisant of the fact that such an approach will require that “National departments that have district-level delivery capacity together with the provinces ... provide implementation plans in line with priorities identified in the State of the Nation address”.

The proposed New District Level model seeks to utilise the existing legal framework and implementation machinery, which includes the Intergovernmental Relations (IGR) Framework Act which provides for the Minister (and department) responsible for cooperative governance to provide “a framework for coordinating and aligning development priorities and objectives between the three spheres of government” as well as the development of “indicators for monitoring and evaluating” the implementation of the framework.

Thus, the Model utilises and enhances these frameworks and the existing implementation machinery by facilitating for joint planning, implementation as well as monitoring and evaluation, between and amongst all spheres of governance wherein the term District is seen to refer to locality rather than the District Municipality, which no doubt forms an important part of the planning, delivery as well as Monitoring and Evaluation architecture.

By crowding in public, private and not for profit investments to a district locality, in an all-inclusive manner as directed by joint district implementation plans, the model aims at

maximising impact whilst capitalising on a window of opportunity (over the next twelve to eighteen months) whilst addressing the 'burning' and 'stabilisation' challenges faced by local municipalities who are seen as critical building blocks towards the realisation of the objectives of the model and the development aspirations of our people. By laying a solid foundation in the short term a long term spatially relevant plan for South Africa will be secured through the sum total of the District Implementation Plans into Joined Up Plans or the One Plan which aligns and mutually reinforces the District Plans. In so doing the One Plan will:

- a) focus on the District/Metropolitan spaces as the appropriate scale and arena for intergovernmental planning and coordination.
- b) focus on the 44 Districts + 8 Metros as developmental spaces (IGR Impact Zones) that will be strategic alignment platforms for all three spheres of government.
- c) produce a Spatially Integrated Single Government Plan (as an Intergovernmental Compact) for each of these spaces that guides and directs all strategic investment spending and project delivery across government and forms the basis for accountability.
- d) reinforce an outcomes-based IGR system where there is a systematic IGR programme and process associated with the formulation and implementation of a single government plan.
- e) take development to our communities as key beneficiaries and actors of what government does.

These Single Joined-Up plans, or the **One Plan** will take the form of prioritised spatial expressions over the long term and will be divided into 5 and 10-year implementation plans supported by annual operation plans which will be based on commonly agreed diagnostics, strategies and actions. Each sphere and sector department will have to elaborate in more detail their own plans and actions. The plans will facilitate for:

- a) Managing urbanisation, growth and development.
- b) Determining and/or supporting local economic drivers.
- c) Determining and managing spatial form, land release and land development.
- d) Determining infrastructure investment requirements and ensure long-term infrastructure adequacy to support integrated human settlements, economic activity and provision of basic services, community and social services:
- e) Institutionalize long term planning whilst addressing 'burning' short term issues.

The content of the Plans will elaborate the key transformation processes required to achieve long-term strategic goals and a desired future in each of the 44 district and 8 metro spaces.

8.7.2 Formulation and implementation of a One Plan

Source: Cogta One plan process Guideline

8.7.3 District Development Model (DDM) Executive Summary

The District Development Model (DDM) is an operational model for improving cooperative governance aimed at building a capable, ethical and developmental State. It embodies an approach by which the three spheres of government and state entities work collaboratively in an impact-oriented way, and where there is higher performance and accountability for coherent service delivery and development outcomes.

Furthermore, the DDM is an intergovernmental approach focusing on 52 district and metropolitan spaces as IGR impact zones for more effective joint planning, budgeting and implementation over multi-year planning and electoral cycles. Although each sphere, sector or entity has its distinct constitutional powers, functions and responsibilities, they cooperate and undertake collaborative planning, budgeting and implementation processes converging developmental efforts at the district/metropolitan level. Accordingly, this joint work is expressed through the formulation and implementation of a “**One Plan**” which is a long-term strategic framework guiding investment, service delivery and development in relation to each of the district and metropolitan spaces.

The Institutional Arrangements for the DDM are aimed at sustaining a programmatic approach to cooperative governance and IGR centred around the One Plan and the related reprioritisation processes to be undertaken by all spheres, departments, entities and municipalities. This will culminate in both political and technical work streams that will need to be managed at the level of district/metro hubs for the co-creation of the joined up One Plans by and for all three spheres of Government.

The management is undertaken by two key committees. At the level of the district/metro hub, the two committees referenced below will be responsible for the management of the one plan process. The **DDM political committee** provides political leadership, oversight and support to the hubs whereas the **DDM district/metro coordination steering committee** will oversee the technical work of the district/metro hubs. Each of these committees will relate with the rest of the institutional teams based on political and technical interfaces. In essence, these committees will drive the work of the district/metro hubs including intergovernmental collaboration required to develop the joined up one plans. The DCF, PCF and PCC will be key structures interacting with the DDM political and district coordination steering committees for the interim sign-off of the One Plan stage milestones. A council of advisors or similar may be proposed and may assess the 52 district/metro plans and recommend approval to PCC and Cabinet.

The One Plan process guideline will outline the activities, roles, responsibilities, ownership and timelines that will need to be undertaken during each One Plan road map stage and it will also synthesise how each stage integrates into Government's existing planning and budgeting cycles across the three spheres with a view of creating a long-term strategic framework (joined up one plan) that guides all strategic investments from Government and the private sector.

8.8. MUNICIPAL CLUSTER OFFICES

8.8.1 Number of Municipal Clusters and their Wards

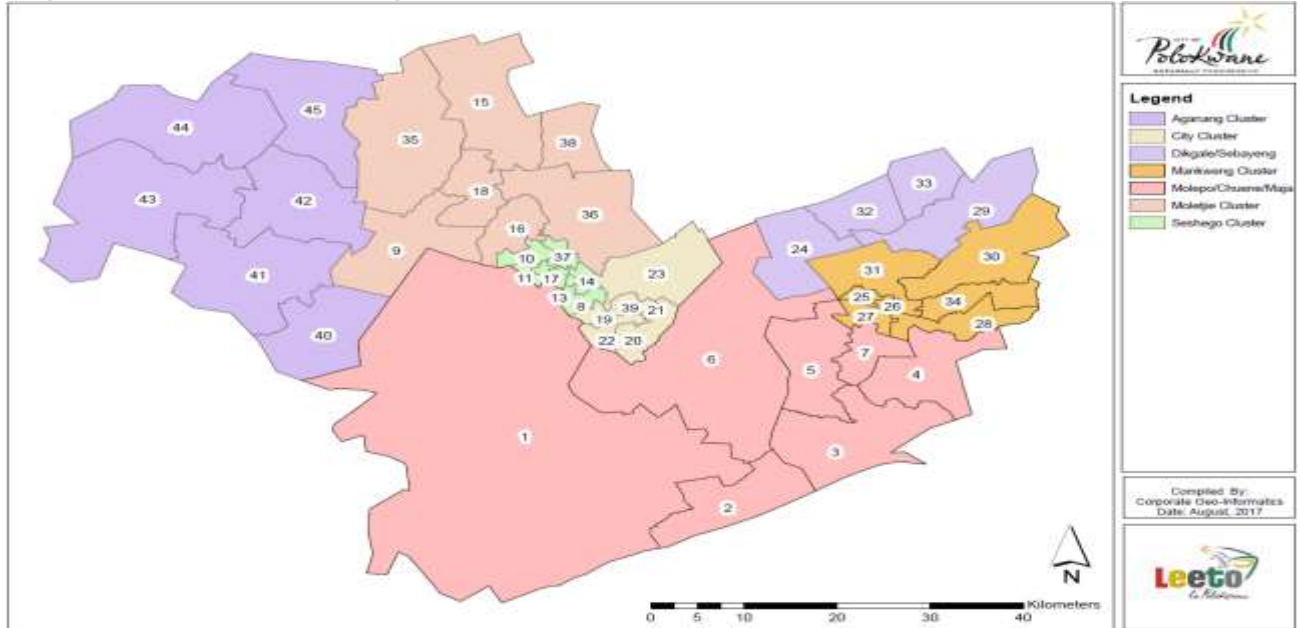

Polokwane Municipality is Consist of 7 **Clusters** that should be provided with services. The number of wards is now **45 wards**. The Name of the Clusters are:

	Clusters Name	Wards No.
1	Mankweng Cluster	06,07,25,26,27,28, 34
2	Moletjie Cluster	09,10,15,16,18,35, 36,38
3	Molepo / Chuene / Maja Cluster	1,2,3,4,5
4	Sebayeng / Dikgale Cluster	24,29,32,33,30,31
5	Aganang Cluster	40,41,42,43,44,45
6	City Cluster	08;19,20,21,22,23,39
7	Seshego Cluster	11,12,13, 14,17,37

8.8.2 Polokwane Cluster Map Reflecting Location of 45 Wards

Map: Polokwane Cluster Map

Source: Polokwane G.I.S SBU: 2021

8.9 Municipal Cluster Offices

All Clusters have Municipal Offices that assist in Monitoring of Service Delivery. The Municipal Offices are as Follows:

8.9.1 City Cluster Office - Municipal Head Office

The **Civic Centre** will remain the **Municipal Head Office** and will also accommodate staff that is deployed to work in the City Cluster. It has been recommended that rates halls be incorporated into the Westernburg and Nirvana Community Centres, municipal offices in Ladanna and the Thorn-hill shopping Centre to provide residents around these areas with access to officials with regards to queries on their accounts and other municipal services. Relocation of staff that is deployed to other clusters (to their respective cluster offices or depots) will provide an opportunity for essential refurbishment to be done to the Civic Centre and also alleviate the problem of office accommodation at the Main Building.

8.9.2 Molepo-Chuene-Maja Cluster Office

The existing municipal cluster office at Mothiba Ngwana-Mago in the Maja area for which a photographic image is provided below, is suitably located in terms of centrality, population concentrations and numbers as well as access roads. Access will be further improved once the existing tarring of the road from Polokwane via Silicon Smelters is completed. The office however needs to be extended to meet the deployment requirements of staff as well as the municipal services to be provided in the cluster area.

It is recommended that a secure site be established from where mobile services can be made available to residents in the Molepo area. The site has already been identified at Rampheri village in the Molepo area. This will allow mobile service providers such as Departments of Health, SASSA, SAPS, Home Affairs to move in and utilize the facility to render services to the local community. Office accommodation requirements are summarized in the table at the end of this section, with concept-level proposals from an architect provided in the following section.

8.9.3 Mankweng Cluster Office

There are currently three satellite offices situated at Unit A, B and C in Mankweng as well as a Community Library and a Fire Station. An approval has been granted for the development of a Thusong Service Centre at Ga-Makanye Village in Ward 28 to cater for the needs of the local community within the Cluster. The Thusong Service Centre programme is a government initiative to extend government services and information to communities in an integrated manner. This could form the nucleus of an office precinct for Mankweng, with an Education Circuit office and other sector departments such as Home Affairs, Social Development, Health and parastatals to follow.

Secure site is recommended to be established for mobile services at the primary road intersections between the settlements of Thune, Mongwaneng & ga-Mamphaka. This will improve access to municipal and other government services for residents on the periphery of the Mankweng cluster who have to travel long distances to access government services. Service providers such as Departments of Health, SASSA, SAPS, Home Affairs can on scheduled days utilize the facility to render services to the local community.

There is also a need to consider establishing a Municipal Depot to accommodate all heavy duty and other vehicles particularly from the Engineering and Community Services Directorates that are rendering services to the local community. It is also likely that the proposed Transfer Station for the Integrated Rapid Public Transport Corridor between the City and Mankweng will eventually be constructed in this vicinity. The new office must have a discernible image that will form part of the Polokwane Smart City brand.

8.9.4 Sebayeng-Dikgale Cluster Office

The existing Municipal Cluster Office in Sebayeng town is suitably located, but the facility needs to be upgraded and expanded according to the cluster staff deployment requirements. A secure site is also recommended at Segopje village in the Mamabolo area to provide mobile services to benefit the local community. Several sector departments such as Health, SASSA, Home Affairs and parastatals have been engaged in this regard and have shown keen interest. A visual image of the office is provided below. ICT connectivity must also be significantly improved. A depot is required for Engineering and Community Services to best render services to the local community. There is also a need for a Community Library in the cluster area.

8.9.5 Seshego Cluster Office

Seshego is currently having three municipal offices situated at Zone 1, 3 and 8 and are suitably located to serve as rates halls and providing other municipal services for the local communities and should therefore be retained as such for local neighbourhoods.

A new Cluster Office, branded according to the Polokwane Smart City Vision, is proposed to be developed in close proximity to the Seshego Circle Mall. This is the most accessible point in the Cluster, and it is located close to the Seshego Hospital. It is also densely populated. The vacant land is available for this project. The Transfer Station for the proposed Rapid Public Transport Corridor between the City and Seshego is earmarked for the same vicinity. The proposed new cluster office should provide motor vehicle licensing services and form part of the Seshego Precinct Development Plan.

In a rapidly changing world, space is increasingly becoming a scarce resource as productivity and work efficiencies are crucial to the success of any institution. Space planning is therefore vital in addressing this challenge. Although the Municipality is currently implementing the open floor plan, decentralization of more services to the outlying cluster areas could go a long way in alleviating the problem of office space at the main building.

8.9.6 Moletjie Cluster Office

The existing municipal office at Koloti is suitably located to serve as a cluster office due to its centrality with regard to the population settlement pattern and the primary transport corridors. However, this facility will require infrastructure upgrading and expansion according to staff deployment needs. Access from the main road will also have to be improved. Although there is a functional Thusong Service Centre in Moletjie some few meters from the municipal cluster office, secure sites are recommended to be established for mobile services at the primary road intersections at Ramongwana and Chebeng. This will improve access to municipal and other government services for residents on the periphery of the Moletjie cluster who have to travel long distances to access government services.

8.9.7 Aganang Cluster Office

The Aganang area that has been incorporated into Polokwane Municipality is now serving as the seventh cluster area for Polokwane. The municipal complex at Ceres village has been converted into a Cluster Office with 64 offices, four boardrooms and a community hall. The facility has a separate Traffic Centre with six offices, a conference room and testing rooms. There is need to upgrade the ICT infrastructure in order to facilitate efficient operational communication between the Civic Centre and the Cluster office.

It is proposed that a suitable Municipal Depot be developed next to the Traffic Station to accommodate the deployed staff, plant and machinery and other specialized vehicles of Engineering and Community Services. This should have appropriate office accommodation and workshops for operations of the Engineering Services and the necessary space for materials and equipment. There is need to establish a community library at the Cluster Offices as well as expansion of the provision of municipal services to satellite offices at Matlala One-

Stop Centre and Mohlomong Office in Mashashane to access Social Development, Health, Education and Post Office services. The building is illustrated in the figure below.

8.10 Cluster Offices Challenges

- **ICT:** Poor Network Connectivity at Cluster Offices – Moletjie, Sebayeng/Dikgale, Molepo/Chuene/Maja, Mankweng, Aganang and Moletjie Thusong Service Centre
- **Office accommodation:** Inadequate office space at the existing cluster offices to accommodate the anticipated number of employees to be deployed at these offices particularly Moletjie, Sebayeng/Dikgale, Molepo/Chuene/Maja, Seshego and Mankweng.
- **Hostel Accommodation (Barracks):** Inadequate hostel accommodation for employees attached to the Fire Services and Water and Sanitation at Unit A in Mankweng cluster.
- **Municipal Depots:** Lack of municipal depots in the different cluster areas. The Municipality is currently leasing a Facility in Seshego (LIMDEV Building) with unsatisfactory conditions. The facility is used by Roads and Storm Water, Environmental Management and Waste Management Strategic Business Units. In Mankweng cluster, the municipality is using the prefabricated facilities from the Department of Water Affairs to accommodate employees of Roads and Storm Water and Water and Sanitation strategic business units.
- **Under-utilised office** accommodation at Aganang cluster offices. The Municipal complex at Ceres village has a total of 64 offices, 4 boardrooms and a community hall. The facility has a separate Traffic and Licensing centre with 6 offices, a conference room and testing rooms.
- **Ablution facility:** lack of ablution facilities to cater for the immediate needs for the offsite staff. Employees have to travel back to the satellite office on a regular basis thus hampering productivity due to time spend travelling to and from the satellite offices.

8.10.1. Proposed intervention on Identified Challenges

- **ICT:** There is need to upgrade the ICT infrastructure at Cluster offices in order to facilitate efficient operational communication between the Civic Centre and the cluster offices and also to accelerate service delivery to communities.
- **Office accommodation-** it is recommended that a new Cluster Office be developed on a vacant land across the Circle Mall in order to form part of the Seshego Precinct Development Plan. The location is central in terms of the residents of the cluster area and will offer convenient access for all modes of transport. The existing satellite offices in Zones 1, 3 and 8 will continue operating as Rates Halls for local neighbourhood.
- It is further recommended that a Thusong Service Centre be developed in Mankweng Cluster to provide not only municipal services but also those provided by other government departments, non-governmental organisations and parastatals.

- There is need also to upgrade or expand the existing office facilities at Moletjie, Sebayeng/Dikgale and Molepo/Chuene/Maja in line with the numbers of employees and services rendered at the respective offices.
- Hostel accommodation- there is need to construct a new hostel facility for employees doing night and stand-by shifts in Fire Services, Water and Sanitation, Energy and other Emergency related services in Mankweng cluster.
- **Municipal depots-** Construction of depots in Seshego, Mankweng and Moletjie clusters as a first priority and with consideration also of the other cluster areas such as Aganang, Sebayeng/Dikgale and Molepo/ Chuene/Maja.
- Decentralisation of more municipal services to cluster areas in particular Aganang which may also be converted into a Thusong Service Centre. Three sector departments are already rendering services on the same premises namely Social Department, SASSA and the South African Post Office.
- Construction of ablution facilities on municipal properties including parks to cater the need of the offsite staff.

8.10.2 CORE RESPONSIBILITIES OF THE CLUSTERS-SBU

The Cluster-SBU has a core responsibility of executing the Municipal Cluster model to decentralise the delivery of services. Through this model, the municipality has been able to decentralize services to the far-flung rural areas. The idea behind the Cluster model is to bring government services closer to the people and bringing services closer to the communities. Service decentralization in the clusters, has contributed towards promoting active community participation in the decision-making processes of Polokwane Municipality.

Section 153 of the Constitution stipulates that each municipality should structure and manage its administration, budgeting and planning processes to give priority to the basic needs of the community and to promote social and economic development of the community.

8.10.3 Municipal CLUSTERS Offices

The SBU is comprised of six Cluster Offices namely, Aganang, Mankweng, Molepo-Chuene-Maja, Moletjie, Sebayeng-Dikgale and Seshego. Aganang Cluster was incorporated into the Cluster model in 2016 after the dis-establishment of the former Aganang Local Municipality. Role of the Cluster Offices is to decentralise services and ensure that municipal services are accessible within the municipality's six (6) geographical areas. In each Cluster Office there is Assistant Manager that manage the Cluster Office and also coordinate service delivery issues with various SBU's.

8.10.4 CLUSTER OFFICES AND THEIR LOCATIONS

NO	CLUSTER	LOCATION	BUILDING
1	Aganang Cluster	Moletjie, Ceres	Municipal Building
		1 Stop Centre, Ipopeng	Municipal Building
		Mohlonong Satellite Office	Municipal Building
2	Mankweng Cluster	Mankweng Unit C	Municipal Building
		Mankweng Unit B	Municipal Building
		Mankweng Unit A	Municipal Building
3	Moletjie Cluster	Moletjie Moshate	Municipal Building
	Moletjie Thusong Service Centre	Moletjie Moshate	Municipal Building
4	Molepo/Chuene/Maja	Mothiba Ngwanamaago	Municipal Building

8.11 Project Management Unit (PMU)

The PMU is responsible most of for the management of the capital infrastructure programme (municipal scale) as well as physical project implementation activities including:

- The coordination of regular progress meetings
- The associated project management administrative functions, from project registration and evaluation through to final project completion reports.
- Co-ordination of strategic bulk water and sanitation programs
- Management of infrastructure programs for critical service delivery objectives of the municipality.

The PMU is currently responsible for capital infrastructure projects funded from MIG now IUDG, RBIG, NDPG, WISG; EPWP.

8.11.1 NEIGHBORHOOD DEVELOPMENT PROGRAMME

The Precinct Plan is for development and connection of the identified business nodes in Seshego urban hub as part of the NDPG (Neighbourhood Development Partnership Grant) funded project from National Treasury. During the investigations about Seshego Urban hub, it was realized that there are some areas where the facilities/infrastructure need re-designing to accommodate growth patterns at Seshego. It becomes the priority of the precinct plan to address those problems at a minimal cost while ensuring that people still receive the required services as they are supposed to.

The precinct plan is aimed at promoting the performance of Seshego urban hub with the following objectives:

- Formalise public transportation facilities and services.
- Increase pedestrian volumes to the hub by defining and improving pedestrian movement.
- To create vibrancy, job opportunities and increase population thresholds by means of the integration and mix of land uses such as commercial, transport, social and public space, higher residential densities and training facilities.
- Establish a public square to encourage social and cultural gathering and interaction. Improve the Economic Development within the entire hub.

To date, 25 projects have been identified during the precinct planning and it will require R850 300 125.00 to complete the project in phases.

AM Consulting Engineers have been appointed by the municipality to assist with implementation of the projects within the precinct plan in Seshego Urban Hub. Though the precinct plan has been approved by the Council, National Treasury has allowed the municipality to revise the plan, reprioritise the implementation of certain projects and propose new projects where possible. This will assist both the municipality and National Treasury to fully implement the NDPG Programme by also exploring other possible sources of funding.

The precinct plan is reviewed regularly, and engagements are done with national Treasury for assessment and prioritisation of projects.

In the 2020/21 the NDPG team at National Treasury advised that a sub precinct be developed to focus on heart of the already approved precinct plan. The Precinct Plan Review aims to transform the existing Seshego into an urban hub that is vibrant, pedestrian orientated, create convenience and functions as a Transit Oriented Development (TOD) environment. The interventions proposed are subject to availability of bulk infrastructure capacity and strong precinct management. Successful government interventions will stimulate private sector opportunities and confidence to invest in the hub. All these interventions will be to the advantage of the broader community of Seshego and Polokwane it is noted that the Precinct Plan recommendations may have to be updated if any final designs impact on the Precinct design proposals.

8.12 Expanded Public Works Programme (EPWP)

The Expanded Public Works Programme (EPWP) is a nation-wide Government Programme aiming at drawing significant numbers of unemployed into productive work, so that they increase their capacity to earn an income.

The Expanded Public Works Programme (EPWP) was initiated in 2004 with the primary goal of reducing unemployment across South Africa. The EPWP provides labour intensive employment created through the infrastructure sector, social sector, environment sector as well as the non-state sector. These sectors under the EPWP therefore have a dual purpose namely, job creation and upgrading of infrastructure.

The persistently high rate of unemployment in South Africa is one of the most pressing socio-economic challenges facing the Government and Polokwane Local Municipality is not immune to these challenges. High youth unemployment in particular means young people are not acquiring the skills or experience needed to drive the economy forward.

Therefore, job creation and skills development remain the key priorities of the Polokwane Local Municipality. EPWP targets are set annually by the National Government, which the Municipality is expected to achieve. With the introduction of the EPWP phase III, the Municipality has performed well in terms of job creation, by achieving their target for the first year. Currently most jobs are created through Capital projects as well as Operational projects, and quite a significant number of jobs are created through Water and Sanitation, Waste Management, Roads and storm water, Environment Management and Transportation Projects.

An EPWP policy document was developed and approved by Council in 2012/13 financial year and is reviewed annually. The policy is aimed at providing an enabling environment for the Municipality to upscale the EPWP Programme, through the re-orientation of the line budget function and channelling a substantial amount of the overall annual budget allocation and human resources towards the implementation of EPWP. This policy also advocates for the establishment of a Municipal EPWP Steering Committee which has since been established and is responsible for the strategic direction and coordination of EPWP.

To ensure accountability by all Directorates in the achievement of these set National EPWP targets, the Directorates are allocated annually, a portion of the total target which the Directorates must achieve. Objectives and key Changes in EPWP Phase IV

The Municipality is currently implementing the new phase of the Expanded Public Works Program, EPWP Phase IV, which came into effect in April 2019.

8.12.1 Objectives of EPWP Phase IV

The Objective of EPWP Phase IV is:

To provide work opportunities and income support to poor and unemployed people through the delivery of public and community assets and services, thereby contributing to development”

- EPWP Phase IV Focus
- Strengthening the monitoring of the core EPWP principles to improve compliance to the EPWP guidelines.
- Expansion of the programme through replication and improved in programmes across all sectors.
- Enhancing the EPWP coordination and institutional arrangements including the PEP-IMC.
- Strengthening impact evaluation of the EPWP and ensure greater transparency and accountability through the introduction of Social Audits.
- Strengthening partnerships with the private sector and TVET Colleges.

8.12.2 Community Work Programme

The Municipality in partnership with the Department of Co-operative Governance Human Settlements and Traditional Affairs (COGHSTA) is implementing the Community Work Program (CWP). The CWP targets specific areas, where a significant number of people unemployed are drawn into productive work. The communities identify useful work at community level.

The programme aims to provide an employment safety net, by providing a minimum level of regular work opportunities to participants, with a predictable number of days of work provided per month. It is targeted at the unemployed and/or underemployed people of working age, including those whose livelihood activities are insufficient to lift them out of poverty. The Polokwane Municipality has received an allocation of 1000 participants from (COGHSTA) through the CWP, and the Programme is currently implemented in the following clusters:

Mankweng Cluster	Moletjie Cluster	Aganang Cluster
▪ 500 participants	▪ 500 participants	▪ 1000 participants

Source: PLK PMU SBU

The Municipality has also received an additional 450 participants, for the CWP Pilot programme which the Department is rolling out, specifically targeted towards the traditional Authorities Villages/ Wards.

8.12.3 EPWP Vuk'uphile Learnership Programme.

This is also one programme implemented by the Polokwane Municipality in partnership with the National Department of Public Works (NDPWI) and is called the Vuk'uphile Learnership Programme. The Vuk'uphile programme has been developed to build the capacity amongst emerging contractors to execute the increasing amount of labour-intensive work that is part of the EPWP. Although the programme does not focus entirely on the Youth, it is the requirement of the programme that 50% of the individuals benefitting from the programme should be Youth.

Learner contractors in this programme receive all training required as part of the EPWP guidelines, so that when they exit the programme, they are fully qualified to bid and execute labour intensive projects under the Expanded Public Works programme. The Learner Contractors must also exit the programme, with a CIDB Grade higher than the grade on joining the programme, so that they are able to compete in the open market.

A total of ten (10) Learner Contractors and (10) Learner Supervisors were appointed for the programme, through a process that was open, clear and transparent. Selected learners are required to go on a 2 – 3-year full-time Construction Education and Training Authority (CETA) registered Learnership, consisting of a series of classroom training and practical training projects.

Learner contractors have completed their first allocated projects indicated below. Six (6) have upgraded to grade 3CE PE, two (2) upgraded to 2SQ PE and two (2) upgraded to 5CE PE. The 10 learner contractors have been allocated and completed their second projects on the following sites:

- Rehabilitation of streets in Seshego
- Fencing around electrical substations

- Upgrading of Storm water infrastructure
- Upgrading or road in Mankweng

8.12.4 EPWP Jobs Targets

As part of the EPWP, the municipality set EPWP targets for each project which contractors have to achieve. It is also a requirement in terms of demographics that, 55% of the people employed during project construction should be **youth**. For the 2021/22 Financial year a total of **3552** EPWP participants were recruited on projects, out of which **1530** were youth and 1743 were **women**.

EPWP

- EPWP Job Creation Target for 2022 / 23 Financial Year is =**3656**
- Work Opportunities achieved = **1812 to date**

8.13 PMU Challenges

- Poor performance of service providers leading to delays.
- Community disruptions.
- Completed but dysfunctional water supply projects due to outstanding borehole connections by Eskom.
- Vandalism of completed infrastructure.
- Capital infrastructure projects to the value of R601,2 million have been impacted by the national Treasury moratorium that stopped the advertising of tenders for goods and services as of February 2022. After further clarity was sought, SCM applied for exemption of affected projects that were ready for procurement. The exemptions were applied between 10 March 2022 and 04 April 2022 and currently all but one of the projects managed by PMU was advertised and undergoing procurement processes to appoint service providers. These projects have been planned on a multiyear basis to be implemented in the 2021/22 and 2022/23 financial years
- Projects in planning are awaiting appointment of newly advertisement consultant which is also awaiting evaluation and appointments.

8.13.1 Proposed Intervention on PMU Challenges

- Political intervention at community level to ensure that the complains are successfully addressed and resolved.
- Forward planning has been improved such that service providers for grant funded projects are appointed and commence implementation at the beginning of the financial year.
- Continuous community consultations be done in order to identify potential actions that may hinder projects progress.

- Termination of poor performing service providers or use of subcontractors where feasible to complete works.
- Fast tracking the procurement of service providers to ensure that targets are met, and projects are completed within their planned periods.

8.14 Technical Report Approval

The municipality implements its Regional Water Scheme (RWS) projects mostly through the new Integrated Urban Development Grant (IUDG). It was a requirement that all projects be registered and approved for funding by CoGHSTA. The process was done through preparation of technical reports by the municipality through appointed consultants, which are then processed by the Department of Water Affairs for recommendation of funding to MIG. Improvements have been observed with regards to the **approvals** as indicated by the below recently approved technical reports:

- Mashashane RWS phase 2. (**Approved in March 2022**).
- Aganang RWS. (Assessment session **in March 2022**. Two technical reports approved in **June 2022**).
- Chuene Maja RWS Variation approval (**August 2022**).

8.15 2021/22 Grants performance.

The municipality has received allocations of grants to support infrastructure development in the current financial year which are managed as follows:

GRANT REGISTER 2021/22		
Code	Grant	SBU
IUDG	Integrated Urban Development Grant	PMU and Transportation
RBIG	Regional Bulk Infrastructure Grant	PMU
PTNG	Public Transport Infrastructure Grant	Transportation
EPWP	Extended public works programme	PMU

8.15.2 RBIG OVERVIEW

For the 2020/21 financial year. The total final adjusted allocation for RBIG is R309 358 779.00, the expenditure as of **30 June 2021** is **R293 526 358**, therefore percentage expenditure is 98%. The Municipality applied for a rollover of (R 11 802 111,32), **R11.4m** was approved

For the 2021/22 financial year. The total allocation for RBIG is R218 806 000,00(adjusted to R230 297 962), the expenditure as of 30 June 2022 is R202 002 381.00 therefore percentage expenditure is 87.71%

A total of fifteen (15) multiyear projects were allocated to be implemented under the Regional Bulk Infrastructure Grant for the 2021/22 financial year and are multi-year projects. 2 at procurement, seven (7) projects are at planning and design, and six (6) are at construction between 70% and 98%.

8.15.3 RBIG OVERVIEW

Ref. #	Contract Description	Current Status
WASTE WATER TREATMENT		
1	Construction of Outfall Sewer to Polokwane Regional WWTW - Phase 1A Seshego to East of Pipe Bridge.	On Construction, physical progress at 69%. Contractor terminated
2	New Regional Waste Water Treatment Works - Structural, Mechanical, Electrical, Civil	Tender advertised, closing on 08 August 2022
3	Refurbishment of Polokwane Waste Water Treatment Works (WWTW) : Phase 02 (RBIG)	DDR and IRS approved, insufficient budget.
4	Re-routing of Seshego Outfall Sewer (RBIG)	Designs have been completed, insufficient budget
5	Refurbishment and upgrading of Mankweng Waste Water Treatment Works (RBIG)	Designs have been completed; IRS not approved by DWS.
6	Refurbishment of Seshego Waste Water Treatment Works (RBIG)	On procurement stage, insufficient budget
7	Replacement of AC Pipes (SCADA and Phase 02 up to PDR / IRS).	On Planning for scada installation for the water supply network. IRS not yet approved by DWS.
8	(Polokwane Groundwater Development) - PM131/2018: Construction of Sandriver North Water Treatment Works. (RBIG)	On Construction, progress at 71%. Expected completion date is October 2022
9	(Polokwane Groundwater Development) - PM132/2018: Construction of Borehole Infrastructure and Pumping Mains for the	On Construction, progress at 97.9%. Expected completion date is October 2022

Ref. #	Contract Description	Current Status
WASTE WATER TREATMENT		
	Sterkloop and Sandriver South Wellfields (RBIG)	
10	(Polokwane Groundwater Development) - PM133/2018: Construction of Borehole Infrastructure and Pumping Mains for the Sandriver North Wellfield and Polokwane Boreholes. (RBIG)	On Construction, progress at 93.95%. Expected completion date is October 2022
11	(Polokwane Groundwater Development) - PM02/2019: Seshego Water Treatment Works (RBIG)	On Construction, progress at 90%. Expected completion date is October 2022. Potential delay on delivery of PLC due to worldwide shortage
12	(Polokwane Groundwater Development) - PM01/2019: Bloodriver Wellfield and Seshego Groundwater Development and Pumping Mains. (WSIG)	On Construction, progress at 97.9%. Expected completion date is September 2022
13	Polokwane Distribution Pressure and Flow Management. (RBIG)	Designs have been completed; IRS not approved by DWS
14	Bulk Water Supply - Dap Naude Dam (Pipeline section, booster PS and WTW refurbishment) Additional 2-4M ³ /day Phase 01. (RBIG)	Designs have been completed; IRS not approved by DWS
15	(Turfloop and Dieprivier aquifer development) - Sebayeng RWS Water Transfer. (RBIG)	Designs have been completed; IRS not approved by DWS

8.15.4 IUDG OVERVIEW

In 2021/22 financial year the IUDG allocation is R397 532 000,00, the expenditure as at 30 June 2022 is R386 380 311.59 therefore the expenditure percentage is 97.24%. There is a total of fifty-eight (58) projects under UIDG broken down as follows:

- 1) There is a total of **twenty-three (23)** roads and storm water for the 2021/22 financial year, which are multiyear projects. **Four (4)** projects are at planning and design stage, **Two (2)** at tender stage (BSC, Advert, BEC & BAC), and **Fourteen (14)** of the projects are at construction between 0%-94%, 2 is completed and one is practically complete.
- 2) There is a total of twenty-nine (29) water and sanitation projects for the 2021/22 financial year.

- 3) There are twenty-four (24) water supply and reticulation projects: Five (5) projects are awaiting technical report approval and preparations, five (5) projects are at planning and design stage, two (2) projects are at tender stage and five (5) at construction between 38%-98% and 3 are practically complete and 4 are complete.
- 4) There are five (5) sanitation projects and five (5) are at design stage
- 5) There is a total of one (1) waste management projects. The project is at BSC stage and was delayed by budget shortfall.
- 6) There is a total of five (5) projects for sports and recreation one (1) project is at planning and design stage, two (2) projects are on construction between 40%-42%, two (2) are completed and one (1) is at design stage

8.15.5 IUDG OVERVIEW (Projects on construction)

No	Project Name	Adjusted 2021/22 Budget	Appointed amount	Expenditure	Start date	Completion date	Physical Progress (%)	Progress/ Comments

8.16 Unspent budget to be rolled over to 2022/23FY.

The total amount that is expected to be unspent and therefore rolled over in the 2022/23FY is R72 675 234.73. The table below indicates the projected unspent budget or projected rollover applications for all grants.

Item no.	Grant Name	2021/22FY Allocation	Expenditure by End June 2022	Expenditure %	Rollover Amount	Comments
1.	Integrated Urban Development Grant (IUDG)	R 397 532 000,00	R 387 363 008,63	97%	R 10 168 991,37	Appointment and commencement of ten (10) projects to a total value R R89,6mil were delayed due to road concession projects requiring additional funds in order to finalise the 2021/22fy scope. The projects pre-handover meeting was held on the 07th June 2022 and expenditure is anticipated during the 1st Month of the 2022/23FY.
2.	Water Service Infrastructure Grant (WSIG)	R 50 000 000,00	R 37 447 076,50	75%	R 12 552 923,50	The three(3) projects were delayed due to the grant conditions which state that the municipality may not proceed with any project without the business plan approval through the sector department, the Department of water and sanitation indicated to Polokwane municipality that new projects and the approvals of business plans would be withheld until the finalisation and or submission of groundwater reconciliation, following electronic confirmation of the approval of business plan on 30 August 2021, the municipality started with the design process and advertised the projects by 19 November 2021 with tender adverts closed on the 24th January 2022. The two contractors were appointed in April 2022.

Item no.	Grant Name	2021/22FY Allocation	Expenditure by End June 2022	Expenditure %	Rollover Amount	Comments
3.	Regional Bulk Infrastructure Grant (RBIG)	R 218 806 000,00	R 191 537 920,38	88%	R 27 268 079,62	Advertisement of tender to a value of approximately R400mil was delayed due to a moratorium issued by National Treasury. The tender was then advertised on 10th June 2022 and closing on the 08th August 2022.
4.	Neighbourhood Development Partnership Grant (NDPG)	R 48 000 000,00	R 25 314 759,76	53%	R 22 685 240,24	Advertisement of Three (3) Tenders to a total value of approximately R112mil were delayed due to a moratorium issued by National Treasury. The two tenders closed on the 14th June 2022 and the third tender will close on the 15th July 2022.
				Total to be rolled over	R72 675 234.73

8.16.1 Poor spending challenges

1. RBIG

The municipality has experienced frustrations with the IRS approval process, and this has impacted the municipality's ability to conduct long-term planning due to uncertainty of budgets. The RWWTW and Seshego WWTW tenders had to be cancelled due to reduced allocation and realign scope to available funds. This has caused delays and possible price escalations. The Mankweng WWTW IRS has not been approved. The municipality has written a letter to the department to clarify the need for upgrading the plant and a response has not been received. The plant is crucial to ensure sufficient capacity and quality of effluent and to accommodate the growth of Mankweng.

Polokwane Municipality made a fundamental change to an integrated approach to secure grant funding for aligned strategic water and wastewater projects up to 2022. Funding has been secured and project implementation has started. However, the administrative misalignment between the municipality and the DWS has negatively impacted the subsequent allocation due to Polokwane to perceived non-performance as the bulk water supply expenditure is not recognized by the department. This effort however is not recognized administratively due to unapproved IRS and the financial progress is further not recognized which culminates into a perception of poor performance by Polokwane Municipality. The allocations to Polokwane have been reduced and as such the municipality is working on an allocation deficit of R 384 515 566 from the Dora and some of the planned projects are stalled or on hold.

The Moratorium on the advertisement of projects from the National Treasury has affected the advertisement of the RWWTW and Refurbishment of Seshego WTW and will result in poor spending on RBIG.

2.IUDG

During the February 2021 budget adjustment process the 2020/21 financial year council took a decision to finance the rural road concession program through the IUDG grant. The IUDG grant has already been over committed with the inclusion of 24 new rural road concession projects in the 2020/21 and 2021/22 financial years and 34 roads in the outer two years 2022/23 and 2023/24 financial years.

The inclusion of these roads has resulted in some of the projects in the ordinary basic service delivery projects in this grant funding having to be 'pushed' back or cancelled to accommodate these new projects. The finding for the 34 projects was sourced from existing projects which were already in their various stages of forward planning and / or implementation. This has resulted in a huge number of transfer of funds from one project to another in the 2020/21 FY year and the same is anticipated in the current year pre and post the budget adjustment process.

During the February 2022 adjustment process, a further amount of R35 262 290 was made available to the rural concession projects, this meant that further projects that had not commenced construction had to be put on hold and deferred to the 2022/23 financial year

NDPG

The Moratorium on the advertisement of projects from the National Treasury has affected the advertisement of the Nelson Mandela Bookelo Crossing, Storm water Canal and Hospital View Additional streets projects and this will result in poor spending of the NDPG. The 2 projects on construction were completed by the end of June but the total spending on these projects was not adequate to spend the whole allocation

The 3 projects with an estimated value of R112 million were advertised with tenders closing in July and August, therefore the allocation could not be spent for these projects.

4. WSIG

The three(3) projects were delayed due to the grant conditions which state that the municipality may not proceed with any project without the business plan approval through the sector department, the Department of water and sanitation indicated to Polokwane municipality that new projects and the approvals of business plans would be withheld until the finalization and or submission of groundwater reconciliation, following electronic confirmation of the approval of business plan on 30 August 2021, the municipality started with the design process and advertised the projects by 19 November 2021 with tender adverts closed on the 24th January 2022. The two contractors were appointed in April 2022, and one tender has still not been appointed.

8.17 FORWARD PLANNING FOR 2022/23

2022/23 Grant budget

This part aims to update the progress on the municipality's Capital Infrastructure Program for the Financial Year (2022/23).

8.17.1 2022/23 GRANTS ALLOCATIONS – PMU MANAGED

GRANT	2022/23 FY BUDGET
RBIG	R154 584 000
IUDG(co managed with Roads and Transportation)	R426 044 000
NDPG	R40 000 000
WSIG	R77 160 000
EPWP	R 11 570 000
Total	R 709 358 000*

**Approximately R 146 227 000 is managed by Roads SBU*

8.17.2 SUMMARY OF FORWARD PLANNING

There a total of 54 PMU managed projects at a value of **R 563 131 000** funded from various grants with statuses categorised as follows:

PROJECT STATUS	NUMBER OF PROJECTS	VALUE
BSC	8	R66 567 000,00
CONSTRUCTION	22	R202 958 000,00
PLANNING	14	R62 675 000,00 (awaiting new panel)
PENDING	2	R30 300 000,00
DESIGN	3	R21 000 000,00

PROJECT STATUS	NUMBER OF PROJECTS	VALUE
ADVERTISED	5	R179 631 000,00
TOTAL	54	R563 131 000,00

8.17.3 2022/23 Financial Year Project Status Quo

8.18 INTERNAL AUDIT

8.18.1 Definition and mandate of Internal Audit

The International Professional Practices Framework defines Internal auditing as an independent, objective, assurance and consulting activity designed to add value and improve an organization's operations. It helps an organization accomplish its objectives by bringing a systematic, disciplined approach to evaluate and improve the effectiveness of risk management, control, and governance processes.

According to chapter 14, section 165 of the MFMA, each municipality and each municipal entity must have an internal audit unit. The MFMA allows the IAA to be outsourced to assist the municipality or the municipal entity to develop its internal capacity. However, the Council or the board of directors should ensure that it is cost-effective to outsource.

The Internal Audit Function of Polokwane Municipality has been established in terms of Section 165 of the Municipal Finance Management Act, 2003 (Act 56 of 2003). The primary objective of Internal Audit division is to assist the Municipal Manager and the Audit and Performance Audit Committee in the effective discharge of their responsibilities; Internal Audit

provide them with independent analysis, appraisals, recommendations, counsel and information concerning the activities reviewed, with a view to improving accountability and service delivery.

Section 62(1) (c) (ii) of the MFMA requires internal audit to operate in accordance with prescribed norms and standards. This would imply that Internal Audit Activity should apply the Standards for the Professional Practice of Internal Audit (SPPIA) in the execution of its functions.

The purpose of the Standards is to:

- Delineate basic principles that represent the practice of internal auditing.
- Provide a framework for performing and promoting a broad range of value-added internal auditing.
- Establish the basis for the evaluation of internal audit performance.
- Foster improved organisational process and operations.

Standards for the Professional Practice of Internal Audit (SPPIA) consists of Attributes, Performance and Implementation standards:

Attributes standard

Attributes standards address the attributes (characteristics) of organisations and individuals performing internal audit services. These includes that the purpose, authority and responsibilities of the Internal Audit Activity should be defined in the audit charter, Internal Auditors should apply proficiency and due professional care in discharging internal audit work and the Internal Audit activity should go through the process of quality assurance and devise a development program.

Standard 1110 requires that the “Chief Audit Executive should report to a level within the organization that allows the Internal Audit Activity to fulfil its responsibilities. The Chief Audit Executive must confirm to the ‘board’, at least annually, the organizational independence of the Internal Audit Activity”.

The standards further require that Internal Audit should be free from conditions that threaten the ability of the Internal Audit Activity to carry out internal audit responsibilities in an unbiased manner. Standard 1010 require that “The Chief Audit Executive should discuss the Definition of Internal Auditing, the Code of Ethics, and the Standards with senior management and the board. “Standard 1010 require that “The Internal Audit Activity must be independent, and internal auditors must be objective in performing their work”.

Performance standards:

Performance Standards provide guidance on the nature of audit work and planning, conducting, managing, communicating, and reporting throughout the audit activity, the

standards also address aspects such as resource and risk management, policies and procedures, control, and governance.

Implementation standard:

Implementation Standards are provided to expand upon the Attribute and Performance standards, by providing the requirements applicable to **assurance** or **consulting** activities.

Assurance services involve the internal auditor's objective assessment of evidence to provide an independent opinion or conclusions regarding an entity, operation, function, process, system, or other subject matter. The nature and scope of the assurance engagement are determined by the internal auditor.

Consulting services are advisory in nature and are generally performed at the specific request of an engagement client. The nature and scope of the consulting engagement are subject to agreement with the engagement client.

Internal Audit operate in terms of approved Charter which set out the nature, role, responsibility, status and authority of internal auditing within Polokwane Municipality and to outline the scope and responsibilities of the Internal Audit activity.

8.18.2 Internal Audit Strategic Coverage Plan

The rolling three-year Internal Audit Plan is developed based on the strategic organisational risk register and the annual Internal Audit Plan is derived or based on the Rolling Three-Year Strategic Internal Audit Plan.

The critical success factors for an effective internal audit plan are that it:

- Is aligned with the strategic objectives of the organisation.
- Covers the strategic risk areas facing the organisation, not just the financial risks and controls.
- Is risk based – addresses the key risk areas/concerns of management.
- Is prepared in consultation with management and the Audit and Performance Audit Committee.
- Matches assurance needs with available resources.
- The Internal Audit Plans includes risk based, performance information reviews compliance, ICT, financial, follow up and adhoc (requests from management) reviews. The Internal Audit Plans also highlights the objectives, scope, risks to achieving objectives and the resource allocation.

8.18.3 Audit Committee and Performance Audit Committee

The Audit and Performance Audit Committee (APAC) is a committee of Council primarily established to provide independent specialist advice on financial performance and efficiency, compliance with legislation, and performance management. A combined committee was

appointed to represent both Performance Audit and Audit Committees in compliance to section 166 of MFMA no 56 of 2003 and section 14(2) of Municipal Planning and Performance Management Regulations. The Audit and Performance Audit Committee must liaise with Internal Audit in terms of Section 166(3) (a).

The Audit and Performance Audit Committee must ensure that the strategic internal audit plan is based on key areas of risk, including having regard to the institution's risk management strategy. The Committee reviews the work of Internal Audit through the internal audit reports.

The Audit and Performance Audit Committee currently has three members, comprised of Chairperson and two members. The other two positions are vacant.

APAC operate in terms of approved Charter which outline the role, responsibilities, composition and operating guidelines of the committee of Polokwane Municipality and report to Council quarterly.

8.18.4 Operation Clean Audit (OPCA)

The Municipality also established a task team to drive the Clean Audit initiative called **“Operation Clean Audit”** and which aims at improving governance, financial systems and service delivery at both local and provincial government level, reversing poor internal controls, poor quality of financial statements and non-compliance with Supply Chain Management whilst attaining a clean audit opinion. OPCA committee has been established to address **Audit findings**.

The Task Team is an operational forum which formulates action plans and monitor progress in implementing action plans towards achieving a clean audit.

