WATER RESERVOIR LEVELS AND SUPPLY STATUS UPDATE

Polokwane Municipality hereby provides the latest update on the status of its water reservoirs and supply systems.

The current storage levels are as follows:

RESERVOIR / WATER SYSTEM	CURRENT LEVEL	SUPPLY STATUS
Extension 34 (Ivydale) Reservoir	85%	Able to supply consumers normally.
Ivydale Pump Station	55.9%	Able to supply; the system remains stable.
Potgieter Reservoir	86%	Able to supply consumers normally.
Krugersburg 50ML Reservoir	68%	Able to supply consumers normally.
Reservoir D (30ML)	66%	Able to supply consumers normally.
Reservoir F (30ML)	72%	Able to supply consumers normally.
Thoka Reservoir	61%	Able to supply consumers; residents are encouraged to use water sparingly.
Magowa Reservoir	85%	Able to supply consumers normally.
Seshego Reservoir	7%	Critically low. Unable to sustain normal supply. Consumers may experience intermittent supply and low water pressure until storage levels improve.

BULK WATER SUPPLY SYSTEMS

WATER SOURCE	CURRENT STATUS	SUPPLY CAPACITY
Ebenezer Dam	100.39%	Sufficient raw water available for treatment and supply.
Ebenezer Water Scheme	227.2 l/s	Able to supply the municipal network.
Olifantspoort Water Scheme	92 l/s	Able to supplement the municipal network.
Seshego Water Treatment Plant	6.3 ML/day	Producing water; output remains limited.
SRN Supply	4.2 ML/day	Supplying the network.
Dalmada Supply	12.7 ML/day	Supplying the network.

Residents supplied from the Seshego Reservoir are urged to use water responsibly while municipal technical teams continue to monitor and optimise the water distribution system.

For areas experiencing water and sanitation challenges, kindly report promptly to the dedicated water and sanitation helpline at **015 290 2376**, WhatsApp at **068 290 8736** or the municipality's call centre at **015 290 2000** or via **MyPolokwane Citizen App**, so that the municipality can come to the aid of those affected.
