

## **PUBLIC NOTICE**

*Wednesday, 12 May 2021*

### **POSTPONEMENT OF A PLANNED WATER SUPPLY INTERUPTION BY LNW**

This communique serves to notify the affected stakeholders of the postponement of the planned shutdown which was due to take place on Thursday, 13<sup>th</sup> May 2021.

Lepelle Northern Water (LNW) had planned to disrupt water supply from Ebenezer Scheme but postponed the interruption to Thursday, 20<sup>th</sup> May 2021. As previously communicated, the shutdown is as a result of a reported leak and illegal connections discovered along the main line towards Boyne.

The shutdown is planned from 08h00 until 14h00 on the day, affecting supply to Polokwane supply areas.

Polokwane Municipality advises all stakeholders to limit water consumption to immediate household needs in order for reservoirs to have meaning water capacity. The reservoir levels are still suffering as most of them are still at 0%.
