LOW RESERVOIR LEVELS, A CONCERN

Polokwane Municipality is engaging Lepelle Northern Water (LNW) regarding the worrying reservoir levels affecting municipal supply areas.

Since yesterday, Potgieter and both Krugersburg 30MI Dome and Flat reservoirs have been sitting at a tormenting 0% while Krugersburg 50MI has been on 9% with Seshego at 10%. These levels have left several supply areas without water supply as they have shown no improvement.

While the municipality is monitoring the levels and working on establishing the cause of low levels, water tankers have been deployed to affected areas to assist with water supply.

All water users are urged to use water sparingly. The municipality apologises for the inconvenience caused.
