# Game Reserve

## Major tourist attraction – *Polokwane*

5

The reserve was established in 1962 originally as a recreation facility for the residents of the Polokwane area. It was later realized that a significant portion of the reserve included a unique and very threatened vegetation type known as the Pietersburg Plateau False Grassland. As a result, the area was given conservation status and with the acquisition of additional land, was proclaimed as a municipal nature reserve and officially opened in 1971.

Today the reserve conserves one of the largest unspoiled/perfect examples of this habitat, along with its associated plant and animal species.

The surface area of the reserve is approximately 3200 hectares, making it one of the largest municipal nature reserves in the country. The Polokwane region, in which the reserve is situated, lies on an elevated plateau with an altitude ranging between 1200 to 1500 meters above sea level.

The climate is moderate with a mean summer daytime high of 28 C and mean winter night time of 5 C. The average annual rainfall for the area is 478mm.

In order to preserve the unique blend of habits and a great variety of associated bird species it was accorded conservation status in 1991

They attract many seasonal waterfowl and migrant waders and hosts resident species for both the dry western and more tropical north-eastern parts of South Africa. Several interesting mammals occur in the sanctuary including Cape Clawless otter, Water Mongoose, Dwarf Mongoose, Cane Rat, Thick-tailed Bushbaby, Bushpig and Bushbuck. Reptiles and frogs are also well represented by species such as African Rock Python, Nile Monitor Lizard and Giant Bullfrog.

## The Irish House

The Irish House was built in 1886 by a German, August Julius Herman Moschke and it was originally used as a general dealer. In 1906 the building was destroyed by fire. This also destroyed the buildings that were on Market Street.

A victorious building was prefabricated and moved to the city by German immigrant Moschke who was then interned during the world war one. On his arriving to Polokwane he discovered his shop was in a bankrupt state.

He then sold it to an Irish man James Albert Jones who extended it to a fashion house under the name Irish House, where he was selling imported clothes and shoes.

The Irish House remained a business building until 1986 when it was converted into Polokwane Museum to display the diverse cultural heritage of the city by city council of Polokwane.

# HUNTING

19

Polokwane is at the centre of the hunting industry in Limpopo. There are both provincial and private hunting farms and lodges. Provincial hunting farms allow potential hunters to tender for certain quota of animals and for a fee depending on the size of the catch, allow the seasonal hunting of animals that would otherwise be culled for population control. A set of laws clearly states the prerequisites to hunting such as permit and the monitoring of animal species and numbers.