The Task Team report to Council via the Audit and Performance Audit Committee which is responsible to Council for financial and internal control oversight in line with the Audit and Performance Audit Committee Charter

Prevailing challenges noticeable include rrecurring audit findings indicated in the Internal Audit reports; information not presented to internal audit on time or not submitted at all, establishing greater synergy between Council committees and Audit and Performance Audit Committee; achieving greater compliance with key areas of legislation, the MSA, other regulations and policies.

8.18.5 Resources availability for Internal Audit

The current Internal Audit function comprises of the Chief Audit Executive, Assistant Manager: Internal Audit, seven (7) Internal Auditors. The contract of the Co-Sourced Internal Audit Service Provider has ended in May 2022.

8.18.6 Report of the Chief Audit Executive on AGSA Audit Opinions

Report of the Chief Audit Executive on AGSA Audit Opinions Matters for the term of the office of Council.

Auditor General (SA) Audit Opinion

2015/2016 Financial Year: Unqualified audit opinion with matters of emphasis

The matters of emphasis were as follows:

- Restatement of corresponding figures
- Material impairment
- Material under spending
- Unauthorized expenditure
- Irregular expenditure

Year	Audit opinion	Movement of audit opinion
2015/2016	Unqualified	
2016/2017	Qualified	
2017/2018	Qualified	
2018/2019	Qualified	
2019/2020	Qualified	
2020/2021	Qualified	
2021/2022	Unqualified	

-  Improved audit opinion
-  Maintained same audit opinion
-  Regressed

8.19 RISK MANAGEMENT

8.19.1 Risk Management core responsibilities

Risk Management is one of Management's core responsibilities in terms of section 62 of the Municipal Finance Management Act (MFMA) and is an integral part of the internal processes of a municipality. Risk Management is a systematic process to identify, evaluate and address risks on a continuous basis before such risks can impact negatively on service delivery capacity of a Municipality.

Polokwane municipality has a Risk Management unit, the role and responsibility of the unit is to develop and maintain an effective risk management system which will ensure an internal control environment that is conducive to the achievement of the municipality's objectives. This is achieved by developing and implementing an effective Risk Management framework and conducting institutional risk assessment in consultation with all stakeholders including the Audit and Performance Audit Committee on matters of governance.

8.19.2 Risk Management Committee

Oversight of overall Municipal risk management activities resides with Risk Management Committee and the Audit and Performance Committee. Risk Management Committee meet quarterly and report to the Audit and Performance Audit Committee.

The Position of Independent chairperson who is not an employee of the Municipality has been advertised and closed on the 12th August 2022 and is Anticipated to be filled by the 30th September 2022. The Risk Management Committee is responsible for reviewing the effectiveness of the municipal's risk management system, practices, and procedures, and provide recommendations for improvement. All Municipal Directors are members of the Committee. The committee as a collective possess a blend of skills, expertise and knowledge of the Municipality, including familiarity with the concepts, principles and practice of risk management, such that they can contribute meaningfully to the advancement of risk management within the Municipality.

8.19.3 The Risk Champions Committee

Risk Management Unit has also established a Risk Champions Committee which is chaired by Manager: Risk Management. Its main objective is to assist Risk management SBU in implementing risk management framework and cascading risk management processes to lower levels in the municipality.

8.19.4 Top 10 Strategic Risks Identified

Strategic risks are reviewed annually, the main purpose of the review is to assess progress made in risk treatment strategies, determine whether the risk identified in the previous year and mitigations were implemented and whether those risks are still relevant and identify emerging risks. Strategic risks are reviewed annually, and the process has been aligned with the IDP and Budget process to ensure that identified risk mitigations are budgeted for.

Below are the top 10 strategic risks identified for 2022/23 Financial Year

1. Ageing of infrastructure due to lack of sufficient funds for maintenance.
2. Electricity losses due to theft of electricity through illegal connections.
3. Water Scarcity.
4. Cash flow constraints.
5. Fraud and Corruption.
6. Negative Audit Outcome.
7. Rising community unrest, coupled with distraction of Municipal infrastructure.
8. Late delivery of services to the community.
9. Inadequate ICT.
10. Slow economic growth and development escalated by Covid 19.

8.19.5 Risk assessment review process

Risk assessment and review process is conducted annually at strategic and operational level where Directors and SBU Managers are consulted and encourage to identify risks and mitigations. Operational risks assessment and review is conducted for each SBU. Reporting of progress on mitigation both strategic and operational risk is done on the reporting system and monitored continually and reported to EXCO and Risk Management Committee.

8.20 Fraud and Corruption Strategy

8.20.1 Polokwane Municipality statement of attitude to fraud

Polokwane Municipality always requires all staff to act honestly and with integrity and to safeguard the municipal resources for which they are responsible. The Municipality is committed to protecting all revenue, expenditure, and assets from any attempt to gain illegal financial or other benefits.

Any fraud or corruption committed against the Municipality is a major concern to the Council. Consequently, any case will be thoroughly investigated, and appropriate corrective action will be taken against anyone who is found guilty of corrupt conduct. This may include referral to the South Africa Police Services and other relevant state organ depending on the nature of the matter. The Municipality has an approved anti-fraud and corruption strategy approved by Council.

8.20.2 Whistle Blowing Policy

Council has approved a whistle blowing policy in compliance with the Protected Disclosures Act, the policy is intended to encourage and enable staff to report suspected fraud and corruption activities within Polokwane Municipality rather than overlooking a problem or blowing the whistle via inappropriate channels. The Municipality also encourages communities and stakeholders or service providers who suspect fraud and corruption to report allegations of fraud and corruption using the protected disclosure.

An alternate way of reporting possible fraud and corruption can be made by contacting the Municipality's Fraud Hotline **(0800 20 50 53 or email cdm@tip-offs.com)**. The Fraud Hotline is available 24 hours in all official language, you have an option to remain anonymous or identify yourself when reporting.

8.20.3 Anti-Fraud and awareness

The Municipality conducts fraud awareness activities to create awareness on fraud and corruption prevention on a quarterly basis as required by the Fraud Risk Management Plan.

8.21 PUBLIC PARTICIPATION AND COUNCIL SUPPORT

8.21.1 Key Municipal Stakeholders

The relationship between the Municipality and its stakeholders is very important. The involvement of all stakeholders in the matters of the municipality is necessary because the municipality is accountable to them for decisions taken. Stakeholders are not only local people. They include governments and their agencies, as well as people, organizations, institutions and markets. Stakeholders include people and institutions that impact directly but also

indirectly on the organization, and they can include people who may not even be aware that they have a stake in the management of these organization.

The primary aim of stakeholder identification is to name all those who could and should have a stake in a planning and management process.

The following is a list of key stakeholders for Polokwane Municipality

- Traditional Authorities
- Community
- Business Sector
- Traditional Healers
- Government Departments
- Education Sector
- Non-Governmental Organisations
- Transport Sector
- Labour Unions
- Financial institutions
- Farmers
- Civic organisation
- Religious groups

8.21.2 Relationship with Traditional Leaders

The relationship between the Municipality and the Traditional Leaders has improved drastically and we were able to engage them on numerous occasions and towards and after any IDP/Budget Review consultations, the Municipality meet with Magoshi and discuss the consultation programme with them first before we go to our rural areas.

During the development of the New Organizational Structure (Organogram), Traditional Leaders have been officially placed under the Office of the Speaker and all engagement is facilitated from the Speakers' Office through Public Participation Unit.

The municipality have established a structural relationship between the Municipality and our Traditional Leaders. Quarterly annual schedule of meetings excluding IDP/Budget Review consultations. During the Community Outreach programmes (IMBIZO's), the Municipality pay courtesy visit to our Traditional authorities before the Executive Mayor speaks to the community.

The Executive Mayor have established an Annual Charity Fund that benefit the most Rural Poor Organizations (NGO's & CBO's) and to strengthen our relations, our Traditional leaders have been tasked to identify the neediest NGO's & CBOs to benefit from the proceedings.

The Office of the Speaker quarterly convenes special meetings with all Traditional Authorities to focus on Service Delivery matters and this has worked well.

Generally, the Polokwane Municipality has a smooth relationship with all our Traditional leaders, and they participate actively in our Municipality Programmes.

8.21.3 The building blocks of Good Governance

The building blocks of good governance are participation, accountability, predictability and transparency. Developmental local government requires municipalities to promote good governance and community participation. In promoting and ensuring a culture of good governance in providing services municipalities are required to establish components and mechanisms that promote good governance and community participation.

8.21.4 Ward Committee and CDW's

The table below is depiction of ward committee system and number of CDW's deployed in Polokwane municipality:

Table: Distribution of ward committees and Community Development Workers

Number of Wards	Number of CDW's	Number of ward committees	Number of wards committees not functional	Challenges
45	29	450	0	Limited capacity building programmes due to financial constraints Limited number of CDW's in the municipal area. CDW's report to CoGHSTA BUT MUST ATTEND ward committee meetings.

8.22 SECRETARIAT

8.22.1 The main objectives of the Secretariat unit

- To run an effective Councillors, support programme.
- To perform the general administration of Council, Mayoral committee and other committee established by Council.
- Perform the general administration of Council, Mayoral Committee and all other Committees established by Council.
- Internal Political Interface with the Mayor's Office, Speakers Office and the Chief Whip.
- To run an effective decision support programme for portfolio committees.

8.22.2 Challenges /Constraints at Secretariat and Records

- No adherence to the meeting dates scheduled for Portfolio meetings and MAYCO.
- Unavailability of items for discussion by portfolio committees.

- Office and record filling space.
- Implementation of Council resolutions
- Late submission of reports for packaging for portfolio, MAYCO and Council.

Interventions

- Adhere to the meeting date schedule for Portfolio meetings and MAYCO by regular reminders through cellular phones text messaging system.
- Request HR training division to attend to the matter of training and induction processes.
- Submission of reports for packaging in time to meet deadlines and comply with the Rules of Order Governing Council and Council Committees.

8.23 COUNCIL COMMITTEES

Council is the body that makes policy and oversees its implementation. Its key role in its current structure is to focus on legislative, participatory and oversight roles. The Executive Mayor is the political head championing the strategy of the municipality. Executive Mayor is assisted by the Mayoral Committee made up to 10 councillors and six are full time councillors. The Mayoral Committee is responsible for individual portfolio and report directly to the Executive Mayor.

Polokwane Municipality holds its Council meetings, on average, quarterly Mayoral Committee meetings are held fortnightly while Portfolio Committee meetings are held once a month. The Council is consisting of **45 Ward** Councillors.

Polokwane Municipality has a political presentation of **eight political parties**. The political parties and the number of its representatives are listed on the table below.

1. Total number of Councillors: = **90**
2. Total number of ward Councillors: = **45**
3. Total number of PR Councillors: = **45**

8.23.1 Political Parties Represented in Council:

There are **8 Political Parties** that are represented in Council of City of Polokwane:

	Name of Political Party	No of Councillors
1	ANC	56
2	EFF	21
3	DA	07

4	FF+	02
5	COPE	01
6	ABC	01
7	MSM	01
8	ACDP	01

8.23.2 Portfolio Committees

In accordance with the delegated powers and function of the executive, all reports first serve at the Portfolio Committee then escalated to Mayoral committee before they are submitted to Council for decision making. At the Council reports are noted and adopted.

The Municipality has **Ten (10) Portfolio committees**. Each of the ten members of the Mayoral Committee chairs a Portfolio Committee and reports their activities to the Executive Mayor. The Executive Mayor reports to Council during Council meetings, which are open to the public. Polokwane Municipality holds its Council meetings, on average quarterly, Mayoral Committee meetings are held once a month while Portfolio Committee meetings are held once a month.

8.23.3 MPAC - Municipal Public Account Committee

That in accordance with Section 129 (5) of the Municipal Finance Management Act, Council of Polokwane Municipality has adopted the "Guideline for Establishment Municipal Public Accounts Committees" ("Guideline"). The members of the Polokwane Municipal Public Accounts Committee ("MPAC") are consisting of the following Councillors:

Table: MPAC Members

	Name of Councillors:
1.	Cllr. Ngoasheng Lehlogonolo Herman (Chairperson)
2.	Cllr. Malatji Michael (Whip)
3	Cllr. Dikgale Sewela Julia
4	Cllr. Makhafola Daniel
5	Cllr. Mokobodi Mpho Victor
6	Cllr. Ramakgolo Maula Meriam
7	Cllr. Clarke Suzan
8	Cllr. Chidi Tiny
9	Cllr. Mohlabeng Dina Mkgadi
10	Cllr. Raphela Thokwana Richard

Members of Polokwane Municipal Public Accounts Committee are guided by the following pieces of legislation to consider and scrutinize the Annual Reports:

- Circular No. 32 of 15 March 2006

The MPAC has been tasked with the responsibility of assessing the annual reports of the Municipality. Council appointed a multi-party Oversight Committee to review the annual report

8.24 COMMUNICATION AND MARKETING

Communications and marketing are important elements of good governance. It is through communication that the communities and other stakeholders are informed about the activities, challenges and achievements of the municipality and thereby being empowered to participate in the affairs of the municipality. Section 18 of the Municipal Systems Act stresses the importance of communication between the Council and its communities. It gives guidelines of issues that the municipality must communicate about to its stakeholders.

The incorporation of Aganang Municipality resulted in the municipality growing bigger in size and this necessitates a review of the organogram and the approach model of the Communications and Marketing so that the municipality can efficiently respond to the needs of the communities in that cluster with the assistance of the Public Participation and Clusters Services.

A variety of media platforms are used to encourage community participation in municipal affairs. These include programmes of mobilizing, informing and educating, engaging and empowering communities in municipal affairs. The turnaround strategies and activities driven by the political leadership are highlighted during direct communication with communities and complemented by proper messaging.

The municipality is taking advantage of new electronic and social media channels to improve on the speed through which information reaches residents and other stakeholders. These include communication through mobile phones technology in the form of SMSs, chat groups, broadcast lists, Facebook, Twitter, YouTube etc.

Face-to-face, direct communications with communities & community structures are conducted through outreach programmes such as the mayoral roadshows, “Imbizo” and other interested groups meetings on a regular basis.

Services challenges and achievements, products and programmes of the municipality have been and continue to be profiled on various radio stations (national, regional and community) newspapers, posters and third-party website as a way of marketing Polokwane as a city that is capable to respond to the needs of its communicators and visitors to the province. The municipality created and maintained sound relationship with the media personnel.

The municipality has adopted a communications brand which is an umbrella brand that would provide shelter under which developmental activities that relates to the growth of the city should be communicated to the residents of Polokwane. The “Re aga Polokwane” (which means we are building Polokwane) platform is being used to ensure the City’s citizens have a better understanding of the various projects that the city is embarking on and why the city has

embarked on these projects. Further, the brand provides residents and businesses with a platform and opportunity for their own initiative to come up with programmes that will benefit and improve the city in various ways. The programme has taken off the ground.

Under this banner, the municipality must develop and implement a comprehensive well-researched marketing strategy that will implement campaigns geared towards revenue enhancement, water conservation, key municipal projects, service delivery achievements, investments opportunities and internal communications.

The municipality will continue to develop and improve processes to enhance public participation and strengthening of relations with critical stakeholders to entrench participatory local government.

There is a need to make full use of billboards, electronic and conventional) around the city and urban areas to communicate key programmes around awareness like water and environmental conservation.

8.24.1 Complaints Management System

The municipality uses suggestions books to record all complains, suggestions and complements by the community about municipal services or any other matter that affects the municipality.

The books are placed at the rates halls and cluster offices frequented by the public. The books are attended to regularly and content is shared with the affected SBU's to ensure that the inputs are attended to.

The Call Centre manned by the Community Services Directorate is available and allows members of the public to report complaints or other service-related issues. Processes are currently underway to implement an integrated or one stop call centre that will be able to deal with services standards within the municipality.

Currently the Facebook Page is used to complement the current control room where complaints and complements are forwarded to the relevant departments for intervention. Complaints are also received through government hotlines, walk-ins and media enquiries.

The municipality also participates in the District and the Provincial Hotline and Batho Pele Forums where management of complaints are entertained with the aim of reducing complaints received.

There is an urgent requirement for the municipality to have a dedicated business unit that will deal with the development of performance standards drawn from standard operating procedures developed by all the business units in the municipality. This will be used as a benchmark for acceptable and non-acceptable standards of delivery of services. This unit should be able to keep track of service complaints received from all government hotlines, suggestion books, walk-in, and control room and media queries.

8.24.2 New electronic and social media channels of Communication

The municipality is taking advantage of new electronic and social media channels to improve on the speed through which information reaches residents and other stakeholders. These include communication through mobile phones technology in the form of **MMS, SMS, chat groups, broadcast lists, Facebook, Twitter, YouTube etc.**

8.25 EXECUTIVE SUPPORT PROGRAMMES

The Executive Support Unit is located within the Office of the Executive Mayor to address issues that affect previously deprived and marginalized groups of the society, such as **women, children, youth, people with disabilities and older persons as well as people living with HIV**. The forums for all the targeted groups were established, including the Local Aids Council and the Local AIDS Council Technical Committee, with the aim of mainstreaming all the Executive Support programmes into the municipal services and processes. The Ward AIDS Councils will be Re- established in all 45 wards of the municipality. The unit plays a role of supporting and strengthening these councils to yield best possible results of reducing HIV and AIDS and other opportunistic diseases. Social ills such as Gender Based Violence, Teenage pregnancy, Substance abuse and others, are also addressed within these municipal structures. The HIV and AIDS/Special Programmes Centre provide training, information and counselling to individuals, organizations, schools and other community structures. The centre also serves as a condom distribution site.

Section 73(1) of the Municipal Systems Act, Act 32 of 2000 requires municipalities to give effect to the provisions of the Constitution to give priority to the basic needs of the local community and to promote its development. The Act, Section 73 (2) further states that

municipal services should be equitable, accessible and be provided in a manner that is conducive to the prudent, economic, efficient and effective use of available resources.

8.25.1 Core Function of the Executive Support SBU

The core function of this unit is to provide care and support services to the vulnerable groups in the community. Mainstreaming of services is ensured through the following programmes:

- **HIV/AIDS, STI and TB (HAST)**
- **Gender Focal Point**
- **Disability Rights Advocacy**
- **Youth Development**
- **Children's Rights Advocacy**
- **Older Persons' Rights Advocacy**

The Executive Support Programmes are regulated through community forums: i.e.

- Local AIDS Council, Local AIDS Council Technical Committee and The Ward AIDS Councils.
- Gender Forum and the Men's Forum
- Older Persons Forum
- Disability Forum
- Children's Rights Stakeholders Forum
- Youth Forum
- Civil Society Organizations Forum
- Plans are underway to establish the **Local Drug Action Committee** to address issues of **substance abuse**.

The Fast Track City Programme had been introduced in the City of Polokwane with the main aim of achieving HIV/AIDS, STIs and TB goals and objectives using the Local Implementation Plan by attaining the 90/90/90 targets. The 90/90/90 implementation will:

- Ensure that at least 90% of PLHIV and TB know their status.
- Improve access to Anti Retro Viral and TB treatment to 90%
- Ensure that 90% of PLHIV and TB who are on treatment are virally suppressed and those TB+s is cured.
- Increase the utilization of combination HIV prevention services,
- Reduce to zero the negative impact of stigma and discrimination,
- Establish a common web-based platform for real time monitoring progress.

All the programmes are implemented in collaboration with government departments, civil society organizations, faith-based organisations, traditional authorities and developmental partners to ensure effective services to the vulnerable groups.

8.25.2 Special Focus Challenges

Special Focus Challenges raised during the IDP Consultation meetings are:

Challenges raised during the IDP Consultation	Corrective measure
1. Braille Documents for the blind and partially sighted persons	As a short-term intervention strategy, the documents and agendas used during community consultation meetings are printed in Braille with the assistance of South African National Association of the Blind and Partially sighted (SANABP). Plans are underway to have the IDP and Budget document printed in Braille. Plans are also underway for the procurement of the Braille machine for the municipality.
2. The money raised during the Mayor's Charity Fund not enough to cover the huge number of NGOs in the Municipality.	The municipality in partnership with government departments and financial institutions strive to capacitate Community Based Organizations (CBOs) in terms of financial management and fundraising skills to ensure sustainability of their initiatives.
3. The Participation of people with disabilities and women as well in the procurement process.	Women and people with disabilities and youth are encouraged to register on the municipal data base.
4. Most of our buildings still not user friendly to our people living with disabilities.	Access ramps were constructed at the 1 st , 2 nd and 3 rd floor entrances of the building.
5. Inclusion of people with disabilities in the workforce (non-compliance to the 2% employment mandate) The Employment Equity Survey conducted confirmed an increase of employees with disabilities from 1.1% to 2% .	People with disabilities are encouraged to apply for advertised jobs through the disability forum and organizations.
6. Shortage of land for NGOs and CBOs.	The land acquisition and disposal of municipal property policy that was adopted by council will enable community organizations to make applications for leasing or buying of land. Plans are underway to seek permission for the utilization of some Municipal Vacant land as a one stop centre for community service organizations, including the Victim Support and Empowerment Centre.

8.26 Health and Social Development

8.26.1 Health Facilities Analysis

To optimize the delivery of quality health care services to the community of Polokwane, the provision of health services is fairly covering the communities. There are 40 clinics and 1 health care centre found in the municipal area. Most of the clinics operates 24 hours and are fairly equipped with all necessary infrastructures. The municipality also harbours a provincial hospital, 1 District hospital and 2 tertiary hospitals.

8.26.2 Regional Hospitals in the City of Polokwane

The following are the Major Hospitals in City of Polokwane

1. Polokwane Hospital
2. Mankweng Hospital in Mankweng township (30 km east of Polokwane)
3. Pholoso Netcare Hospital (next to savannah Mall)
4. Seshego District Hospital (10 km out of Polokwane City)
5. Knobel Hospital in Aganang Cluster (60 km North West of Polokwane.)
6. Med clinic Limpopo (Polokwane)
7. Rethabile Health Centre in Polokwane City
8. Over 40 clinics associated with all the above hospitals

8.26.3 HIV /AIDS Prevalence in Polokwane

HIV and AIDS

The burden of HIV and AIDS continue to pose a developmental hurdle because it put PLM's human assets at risk of morbidity and mortality. Data extracted from Regional Explorer (2019) showed that 59,664 people were infected with HIV in 2016; 69,539 in 2017 and 71,007 in 2018. During the same period, 1376 AIDS related deaths were reported in 2016: 1234 deaths in 2017 and 1241 deaths in 2018. Owing to an effective ARV treatment strategy adopted in 2009, AIDS related deaths reduced significantly by 9.8% between 2016 and 2018. The City of Polokwane is arguably one of the top HIV hotspots in Limpopo Province.

8.26.4 National HIV prevalence

The estimated National HIV prevalence was 29.5%, showing a slight drop of 0.7% from the 2010 national HIV prevalence (30.2%). However, Limpopo indicated a steady increase from 21.4% in 2009 to 22.1% in 2011 whereas the Capricorn District has shown an increase from 24.9% to 25.2%. The Polokwane municipality has therefore a vigorous role to play in the prevention and support objectives of the Provincial HIV and AIDS strategy. The Centre also serves as a condom distribution site (distributing \pm 120 000 condoms per month).

8.26.5 Awards Received by Special Focus

The Special Focus unit received an award for the most resourceful Council in terms of gender mainstreaming during the Capricorn/Swaziland Gender Protocol and Justice summit.

8.26.6 The 90-90-90 targets

The 90–90–90 targets are a set of global goals established by the United Nations Programme on AIDS and HIV. By 2020, the goal is that “**90%** of people living with HIV will know their HIV status, **90%** of those who know their HIV-positive status will be accessing treatment, and **90%** of people on treatment will have suppressed viral loads.”

These targets provide a good measure of how well different provinces are performing in key areas such as the provision and promotion of HIV testing and helping people who test positive to start treatment and to stay on treatment.

CHAPTER Nine - Municipal Transformation and Organisational Development

9.1. ORGANIZATIONAL STRUCTURE

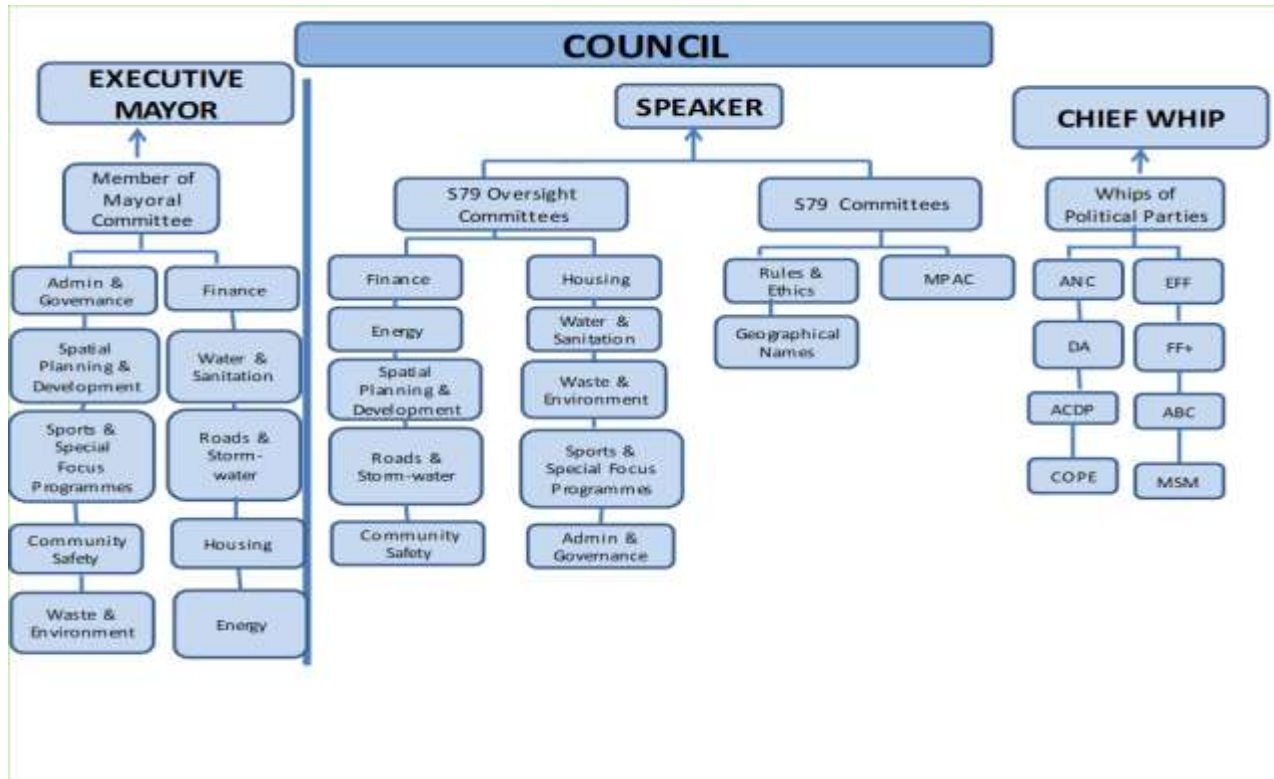

Municipalities are faced with increased scrutiny, budget constraints and pressure to improve services. Leaders are taking a hard look at Service Delivery as part of their strategic initiatives to modernize. Service delivery is carried out primarily through human capital. Polokwane municipality can only position itself to deliver effectively and efficiently from inside by attracting and keeping skilled workers and by also promoting itself as being a desirable place to relocate to or grow up and stay in. The ability to maintain skilled workers is accomplished by anticipating and accommodating new trends in service delivery, skills, local population, demographics and new economic opportunities.

The organizational structure is not simply an organization's chart. It is all people, positions procedures, processes, culture, technology and related elements that make up the organization. It explains how all these pieces work together (or in some instances they don't work together). The structure must be aligned to the strategic objectives of the municipality in order to achieve the mission and goals of a Smart City. The structure must be totally aligned with strategy for the organization to achieve its mission and goals.

The governance model consists of the Legislative Authority (Speaker of Council, Chief Whip and Section 79 Portfolio and Standing Committees), the Executive Authority (Executive Mayor and Members of the Mayoral Committee (MMCs) as indicated below.

9.1.1 Political Governance Structure

POLITICAL GOVERNANCE STRUCTURE

The position of a Transitional Advisor has been created for coordination of the metropolitan status processes and applications (metro status). The functions are listed as follows:

- Research on the attainment of Metro status with relevant Metropolitan cities.
- Benchmarking
- Analysis of status quo
- Assist directorates in identifying projects aimed at driving the attainment of a Metro in the IDP and budget
- Monitoring and evaluating set deliverables for various directorates.
- Regular reporting on project road map to EXCO, Portfolio Committees, MAYCO, and Council

The organizational structure has 4886 positions. The structure is being implemented through a phased in approach in response to new developments.

9.2 The organizational structure

9.2.1. Appointment of Senior Managers

There are Currently (10) Senior Manager Positions on the City of Polokwane's Organogram.

- 1) Municipal Manager (MM)
- 2) Chief Financial Officer (CFO)
- 3) Deputy: Chief Financial Officer (DCFO)
- 4) Director: Planning and Economic Development
- 5) Director: Community Services
- 6) Director: Strategic Planning Monitoring and Evaluation (SPME)
- 7) Director: Transportation and Roads
- 8) Director: Corporate and Shared Services
- 9) Director: Water and Sanitation
- 10) Director: Energy Services

9.2.2 New Senior Managers Positions on the organogram

The Organogram has additional 3 Senior Manager Positions that are all Vacant. It has been resolved that those 3 Senior Manager positions will only be filled when the City attains the **Metro status**, they are currently not budgeted for. Their Functions are still rendered by the other Directorates that are filled.

The City is finalising the **Protocol accreditation agreement** with CoGHSTA, once finalised the position of director: Human Settlement will then be filled.

- 1) Director: Human Settlement
- 2) Director: Public Safety = will only be filled in future once the municipality is declared metro
- 3) COO= Depends on the Metro Status

9.2.3 Total number of positions in the structure per Directorate

Table 1: Total number of positions in the structure per Directorate

Total																		4874

Source: PLK Human Resource Management SBU

The breakdown above excludes the 11 Directors and the Deputy CFO appointed on contract at level 0.

The total staff complement based on the current organizational structure stands at **2021** with a **2.97%** turnover rate. Municipalities are highly regulated as such it's a challenge to retain or

attract talent. It is a common occurrence that skilled employees will always look for greener pastures or leave for bigger cities due to the highly regulated salaries and wages. A job evaluation process is underway led by SALGA (South African Local Government Association).

The process is meant to:

- Evaluate all new positions within Polokwane Municipality.
- Implement the results of the evaluation in line with the wage curve.

9.3 Skills Development and Training

Training presents a prime opportunity to expand the knowledge base of all employees. In some instances, many employers find training as an expensive opportunity; work time is consumed by training session. Despite this drawback, training and development provides both the municipality and the individual employee with benefits that may cost time; however, it is a worthwhile investment.

9.3.1 Addressing Weakness in workplace skills.

Most employees have some weaknesses in their workplace skills. A training program allows you to strengthen those skills that each employee needs to improve. A development program brings all employees to a higher level, so they all have similar skills and knowledge. This helps reduce any weak links within the municipality.

Improved Employee Performance

An employee who receives the necessary training is better able to perform his/her job. The training may also build the employee's confidence because she/he has a stronger understanding of the systems within a municipality.

Consistency

A structured training and development program ensures that employees have a consistent experience and background knowledge. All employees need to be aware of the expectations and procedures within the municipality.

Employee Satisfaction

Employees with access to training and development programs have the advantage over employees in other institutions that are left to seek out training opportunities on their own. The investment in training that an institution makes shows the employees that they are valued. MSA 2000 S68 (1) requires municipalities to develop their human resource capacity to a level that enables them to perform their function and exercise their powers in an economical, effective, efficient and accountable way.

9.3.2 Skills Development Act (SDA)

The Skills Development Act (SDA) aims to provide an institutional framework to devise and implement national, sector and workplace strategies in order to develop and improve the skills of the South African workforce. Furthermore, it aims to provide the financing of skills development by means of a levy – financing scheme and a National Skills Fund. The Skills Development Act (SDA) aims to provide an institutional framework to devise and implement national, sector and workplace strategies in order to develop and improve the skills of the South African workforce. Furthermore, it aims to provide the financing of skills development by means of a levy – financing scheme and a National Skills Fund. The SDA also makes it a requirement for the municipality to compile a workplace skills plan and submit an implementation report. The municipality always adheres to this requirement.

9.3.3 Learnership programmes

Polokwane Municipality has implemented following Learnership program i.e.

TABLE 3: Learnership

Item	Numbers
Municipal Finance Management Programme	55 Employed

Source: PLK Human Resource Management SBU

Polokwane Municipality has a total of 85 employees that meet the Municipal Regulations on Minimum Competencies, 2007. Section 14 (4) requires of municipalities to compile a report on compliance with prescribed competency levels.

Twenty (20) employees have been enrolled with Resonance Institute for MFMP programme for the current year. The programme is funded by LGSETA.

9.3.4 Institutional Plan

Institutional Plan -The purpose of reviewing the municipality's Organizational Structure and service delivery model is to ensure that it reflects the municipality's mandate and meets its obligations to its community.

In reviewing the structure, a holistically look at any pertinent changes that would be warranted to the current structure was taken cognizance of. The COGTA Guidelines on Staff Establishment, the Municipal staff regulations of 2021, as well as other relevant legislations were used as a process tool to make necessary amendments.

The review of the organisational structure reflects the alignment to the IDP, and eventually saw the abolishment of redundant positions and additions of some that are deemed critical.

9.4 Employment Equity

Polokwane Municipality views employment equity as a strategic priority and it recognises it as an important measure against which a Smart City and a world class organisation is benchmarked. The creation of an equitable working environment, with the dignity of all employees respected and the diversity of employees valued and properly managed, as a solid base for longer-term growth and competitive advantage.

The transformation and the successful management of diversity will deliver a competitive advantage that will deliver a stronger, more cohesive and more productive municipality. It contributes to greater employee satisfaction and commitment resulting in lower staff turnover and stronger customer and stakeholder orientation and satisfaction.

MSA 2000 S67 requires municipalities to develop and adopt appropriate systems and procedures to ensure fair; efficient; effective; and transparent personnel administration in accordance with the Employment Equity Act 1998. In implementing such the Municipality should be realistic for these programmes to be achievable. They should be based on accurate

information about race, gender and disability and reflect the demographics within Polokwane Municipality.

9.4.3 Equity Plan for Polokwane Municipality

The Municipality has an Equity Plan as required by the Act in place. Positive measures are being implemented within the Municipality to ensure that positive measures as set out the Municipality's goals and targets are realised. The Employment Equity is guided by the National and Provincial Economically Active Population (EAP) as well as time frames. The plan needs continuous Monitoring and Evaluation. Development of an effective communication strategy, Consultation, and participation by all stakeholders. Research to inform ongoing policy making and planning process. The demographics as per Economically Active Population for Polokwane stands at 39.7% for women and 60.3% for men. The disabled employees constitute 1.68% of the total workforce as contained the total workforce table five (5) above.

It should be noted that at top management level the municipality has implemented targets and it follows the Equity plan. Challenges remain in the category of disabled persons and women. The solution to this is to:

- Implement targeted recruitment process (Targeting women and the disabled)

9.5 Job grade analysis

9.6 Vacancy rate and Turnover

The total staff complement based on the organizational structure stands at 2021 with a 2.97% turnover rate. The turnover is because of amongst others; the highly regulated environment, challenges of retaining skills because of rigid wage/salary grades. Nine (9) Sec 56/7 positions have been filled for the period in question and only two (2) positions are vacant which are new position because of the reviewed of the organogram.

The staff turnover for the year 2021/22 was at 2.97% which represents termination of 46 employees and the vacancy rate was at 58.64%. The high vacancy rate is because of the total approved positions in the organizational structure not necessarily the budgeted positions. When considering the total budgeted positions of 351, the vacancy rate is at 7.18%, which means the remaining 51.45% is non-budgeted.

The turnover rate and the vacancy rate are based on the organizational structure which was approved with 4857 positions. The tables below provide detail information on the organizational development of Polokwane Municipality.

9.7 OCCUPATIONAL HEALTH & SAFETY (OHS)

The aim of the OHS Act is to provide for the safety and health of employees at work and in connection with the use of plant and machinery. It further provides for the protection of people other than people at work from hazards arising out of or in connection with the activities from people at work.

The main objective of the Act could be described as a pro-active attempt by the employer to prevent and avoid work related injuries and illness. The Act governs the health and safety for the diverse industry of South Africa. It regulates and control health and safety in all organizations, from a normal office environment to more hazardous environments like industrial plants and construction sites this include the Polokwane Municipality.

Occupational Health and Safety is not only the responsibility of the unit but a function that is applicable at all Strategic Business Units. Occupational Health and Safety is about compliance issues that not only include the Occupational Health and Safety Act, but the compliance factor stretch over a variety of legislations including Mine Health and Safety, Railway Safety Regulator Act and Disaster Management Act.

New Regulations/Bill adopted in the Occupational Health and Safety Act

- OHS Act Regulation: General Safety Direction
- Draft Pressure Equipment Regulation 2021
- COIDA Amendment Bill

On the 16th of March 2022 the Department of Employment and Labour has listed SARS Cov2(Covid 19) as a group 3 hazardous biological agent (HBA) Regulation which has an important implication for employers. On the 20th of May 2022 the Minister has under Section 43 of the OHS Act made the amendments to the Asbestos Abatement Regulations

Hazardous Chemical Agent Regulation requires the employer to inform and train employees about any substance to which they are or may be exposed to in the workplace. All employers and self-employed persons who carries out work at a workplace which may expose any person to HCA must take note of the changes in the 2021 Regulation and ensure compliance to them.

All injury on duty incidents is reported by this unit to the Compensation Commissioner. This is done electronically to the Department of Labour. Due to the fact that the Commissioner is not paying hospitals and doctors our employees do not always receive the quality treatment they deserve. All injuries are investigated, and risk assessments are conducted for discussions on the relevant Strategic Business Units Health and Safety Committees. This is a legislative requirement.

In the event of serious injuries, the Department of Labour will investigate regarding this injury and this unit, represent the Polokwane Municipality. Occupational Health and Safety is also responsible for the drafting of safety specifications of personal protective clothing and ensure employees do wear them.

All construction projects must have site specific health and safety specifications and baseline risk assessment that the unit develop and must be included in the tender. Once the contractor has been appointed this unit must approve the health and safety file before any construction may start. During some of the construction projects Health and Safety Consultants are appointed and the management of these consultants are the responsibility of this unit.

Occupational Health and Safety Unit conducted Municipal wide inspections ensuring that compliance to OHS protocols to Covid 19 are adhered to. This ongoing and form part of day-to-day activities. In total on 86 sites safety checks were conducted from the period 1 July 2021 to 30 June 2022.

9.7.1 OHS unit Challenges.

Challenges that the OHS unit encounters:

- Staff complement is not sufficient to ensure that proper consultations and compliance are effective and manage health and safety pro-actively.
- Lack of training for OHS Officials to ensure that they are capacitated on new development and changes in the Occupational Health and Safety Act programmes.
- A proper electronic health and safety management system needs to be implemented.
- Late reporting of IOD by SBU's which results in non-compliance to the COIDA and may result in penalties.
- There is a need to capacitate Managers, Supervisors, and all employees on OHS training to ensure that there is a better understanding on compliance.
- Lack of proper scheduled maintenance programs that influence the health and safety of employees and public this include:
 - Fire alarms and smoke detection systems
 - Air conditioners
 - Falling structures/building

TABLE 7: Injury on duty

9.8 EMPLOYEE RELATIONS

Employment relations are important and viewed as key in the creation of a successful organization, economic prosperity. Employment is viewed as a critical factor for the development of any organization.

The Local Labour Forum is important as a point of engagement with organized labour. Training of Line Managers on employee relations remains key to the management of relationship in the workplace. Training must not only be restricted to line managers, but worker representatives also form an important part in employee relations, and therefore any capacity building initiatives should include worker representatives.

Workshops on employee code of conduct were held across all Directorates to make employees aware of the required standard for conducting oneself and newly appointed employees are specifically workshopped on the code of conduct.

The Municipality has seen a significant rise in disciplinary hearings involving indifferent behaviour, where senior employees and their juniors are unable to show courteous and mutual respect to one another.

Labour Relations has collaborated with Employee Assistant Programme to try and foster good relations between senior and junior employees.

9.9 EMPLOYEE ASSISTANCE PROGRAMED (EAP)

Employee Assistance Programme is important in any organization as it deals with the well-being of employees. EAP offers services that address personal, family problems and work-related problems. The range of psycho-social challenges that they assist with includes ill-health, poor productivity, personal finance management, emotional instability, stress and depression management, trauma, grieve and various addictions amongst others. Services are offered internally (to employees and management) and externally (to employees and their immediate families). Two service providers have been appointed for a period of three years to assist those who need further specialized intervention.

Employees often encounter challenges as they interact with their counterparts daily both in the workplace and outside. Some of employees who seek assistance are affected by poor working relations, lack of resources, unproductive communication channels and relations with superiors.

It would be in the best interest of the Employer and Employees to have regular team cohesion sessions, attend health proactive programme, self enhancement activities, as this will result in energised, goal orientated employees who are set to meet the objectives of the organization, resulting in return on investment for the employer.

EAP also incorporates proactive wellness programmes. It is very imperative for employees to be empowered on wellness issues, so that they can be informed and always be in the know of new medical developments or research findings which could promote healthy lifestyles. Proactive Information sharing sessions are conducted on issues such as cancer, substance abuse, HIV & AIDS, stress management, healthy lifestyle, work-life balance and so forth. Health screenings are also done quarterly to conscientize about their health status and make it part of one's lifestyle to undergo regular medical check-ups. These health screenings also help with early detection of health concerns. There is a need for employees to take proper care of their health and to participate in wellness programmes.

The Employee Assistance Programme has established a good working relation with stakeholder such as Old Mutual and Sanlam who are rendering financial wellness to our employees freely. This will go a long way in reducing the financial burden that they are subjected to which has resulted in several workplace challenges such as absenteeism, stress, poor productivity, and high turnover of resignation due to debts.

The impact of mental health should also be promoted and not be overlooked across the workplace. The EAP unit will continue to explore how they can support employees' emotional wellbeing.

The functionality of the Peer Educators programme within the workplace – this has prompted a positive outlook on the EAP activities such as wellness champions and promotion of healthy living, as by virtue of having support system in a form of health champion or an enabler it makes things easier for those who need support and knowledge. The availability of Peer Educators within all the directorate and clusters have created a pathway for promotion of EAP services and increased utilization.

The promotion and establishment of effective workplace Men's forums, with the overall aim of empowering male employees on ways of overcoming social ills, understanding and promotion of eradication of gender-based violence. Creating and promoting positive role models for younger men, see women as their social partner/equal. This will go a long way in building a better society and creating a conducive psychosocial environment for all to live in.

The impact of COVID 19 amongst employees had a huge impact on the delivery of services within the workplace. The Municipality has seen a significant increase on number of employees who had not been to work due to loss of lives amongst employees and all the departed were within the essential services.

EAP related challenges:

- Staff compliment is not adequate to ensure that proper servicing of employees is sufficient.
- Lack of contracted services to assist with the provision of EAP related services to employees (Psychologist, psychiatrist, Occupational Therapist, and rehabilitations centers)
- Lack of office space (Confidentially in compromised)

9.10 RECRUITMENT

Municipalities are at the coalface of service delivery. The challenges of transformation places municipalities in the centre of the job markets where competition is high. To survive and deliver services municipalities must ensure that they attract and retain talent.

To make smart hiring for top talent the municipality has approved a recruitment policy as well as a scarce skill policy. After all, an institution's productivity and profitability depend on the quality of its workers. The policies, considers a mix of factors, including credentials, work experience, personality, and skills.

Challenges of a highly regulated bargained environment persist although as an institution we have policies in place to attract and retain talent. Forty-six (46) vacancies filled. The Covid-19 continues to play a major role in making recruitment difficult. The new normal forces employers to be innovating in the recruitment process.

The municipality is currently reviewing the policy to align it with new ways of recruitment in line with the new Regulations for Staff. The turnover rate is reasonable at 2.97% it is attributed to the high unemployment rate as employee turn to stay longer except in the high skill category.

9.11 FLEET MANAGEMENT SERVICES

Fleet Management Services main function is to provide fleet management support to the municipality. The sub functions are including fleet administration, selection and procurement, risk management and disposal. The sub functions are listed as follow:

1. Fleet needs analysis and acquisition
2. Fleet Administration
 - Registration and license renewals
 - Vehicle inspection, maintenance and availability
 - Management and monitoring of vehicle utilization, tracking and fuel.
 - Driver behavior assessment and training
 - Compliance with NRTA, AARTO (traffic fine management) and OHSA
3. Fleet risk management
4. Fleet disposal

9.11.1 Number of Fleet

Polokwane Local Municipality has an overall of **722** units consisting of a mixed fleet of self-propelled and non-self-propelled.

1. Council Fleet =**497** (including 79 special car allowance scheme vehicles)
2. Fleet Africa =**225**

9.11.2 Municipal fleet status quo

9.11.4 New vehicle procurement status quo during 2021/2022

New vehicle procurement status quo during 2021/2022 total of 29 Municipal Fleet: The Municipality has procured 29 units comprising of light delivery vehicles, trucks, as follows:

- 5 x Waste Compactors trucks
- 2 x Grabs that were procured by the Municipality through tender process.
- 14 x LDV vehicles for Energy services was acquired through RT57 process.
- 8 x Cherry Picker trucks were acquired through RT57.

9.11.5 Project for the current financial year 2022/2023

The Municipality plan to procure 7 units comprising of trucks, machinery and earth moving equipment's as follows:

- x Yellow Fleet consisting as follows:
- x Graders

- 2 x TLB's
- 2x Waste Compactor trucks

9.11.6 Fleet Management Sourcing Strategy

In terms of the Fleet Management Sourcing Strategy a number of sourcing methods to procure and replace fleet units were identified. A hybrid model including outright purchase of fleet units, outsourcing of waste compactors and Special Car Scheme Allowance for law enforcement and traffic officials. To improve on efficiency of our business processes, a fleet support company was appointed to manage fleet administration including licensing, fuel, traffic fines, tracking, utilization and driver behaviour, risk management and as well as maintenance and availability.

9.11.7 Challenges within Fleet SBU

1. Budget

Budget provided fleet replacement is not aligned with the actual needs of the municipality. Fleet needs analysis is not centralized, resulting in resources allocated to SBUs not mandated with selection and procurement of fleet.

2. Ageing fleet

The municipality has a total of 722 fleet units consisting of a mixed fleet of self-propelled and non-self-propelled.

497 municipal owned fleet units, 225 Fleet Africa fleet units with 427 units that is 59% of the overall fleet that had aged (i.e.: as far as 10-20yrs) that is guided by the Fleet Policy.

3. High maintenance costs

Council has procured a fleet solution which provided for managed maintenance option. This option functions better provided that fleet units are new/ relatively new and procured with maintenance/ warrantee/ service plan. The biggest driver of this maintenance cost is due to ageing fleet and fleet units procured without maintenance/ warrantee/ and service plan. The other major driving force of high maintenance costs is the contractual mark-up added on repairs, maintenance and accessories. Driver behaviour also a mayor contributing factor to high maintenance costs.

4. Utilization and fuel management

Vehicle log sheet and fuel slips are not submitted timeously as per the fleet policy by some SBUs.

5. Driver behavior and negligence

The municipality is experiencing high accident rate that results in vehicles been written off before their expected vehicle life cycle.

