

ELECTRICITY TARIFF POLICY

2025/2026

PREAMBLE

Whereas section 74 of the Local Government: Municipal Systems Act, 2000 (Act No 32 of 2000) requires a municipal council to adopt a tariff policy on the levying of fees for municipal services;

And whereas the tariff policy should at least include the principles contained in section 74(2) of the Act, thus giving effect to the By-Law required in terms of section 75 of the Act;

And whereas the tariff policy may differentiate between different categories of users, debtors, service providers, service standards and geographical areas as long as such differentiations do not amount up to unfair discrimination;

Now therefore the Municipal Council of the Polokwane Municipality adopts the following Tariff Policy:

1. ELECTRICITY.

- 1.1 The guidelines and policy issued by the National Energy Regulator from time to time will form the basis of calculating tariffs.
- 1.2 The Municipality has standardized on the use of Pre Payment Meters for all Domestic Consumers. As such it is compulsory for all new domestic connections to be equipped with Pre Payment Meters. The Municipality has embarked on a program to effect the migration of all Credit Meters to Pre-Payment Meters. The change from Pre Payment Meters to Credit Meters will therefore be disallowed unless special health circumstances exist, in which extreme case a credit meter will be installed by special concession from the Director of Energy Services and by payment of the required change of meter fees as well as the required deposit.
- 1.3 To make electricity affordable to certain categories of consumers, cross subsidization between and within categories of consumers will be allowed, based on the load factors of the categories and consumers within the category.
- 1.4 The fixed costs, or portions thereof, will be recovered through an energy or time-of-use charge.
- 1.5 A basic charge per electricity meter or unit in the municipal area, as determined by the Council from time to time, may be charged against all electricity consumers.
- 1.6 To apply the abovementioned principles, the consumer types and cost allocations reflected in the following table will be used: -
