RESERVOIR LEVELS LOW DUE TO POWER DIPS

Polokwane Municipality has noted that most of high lying areas are without water due to low reservoir levels.

The Sand River North boreholes were off due to loadshedding affecting areas such as Ladanna, Nirvana, parts of Bendor and other areas within CBD.

The Ebenezer Scheme is also experiencing power dips that affect supply to areas within Polokwane Municipality. Lepelle Northern Water indicated that Greater Tzaneen Municipality has been notified about the challenge for urgent intervention.

Polokwane Municipality urges all to use water sparingly so that the reservoir levels can improve.
