

PUBLIC NOTICE

15 March 2021

WATER TANKERS CONTINUE TO PROVIDE RELIEF

Other areas within Polokwane Municipality continue to experience low water supply due to low reservoir levels.

Low reservoir levels are as a result of, amongst other factors:

- loadshedding on the Ebenezer line;
- power failure at Dalmada Purification Plant; and
- pipe burst in Mankweng area.

The pipe burst and power failure are being attended to by the municipality.

In the meantime, the municipality will provide temporary relief measure through water tankers to affected areas.

All users receiving supply are urged to use water sparingly.

Polokwane Municipality apologizes for the inconvenience caused; and further urges all to report water related challenges to municipal water and sanitation helpline at 012 023 5376 / 5629.