9.11.8 Interventions and control measures

1. Engagements and consultation with BTO, during budget consultation process to address the budget challenge.
2. Centralisation of fleet budget to Fleet Management Services SBU.
3. Engagements with other SBUs with regards to institutional fleet needs analysis.
4. Submission of monthly vehicle utilisation and fuel reports to SBUs.
5. Future procurement of vehicles will include maintenance plan or warranty.
6. Market related mark ups should be negotiated to the benefit of the municipality.

9.12 INFORMATION COMMUNICATION AND TECHNOLOGY (ICT)

The world has seen extraordinary development in information and communications technology with significant global dimensions. It is impossible to ignore the importance of ICT wherever and whenever good governance is pursued. The use of ICT has been identified as the other challenge facing the transformation of municipalities, both within local government agencies and also regarding to external stakeholders (traditional leaders, citizens and local businesses). The effective and intelligent use of ICT has been an essential component of modern administrative science. It is a fact that ICT has great potential to speed up the transformation process. However, the public service track record in the use of ICT is far from ideal. It is a verity that ICT has brought a bright perspective to the human condition, but two factors must be taken into consideration, in order to take advantage of it and to facilitate public participation: accessibility and availability. If this aspect is not addressed, the use of ICT for more efficient public-service delivery might become a value which serves the vested interests of a few stakeholders, while others view them as constraints to their freedom.

ICT plays an important role in strengthening democracy, as it improves the relationship between citizens and public administration. The relationship includes the information privacy of citizen boundaries within and between the organizations; political and public accountability; and citizenship in a consumer democracy. Strategically use of ICT in a public service environment produces the following benefits:

- Speed or quality of service delivery
- Increased public access to service agencies or departments.

- The facilitation of remote communication and transactions
- Enhance transparency.

The integration of public services and the destruction of the administrative walls separating bureaucratic departments and government agencies.

9.12.1 ICT - SMART City Concept

During the State of the City Address, the municipality announced its adoption of the 2030 Smart City Vision as a way of fast-tracking service delivery to the community. Consistent with the 2030 Smart City Vision, the city launched six pillars that will assist the municipality to work towards the realization of becoming a Smart City; this will be the city that is characterized by a Smart Economy, Smart Environment, Smart Governance, Smart Living, Smart Mobility and Smart People. This Smart City concept is carried within the city's vision to be the "The ultimate in innovation and sustainable development".

All six of the aforementioned elements of a smart city can increasingly become more achievable and manageable by being connected through the use of ICT and developing technological systems. Furthermore, we believe that there is a great opportunity for this council to join other smart thinking cities the world over who see the opportunity to own ICT infrastructure which may be a major source of revenue in the future.

9.12.2 ICT Governance

The ICT SBU is required by the Corporate Governance of ICT Policy Framework (CGICTPF) to develop and maintain an ICT Architecture, consisting mainly of the **ICT Strategic Plan** (also known as an ICT Strategic Master Systems Plan) **ICT Implementation Plan, and Operational plan**; and those three plans are approved and adopted.

Diagram shows the alignment of Municipal objectives and ICT objectives.

Source: PLK ICT SBU

The strategy aims to ensure ongoing support to the municipal users by means of improved service delivery, by achieving the following objectives:

- Objective:** To provide integrated ICT solutions.

Description: To make municipal services more accessible on e-services (i.e. online), which will reduce the cost of accessing the services and improve turnaround times and strengthen accountability and responsiveness.
- Objective:** To enhance ICT Infrastructure and develop smart technology solutions.

Description: To design, develop, implement and maintain the hardware, software, data center and a high-speed communication network in keeping up with emerging technological trends in order to enhance the performance of service delivery.
- Objective:** To continuously improve in the development and implementation of ICT Governance.

Description: To continuously implement, evaluate and monitor Corporate Governance of ICT Policy Framework in order improve the ICT SBU's operations.
- Objective:** To provide a secured ICT infrastructure that assures integrity, confidentiality, and availability of municipal data, information and knowledge.

Description: To continuously enforce the implementation ICT security Framework across all hardware and software in order to protect data as a municipal asset.

Implement Corporate Governance of Information and Communication Technology Policy Framework (CGICTPF):

Phase 1 - Create an enabling environment for the implementation for the Corporate Governance of ICT and Governance of ICT.

- Information and Communication Technology Steering Committee was in place with 4 quarterly meetings held for the period under review.
- Information and Communication Technology Policies are in place.

Phase 2 - Strategic alignment (Collaboration of ICT and Business) was completed and the governance documents were adopted by council.

- The 2022/23 Operational Plan is being drafted for adoption.
- The ICT Strategy is in the fifth and final year (F/Y 2022/23) alignment to new business objectives is required and the process will start in the current financial year (2022/23).
- Enterprise Architecture project as part of the CGICTPF.

Phase 3: Continuous improvement of governance and strategic alignment arrangements

- Information and Communication Technology has drafted the Cyber Security Procedure to deal with threats related to Cyber Crime.
- The ICT Policies, Disaster Recovery Plan and ICT Business Continuity were adopted by Council for Implementation.

9.12.3 ICT Challenges

- a) Electronic Documents and Records Management System (EDRMS).
- b) Partially integrated systems.
- c) Connectivity to Cluster Offices and Telephone Systems
- d) Aging Desktop Hardware and Network Cabling Infrastructure

Interventions

- a) Implementation of Enterprise Resource Planning to ensure integrated solution with all systems modules including EDRMS.
- b) Continuous improvement and maintenance Connectivity and VOIP Telephone System.
- c) Replacing old Desktop Computers and Network Cabling with latest technologies

9.12.4 Enterprise Resource Planning Project

Objective:

- a) To digitize and modernize business operations to enable delivery of services effectively and efficiently.
- b) To upgrade server hardware, financial management, and HR system.
- c) To automate manual operations.
- d) To resolve the incorrect billing currently experienced.
- e) Implementation of Electronic Documents and Records Management system

Deliverables:

- a) ICT Infrastructure Upgrade, Security Systems and Disaster Recovery.
- b) Implementation of Financial Management System
 - Revenue Management
 - Supply chain Management
 - Billing
 - Contract Management
- c) Implementation of Human Resource Management.
 - Employee's self service
 - Payroll
- d) Integration of 3rd party systems to FMS
 - TCS
 - GIS
 - Performance Management
 - Risk and Audit management system
 - Library system

Progress to date:

- a) New server room hardware was implemented in 2018/2019 Financial Year, and it is at a maintenance stage.
- b) A new Firewall security system has been implemented in the 2020/2021 Financial Year.
- c) Financial system (Munsoft and SAGE 300 People) was implemented, and Management w successfully generate Annual Financial Statements for two Financial Years.
- d) Integration of Payroll and, GIS and Munsoft completed
- e) Electronic Documents and Records Management System implementation is underway

9.12.5 New Hardware Upgraded (2019/20 FY)

Below picture shows the new hardware installed as part of Data centre upgrade in the 2019/20 FY and the systems.

Figure: New Hardware

Source: PLK ICT SBU

9.12.6 New Hardware Benefits

- a) The new storage of has been upgraded to **100 TB**
- b) Backup and disaster recovery system that has resolved audit queries for Business Continuity and Disaster Recovery.
- c) A new Firewall security system has been implemented in the 2020/2021 Financial Year,
- d) Improved compliance e.g., AGSA findings, and
- e) Stability and improved response time of systems such as email, internet and other systems.
- f) High availability of critical server equipment.
- g) Hardware is under manufacturer warranty maintenance unlike the old infrastructure.

applicable on the Municipality main line telephone numbers: **015 290 2000 and 015 023 5000.**

9.13.4 Telephone System Challenges

The major challenge that we have with the Call Centre telephones is the **fiber connectivity** between the Civic Centre. Each Month the fiber connection between the two sites is damaged and for business continuity we rerouted the connection through a temporary link. Below pictures show the damage and repair process.

Figure: Damage and repair process of fiber connection.

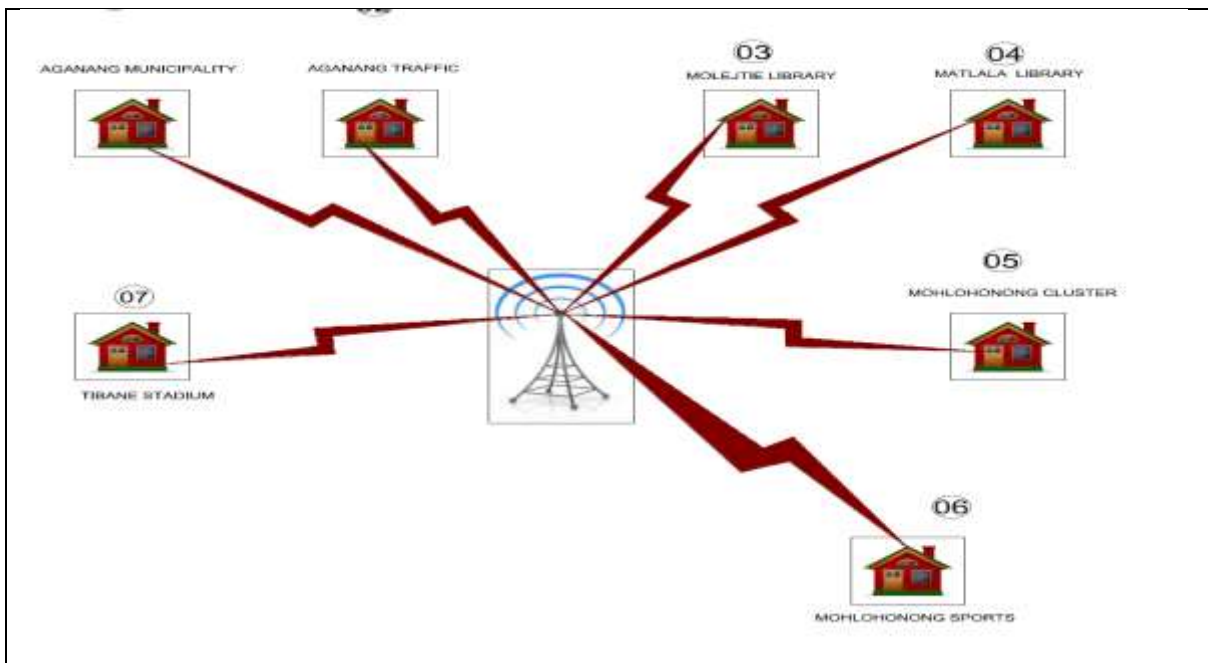

Source: PLK ICT SBU

9.13.5 Connectivity for Aganang Cluster

Connectivity for Aganang Cluster

Source: PLK ICT SBU

9.13.6 Connectivity for Molepo/ Chuene/Maja Cluster

Connectivity for Molepo/ Chuene/Maja Cluster

Source: PLK ICT SBU

9.13.6 Network cabling in the offices

Before and after situation of network cabling in the offices.

Another challenge for telephones is related to network cabling in the offices. Most of the network cabling in the offices is old, recently appointed a service provider to replace the old cabling. We have started with 10th floor at Civic Centre and Ladanna Traffic Office, below pictures show the before and after situation.

Before and after situation of network cabling in the offices.

Source: PLK ICT SBU

9.14 RECORD MANAGEMENT

9.14.1 Record Management Objectives

The main objectives of the unit are:

- a) To keep all Records and perform the general administration of Council, Mayoral Committee and all other Committees established by Council.
- b) To attend to the electronic document management system
- c) To move away from paper documents to electronic documents for all committees.

9.14.2 Challenges/Constraints for Record Management

- a) Lack of Electronic document management system
- b) Lack of storage cabinet for current files

Solutions:

- a) The Implementation of Electronic Documents and Records Management System
- b) Institution record management awareness or roadshow.
- c) Request HR training division to cover Record Management as part of induction package for new employees.

9.15 LEGAL SERVICES

The municipality has a well-established legal services unit which is responsible for the following:

1. Co-ordinate, facilitate and manage all external and internal legal actions and processes on behalf of and against the Municipality.
2. Develop and review by-laws and policies.
3. Develop and review a system of delegation of powers.
4. Advise on matters of legal compliance.
5. Effective legal support services
6. Municipal policy framework
7. Contracts (including service level agreements) drafting and vetting.
8. Finalization of (long) outstanding litigious matters.
9. Management of Illegal Land Use.

9.15.1 Core Functions of Legal Services

The Unit is further sub- divided into the following **4 Specialized** areas:

1. Litigations
2. Properties
3. Legislation and law enforcement
4. Governance and corporate affairs

The unit has **FIVE** lawyers appointed to handle each area of specialization in the municipality.

1. Litigation

There has been growth in litigation initiated by law firms and private parties since the beginning of the new democracy; this signifies the population exercising their rights freely in the courts of law. There is a need for the Municipality to put measures in place to reduce costs where is necessary to do so. The current panel of qualified and experienced Attorneys from where appointment to represent the Municipality is coming to an end. However due the current pandemic in the country, an extension is ought for the extension of the panel until the advertisement and appointment is finalized. Attorneys are appointed on a necessity basis as some matters are according to their complexity handled internally and/ or referred to the Insurance with a view to reduce legal fees. As a way of reducing spending on cases, matters

that are less complex are handled internally and when the matter is ripe for hearing an Attorney is appointed to represent the Municipality as and when a need arises.

Cases emanate from different causes of actions which are categorized hereunder:

- Contract Management 04
(3 handled externally and 1 handled internally)
- General damages 27
(20 handled externally)
(7 handled internally)
- Public liability 13
(All handled externally)
(19 referred to the Insurance)
- Services rendered 12
(All handled externally)
- Revenue management 2
(2 handled externally)
- Illegal land use 47
(All handled external)
- Notice of motion (applications) 9
(Handled externally)
- Summons issued by the municipality 2
against third parties
(All handled externally)

Challenges Litigation

1. Locus standing to appear in court challenged which may have an impact of cases handled internally, if found wanting this will have an impact on the budget as it will mean we have to appoint external attorneys.
2. Civil litigation takes a long time to finalize and this impact on the budget as there has to be more funds budget to finalize the matter.
3. Further instructions from User departments not furnished and thus impacting on the outcome of cases.
4. Lack of financial resources (constraint budget) with the permanent sit of the High in Polokwane, Claimants opt for litigation in the High Court.
5. Non-compliance with rules and regulations resulting in litigation and exposing the Municipality to financial risk.

6. No progress from matters referred to the Insurance resulting in matters pending for a long time.
7. Illegal land-uses in the city increasing daily.
8. Reliance on the internet for research on legal opinions
9. Lack of storage resulting in decentralization of files/ information

Intervention Litigation

1. Attorneys called for in house clarity where same is sought.
2. Instruction to dismiss long outstanding matters issued.
3. Supervisory intervention in the event of instructions not being furnished.
4. Pleadings in other matters are prepared in house and finalized by in-house legal advisors, in other files referral for appointment is done at a later stage.
5. A need to come up with strategy on handling of illegal land-use without litigating.
6. Establishment of legal library
7. Creation of storage space

2. Governance and Corporate Affairs

Challenges Governance and Corporate Affairs

1. Service Providers take time to return the signed agreements for Municipal Manager's to sign.
2. Delay in appointment of legal advisors.

Interventions Governance and Corporate Affairs

1. Service Providers should not be allowed to render services before the agreement is signed.
2. Expedite appointment of Legal Advisors to assist with governance and corporate affairs matters.
3. To review matter with potential of settlement without setting a precedence for future claimants.

3. Legislation & Law Enforcement

Challenges experienced in the drafting of By-Laws and Policies

1. It happens from time to time that SBU's do not include Legal Services in the consultation process when embarking on the drafting of various by-laws and policies.
2. This conduct causes delays in the process and also creates a risk for the municipality where documents which have not been legally vetted gets adopted by Council.

Interventions aimed at addressing challenges.

1. Regular updating of the Municipal Code Enables Legislation and Law Enforcement to effect amendments to and to update existing policies and by-laws and presenting such documents to the relevant SBU's requesting their comment and inputs.
2. Such relevant policies and by-laws are then reviewed and updated via this initiation process, thus minimizing possible risk.

Challenges Legal Property

1. Purchasers relies on financial institutions to finance the sale of the immovable property through mortgage bond and the process delays the transfer of ownership.
2. Dealing with project managers who does not have necessary expertise in property matters or real estate.
3. Delay in finalizing matters.

Interventions Legal Property

1. Property Management SBU should manage ALL Council owned properties.
2. The Department of Rural Development has brought service closer to the City of Polokwane by opening the Office of the Registrar of Deeds and this will enable the Municipality to expedite the transfer of ownership of the immovable properties and registration of Notarial lease agreements.
3. Increase capacity in the Property Management SBU.

9.15.2 Legal Services challenges

9.15.3 Interventions-Legal Services

1. Appointment of legal Services Officials to be members of Bid Specification Committee (BSC).
2. Review matters with potential of settlement.
3. Approval of quotation for quality assurance and effective drafting of SLA's finalization.
4. Budget provision
5. Handling of litigious matters internally prior to handing them over to private attorneys
Constant engagement with the justice cluster (Judiciary) to ease the delay in dealing with contraventions of Municipal By-laws.

9.16 FACILITIES MANAGEMENT

The Municipality has established the SBU to assist in maintaining and up keeping of municipal buildings. The SBU is responsible for routine maintenance over **110 municipal facilities**. The objective of the SBU is to maintain municipal facilities in accordance with SANS 10400:1990, SABS Standard Act: 2008 and the Occupational Health and Safety Act Regulations Act 85/1993 and Safety at Sports and Recreational Events Act 2010 (Act 2 of 2010) (SASREA) in order to provide a conducive environment to the employees and the community at large, utilising or visiting the Municipal offices.

9.16.2 Procedures for maintenance services

The following procedures are in place when maintenance complains, or request have been received at the facility management unit:

1. Every maintenance service request forwarded by a client to the office of facility management SBU shall be recorded.
2. Once the request has been received a response to acknowledge the request is sent back to the client.
3. At the closure of each request the client shall sign off on the job card which was opened at the beginning of the request.
4. Should a job card come back with comments that it cannot be done internally; the client will be informed of such, and the request will further be attended to by a service provider until its closed.

Priority of work and response times

Priority of work is taken up in three stages:

- (i) High priority: where maintenance is required by law or is life threatening and affects or compromises the core business of the Municipality. This request shall be attended to at our earliest convenience.
- (ii) Medium priority: where maintenance is not of a high priority. This request shall receive the priority it requires.
1. Low priority: where the core business of the Municipality is not compromised by the need of maintenance. This request shall receive the priority it requires.

9.16.3 Maintenance of municipal facilities

Routine maintenance

Routine maintenance is regarded as a service attending to day-to-day maintenance needs. This type of maintenance is done when maintenance requests are reported to facility management by the client on a day-to-day basis.

Scheduled Maintenance

This type of maintenance is regarded as maintenance needs identified by way of annual, quarterly and monthly inspections conducted by the facility management SBU. The findings are then handed over to PMU for further assessment and implementation.

9.16.4 Trades conducted under routine maintenance.

ITEM	SERVICE/TRADE	DESCRIPTION
1.	Electrical maintenance works:	<ul style="list-style-type: none"> • Repair/replace plugs, switches, light fittings and bulbs • Repair/replace electrical reticulation within erfs • Verification and certification of electrical installations on premises • repair/replace distribution board
2.	Plumbing maintenance works:	<ul style="list-style-type: none"> • Repairing/replacing of damaged sewer pipes • Replacing of sanitary ware: basins, toilet pots, seats • Replacing of damaged toilet mechanisms • Unblockng of sewer pipes • Repairing/replacing of damaged water supply pipes • Repairing/replacing of damaged rain water gutters • Repairing/replacing of element in the geyser and geyser complete
3.	Air conditioning maintenance works:	<ul style="list-style-type: none"> • Repairing of elements in the air-conditioners and heat pumps • Replacing of damaged elements, gas etc. • Servicing of air-conditioners and heat pumps
4.	Sound and microphones maintenance works	<ul style="list-style-type: none"> • Repairing/servicing and replacing of microphones • Repairing/servicing and replacing of amplifiers • Repairing/servicing and replacing of speakers • Repairing/replacing of cables and wires
5.	General building maintenance works	<ul style="list-style-type: none"> • Repairing of damaged brickwork • Repairing of damaged plastering and painting work • Repairing/replacing of damaged carpets • Replacing of damaged window panes
6.	Carpentry and joinery maintenance works	<ul style="list-style-type: none"> • Repairing/replacing of damaged ceilings • Repairing of damaged wood furniture and doors • Repairing/replacing of door locks, hinges, window stays and handles etc. (Ironmongery)

9.16.5 Codes and Standards

Paint colours

- (i) The standard paint colours to be applied on interior walls of municipal facilities are cream, white or peach, unless otherwise specified by the client as special request.
- (ii) The standard paint colours to be applied on exterior walls of municipal facilities falls under the earthy group of colours or corporate colours, unless otherwise specified by the client as special request.

Carpets

- (i) Standard carpets to be used are tile carpets.
- (ii) Standard colour on the carpets is blue for all and maroon for executive offices.

Tiles

- (i) Tiles to be used are porcelain and should be non-slippery
- (ii) Staircase tiles must be fitted with an aluminium non-slippery strip

Roof coverings

- (i) Roof coverings should have a non-reflective finish

9.16.6 Covid 19 Fumigation of Municipal Offices

In order to Control the Spread of **Covid 19** Virus at Polokwane Municipality. The Facilities Management SBU is Responsible for Fumigation of all Municipal Facilities after positive Cases are identified in the offices.

CHAPTER Ten: Roads and Transportation Services Analysis

10.1 Transportation Services

10.1.1 Introduction

Local government is responsible for creating, maintaining, and managing a vast network of local roadways, as well as providing both private and public transportation infrastructure and services. It also plays a crucial role in establishing integrated transportation planning.

10.1.2 COMPREHENSIVE INTEGRATED TRANSPORT PLAN (CITP)

National Land Transport Act of 2009 requires all Transport Authorities to develop the Integrated Transport Plans for their area for a period of Five (05) years and must be updated annually. The CIPT must be submitted to the MEC for approval. Polokwane Municipality must also submit its CITP to the Minister for approval of the Commuter Rail and Airports.

Polokwane Municipality CITP was developed in 2012 and still needs to be updated. It was adopted by Polokwane Municipality and was also approved by MEC as a living document which guides the Transport Planning within Polokwane Jurisdiction.

10.1.3 COMMUTER TRANSPORT CORRIDORS AND FACILITIES

There are two major commuter transport corridors in Polokwane:

- 1) Between Seshego/Moletji and the CBD
- 2) Between Mankweng and the CBD

Seshego/Moletji Corridor: This corridor serves the \pm 38 000 households north-west of the CBD. Most commuters in this area stay within 15 km from the CBD in the Seshego, Perskebult, Blood River, Moletji and surrounding residential areas. According to the 2010 National Household Travel Surveys, less than 4% of working people staying in Seshego also work there. 74% of working people who stay in Seshego, work in Polokwane. The corridor is served by taxis and buses with the modal split 4:1 in favour of taxi passenger trips. The split between public and private transport is also 4:1 in favour of public transport trips.

Based on travel-time surveys undertaken in 2012, the average travel speed on this corridor (including stops) is around 35 km/h. This means that commuters from Seshego take approximately 25 minutes to travel the average distance of 15 km to town. This excludes other legs of the journey such as walking from the drop-off to the actual place of employment.

While the Seshego-Polokwane Taxi Association serve the Seshego area up to \pm 15 km from the CBD, the Moletji Taxi Association serves the area further north, as far as 80 km from town. The population density north of Perskebult is however very low and the number of passenger trips are low in comparison with those from Seshego.

Mankweng Corridor: Taxis from the Mankweng Taxi Association make use of this corridor to serve commuters staying in villages in the Mankweng and Moria areas, between 25 and 50 km east of the CBD. Taxis from the Sebayeng and Dikgale villages along the northern municipal boundary use the R81 while villages in the Mankweng and Moria areas are served by taxis using the R71. The 25 km travelled on the R71 increases the average speed to 50 km/h meaning that a taxi from University of Limpopo in Mankweng will cover the distance of 30 km to town in \pm 35 minutes. The 40 km to the Boyne taxi rank in Moria will take \pm 50 minutes.

10.2 MODE OF PUBLIC TRANSPORT FACILITIES

Seshego/Moletji facilities: Public transport facilities on this corridor consist only of bus/taxi stops and lay-bys on some arterial roads, because commuters are picked-up along the routes in the AM by both taxis and buses, there are no formal ranks in the residential areas. In the PM, commuters are also dropped off along the route. The fact that there is no need for modal transfers or transfers from long distance to local taxis also negates the need for ranks in the area.

Mankweng facilities: Because of the longer distance from town compared to Seshego, Mankweng has a more vibrant commercial center. The University of Limpopo (Turf Loop campus), the shopping center and the hospital form the core of the economic hub in Mankweng. Public transport users coming from the university shopping center and hospital rely on taxis departing from the Turf Loop Plaza Rank and the Hospital Rank to take them to town or the surrounding villages. These ranks are not specifically used during the AM or PM peak as is the case for most ranks but are used at a low intensity throughout the day as nurses finish their shifts and students come from class.

Polokwane CBD facilities: For inward trips, most of which are during the AM peak, bus and taxi passengers are dropped-off at various bus and taxi stops throughout the CBD. The lack of lay-bys or formalised drop-off points in the CBD however forces taxis and buses to stop in the roadway to off-load passengers. This blocks the general flow of traffic resulting in unnecessary congestion and vehicle-pedestrian conflict.

It is generally accepted that taxis and buses off-load commuters along the route instead of at a central rank. This is done to reduce walking distances and enable commuters to get to work quicker. For outward trips, most of which are during the PM peak between 16:00 and 19:00, taxis and buses depart from various ranks within the CBD. There are more than 23 taxi facilities in the Polokwane Municipal area of which approximately 60% are formalised.

A total of \pm 17 ranks provide local commuter services. There is only one informal rank specifically dedicated for long-distance taxis, while the remaining ranks provide both local and long-distance services. There are also four taxi holding areas of which only one has been formalised. There is a rank in Hospital/Silicon Street for subsidised commuter buses and a terminus in Thabo Mbeki Street for long distance buses. Metered taxis do not currently have allocated holding areas but on street locations are used to hold and load passengers.

- i) Pick 'n Pay Taxi Rank a (Church Str)
- ii) Pick 'n Pay Rank a (Pres Paul Kruger / Devenish Str)

- | | | |
|--------|--|------|
| iii) | Taxi Holding Area (Along Nelson Mandela Drive) | iv) |

| xvi) | Mankweng Hospital Taxi Rank | |
| xvii) | Turfloop Plaza Taxi Rank (University of North Str) | |
| xviii) | Mankweng Taxi Rank 2 (opposite the hospital) | |

10.2.1 Metered Taxi

- Metered taxis operate all over and outside Polokwane.
- Polokwane metered taxi association have 64 cabs with 31 owners.
- Capricorn metered taxi association has 113 cabs with 83 owners.
- They operate 24 hours a day.
- Metered taxis are not branded.
- No facilities provided for metered taxis, subsequently they stop all over town.
- Less than eight (08) are legally operating.

Currently metered taxis hold at the following locations:

- Pick 'n Pay in Church Street between Devenish Street and Rissik Street.
- Shoprite located at the corner of General Joubert and Thabo Mbeki Street.
- Grobler Street between Schoeman and Landros Mare Street.
- At Savannah Mall.
- Charles Parking area between Biccard and Hans van Rensburg Street.
- Capricorn Metered Taxi Association are still waiting for operating licenses.

10.3 Polokwane International Airport

Although there are **two airports** in Polokwane (Gateway Airport Authority Limited (**GAAL**) and Polokwane Municipality Airport). Polokwane International Airport (GAAL) is flying passengers between Polokwane and Johannesburg.

The airport is located approximately **5 km** to the north of the Polokwane CBD (Central Business District). **SA Air link** has a scheduled flight service to between Johannesburg (OR Tambo) and Polokwane under the management of Gateway Airport Authority Ltd (GAAL). The service is code shared with South African Airways as the marketing carrier and SA Air link as the operating carrier.

There are also local and international unscheduled flights that make use of this airport. The approximate annual flights are between 4000 and 5 000 with an approximate passenger traffic of 38 000. There are four flights from Monday to Friday, one flight on a Saturday and two flights on Sundays.

10.3.1 Polokwane Municipality Airport

Polokwane Municipality Airport is leased to a private operator. Only private airplanes are landing in this airport. The lease agreement is with Land use under City Planning. This Airport is using the GAAL tower for taking off. The Municipality is not contributing financially to the rental of the tower, which leaves GAAL with the responsibility of renting the tower for the Airport that is not monitored. The near accidents that are audited in Polokwane Municipality Airport are counted under GAAL. The Monitoring and Regulation of Polokwane Municipality Airport in terms of Civil Aviation Authority compliance is very important.

10.3.2 Rail

The Passenger Rail Agency (PRASA) operates the Shosholozza Meyl long distance passenger service between Johannesburg and Musina via Polokwane. It is an economy class service (sitter accommodation) that operates 3 times per week in each direction.

The train leaves Johannesburg Station on Monday, Wednesday, and Friday evenings at 19:00 and arrives at Polokwane station at 03:50 in the morning. It departs at 04:30 for Musina and arrives there at 11:15.

The train to Johannesburg leaves Musina on Tuesday, Thursday, and Sunday afternoons at 15:25 and arrives at Polokwane at 21:48. It then departs for Johannesburg at 22:35 and arrives there at 05:44.

There are no intermodal transfer facilities for passengers who need to transfer between rail, bus or taxi. The distance by foot, from the railway station to both the Hospital Street bus rank and the Pick 'n Pay taxi rank is 1 km.

Given the lack of transfer facilities and the inconvenient arrival and departure times, the service is not very popular, and most passengers prefer to travel by bus.

10.4 FREIGHT TRANSPORT

10.4.1 Road freight

Polokwane is the largest town on the N1 transport corridor between Gauteng and SADC countries to the north including Zimbabwe, Zambia, Malawi, the DRC and Tanzania. Most of

the freight imported from and exported to the above countries is transported by road. These trucks park all over the City during the day and night. They damage the sidewalks, Road signs and electricity poles. The construction of the Truck Inn was recommended by the Comprehensive Integrated Transport Plan and development of intermodal freight logistics hub at the Airport.

10.4.2 AIR FREIGHT

Due to its central location in relation to the neighbouring countries such as Botswana, Mozambique and Zimbabwe, Polokwane International Airport has a significant potential for the export of freight. Long distances to Gauteng and other provinces also create opportunities for air freight transport, specifically for perishable goods such as fruit, beef and venison produced locally. The need for an Inter-modal freight hub in Polokwane has been identified by previous studies.

10.4.3 RAIL FREIGHT

Polokwane generates fresh produce and as such, freight rail plays an important part in transporting these products to various destinations in and out of the South Africa. Due to the high cost of freight road transport, it is expected that the freight rail will boost the economy of Polokwane by transporting the products at a lower cost. Based on the Department of Transport through Transnet Freight Rail has estimated that the cost of transportation can be reduced from R1.9 billion to R1.7 billion if 35% of cargo is transported by rail. This will result in the reduction of road trucks transporting citrus fruits to port from 55 000 trips to 32 000 trips.

Due to the high cost of road freight transport, Transnet has announced plans to move more freight by rail. This is a positive development for Polokwane as it will reduce damage to roads because of high freight volumes currently transported by road. On routes such as the N1 and the R81, the percentage of heavy vehicles is as high as between 15% and 20%. The fact that up to 17% of trucks are overloaded indicates that a lot of damage is being caused to road infrastructure.

It should however be noted that it is not only overloaded trucks which damage roads. The exponential relationship between axle loads and stresses in road pavement layers means that even trucks which are within the legal limit, causes a lot of damage to roads.

10.5 A SMART WAY TO TRAVEL!

The City of Polokwane is introducing an integrated Rapid Public Transport System (IRPTS), comprising various modes including taxis, buses and non-motorised transport service. This is in line with the National Land Transport Strategic Framework developed by the National Department of Transport. The IRPTS currently being planned for Polokwane is intended to transform the public transport sector through the provision of a high quality and affordable transport system whilst reducing the overall journey times for transport users.

As part of its mandate, the municipality has continuously been engaging with stakeholders but not limited to the current public transport operators, Ward Councillors and committees, commuters as well as residents about the upcoming Integrated Rapid Public Transport System.

10.6 TRANSPORT IMPLICATIONS OF THE SDF

Polokwane is facing high migration into its towns from rural areas, and which is fuelled by the expectations of finding of urban jobs. Daily migration into and out of Polokwane CBD for many workers to go and work elsewhere (mining and industrial areas) is a transport matter that needs to be understood in future planning, thus linking the urban and regional perspective is partly to be understood and described in the ITP. Such integrated transport and land-use planning strategies to achieve transport provision includes:

– The urban perspective by means of:

- Concentrating residential development at stations along public transport corridors.
- creating a high density of trip-attracting activities in central areas well served by public transport; and
- Issuing guidelines, which try to ensure that new developments are accessible to public transport.

The wider regional perspective:

- **Upgraded rail, road and air transport facilities.**
 - Lack of transport facilities for the long-distance transport services and the integration with the existing local public transport services. The integration of the above services with land use management becomes a central issue to ensure that proper transport services is provided where people live.
 - Proper land use rights and densification is promoted to make transport more effective and efficient.
 - Public transport amenities e.g., taxi- bus and railway facilities are focused in the north western part of Polokwane CBD between the Buite Street taxi holding area and the Polokwane Railway station.
 - Future links can be established between the taxi/bus terminus, the railway station and Polokwane International Airport

A specific feature of Polokwane's demographic profile is the high density Seshego and Moletji corridor north-west of the CBD. The following figure indicates household densities in Polokwane on a spatial format. The corridor provides an ideal opportunity for the development of an IRPT System which is appropriate for Polokwane's specific needs. The corridor has specific features:

- It includes the most densely populated part of Polokwane with a high demand for public transport.
- This high demand corridor stretches along Nelson Mandela Drive and New Era Road through the Seshego and Moletji residential nodes.
- The corridor is approximately 4 km wide and 15 km long making it suitable for the development of an IRPT system.
- The residential areas along the main corridor extend over \pm 80 % of the route.
- The corridor is currently served by taxis and buses – there is no passenger rail.

- The residential areas along this corridor include ± 37 500 households within an area of approximately 38 km².

10.7 INTERMODAL/ LONG DISTANCE TRANSPORT HUB

Lack of transport facilities for the long-distance transport services and the integration with existing local public transport services, the integration of these services with land use management becomes a central issue to ensure that proper transport services is provided where people live. Proper land use rights and densification is promoted to make transport more effective and efficient. Public transport amenities e.g., taxi- bus and railway facilities are focused on the north-western part of Polokwane CBD between the Buite Street taxi holding

10.8 SYSTEM ELEMENTS OF THE LEETO LA POLOKWANE INTEGRATED PUBLIC TRANSPORT SYSTEM

10.8.1 Universal Access (UA)

Universal Access (UA) on Leeto la Polokwane, is about giving all people an equal opportunity to access a quality transport service. In line with the UA principles, Leeto La Polokwane is designed to provide easy access to all people with a variety of needs.

The UA features on Leeto la Polokwane include the use of deployable boarding bridges to allow passengers on wheelchairs, and mothers with baby strollers to enter and exit the buses safely. The other features are raised tactile (textured) paving, beeping alarms, and voice announcements that guide people who have reduced vision and who cannot read.

10.8.2 Non-Motorized Transport (NMT)

An important aspect to Leeto la Polokwane is the provision of infrastructure for both pedestrians and cyclists. As a result, we have built about 18.01 km of Non-Motorized Transport (NMT) facilities which includes the pedestrian walkways that are dedicated to human powered means of getting around, like cycling, walking, skating, the use of wheelchairs and handcarts.

Our first NMT public infrastructure is on Lawton Road (Nirvana), Ben Harris (Westenburg) and Matlala Road (Westenburg). The Leeto la Polokwane infrastructure aims comply with universal access design standards to ensure the safety and inclusivity for everyone using the system

10.8.3 Industry Transition

- Capacitation of Vehicle Operating Company (VOC) board and staff completed.
- Vehicle Operating Company Agreement (VOCA) signed, and bus operations commenced.
- Second tranche of Leeto La Polokwane Phase 1A compensation paid to 121 minibus (MBT) taxi operators.
- Surrendered 123 MBT vehicles disposed via auction and cancellation of linked Operating Licences (OLs) ongoing at the Limpopo Provincial Regulatory Entity (LPRE).
- Implementation of a Turnaround Strategy covering areas such as increasing ticket selling points, bus stop coverage, revision of operational plan and route optimisation.
- VOC business/shareholding structure finalised.
- Finalisation of value chain framework pending.

10.8.4 Transport Planning and Operations

- 21 standard buses have been procured and delivered to Polokwane.
- 5 x 9 meter buses delivered and 10 x 9 meter buses outstanding.
- completion and delivery of the outstanding midi-buses expected by the end of October 2022.
- Operations begun on the **27th October 2021**.
- Leeto La Polokwane is currently operational place along Phase 1A routes (Seshego – CBD, Nirvana – CBD and Flora Park – CBD).
- Control Centre (at Peter Mokaba Stadium) has been completed and operational during the Trial Operations.
- Interim Maintenance workshop upgrade has been completed and operational as the maintenance of the buses is done on daily basis at the workshop.
- Product and advanced driver training have been completed and the drivers from all affected taxi associations are currently operating Leeto La Polokwane.

10.8.5 Intelligent Transport System Modelling

- Account-Based Ticketing (ABT) System is the NDoT's preferred Automated Fare Collection (AFC) System for all cities operating Bus Rapid Transport (BRT) System in South Africa.
- Account-Based Ticketing (ABT) integration is in progress. SANRAL/Polokwane Municipality have signed a Memorandum of Agreement (MOA). The ABT system is currently undergoing a pilot phase and council approval.
- An alternative Fare collection mechanism (Paper Ticketing) is currently in use, as the systems' interim fare collection method
- Public Transport Management System has been installed in the buses, Control Centre, and Day-time Facility.
- Leeto La Polokwane Priority Traffic Signals have been installed at three (03) intersections along Nelson Mandela Drive.

10.8.6 Marketing and Communications

- Continuous Stakeholder consultations have been taking place with affected parties for Phase 1A.
- Information Material for Leeto La Polokwane developed and distributed through various channels e.g., website, social media, and print form.
- System uniform design has been finalised.
- Appointment of Internal Staff for Customer Care Centre is underway.
- Publication of the Fare Structure and Operational By-laws in the local Provincial Gazette has been completed.
- Driver Customer Care Training has been completed.
- Provision of Leeto La Polokwane customer relationship management services

10.8.7 Business and Finance

- 100 Standard Operation Procedures (SOP) for Leeto la Polokwane operations developed.
- Fare Policy has been developed and approved by Council.
- Vehicle Operating Company Agreement (VOCA) has been signed and approved by the City and Esilux.
- Financial Model has been signed off by the City and Esilux.

10.8.8 Leeto Infrastructure

- 4.65km of Dedicated Bus route (Nelson Mandela Drive to Seshego) completed.
- 31.49km of CBD routes have been rehabilitated.
- 20.41km of Seshego Bus routes have been upgraded.
- Rehabilitation of the Day-time Facility (interim depot) is almost completed.
- 17km of Non-Motorised Transport Facilities have been completed.
- Construction of the Depot (Seshego) and Terminal Station (on General Joubert Street) is under implementation.

10.9 Construction of the Bus Depot at Seshego

10.10 General Joubert Street Bus Station Precinct

The City of Polokwane's Integrated Public Transport System (IPTS), Leeto la Polokwane, is currently implementing the following infrastructure projects at the station precinct.

- 1 – Construction of the Leeto la Polokwane bus Station on General Joubert Street
- 2 – Painting of the Leeto la Polokwane bus dedicated lanes in the CBD

The construction will affect General Joubert Street between Grobler Street and Thabo Mbeki Street. This will result in restricted access for vehicles into the area (tenants only). This area is allocated for the Leeto la Polokwane station and dedicated Leeto La Polokwane bus lanes.

There will be no public parking in this area. Alternative parking is available on the corner of Bodenstein and Church Street.

Construction of the Leeto la Polokwane bus Station on General Joubert Street.

10.10.1 Construction of Leeto Bus Station at the City CBD as of (27 July 2022)

10.11 Seshego Trunk Route

IRPTN has constructed a trunk route in the median between Seshego and the CBD. Currently it is about 4,5 kilometres. This route will be used by BRT Buses for the effective and efficient scheduled service.

Polokwane Municipality under IRPTN has also constructed the Non-Motorized Transport (NMT) both sides between the CBD and Seshego, Greenside and Westernburg. This infrastructure will be used by people walking and cycling.

Trunk route between Seshego and the CBD

10.11.1 Painting of the Leeto la Polokwane bus dedicated lanes in the CBD

The painting of the Leeto la Polokwane bus lanes will be done in phases. These dedicated lanes will be painted in **red** to indicate that only Leeto la Polokwane buses and other authorized vehicles are permitted. Motorists are urged to be vigilant and exercise caution during this period. The following street will be affected:

- a) Church Street: Between Excelsior and Thabo Mbeki Street
- b) Jorissen Street: Between Church and Landros Mare Street
- c) Landros Mare Street: Between Jorissen and Thabo Mbeki Street
- d) Thabo Mbeki Street: between Landros Mare and Church Street.

10.11.2 Leeto Daytime Layover Facility

Project Description include:

Day time layover facility for Leeto La Polokwane bus operations. Construction of bus parking area, palisade fencing and refurbishment of office building and ablution facilities. To work as a mini, depot for Phase 1A of Leeto la Polokwane IPTS service. It will be used as offices for the Vehicle Operation Company (**Esilux Offices**).

Leeto Daytime Layover Facility in the CBD (Itsoseng bus Centre)

10.11.3 Leeto La Polokwane Control Centre

Project Description include:

Provision of the Automated Fare Collection (AFC) and Public Transport Management System (PTMS). Installation of Fare Collection equipment. Installation of operations monitoring equipment. The Leeto La Polokwane control centre is located at the New Peter Mokaba Stadium and fully functional in supporting the operations through the Public Transport Monitoring System (PTMS).

Leeto Control Centre at Peter Mokaba Stadium

10.11.4 Leeto La Polokwane (LLP)

Leeto La Polokwane (LLP) is an Integrated Rapid Public Transport System (IRPTS) that aims to improve the state of public transport in the Municipality by integrating various modes of public transport operating within the jurisdiction of transportation. LLP is a safe, reliable, and convenient integrated public transport system for all of Polokwane's citizens. One of the features of LLP is the Bus Service which is a partnership between the municipality and the affected public transport operators.

Leeto La Polokwane is an Integrated Public Transport System (IPTS) of the City of Polokwane. The system aims to provide a high-quality public transport service aligned to the Public Transport Strategy and Action Plan of 2007, implemented under the requirements of the National Land Transport Act (NLTA) of 2009, and the public transport vision that was articulated in the White Paper on Transport Policy of 1996.

The aim of Leeto La Polokwane is to integrate various public transport modes across the municipality as well as capacitating current public transport operators who are directly affected by the System as per the requirements of the NLTA.

10.11.5 Phase 1A of Leeto la Polokwane

The PIPTS consists of a Bus Service which is a partnership between the City of Polokwane and the Phase 1A affected operators. The Leeto La Polokwane's PIPTS Operational Plan identified four (4) phases which will be implemented as follows:

- **Phase 1:** Polokwane City and Seshego
- **Phase 2:** Polokwane City and Moletji
- **Phase 3:** Polokwane City and Mankweng
- **Phase 4:** Polokwane City and Koloti

It should also be highlighted that the phases will not necessarily be implemented in chronological order, but rather in accordance with the travel demand patterns observed using surveys.

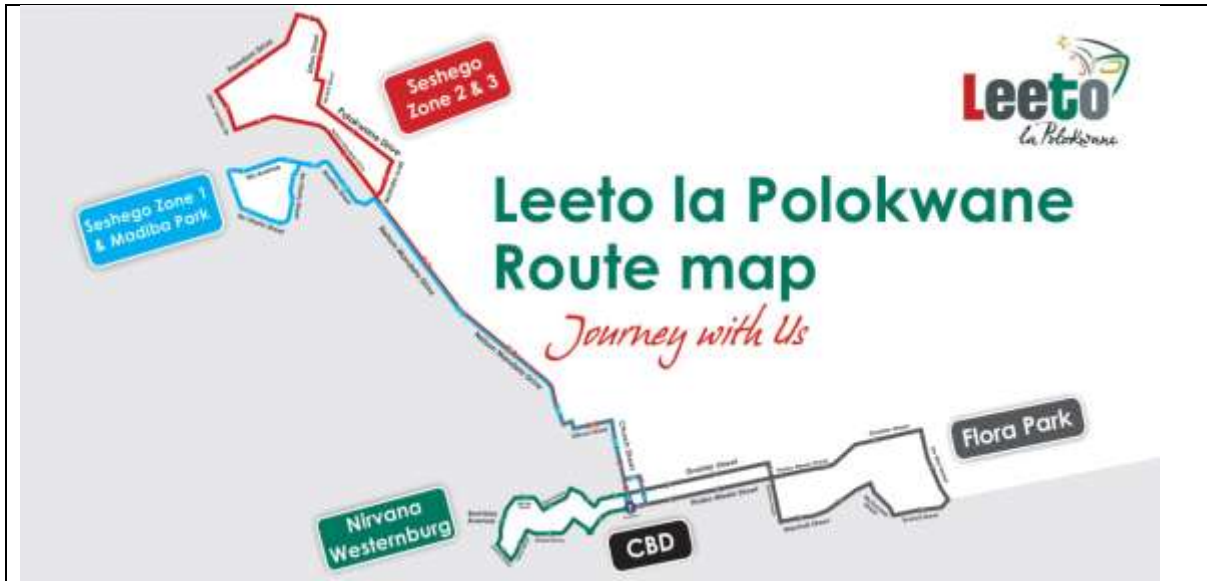

Figure 1: Phase 1A of Leeto la Polokwane

- Leeto La Polokwane commenced with the Phase 1A operations in October 2021, as it has been nominated as one of the flagship programs by the Minister of Transport.
- The Municipality allowed its residence to name their transport system through intensive public participation processes. Some of which allowed for creativity in suggesting a name that emulates and represent the culture of Polokwane.

10.11.6 Benefits of Leeto La Polokwane

Leeto La Polokwane
THE BENEFITS OF LEETO LA POLOKWANE™
 The Municipality aims to achieve the following main objectives through the implementation of Leeto La Polokwane

- Reduce traffic congestion currently causing delays, increased travel costs, fuel consumption, accidents and deterring investment
- Reduce overcrowded/unsafe/excessive journey times on existing Public Transport (PT) facilities
- Coordinate and integrate all public transport modes, including Non-Motorised Transport (NMT)
- Reduce over-reliance on private transport, formalised parking and loading zones
- Improve the access to public transport for people with disabilities, the elderly and people with young children, improve pedestrian and bicycle facilities
- Increase inner-city revenue through the provision of integrated public transportation
- Reduce travel time and providing efficient and safe access to various employment, retail, business, social and leisure activities in the inner city
- Reduce user costs access inner-city
- Reduce traffic accidents and minimise impact of accidents on traffic and pedestrian flow
- Reduce carbon foot-print of inner-city transport and fuel consumption
- Make inner-city pedestrian and cycling friendly
- Improve access between residential areas and major economic nodes
- Drive an implementation programme for new and attractive rail-based public transport
- Integrate land-use development

Fig 1: The benefits of Leeto La Polokwane

- The Public Transport System is intended to transform the public transport sector through the provision of a high-quality and affordable public transport system in line with the national policy. The Public Transport System will also be aimed at reducing the overall journey times for public transport users.
- The key characteristics of the system are an improvement in access between residential areas and major economic nodes. The main objective of the Public Transport System is therefore, to provide new and attractive road-based public transport services.
- Leeto La Polokwane Phase 1A Compensation payment effected to 123 affected minibus taxi (MBT) operators from Flora Park Pietersburg (FPTA), Seshego Polokwane (SPTA), and Westernburg (WTA) Taxi Associations. A Vehicle Operating Company Agreement (VOCA) concluded with Esilux (Pty) Ltd; a vehicle operating company (VOC) established by Phase 1A affected taxi associations.
- The AFC and PTMS equipment have been fitted in the 21 x 12m buses, layover facility and the control centre.
- The construction of the Depot and the Station at General Joubert is underway, while the construction of the Layover Facility has been completed.

