NATURALLY PROGRESSIVE

ERRATUM NO. 1

BID NUMBER: PM34- 26/27

ERRATUM TO BID DOCUMENT IS AS FOLLOWS:

1. Bill of Quantities
   The BOQ contains a calculation error where the subtotals of the three sections were not correctly consolidated into the overall tender total before VAT was calculated. This could result in bidders arriving at incorrect tender amounts and create inconsistencies when comparing submitted prices.

   1.1 The erratum will therefore correct the calculation and ensure that:

   1.1.1 The three BOQ sections are correctly added together.

   1.1.2 The consolidated amount reflects the correct total before VAT.

   1.1.3 VAT is calculated on the correct subtotal.

   1.1.4 The final tender amount, inclusive of VAT, is correctly reflected.

2. Amendment of Functionality requirements
   During the briefing, prospective bidders raised concerns regarding the qualification requirements for the project team. It was indicated that some professionals hold Mechanical Engineering degrees, together with relevant certifications as Certified Energy Managers and M&V Specialists.

   The current requirement for an Electrical Engineering degree may therefore exclude suitably qualified professionals with relevant experience in energy efficiency, renewable energy and measurement and verification. It is proposed that Mechanical Engineering and Energy Studies qualifications also be accepted alongside Electrical Engineering for the following positions:

   2.1 Project Lead

   2.2 Measurement and Verification (M&V) Specialist

   2.3 Renewable Energy Specialist

MS. THUSO NEMUGUMONI
CITY MANAGER

Technical Capability and Experience of key personnel The bidder must submit CVs of key personnel • NB: Originally certified copies of qualifications along with detailed CV of personnel. Certificates not certified will score ZERO point. • NB: Pr. ECSA registration to be certified with Commissioner of oath valid for not more than six (6) months	30	• Project Lead Project leader must have an Honours Degree in Electrical/**Mechanical engineering**/Energy Studies (NQF Level 8 and above) & Certified Energy Manager (CEM) certificate and plus minimum 5 years' experience after Pr.Eng registration.	5
		• Financial Manager key personnel must have degree in Accounting/Financial/Auditing or related qualification and five years' experience	5
		• M&V Specialist key personnel must have Bachelor's degree/Bachelor of Technology in Electrical/**Mechanical Engineering**/Energy Studies & Certified Measurement and Verification Professional (CMVP) certificate plus minimum 5 years' experience after Pr Tech or Pr.Eng registration	5
		• Electrical Engineer key personnel must have Bachelor's Degree/Bachelor of Technology in Electrical engineering and plus minimum 5 years' experience after Pr Tech or Pr.Eng registration	5
		• Renewable Energy Specialist key personnel must have Bachelor's Degree/Bachelor of Technology in Electrical/**Mechanical engineering**/Energy studies, Certified Solar PV Professional (SPVP) or Certified Renewable Energy Professional (REP) certificate or SAPVIA/AREP Green Card plus minimum 5 years' experience after Pr Tech or Pr.Eng registration	5
		• Electrician Key personnel must have a valid NQF level 4 in electrical engineering as a minimum Qualification. Electrical Trade Test Certificate Wireman licence	5