10.12 Leeto la Polokwane Turnaround Strategy

Leeto La Polokwane commenced operations with fare paying passengers from 27 October 2021 with a fleet of 11 buses. The Operations plan, related to the negotiated, three (3) year Vehicle Operating Company Agreement, outlined that a bus fleet of 36 would operate on the identified routes. The fleet of 36 buses was to operate at a frequency of 15 minutes during peak and 30 minutes during off-peak. An adjusted Operations Plan was introduced, due to the limited bus fleet. The Leeto la Polokwane service has been adjusted to an interim bus fleet of 11 x 12 m bus fleet, with a bus frequency of 30 minutes during peak and off-peak periods. Based on historical data extrapolated from other operating Cities across the country low ridership was predicted at the beginning of operations and, with the expectation that ridership would gradually increase. Analysis of actual data from the start of operations indicates that

the ridership is low, with no gradual increase for the past three months. As a result of the analysis, this has necessitated intervention through a Turnaround Strategy. The purpose of the Turnaround Strategy is to address the low ridership volumes on Phase 1A of Leeto La Polokwane. The Turnaround Strategy is critical to provide measures that may increase ridership. The Turnaround Strategy is targeted at sustainable and efficient operations of Leeto la Polokwane Phase 1A. The Turnaround Strategy must be anchored on the following key objectives:

- Identify Gaps for Operational Efficiency and Propose Improvements.
- Secure Financial Viability and Sustainability of operations.
- Obtain high Levels of Customer Centricity.

Phase 1A of the PIPTS is operational from 27 October 2021 and a Vehicle Operating Company (VOC), Esilux (Pty) Ltd, formed by the Phase 1A affected associations, Flora Park Pietersburg (FPTA), Seshego Polokwane (SPTA), and Westernburg (WTA), are contracted to operate the Phase 1A bus fleet on behalf of the City of Polokwane.

At commencement of operations, ridership projections were to peak at 14 659 per day, when operations have stabilised, and based on a fleet of 36 buses (21 x 12 m buses and 15 x 9 m buses). The projection was also based on a higher frequency of bus timetables (5-to-10-minute headways during peak periods). Currently, an average of 566 passengers are utilising the service daily with a fleet of 11 buses at a reduced frequency of 30 minutes. This is unacceptably far below the initial projections. We further highlight that 123 Mini-bus taxis (MBTs) and their Operating Licences (OL) were removed from service to make way for Phase 1A operations. Based on the afore-mentioned the following may be expected for ridership numbers:

123 MBTs x 15 passengers per trip x 6 trips per day x 50% capacity utilisation = 5 535 passengers per day.

Through the removal of the 123 MBT a gap has been created in the market for 5 535 passengers per day, however ridership indicates that those passengers have not migrated to Leeto La Polokwane services. This may be attributed to:

- Utilising other modes of transport
- No longer travelling.

10.12.1 Ridership on Leeto la Polokwane Bus Service

Table 1: Ridership on Leeto la Polokwane Bus Service

Ridership on Leeto La Polokwane (Fleet of 11 buses and 116 daily bus trips)	
Projected	Actual
7 308 passengers per day	2 373 passengers per day (end of July 2022)

Error! Reference source not found. below indicates actual weekly ticket sales from Inception of operations (at the end of July 2022).

10.12.2 Challenges for Leeto La Polokwane Phase 1A Operations

Accessibility and Convenience

In order for ridership to increase for Leeto la Polokwane bus service, all system elements should be accessible and convenient to promote modal shift from other transport modes to our bus service/ system. To address the afore-mentioned the following challenges were identified:

Paper Ticket Sales Points

Leeto La Polokwane was ready to operate with the MiFare collection system which was operational before October 2022. Prior to the implementation of MiFare Automated Fare Collection System the National Department of Transport (NDoT) informed the City of Polokwane that MiFare will no longer be implemented and introduced a new Account-Based Ticketing (ABT) system that must be implemented. The introduction of a new Automated Fare Collection (AFC) System affected the City's implementation plan and methodology for the selling of tickets. Furthermore, the implementation of the ABT system required sufficient time to be developed and introduced. In the interim the City of Polokwane with the concurrence of NDoT, decided to purchase paper tickets to avoid further delays in the implementation of the service. The Turnaround Strategy addresses ticket selling points further in the document with proposed solutions.

When the operations began in October 2021, there were only three municipal sales points, for the Leeto La Polokwane paper tickets, the sales points operated from Monday to Friday, 08h00 to 15h00, and were closed over weekends and public holidays. This was not in line with the LLP operations which operated as follows:

- Monday to Friday, 05h00 to 20h00,
- Saturday 07h00 to 16h00,

- Sundays and Public Holidays 07h00 to 14h00.

This misalignment was a huge challenge, furthermore, the locations of the sales points were not conveniently accessible to passengers and not located on the Phase 1A route alignment, which discouraged potential passengers from buying tickets.

Fare Media

Leeto La Polokwane will ultimately be cashless using the ABT system. Albeit the ABT systems was not ready for implementation during the commencement of the operations in 2021. The Leeto La Polokwane ABT systems has been technically completed and is currently undergoing a pilot phase wherein tests are conducted before the system can be officially implemented. The paper ticket fare collection is an interim and temporary measure which will be phased out in due course.

Account Based Ticketing (ABT) Fare Collections System

10.12.3 Bus Stop Coverage

Bus stop coverage based on the Operations Plan is not adequate and has a negative impact on passengers utilising the service. This is based on the following:

- That the distance between bus stops along the bus routes are placed far apart, and does not adhere to NDoT's Universal Access guidelines,

- Impacts the accessibility of the system, as NDoT's Universal Access Guidelines further state that passengers should not walk long distance to the bus stop and does not adhere to the recommended NDoT's Universal Access guidelines, which states that passenger should not walk more than 500m to the bus stop,
- Some of the key trip generators were not adequately covered such as, educational institutions, hospitals etc.,
- The community (potential passengers) have also raised various concerns with regards to the placement of the bus stops.

10.12.4 Route Alignment Coverage.

The Phase 1A route alignment is the initial operations Phase, with a limited bus fleet which is a factor influencing ridership. The route alignment and current bus fleet, is therefore only able to partially satisfy passenger demand, contributing to ridership, until the expansion of the fleet size, and bus frequency to cover a wider footprint of the population for Phase 1A.

However, some of the passenger demand would necessitate possible review and rationalisation of the route alignment as the system does not meet the Origin-Destination (O-D) pairs. The data on which alignments were planned is outdated and travel patterns have changed since the collection of that data which is more than 8 years. We outline issues, and possible interventions, that must be introduced to the route alignment.

10.12.5 Flora Park (F1) Route

The envisaged service for the Flora Park route is to provide both clockwise and anti-clockwise services to Flora Park in order to provide a direct service between the CBD and Savannah Mall. The current service provides only the anti-clockwise service, therefore taking longer for passengers going directly to Savannah Mall and surrounding areas. The project team has been receiving concerns from some of the passengers pointing this as one of the contributing factors for not using the service due to long journey times. Some passengers that it takes them close to 30 minutes to travel between Library Gardens and Savannah Mall through the current anti-clockwise route.

10.12.6 Westernburg (F4A) Route

The current service is operating from the CBD to Nirvana; however, it has been performing very poorly in terms of passenger volumes since its inception. Although there were amendments done to the original route due to unavailability of the 9m midi-buses, this is not considered as the primary reason for the low passenger numbers.

10.12.7 Seshego (TE4) Route

The current alignment within Madiba Park traverses along Bo-Okelo Street, which runs on the outskirts of the catchment area. The catchment for this alignment for most part of the route is concentrated on one side only as the area to the east of Bo-Okelo Street is not yet developed. This results in most passengers residing further in the centre of Madiba Park to consider other modes of accessible public transport routes and stops.

10.12.8 Seshego (TEB) Route

The current route alignment proceeds from the Seshego circle and loops around the area following Ditlou Street towards the industrial areas, Khensani Street and down along Freedom Street, Oliver Tambo and back to the trunk route along Nelson Mandela Drive. Based on assessments undertaken and feedback received from stakeholders, it has been identified that most of the passengers are concentrated along Zondi Maphanga Street and across Freedom Street to Realeboga Street and Bram Fischer Street.

10.13 Modal Competition

It should be noted that only a portion of the incumbent minibus taxi industry was removed to create a gap for the Leeto La Polokwane fleet and were compensated for their loss of business.

The low ridership may be attributed to the availability of other transport modes, operating in competition on the same route, therefore potential passengers have alternative modal choices.

After the removal of a total of 123 vehicles per Phase 1A affected association, the following number of vehicles still remains in operation and therefore in competition with Leeto La Polokwane:

- Seshego Polokwane Taxi Association (SPTA) - 418
- Westernburg Taxi Association (WTA) - 23
- Flora Park Taxi Association (FPTA) – 38

Individual Restraint of Trade and Compensation Agreements (ROTCA) were signed with the 123 operators and their vehicles and corresponding OLs were removed, which left a total of 479 vehicles to compete with Leeto La Polokwane. It should further be noted that the minibus taxi industry provides unscheduled services, whilst Leeto La Polokwane's services are scheduled. This means that minibus taxis can stop anywhere and anytime which is not the case for the bus service. As such, this option might be more convenient for passengers.

There also appears to be illegal operators who are providing public transport services and as there are no Law Enforcement measures dedicated to Leeto La Polokwane Phase 1A route that might be a contributing factor to the illegal operations. The afore-mentioned challenges may be eliminated by increase in the fleet size, frequency of bus operations, and introduction of law enforcement measures, such as monitoring of MBT operator licenses and operations.

10.13.1 Information Dissemination

During engagements with stakeholders, it became evident that information with regards to Leeto La Polokwane has not adequately reached the target market. Various platforms (website, social media) are being utilised to share information to the public, however it appears that not many people have access to these platforms. Intervention measures are necessary for dissemination of information, and are addressed further below, in the document.

10.13.2 Insufficient Human Resources

To implement Leeto la Polokwane efficiently and effectively, sufficient, and qualified personnel is required. Coordination with and support from other departments within the Municipality is also crucial to ensure efficiency of services rendered by other departments to Leeto La Polokwane where required.

The following key personnel dedicated to Leeto La Polokwane is required:

- Law Enforcement
- Customer Care
- Operations and Monitoring

- System Marketing

- System Inspectors

It is recommended that the City of Polokwane address this issue with urgency.

10.13.3 POSSIBLE Strategies to Address Identified Challenges

Through the implementation of the identified response strategies, the Polokwane Municipality has a vision of increasing ridership on Leeto La Polokwane.

A) Paper Ticket Sales

B) ABT Implementation

C) Route optimization

D) Increase the number of bus stops

E) Improve and increase brand visibility and loyalty through the implementation of a revised Integrated Marketing Communication Turnaround Strategy

F) Improved Law Enforcement visibility

G) CCTV Cameras along the Leeto La Polokwane route, facilities, and infrastructure

The City of Polokwane has acknowledged the current situation of the Leeto La Polokwane service as it relates to low ridership and the causes thereof. In response to the challenges identified, several strategies have been developed in order to turn the situation around. A variety of opportunities exist for the improvement of operations as stipulated in this document.

10.14 ROADS & STORM WATER

10.14.1 Introduction to Roads and Storm water

Polokwane Municipality is characterised by a radial road network of approximately **7 495 km** covering its area of jurisdiction with a backlog of approximately **6026.35km** as per the recent inventory. This backlog translates to a total of **80.4%** percent. This is due to the establishment of new developments both formal and informal settlements. It is situated at the point where National and Provincial roads converge from where they radiate out in all directions providing good regional accessibility.

The municipality is faced with huge challenges in providing and maintaining the local roads at an acceptable standard which ensures accessibility at all times. Coupled with the latter, there is storm water management and control to an extent that it poses as a threat to mobility, infrastructure and communities.

The long-term strategy of the municipality is to surface and pave roads within the municipal area. Based on this high road backlog, different strategies are implemented including preventative maintenance of the road infrastructure.

The Municipality has since moved from implementing an average of **19km** road upgrading per annum to an average of **24km** per annum. In the **2022/23** Financial year the Municipality has budgeted approximately **R271M** for construction of access roads and Paving of internal streets in townships and rural areas which will have an impact in reducing backlog of gravel roads in those areas. The Municipality relies on IUDG Grant funds to address backlog of gravel roads.

in rural areas, in 2022/23 approximately R72.650M (IUDG and CRR) has been budgeted to address backlog of gravel roads in Seshego and Mankweng area The Municipality will also be upgrading some of the RAL roads as agreed with RAL. These roads are deemed necessary as they connect villages.

In terms of the current analysis, City/Seshego and Mankweng Cluster have roads that deteriorated due to limited routine and preventative maintenance hence most of the roads have exceeded their design life. The other challenge affecting the roads is the unavailability or the insufficiency of Storm water system. The Municipality has in the **2021/22** financial year appointed a contractor for the implementation of a program for rehabilitation of roads in Polokwane as part of road asset renewal program to rehabilitate streets in the urban area especially the city cluster and surrounding suburbs, Approximately **R12.780M** and **R5.220M** has been budgeted for in the 2022/23 financial year for the rehabilitation of roads in the city and surrounding suburb through own funding and IUDG respectively, the program will be implemented in multi-year. Due to financial constrains by the Municipality the contractor has been requested to scale down activities on site. The Municipality has in the **2021/22** financial year implemented a program to upgrade roads in 24 wards and of these 24 projects 20 projects are completed and 4 are at implementation stage. All these remaining 4 will be completed by the end of August 2022

Roads and storm water SBU is made up of two divisions but only Roads is mostly considered over Storm water when it comes to budgeting, Storm water should have its own budget. The other challenge affecting the roads is the unavailability or the insufficiency of Storm water system. The Municipality has for long time neglected the issue of storm water in that there is never a dedicated budget for storm water to address areas that are too problematic. Areas like Seshego, Flora Park, Sterpark, CBD, Welgelegen and Mankweng get flooded each time that it rains. Whenever a budget for storm water is made available, you find that it is insufficient to kick start a project. Another challenge is the high vacancy rate in the SBU

A Consultant has been appointed and completed investigations of storm water challenges in Flora Park/Sterpark and Fauna Park. Some areas are completely without storm water system and other areas have insufficient capacity. Due to budget constrains the project has been put on hold and to be advertised for appointment of contractor once sufficient budget is made available to the project. Approximately **R25.9M** has been budgeted for through CRR, IUDG and NDPG for implementation of storm water project municipal wide. Construction of low-level bridges in rural area has started as requested by community during IDP consultation meetings and **15 low level** bridges will be implemented in the **2022/23** financial year

The Municipality is also implementing Non-Motorized transport infrastructure project that is funded through CRR/ KFW Bank approximately **R2.6M** has been allocated for the implementation of the projects and KFW will be donating about R26M for this purpose.

Traffic safety can be linked with the existing condition of roads in the municipal area. With increased road users, congestion has also increased in recent years and has now become problematic in the City/Seshego and Mankweng clusters. In addition, road safety has become a concern with increasing accidents occurring on municipal roads. The Municipality has from the previous financial years approved three **(3) speed humps** yearly per ward in areas that are critical. The approved 3 speed humps will not be possible in the 2022/23 financial year, however only two speed humps will be prioritised in most critical wards due to limited budget. Traffic calming measures are still a problem on most roads. The municipality has in the financial year 2022/23 FY managed to budget **R2.1M** to implement installation of traffic lights and signs at southern gateway in the city cluster. Designs are completed and project to be advertised for appointment of a contractor

10.14.2 Classification of Roads

The municipality has developed the Road Master Plan that has been approved by Council in 2014. This Master plan will be updated to include the incorporated area of Aganang. It was in anyway due for review and such will take place in the **2023/24** financial year.

The Roads Provincial Gazette was published and Roads authorities are familiar with their new Road Network.

The municipality is faced with huge challenges in providing and maintaining the local roads at an acceptable standard which ensures accessibility at all times. Coupled with the latter, there is a challenge with storm water management and control to an extent that it poses a threat to mobility; infrastructure and communities. The Municipality will develop storm water master plan in the **2023/24 financial** year for municipal wide which will assist in planning and addressing storm water challenges that are faced by the Municipality.

The long-term strategy of the municipality is to surface and pave roads within the municipal area. Based on huge road backlog, different strategies are implemented including preventative maintenance of the road infrastructure. In terms of the current analysis, City / Seshego and Mankweng Cluster have roads that deteriorated due to limited routine and preventative maintenance.

10.14.3 Leeto La Polokwane Infrastructure

The key requirements for the public transport system to go live are full compliments of infrastructure and in **2022/2023** financial year, approximately **R119.9M** has been budgeted for the implementation of Leeto La Polokwane infrastructure projects.

The Municipality is planning to complete civil works at the Bus depot, complete Daytime layover facility, civil works at the Bus Station and Transit Mall which will include UTC at certain intersections.

The Construction of the Superstructures and buildings at the Bus station and Bus Depot will start in October 2022 and towards end of 2022/23 financial year once civil works are completed respectively.

The project for the widening of the Sandriver Bridge on Nelson Mandela Trunk Route is at implementation stage and to be completed in the 2022/2023 financial year.

The Municipality is also planning to refurbish the Indian centre taxi rank, the consultant is appointed and busy completing the designs.

10.14.4 Challenges faced by the Municipality in providing Roads.

- Aging infrastructure (deterioration of roads due to limited routine and preventative maintenance)
- Most of roads have exceeded their design life span (approximately **R1.9Billion** required to rehabilitate the existing roads) in both Polokwane and Aganang area.
- Unavailability or insufficient storm water systems
- Huge rural backlog with minimal impact of 27Km per annum.
- Though the municipality has approved a new organogram, most critical positions are still vacant due to the insufficient funding.
- There is only one operator who is currently providing grading services for the entire Aganang cluster, the other two operators have medical unfitness certificates.
- 98% of Roads that Community prioritize during IDP's do not belong to the Municipality but to RAL and the Department of Roads.
- Insufficient budget
- Insufficient plant (construction machinery)
- High vacancy rate in the Roads SBU

10.15 ROADS BACKLOG

Below is the current status of existing backlog, which without annual maintenance will escalate.

Service	H/H	Access	Backlog
Roads (7 495km)	280 225	1469.15(19.6%)	6026.35km

Source: Stats, S.A

10.15.1 Municipal Roads Current Status Quo

Operational issues /Capacity

- Inadequate routine maintenance staff/ high vacancy rate/ reliance on casuals

Status of Yellow fleet

- High down time of graders as a result of ageing. / Machinery takes a very long time to be fixed.

Number of graders broken down

- There are 9 graders which are frequently broken and not reliable. Only 3 graders are mostly operational.

Potholes Repairs in the City CBD, Seshego, Westerberg.

- All main street in the City CBD were patched, The Team is currently attending to Seshego main roads.

10.15.2 Potholes Repairs in the City CBD

Source: PLK Roads SBU

10.15.3 Grader's status per Cluster (Their Condition)

- **Dikgale Sebayeng**=1 grader in good condition
 - **Mankweng**= 2 graders allocated, 1 in good condition, 1 is fair
 - **City cluster and Seshego**=1 grader fair
 - **Moletjie** = 2 graders, 1 in good condition, 1 is fair
 - **Aganang**= 4 graders, 1 in good condition, 3 redundant
 - **Molepo Chuene Maja**= 1 grader in poor condition, Engine down, went for Engine overhaul and programming.
- **3 graders are on frequent breakdown and 4 redundant waiting for Auction.**

10.15.4 Roads SBU Yellow Fleet Status Quo

Type of Fleet	Status of the fleet (How many functions and how many not functional)	Type of Service Required	Condition of the Fleet (Poor, Fair Good)
Graders	5 functional; 8 not functional	6 graders to be scrapped, 1 grader Engine overall, regular Transmission fault and overheating, no torque, Frequent overheating,	5 graders in good conditional, 2 fair condition, 6 extremely poor
Roller	1 functional		
Maintenance trucks	13 Functional and 4 not functional	Overheating, Roadworthy, Exhausted engines.	7 trucks in good condition, 6 trucks fair and 4 trucks extremely poor.
Water Trucks	1 Functional, 1 not functional	Road worthy	1 good condition, 1 fair
TLB	3 functional, 1 not functional	Insufficient torque to lift and load material due to hydraulic diagnosis and frequent overheating	2 good and 2 fair
Front end loader	1 x functional		
Tipper Trucks	6 tipper truck, 1x6 cubic and 5x10cubic 3 functional, 3 not functional	hydraulic cylinder diagnosis, Aged Engines and low tipping torque.	4 fair and 3 good

Type of Fleet	Status of the fleet (How many functions and how many not functional)	Type of Service Required	Condition of the Fleet (Poor, Fair Good)
Dozer (track wheel)	1xnot functional	Engine down	Poor
Lowbed truck	Functional	Silencer broken and overheating due to inadequate water-cooling tank which affects circulation of water-cooling system.	Good
Light delivery vehicle	8 functional, 5 not functional	4 scraps and 1xaccident	5 good,3 fair and 4 obsolete and 1 beyond repair

10.16 PUBLIC TRANSPORT INFRASTRUCTURE DEVELOPMENT

10.16.1 CONSTRUCTION OF LOW-LEVEL BRIDGES FOR 2021/2022 FINANCIAL YEAR:

- Targeted low level bridges= 15
- Achievement =15
- Project status: Completed

10.16.2 Areas where low level bridges were constructed and completed.

- 1) Maratapelo access to Moshate office x2
- 2) Marulaneng Ga Maja
- 3) Ditshweneng ga Maja
- 4) Ga Sebati
- 5) Ga Thoka x2
- 6) Makgobathe
- 7) Masealama
- 8) Asbes
- 9) Mamadimo park Marikana section
- 10) Komape
- 11) Blood river
- 12) Mantheding
- 13) Mothapo Masioeneng

Low level bridges were constructed

Source: PLK Roads SBU

Remarks:

Target for financial year 2021/2022 achieved, currently preparing setting out, for 2022/2023 financial year.

The Municipality had also managed to refurbish two bridges which were adversely damaged by Tropical Storm Eloise through intervention from Disaster Management Centre's grant: MDRG in Madietane and Christina.

10.16.3 Refurbish two bridges

Source: PLK Roads SBU

10.17 REPAIRS ON STORM WATER DRAINS

Targeted storm water drains for June= 6 storm water drains

92 x Storm water drains maintained:

Targeted area: CBD and main street around the city.

10.17.1 Challenges for Storm Water Infrastructure Maintenance

- Planning for upgrading of storm water system from upstream of Sterpark, Flora park and Penina park was completed, implementation not yet started due to budgetary constraints.
- Regular flooding around the city due to clotting of debris around the outlet points of storm water system.
- Shortage of budget to upgrade existing over flooding storm water systems in Ivy park, Nirvana near Jumbo.
- Frequent damage of catch pit frames by trucks.
- Illegal dumping of rubbles inside the side drains and channels.

10.17.2 Interventions for Storm Water Infrastructure Maintenance

- Currently doing regular cleaning of debris and sand deposits to the storm water systems needing upgrades.
- Lining of storm water discharges at outlet point to minimise clotting and blockages on the discharge point.
- Notice boards erected on all illegal dumping spots.
- To procure and erect concrete bollards (during 2022/2023 FY) at the back of all catch pits which are frequently overdriven by trucks. The specification to request service provider for supplying of road construction material is currently at procurement stage.

10.18 Rehabilitation of City CBD Roads (Road Concession CBD)

The streets in Polokwane CBD and surrounding suburbs are deteriorating with time and they need special attention so that they can be rehabilitated to an acceptable standard. Council has Approved an initiative to rehabilitate all the streets within the City CBD and the surrounding suburbs which includes (Flora Park, Faunapark, Sterpark, Bendor, Ladanna, Penina Park, Ivy Park & Westernburg, Nirvana etc.). The Project for Rehabilitation of City Cluster Roads Has Started within the City CBD as of **01 September 2021**, however due to budget constrains by the Municipality the contractor has been requested to scale down activities on site which will have an impact with the project completion duration.

10.18.1 Rehabilitation of City CBD Roads

Source: PLK Roads SBU

10.18.2 Personnel for Roads and Storm Water

Number of Vacancies:

8x Budgeted Positions: i.e.

- 1x Superintendent
- 2x Technicians
- 2x Special Worksman
- 5x Drivers
- 7x labourers

Other Essential vacancies with no budget: i.e.

- 3 x Foreman City cluster.
- 6 x Senior Operators.
- 3x technicians
- 4 x operators.
- 2 x drivers.
- 1 x Project administrator.
- 1 x Wayleave Technician.
- 30x labourers.

10.19 Grading of rural roads Status Quo Per Cluster

10.19.1 Grading of Roads Status Quo

Cluster	PERIOD OF WORK					Remarks
	09/07/22	16/07/22	23/07/22	29/07/22	5/8/22	
City	PM711				PM711	
Molepo Chuene Maja	PM17/01			PM17/01	PM17/01	PM 712, transmission, overheating and Gears automates to neutral while in motion. Sharing PM 17/02 from Dikgale Cluster.
Dikgale Molepo		PM17/02	PM17/02			
Aganang	Pm17/01	PM17/01			PM18/96	Two Graders are redundant, PM 18/96 breakdown, overheating
Mankweng	PM18/101	PM18/101	Pm18/101	PM18/101	PM18/101	PM710, turn table motor stripped out and taken for repairs.
Seshego		PM711	PM711	PM711		Sharing Grader with City cluster
Moletjie	PM18/100	PM18/100	PM 17/01	PM17/01	PM7/01	PM 18/100 fuel injector not stroking fuel

Source: PLK Roads SBU

10.19.2 Challenges for Rural Roads Grading

Inadequate functional graders

- We need at least **two graders** per cluster, this will reduce long travelling distances and over utilization of machinery. This will also improve service delivery and elimination of overtime cost.
 - Total number of Municipal graders=13
 - Full functional graders=5

- Redundant graders=4
- Graders experiencing regular breakdowns=4

Shortage of Grader operators.

- There are only 5 Senior Operator who are currently performing grading services and are not sufficient enough to deliver adequate grading service.
- At least two senior operators are required per cluster to enable effective grading of roads in rural areas.

10.19.3 Roads SBU Fleet analysis

ANALYSIS OF FLEET REQUIRED TO RENDER ROADS FULLY FUNCTIONAL

FLEET DESCRIPTION	TOTAL ALLOCATION	AVAILABLE	OLD FLEET	REQUIRED ADDITIONAL FLEET
Graders	13	5	8	10
TLB	4	2	2	2

10.19.5 Overview summary achievement of Public Transport Infrastructure Development

The municipality has in the past 5 years (2017/18 to 2021/22) upgraded **119.1km** of roads from gravel to tar, rehabilitated **12.03km** of roads, re-graveled **538.17 km** of road, graded **10484.92km** of roads, routine maintained **268021.03m²**, constructed **52** low level bridges, **117** speed humps, **6.97km** of sidewalks, **10** traffic lights, **6.412km** of storm water and **5049.04km** of storm water maintained constructed **4.5km** trunk route, **31.5km** Feeder routes, **20.4km** Trunk extensions, **86** Kerbside stops.

The Municipality is planning to complete civil works at the Bus depot, complete Daytime layover facility, civil works at the Bus Station and Transit Mall which will include UTC at certain intersections.

The Construction of the Superstructures and buildings at the Bus station and Bus Depot will start in October 2022 and towards end of 2022/23 financial year once civil works are completed respectively.

The project for the widening of the Sandriver Bridge on Nelson Mandela Trunk Route is at implementation stage and to be completed in the 2022/2023 financial year.

The Municipality is also planning to refurbish the Indian centre taxi rank, the consultant is appointed and busy completing the designs

CHAPTER Eleven -Financial Analysis

11.1. FINANCIAL MANAGEMENT AND VIABILITY

11.1.1 Revenue Management

The municipality derives revenue through the rendering of services as mandated through the Constitution of the Republic of South Africa, Municipal Finance Management Act (MFMA) and other related regulations. Municipal revenue comprises of own revenue as well as grants from the national government. Own revenue contributes **52%** of total revenue and is consistent from the prior financial year.

The municipality main sources of own revenue are as follows:

- Property Rates
- Electricity
- Water and sewerage
- Refuse and
- Other income such as rental of property, investment income and traffic fines.

The municipality's own revenue across the board has increased by an average of around **4%** year on year with increases in service charges by around **5%**. The main contribution to the year-on-year increase in service charges is mainly due to the increase in the installation of pre-paid water meters and the upward impact on the revenue from assessment rates due to the implementation of the new valuation roll that saw increase in property values.

All the grants from the National government is dealt with in terms of the requirement of Division of Revenue Act (DoRA) and management of own revenue is dealt with in terms of the MFMA. The municipality also applies its indigent policy to cater for the indigent population within its jurisdiction.

Two key revenue enhancement initiatives that have been introduced in the previous financial years namely the replacement of AC pipes and the smart metering project has proven financially successful by realising over **80%** return/payback period on its capital investments since its inception.

The replacement of AC pipes continues to ensure that the water losses are substantially minimized within the National Treasury norm of within **15% to 30%**. This will ensure that more water is available for future developments and therefore contributing more to revenue billing and collections.

The smart metering project had completed its final stage of conversion where approximately 600 high power uses were changed to the e wallet system including Government Departments. This will ensure cash backed pre-billing from electricity and water consumption from high power users as is done with the non-high-power users. The pre-paid electricity replacement exercise also assisted in the reduction in electricity distribution losses to less than the National Treasury norm of 10%.

11.1.2 Status on Revenue Management

Averaged **93%** on collections for the last financial year (2020/21) with COVID 19 having a significant impact during the months of lock down.

Approximately only 4000 accounts remain on conventional electricity meters whilst the rest of the accounts are on prepaid electricity. Out of the approximate **33 000 pre-paid water meters** installed around **15 000** meters have been converted to prepaid and is ongoing on a monthly basis averaging **1200** conversions a month → pre-paid sales average around **R1.8 million** per month and growing by about **25%** per month as the conversions take place.

On the overall, the municipality is receiving around **R489 million** in advance cash relative to the conventional model due to the smart metering programme.

11.1.3. Revenue Enhancement

Tariff setting challenges.

The MFMA and enabling legislations such as the Water and Electricity Acts requires tariffs to be cost reflective.

Although the municipality is showing a positive gross profit percentage on service charges the following **challenges** remain:

- High tariff increases of Eskom and the water boards.
- The COVID 19 pandemic has dampened the local economic environment resulting in unaffordability of service charges.

The municipality is **addressing** these challenges by exploring alternative cost savers such as power banks and the installation of pre-paid meters to ensure customer consume at the rate that they can afford.

Credibility of bills and data

Since the implementation of the new system around 2018, the municipality is able to produce credible billings. The installation of prepaid meters has also assisted in the production of credible revenue bills and reports.

11.1.4 Collections from households, businesses and Government Departments.

The municipality has averaged a collection rate of **93% percent** vs a budgeted rate of 87%.

The installation of the new system has allowed the municipality to interface the billing module with the credit control module. This ensures that the cut off list is done almost at real time thereby making it possible to perform more cut offs on a daily basis improving the collection rate.

Further, the installation of pre-paid meters as improved cash collections as about 45% of service charges are in the form of pre-paid sales.

However, the impact of the COVID 19 pandemic have affected vulnerable households and businesses. Arrangements are allowed on the system for those who are unable to be meet their arrear debts.

As far as government is considered, collections have improved as a separate cut off list is implemented. The debt of government debts stood at R96 million at the end of the quarter. This was down from the average of R120 million average balance of government debts in the past financial years.

The Mankweng hospital accounts for almost 50% of the government debtors' book at R43 million. Talks are ongoing with the Rural Department to recover the arrears over a period.

11.1.5 Implementation of revenue enhancement strategy

The municipality has implemented two key revenue enhancement strategies.

- 1) Replacement of AC pipes which resulted in the reduction in distribution losses and more water revenue. Water distribution losses have been reduced from a high of 30% pre implementation.
- 2) Pre-paid meters – installation has resulted in around 45% of all service charges revenues. This figure will increase as more meters are being installed city wide.

The municipality is also in the process to introduce arrear collections through the prepaid system to ensure arrear debts are collected on the purchase of pre-paid services.

11.1.6 New system Key achievements - Revenue Management

Since migration into the new system, the revenue SBU is able to integrate seamlessly with its outstanding debtors' book in almost real time. This has resulted in more cut offs on daily basis and its impact can be seen in the growth in the monthly cash flows.

Use of online payment methods and views by consumers have been enhanced. Estimation module effective and accurate reporting enhanced through the new system.

Continued success on the smart metering programme → R479 million in advance cash as opposed to the conventional mode of readings and collections thereafter.

Completeness test on property rates and basic charges to ensure correct tariffs are being used – over 3 800 properties rectified → increased property rates billed, and additional revenue collected which was 1% or R2 million than anticipated for the first time - the new valuation roll project also added to the completeness project.

11.1.7 Key Challenges and Interventions in Revenue Management

No	Challenge	Intervention
1	Meter tempering/faulty meters	The establishment of the revenue protection unit to deal with specific matters on possible meter tempering and addressing faulty meters and other challenges that may contribute to under billing and under collections. Revised fines for meter tempering from R13k to R150k . Use of third-party data to analyse possible tempering or dysfunctional meters through the revenue protection unit.
2	Poor economy impacts	Continue with credit control with consideration of Poor Economy strain consumers on a merit basis as per National Treasury circular. i.e., considering the 20% reconnection fee on merit. However, if any arrangement made are not honoured strict credit control will apply as to do otherwise will compromise our financial viability.
4	Mankweng debt book	Debt writes off approved by council and political leadership to communicate with the community at large
5	Government debt book	Use of the e wallet system where pre-paid purchases to be done. Cut off/credit control still continuing on Government Departments with outstanding balances with positive impact as dents stand below R95 million when compared to the historical trends of R150 million in outstanding debts.

11.2 Billing System

The new billing system was migrated on **01 April 2019** and has a major impact on the effectiveness of billing estimation and the accuracy of reports.

The Municipality have now concluded connecting most of our satellite offices to the internet and our network and residents in areas like **Seshego, Sebayeng and Mankweng** will no longer have to come to **Head Office (Civic Centre)** to check and **pay for their accounts**. Plans are in place to connect the Outstanding satellite offices which are in the **Moletji, Aganang, and Molepo Chuene Maja clusters (Mostly Rural Clusters)**, they will be connected in the coming Financial years.

The Municipality is exploring solutions on **Wi-Fi installation** in the rural and urban areas at critical hotspots such as schools and libraries and others so that children in those areas can be able to access the global community. Soon we will be inviting service providers in the area of Wi-Fi connection.

The municipality continues to explore smart innovation towards service delivery in order to improve the experience of our residents when interacting with the municipality.

11.3. FINANCIAL POLICY FRAMEWORK

In terms of governing legislation, the municipality is required to develop and implement rates and tariff policies or bylaws to guide the revenue management of the Municipality. The following budget related policies have been approved and adopted by council.

- Borrowing policy
- Petty cash policy
- Budget policy
- Funding and reserves policy
- Indigent policy
- Banking & investment policy
- Supply chain Management policy
- Credit control and Debt collection policy
- Customer Care Policy
- Tariff policy
- Rates policy
- Subsistence & Travel Policy
- Leave Policy
- Virement policy
- Asset Management Policy

11.4 Expenditure Management

11.4.1 Expenditure Management Status Quo/Achievement

- All conditional grants maintained in a separate bank account and not used in normal operations.
- No double payments encountered to service providers.
- Salaries and Eskom bills paid promptly.
- **Roll overs** are **cash backed** in terms of National Treasury circular 99.
- All creditors submitted to Finance and recorded on the system at the end of July were within 30 days i.e., all creditors due were paid.

EXPENDITURE

11.4.8 Challenges and Intervention for Expenditure Management

No	Challenge	Intervention
1	Payment within 30 days	Monthly cash flow to be submitted to all SBUs. SBUs are not allowed to exceed the allocation for that month.
2	Invoice submitted late to Finance	Munsoft requires Managers to authorise/submit invoices on the system. A memo to explain the processes was communicated by BTO
3	Eskom bill exceeding R113 million in the first two months of the financial year due to the peak season demand rates. Municipal tariffs for electricity will soon not be cost reflective due to the high anticipated increase in Eskom tariffs in the coming years.	Finalised the power bank feasibility and ready for advert. In the process of finalising the solar project

11.4.9 Roll Overs Projects

MFMA Circular No. 91 refers to Section 22 (2) of the **2019** Division of Revenue Act (**DORA**) which states that any conditional grant which is not spent at the end of the municipal financial year must revert to the National Revenue Fund.

11.4.10 Budget Adjustments

The adjustment budget is conducted in February each Financial year. Municipal Budget is Adjusted after assessing the following:

- 1) Cash flow analysis on own revenue (actual vs budget).
- 2) Revenue performance (actual vs budget).
- 3) Revenue and cost optimization measures.
- 4) Spending trends on own funded Capital projects.
- 5) Unspent conditional grants.

11.5 Investments

The municipality is implementing stringent investment measures to ensure financial sustainability and that all the investments are made in line with the investment policy through the establishment of an investment committee. The investment policy is fully aligned to the municipal investment regulations.

Our cash resources will be invested in various institutions as per the Cash Management Policy, Investment Terms of Reference. Project Managers have provided Grant Cash flow projections to ensure smooth running of operations

11.6 Asset Management

The asset management unit is responsible to oversee the assets with total value of **10 billion** at net book value. The municipal asset register has the following key components.

1. Investment property
2. Community and infrastructure assets.
3. Movable assets.
4. Finance lease assets.
5. Biological assets.
6. Heritage assets.
7. Library books.
8. Land
9. And other assets.

Municipality makes hybrid method to account for municipal assets and verification of assets is performed ongoing basis. Assets are recorded either at fair value, cost or depreciated replacement cost.

The asset management team together with the PMU and town planning unit developed a capital expenditure framework (CEF) which is high-level long-term-infrastructure plan that flows from a spatial development framework. It estimates the level of affordable capital investment by the municipality over the long term. This framework largely informed our capital expenditure budget over the MTEF.

11.6.1 State of Assets

With respect to **immovable assets**, City of Polokwane owns or otherwise controls some **372,974 fixed point assets** (e.g., facilities such as buildings, pump stations and bridges, as well as water and electricity meters), and **19,320 km of linear assets** such as electricity cables and lines, water and sanitation pipes, and information and communications technology (ICT) cables. Additionally, the city's investment property portfolio **includes land of 38 hectares.**

Polokwane's immovable asset portfolios have a combined current replacement cost (CRC) value of **R 31 billion.**

11.6.2 State of Assets – Asset Portfolio

Source: City of Polokwane – Strategic Asset Management Plan (SAMP)

11.6.3 Asset Consultants

Reason for the need of Asset Consultants

Specialist skills of around 21 employees comprising electrical and civil engineers, town planners, GIS specialists, land valuers, quantity surveyors and environmentalists. The skills are required to comply to GRAP standards and therefore would not be cost effective to have employees with these skills appointed on a full-time basis.

Value for money

Unbundling of assets, conditional assessments Unit rate calibration to ensure compliance to GRAP standards and asset register. No qualification on audit since 2016/17 financial year on these assets that require such expertise.

Skills transfer

The transfer skill plan was drafted/compiled, and progress was given on quarterly basis to Audit Committee.

All officials involved in preparation of the Asset Register were involved in the process, being financial and technical officials.

Monitoring

Weekly meeting chaired by CFO in a form of OPCA (operation clean audit) and AFS readiness meetings.

11.7 DEBTORS MANAGEMENT

11.7.1 Debtor Book

Debtors amount to almost **R1,7 billion**. Mankweng project to be fast tracked. Government debtors (**SANDF and Hospitals**) may need an IGR intervention.

Staff and councillors' debt is being recouped monthly and progress is reported to Council on a monthly basis through the revenue report.

Debt incentive scheme at an advanced stage and anticipated to be implemented in July/**August 2022**.

Debtor Book

Description	Amount	%
Mankweng	330 000 000	22%
Govt debtors	91 946 555	6%
Interest on outstanding debts	286 145 908	19%
Indigent debtors	55 556 000	4%
Other debtors (commercial, institutions and households)	756 395 508	50%

Municipality is currently implementing credit and debt control initiatives in order to minimize level of debt book, some of those initiatives are debtor cleansing, replacement of ageing meters, application of disconnection on customers who owes municipality above 60days and settlement incentives as well as handover to debt collectors on debts above 90 days. Central to that is improvement on customer relation management which the municipality has made a pillar.

COVID 19 have serious implications for South African society in the social, economic, health and technological realms.

- Municipality: - more customers are failing to pay their municipal accounts.
- Tempering of Meters is on the increase.
- Municipal Call Centres are no longer relevant:
- Customers communicate using various social media platforms.
- Polokwane needs to urgently migrate into the technological space.

11.7.3 Creditors

Outstanding trade creditors amounted to **R 186 746 770** at **31 July 2022**.

Supporting Table SC4 Monthly Budget Statement - aged creditors - 2022/23

Lepelle Northern Water	Current	17 604 921,45
Other service providers	Current	49 452 739,27
Total		186 746 770,07

Source: Budget and Treasury Office

Council pays its creditors within **30 days**. In terms of circular 49 issued by treasury and further section 65(2) (e) of MFMA emphasize that municipality must honour its obligation within 30 days.

11.7.5 Key Intervention on Debt Book

The **smart metering** project will be the **key catalytic** intervention that will assist in recovering arrear accounts. The draft revenue recovery plan is based on a 60/40 principle whereby all consumption/purchased for a month will be allocated at 60% for current consumption and 40% will be allocated on the arrears.

Furthermore, consumers will be categorized under certain levels depending on the amount of debt whereupon a payment structure will be developed. For example, if a consumer is owing above R100 000, will be required to pay a 20% upfront payment before activating his/her token or meter for purchases. The above approach will ensure that the majority of the debt is realised within 12 months.

The above intervention will be implemented once the data cleansing on the ground is finalised. The data cleansing exercise resolves around the linking of account numbers to erf numbers rather than meter numbers as this can create a distortion of data once the accounts are closed or changed.

11.8 CASH FLOW

Cash flow constraints were experienced in the first half of the last financial year and last quarter of the financial year mainly due to the following reasons.

- High Eskom bills in excess of **R119Million** for the first month of the financial year.
- Expenditure, although within budget, was incurred faster than the rate of revenue collections.
- Revenue collections were subdued due to the general poor economy, breaching/tempering of meters and dysfunctional meters.
- Integration of credit control was still in progress as the previous financial system was unable to perform real time credit control\
- Significant impact from COVID 19 as detailed under revenue management section **during the last quarter of the financial year.**

11.8.1 The municipality implemented the following controls.

The municipality implemented the following controls to date:

- Use of the **new financial system** to perform real time credit control due to the successful integration functionality.
- Intensified credit control including government departments (with the assistance of the finance portfolio) which saw collections of over **R60 million** from government departments in a space of few months.
- Continued conversions to **prepaid meters** which serves as a main cash drive year in year out.
- Reduction in operation expenditure of almost 30% compared to the prior financial years mainly due to the reduction of consultants as transfer of skills have been met, completion of feasibility studies to implement key projects and use of internal staff rather than outsourced companies such as grass cutting and electricity maintenance.

Further, the Office of the Chief Financial Officer has made the capital budget (both own and grant funded) VAT inclusive as opposed to the previous financial years. This will prevent the strain on the cash flows that would be required to fund the VAT payable to SARS until it is recovered. The VAT receivable in this approach will be directly invested into a reserve account to ensure that the municipality is always cash backed and financially stable.

The above interventions had a significant impact as cash flows increased by almost 20% year on year as average collection.

11.9 Auditor General Outcomes

11.9.1. AUDIT OUTCOMES OPINIONS PER FINANCIAL YEAR

FINANCIAL YEAR	AUDIT OUTCOME
2008/2009	Unqualified
2009/2010	Qualified
2010/2011	Qualified
2011/2012	Disclaimer
2012/2013	Disclaimer
2013/2014	Qualified
2014/2015	Unqualified (Matters of Emphasis)
2015/2016	Unqualified (Matters of Emphasis)
2016/2017	Qualified
2017/2018	Qualified
2018/2019	Qualified
2019/2020	Qualified
2020/2021	Qualified
2021/2022	Unqualified

11.9.2 Audit Strategy

The Municipality established a task team to drive the Clean Audit initiative called “Operation Clean Audit” and which aims at improving governance, financial systems and service delivery at both local and provincial government level, reversing poor internal controls, poor quality of financial statements and non-compliance with Supply Chain Management whilst attaining a clean audit opinion.

The Task Team report to Council via the Audit and Performance Audit Committee which is responsible to Council for financial and internal control oversight in line with the Audit and Performance Audit Committee Charter.

Committee	Purpose	Frequency	Attendees
Operation Clean Audit (OPCA)	To report progress on the audit action plan.	Weekly	Management, internal audit, MMC for Finance and the EM.
Asset management	To report progress on specific asset issues. This is a sub-committee of the OPCA	Weekly	CFO, Asset management, internal audit and National Treasury
Annual Financial Statement	To report progress on the AFS process plan. This is a sub-committee of the OPCA	Weekly	CFO, Asset management, internal audit and National Treasury
Audit Committee	To review the annual financial statements and audit action plan.	Quarterly and through special meetings.	Management, internal audit, MMC for Finance and the EM.

11.10 FINANCIAL SUSTAINABILITY

It has been recognized that the well-managed physical development of the municipal precinct and the sustainable provision of infrastructural and social services to the citizenry of Polokwane Municipality, both depend to a large degree on the efficiency of the municipality as an institution, as well as its financial viability.

Repairs and maintenance become fundamental to financial sustainability. All revenue generating assets have to be maintained and refurbished all the time to continue rendering the requisite services and yielding the revenue required to continue as a going concern. To this end the municipality has continued to set aside more and more resources both operational and capital to ensure that the assets are in a good state.

One of the processes the municipality embarked on as part of the turnaround was to develop a turnaround strategy striving to reduce costs and enhance revenue. Specific areas were targeted for budget reduction and streamlining. Luxury spending and unplanned spending was discouraged. Certain measures have been put in place to improve the management of revenue and collection thereof. In general municipality is working hard to ensure full compliance to circular 70 of the MFMA issued by National Treasury.

11.11. SUPPLY CHAIN MANAGEMENT POLICY (SCM)

The Polokwane Municipal Council adopted the Supply Chain Management Policy that was drafted in accordance with the requirements of the Local Government: Municipal Finance Management Act, No. 56 (MFMA), as well as the Municipal Supply Chain Management Regulations, Government Gazette Notice No. 868 of 2005.

Section 217 of the Constitution of the Republic of South Africa requires that when an organ of State contracts for goods and services, it must do so in accordance with a system which is fair, equitable, transparent, competitive and cost effective.

The Supply Chain Management Policy gives effect to these principles and the Preferential Procurement Legislation, and furthermore to comply with the provisions of the Local Government: Municipal Finance Management Act and its Regulations promulgated in terms thereof. The SCM policy has recently been reviewed and approved by Council to ensure that controls are tightened to combat fraud and corruption in procurement processes.

11.11.1 Supply Chain Committees

Chapter 11 of the MFMA compels the municipalities to establish Supply Chain Management Units and implement the SCM Policy, which gives effect to all SCM functional areas. The Supply Chain Management Unit has been established and operates under a direct supervision of the **Chief Financial Officer**.

Regulation 26 of the Municipal Supply Chain Management Regulations stipulates that a municipality's Supply Chain Management system must provide for a committee system for competitive bids consisting of at least a bid specification, bid evaluation and bid adjudication committee. The Municipality has established the following committees: -

- **Bid Specification Committee.**
- **Bid Evaluation Committee and**
- **Bid Adjudication Committee.**

Each Committee consists of a practitioner from Supply Chain Management and officials from key Directorates in the Municipality. The Accounting Officer is responsible for the appointment of bid committees and committees are appointed once a year and reviewed accordingly by the Accounting Officer. Although the chain of work of these Committees is intertwined, they operate separately from each other. All members of the Committees sign an Oath of Secrecy and Declaration of Interest to ensure that the bidding system is fair, transparency, openness and equitable.

Municipality has awarded 98% of the bids to the BBBEE compliant service providers as part of implementation of BBBEE legislation however the challenge remain on the category of empowerment insofar as disabled sector of society is concern. Currently municipality is advertising the tenders on the CSD as part of National Treasury initiative.

To curb irregular expenditure, the Office of the Chief Financial Officer has strengthened its compliance unit and developed a procurement checklist. The compliance officers verify whether all bids have been processes in accordance with the MFMA procurement regulations before been awarded.

A new reform was implemented by changing the SCM accounting policy to include the bench marking of all store materials on the market before tendering or advertising for the bid. This will ensure value for money and a further efficient spending of taxpayer money.

11.11.2 SCM Challenges on Projects

List of SCM challenges on Projects	Progress to date	Solutions
<p><u>Non-Responsive Bid</u></p> <p>Non-responsive bid is when service providers or contractors are failing to respond to the bid evaluation requirements. In this case, the bid is cancelled and re-advertised.</p>	<p>All the bids where bidders were non-responsive to the bid have been cancelled and re-advertised.</p>	<p>The SCM will revert to having physical briefing sessions to assist service providers in understanding the tender conditions.</p>
<p><u>Declining the Award</u></p> <p>There are incidents whereby contractors decline the appointments or awards due to under-quoting by the contractor or service provider on the project. The projects were cancelled and re-advertised if there are no second bidder in line.</p>	<p>The projects were cancelled and re-advertised.</p>	<p>The SCM will revert to having physical briefing sessions to assist the service providers in understanding the tender conditions.</p>
<p><u>Delays in Finalization of the Specifications by the Consulting Engineers</u></p> <p>Supply Chain Management (Demand Management) experienced delays with specifications that are referred to consulting engineers for rectifications. The specification takes a very long time to be finalized and thus delays the process of advertisement of the bid.</p>	<p>Follow ups are being made with the end-user departments for submission of specifications.</p>	<p>The SCM will create a spreadsheet which will indicate timeframes from the date of submission of the specification and approval by the Municipal Manager. The SCM has issued a circular to all SBUs to submit specifications in preparations for next financial year.</p>
<p><u>Quoting Above Budget</u></p> <p>There are incidents wherein service providers or contractors quote above the budget. The risk of appointing such contractors is that projects will be delayed since there will be no funds to cover the shortfall at that time. The end-user department will wait for budget adjustment processes to unfold in order to obtain additional funding.</p>	<p>Projects are delayed for appointment until such time that funding is guaranteed.</p>	<p>Proper costing of the project should be done by the consulting engineers.</p>

11.12 MUNICIPAL REGULATIONS ON A STANDARD CHART OF ACCOUNTS (MSCOA)

mSCOA stands for “standard chart of accounts” and provides a uniform and standardized financial transaction classification framework. Essentially this means that mSCOA prescribes the method (the how) and format (the look) that municipalities and their entities should use to record and classify all expenditure (capital and operating), revenue, assets, liabilities, equity, policy outcomes and legislative reporting. mSCOA is a “proudly South African” project researched by National Treasury based on municipal practices, reporting outcomes, policy implementation and review, etc.

11.12.1 mSCOA as a Business Reform

mSCOA is a business reform rather than a mere financial reform and requires multidimensional recording and reporting of every transaction across the following 7 segments:

Background

Minister of Finance has, in terms of section 168 of the Local Government: Municipal Finance Management Act, 2003 (Act No.56 of 2003), and acting with the concurrence of the Minister of Cooperative Governance and Traditional Affairs gazette the Municipal Regulations on Standard Chart of Accounts (mSCOA) into effect on 22 April 2014. Municipal SCOA provides a uniform and standardized financial transaction classification framework. Essentially this means that mSCOA prescribes the method (the how) and format (the look) that municipalities and their entities should use to record and classify all expenditure (capital and operating), revenue, assets and liabilities, policy outcomes and legislative reporting. This is done at transactional level and ensures that a municipality and its entities have minimum business processes in place. This will result in an improved understanding of the role of local government in the broader national policy framework and linkage to other government functions.

The Regulations apply to all municipalities and municipal entities and indicate its applicability and relevance to each specific municipal environment while accommodating organizational uniqueness and structural differences. The Regulation provides for a three-year preparation and readiness window and all 278 municipalities had to be compliant to the mSCOA classification framework.

11.12.2 mSCOA Implementation by Polokwane Municipality

The municipality is one of the best performing municipalities in the country in the compliance of Mscoa regulations. To date we have not lost any of our equitable shares due to non-compliances and our reporting is extracted directly from the system by National Treasury due to the strict compliances to the Mscoa regulations.

11.12.3 mSCOA - Business process & systems alignment

	National Treasury area of Focus	Polokwane Municipality
1	Is this treated as a business reform? What is the involvement of different departments within the municipality?	Yes, 15 Business processes are consistently reviewed and evaluated however, because of the enormity of the task, it is done piecemeal according to the highest priority budget and treasury and AFS and IDP subsequent review of the remaining process will be actioned and prioritized accordingly.
2	What is the involvement of different departments within the municipality?	Composition of steering committee is comprised of different SBU representatives, and each department is responsible for their strategic objective, e.g., unbundling of capital and operational projects (e.g., Typical Work stream).
3	Reflect on your progress with mSCOA reflecting on the implications of not being up to date with the reform?	Even though the Financial Management System (FMS) is mSCOA compliant sub-systems are not seamlessly integrating with the FMS. Our current status at NT is green. The team is continuously working hard to ensure progress and compliance.
4	Reflect a road map to indicate how and by when the municipality will become mSCOA compliant.	<u>Green status</u> has been achieved at NT and on those bases, we believe we are on the road to fully compliant. The Municipality is now working on traffic system be mSCOA compliant by the end of this quarter (30 June 2021). Payroll system also need to be amended to change their GL setup in order to be mSCOA compliant.

Source: Budget and Treasury Office

11.12.4 mSCOA Governance Structures

The required governance structures are in place to drive and ensure successful implementation of the reform. This is treated as a reform where all stream members (which included different departments) were appointed by the **Municipal Manager** and project plan was developed and delivered as such.

The **technical and steering committee** met regularly to update each other on the challenges and progress made. All Departments are using the mSCOA budget to transact on and will submit their **budget** in this format.

11.12.5 mSCOA Implementation Progress

2. Data string submission status – Financial and Non-financial data

Section 71(1) of the MFMA requires the accounting officer of the municipality to submit monthly budget statements no later than 10 working days after the end of each month in a prescribed format. During the period of review, all the Section 71 data strings were submitted successfully.

It was also observed that all the required Non-financial data strings for the period M01 – M12 were successfully submitted to the LG portal.

Source: Budget and Treasury Office

The budget was prepared on the Munsoft financial system. Data strings are seamlessly synced with MUNSOFT Reporting tool which generates A, B and C Schedule.

Module Usage

Module	Usage	Challenges
IDP Projects	Fully utilized - MUNSOFT	N/A
Budget Management	Fully utilized - MUNSOFT	N/A
Billing and Receipting	Fully utilized - MUNSOFT	N/A
General Ledger	Fully utilized - MUNSOFT	N/A
Asset Management	Other System	Asset management project has been put on hold until finalization of Annual Financial Statements
Payroll	3 rd Party System - SAGE	Interface to the Munsoft is a challenge as the system fails to accommodate multiple companies.
Creditors	Fully utilized - MUNSOFT	N/A
Supply Chain Management	Partially utilized - MUNSOFT	Contracts, SLA's as well as evaluation of supplier performance are managed manually outside the MUNSOFT system.

Source: Budget and Treasury Office

Green status has been achieved at NT and on those bases, we believe we are on the road to be fully compliant.

- **Sub-system at traffic department (Truvelo)** is integrating seamlessly to the FMS.
- **Sage Sub-system (employee related cost)** do not integrate seamlessly at this stage.

- **Assets** are not seamlessly integrating to the FMS.
- Polokwane will start migration of their assets to Munsoft Asset Management System and the **completion date** as per project plan are **31 December 2022**.

11.12.6 mSCOA Implementation Progress -(PHA)

Polokwane Housing Association (PHA)

- The mSCOA compliant FMS was implemented **1 July 2020** and **they are transacting** on it.
- Munsoft is currently **assisting PHA** to setup the consolidation between the **parent and the entity**.
- PHA Sage sub-system – **Not fully** implemented yet.
- Expected finalization date is **31 May 2021**.

11.12.7 NT benchmarking Session mSCOA Request

During the NT benchmarking Session held on the 18 May 2021, The City of Polokwane has requested National Treasury of the following:

The National Treasury must:

- Investigate the possibility to create data strings linked to the Batho Pele dummy budget A1 schedule; and
- Investigate the possibility to create data strings linked to an Annual Financial Statement specimen budget.

11.12.8 BORROWINGS

INSTITUTION	INTEREST	LOAN AMOUNT - OPENING BALANCE June 2022	REDEMPTION TO DATE - May 2022	EXPENSED INTEREST TO DATE - June 2022	ACCRUED INTEREST - June 2022	CLOSING BALANCE - June 2022	EXPIRY DATE / REDEMPTION DATE

11.13 COST CONTAINMENT

The cost containment regulations came into effect on 1 July 2019. The regulations require the municipality to monitor certain categories of expenditure with the objective to contain costs. The municipality is also required to report on the budget and actual expenditure relating to the regulated costs on a regular basis as outlined below

Cost Containment Annual Report				
Cost Containment Measure	Original Budget	Adjustments Budget	Total Expenditure	Savings
		R'000		R'000
Consultants and Professional Services	105 446 400	111 414 124	85 324 100	26 090 024

11.14.2 Processes in indigent Applications

TASK	TIMELINE	OUTPUT
Receipt of application files from the Municipality and consumption and account confirmation	5 days	Received documents to be sorted according to the wards
Capturing of the information on the indigent system and scanning of documents	3 days	Verification of the collected files and the existing information on the system
Distribution of Public Notice Letters and SMS	2 days	Clear and precise instructions to be forwarded to the applicants beforehand, for the required attachments
Site Visits	1 days	Collection of the required documents from the applicants, and photographic evidence of the indigent household
Capturing of updated documents on the system	2 days	Scanning and uploading of the updated documents on the system.
External Vetting	14 Days	The collated documents and the information to be vetted for correctness.
Vetting Results and follow up and customisation	4 days	Compilation of a Report to the Municipality on recommendations of the applications based on the results of the external vetting.
Send Report to the Municipality for decision	3 days	Compiled and consolidated report to be forwarded to the Municipality.
Upload results of the application unto the system	3 Days	Receipt of the decisions of the applications from the Municipality
Send outcome results to the applicant through sms	1 day	Informing the applicants of the outcome of their applications.
Write Off and flagging as indigent on the system	3 to 15 days after month end done	The capturing and rebates and possible write off applied on the system after system month end is processed.

11.14.3 Challenges and Mitigation/Control – Indigent Support

Challenges	Description	Mitigation/Control
Late application	Residents don't apply for indigent subsidy until they are terminated and then they claim the indigent status	Payment is required until the customer qualify as indigent. Applicant does not warrant the indigent status.
Incomplete/ inaccurate information	Applicant often supply incomplete or incorrect information and documents delaying the verification process	Checklist is made and the officials try to validate the information on application, the vetting provide information not provided by the applicant.

Challenges	Description	Mitigation/Control
Unavailability of applicant	Customers when requested to be available for verification they are often not available delaying the process, at times the customer do not have the required copies of conformation required failing the site verification.	Up to about 3 site visits are done before the customer is disqualified and the process has to start from the beginning.
Ownership	Often the owners who passed on has the house allocated as family house while other members of the household are employed	The information provided by the household get verified and normally the process requires more time and additional documents.
False information/claims	New information is not disclosed such job status and spouse who is employed.	Write offs if already done are reinstated and the indigent disqualified. Currently 300 under investigation

11.15.1 Loans Repayments

- Repayments are made on the due dates and the municipality has not defaulted in its loans since inception. The loans were incurred to finance **the replacement of AC pipes and pre-paid metering projects around 2016/17 financial year**.
- These projects have returned 76% return on capital since inception in line with the 5 year pay-back period.
- However, we need to reassess how to pay back the loans sooner since the returns are being realised as plan.

11.16 Key Ratios

RATIO		NORM/RANGE	RESULT	INTERPRETATION
1	Cash / Cost Coverage Ratio (Excl. Unspent Conditional Grants)	1 - 3 Months	1 Month	Within the norm. However, the municipality should set a target of 1,5 in the short term, 2 in the medium and around 2,5 in the long term.

2	Current Ratio	1.5 - 2:1	1.1	Much needs to be done on creditor management and a reduction in budget is necessary.
---	---------------	-----------	-----	--

Source: Budget and Treasury Office

11.16.1 Net cash flow position from working capital.

The following table reflects the net cash flow position from working capital (i.e., trade creditors and debtors).

Description	Amount
Available cash	301 154 777
Less: Trade creditors	(497 112 352)
Net cash flow before cash inflows from trade debtors	(195 957 575)
Add: Trade debtors	654 197 235
Net operational cash surplus	458 239 660

Source: Budget and Treasury Office

Although, we are in a net cash surplus from a working capital position, National Treasury only assesses the analysis from a creditor relative to the available cash as highlighted in yellow.

This implies that our budget will have to take this analysis into account going forward. Reduction in expenditure and increase in cash reserves will be the only appropriate mitigation measure to achieve a positive cash flow before taking cash inflows from receivables into account.

11.17 FINANCIAL HEALTH ASSESSMENT

11.17.1 Description of each Financial Health Category

	Category	Description
1	Bankrupt	Solvency ratio of less than 1 (total liabilities exceed total asset i.e., negative equity)
2	Insolvent	Current ratio less than 1
3	Solvent	Current ratio above 1 but available cash exceeds trade creditors before taking cash collections from debtors.

4	Constraint Liquidity Ratio	Current ratio less than 1 but can meet current creditors from available cash.
5	Short To Medium Term Viability	Current ratio above 1

Source: Budget and Treasury Office

11.17.2 Polokwane Financial Health Status

Financial component	Amount (R'000)	Ratio
Total Assets	16 945 861	Solvency ratio 8,5:1
Total Liabilities	1 979 436	
Total Wealth/Equity	16 189 748	
Total current assets	1 223 323	Current Ratio 1,07:1
Total current liabilities	1 147 279	

Source: Budget and Treasury Office

11.17.3 The Status of the City of Polokwane in terms of the NT Assessment

Based on the analysis, the city of Polokwane falls under the **solvent category** which generally indicates that the municipality can continue operations financially **but not** as comfortable as we would desire.

Unfortunately, the COVID 19 pandemic did not assist the current ratio as the municipality loss over **R110 million** in billable revenue since the hard lockdown in March 2020.

Although solvent, the City of Polokwane should **not** exercise complacency as in our view this category indicates a break-even situation where revenue **needs to increase** and/or better expenditure management (including cost optimisation) needs to be implemented **urgently**.

11.17.4 SHIFT TO THE SHORT TO MEDIUM CATERGORY

There is a need to shift towards the **short to medium category** to achieve an adequate current ratio.

Description	Amount
Available cash	301 154 777
Less: Trade creditors	(497 112 352)
Net cash flow before cash inflows from trade debtors	(195 957 575)
Add: Trade debtors	654 197 235
Net operational cash surplus	458 239 660

Source: Budget and Treasury Office (2022)

Although, we are in a net cash surplus from a working capital position, National Treasury only assesses the analysis from a creditor relative to the available cash as highlighted in yellow. This implies that our budget will have to take this analysis into account going forward. Reduction in expenditure and increase in cash reserves will be the only appropriate mitigation measure to achieve a positive cash flow before taking cash inflows from receivables into account.

11.18 KEY RATIOS

11.18.1. Asset Management

RATIO		NORM	INPUT DESCRIPTION	RESULT	INTERPRETATION
1	Capital Expenditure to Total Expenditure	10% to 20%		16%	Within the norm.
			Total Operating Expenditure	4 294 765	
			Taxation Expense	-	
			Total Capital Expenditure	827 146	
2	Impairment of Property, Plant and Equipment, Investment Property and Intangible assets (Carrying Value)	0%		0%	No impairment was noted i.e., assets are in a reasonable condition.
			PPE, Investment Property and Intangible Impairment	-	
			PPE at carrying value	16 216 926	
			Investment at carrying value	715 153	

RATIO		NORM	INPUT DESCRIPTION	RESULT	INTERPRETATION
			Intangible Assets at carrying value	16 934	
3	Repairs and Maintenance as a % of Property, Plant and Equipment and Investment Property (Carrying Value)	8%		8%	If we take out the revaluation gain of the assets at carry them at cost of purchase the ratio is within the norm of 8%. By taking the revalued amount the ratio is 3.3%. The revaluation tends to increase the value of assets from what was originally purchased
			Total Repairs and Maintenance Expenditure	527 000	
			PPE at carrying value	6 216 926	
			Investment Property at Carrying value	715 153	

Source: Budget and Treasury Office (2022)

11.18.2. Debtor Management

RATIO		NORM/RANGE	INPUT DESCRIPTION	RESULT	INTERPRETATION
1	Collection Rate	95%		107%	Collection rate accumulatively above the norm
			Gross Debtors closing balance	1 435 308	
			Gross Debtors opening balance	1 593 380	
			Bad debts written Off	-	
			Billed Revenue	2 210 308	
2	Bad Debts Written-off as % of Provision for Bad Debt	100%		0%	No bad debts written off. Waiting for the next Council for approval.
			Consumer Debtors Bad debts written off	-	
			Consumer Debtors Current	939 401	

			bad debt Provision		
3	Net Debtors Days	30 days		99 days	The huge net debtor days is due to the govt debtors and debtors of Mankweng which are cumulatively R600 million.
			Gross debtors	1 593 380	
			Bad debts Provision	992 000	
			Billed Revenue	2 210 308	

Source: Budget and Treasury Office (2022)

11.18.3 Liquidity Management

RATIO		NORM/RANGE	INPUT DESCRIPTION	RESULT	INTERPRETATION
1	Cash / Cost Coverage Ratio (Excl. Unspent Conditional Grants)	1 - 3 Months		1 Month	Within the norm. However, the municipality should set a target of 1,5 in the short term, 2 in the medium and around 2,5 in the long term.
			Cash and cash equivalents	301 200	
			Unspent Conditional Grants	77 000	
			Overdraft	-	
			Short Term Investments	-	
			Monthly Fixed Operational Expenditure	2 259 000	
2	Current Ratio	1.5 - 2:1		1.07	Much needs to be done on creditor management and a reduction in budget is necessary.
			Current Assets	1 223 323	
			Current Liabilities	1 147 279	

Source: Budget and Treasury Office (2022)

11.18.4 Liability Management

RATIO		NORM/RANGE	INPUT DESCRIPTION	RESULT	INTERPRETATION
1	Capital Cost(Interest Paid and Redemption) as a % of Total Operating Expenditure	6% - 8%		3%	Within the norm. Capital and interest payments represent a small portion relative to our total operational expenditures.
			Interest Paid	61 910	
			Redemption	50 609	
			Total Operating Expenditure	4 295 000	
			Taxation Expense	-	
2	Debt (Total Borrowings) / Revenue	45%		11%	Within norm. According to the indicator we qualify for a R700m loan . However, <u>loan funding not recommended.</u>
			Total Debt	415 000	
			Total Operating Revenue	3 616 890	
			Operational Conditional Grants	-	

Source: Budget and Treasury Office (2022)

11.19 Key Ratios - Financial Performance

RATIO		NORM/RANGE	INPUT DESCRIPTION	RESULT	INTERPRETATION
1	Net Operating Surplus Margin	= or > 0%		1%	Although we are in net surplus, an increase in this figure is required with a recommended 2,5% in the short term. A 1% surplus reflects more or less at break-even point mainly
			Total Operating Revenue	3 616 890	
			Depreciation (Valuation less original cost)	711 102	
			Total Operating Expenditure	4 295 000	

RATIO		NORM/RANGE	INPUT DESCRIPTION	RESULT	INTERPRETATION
			Taxation Expense	-	caused by the COVID 19 pandemic.
2	Net Surplus /Deficit Electricity	0% - 15%		25%	Above the norm. Key consideration is however sustainability.
			Total Electricity Revenue	1 070 089	
			Net expenditure after EQ allocation	803 678	
			EQ allocation in terms of LGES	205 483	
			Total Electricity Expenditure (including depreciation at cost)	1 009 161	
3	Net Surplus /Deficit Water	= or > 0%		-11%	Less than the norm. Relook at cost drivers.
			Total Water Revenue	245 370	
			Net expenditure after EQ allocation	272 905	
			EQ allocation in terms of LGES	317 803	
			Total Water Expenditure (including depreciation at cost)	590 708	
4	Net Surplus /Deficit Refuse	= or > 0%		100%	Within the norm. More effective allocation of EQ needs to be considered irrespective of green highlight.
			Total Refuse Revenue	127 400	
			Net expenditure after EQ allocation	-	
			EQ allocation in terms of LGES	196 588	
			Total Refuse Expenditure (including depreciation at cost)	149 069	
5		= or > 0%		100%	Within the norm

RATIO		NORM/RANGE	INPUT DESCRIPTION	RESULT	INTERPRETATION
	Net Surplus /Deficit Sanitation and Waste Water		Total Sanitation and Water Waste Revenue	125 300	More effective allocation of EQ needs to be considered irrespective of green highlight
			Net expenditure after EQ allocation	-	
			EQ allocation in terms of LGES	234 513	
			Total Refuse Expenditure (including depreciation at cost)	45 600	

Source: Budget and Treasury Office (2022)

11.19.1 Key ratios – Distribution losses

RATIO		NORM/RANGE	INPUT DESCRIPTION	RESULT	INTERPRETATION
1	Electricity Distribution Losses (Percentage)	7% - 10%		13%	More losses than the requirement of the norm.
			Loss in kwh	92 309 655	
2	Water Distribution Losses (Percentage)	15% - 30%		22%	Within the norm
			Loss in KL	8 536 877	

Source: Budget and Treasury Office (2022)

11.19.2 Key ratios – Revenue Management

RATIO		NORM/RANGE	INPUT DESCRIPTION	RESULT	INTERPRETATION
1	Growth in Number of Active Consumer Accounts	None		2%	Developments within the City should be fast tracked, or strategies should be developed to
			Number of Active Debtors Accounts (Previous)	70 584	

			Number of Active Debtors Accounts (Current)	71 806	encourage more investments.
2	Revenue Growth (%)	= CPI		4%	Within the norm. However, planning projects need to be fast tracked to ensure growth above CPI.
			CPI	4%	
			Total Revenue (Previous)	2 019 714	
			Total Revenue (Current)	2 105 784	

Source: Budget and Treasury Office (2022)

11.19.3 Key ratios – Expenditure Management

	RATIO	NORM/RANGE	INPUT DESCRIPTION	RESULT	INTERPRETATION
1	Creditors Payment Period (Trade Creditors)	30 days		30 days	Within the norm.
			Total expenditure	220 000	
			Trade creditors	497 112	
2	Irregular, Fruitless and Wasteful and Unauthorised Expenditure / Total Operating Expenditure	0%		14%	The unauthorised expenditure of R1 billion on the AFS is due to non-cash unauthorised expenditure and is awaiting Council approval for write off. Benchmarked with City of CT in 2017
			Irregular, Fruitless and Wasteful and Unauthorised Expenditure	614 953	
			Total Operating Expenditure	4 295 000	
			Taxation Expense	-	
3	Remuneration as % of Total Operating Expenditure	25% - 40%		23%	Within the norm. However, this is 38% of
			Employee/personnel related cost	964 703	

RATIO		NORM/RANGE	INPUT DESCRIPTION	RESULT	INTERPRETATION
			Councillors Remuneration	38 692	own cash revenues and will have to be carefully monitored. Further, overtime of R92 million was incurred which represents 10% of the salary bill, General acceptable norm from Treasury is 5% While a revised policy is in progress, much is needed to address this matter (Corporate and Shared Services).
			Total Operating Expenditure	4 295 000	
4	Contracted Services % of Total Operating Expenditure	2% - 5%		19%	R157 million is funded from grants. The ratio drops to 15% when excluding grants. However, not within the norm. More cost efficiencies need to be achieved.
			Contracted Services	808 992	
			Total Operating Expenditure	4 295 000	
			Taxation Expense	-	

Source: Budget and Treasury Office (2022)

11.19.4 Key ratios – Grant dependency

RATIO		NORM/RANGE	INPUT DESCRIPTION	RESULT	INTERPRETATION
1	Own funded Capital Expenditure (Internally Generated Funds) to Total Capital Expenditure	None		18%	The expenditure will not be reduced in the short to medium term.
			Internally generated funds	146 712	
			Total Capital Expenditure	803 096	
2	Own Source Revenue to Total Operating Revenue (Including Agency Revenue)	None		52%	Faster growth in the City will ensure less dependency on grants. The fast tracking of catalytic projects including the low hanging fruits such timely approvals of rezoning applications amongst others.
			Total Revenue	4 381 882	
			Government grant and subsidies	2 146 189	
			Public contributions and Donations	5 385	
			Capital Grants	77 200

11.19.5 Key ratio - Budget performance

RATIO		NORM/RANGE	INPUT DESCRIPTION	RESULT	INTERPRETATION
1	Capital Expenditure Budget Implementation Indicator	95% - 100%		89%	The capital expenditure includes own funded projects. DoRA expenditure amounted to 90% whilst the CRR was at 88%
			Actual Capital Expenditure	1 676 700	
			Budget Capital Expenditure	1 887 400	
2		95% - 100%		113%	

	Operating Expenditure Budget Implementation Indicator		Actual Operating Expenditure	4 295 000	The over expenditure was a result of the non cash expenditure of depreciation that exceeded the non cash budget.
			Budget Operating Expenditure	3 816 732	
3	Operating Revenue Budget Implementation Indicator	95% - 100%		99%	Revenue targets were met within the norm
			Actual Operating Revenue	69 000	
			Budget Operating Revenue	70 000	
4	Service Charges and Property Rates Revenue Budget Implementation Indicator	95% - 100%		91%	Variances were mainly due to subdued consumption revenue due to the COVID impacted economy.
			Actual Service Charges and Property Rates Revenue	2 052 160	
			Budget Service Charges and Property Rates Revenue	2 263 191

11.21 Expenditure

All creditors are paid within 30 days. AGSA has not raised this as a finding in the last audit as opposed to the last 3 financial years where it was a recurring finding.

Eskom and Lepelle Northern Water remain up to date. Proper engagements between managers and their service providers on the payment processes **is required**.

11.21.7 Debtors Incentive Scheme

From the draft data it means that **65%** of all active accounts are recoverable (excluding deceased accounts). If we add 50% of bad debtors as recoverable from the active accounts, the recoverability percentage moves up to **84%**

The inactive debtors (regarded as slow payers) has still been reconciled and will be finalized before 31 May 2022. More incentives can be focused here which will further increase the collectability of old debtor accounts. Looking at the bigger picture after considering the affordability levels, Polokwane can remain a good destination for investments.

11.22 Indigent Support

Description	Monthly average	Annually
Rebates on rates (revenue forgone)	1 546 189	18 554 268
Free basic water and electricity	2 404 216	28 850 594
Rebates on basic service charges (revenue forgone)	3 707 329	44 487 948
Purchase of Gel	400 000	4 800 000

Eskom for boreholes (rural areas)	1 641 099	19 693 188
Provision for water in rural areas	5 000 000	49 000 000
TOTAL	13 782 167	165 385 998

Source: Budget and Treasury Office (2022)

11.22.1 Indigent management

- Around 13 000 indigents on the system
- AGSA noted that the indigents or their household doing business with government and employment by government.
- In the 2021/22 financial year we have made use of technology by capturing electronic registration on the cloud and implemented a system that flags changes in indigent status monthly.
- Roadshows were conducted during February.
- The whole indigent register is to be revamped and cleansed by 30 June 2022.

11.23 Revenue performance

- To date, we have achieved almost **R192 million more** in own revenue collection than budgeted (or 10% over the anticipated budget). This was achieved through efficiency mainly through the use of technology and detailed review and monitoring over the credit control process.

Own revenue	Budget	Over performance
2 045 633 974,00	1 854 000 000,00	191 633 974,00

11.24 Revenue enhancement initiatives through technology

Finance and Electrical department working in collaboration with Cigicell (pre-paid bending system service provider) in a joint committee established in September 2021

Use of a software to identify low consumption on our 600+ Large Power Users. This has resulted in R27 million more billing since September 2021.

Use of specific software to identify consumers who are consuming less pre-paid electricity than expected. This has resulted in 334 illegal connections identified which is levied at **R70k** and **R150k** for households and businesses respectively. Around **70 accounts** have attached these penalties whilst the others are being investigated before been billed.

11.24.1 FINANCE MODELLING

For the next 10 years, our Capital Expenditure Framework/Asset Management Plan indicates that we require around **R11 billion** for new infrastructure projects to facilitate growth. The only viable option for now is to invest in PPP on revenue generating models.

Risk based revenue generating model → Municipality and SP share the additional revenue or cost savings.

11.24.2 CASH FLOW STRATEGY

- Municipality developed two main reforms.
- Cash flow strategy and Request for Goods and Services (RGS) → Please refer to handouts.

11.24.3 Cash flow strategy methodology

- The revenue/cash inflow capacity is calculated.
- The fixed component is calculated
- The savings or cash reserve build up is calculated.
- The remaining allocation is then distributed to the SBUs based on past performance and can be re-allocated accordingly based on priorities.

11.24.4 New Budget Approach

- No longer budget engagements between BTO and directorates.
- Directors to take the lead.
- Monthly cash flow allocations to be given as per the cash flow strategy framework.
- Budget (opex and capex) to be established from the allocation.
- Avoid budget allocation for the sake of budgeting Budget must be allocated to projects/activities that can have a full impact rather than allocating some budget to a project that requires much more. This renders the project ineffective.

11.24.5 BUDGET ALLOCATION - FIXED MONTHLY COSTS

Description	Amount
Eskom	88 000 000
Lepelle	28 000 000
Fleet management	1 376 000
Waste trucks	4 900 000
Landfill	1 500 000
Security	5 100 000
Munsoft	1 500 000
Fuel	4 000 000
Fleet tracking	1 200 000

Description	Amount
Fleet maintenance	1 800 000
Telkom	1 200 000
Salary (inc overtime)	86 000 000
Traffic department	8 000 000
Esilux (BRT VOC)	2 200 000
IT network, printers and other items	3 174 000
Total	237 000 000,00

11.24.6 BUDGET ALLOCATION - MONTHLY NET AVAILABLE RESOURCES EXCLUDING CONDITIONAL GRANTS

Description	Amount
Own revenue	218 000 000,00
Equitable share	88 000 000,00
Total own revenue	306 000 000,00
Fixed costs	235 000 000,00
Amount available before savings	71 000 000,00
Savings/Reserve build up	14 000 000,00
Available for distribution	57 000 000,00

11.25.2 Audit paragraph

Audit paragraph	Action
Useful review not adequately reviewed	Addressed in terms of AG recommendations and monitored through those activities
The municipality did not correctly calculate the fair value of land held to earn rentals or for capital appreciation in accordance with the requirements of GRAP 16, Investment property. This was due to inadequate assumptions made and variables used in the valuation methodology which were not supported by reliable and accurate information	Addressed in terms of AG recommendations
The municipality's revenue and receivables related to the service charges (Mankweng area) was incorrectly calculated as the estimated consumption used included inaccurate and incomplete information	Addressed in terms of AG recommendations

11.25.8 RISKS TO VIABILITY

- Meter tempering.
- Residents' unwillingness to pay/resistance.
- The operational costs of implementing BRT project.
- Insufficient budgeting for non-cash generating projects.
- Overspending of budgets or inadequate budget management by SBUs.
- Reliance on contracted services as opposed to building internal capacity.
- Slow turnaround times in supporting growth projects in the private sector e.g. housing and commercial developments.
- Overtime management.
- Non utilisation of appropriate funding models i.e., there should be more use of revenue sharing models rather than long term funding or PPP projects that require municipalities to pay from **projected (not guaranteed)** returns that might not be realized.
- Not adapting to zero based budgeting
- Hefty increases by Eskom
- Consumers switching to alternative energy sources.

11.25.9 Revenue and Cost Optimization

Description	Short term	Medium term	Long term
Sale of land	R60 million	X	X
Impact of implementing catalytic projects of developments	X	X	X
Review of all lease properties to market related rentals	X	X	X
Water metering of Mankweng	R7,8 million p.a.	R8,4 million p.a.	R9,1 million p.a.
Electricity metering of Mankweng	R7 million p.a.	R7,5 million p.a.	R8,2 million p.a.
Use of technology to curb contracted services eg use of trigger alarms to curb physical security such as those located at the substation or cables.	X	X	X
Power banks	R11 million per annum	R12,2 million per annum	R13,3 million per annum
Solar project		X	X
Land fill site extension vs recycling project (Tzaneen Municipality)	R10 million	X	X
Commercialisation (facilities)	R12 million p.a.	X	X
Use of temp labour vs over time job cards to reduce costs.	X	X	X
Fast tracking of the PHA housing projects in particular Garena Phase 2	R4,8 million p.a.	R5 million p.a.	R5,2 million p.a.
Use of internal capacity vs contracted services across the SBUs	X	X	X
Purchase of refuse trucks vs outsourcing	X	X	X

Source: Budget and Treasury Office (2022)

11.25.10 Revenue and Cost Optimization → What has been done already.

- Purchased own water tankers.

- New waste bid to cover only the city area while the rural clusters will be in house.
- Reduction in financial consultants by 100% as the annual financial statements will be done in house as we build capacity and skill transfer has already taken place.
- The use of own staff as far as possible in the Electricity SBU.

11.25.11 Revenue generation from other SBUs

Revenue component	Activity to enhance revenue
Traffic fines	Intergrated system to collate all fines payable within Polokwane's jurisdiction. To be paid when renewing annual license fees
Illegal dumping	Utilizing our fleet to perform monitoring
Clean up fees after conferences	Utilize our cleaners to clear up after conferences for a fee
Hawkers	Create an automated database and ensure debt is collected
Markets	Encourage flea markets and others for a fee

11.26 Research and Development

11.26.1 City of Polokwane Investor summit

A city development strategy should be developed to determine the status quo and the direction the city should follow to ensure city growth. The strategic document should be able to identify and analyze the key job creating industries (such as manufacturing) through key stakeholder engagements. Once such plan is developed a city summit can be held to attract potential investors from the private and public sector alike

11.26.2 Use of early warning underground cable theft alarm system to prevent cable theft.

This solution is mainly applied below the soil surface above load carrying cable. It utilizes vibrations to activate and informs that a tamper is detected. The technology is used at other municipalities and will also significantly reduce reliance on physical security and its related costs.

11.26.3 Revamped IT infrastructure and control centre

Example, a customer should be cable to log faults with pictures on an app. These issues should be than routed to all the various stakeholders such as technicians, relevant managers and the EM for monitoring purposes. This will also hold technicians accountable and reduce overtime due to the data that will be available for oversight reporting.

11.26.4 Risk to our financial viability

- Non-adherence to the cash flow strategy
- Overtime management especially over emergency overtime for essential services
- Road's concession project
- Illegal connections
- Community disruption as unwillingness to pay.
- Over reliance on contracted services and non-utilization of own staff
- Fuel costs
- Not investing in revenue generation projects
- Leeto Project

CHAPTER TWELF - Strategies Phase

12.1 Polokwane Municipality Strategies Chapter

Strategic planning is the process through which the leadership of an organization envision its future and develops the necessary procedures and operations to achieve that future. The leadership focuses on its organization and what it should do to improve its performance and is often viewed as a system in which Managers go about making, implementing and controlling important decisions across functions and levels in the organization.

The purpose of strategic planning is to transform the organization and should be a continuous consulting process that must be tailored to accommodate the climate of an organization. Strategic planning helps leaders to:

- Create its own organization's future.
- Improve the standard of living through effective, efficient and socio-economic service, delivery to all citizens of the municipal area.
- Provide a framework and a focus for improvement efforts.
- Build a critical mass; and
- Provide a means for assessing progress.

12.2 SWOT Analysis

The SWOT analysis is a strategic planning tool that is used to discuss and evaluate the **Strengths, Weaknesses, Opportunities, and Threats** of a particular organisation. It is a situational analysis in which the internal strengths and weaknesses of an organisation and external opportunities and threats faced by it are closely examined to chart a strategy.

Conducting a **SWOT** during a strategic planning session is advantageous for decision-making and to create understanding of dependencies between an organisation and its environment. It sets the framework for reviewing the strategy, the position and direction of the organisation and ensures versatile application of possible solutions.

The table below depicts the **SWOT** for the City of Polokwane

STRENGTHS	WEAKNESSES (EXCO Revised)
Compliant community consultative processes (IDP)	Ageing infrastructure and insufficient Budget
Sound and sustainable fiscal and financial management	Inadequate Participation by Business sector
Good investment rate (Internal rate of return on allocation of resources)	Lack of bulk water Sources for Sustainable water supply
Sound governance	Insufficient funds to service the strategic land owned by the Municipality

COP 17 compliant (Green/ Cleanest City award & Arbour award)	Insufficient waste water capacity
Water Service Authority	Insufficient social housing and student accommodation
Electricity License Authority City/Seshego that creates stable revenue from electricity	Financial Sustainability of PHA
Provincial Sporting and Recreation Hub (sporting games, indigenous games, rural sports, festivals, arts and culture, Mayoral Road race, Mayoral Charity Golf, Mapungubwe)	
Land availability within urban edge (Polokwane extension 40, 78, 72, 79, 106, 107, 108, 124, 126, 127, 133, 134, Ivydale Plots, Klipfontein, Stoefontein, Volgestruifontein, Engelsboom, Sterkloop, Weltevreden, Doornkraal, Doorndraai etc. but not serviced)	
Only Municipality in the province with Social Housing Institution (SHI) and designated restructuring zone	
Accredited Level 1 & 2 Housing provider	
SPLUMA Compliant	
Only Municipality in the province with Integrated Geographic Information System (GIS) (increased revenue via effective billing system, effective property management, proper recording and eased location of projects, bulk infrastructure, boreholes, sewer plants, efficient service delivery, management of illegal land uses, cemetery management, Valuation Roll and building control management)	
OPPORTUNITIES	THREATS
Broad revenue base (potential to collect from total of 280 225 (households) , revised valuation roll and bulk contributions.	Rapid Population growth (Services, CBD growth, informal settlement, crime, uncontrolled Influx Urban Decay,)
Potential for various hubs to be established: Economic, political, logistics, sporting and recreation hubs in Limpopo (Tourism, Gateway to Africa, Capital City, provincial offices, International Airport, sporting games, festivals, arts and culture, Mapungubwe)	Climate change (Natural disasters)
Available land for development	Service Delivery Protests Cable theft and vandalism of Municipal infrastructure Undocumented illegal immigrants
Accredited Level 1 & 2 Housing service provider to receive direct funding for housing programmes	Insufficient ICT infrastructure Planning (external)
Proximity to Higher learning institution – collaboration with higher learning institutions	Unstructured Land Use in Rural and Urban areas (Community needs vs municipal planning, Political influence and Land Grab)
Secondary City aspiring to achieve metropolitan status	Perception of corruption

Decentralized development and services through Clusters	Sustainability of Public Transport (Leeto la Polokwane)
Alternative energy sources	Litigation
Transport contracting authority	Inadequate Water Source
Public Private Partnership for development and implementation of Vision 2030 - Smart City initiatives	Weak economic growth
Young population	High unemployment rate
4 th Industrial revolution	
Geographic location of the municipality	
Rural development	
Extension of the electricity license area	
Transformation	

12.3 Strategic Intent of Polokwane Municipality

Section 152 (1) of the Constitution of the Republic of South Africa (1996) states that the objects of local government are:

- (a) to provide democratic and accountable government for local communities.
- (b) to ensure the provision of services to communities in a sustainable manner.
- (c) to promote social and economic development.
- (d) to promote a safe and healthy environment; and
- (e) to encourage the involvement of communities and community organisations in the matters of local government.

Section 152(2) prescribes that a municipality must strive, within its financial and administrative capacity, to achieve the objects set out in subsection (1). It is necessary for the City of Polokwane to always strive for the attainment of the objects of local government. As such the municipality has set out its strategic priorities that the Council will strive to achieve when the end of their term expires. The strategic priorities are aligned to the objects of local government as enshrined in the constitution and furthermore, the municipality has developed its strategic objectives to ensure that the set-out priorities are attained.

12.4 Polokwane Municipality Service Delivery Priorities for the term of Council

The service delivery priorities as set out below are very important in directing the resource allocations of the municipality. The priorities are biased towards service delivery functions and such the budget of the municipality will prioritise service delivery.

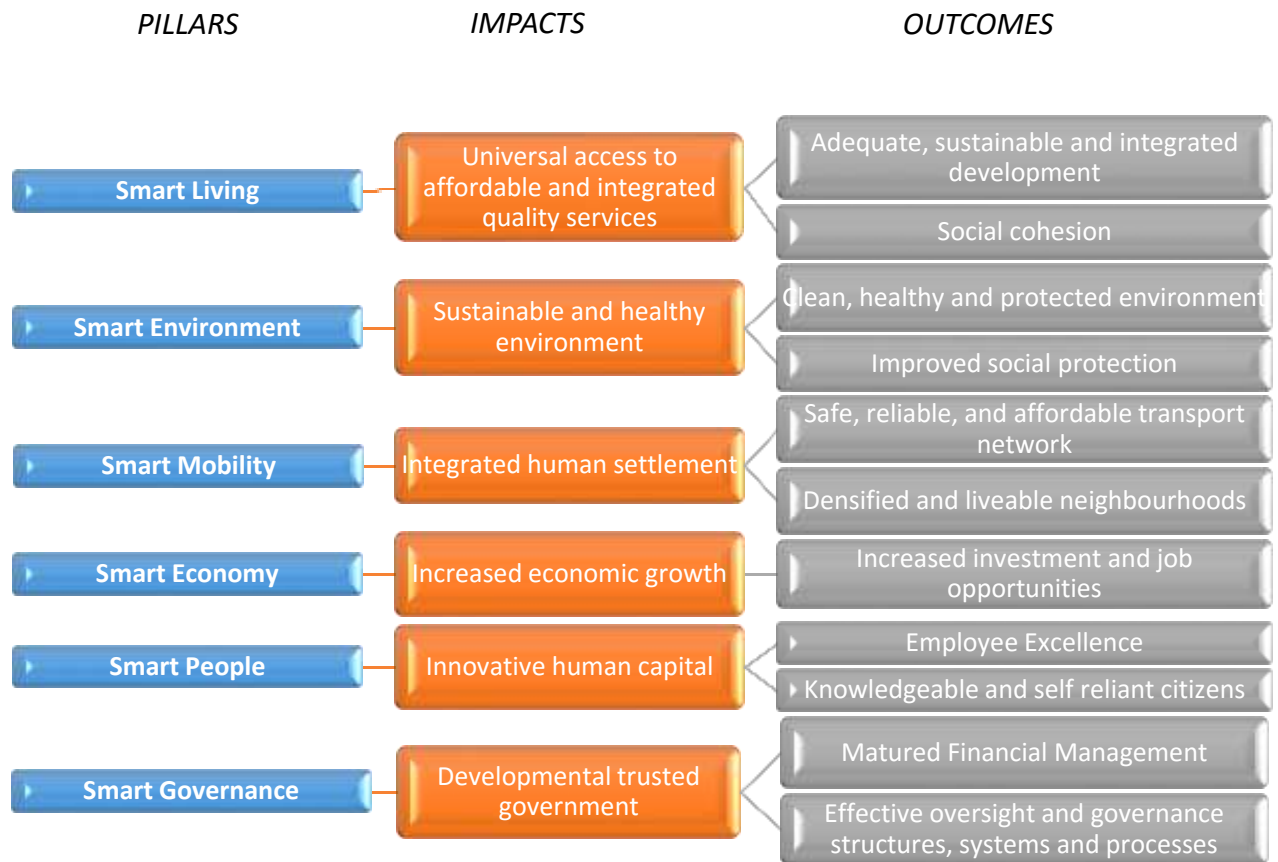

1. Provision of basic services, which include electricity provision, water and sanitation and refuse removal.
2. Strengthen the local economic development structures and expansion of expanded public works programme.
3. Upgrading of informal settlements and promotion of sustainable human settlements.
4. Overhaul of ageing service delivery infrastructure and maintenance of municipal facilities.
5. Improving transport, roads and bridges.
6. Improving sports and recreational facilities and promotion of social cohesion.
7. Development of municipal capacity to manage disaster risk and protection of environment.
8. Ensure long-term planning capacity, monitoring and evaluation.
9. Promotion of sound financial management to ensure financial sustainability.
10. Promotion of good governance and the participation of local communities in the municipal affairs.

12.5 Polokwane Municipality's IDP Strategic Objectives

The City of Polokwane has developed its strategic objectives guided by the priorities that the municipality set out to achieved. The objectives are aligned and addresses the local government objects as set out in the constitution of the country. The strategic objectives were reviewed during the Mayoral Bosberaad and there are aligned with the SWOT, Smart Pillars, Municipal Smart Pillars and Outcomes.

Polokwane Municipality IDP Strategic Objectives	
1	To ensure efficiency and effectiveness of Municipal administration.
2	To ensure the provision of basic and environmental services in a sustainable way to our communities.
3	To ensure social protection and education outcomes.
4	Promotion of economic growth, job creation and Sustainable human settlement.
5	To ensure community confidence in the system of local government.
6	To enhance Financial Viability and Financial Management.

12.6 Smart Pillar Impacts and Outcomes

12.7 Outcomes Based Management and Logic Model

At the beginning of 2013/14, the City of Polokwane embraced **Smart City - Vision 2030** with an aim to transform the Polokwane City into a bustling and growing metropolis that provides high-quality of life for its people through adopting the '**Smart City**' concept.

The development of the Vision 2030 broadened the long-term planning horizon to reposition the municipality in order to maximize the efficiency, effectiveness and impact of the Municipality.

The development of the Polokwane Economic Growth and Development Plan (**EGDP**) gave effect to the Smart City Concept which further concretized the Municipality's Smart Pillars articulated in the diagram below:

- In 2013/14 the Municipality adopted a blended **Outcomes Based Management** and **Logic Model methodologies** to guide planning and reporting processes that feed into the high-level strategic intent mentioned above.
- The Outcomes Approach, as a planning, monitoring, reporting and evaluation framework is advocated by the Department of Planning, Monitoring and Evaluation that published the Guide to the Outcomes Approach in May 2010. In terms of this Guide, the outcomes approach is designed to ensure that government is focused on achieving the expected real improvements in the life of all South Africans. It clarifies what we expect to achieve, how we expect to achieve it and how we will know whether we are achieving it. It helps all spheres of government to ensure that results improve the lives of citizens rather than just carrying out our functions.
- The outcomes approach requires organizations to think afresh about the logical links between what we do and what we achieve. In the main, the approach:
 - Focusses on results.
 - Makes explicit and testable the chain of logic in our planning, so we can see the assumptions we make about the resources that are needed.
 - Links activities to outputs and outcomes and to test what works and what does not work.
 - Ensures that expectations are as clear and unambiguous as possible.
 - Provides a clear basis for discussion, debate and negotiation about what should be done and how it should be done.
 - Enables learning and regularly revising and improving policy, strategy and plans through experience.
 - Makes co-ordination and alignment easier.
- The outcomes approach aims that organizations go beyond the work that they do and interrogate the impact it that it has. This approach involves the municipality using the **logic model** which links inputs, activities, outputs, outcomes and impacts. The triangle below demonstrates these links more clearly:

12.8 Strategic Alignment

- Section 24 (1) of the Municipal Systems Act 32 of 2000 requires that the planning undertaken by a municipality must be aligned with, and complement, the development plans and strategies of other affected municipalities and other organs of state so as to give effect to the principles of co-operative government contained in section 41 of the Constitution.
- It must be noted that a variety of International, National and Provincial priorities and outcomes were considered during the strategic planning phase, namely:
 - a) 2030 Goals for Sustainable Development,
 - b) National Development Plan,
 - c) Medium Term Strategic Framework (MTSF) 2014-2019 Priorities,
 - d) Back to Basics, Limpopo Development Plan (LDP) 2015-2019 and
 - e) the Local Government Manifesto 2016.
- The matrix below tabulates the alignment of the **Smart Pillars** and Impacts of City of Polokwane with the above-mentioned priorities and outcomes as follows Local Government: Municipal Systems Act 32 of 2000. The alignment of KPAs, Smart Pillars and the desired Impacts are outlined in the figure below:

2030 GOALS FOR SUSTAINABLE DEVELOPMENT	NATIONAL DEVELOPMENT PLAN	MTSF 2014 - 2019 PRIORITIES	BACK TO BASICS	LDP PRIORITIES	LG ELECTORAL MANIFESTO	Polokwane Municipality IDP Strategic Objectives	City of Polokwane SMART PILLARS AND IMPACTS			
Promote inclusive and sustainable economic growth, employment and decent work for all	An economy that will create more jobs	Economic transformation and job creation	Putting people and their concerns first	Decent employments through inclusive growth	Develop and strengthen local economies, create jobs and promote job placements esp. for youth	Promotion of economic growth, job creation and sustainable human settlement	SMART ECONOMY - Increased economic growth			
End poverty in all its forms everywhere		A better Africa and world								
End hunger, achieve food security and improved nutrition and promote sustainable agriculture	An inclusive and integrated rural economy	Spatial integration, human settlements and local government								
Promote just, peaceful and inclusive societies										
Ensure inclusive and quality education for all and promote lifelong learning	Improving quality of education, training and innovation	Education, skills and health						Quality basic education	Promote education as apex in local communities	Ensure social protection and education outcomes
Achieve gender equality and empower all women and girls	Social protection	Social cohesion and nation building						Inclusive Social Protection System	Promote nation-building and socially cohesive communities	
			Social Cohesion							

2030 GOALS FOR SUSTAINABLE DEVELOPMENT	NATIONAL DEVELOPMENT PLAN	MTSF 2014 - 2019 PRIORITIES	BACK TO BASICS	LDP PRIORITIES	LG ELECTORAL MANIFESTO	Polokwane Municipality IDP Strategic Objectives	City of Polokwane SMART PILLARS AND IMPACTS
Revitalise the global partnership for sustainable development	Reversing the spatial effect of apartheid			Comprehensive rural development Human settlement development	Build spatially integrated communities		SMART LIVING - Universal access to affordable and integrated quality services
Ensure access to water and sanitation for all	Improving infrastructure	Consolidating the social wage through reliable and quality basic services	Delivering municipal services	Competitive economic infrastructure	Improve access to municipal services	The ensure the provision of basic and environmental services in a sustainable way to our communities	
Ensure access to affordable, reliable, sustainable and modern energy for all					Build on achievements made in delivering services		
Build resilient infrastructure, promote sustainable industrialisation and foster innovation							SMART MOBILITY - Safe, reliable, affordable, sustainable integrated transport services
Ensure sustainable consumption and production patterns	Transition to a low-carbon economy	A better Africa and world		Environmental protection	Improve health in urban and rural communities	The ensure the provision of basic and environmental services in a sustainable way	SMART ENVIRONMENT - Safe, clean, healthy and protected environment

2030 GOALS FOR SUSTAINABLE DEVELOPMENT	NATIONAL DEVELOPMENT PLAN	MTSF 2014 - 2019 PRIORITIES	BACK TO BASICS	LDP PRIORITIES	LG ELECTORAL MANIFESTO	Polokwane Municipality IDP Strategic Objectives	City of Polokwane SMART PILLARS AND IMPACTS
						to our communities	
Take urgent action to combat climate change and its impacts							
Conserve and sustainably use the oceans, seas and marine resources							
Sustainably manage forests, combat desertification, halt and reverse land degradation, halt biodiversity loss							
Make cities inclusive, safe, resilient and sustainable	Building safer communities			All people are safe			
Ensure healthy lives and promote well-being for all at all ages	Quality health care for all	Education, skills and health		Long and Healthy Life			
Reduce inequality within and among countries	Reforming the public service	Building a capable, ethical and developmental state			Improve public participation and accountability of councillors	To ensure community confidence in the system of local government	SMART GOVERNANCE - Effective and accountable local government system

2030 GOALS FOR SUSTAINABLE DEVELOPMENT	NATIONAL DEVELOPMENT PLAN	MTSF 2014 - 2019 PRIORITIES	BACK TO BASICS	LDP PRIORITIES	LG ELECTORAL MANIFESTO	Polokwane Municipality IDP Strategic Objectives	City of Polokwane SMART PILLARS AND IMPACTS
	Fighting corruption		Demonstrating good governance and Administration	Developmental Local Government	Intensify fight against fraud and corruption in LG and social fabric crimes in communities		
	Transforming society and uniting the country		Sound financial management and accounting	Regional integration			
			Sound institutional and administrative capabilities	Developmental Public Service	Enhance capacity of local state to deliver on its mandate	To ensure community confidence in the system of local government	SMART PEOPLE - Innovative human capital

12.9 Directorates Scorecard

City of Polokwane Objectives, Strategies and Projects Per Directorate

12.9.1 Water and Sanitation Directorate Scorecard

Water and Sanitation Directorate: Objectives, Strategies, Proposed Projects and 5 years Targets.

CHAPTER FOURTEEN: INTEGRATION PHASE

14.1 INTERGOVERNMENTAL RELATIONS

Intergovernmental Relations in South African context concern the interaction of the different spheres of government. The Constitution declares that government is comprised of National, Provincial and Local spheres of government which are distinctive, interdependent and interrelated. According to the Constitution of the Republic of South Africa, Act, No.108 of 1996, Section 41 (2), an Act of Parliament must establish or provide structures and institutions to promote and facilitate Intergovernmental Relations and provide for appropriate mechanisms and procedures to facilitate settlement of Intergovernmental disputes. Intergovernmental relations processes are further developed to facilitate processes of development and cooperation between spheres of government.

14.1.1 Provincial Intergovernmental Structure

Polokwane Municipality participates in the Premiers Inter – Governmental Forum (P-IGF) that is comprised of the Premier as the chair and Members of the Executive Council and all the Executive Mayors supported by their Heads of Departments and Municipal Managers. Through the P-IGF both the Provincial and local sphere of government are able to inform and take decisions on policy and development issues that emanate from National, Provincial and local government level. The P-IGF discussed the implementation of the Limpopo Employment Growth Development Plan. Polokwane Municipality as a Provincial Growth Point participates in the forum to discuss and integrate development plans between the Province and the municipality.

14.1.2 District Intergovernmental Structure

Beside the P-IGF the municipality participates in established Capricorn District Municipality. The established forums are important for the purpose of integrated development planning and strengthening governance processes within the District. The following are intergovernmental relations forums that Polokwane Municipality participates in:

- **Mayor Forum**

Mayors Forum seeks to bring together Mayors and Executive Mayors to interact on common interest issues as well.

- **Municipal Manager Forum and other Technical forum**

Municipal Manager's Forum which seeks to create a platform for all Accounting Officers to share and interact on common interest issues. Municipal Managers attend these meetings.

- **Speaker Forum**

- **Communicators Forum:**

Mainly facilitated through GCIS, the aim of this structure is to bring all government communicators together to share common issues.

14.2 List of Sector Plans Available in Polokwane

A key requirement of the IDP process is to achieve integration with the initiatives of other sphere of government, alignment between projects and programs and legislative requirements of Sectoral legislation. The following is an update on the status of such plans.

Table: Status of Polokwane Sector Plans

Municipal Sector Plans	AVAILABLE	NOT AVAILABLE	DEVELOPMENT STAGE	UNDER REVIEW

14.2.1 Local Economic Development Strategy (LED)

The City has developed and adopted the Local Development Strategy. The strategy highlights the situational analyses of Polokwane Municipality in respect of its economic base, emerging development trends, possible comparative advantages and barriers that weaken investments and development and the regional location advantages.

The strategy is based on the following 5 strategic pillars:

- Agricultural development
- Tourism development
- Investment promotion
- Skills development
- Marketing Polokwane Municipality as a venue of choice

In the strategy, Strategic Options and Enablers were identified with the stakeholders during the LED strategy formation process.

Section 152 (1) (c) of the Constitution requires municipalities to promote social and economic development. In responding to that constitutional duty Polokwane Municipality developed a Local Economic Development Strategy to direct and guide the mobilization and management of resources to stimulate local economy, creation of jobs and poverty reduction.

An assessment of the local economy was conducted, which sought to examine whether there were unique sets of local attributes in the municipality that would contribute to serve as a deterrent to its local development. In the process, the Sectoral and overall economic structure of Polokwane Municipality and its business climate amongst other variables were examined to identify the municipality's strength, weaknesses, opportunities and threats which might have an impact on the local economic development strategy.

The following strategic options and enablers were identified as relatively the most favourable ones:

Most favourable strategic options:

1. Becoming a regional trading hub
2. Agri-processing cluster
3. Mineral processing & beneficiation centre

Most favourable enablers:

1. Industrial development zone
2. Support for SMME's
3. Spatial development zone
4. Improve skills base
5. Skills development

The study also developed a SWOT analysis for Polokwane, and came out with the following findings

1. Strength- local assets
 - Access to industrial facilities
 - Access to a game reserve
 - Access to an international airport
 - Access to mineral resources
 - Relatively low levels of crime
 - Productive commercial farming
2. Weakness- obstacle to growth
 - Limited pool of skilled labour
 - Rural communities have inadequate access to hard infrastructure.
 - Inadequate health facilities
 - High unemployment financial sustainability
 - Location groundwater pollution
3. Opportunities- favourable exogenous (external) conditions
 - Spatial hierarchy status
 - Proximity to SADC to develop a regional trading hub.

- Develop cultural tourism.
 - Develop eco-tourism
 - Agri-processing cluster
4. Threats- unfavourable exogenous (external) trends
- Institutional inertia
 - HIV/AIDS
 - Lack of finance
 - Competition of investments
 - Water shortage

The Polokwane Municipality approach and methodology to Local Economic Development constitute 4 major phases and incorporates a top-down approach:

- Phase 1: Organise the effort.
- Phase 2: Local Economic Assessment
- Phase 3: The Filtering Process
- Phase 4: LED Strategy

Alignment of LED Strategy

The Local Economic Development Strategy was developed taking into consideration the National, Provincial and Regional Initiatives and Policies. At a National and Provincial level, the following initiatives and policies were considered:

- Reconstruction and Development Programme (RDP),
- Growth Employment and Redistribution Strategy (GEAR),
- Provincial Growth and Development Strategy (PGDS)
- And other major policies and LED implications were considered.

And at a Regional level, the following policies and initiatives were considered:

- Provincial Industrial Development Strategy (PIDS)
- Development corridors
- Northern Province Spatial Rationale
- Polokwane Municipality Integrated Development Plan

14.2.2 Polokwane EGD

POLOKWANE 20 YEAR ECONOMIC GROWTHS AND DEVELOPMENT PLAN

Introduction

The main objective of this plan is to assist the City of Polokwane to achieve real and sustainable economic growth and development, as well as transforming and aligning the city to become a Smart City within the next 20 years. It is therefore vital that this plan set out very specific goals and implementable projects to attain the city's vision.

Various interventions have been proposed per identified cluster and sub-cluster which together forms the 20 Year Economic Growth and Development Plan.

Smart City' concept for City of Polokwane

- a Forward-looking plan into, Economy, People, Governance, Mobility, Environment and Space.
- Comprehensive integration of critical infrastructure in its totality.
- Build collective intelligence of the city through connecting the physical, the IT, the social, and the business infrastructure.
- **Four Main clusters were** used for the status quo analysis. These contexts influence one another and failure to promote growth and development in one, would lead to failure in another. Integrative interventions would furthermore ensure that holistic planning takes place.

1. Economic Cluster

.) Background: The marketing of Polokwane as a municipality with high growth and development potential is another imperative in order for the economy to grow sustainably. Through discussions with stakeholders the issue of Polokwane's image was emphasised. Polokwane needs to be portrayed in a better light in order to attract much needed investment and establish it as the number one destination in the north. Any businesses that trade, transport and conduct business across the border should need a space of their own in Polokwane and this can only be achieved by promoting Polokwane and the advantages it offers.

b.) Problem Statement: - Currently negative perceptions about Polokwane hinder investment.

- Marketing is inefficient.

c.) Objectives: - Innovative and effective marketing of Polokwane as investment opportunity with great future plans and development prospects.

- Marketing of the Polokwane lifestyle and tourism destination.

d.) Strategic Interventions: As part of a marketing strategy Polokwane needs tools in order to reach out and grab the attention of potential investors and businesses and in so doing bring them to Polokwane to stay. These tools include the use of media as well as structures present in Polokwane that offer growth potential and prospects for economic development. By highlighting the vision and goals Polokwane has, and the plans being made to achieve these goals, it becomes increasingly attractive, and the goals become more achievable.

2. Physical Cluster

a.) Background: The availability and maintenance of infrastructure is crucial for economic development as infrastructure investment in the development of transport (road, rail and air), basic (electrical, sanitation and water) and social (school, hospital) infrastructure is vital for both economic development and quality of life.

b.) Problem Statement: From the research report it is clear that the current bulk infrastructure in Polokwane is under immense pressure. The sector is further hampered by rapid urbanisation, lack of finance, insufficient long-term planning and overall capacity constraints. This is especially evident in the rural areas.

c.) Objectives: To ensure that infrastructure is designed and developed to support and promote economic growth and investment within a framework that benefits the poor and underprivileged in Polokwane.

d.) Strategic Interventions: The Infrastructure Development Strategy will focus on the following sections

3. Social Cluster

The main focus of a social cluster must be to utilise human energy and productive resources to meet all types of challenges and objectives and to bring a society together in all its forms, across income, gender, linguistic background and race. Furthermore, it should be noted that although social development is to some extent depended on economic growth, the opposite also holds true and therefore a myriad of non-economic factors is at play. In order to formulate strategies within this cluster, the following will be concentrated on to guide the formulation of the social strategy.

4. Institutional Cluster

In order for a city to prosper, a strong institutional strategy needs to be put in place and seeing a city is multi-dimensional, integration of both public and private institutions are vital. Institutions present various advantages for development as its main role is to govern society on various levels.

Furthermore, institutions could not only supply much needed skills, knowledge and financial resources, but also assist in issues such as implementation and monitoring. Due to its complexity and intricacy, this strategy will focus on only several broad themes/ sub sections including public private partnerships, community involvement, governmental governance and the smart city concept which together can provide better overall governance of the city and foster growth and development.

14.2.3 Integrated Transport Plan

The Comprehensive Integrated Transport Plan has been adopted by Council. Polokwane Local Municipality serves as the economic hub of Limpopo Province. The Polokwane CBD is therefore of regional importance, serving as a regional trading and shopping hub to the greater Polokwane area. Areas such as Seshego and Mankweng use the Polokwane CBD as their primary shopping destination.

Background

This Comprehensive Integrated Transport Plan has been prepared for Polokwane Local Municipality in terms of Section 36(1) of the National Land Transport Act 2009, (Act No. 5 of 2009) (NLTA).

Legislative requirements

The NLTTA requires planning authorities to prepare a number of statutory plans. Regulations have been published in the Government Gazette (No. 25245 of 1 August 2003) indicating the minimum requirements for these statutory plans: Approved Statutory Plans for Polokwane LM are listed in the table below:

Statutory Plans for Polokwane LM:

The ITP therefore, forms an important component of each planning authority's Integrated Development Plan as specified in the Local Government Municipal Systems Act (Act 32 of 2009). The aim of the Integrated Transport Plan is to resolve transport issues and problems in line with a particular authority's goals and objectives. The principle to achieve this is to identify goals and objectives, generate, implement and evaluate policies, strategies and projects to achieve the stated goals and objectives.

The relationship of the various Transport Plans and their dependency on one another for Information is indicated in Figure 1.2 below.

Relationship between various Transport Plans in Local Government

In addition to the minimum requirements, the following principles must be applied in the Preparation of the ITP:

- The ITP must pay due attention to the development of rural areas.
- The ITP must be synchronized with other planning initiatives and must indicate how it is to be integrated into the Municipal Development Plans, the Land Development Objectives and the Municipal Budgeting processes.
- The ITP preparation must include consultation and participation of interested and Affected parties required for the preparation of the IDP in terms of Chapter 4 and section 29(1)(b) of the Local Government: Municipal Systems Act 2000 (Act No 32 of 2000), Therefore, the ITP is a specific sector plan that feeds into the Integrated Development Plan and ultimately form part of the Provincial Land Transport Framework. The figure below provides an illustration of this relationship.

Relationship between Transport and Development Plans in local development planning

Other available National and Provincial documents were also reviewed for guidance and input in the preparation of the Polokwane Municipal ITP. These documents are listed below.

National:

- Moving South Africa Action Agenda (1999);
- National Land Transport Strategic Framework (2002-2007);
- National Land Transport Transitions Act (NLTTA 2000);
- Municipal Systems Act
- Municipal Structures Act

- Public Finance Management Act
- Rural Transport Strategy for South Africa (Nov 2003);
- Integrated Sustainable Rural Development Strategy (2000).

Provincial:

- White Paper on Transport for Sustainable Development (2001).
- Limpopo Provincial Land Transport Framework.
- Northern Province Interim Passenger Transport Act (2000)
- Strategy Framework for Growth and Development 2004-2014 (2003)

Other:

- In terms of the National Land Transport Act 5 of 2009, Operating Licensing Boards are to be dissolved and replaced by Provincial Regulatory Entities, as well as Municipal Regulatory Entities to perform the function initially performed by the Operating Licensing Boards.

Institutional and Organizational Arrangements

The process with regard to the preparation of the CITP was overseen by a Technical Committee comprising of internal and external role-players. It is required to consult with residents and commuters of the Polokwane Local Municipality through a public consultation process. The following table illustrates the functions of various institutions providing transport.

Transport Vision and Objectives

Vision Statement

The following are vision statements obtained from various policy documents and legislation. Relevant to transport. The CITP vision statement encompasses the national, provincial and local policy frameworks and sets out the ideal outcome because of the goals and objectives set by Polokwane ITP vision as outlined.

Vision of the Department of Transport:

“Transport, the Heartbeat of South Africa’s economic growth and social development”.

White Paper on National Transport Policy:

The White Paper on National Transport Policy published in August 1996, describes the transport policies of the national government and the vision for South African transport as set out in the White Paper as follows:

Moving South Africa:

The vision of transport in South Africa for the year 2020 can be briefly summarized as follows:

Provincial Land Transport Framework, 2002:

The Provincial Land Transport Framework borrowed its vision from the White Paper on National Transport Policy, which reads as follows:

“To provide safe, reliable, effective, efficient, and fully integrated transport operations and

Infrastructure which will best meet the needs of freight and passenger customers at improving levels of service and cost in a fashion which supports government strategies for

- To meet the needs of freight and passenger customers for accessible, affordable, safe, frequent, high quality, reliable, efficient and seamless transport operations and infrastructure,
- To do so in a constantly upgrading, innovative, flexible and economically and environmentally sustainable manner, and
- To ensure that transport will support and enable government strategies, particularly those for growth, development, redistribution, employment creation and social integration, both in South Africa and in the Southern region’.

Limpopo Province Land Transport Framework

The Limpopo Province vision statement for transport stated in the Limpopo in Motion Document is “to provide quality transport infrastructure and services for all”.

Capricorn District Municipality

“Capricorn District, the home of excellence and the opportunities for a better life”

Overarching Vision Statement for Polokwane Municipality

Goals of the Polokwane Integrated Transport Plan

The aim of integrated transport planning and spatial planning is to identify existing resources and apply relevant measures and guidelines in order to promote access to resources and Infrastructure to all spheres of the community in order to establish an integrated environment.

Resources such as public transport facilities, road infrastructure and ports of economic activity should be upgraded and made accessible to the benefit of the larger community in order to stimulate economic growth and economic development.

Objectives of the Polokwane Integrated Transport Plan

The objectives of the Integrated Transport Plan (ITP) are the following:

- To provide for and manage future transport demand.
- provide a more balanced transport system.
- Promotion of public transport, integrated with other modes of transport.
- the plan must relate to and compliment the spatial development plan,
- the ITP must also support economic development strategies and long-term environmental management strategies in order to achieve the above, the following vision for the ITP is proposed:

“To provide a safe, reliable, efficient, effective and integrated transport system for both passengers and freight that will enhance the quality of life for all”.

Balanced Scorecard

The balanced scorecard is a prescriptive framework for a two to five-year period that has to be tailored to adapt to an organisation's changing circumstances. It is a vertical and horizontal

“Provision of cost-effective services which promote socio economic development, a safe and healthy environment through good governance and active community participation”.
“The ultimate in innovation and sustainable development”

Key Strategies

Key strategies of the ITP should include the following:

Objectives Key Strategy Measurement

1) Maintain the transport system

- Blade and re-gravel gravel roads
- Maintain existing surfaced roads
- Repaint road markings
- Replace traffic signs
- Repair traffic signals
- Repair dangerous potholes
- Maintain public transport facilities
- Length of gravel roads
- Length of surfaced roads
- Length of road markings
- Number of traffic signs

14.2.4 Water Services Development Plan (WSDP)

The City has developed and adopted the **Water Services Development Plan (WSDP)** which guides all the planning and implementation of water services in the municipal area. Polokwane Municipality being the Water Service Authority and in complying with this legislative mandate, Municipalities are required to prepare a Water Services Development Plan (WSDP) In terms of the Water Services Act (Act 108 of 1997).

The municipality has ensured that the WSDP process is aligned with the IDP process. This ensured that all issues, objectives and projects developed during the IDP process formed part of the WSDP also resulted in the WSDP process providing much needed input in the IDP process.

Water Resource Profile

Polokwane LM was divided into **19 scheme areas**. Surface water is transferred from outside the municipal boundaries to the Polokwane Municipal area through three water transfer mains namely Ebenezer, Dap Naude and Olifants-Sand transfer mains. The future demand from users on the Ebenezer pipeline route would require upgrading to meet the demand growth. Groundwater sources are the only source for the single, distant rural communities but have, in general, low potential. High production aquifers occur in the Polokwane / Seshego area as well as the Sebayeng and Molepo areas. Due to the fact that major surface water schemes provide water to these areas the underdeveloped groundwater constitutes an important reserve.

Water Services Infrastructure

The bulk water infrastructure on the Ebenezer and Olifants-Sand transfer schemes are operated and maintained by Lepelle-Northern Water Board. Two of the 5 water treatment works are the responsibility of Polokwane LM. The others are currently being operated by DWAF. The Houtriver Dam RWS is a cross border scheme also providing water to the neighbouring Aganang LM. Bulk sanitation infrastructure consists of sewerage treatment works situated at Polokwane, Seshego and Mankweng.

Water Conservation and Demand Management

Water is a scarce resource in Limpopo Province and needs to be conserved and managed. Water has social, environmental and economic dimensions and access to water enhances the livelihoods of the poor. Reticulation leaks are the major contributing factor in water losses in urban areas. In rural areas, illegal connections and reticulation leaks are the major cause of water losses. Water conservation and demand management targets have been addressed in the WSDP. A 5-year strategy to repair leaks, authorize and meter illegal connections and implement a cost recovery system to reduce wastage is imperative.

Effective Management

The Polokwane LM as the WSA need capacity to be able to manage the water services adequately. The Municipal Infrastructure Grant (MIG) assists in funding necessary basic water service's needs. The cost of FBW can be recovered from the income from higher service water supplies initially. Increased water consumption on the medium to long term would result in a net income which can be utilized for water services development in future.

Water Services Institutional Arrangements

Lepelle Northern Water Board (LNW) is the bulk service provider for the Pietersburg Governmental Regional Water Supply Scheme (Ebenezer pipeline) and the Olifants-Sand Bulk Water Transfer Scheme. DWAF Water Services are presently the Water Service Provider to all rural areas not served by LNW. Polokwane LM operates the Dap Naude Dam Water Supply Scheme which currently supplies a summer peak flow of 7 MI/day, of the potential 18 MI/day, to Polokwane / Seshego area.

▪ Strategy to eradicate backlogs.

Backlog eradication applies to basic services provision in rural areas and at present comprises:

- a) Communal (pre-paid or manual) water supply financed by subsidies. Higher level of supply comprising Erf connections is on account of the client.
- b) Household sanitation to VIP standard or waterborne in dense settlements would also be subsidized (MIG). Some upgrading is done on own initiative.

• Ground water pollution

The lack of water-borne sewerage systems leads to the contamination of ground water. The fact that 56.3% of rural households in Polokwane do not have RDP level sanitation constitutes a major risk in terms of ground water pollution. Care must be taken that pit latrines are not allowed near locations where ground water is used as a source of drinking water. Lack of access to adequate potable water has a direct effect on the health standards of the community, hence increasing the rate of opportunistic diseases like cholera. Access to sanitation is one of the most critical elements used to facilitate sustainable livelihoods. This complements the attainment of a healthy and aesthetic environment.

14.2.5 Spatial Development Framework (SDF)

The new Polokwane SDF 2010 has proposed 7 chapters that incorporate most of the chapters separated as chapters in the 2007 SDF. It is more detailed and strategically has clear alignment in each of the respective component of the IDP such as LED, Environment, Project Identification, and Transportation Networks. These chapters are summarized as follows:

Chapter 1: Details the background of the spatial development framework, study area and the objectives to be achieved. This helps in understanding the reasons why the municipality should have a clear guideline for the implementation of the land use management system or Town Planning Scheme.

Chapter 2: this chapter provides the legislative guidelines on the drafting of the spatial development framework and the alignment with them i.e., local government municipal system act, ASGISA, Millennium development Goals, Breaking new grounds, LDP, Limpopo spatial rationale etc. By looking at the proposed plans of the above legislations and policies, it could be seen that the proposed integration of them will lead towards a common goal.

Chapter 3: Contextual spatial analyses, it is envisaging that, one has to look at the space in terms of the surrounding environment; Demographics and socio –economic profile, movement link, infrastructure/engineering services, social services in which the municipality is operating within. For a proper spatial plan, the SDF should clearly indicate how the land should be used, where to invest? By whom? And how the wealth should be distributed. These clearly show clear direction of the city growth and employment opportunities to be affected once the projects identified on the IDP being implemented.

Chapter 4: analyses of the spatial rationale, this chapter try to analyse the spatial development framework, 2007 its impact, challenges and gaps addressed. This provides indication of areas that the new approach of the Spatial Development should rectify and clarify in order to have a proper and manageable development within the municipality. It also highlighted the integration part with the surrounding municipality, other policies of the municipality.

Chapter 5: Synthesis/SWOT analyses, in order to draw a successful plan, the municipality must assess its development in terms of the SWOT analyses in order to identify the gaps of challenges that the municipality is experiencing, this also give the municipality area of improvement and opportunities that may come as a result of addressing key challenges in the area.

Chapter 6: the SDF at Macro level. This chapter provides the overall view of the municipality at a bigger scale. This includes settlement hierarchy, areas affected under land claim, environmental sensitive area, agricultural potential area, mining, tourism potential, land use management, densification etc. This makes the proposed plans functional and proper guidance in the future development and growth direction.

Chapter 7: The SDF at Micro level, this chapter zoom in to details on the proposed plans at a framework level, this includes identification of the urban edge, urban fringe, urban built-up, phasing of development, corridors, activity, public transport and roads network system, economic development proposal and proper plans for Mankweng/Badimong, Sebayeng/Dikgale and Polokwane/Seshego/Perskebult as well as rural remainder of the Polokwane Municipal Jurisdictions. The SDF of Polokwane Municipality is aligned to the **NSDP** and the **PSDF**.

SUMMARY

Polokwane is the capital of Limpopo province, there is a vast growth of urban population due to rural urban migration, and this was a result of the better living conditions, centralisation of government offices, industrial development, mining institution as well as private entities. All this has to be accommodated within a confined area that is better served with sufficient engineering infrastructure in order to function as a system.

Accommodation is one of the major challenges that seek both national and provincial government to intervene in order to assist the local municipality. What should be understood is that, how the space will use and at which specific area that the space should be used for, as well location and availability of services (Social, economic, transport, environmental) will sustain the city and its neighbourhood. In view of the above, it is clear that the new SDF has detailed the above taking into consideration of the economic factor, employment factor, social factor as well as future growth of the Town.

14.2.6 Housing Chapter

The City has found itself in an unprecedented position. The difficult conditions (such as Covid-19 and Climatological changes) of the world have negatively impacted on the already struggling economic landscape of the country. This has since resulted in high unemployment rates and constrained fiscal resources, which entangles the pace of human settlement and housing delivery. Like any other City and Town in South Africa, Polokwane is observing a growing demand for housing, illegal or uncoordinated land occupation, overcrowding and an increase in backyard accommodation. The affordable housing market is almost stationary for the young economically active labour.

A clear human settlement and housing Plan is necessary for the City to navigate its housing conditions. This Human Settlements and Housing Sector Plan is not ad hoc but emanates from a range of legislations including the Housing Act (Act 107 of 1997), System Act of 32 of 2000 and other applicable legislations and policy documents.

It is intended to guide the municipality and its stakeholders to deliver housing in a planned and coordinated manner. If successfully implemented, the Plan will help stimulate the local economy, create an environment for local job creation and address the diverse housing needs of our people.

Apart from a mere housing delivery process, it is recognized that the historical spatial pattern of the City is without doubt one that requires redress and the fact that housing is seen as a key strategy for redressing spatial disparities cannot be overemphasised. The people of Polokwane deserve neighborhoods in which they can prosper socially and economically. On the other, preserving affordability and building capacity to deliver housing is the bedrock of the City's Human Settlement Plan.

Developed within the framework of the Integrated Development Plan, the HSP presents and analysis of the municipal housing conditions. It further determined strategies for addressing and delivering on the housing needs of the people, set housing targets and identified a variety of projects for implementation in different areas of the municipality. In overall, the aim of the City is to facilitate a minimum delivery of 12 000 housing opportunities to a wide range of income households over the short-medium term period. The identified housing programmes and delivery target are aligned to the priority delivery programmes of the provincial and national government.

Public participation was done as a compliance exercise and as an honest engagement with communities for the City to outline all programmes that will be implemented, which is informed by the priorities of the communities.

Introduction

It is without doubt, for the City, that housing delivery is not only an act of legislative compliance, but a strategy for the development of the City's people; improved environmental conditions, alleviation of poverty, job creation, restoration of human dignity, and social integration of society. The review of Five - Year Human Settlement Plan is a continuation of work started by the City to coordinate the establishment of integrated and sustainable human settlements for the people. Reviewing the Plan presents City efforts to remain in balance with improving government policy frameworks, changing environmental conditions of the City, and to ensure a sustainable human settlement development process.

Although housing delivery is a concurrent legislative function of National and Provincial government, Municipalities also play an important role in housing delivery. This 2023/2024 Human Settlement Plan essentially presents progress achieved and considers growth (City wide demographic changes), opportunities and challenges facing the City in human settlement development. While it is believed that the strategic Human Settlement goal (vision) of the City remains relevant and sound, it is also believed that the mechanism of realizing the goal requires enhancement to ensure more responsive and effective housing delivery.

Objectives of the Human Settlements Plan

The main objective of the Human Settlement Plan (HSP) is to lead the City towards a sustainable human settlements delivery process, which contributes towards realizing National and Provincial housing policies. In doing so, the following ancillary objectives

- a) *To assess and provide a detailed analysis of the City's housing needs.*
- b) *To identify strategies for addressing the housing needs of the City.*
- c) *To ensure that the Municipal human settlement plans and priorities are aligned to National and Provincial human settlement plans and priorities.*
- d) *To provide the basis for sectoral alignment of plans across government spheres so as to realize the creation of sustainable human settlements.*
- e) *Align Municipal plans so as to ensure sustainable human settlement delivery.*
- f) *To provide the basis for funding allocation.*

Chapter 2: Situational analysis

The 2021/2022 – 2025/2026 HSP provided an understanding of the internal and external housing environment of the City. Although the strategies and projects of the latter HSP are relevant, the City is committed to finding appropriate measures of responding to the continually changing housing environment which manifests itself in a variety of ways such as backyard shacks, growing waiting list (arising from new household formation), informal settlements. Hence, the need to review and realign Human Settlement Plan of the City with government policies and development plans.

The Review of the HSP is done in alignment/conjunction with the Municipal Integrated Development Planning (IDP). The development and review process of the HSP as is with IDP run concurrently, thereby following the below stages.

- a) Status quo analysis of housing environment (Analysis Phase)
- b) Development of Human Settlement Strategy (Strategy Phase)
- c) Project Identification (Project Phase)
- d) Integration Phase
- e) Approval of the HSP together with IDP

Spatial forms/pattern

The municipal spatial pattern has and still reflects the historic “apartheid” spatial model which is characterized by exclusive settlements. At the centre of the area is the economic hub, which comprises the CBD, industrial area, and range of social services and well established formal urban areas servicing the more affluent residents of the City. Large pockets of distressed human settlements are located on the outskirts the urban centre, characterized by poor infrastructure, lack of social services and economic opportunities. To address the challenge of spatial inequality/injustice, different interventions, which amongst others include are undertaken:

Facilitate the implementation of the Neighborhood Development Partnership Grant (NDPG), which funds development projects that seeks to improve the life of residents in targeted areas, generally townships, which in turn enables the City to identify and implement projects aimed at curbing spatial inequalities.

Facilitate the acquisition and transfer of State-owned land to the municipality in order to unlock development and promote ownership; Enhancing the status of the municipal airport, by promoting mixed land uses on portions surround the airport.

Advancing the implementation of the Integrated Urban Development Framework (IUDF) so as to expedite achieving development goals and targets of the National Development Plan. Integrated Urban Development Framework (IUDF) provides a micro plan for a specific area with proper development guides.

Promote social housing, in particular; student accommodation through the implementation of the Urban Renewal Strategy and CBD Plan (2016)¹⁶, areas where student accommodation is to be promoted has been identified.

SPLUMA

Since 2018/2019, the City began implementing its municipal planning By-law. All components of the SPLUMA are adhered to, and the Municipal Planning Tribunal is in operation. The Polokwane Land Use Scheme (2017) for R293 and R188 areas, that covers areas which were not included in the existing Town Planning Scheme was developed and proclaimed. The Land Use Scheme for the entire Municipal boundary and the Municipal Spatial Development Framework still need to be compiled (at Draft and Proposals Stage) to comply with SPLUMA.

The Land Use Management Scheme (2017) was adopted by Council and covers areas of Aganang, Sebayeng, Mankweng, and other rural areas which were previously not covered by the Perskebult/Polokwane Town Scheme (2016). The City is using two different Schemes at the Moment.

An integrated Land Use Management Scheme that will cover the wall to wall is currently under the process of being developed or to be compiled to address some of the main shortcomings of the existing Polokwane/Perskebult Town planning scheme (2016) and current LUS (2017). The existing Town Planning Scheme was limited to the urban area of Polokwane City/Seshego as well as the adjacent small holdings/farm portions (urban fringe area). Commercial farming area, rural villages/tribal areas were excluded from the current LUM scheme.

Housing

The people of Polokwane are living in different housing circumstances. These include households in formal and informal dwellings, with different tenure of security and access to basic service. Formal housing is provided by both government and the private. Although by 2016, 79.2% South Africans were formally housed, the need for adequate housing continues growing people of Polokwane. Households continued to find themselves in informal settlements, backyard rental shacks, overcrowded in formal urban houses, and rural areas without proper access to basic services.

Despite the challenging economic conditions, the City is tirelessly working towards creating a conducive environment for public and private human settlement and housing delivery. A variety of projects including land planning and basic infrastructure development are continually rolled-out to ensure progressive access to decent housing. On the other hand, the City is transforming and building its institutional capacity to effectively undertake its legislative and anticipated housing role and responsibilities. With the intension of being the provider of State funded housing, Human Settlement is established (2019) as a standalone Directorate.

In the financial year 2022/2023, the City coordinated the construction of 423 housing units under the Rural housing programme. The relocation of households from two informal settlements (Freedom Park and Extension 106) to newly established and serviced areas of Polokwane Extension 126 and 127 is almost complete. To date 700 households are allocated. The construction of 494 rental units at Annadale Extension 2 is complete. Once the challenge of water is sorted, allocation and occupation will commence.

The process of housing delivery cannot be complete if beneficiaries are not able to enjoy some level of security over their accommodation. Whether in a form of lease agreement, sectional or full title. A registered and transferred residential property is an economic asset for the owner, which in turn boosts the economic growth of the City. On the other hand, home ownership helps to stabilize and create a functional residential property market for the City. In efforts to realize the latter, two service providers (6 projects) were appointed in the financial year 2022/2023 to register and transfer (properties in different areas including:

- a) Extension 40 – 115 units

- b) Extension 78 – 501 units
- c) Extension 133 – 1 001 units
- d) Extension 134 – 326
- e) EEDBS – 11
- **Total = 1 954**

Housing problem areas

The City face a range of housing challenges. While some challenges are historical, some are caused by modern conditions of the country, such as the unstable economy, resource constraints, etc.

Assessment of housing demand

The demand for housing delivery (arising mainly from urbanisation, new household formation, and other sub-related factors) is growing at a fast pace, resulting in backyard rental, overcrowding in formal houses. A proxy for the increasing demand for housing is the National Housing Needs Register which comprise of families awaiting State housing assistance. The estimated housing demand of the City is between 57 000 (minimum) and 59 000 (maximum). This backlog includes rural housing, informal settlements, gap market, greenfield housing, blocked housing projects, and consolidation housing.

It will require an injection of resources to delivery on the human settlements and housing needs of the people. It will further good public-private partnerships that will result in greater resource injection and skills.

Table 2.9: Categorical analysis of the housing need

Housing Programme	Demand	Data Source	Programme & funding source

Source: Polokwane municipality: Human Settlements

Rapid unplanned occupation of land/depressed human settlements.

In recent years, the City has observed a rather rapid and unplanned occupation of farm lands and consequently the establishment of residential communities closer to town, to the eastern side of the City (from Dalmada AH to Boyne) and northern side (from Seshego Zone 5 expanding outwards to Moletjie). The challenge of these fast-growing settlements does not only bring the housing demand of the City to a proportional crisis but re-builds a historic spatial pattern of poorly located and under-developed areas, which is not envisaged in the national housing policy nor desired by the City. To deal with this challenge, following the national spatial transformation and consolidation framework, the City has identified and endorsed two Priority Human Settlements and Housing Development Areas (PHSHDAs), namely.

Polokwane CBD and surrounding – extending from the South-western gateway of Polokwane covering Polokwane Extensions, Leeukeuil farms, Moletjie, and.

Polokwane R71 corridor – extending from the eastern Polokwane along the R71, covering Dalmada AH, Mamahule, Nobody, running through to Boyne.

Dysfunctional and inequitable property market

Although the provincial Department has made considerable strides in stimulating a functional property market (in the low-cost housing market), there are still shortcomings as far the adequate housing is concerned. There is still a concerning backlog of tenure, especially in State funded housing projects. While properties in recently developed areas of Polokwane Extension 40, 44, 75, and 76 are being registered and transferred, old areas such as Seshego A Extension 2 (Hospital View), Seshego D Extension 1 and 2 (Biko Park) Mankweng F, Mankweng G, and part of Seshego F (Mohlakaneng) are stalling with the main challenge centred on finalizing planning and Township proclamations.

There are still outstanding properties to be registered and transferred in areas, as reflected in Table 2.10.

Table 2.10: Title deed registered per area and outstanding units.

Source: Polokwane municipality: Human Settlements

Claims and Restitution of land.

The land restitution programme has an influence on the City's human settlement development process. To this far, approximately 23.5894ha (at Pietersburg Extension 40) of City owned land was donated for restitution of New Pietersburg land claimants. Implications include funding for the development of the land for human settlement. The presumption of the City's HSP is that restitution does not equate to adequate housing. The City will actively partake and assume its legislative responsibilities to ensure that the restitution conforms to the total development objectives of the City.

A growing informal sub market housing

The City's sub-urban housing market is largely characterised by informal sub market housing (backyard rental). Notable areas include Seshego, Mankweng, Westernburg, and Polokwane Extensions. It is estimated that at least two quarters of the City's sub-urban population lives backyard housing for reasons ranging from overcrowding to affordability. The sub-market has become a feature of the City's housing landscape that requires policy intervention considering the following constraints it bears:

- a) Habitability (health, privacy, access to essential services)
- b) Tenant – Landlord relationships
- c) Security of tenure
- d) Affordability
- e) Pressure on Municipal infrastructure
- f) Illegal land use
- g) Illegal structures

Capacity to meet new policy objectives.

The City is coordinating the implementation of various Government policies and strategies (planning, finance, construction, law, contract and project management) that forms part of human settlement development process. The implementation of these strategies and systems requires adequate level of understanding.

This is very crucial for the City considering Level 2 housing accreditation of the municipality into a housing authority. The current skills level is limited due to functions performed by the municipality. But to maximise performance in line with anticipated functions for the municipality, the existing capacity of the City requires enhancement especially in areas systems (access to HSS), human capital (filling of gaps in the organogram), and skills (ongoing human resource training).

Blocked housing projects

The City is confronted with the problem of incomplete housing projects (also known as Blocked housing projects). This problem is borne from various factors including historically inexperienced contractor and inadequate capacity to administer funds and manage projects. In some instances, community conflicts and land issues caused the problem. It is estimated that roughly ±1 000 housing units are blocked on various stages (approval, foundation, wall and roof level) across the municipal jurisdiction. In the financial year 2012/2013, the province (NHBRC) commissioned a forensic engineering assessment of incomplete housing units developed between March 1994 and March 2010.

Informal settlements

Another housing problem area is informal settlements, which existed for a long period of time without intervention. However, since 2005; the City committed to improving the living conditions of people in informal settlements, and ultimately eradicating informal settlements. Previously, settlements were primarily characterized by a lack of access to basic services (water, sanitation, electricity, and refuse removal), recreational or natural amenity spaces, and infrastructure (roads, storm-water systems, lighting). Residents occupy land without ownership or title, in highly densified conditions with little personal space.

The city has managed to successful upgrade 7 informal settlements, where families are not housed in decent accommodation with access to basic services and secure tenure. A number of settlements were located around the City and Seshego cluster. Families of the two remaining settlements of Freedom Park and Ext 106 are relocated to permanent and serviced Townships of Polokwane Extension 126 and 127.

The ability to effectively manage and eradicate informal settlement across the City and to impede further land invasion that would result in the establishment of informal settlements has followed a simple approach of:

- a) Identifying and recognizing existing informal settlements.
- b) Profiling each informal settlement.
- c) Marking each shack and developing a database of each settlement.
- d) Creating a buffer to curb outward expansion of each settlement.
- e) Conducting regular monitoring of each settlement.
- f) Monitoring vacant land through ensure that no further land invasion places place on public land.

Informal settlements on privately owned land

The City has, in recent years, observed occupation of private and public land falling under the provincial Department of Rural Development and Land Reform. The below paragraphs provide a brief background of such informal settlements.

Juju valley

In 2015 – 2017 the municipality was alerted of the land invasion on the private property adjacent the formal Township of Seshego A Extension 2 (zone 1 extension). The settlement come to be known as Juju Valley. Settlers are on the established Townships known as Polokwane Extension 118 and 119. Engagements with the municipality never materialised. The action, thereafter, tends the activity being illegal land use. It should be acknowledged that the invasion may results in informal settlement unless the property owner finalises and install all services and settle the community accordingly. Various options may be explored of which the owner may engage with the Municipality. The municipality may not spend public funds to the private development unless the land may be transferred to the municipality.

Mamahule

Illegal & uncontrolled settlement on fringe of the City. Some residents of Mamahule, Maboi, Mothapo and Mothiba have lodged land claims on Kalkfontein 1001 LS farm portions. Some Kalkfontein farm portions are privately owned while other portions are owned by the State (Department of Rural Development and Land Reform).

A task team was appointed comprising of various stakeholders (Polokwane municipality, SAPS, COGSHTA, Office of the Premier, Limpopo Department of Agriculture and Rural Development), with the Department of Rural Development and Land Reform in the leading front to deal with land disputes in and around Mamahule areas.

There have been discussions between Department of Rural Development and Land Reform and Polokwane Municipality to check feasibility of transferring the land to the Municipality and formalize the settlements.

The Department is also expediting the land claim process for the affected claimants and determine whether the remaining land is sufficient for settlement of the remaining claimants and if not, to look for alternative land.

As part of planning coordinated settlements, particularly in the area of concern, the municipality is intending of developing a Precinct Plan (Dalmada and Kalkfontein Precinct Plan) to curb invasions, promote coordinated settlements and compatibility of land uses. This will result in establishing new Nodes and encourage development which is in line with the provision of the Polokwane/Perskebult towns Planning Scheme, 2016.

Polokwane Municipality has adopted and gazetted Polokwane Land Use Scheme for Mankweng, Sebayeng, Aganang and Rural Areas on the 8 November 2019. The aim of the above-mentioned scheme is to regulate land uses on areas outside of the Polokwane /Perskebult Town Planning Scheme, 2016 and most importantly to control and promote coordinated settlement patterns.

Rental housing

The City has established an entity called **Thabatshweu Housing Company** Pty, t/a Polokwane Housing Association (PHA), with a mandate of developing and managing rental housing within its jurisdictional area. The company is accredited by the Social Housing Regulatory Authority (SHRA) as required by the Social Housing Act (16 of 2008).

The Municipality, in support of the rental housing initiatives avail land to PHA and has designated Restructuring Zones to enable PHA to access the Restructuring Capital Grant (RCG) administered by SHRA for social housing development.

The most common type of rental accommodation that is available for new and particularly low-income urban lodgers is backyard rooms.

Polokwane Housing Association has developed 1 191 affordable rental housing units (508 Ga Rena village, 189 Seshego F CRU, and 494 Annadale Extension 2).

Additional Social Housing projects have been initiated by Polokwane Housing Association for example, Ext 76 to yield 240 units. Site is expected to be handed over to the developer October/November 2019. Another social project called Annadale Extension 2 planned to yield 494 units is under construction, started in May 2019 for a period of 18 months.

Negotiations are in progress between the entity and COGHSTA regarding the release of land earmarked for Social Housing to PHA in Bendor Ext 100 township. On the other hand, two Student Accommodation projects; one in Ext 108 and the other one in Ext 106 have been initiated. The two projects are projected to yield over 5000 student beds. Procurement for these projects is concluded.

Chapter 3: Human settlement strategic overview

Regardless of the challenging housing environment, the City remains committed to creating environments that enables the creation of integrated sustainable human settlements, *i.e.*, settlements that meets the total social, economic and material needs of the City's populace. The strategic Human Settlement objective remains relevant and sound for driving the City towards the achievement of national and provincial policy objective, which includes:

Improving the spatial planning patterns by planning and integrating or locating of new housing developments closer to major transport nodes and corridors, economic opportunities and social facilities to ensure the building of an economically and socially integrated and sustainable space.

- a) Improving spatial efficiency by increasing the densities of new housing developments.
- b) Increasing the development of housing in the gap market by developing partnerships with the private sector.
- c) Diversifying housing products with greater investment in rental housing stocks.
- d) Providing municipal engineering services consistently and at a higher level.
- e) Using housing as a major job creation strategy and breaking down barriers between the first-economy residential property boom and the second-economy slump

City's Human Settlement strategy

The aim of the Human Settlements and Housing Sector Plan is not only to have a plan that enables the City to respond appropriately to its housing challenges, but also to outline the City's housing goals and objectives which will guide all housing stakeholders of the City.

After considering the envisaged human settlement policy objectives of the provincial and national government, as well as the development goal and objectives of the City (IDP), the following human settlement and housing vision is proposed for the City:

"To be an innovative champion in the creation of affordable integrated and sustainable human settlements."

Realising the vision is a goal that requires robust actions and collaboration amongst all housing stakeholders of the City. For a considerable amount of time, the City focused on the provision of houses and basic services. The proposed vision, however, calls for an approach that will support and bring change in the social, spatial, and economic conditions of all people of the City. The City will therefore seek to achieve the following objectives in human settlement and housing delivery:

- 1) **Objective one:** provide human settlement opportunities and options that address a range of housing demand.
- 2) **Objective two;** ensure that human settlement planning and delivery contributes to the overall spatial development and integration objectives of the municipality by guiding investment by both government and the private sector.
- 3) **Objective three:** identify national housing programmes that respond to local housing demand and will assist the municipality in meeting its strategic human settlements objectives.

- 4) **Objective four:** address both the short and long-term needs of households within informal settlements and backyards.
- 5) **Objective five:** ensure sustainable human settlements by ensuring inter-governmental and inter- sectoral alignment of programmes and projects.
- 6) **Objective six:** undertake housing delivery in a manner that will contribute towards effective, efficient, integrated and sustainable urban management, and.
- 7) **Objective seven:** build institutional capacity through municipal housing accreditation.

Strategic Human Settlement interventions (2023/2024 -2025/2026)

In response to human settlements and housing challenges, the City has identified and will implement strategic interventions that will support the realisation of the housing objectives.

Promoting inclusionary housing

The City's spatial pattern is a true reflection of the apartheid legacy that should be dismantled by all means possible if a truly a truly viable spatial form is to be achieved. One of the tools identified to support this objective is to determine an inclusionary housing framework for the City. Inclusionary housing is a mechanism to incentivize the private sector to develop well-located affordable housing.

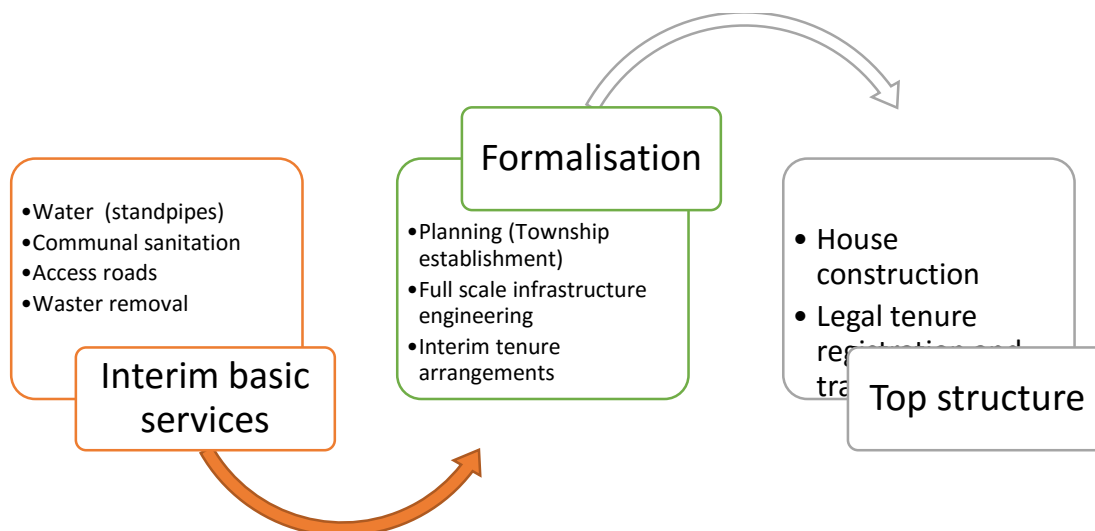

Inclusionary housing is not yet tried due to lack of guiding framework. This has since created a housing market where affordable housing stocks is area based. One of the housing areas most overlooked and possible to advance inclusionary housing is the public-driven social housing sector. Social housing projects are mostly from public funds with private top funding. Potential or eligible tenants are mostly low to middle-income households earning from R3 500 and up to R 22 000 per month, as eligible beneficiary standard of the National Housing Code. The reality however is targeting market is weakening to a point that the City's SHI finds it hard to collect rentals. Although rental fees idled since 2011, collection remains difficult. Influential

factors to the challenge include inflation and to some degree public perception. These key factors stiffen rental affordability which in turn intimidates the overall viability of rental housing.

The existing model of bridging public funds for social housing delivery is open ended. Whilst provision is made for income groups eligible in terms beneficiary standards of the National Housing Code, there is nothing stopping the SHI from taking the initiative of introducing inclusionary housing (mixing individuals from different income groups in one rental housing project) to promote social cohesion and viability.

Informal settlement management and upgrading

The City has made considerable progress in managing and upgrading informal settlements. Families of the last two remaining informal settlements of Seshego F (Freedom Park) and Polokwane Extension 106 are being relocated to permanent and serviced Townships of Polokwane Extension 126 and 127. The City's approach to informal settlement upgrading has proved effective in managing the proliferation of existing settlements, while complementing national informal settlement upgrading guidelines. Recognizing that informal settlements cannot be delivered at a sufficient rapid response and at scale, the City approach thus followed an incremental approach to upgrading, taking basic service delivery as the initial step of the overall upgrading process.

By all means, the City's preferred the *in situ* upgrading approach, as opposed relocating residents to new a residential area. Where relocations occur, it is simply due to the high household densities and environmental conditions of the settlements. But regardless of temporary or permanent relocation, the City embraces community consultation/participation and basic service delivery for the relocating community as key success factors of the relocation process.

There is a range of underlying constraints that naturally affects the response rate. The constraints include:

- a) Insufficient budget to cover the huge capital costs required (planning, infrastructure, as well as housing).
- b) A severe shortage of suitable land.
- c) Constrained bulk infrastructure.
- d) The nature of informal settlement (location, high densities).

Table 3.2: Informal settlement Upgrading Plan

Settlement	Intervention	Nature of support	Funding					
			Yr. 1	Source	Yr. 2	Source	Yr. 3	Source
Seshego F (Freedom Park)	Relocation	Allocation of serviced site (water & sanitation)	22/23	HSDG				
Extension 106	Relocation	Allocation of serviced site (water & sanitation)	22/23	HSDG				
Seshego F (Freedom Park)		Top structure			23/24	HSDG		
Extension 106		Top structure			23/24	HSDG		
Seshego F (Freedom Park)		Tenure upgrading					24/25	HSDG
Extension 106		Tenure upgrading					24/25	HSDG

Informal Settlement Management Plan

Informal settlements are generally lodging places for the urbanizing poor characterized by continuous in and outgoing of people. If unmanaged, such trends are likely to impact on overall planning and budgeting for the upgrading. To curb such glitches, the following City's mechanisms include:

- a) Recognizing the existence of informal settlements.
- b) Assessing settlements in respect of geographic location, land status, and level of development.
- c) Surveying the community to determine the total number of dwellings and recording residents.
- d) Taking aerial photos of each settlement to reflect on the existing housing conditions and extend of the settlement.
- e) Creating a database of informal settlement.
- f) Marking the external edges of the settlement to define boundaries that prohibit settlement expansion.
- g) Conducting regular inspection to monitor illegal construction of new structures.

Preventing land invasion

In the past years, new settlements have emerged on the urban fringe of the City. Some residents have occupied public and private owned land under different circumstances including land claims. Regardless of such circumstances, illegal and uncontrolled occupation of land has a negative impact on the development plans of the City.

Preventing to unlawful and unplanned occupation of immovable properties across the City requires comprehensive guidelines that reinforces resources and defines the role and responsibility of each land owner in preventing illegal occupation. The City has taken the initiative of identifying properties prone to invasion, obtained preventative Court Order, and contracted the service of a private security to monitor such properties (City and Seshego area). Although this has proved helpful, its only ad hoc and not comprehensive enough for the entire City.

The first step, therefore, towards effective prevention of unlawful of uncoordinated occupation of land therefore will be to identify and or develop guidelines. Other than that, the City is intending of developing a Precinct Plan (Dalmada and Kalkfontein Precinct Plan) to curb invasions, promote coordinated settlements and compatibility of land uses. This will result in establishing new Nodes and encourage development which is in line with the provision of the Polokwane/Perskebult towns Planning Scheme, 2016.

The identified PHDs of the City include the Polokwane south-western gateway, the Polokwane R71 corridor, Leeukuil farm, and the Sengatane-Bloodriver. These Priority Housing Development Areas are experiencing fast growth and somewhat unplanned development. Transforming these regions is crucial in overall objective of creating integrated and sustainable human settlements.

Acquiring and holding land for new human settlement developments.

Sustainable human settlement follows sustainable availability of well-located land. The challenge however involved balancing land delivery for all social and economic needs of the community and overcoming the hurdle of financing its acquisition and development. A sustainable human settlement development process cannot be realised if suitable land parcels are made available for such development.

The Spatial Development Framework and other planning prescripts of the City clearly directs where development should head in the medium and long term. But the challenges remain ownership of land parcels. On the other hand, planning frameworks put limitation on the development of available land parcels.

The City has identified Council owned land (to the Northern, Western and Central Business District) suitable for the medium-long human settlement development. Government owned land within the City which are suitable for human settlements will further be identified and acquired in accordance the City's land acquisition and disposal policy. The Housing Development Agency (HDA) will be used to facilitate the acquisition and release of State-owned land within the City for human settlement development.

Affordable public rental housing stock

The Strategy for social housing delivery is to create a robust environment for affordable and well managed rental housing across the City. The two City housing estates, managed through a municipal entity, offers affordable rental accommodation to approximately 697 households. The strategy, already in motion, is to increase affordable rental housing stocks to cater for a variety of income groups. The City is moving away from its conventional way of public rental housing delivery to a new model of partnering with the private sector (Public-Private Partnership). This model will ensure that the City delivers good and affordable rental housing at a proportional rate. The City has identified and declared restructuring zones in areas around the City. This step will enable the City and its investors in affordable social housing to access top-up funds for the implementation of their projects. The designated regions are deemed suitable for achieving spatial transformation, social cohesion, and economic development. The physical location and immediate set up of regions support the material needs of the community in terms of basic services, transport, economic opportunities, and community facilities.

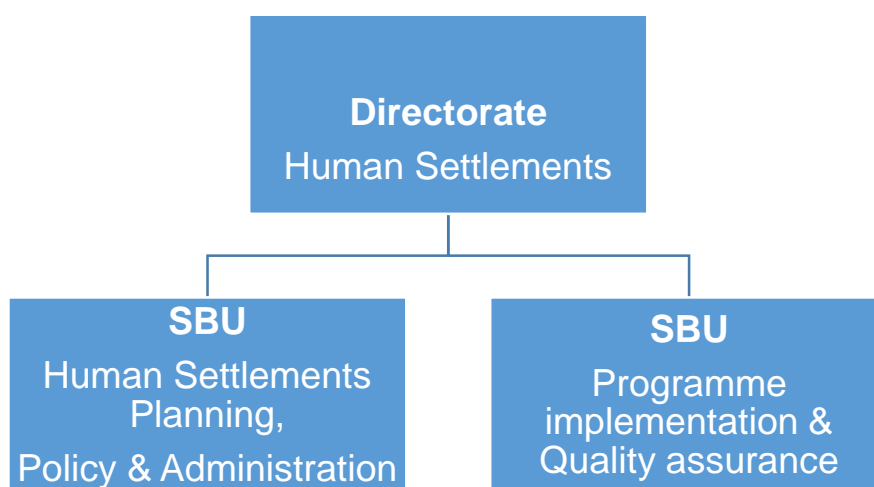

Building institutional capacity

The accreditation of the municipality (Level 2) means that the City will, on an incremental basis; perform functions traditionally performed by the provincial human settlements Department. As such the City should demonstrate capacity to perform functions associated with the level of accreditation, which includes:

- a) Project evaluation and approval.
- b) contract administration.
- c) subsidy registration.
- d) programme management including cash flow projection and management, and.
- e) technical (construction) quality assurance.

To ensure effective execution of the functions, the City has developed and adopted a new institutional structure (organogram) for human settlements in 2019 where Human Settlements was established as a Directorate. A high-level reflection of the organogram is displayed in the below figure.

Figure 3.2: High-level Human Settlements Directorate structure

An Implementation Protocol (IP) is yet to be signed by the MEC for CoGHSTA and the Executive Mayor. Once signed, it will enable the City to gain access to capacity building resources such as skills training and staffing.

The SBU Human Settlement Planning, Policy, and Admin

This is a compact unit that provides a range of services which largely focuses on providing strategic guidance to all activities of housing delivery. Working together with different government institutions including internal functionaries, the unit is responsible for the development of a five-year Human Settlement Plan, planning for human settlement development, monitoring programmes towards the creation of sustainable human settlements. The unit manages the housing demand database. Further, the unit provides a multitude of administrative support services that includes administration of the National housing subsidy system, general office administration, and clientele services. The Housing Consumer Education programme is also executed by the unit.

The SBU Programme Implementation and Quality Assurance

manages housing projects through the application various project management strategies to ensure timely production of deliverables, adherence to build environmental norms and standards, identification and unlocking bottlenecks in the implementation of projects, and coordinates local stakeholder involvement in such projects.

Title Deed Restoration

By registering and transferring ownership, a variety of benefits can be derived. Firstly, a functional property market is stimulated. Economic opportunities are unlocked. Security is for the approved beneficiary and his household. The programme is by far the greatest method of redressing the injustice of the pre-democratic policies that prohibited households across City from property ownership. The tenure backlog of the City is largely concentrated in the area of Seshego, Mankweng, and Westernburg. The aim of the City is to prioritise and finalise legal registration of Townships so as to enable registration and transfer of properties within the Townships.

Chapter 4: Programmes and projects

The aim of this Plan was to assess and analyse the housing environment of the City, identify challenges and opportunities, determine strategies from which housing projects will be launched and coordinated to facilitate access to adequate housing by the people. In this chapter therefore, the Plan outlines housing projects scheduled to be implemented in the short-medium term period. The City will largely make use of the national housing subsidy programmes. A summary of the housing subsidy programmes is provided in Table 4.1 below.

Table 4.1: Housing subsidy programme explanation and implementation framework

PROGRAMME	DESCRIPTION	IMPLEMENTATION FRAMEWORK
Rectification housing subsidy programme	Facilitates for the improvement of Pre-1994 as well as housing stocks developed shortly after 1994 that are structurally compromised.	Funding may either be used for the improvement/upgrading of municipal engineering services where inappropriate levels of services were delivered or structural improvement of State-owned properties (Provincial Government or the Municipality) where such properties are structurally compromised
Finance Linked Individual Subsidy Programme	Facilitate access to housing (<i>existing house or vacant serviced stand linked to a building contract</i>) available in the secondary market	Beneficiaries may not be registered on the City's housing demand database but must meet the qualification criteria of the NHC.
Consolidation housing subsidy programme	Programme provides funding for the completion of houses on serviced stands provided by the State as part of the Pre 1994 Government housing schemes	Only original beneficiaries of the properties who meet minimum qualification criteria of the NHC can participate in projects planned under the programme
Enhanced People's Housing Process	Programme provides assistance to households who wish to enhance their houses by participating in the actual building of their houses	Beneficiaries may be organised communities or willing applicants registered on the City's housing demand database. Additionally, beneficiaries must meet the minimum qualification criteria of the NHC
Integrated Residential Development Programme	The programme provides for the creation of integrated human settlements and access to housing in two key phases (1) acquisition, planning and servicing of land (2) sale of properties and construction of subsidy houses for qualifying households	Beneficiaries of State funded houses must be registered on the housing demand database of the City and meet the qualification criteria of the NHC. Beneficiaries of residential stands not earmarked for State funded housing as well as non-residential will follow approved Council processes for the acquisition of the stands
Informal Settlement Upgrading Programme	Programme facilitates incremental upgrading of the environmental conditions of people living in informal settlements by advancing basic services, tenure security, and housing as key elements of the upgrading process	Only people living in an informal settlement subject to upgrading may participate in informal settlement upgrading projects subject to qualification criteria of the NHC and Council processes and procedures

Rural housing subsidy programme	The programme funding for the building of houses in areas of communal tenure where beneficiaries hold uncontested rights proved in the form of a Permission To Occupy certificate	Adding to the qualification criteria of the NHC, beneficiaries must be residents and in occupation of a stand on communal land
Community Residential Units	The programme provides funding for the building or remodeling of buildings for rental housing accommodation for families whose basic monthly household incomes falls below R3 500. 00	Beneficiaries registered on the demand database of the City SHI and meets the qualification criteria of the NHC
Institutional Subsidy Programme	Subsidies for constructions of multi ranged tenure rental accommodation for families whose basic monthly household income is between R3 501 and R22 000	Beneficiaries registered on the demand database of the City SHI and meets the qualification criteria of the NHC
Social housing	Bridging finance to SHIs for medium/high density rental housing development in restructuring areas	Registered families who meet the qualification criteria of the NHC

Conclusion

This Human Settlement Plan provides the basis for coordinating cross cutting tasks essential for the City to deliver on its housing goals. The overall objective of the City is to ensure progressive access to adequate housing opportunities by all communities and citizens of the City. As in this HSP, a range of projects will be undertaken to ensure and support the creation of integrated sustainable human settlements where families shall live in durable and secure accommodation. At minimal, the goal of the City is to upscale delivery to reach a yearly delivery of at least 1 500 housing opportunities to a variety of income households.

14.2.7 Disaster Management Plan

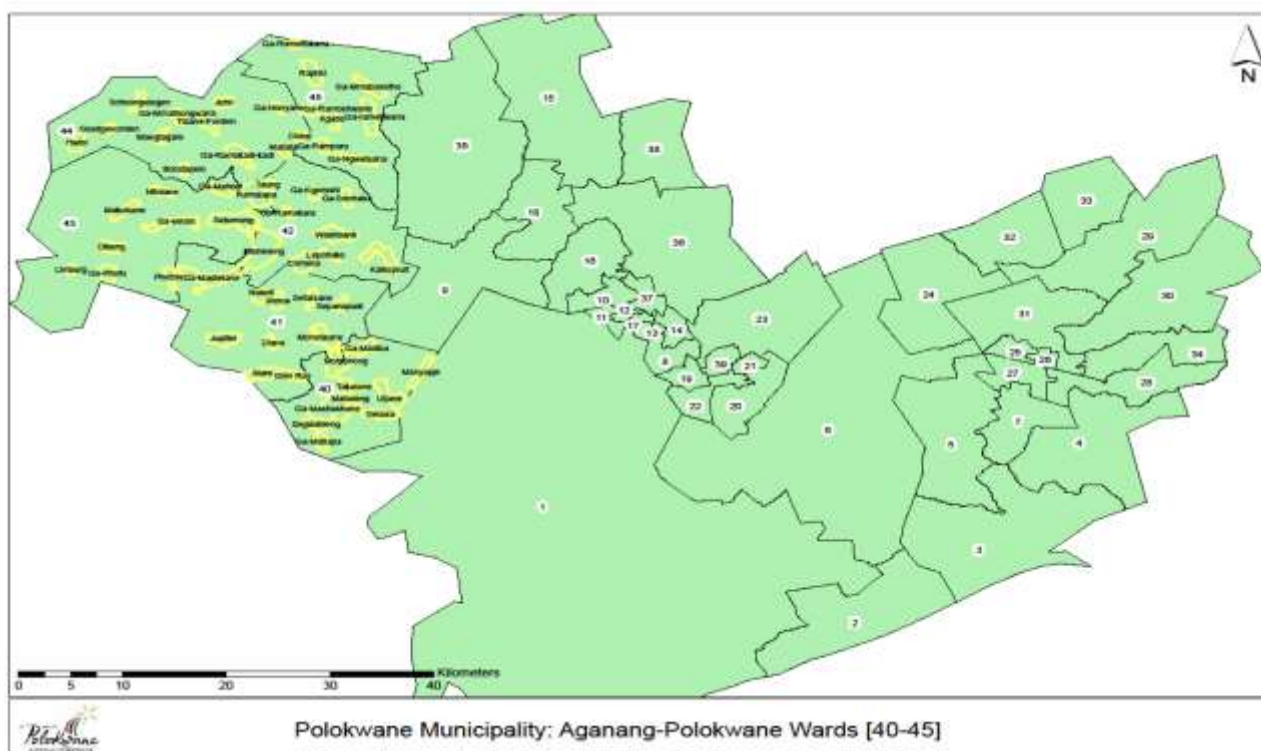

The Disaster Management Act, 2002 as amended read with National Disaster Management Framework lays down institutional and coordination mechanism for effective Disaster Management (DM) at the Municipal level in terms of Section 53 of same Act.

As mandated by this Act, the Municipality established the **Disaster Management Advisory Forum** for intergovernmental collaboration on disaster related activities.

Introduction and background

Section 26(g) of the Municipal Systems Act 32 of 2000 read with Sections 52 and 53 of the Disaster Management Act 57 of 2002 as amended compels each municipal entity to develop a prospective disaster risk management plan as part of and an integrated part of their Integrated Development Plans. This plan establishes the arrangements for disaster risk management and has been prepared in accordance with the requirements of the Disaster Management Act, 57 of 2002 (the Act) as amended and section 26(g) of the Municipal Systems Act, 2000.

Profile and map of Polokwane Municipality

Structural and/or Organizational Institutional Capacity in the Municipality

Several organizations and infrastructures exist to assist Disaster Management Component to be able to confirm its capacity in terms of preparedness planning as well as response. Structural cold site infrastructures are available across the entire municipality to assist as the Emergency Incident Management Centres close to the affected area.

The Municipality is consistent of 14 Tribal Councils and Halls, South African Social Security Agency pay point halls in each village, Municipality Community Halls, 7 police stations, 3 fire stations, sports ground facilities, schools, four provincial and two private hospitals and community-based churches which can serve as emergency shelter for disaster victims.

Based on the availability of Gateway International airport as well as Transnet Fire Services, capacity can be increased to huge structural fires when needed.

Additional Fire Station is currently under construction at Ceres in the Aganang Cluster to complement the proximity distance to villages in that Cluster.

Constitutional, Legislative and Policy imperatives

Provisions of Section 44. (1) A municipal disaster management centre-

- (a) Must specialise in issues concerning disasters and disaster management in the municipal area.
- (b) Must promote an integrated and co-ordinated approach to disaster management in the municipal area, with special emphasis on prevention and mitigation, by-
 - (i) Departments and other internal units within the administration of the municipality, and, in the case of a district municipality, also by departments and other internal units within the administration of the local municipalities in the area of the district municipality:
 - (ii) All municipal entities operating in the municipal area; and (iii) other role-players involved in disaster management in the municipal area.

Status of Polokwane Disaster Risk Management Plan as per National Disaster Management Framework

Level 2: Prospective Disaster Risk Management Plan

A level 2 Disaster Risk Management Plan focuses on the following:

Disaster Risk Management Plan (three years' implementation period)

Establishing processes for a comprehensive disaster risk assessment.

Identifying and establishing formal consultative mechanisms for development of disaster risk reduction projects and

Introducing a supportive information management and communication system and emergency communications capabilities.

Integrated Institutional Capacity

Disaster Management Structure

Disaster Management is a Sub Unit of Disaster Management and Fire Services within the Community Services Directorate.

Primary responsibilities of Disaster Management

Disaster Management acts as a coordinating responsibility or function wherein each line function department is expected to execute its statutory provision in line with that institution's functions key tasks.

Disaster Management Advisory Forum

Disaster Management Advisory Forum is established in terms of section 51 of Disaster Management Act of 2002 as amended and chaired by the Member of Mayoral Committee responsible for Community Safety Portfolio Committee as the Chairperson or any delegate nominated by the Executive Mayor.

Establishment of the Unit of Disaster Management Volunteers.

Pursuant to section 58(1) of the Act (DMA-57/2002 as amended) a municipality may establish a unit of volunteers to participate in disaster management in the municipality. Such Unit of Volunteers is established from Capricorn District Municipality to assist the local municipality in realising some of its objectives.

Mainstreaming gender perspectives and special focus in Disaster Management

Whilst Disaster Management activities do not discriminate against gender and human physical condition its common nature in the level of vulnerability differs in line with institutional capacitation and response measures. Such special focus includes the following disciplines.

Women or Females, Breastfeeding, Children or Child headed Families, Physically challenged human beings; Aged etc.

4. Disaster Risk Assessment

Disaster Risk Assessment Process

The process of hazard identification as well as risk assessment through to treatment or the mitigation process should continually be monitored and reviewed of what hazard they have identified and whether the strategies proposed are feasible, reasonable and appropriate. In order to monitor and review their actions, they will need to consult various stakeholders.

Risk Prioritization

Disaster risk profiling assessment identified within the community always produces compendia of hazards that must be addressed.

Risk Assessment Methodology

Risk=Hazard x Vulnerability /Capacity. Risk Quantification results rates from **01-30%** (Insignificant-Tolerate), **31-50%** (Negligible-Tolerate and Transfer), **51-70%** (Marginal-Transfer and Treat), **71-85%** (Critical-Treat and Terminate), **86-100%** (Catastrophic-Terminate)

Affected communities as per different wards.

The following results reflects the report provided by Ward Councilors in terms of the risk quantification in their area as per Figure 3 below. (2022/23-Risk Quantification Matrix)

Chart 2: Hazard Risk potential per Ward in Percentage (%) as per 2023/24 graph

GRAPHIC RISK/HAZARD GRAPHIC ILLUSTRATIONS FROM 2015 TO 2022

HAZARD PROFILE MATRIX FOR 5 YEARS

Other Critical Hazards and Areas

Residential sites in the Flood line or water flow stream

- a) Mankweng Unit G
- b) Mamadimo Park
- c) Motinti and Setlogong
- d) Moremadi

Medium/High risk events

Medium to High Risk Events (known or unknown) happens in various sporting centres in rural and urban settlements as follows: -

- a) Political Events (Rallies) gearing for the 2024 National and Provincial Elections
- b) Overnight music festival with attendance of over 5000.
- c) Soccer events with attendance above 5000 during the night.
- d) Church services with minimum attendance of 5000 to 10million.
- e) Tertiary institutions queue/rows for applications and registrations.

Major Hazards Installation

Major Hazard Installations (MHI) refers to where more than the prescribed quantity of any substance is or may be kept, whether permanently or temporarily; or where any substance is produced, used, handled or stored in such a form and quantity that it has the potential to cause a major disaster. However, in the municipality only Afrox trading on gas is declared or identified in terms of the Occupational Health and Safety Act 85 of 1993 and Regulation no 22506 dated 30 July 2001.

Commercial residential accommodation

The following structures are located within RDP housing settlements as well as in some other houses located in urban and rural areas such as Mankweng and surrounding villages, Residential extensions in Town, Seshego Westenburg and other settlements.

These settlements are categorized as follows:

- a) Residential house surrounded by shacks and or back rooms within the same yard for letting.
- b) Residential site with shacks and back rooms for letting without main house.
- c) Main house for letting.

High Risk Streets in town with plethora of Hazards to Livelihood.

The following streets in town are critically infected with plethora of livelihood health hazards as compound unsafe activities are experienced.

This street contributes to greater amount of illegal activities affecting the safety of the inhabitants in the area extending to the inner perimeter of the town. E.g. (Boom, Bok, Onder, Buite, Dahl between Rissik and Rabe Streets etc.

Deserted Commercial and government buildings.

There is a huge number of buildings non-compliant to land use rights and Spatial Planning and Land Use Management Act. Most buildings do not to comply with Occupational Health and Safety Act, building regulations and spatial planning and land use management. In essence this depicts that most building are unsafe to be occupied.

Hazards priority status 2022/3 Status as per Risk Quantification Matrix.

No	Rural Settlements	Urban/Semi Settlements	Entire Municipality Area
1	General crime	General crime	General crime
2	Road Accident	Electric Failure	Human Disease
3	Drought	Human Disease	Water Supply Failure
4	Water Supply Failure	Water Supply Failure	Hazmat Spillages
5	Illegal Dumping	Hazmat Spillage	Illegal Dumping
6	Hazmat Spillage	Road Accidents	Severe Hailstorms
7	Severe Hailstorm	Illegal Dumping	Severe Thunderstorms
8	Severe Thunderstorms	Severe Thunderstorms	Drought
9	Flash Flood	Hail Storms	Road Accidents
10	Electric Failure	Blasting	Electric Failure

In terms of the current status of the reports from Councillors, the following hazards were confirmed as potential risks in order of priority.

Hazards Priority Matrix in terms of Wards 2022/3 Status as per Risk Quantification Matrix

No.	Ward numbers		No.	Wards numbers
1	18; 43		11	01;15;17;32
2	07		12	16;25;30;26;28;31
3	19		13	06;09;11;12;21;27;45
4	44; 42		14	02;03
5	34; 38; 40		15	30
6	41			
7	4; 08; 10; 23;39			
8	05; 11; 33			
9	14; 22; 35			
10	24;36;37			

Accordingly, critical hazards identified from narratives by Councillors during the 2022/23 Assessment reflected as follows.

- a) Flash Flood
- b) Water Supply Failure
- c) Illegal Dumping
- d) Road Accidents
- e) General Crime
- f) Open Borrow Pits
- g) Electric Power Failure
- h) Domestic Fires

Current Critical hazards identified from Narratives by Councilors during the 2023/24 hazard identification and assessment Roadshows.

- a) Electric failure or Disruption as per the Load shedding and reduction plans (All Wards affected)
- b) General Crime (All wards affected)
- c) Water shortage (All wards affected)

Risk assessment levels and targets

Tribal Councils reports

Tribal Council officials who are conversant with their area were interviewed and able to provide the hazard potential as per the reports below:

Maraba: The following plethora of hazards have been identified in the Community, drought potential, seasonal thunderstorms, human diseases, grass fires in Winter, identified in the community, domestic fires, human and animal diseases, severe hailstorm in Summer, deforestation in Winter, Critical remedial measure needed is for relevant departments and organizations to conduct awareness campaigns to mitigate the identified causal factors over identified hazards.

Mothiba: Sand mining, Poor Vodacom Network experienced. Water supply time Management disadvantages the community as its schedule is not known by the beneficiaries.

Dikgale: Several hazard compendia identified in the community, domestic fires, human diseases, severe hailstorm in Summer, deforestation in Winter, Electrical power failure, eater supply challenges as well as illegal dumping. Critical remedial measure needed is to conduct relevant awareness campaigns to mitigate the identified causal factors over identified hazards.

Bakgaga Ba Mothapo: Moremadi Park affected by floods in summer due to poor spatial development planning. Road accidents at Nobody Paledi and Moremadi, Illegal dumping at Makgwareng, Nobody, Tjatjaneng Moremadi Park, high risk pit latrines in the community and in some schools,

Matlala: Seasonal high risk of food at Setumong, Manamela, Dibeng. Accidents potential at main roads Semaneng, Manamela and Koporase. Illegal dumping at Setumong and Dibeng. Drought, sporadic incidents of structural and veld fires. Unsafe pit latrines in the community and some schools, poor water supply due to operators' inefficiency as well as illegal connection.

Makgoba: Accidents cause by stray animals, low water supply and sometimes none, military base explosions affect the quality of housing structures in the surrounding villages. However, it's imperative for general awareness campaigns to be conducted by each line responsible state department at all times.

Bjatladi: Unhealthy living conditions experienced due to lack of good sanitation where ventilated improved pit toilets could assist. Other areas including Mahlakona, Makgwadibeng, Ga-Potse, Masenya etc. still lacks water service infrastructure even boreholes and tanks Poor Housing Conditions as some houses are still built from mud materials where RDP allocations can be prioritized. Road Networks extremely poor as not maintained. Electric Cables theft and illegal electric connections (Makeke) and in the entire village affecting supply of energy to the community. Congested and unsafe rental hostels/buildings next to the University pose a huge threat to potential structural collapse as occupation certificates purports not to be available.

Moletji: Leokama is the area most flooded during rainy seasons with the main road overflowed and over flooded. Accidents on the Gilead road occur regularly. Illegal dumping happens in all villages. Structural and veld fires occur infrequently in the community. Electricity challenge is experienced whenever there is controlled black out, theft of cables and during serious lightings. Open borrow pits rife in the area after no being attended by the developers. Soil harvesting occurs in local rivers as well as alongside main sandy roads. Gangsterims is also a challenge around Blood River and Mmotong

Mashashane: The following hazards have been identified as plaguing the community of Mashashane-Severe thunderstorms in Summer with great damages to cars and buildings, Cable theft causing electricity breakdown, non-maintained local roads impeding access to the area during rainy periods, and lightings striking resulting in animal and human death.

Makotopong: Myriad of hazards identified in the area, illegal dumping-affecting human and animal health, General crime due to drugs, alcohol and poverty, blasting from Dikgale area, oozing water table flood in residential area, poor water supplies due tom damaged water pump as well as domestic fires due to candles, illegal electricity connections.

Chuene (Ditlou-Manchidi). The Global pandemic effects are also felt by the community where illnesses and unexpected death are experienced. Illegal dumping is still rife in the area alongside R37 where solid waste is dumped in the available Todumo river as well as dangerous Dongas in Maratapelo village and Mosha-Leope alongside D4040 where this dongas shold be blocked from expanding into the main road. Poor road conditions due to heavy rains affects traveling oin local roads between Maja and Chuene Villages. Old and Unsafe Ventilated Improved Pit latrines still posing danger to the society. Shortage of water affects the community though the Chuene dam is within the community access. R37 Road accidents happens frequently as road does not have speed humps and limited traffic officers' patrols.

Mankweng: The global Covid pandemic greatly affect the community as Covid 19 protocols are not adhered to. Water shortage affects the community including the animals where water reservoir is too small and boreholes dry however that elevated water tanks provision can assist the community. Old and Unsafe Ventilated Improved Pit latrines still posing danger to the society. Illegal dumping done all areas however that mobile skip bins can assist the situation.

Molepo: The selling of Expired goods, selling of alcohol to minors is persistent in all the villages without monitoring. Due to high unemployment in the area, house breaking from the youth is regularly recorded. In all this cases, law enforcement offices and other relevant state departments should ensure regular shops monitoring and where possible employment be created. Road accidents due to stray animals are always experienced.

Institutional Hazard Specific Hazards Information

Several departments and other private organizations were interviewed to probe for the organization specific hazards that might ultimately negatively affect the community at large as follow.

Department Health and Social Department:

Three provincial and two private hospitals are located within the jurisdiction of the municipality servicing all communities in and outside the municipal jurisdiction.

Those hospitals are linked to the local clinics in various clusters.

Whilst the above medical centers service the entire community of different illnesses or outbreak, no critical outbreak can be rated **extremely high-risk** disease/burden.

Despite the availability of perennial high-risk disease, (not sporadic), the department conducts public health education/awareness campaigns though the relevant practitioners on daily basis.

Hospitals affected by load shedding and load reduction all the time.

Epidemic preparedness and Response

The prevalence of Waterborne diseases in the municipal area are caused by contaminated food and water after which diseases occurs. Critical identified diseases identified includes human rabies from rapid animals or dogs and Malaria from mosquitos.

The scourge of the Covid19 Pandemic haunts the entire community from virus from different waves where lives are lost. Endless awareness campaigns operations are required to alert community members of measures to prevent the infection as per the Covid19 Health protocols including vaccination.

Disaster Management Plans for the Hospitals and Clinics

All hospitals are supplied with standby generator with limited power, emergency water in the form of tanks/reservoirs as contingency measure.

However, that evacuation plan floor for hospitals is sometimes available or not whilst in some areas where it's available is not rehearsed and not even known by the staff.

As a matter of foundation Disaster Management assisted most clinics with floor plan and related rehearsal in line with provision of the Ideal Clinic Manual.

Inadequate capacity in terms of the Corona Virus quarantine and isolation areas.

Provincial Emergency Management Services

Mutual Relationship between EMS and Fire Services on response and assistance with resources will alleviate poor response capacity to the scene of accident. However, the following has been identified as primary impediments to the execution of the responsibilities:

Motor vehicle accidents/ Busses/Ambulances arising from unpaved roads, potholes, stray animals, over flooded roads are highly likely to occur. Improved road Conditions including signage's, erection of road fences to be strongly considered.

High prospect of hazardous chemical spills with low level knowledge of response can detrimentally affect the community around the scene.

Covid 19 Pandemic affects the departmental operations as victims or community members are not all following Covid 19 safety Protocols during attendance.

Unregistered and unqualified ambulance service companies on the road to the detriment of the patience.

WF Knobel Hospital

Structural condition of the hospital is unsafe to the patience all the time. Hospital wards and kitchens are frequently flooded as water from the high lying areas flows through those building including water from hospital building.

Water drainage systems in the hospital is poor and cannot absorb the pressure from the water from the buildings.

Fire safety equipment or fire extinguishers and hydrants are not serviced as per the prescripts of the national building standards.

During community protests are mostly abrupt that services get disrupted without any prior engagements.

Current sewage ponds unhealthy to the hospital and the surrounding villages as animals or livestock drink water to the exposure to Cholera diseases.

Pholosho Netcare

An over 200 bed hospital experiences shortage of water and energy interruptions. Such interruptions impede the provision of better services to the patients.

Department of Education

Disaster Management responsibility for schools is centralized at head office. No confirmation was found to the effect that schools do have disaster/evacuation plans for any possible emergency as required by the provisions of Section 61(a) of the South African Schools Act 84/1996) read with the Regulations for Safety Measures at School at Public Schools (GG-No 29376/1128 dated 10/11/2006)

Anglo American Platinum mines

Hazards from mine that will affect the community included Significant emission of noxious gasses affecting human inhalation, major air pollution control dam spillage affecting drinking water, bush fires in farm around the mine, possible HAZMAT spillages from transportation trucks.

However, the remedial measures exist in the mine where safety personnel have been appointed to deal with such identified potential threats.

South African Social Security Agency:

Scattered pay points with less beneficiaries creates challenge to the department. Electronic computer networks are very slow that sometimes the payment is postponed for the next day due to cable thefts/frauds as well as heist at areas in Mankweng; Makgoba, Segopye and Dikgale tribal authority areas.

Beneficiaries (young and old) congestions at the Post Offices exposure to the Covid 19 Virus.

Repeated Heists and burglary in some offices (Mankweng, Mothapo and Solomondale) overwhelming the capacity of SAPS where losses to resources is experienced.

Fraudulent policy marketers disguising as SASSA representative robs beneficiaries of their benefits.

Sports Arts and Culture and Municipal Facility

A public event organized in the Municipality creates some challenges to the Department as its responsible to ensure safe events in the Municipality. Crime reports after every event creates challenges to the state. Non-compliant public events pose a serious threat to the community members.

Public Works Roads and Infrastructure

Road signs along the roads are stolen, illegally removed or blocked for own purpose. This also includes the theft of fence alongside roads. Illegal sand mining alongside the main roads and causes silting.

Transnet

Low pressure of water in hydrants, human crossing of the road at an unsafe railway line, stealing of the

Railways carrying hazardous substances transported through settlements and should any accident occur, the closest community will be negatively affected.

Limpopo Economic Development, Environment and Tourism

Water shortage and water pollution in the Municipality is identified as hazard in the Municipality.

South African Weather Service

Climate changes: severe weather, heat or cold, veld fires electricity and criminal activities affects the proper recording of climatic conditions.

Capricorn District Municipality Health Services

Non-compliance of food outlets which might cause food poisoning.

Animals not vaccinated for which animal vector borne diseases might affect members of the community.

Non-Compliance to Covid 19 Regulations and safety protocols

Department of Rural Development:

Differences between Communal Property Associations are rife in the departmental structures. Land Invasions occurs in state lands due to political reasons and sometimes lack of land for settlement development.

Lepelle Northern Water

Alongside the main water pipe, there is illegal connections mainly at Nobody Mothapo and Sophie Mamabolo affecting supply beyond those areas. There is a daily limit in terms of pumped water into the municipality which creates insufficient purified water for public consumption. Load-shedding further compounds the supply of water to the municipality as standby generators are inadequate. In Winter veldfires impedes personnel access to the pump stations to the detriment of the end-users.

Sometimes when the dam is dry need for boreholes is paramount unfortunately budgets incapable to accord the additional supply.

Traffic Department

Heavy Rains (improper drainage system), Driver fatigue (Construction of a 24/7 park station), improper street lighting, Stray animals (establishment of animal pounds) over speeding drunken driving, accidents, traffic congestion (intensify speed law enforcements), falling trees, potholes and illegal hiking spot constitute the primary basis for poor traffic management flow.

Majority of the routes taverns or entertainment areas are locating alongside the main roads where accidents are always registered.

Accidents involving Hazardous Substance loading vehicles creates challenges during accident over safety protocols.

Main streets e.g., Nobody to Paledi Mall, no Maiden Island (Concrete/Steel fence dividing both roads), as such U-turns and unsafe pedestrian crossings occurs dangerously.

Proximity of entertainment centres or taverns close by the main roads creates much danger to road users.

N1 detour off road's problematic without signage's.

Department of Education

Community Protests affecting the learners.

Illegal learner transportation in vans or cars.

Infrastructure challenges. i.e., delayed immediate provision of Mobile Classrooms when the school building is not usable.

Department of Home Affairs

Although xenophobic attack potential within the municipality is still minimal, number of those illegal foreign nationals seems always increasing.

ESKOM

Buildings located under power lines, illegal connections as well as theft and vandalism create challenges to the institution and the municipality.

Load shedding and load reduction impedes sustainability of services energised through electricity.

Municipality Energy Services

Electricity service in urban settlements is supplied by the Municipality on behalf of Eskom The following challenges have been identified by Energy Services; Community exposure to live wires due to theft of meter box or street light covers to sell to scrap metals, fraudulent bridging of meters, unmetered or faulty meters by technicians for money including copper theft, poor maintenance to transformers e.g. the oil leakages creating electric failures, aged and non-serviced infrastructure creates electric shock and breakdown.

Municipality Water and Sanitation

Theft of transformers, illegal water connections, vandalism of boreholes, dry boreholes etc affect water supply to the detriment of the residents.

Increased water supply demand to unplanned residential extensions over limited supply by the municipality and Department of Water Affairs.

Insufficient maintenance budget affects the covering of all areas in terms of resuscitation of old pipe systems.

Municipality By-Law Enforcement

Theft and vandalism of municipality property sometimes during community protests. The illegal use of drugs and other substance abuse increase the criminal activities in the municipality. Continuous influx of illegal hawkers mostly in urban settlements due to the state of unemployment rate.

Land Invasion influx for the ultimate benefiting of RDP houses and proximity to job opportunities.

Regular reporting of cable theft affecting supply of electricity to the residents resulting into blackout.

Department of Agriculture (Animal Health)

The following diseases have been identified to affect animal breeding in the animal farming industry-Listeriosis-(infection with bacteria listeria monocytogenes), rabies (Infection with rabies virus), anthrax (infection of cattle with bacteria Bacillus anthracis), foot and Mouth Disease (Cattle with bacteria-Bacillus Anthracis), black Quartet (Infection of cattle with bacteria-Clostridium Chavoei) Lumpy skin Disease (Infection of cattle with Virus-Capripox) as well as Tick infection (infection with high tick infection). All these diseases may result in animal and human losses either directly or indirectly.

Municipality By-Law as should be intensified to curb the risk of spreads of diseases-e. g. dealing with stray dogs, dogs without owners and feral Cats will reduce the spread of the disease.

Livestock which are not managed by owners are left to sleep on the road risking the food and Mouth Disease as well as road accidents. Poor management of road fences along the main roads and grazing camps to curb uncontrollable movement of livestock.

Polokwane Municipality Cluster Offices

Moletji Cluster:

Leokama is the most affected area by floods in Summer as is situated at a low-lying area after which households ultimately get flooded. High rise storm water drainage systems to divert water from the residents might reduce the damages to the community. Thunderstorms affect all areas in the Cluster however that community awareness campaigns are vital to assist in educating that community.

Accidents and Crime incidents are also prevalent in the area where the construction of speed humps will deter the speeding of the vehicles. If Apollo or high mast lights are constructed, crime prospects will gradually be deterred.

Mankweng Cluster:

In Mankweng Cluster great mushrooming of settlement, for which structures are built from poor quality material. (Wards 06/07/27/28/30/31)

Water shortage and Electricity failure in Mankweng is experienced due to lack of Eskom Electric strength, however that the Completion of the Boyne Substation will assist the grid (Wards 06/07/27/28/30/31). Settlements in the flood line including Mankweng Unit G, Mamadimo Park and Moremadi Park.

Aganang Cluster

Areas in the Cluster are susceptible to the following Hazards-Flash floods, Veld fires, waterborne diseases, Drought, open borrow Pits as well as heat wave. The above identified hazards are prevalent in the entire cluster. Critical hazards identified includes Livestock and Cable Theft, Illegal disposition of wastes including General Crimes is livestock and cable theft.

Causal factors to the hazards identified respectively includes blocked storm water channels, uncontrolled burning, illegal dumping of wastes, overgrazing and sand mining.

Polokwane Municipality Environmental Management

Environmental management hazards identified include flash floods, grass fire, general crime, Water pollution and sewer failure, deforestation and illegal dumping. Storm water drains are blocked that water floods into business or houses whilst some trees fall on to the main roads.

The effect of blocked storm-water drainage systems

Roads and Transportation Services

Critical challenges or hazards affecting the services in the unit includes flash floods impacts i.e., due to rubbish blocked stormwater channels, houses get flooded without any alternative i.e., Serala View, Ladanna, Laboria, Soutehr Gateway, Bendor and Fauna Prk, Asbes Street, Ext 76, Ivy Park, Bok/Church/Pres Kruger streets, Madiba and Lithuli as well as rural settlements like Chebeng Sengatane, Mamadimo Park, Moremadi Park, Mankweng Unit C and G, Khomoschool and Matobole,

South African Police Services 2022/3

Mankweng SAPS-

Drug trafficking and abuse of illegal Substances in the Mothapo Moshate

area including in schools due to uncontrolled tarvens, unemployment and illegal street hawkers.

Theft of cables around Mothapo, Molepo and some parts of Mamabolo area from abundant houses, street lights for sale to the Second hanad scrap metals for money.

Non-Compliant liquor outlets around Mankweng that contributes to crime, road accidents disturbance of peace. Suspension of licences to the non-compliant liquor outlets and taverns is the critical remedy for maintenance of law and order.

GBV cases recorded around Mankweng where extramarital affairs, substance abuse and unemployment remain the contributing factor.

Livestock theft rife around Mamabolo and Molepo area for income due to personal needs and unemployment and community always advised for brand marking.

Mashashane SAPS:

Cases of Missing persons below 16yrs, rape is frequently recorded due to peer pressure are frequently registered in the service.

Contact Crimes on domestic related matters, business robbery, burglary business recorded from gangsterims influence. Theft of cables for cash due to substance abuse is always a challenge

Westernburg SAPS:

Different crimes committed e.g., Illegal substance and drugs abuse rife due to limited recreational centres and lack of awareness in all areas of policing.

Domestic violence from the use of alcohol and drug abuse contributes to the high rate of divorces.

Theft of electric cables in all residential extensions is rife and contributes to high rate of crime house breaking and robberies.

House breaking cases reported from the abuse of drugs and poverty negatively affects property owners.

Disaster Risk Reduction

The disaster risk reduction primary objective is to ensure that all disaster risk management stakeholders develop and implement integrated disaster risk management plans and risk reduction programmes in accordance with approved frameworks.

Communication during Emergency Operation Centre

The Emergency or Municipal Control Operations Centre is a central command and control facility responsible for carrying out emergency preparedness and emergency management functions at a tactical level in an emergency situation and ensuring the continuity of event or incident operations.

The Incident Command Post (ICP) may be created at or in the immediate vicinity of an incident site, although primarily focused on the tactical on-scene response, may perform an Emergency Operations Centre (EOC) like function in smaller-scale incidents or during the initial phase of the response to larger, more complex events. For complex incidents, the Provincial Emergency Operations Centre (PEOCs) may be staffed by personnel representing multiple jurisdictions and functional disciplines and a wide variety of resources.

Integrated Development Plan

Certain Integrated Development Plan projects indicates that a number of other developmental projects contribute to disaster risk reduction in the municipality to some extent. Although those projects form part of the normal line function responsibilities, it already indicates that a vast number of projects are inherently taking issues of disaster risk reduction into account in line with the provisions of PM Bok Manuals (Project Management Body of Knowledge-Manual).

However, following the prerequisite of a proactive disaster risk reduction strategies, it's obligatory to ensure that all development planning is intertwined with the risk reduction objective (Prospective) as opposed to Reactive (Compensatory)

Implementing disaster management

At this stage it should become apparent that although for ease of reference and understanding, the application of disaster management can be implemented in different phases, many aspects could run concurrently, depending on what has been undertaken to date, and/or the level of progress being made with a specific item, or urgency, for that matter.

Preparedness planning

Early warning measures

South African Weather services are able to notify officials through Short Message Service on the Climate related threats for risk avoidance. This means of early warning is specific for

climatic condition line function departments are also responsible for the coordination of their identified potential threats and coordinate the message through Disaster Management Advisory Forum, technical teams for preparedness planning and response capacity enhancement.

Standard Operating Procedures for the identified hazards have therefore been developed for the monitoring of the signs of any threat and related response.

Schools, Community Halls, Community based structures and established Welfare Centers are obliged in terms of the departmental policies to ensure that evacuation procedures during emergencies are observed through the Occupational Health and Safety Component.

Evacuation plans drills/rehearsals.

It is evident that losses from natural and human induced disaster are increasing, causing death, injury to many people, leading to destruction of property. As a result of the current situation, every year people lost their lives, one cannot guarantee that the same can never happen to this institution. It has, therefore, become necessary that preventative measures and possible and effective plans of be decided upon in order to safeguard life and property of the municipality.

Definition of evacuation

Evacuation is defined as compulsory departure or leaving a place in an orderly fashion due to a threat or eminent threat especially for protection of life and property.

Approaches/Variations for Evacuation Exercises

Announced and Planned

A formal discussion of known simulated emergency to test a single or more component or function of the Emergency Management Plan such as “lock-downll drill, shelter in place, drop cover and hold”.

Unannounced and planned

A formal discussion of unknown but planned simulated emergency to test a single or more component or function of the Emergency Management Plan such as “lock-downll drill, shelter in place, drop cover and hold”.

Unannounced and unplanned/Spontaneous

An uninformed and unplanned occurrence to test single or more components or functions of the Emergency Management Plan such as “lock-downll drill, shelter in place, drop cover and hold”.

Disaster Response.

Primary Objective in Response:

Response phase is the most important component of all the processes involved in disaster management, as it determines the effectiveness or otherwise of all the measures taken by all the agencies preceding the disaster. It is therefore necessary to provide for a coordination and response structure at the local level.

It should be highly considered that the aspect of response is twofold:

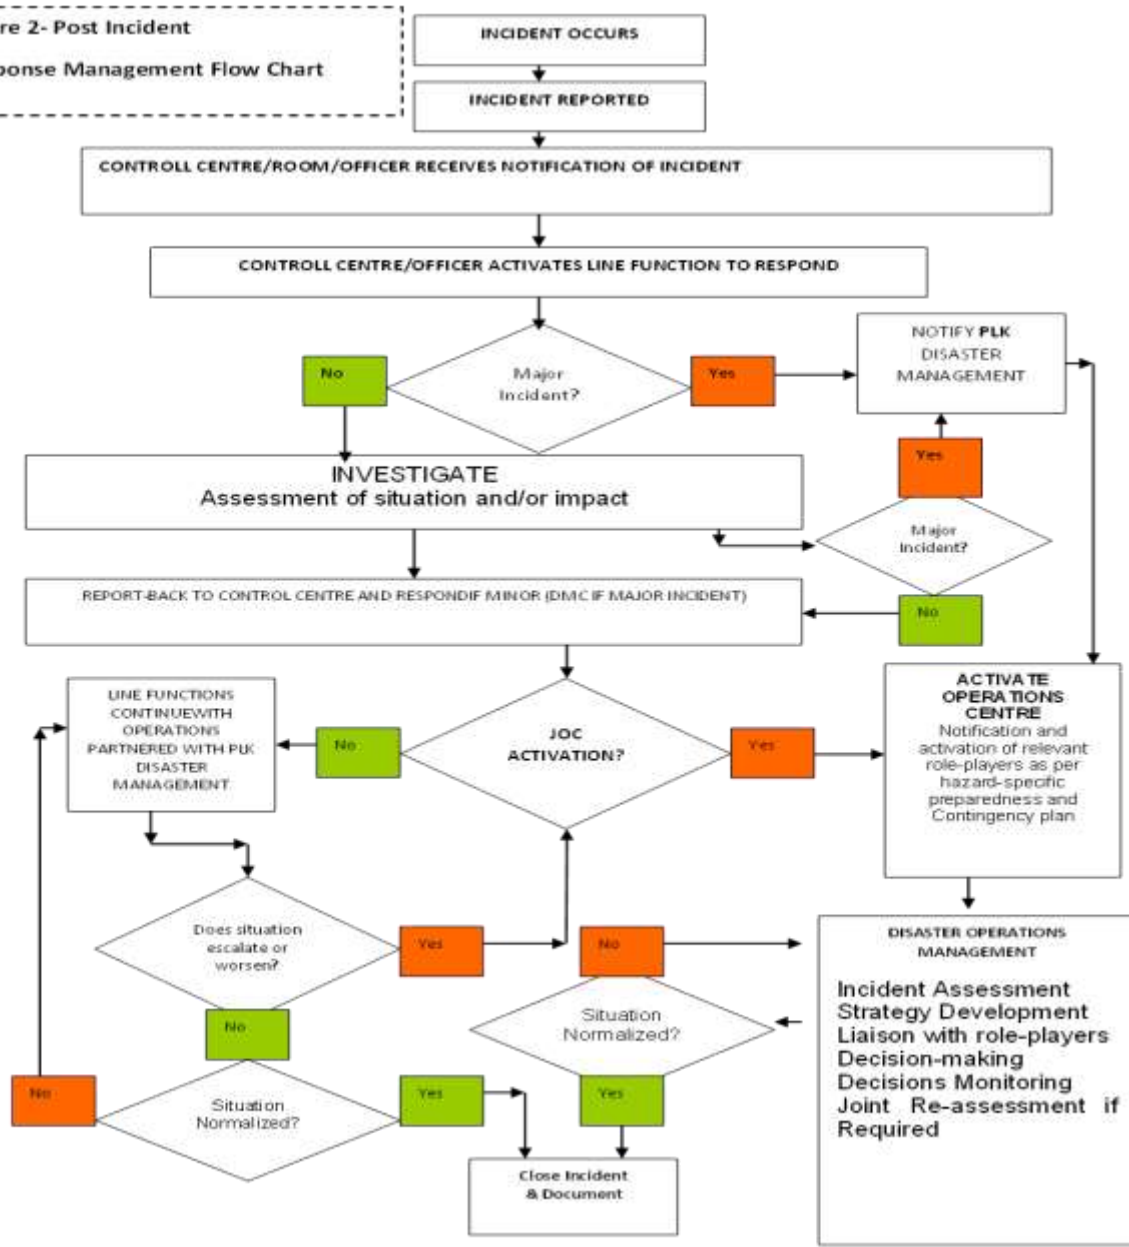

Pre-Incident Response (Institutional Capacity and Preparedness standard)

Post Incident Response (Actual reaction from a reported incident or occurrence)

Critical objective of the plan is to define the capabilities necessary to save lives, protect property and the environment, meet basic human needs, stabilize the situation, restore basic services and community functionality, and establish a safe and secure environment moving toward the transition to recovery.

The response plan describes the roles and responsibilities of all major stakeholders, and coordinating structures for delivering the capabilities required to respond to an incident and further describes how response efforts integrate with those of the other strategic areas.

Figure 2- Post Incident Response Management Flow Chart

Declaration of a state of disaster and disaster classification

Declaration of a local state of disaster:

“Section 55(1) “In the event of a Local disaster, the Council of a municipality having primary responsibility for the coordination and management of the disaster may: - by notice in the provincial gazette declare a local state of disaster if existing legislations and contingency arrangements do not adequately provide for that municipality to deal effectively with the disaster or b) other special circumstances warrant the declaration of a local state of disaster”.

In the event of a local disaster the municipal council may through council resolution or notice declare a local state of disaster if existing legislation and contingency arrangements do not adequately provide for the municipality to deal effectively with the disaster; or other special circumstances warrant the declaration of a local state of disaster. If a local state of disaster has been declared, the Council may make by-laws or issue directions, or authorize the issue of directions to:

Assist and protect the public, provide relief to the public; prevent or combat disruption; or deal with the destructive and other effects of the disaster.

RECOVERY

Key Responsibility for Recovery:

Responsibility for co-coordinating response to specific known rapid and slow onset significant events and disasters must be allocated to a specific organ of state. i.e., responsibility assignment matrix should be completed to assist in the emergency and ultimate short- and long-term recovery measures.

The operational plans and guidelines of the various response agencies that contribute to field operations must be considered when allocating responsibilities for response and recovery. In this regard, primary and secondary responsibilities must be allocated for each of the operational activities associated with disaster response, for example, evacuation, shelter, search and rescue, emergency medical services and firefighting.

Response and recovery operations must also make provision for the delegation of responsibilities of the Head of the Centre and the assignment of alternate arrangements for a Disaster Management Centre in a particular sphere to serve as a contingency Centre in the event that the original Centre itself is affected and unable to continue to operate.

MANDATORY TESTING AND REVIEW OF THE DISASTER MANAGEMENT PLAN

The municipality may regularly review or renew its Disaster Management Plan when it's considered appropriate subsequent to:

- a) The incompatibility of the performance of the plan following activation as a result of a disaster.
- b) Exercises designed to practice or test aspects of the plan shortfall.
- c) Operational procedures have been changed.
- d) Disasters created from the neighboring disasters or incidents.
- e) Introduction of new technologies to enhance implementation processes.
- f) The inevitable changes in the demographics, geographical spaces and boundaries in terms of the demarcation acts and policies.
- g) The impact of any regulations / acts in terms of Section 27(2) of the Disaster Management Act 57/2002 as amended.
- h) It is also of critical importance the emergency response aspects of this plan be exercised at regular intervals. Desktop, walk through and simulation exercises can be used to ensure that all role players know what is expected of them in different scenarios.

ANNEXURE: A

1. ANNEXURE A: Public Participation Report

1. Introduction: Public Participation

1.1 Legislative Requirements

Section 152 of the Constitution (108 of 1996) provides objectives of local government. One of the objectives is to encourage the involvement of communities and community organizations in the matters of local government.

Similarly, section 16 of Municipal Systems Act (32 of 2000) mandate municipalities to develop a culture of municipal governance that complements formal representative government with a system of participatory governance, and must for this purpose encourage, and create conditions for, the **local community** to participate in the affairs of the municipality, including in:

- The preparation, implementation and review of its Integrated Development Plan (IDP).
- The establishment, implementation and review of its Performance Management System (PMS).
- Monitoring and review of its performance, including the outcomes and impact of such performance.
- The preparation of its Budget.
- Strategic decision relating to the provision of municipal services.

In compliance with the above-mentioned legislations, Polokwane Municipality undertook Community Consultation on the draft IDP/Budget in all 7 Clusters during the month of April each year.

1.2. Background

From the Previous financial year (**April 2022**), Polokwane Municipality moved back to conduct **Physical Public Participation** Process on the Draft IDP/Budget Process. This Public Participation Process is conducted in all seven (7) Municipal Clusters in order to get input and comments from the community as specified in Section 152 of the Constitution (108 of 1996) that indicate that, one of the objectives of local Government is to **encourage the**

involvement of communities and community organizations in the matters of local government.

In line with the above-mentioned legislative mandate, and the approved Corporate Calendar of the City of Polokwane, the full month of April (**30 days legislated timeframe**) is already reserved for the IDP/Budget Public Participation Process. Furthermore, the month of April each financial year is the IDP Community Consultation month with one (1) Joint Portfolio Committee scheduled to deal with the compliance report (Sub sec 52(d) Report).

Proper alignment of the dates for the April IDP/Budget Public participation has been done. Hence, there was no clashes of dates for the (Joint Portfolio Committee, MAYCO, Council) wherein the compliance reports will be tabled.

1.3 Draft IDP /Budget Public Participation Schedule

The table below indicates the **2023/24** Draft IDP/Budget Public Participation schedule that was held in all the seven (7) Municipal Clusters during the month of **April 2023**.

The dates for the **2023/24 Draft IDP/Budget Public Participation meetings have been scheduled and held as follows:**

Date	Municipal Cluster / Sector	Venue	Time
05 April 2023	Traditional Leaders	New Peter Mokaba Stadium (Press Theatre)	10h00 -13h00
11 April 2023	Moletjie Cluster	Moletjie Moshate	10h00 -13h00
12 April 2023	Sebayeng /Dikgale Cluster	Bana Bathari Primary School	10h00 -13h00
13 April 2023	City Cluster	Jack Botes Hall	18h00 -20h00
14 April 2023	Mankweng Cluster	Mankweng Community Hall	10h00 -13h00
17 April 2023	Seshego Cluster	Ngoako Ramahlodi Sports Complex	10h00 -13h00

Date	Municipal Cluster / Sector	Venue	Time
19 April 2023	SDA 1	Greenside Primary School	14h00 – 17h00
20 April 2023	Molepo /Chuene /Maja Cluster	Mamatsha (Sehlale all-stars Sports Ground) <u>Ward 04</u>	10h00 -13h00
24 April 2023	Aganang Cluster	Tibane Sports Ground Ga-Matlala.	10h00 -13h00

The Executive Mayor with the Members of Mayoral Committee and Management team convened consultation meetings with communities and stakeholders in all clusters as indicate above.

In all the Meetings, the Municipality presented progress Report on previous financial year projects which was then be followed by presentation of new projects and their budgets.

The CFO Office Presented the Proposed Tariffs Increase and Draft Budget Summary together with indigent support.

For the first time since the arrival of Leeto bus; the Municipality conducted Public Participation on 1st Leeto fare increase and Peter Mokaba Suites Rental Tariff Increase to be effected from 1 July 2023.

Community were then allowed to break away into wards to review their needs guided by what has been budgeted in the draft IDP.The Review of Wards Needs list was led by Ward Councilors but the report back was by member of the community.

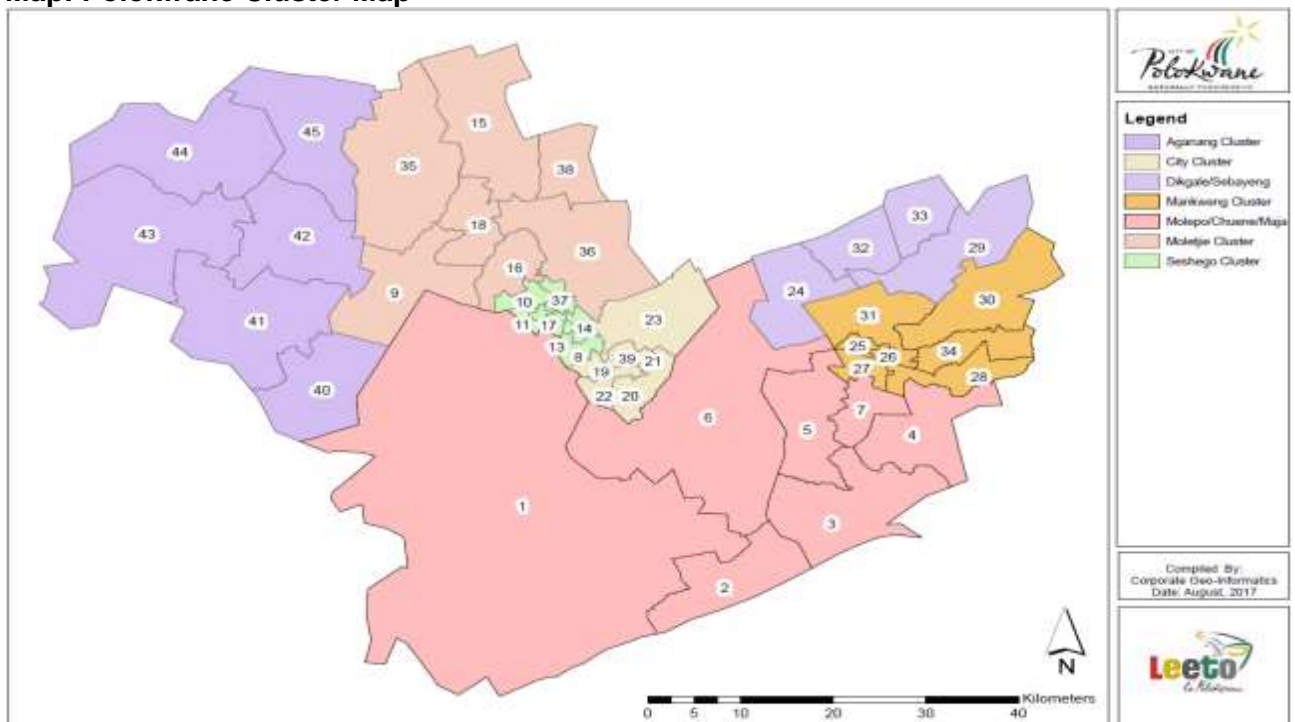

Polokwane municipality is made up of 45 wards, which are grouped into 7 Clusters for administrative purpose, namely:

	Clusters Name	Wards No.
1	Mankweng Cluster	06,07,25,26,27,28, 34
2	Moletjie Cluster	09,10,15,16,18,35, 36,38
3	Molepo / Chuene / Maja Cluster	1,2,3,4,5

	Clusters Name	Wards No.
4	Sebayeng / Dikgale Cluster	24,29,32,33,30,31
5	Aganang Cluster	40,41,42,43,44,45
6	City Cluster	08;19,20,21,22,23,39
7	Seshego Cluster	11,12,13, 14,17,37

2. Reviewed needs per cluster per ward

The needs of the communities are in order of priority. The following are the reviewed top three priority needs per ward: Municipal wards have been grouped according to their Clusters.

2.1 Traditional Leaders Inputs

Date : 05 April 2023
Venue : New Peter Mokaba Stadium (Press Theatre)
Time : 10h00 -13H00

Inputs by Traditional Leaders during Draft IDP/Budget

Comments from Traditional Leaders on the IDP and Budget presentations

Ditlou Matshidi

- Phiri Bridge leading to cemetery
- Government officials operating from Traditional Council need protective equipment's
- Tarring Roads at Ga-Phiri
- Ga Phiri be made part of the IDP.
- Grateful to municipality for potholes that were fixed after engagements, it shows the municipality listens to its community

Makotopong

- Request for road leading Makotopong Moshate
- Water steel tank leaking, not included on the budget
- Fair process on the employment of EPWP
- Highmast be energised
- Sports ground need maintenance and replacement of poles
- Recognition of Makotopong as traditional council by municipal officials, ward councillors and ward committees. Let there be support by means of engagements with traditional council during implementation of projects in traditional council area

Sephaka batho Maja ward 2

- Grateful for Feke road and reservoir at ga Chuene which is about to be completed
- Request completion of Maja sports Complex which is dilapidating without being completed.

Johannes Mamabolo Bjatladi Traditional Council

- Congratulated municipality on the unqualified audit opinion wishing that work harder to achieve a clean audit.
- During the MPAC public participation it was indicated that the municipality returned R132 million was returned to National Treasury, we are pleading with the municipality to use all the funds to avoid this so that we can achieve that metro status we all want.
- Municipality is focusing on new projects and forgetting incomplete projects, plead with the municipality to focus on incomplete projects.
- Ward 29 pleaded for completion of 2 reservoirs
- Project 106/2018 bulk pipe line is complete but is not yielding any water, request booster pump
- Paving from Sekoala to Mehlakong- increase the funding of R5,2 million to complete the road

Maja Traditional Council

- Grateful that municipality talks to traditional council before talking to our community
- Maja sports Complex- security paid for unused property
- Provision of assistance to community sports other than nets and poles for sports field

Mankweng Traditional Council

- Reminder of our previous requests
- Roads from Mamabolo Moshate kgwara, masealama which has been on the IDP before but never done. Engage SANRAL on behalf of Traditional Council.
- Madibethema which is divided between Polokwane and Tzaneen. Encourage Councillor from both side to work together when you provide services in that village.
- Grateful for Mamphaka to Spitzkop road, as well as Segwashi to Spitzkop road and Apollo light at ward 31

Dikgale Traditional Council

- Grateful for Sekoala to mehlakong road, Titibe marobala road, Madiga road, Dikgale moshate road
- Completion of Bemuda road- Mokgopo to Dikgale clininc coming from Mantheding
- Land provided for Sebayeng/Dikgale Sports Complex still no progress
- Sehwebitswane road and bridges

Mamabolo Traditional Council ga Kgoshi Nkoshilu

- Tarring and maintenance of Mamabolo Traditional Council road
- High mast/Apollo light for Traditional Council

Makgoba Traditional Council

- Thankful for Makgoba moshate roads
- Plead for renovation of moshate offices,
- Collection of waste

Ditlou Matshidi Chuene Traditional Council

- thankful on how the municipality has distributed budget
- Road from R37 to silo for the blind be included on the budget
- Plead for bridge on road leading to Traditional Council Office
- Grader for Molepo Maja Chuene cluster

Mothiba Traditional Council

- Energise High mast light/ Apollo
- Tarring of road from Nobody traffic circle to Mothiba moshate which is not included on the presentations

Mashashane Traditional Council

- High mast lights/ Apollo lights for traditional council
- Unfinished projects
- Mhlonong to Kalkspruit road- phase 3 is said to be finished but there's no communication to moshate, now you are introducing phase 4 without completing phase 3
- Congratulate the municipality for unqualified audit opinion.

Moletjie Traditional Council- bahlaloga

- Sports complex – Leokama- plead with municipality to complete the project
- Changing of roads from tarring to paving on roads such as Mulaudzi road,
- Incomplete Matekering to Ga Setati road not on the IDP presented here
- Thankful for Sengatane, Chebeng road ward 16/9
- Energise of chebeng apolo kisght
- Road from Ga Legodi to Moshate
- Stormwater at Leokama
- Rammobola to ramoshoane to Kgabo Park road not on the budget but contractor on site
- Mamadila to gilead road
- Rammetlwane road not on the budget
- Leokama electrification- increase capacity to accommodate Leokama community

Matlala Traditional Council

- Thankful for renovation of traditional council and bridge at Madietane
- Water – thankful for MMC Moakamedi who provided borehole with generator-
- Need reservoir for this borehole so that the generator can last
- Road D3355 from Mhlonong to Matlala clinic- the road will not reach the clinic faster therefore request temporary assistance to cross over rivers while waiting for the road.
- Request for highmast/ Apollo lights at Matlala villages.
- D3382 road to be completion Ipopeng to ga-Magwai, ga-Nong
- D3377 road

2.2 Moletjie Cluster= Wards (09, 10, 15, 16, 18, 35, 36, and 38)

Date : 11 April 2023
Venue : Moletjie Moshate
Time : 10h00 -13H00

The following are the **Top three priority** needs per ward

Ward 9

Ward 9	Priority needs

Subject: Extension 133 we need electricity

Good day,

I would really appreciate it if we can have electricity in all places in Extension 133. Electricity is a necessity life is hard without it, for the past 4 years living in the same condition in a big location like Seshego is not good at all.

The Municipal Manager
City of Polokwane

Sir

CITY OF POLOKWANE: COMMENTS ON THE 2023/24 DRAFT PROPERTY RATES POLICY

Rates Watch (Pty) Ltd was appointed by the South African Property Owners Association (SAPOA) to submit comments on the draft Rates Policy.

SAPOA represents approximately 1,300 companies and organisations (amongst which include the following: ABSA, Nedbank, Investec Property Group, Old Mutual Properties, Liberty Properties, Eskom, Transnet, East London IDZ, Growthpoint Properties, the V&A Waterfront Company, ACSA, Eris Property Group, Encha Properties, Zenprop, Redefine properties, Resilient Properties.).

SAPOA members own and control about 90% of all commercial, retail, office and industrial properties in SA to the value of over R500bn and constitute some of the largest ratepayers in South Africa.

1. Clause 6: Categories of owners of property and categories of properties for purposes of exemptions, reductions and rebates

1.1 Municipal Properties

The municipality has the discretion, in terms of section 7(2)(a)(i) of the MPRA, not to rate properties of which the municipality is the owner.

It is not correct to say that "A municipality is exempted from paying rates" – see clause 6.5.

The municipality must exercise the discretion not to levy rates on its own properties.

This discretion is addressed in clause 4.1 of the current rates policy.

Clause 6.5 should be deleted.

It is suggested this clause be retained.

Chief Executive Officer – C.S. Massel; Directors – S.F. Du Plooy; B.J. Espach; J.N.D. Herman; W.J. Hewitt.
Rates Watch (Pty) Ltd – Reg. No. 2008/024712/07

The proposed wording for clause 4.1

Properties owned by the City of Polokwane will not be levied rates in terms of Section 7(2)(a)(1) of the Act, except for the where:

- Where Council owned property is leased to a third party and the lease agreement provides for the levying of property rates; or
- Where Council owned land is sold to a third and the deed of sale provides for the levying of property rates.

1.2 Places of Worship

In terms if section 17(1)(i) of the MPRA Places of Worship is **excluded** from the payment of property rates. It means that a municipality may not levy property rates on Places of Worship. It is thefore incorrect and also not necessary to include Places of Worship in clause 6.

There is a property category "Places of Worship" and the ratio is 0.

If there is a need to provide more information you could introduce a new clause that deals with exclusions (impermissible rates in terms of section17(1)).

Clause 6.6 should be deleted.

1.3 Pensioners – clause 6.3

It is not clear why all references to pensioners are removed from the clause. The draft tariffs do provide for a rebate for pensioners. It is therefore suggested that the wording of the current rates policy be retained.

2. Requirements for exemptions, reductions and rebates

Why are these requirements removed from the policy. It is best practice to have application forms and that the process is outlined in the rates policy.

It is therefore suggested the wording of the current policy be retained.

3. Section 78 Applications – clause 8.2

It is not necessary to refer to the objection period. There is a clear distinction between an objection and section 78 query.

Proposed wording: *"An application fee is payable to review the value of a property in terms of section 78 of the Act"*

4. Frequency of valuations – clause 8.5

The extension of the validity of the valuation roll is subject to certain conditions and also subject to a maximum term (refer to section 32(1) of the MPRA).

It is therefore suggested to remove: *"A valuation roll remains valid for one year after the date on which the roll has lapsed. Refer section 32 (3) of the act as well as section 130 of the Constitution."*

Regards

Ben Espach
Professional Valuer

Subject: Draft IDP & Budget comments 2023/2024

Good day

Herewith my comments & concerns regarding the above.

Many thanks

Mrs B Marshall

Attached below is their Letter

28 April 2023

For attention: Polokwane Municipality

Re: Budget 2023

To Whom it May concern

I am a resident home owner in Eduan Park and am horrified at the estimated price increases that the Polokwane municipality is proposing.

Service levels are NOT at all what they should be.

When one tries to call the municipality you often cannot get through, and if your call is answered, the operators are often rude and very unhelpful.

The pothole situation in the suburb is atrocious! One feels like you need an advanced driving course to navigate the roads. When municipality workers or contractors are sent to repair the damaged potholes, they last maybe 2 months and then it is even worse. Even to the untrained eye it is obvious that the potholes are not being repaired as they should be.

The water pressure situation is a constant battle. Yet, there is planned development (currently in Diemeer street) and huge planned development for Logan street. Where is the added water going to come from? Will the municipality drill boreholes in the area for water? The water is currently not sufficient to sustain the properties now. What is going to happen when the massive development takes place?

The sewage is much the same. There are weekly drains overflowing and yes, the municipal workers come out to clear them but what is being done about long term needs in this area?

The parks are NOT maintained at all. It is unsightly and a crime risk. The lack of ablutions at "Park Run" is absolutely disgusting as over weekends, there are anything from 20 cars to 60 cars full of occupants partying in that park. We have stopped walking there on a Sunday morning as there is faeces, urine, condoms, food, trash, broken bottles and underwear openly lying all over in the bush.

The trees in the area need to be trimmed away from the electrical lines. A while back it was established that the tripping of electricity every time there was even a hint of rain, in the block between Sevenster street and Van der Merwe street, was as a result of trees touching the lines. About 4 trees were trimmed, promises were made that the rest of the street was going to be done but to date this has not happened. Holland street is not the only street with this problem. Throughout the whole of Eduan Park trees need to be trimmed.

Another huge, ongoing problem is cable theft. EVERY day there are reports of cable theft on one of the Whatsapp groups often resulting in hours of power outages for the residents. What is being done to curb this theft?

I don't think it is fair or just that the municipality keeps on upping the tariffs but we, as payers, must just keep quiet and accept the lack of service. Where is the accountability on the Municipality's side? Where are the Managers falling short in "managing" the staff and making sure that the area is kept up to a decent standard?

I am deeply unsatisfied with the proposed increases.

Yours sincerely
Mrs BE Marshall

2023/2024 IDP/BUDGET: COMMENTS ON THE 2023/24 DRAFT TARIFFS.

Rates Watch (Pty) Ltd was appointed by the South African Property Owners Association (SAPOA) to submit comments on the draft tariffs.

SAPOA represents approximately 1,300 companies and organisations (amongst which include the following: ABSA, Nedbank, Investec Property Group, Old Mutual Properties, Liberty Properties, Eskom, Transnet, East London IDZ, Growthpoint Properties, the V&A Waterfront Company, ACSA, Eris Property Group, Encha Properties, Zenprop, Redefine properties, Resilient Properties.).

SAPOA members own and control about 90% of all commercial, retail, office, and industrial properties in SA to the value of over R500bn and constitute some of the largest ratepayers in South Africa.

We have the pleasure to submit comments on the existing policy and you are requested to consider these comments.

General comments

National Treasury's MFMA Circular 123 (3rd March 2022) showed the CPI projections as follows:

Table 1: Macroeconomic performance and projections, 2021 - 2026

Fiscal year	2021/22	2022/23	2023/24	2024/25	2025/26
	Actual	Estimate	Forecast		
CPI Inflation	4.9%	6.9%	5.3%	4.9%	4.7%

Source: Budget Review 2023.

However, tariff increases for other services should be **cost-reflective** and may change above or below this CPI. **Increases above the guidelines above should be justified** in the municipal budgets.

Chief Executive Officer – B.J. Espach; Directors – S.F. Du Plooy; J.C. Bokhorst; J.N.D. Herman; W.J. Hewitt.
Rates Watch (Pty) Ltd – Reg. No. 2008/024712/07

The proposed tariffs:

Description	2023/24 Medium Term Revenue & Expenditure Framework % increase		
	Budget Year 2023/24	Budget Year +1 2024/25	Budget Year +2 2025/26
R thousand			
Revenue			
Exchange Revenue			
Service charges - Electricity	17.00%	5.00%	6.00%
Service charges - Water	17.00%	5.00%	6.00%
Service charges - Waste Water Management	6.00%	5.00%	6.00%
Service charges - Waste Management	6.00%	5.00%	6.00%
Sale of Goods and Rendering of Services	4.70%	5.00%	6.00%
Agency services	4.70%	5.00%	6.00%
Interest earned from Receivables	4.70%	5.00%	6.00%
Interest earned from Current and Non Current Assets	4.70%	5.00%	6.00%
Rental from Fixed Assets	4.70%	5.00%	6.00%
Licence and permits	4.70%	5.00%	6.00%
Operational Revenue	4.70%	5.00%	6.00%
Non-Exchange Revenue			
Property rates	6.00%	5.00%	6.00%
Fines, penalties and forfeits	4.70%	5.00%	6.00%
Licences or permits	4.70%	5.00%	6.00%
Interest	4.70%	5.00%	6.00%

Although the tariff increases are in line with the CPI, the increases in previous years have been more than the CPI and no increase should be proposed.

The 9% increase in water is also in excess of the inflation rate. Although Lepelle Northern Water is increasing their tariff with 8.5%, this should be queried to be in line with the suggested increase percentage.

Other comments:

1. Municipal Property Rates Act

The Municipal Property Rates Act allows for an objection and a submission in terms of section 78 to be submitted. By determining a fee for these two submissions, you take the right of submission away from many property owners who simply would not be able to pay the fee and wait for a decision.

It is an entrenched right in the Constitution to submit a dispute, in this instance against the valuation entry in a valuation roll, why then determine a fee.

It is noted that a fee is determined for submissions in terms of section 78. It is unfair to expect all to submit objections when the valuation roll is open. At the worst, if a section 78 application is successful, then the fee should also be refunded.

In terms of an objection, it is a fundamental right to object and this fee should be scrapped in total.

It is therefore requested that the fee of R691.57 for the submission of an objection and the fee of R984.44 for the submission of a section 78 application be scrapped.

2. Indigent fee

Although the indigent fee is listed as part of property rates, it does not belong as the indigent basic levy is not a property rates levy, it is a levy in terms of the Indigent Support policy

3. Pensioner rebates

It is proposed that the wording in the Rates Policy and the wording in the tariff determination be aligned to read the same.

Recommendation:

1. That the tariff increases for water and electricity be reconsidered.
2. That the fee for an objection be scrapped.
3. That the fee per section 78 application be scrapped.
4. That the indigent basic levy be listed as part of the Indigent support policy fee structure.
5. That the following be noted and the budget be reconsidered:

The economic burden of COVID-19, the recession and lower GDP growth outlook on our economy is being ignored by the municipality.

The effects are also reflected in the worsening of the exchange rate as well as the predictions made on economic growth, which has been continuously revised downwards by National Treasury.

In this environment it is important that all role players create an environment which minimise the negative effect and set the stage for renewed economic growth.

As such, it is our plea to the City to take cognizance of the dire state of the economy and the financial predicament of many of its ratepayers and to adjust its proposed budget accordingly. This is not a time for a "business-as-usual" budget.

I trust that you will find the above in order.

Kokkie Herman

Polokwane Municipality
PO Box 111
0700, Polokwane

Dear Ma'am

PUBLIC PARTICIPATION RELATED TO THE 2023/24 DRAFT IDP/BUDGET: PROPOSED LEETO LA POLOKWANE PHASE 1A FARE INCREASES FROM 1 JULY 2023 TO 30 JUNE 2024.

The following refer:

- a) The above-mentioned.
- b) Previous discussions between Westenburg Taxi Association (WTA) and Polokwane Municipality concerning Leeto la Polokwane fare increases.
- c) The Public Notice given by Polokwane Municipality in terms of the Municipal Systems Act (32 of 2000) Section 16 which mandates municipalities to develop a culture of municipal governance that complements formal representative government with a system of participatory governance, and must for this purpose encourage and create conditions for the local community to participate in the affairs of the municipality. Similarly, Section 152 of the Constitution (108 of 1996) provides the objectives of local government. One of the objectives is to encourage the involvement of communities and community organizations in the matters of local government. Guided by the above-mentioned legislations, Polokwane Municipality conducted the Public Participation Process on the 2023/24 Draft IDP and Budget in all 7 Municipal Clusters from the 5th of April 2023 to the 24th of April 2023.

The following are relevant:

- a) WTA members were identified as Affected Operators for the Leeto La Polokwane Phase 1, as part of the signing of the Memorandum of Agreement (MOA) during 2015 between Polokwane Municipality and the Affected Phase 1 Taxi Operators.

- b) WTA relates specifically to Route F4B, as presented as part of the public participation process.
- c) WTA took note of the proposed fare increase from R6 per trip to R8 per trip from 1 July 2023 to 30 June 2024 for Route F4B.
- d) Leeto La Polokwane and WTA are currently computing on Route F4B, due to the fact that not all WTA Taxi Operators signed a Restrained of Trade Agreement and by implication also did not receive compensation.
- e) The current economic climate in South Africa makes it extremely difficult for the Taxi Industry to operate an economically viable and sustainable public transport business that provides an essential service for workers, scholars, students and shopping-related passengers in Polokwane.
- f) Typical factors that influence the economic climate and ridership of Taxi Operations are amongst others:
 - i) The impact of the Covid-19 pandemic, in terms of job losses and therefore the number of potential passengers.
 - ii) The electricity crisis in South Africa that contributes to job losses and therefore the number of potential passengers.
 - iii) The increase in fuel prices and interest rates that impact the operational cost of taxi vehicles.
- g) WTA believes that the proposed Fare Increase of Route F4B should have been at least R 10.00 to be indicated by WTA).
- h) It is, however, extremely important that the proposed fare increase by Polokwane to R8 per trip for Route F4B should not be reduced by Polokwane Municipality as part of their Council Approval process to prevent unfair competition between Leeto La Polokwane and the operations of WTA.
- i) In conclusion, it needs to be highlighted that the ultimate solution to ensure that the users of public transport ultimately get the maximum benefit for Route F4B is to eliminate competition on Route F4B. The Polokwane Municipality is therefore kindly requested to consider the last mentioned seriously as part of the 12-Year Vehicle Operating Contract Negotiations process and implementation.

Should you require any further information, please do not hesitate to contact us.

Kind regards

12 Comments Received from the Community of Ga Sebati and Podile

DATE 10 MAY 2023.

**TO: THE EXECUTIVE MAYOR OF POLOKWANE MUNICIPALITY
MR MAKORO MOSEMA JOHN MPE AND MEMBERS HIS OFFICE.**

DATE 10 MAY 2023.

Good day.

IDP HELD AT MAMATSHA FOR MOLEPO, MAJA, CHUENE CLUSTER ON THE 20TH OF APRIL 2023.

While appreciating the IDP which was held in our cluster on the 20th of April 2023 at Mamatsha, we are simultaneously greatly concerned for having not catered with transport to

make ourselves available to the venue, which have consequently led to our non-attendance resulted in our necessities being not submitted.

We therefore as the **Community of Ga Sebati and Podile** hence we were left behind making a request to submit our necessities listed as follows.

- 1) Water reservoir. Ga Sebati
- 2) Refurbishment of our community hall, security fence around it and chairs. Ga Sebati
- 3) We also need a community hall at Podile.
- 4) Toilets for our new extensions.
- 5) Pipe reticulation and tap for every household including new extensions.
- 6) Be subsidized with free electricity for all SASSA dependent household.
- 7) Apollo lights at least 2 hence other villages within the ward are already having up to 3 of them.
- 8) Getting our bridges completed.
- 9) Regravelling of Makgopong road at Ga Sebati.

Your consideration in this regard will be much appreciated and thank you in advance.

Regards

- **Hitler kadiaka= 0724689033**
- **Skhina Mojapelo= 0825874970**

Subject: iDP Inputs from Nirvana Residents 2023

Good day Victor

Please find attached inputs by Nirvana Muslim community they are unable to attend due to Ramadan.

Regards

MMC Joosuf Pemma

Attached below is their Letter

IDP INPUTS FOR NIRVANA UNDER WARD 19, POLOKWANE MUNICIPALITY

IDP INPUTS FOR NIRVANA

1. ROADS

The following roads urgently need to be budgeted for in terms of rehabilitating or refurbishing as the condition is extremely bad due to patching and not properly filling the potholes and this is damaging motor vehicles of residents:

- 1) Dubai Street
- 2) Delhi Street
- 3) Monsoon Street
- 4) Truro Avenue
- 5) Aswan Avenue
- 6) Bangalore Avenue
- 7) Orient Drive from Taxila Secondary School to Bombay Drive
- 8) Himalaya Avenue
- 9) Agra Street

2. STREETLIGHTS

The current state of streetlights is extremely bad. Cables have been stolen and nothing seems to be getting done about it. There also needs to be streets lights erected as per the following:

- 1) Khyber Pass has not a single street light.
- 2) Entrance to Nirvana from Lawton Drive to corner Delhi Street
- 3) Lawton Drive from corner Tabriz Street to corner Istanbul Street
- 4) Crescent Drive the Head was removed and not replaced.
- 5) Orient Drive the Head was removed and not replaced.

Cables that were stolen and there is total darkness is a follows:

- 1) Lawton Drive
- 2) Monsoon Street
- 3) Tabriz Street until corner Crescent Drive
- 4) Tagore Street from corner Orient Drive to corner Tungsten Street

3. STORMWATER DRAINS

All storm water drains must be cleaned and repaired. Many are currently on bricks and this is hazardous because if heavy rains fall then there is a risk of the storm water drains collapsing. This can result in accidents for motorists and injuries to pedestrians.

4. NIRVANA TENNIS COURTS

The infrastructure of the tennis courts is in an extremely bad condition. The structure of the fence which the frame (poles) has been cut off and there is a serious risk of the fencing collapsing which can result in serious injury. The entire tennis courts complex requires urgent new fencing and also the building of a practice court in the tennis courts as the current practice courts are far away and not in the best condition.

5. NIRVANA SWIMMING POOL

Currently the Nirvana Swimming Pool has been put of action for over 6 years. There was indication that the pump must be replaced. To date nothing has been done and it is high time the Municipality sort the Swimming Pools out so that residents can benefit during the summer.

6. NIRVANA SOCCER GROUNDS

The Nirvana Soccer Grounds has not been available to the communities of Nirvana and Rainbow Park for the past 7 years and this is due to poor planning and maintenance on the field. Regrettably almost an entire generation has lost out on soccer developments because of the failure of the Municipality to repair the stadium pitch and lights. The Community of Nirvana demand that during the 2023/2024 Municipal Financial Year the Nirvana Soccer Stadium pitch is properly refurbished and sorted out for development and playing purposes and also the high mast lights are repaired so that income to the Municipality can be derived.

7. SIDEPATHS, PAVEMENTS, TREE TRIMMING AND MUNICIPAL LAND

All side paths that are overgrown which should be maintained by the municipality as mainly there are on municipal or government owned land should be prioritized especially along Orient Drive after the Tennis Courts towards Nirvana Hall.

Overhead electrical lines are currently affected by the trees that are not trimmed. Municipality should visit the entire Nirvana and cut trees that are affecting the electrical lines which tends to cut of supply to residents when there is wind or heavy rains.

Vacant Municipal land in Orient Drive next to the tennis courts and also in Bombay Drive are not cleaned and maintained. Thus it creates a haven for criminal and even substance abusers to conduct their illegal activities.

Sidewalks or pavement in many streets need to refurbished or rehabilitated.

WRITTEN COMMENTS FOR IDP OF 2023/2024

1. We address this letter to you in our capacity as a registered community organisation, acting as such through our local AfriForum Branch.
2. As community organisation, we feel obliged to assist you in identifying key areas of improvement in order to continually promote the standards of living, as well as the safety of our members and the general community
3. Section 152 of the Constitution stipulates the different objectives of the local government. More specifically, section 152(d) stipulates that a municipality must encourage the involvement of communities and community organisations in the matters of local government. The municipality's IDP is a very important matter for all residence in the Polokwane area because it has a direct effect on their area.
4. As the time for drafting the IDP for 2023/2024 is coming closer, we would like to form part of the public participation process for the drafting of the municipality's IDP. We want to do this by submitting, in writing, a few pressing issues that we, as an organisation, feel needs to be resolved and therefor needs to be included in the IDP. Thus, please find attached a list of all the issues the we've identified.
5. Because involving community in matters of local government is one of your objectives we trust that you will take this submission into consideration when

drafting the IDP. For this purpose, your attention is directed to Regulation 15 of the Local Government: Municipal Planning and Performance Management Regulations, 2001 (published under GN R796 in GG 22605 of 24 August 2001) which provides as follows:

15 Community participation in respect of integrated development planning and performance management

(1)(a) In the absence of an appropriate municipal wide structure for community participation, a municipality must establish a forum that will enhance community participation in-

(i) the drafting and implementation of the municipality's integrated development plan; and

(ii) the monitoring, measurement and review of the municipality's performance in relation to the key performance indicators and performance targets set by the municipality.

(b) Before establishing a forum in terms of paragraph (a), a municipality must, through appropriate mechanisms, invite the local community to identify persons to serve on the forum, including representatives from ward committees, if any.

(c) A forum established in terms of paragraph (a) must be representative of the composition of the local community of the municipality concerned.

(2) A municipality must-

(a) convene regular meetings of the forum referred to in subregulation (1) to-

(i) discuss the process to be followed in drafting the integrated development plan;

(ii) consult on the content of the integrated development plan;

(iii) monitor the implementation of the integrated development plan;

(iv) discuss the development, implementation and review of the municipality's performance management system; and

(v) monitor the municipality's performance in relation to the key performance indicators and performance targets set by the municipality; and

(b) allow members of the forum at least 14 days before any meeting of the forum to consult their respective constituencies on the matters that will be discussed at such a meeting.

(3) A municipality must afford the local community at least 21 days to comment on the final draft of its integrated development plan before the plan is submitted to the council for adoption.

6. We would like to thank you in advance for taking our submission into consideration and resolving these issues for the community.

Kind Regards

Although I noticed that there are members of, Muni council and staff really working hard to improve service delivery and a positive difference noticed, there is still a long way to go.

If contracts would be given to competent people, doing proper work it would be satisfactory, but although the info I got is hear say from public, it is given to people being bribed for contracts (no exception in our corrupt ridden country) , doing substandard work on fixing roads, pipe lines ext., our city will continue to fall to pieces. Of course the high crime in the city, stealing of cabled ext contributes to failing services,

Regards,

C Botha

Third party Projects (RAL)

Polokwane Municipality is building these roads on behalf of a third party i.e. Road Agency Limpopo, thus the expenditure will have no effect on the asset register of the

municipality, hence going forward the municipality will plan for these projects under the operational expenditure.
